(2) The Office shall be under the administrative direction and supervision of the Sergeant at Arms. Policies respecting the operation of the Office shall be established by the Sergeant at Arms with oversight of such policies provided by the Committee on Rules and Administration of the Senate.

(3) The Office shall be headed by an Office Manager and shall be staffed with such additional personnel as may be required to carry out the duties of the Office.

(b)(1) It shall be the duty and function of the Office to assist Senators, Senate Committees, and Officers, and employees of the Senate having hiring authority (hereinafter referred to as "Senate employers") in filling job vacancies by making available to such Senate employers pertinent information regarding individuals who are seeking employment through the Office.

(2) In carrying out its duties, the Office shall develop and conduct appropriate tests for clerical and secretarial skills, as well as tests for such other occupational skills as may be authorized by the Sergeant at Arms.

SEC. 2. (a) The expenses of the Office shall be paid from the contingent fund of the Senate in accordance with the paragraph under the heading "UNDER LEGISLATIVE", relating to the contingent fund of the Senate, of the Act of October 2, 1888 (25 Stat.; 2 U.S.C. 68), and upon vouchers approved by the Sergeant at Arms, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

(b) The provisions of subsection (a) of this section shall remain in effect only for the period ending on the date that appropriated funds become available for the expenses of the Office under a provision of law enacted after the date this resolution is agreed to.

SENATE RESOLUTION 194—RESOLUTION RELATIVE TO SENSE-OF-THE SENATE RESOLUTIONS

Mr. PRYOR submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 194

Resolved, That it is the sense of the Senate that there be no more "Sense of the Senate" resolutions.

AMENDMENTS SUBMITTED FOR PRINTING

INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

AMENDMENT NO. 515

(Ordered to be printed and to lie on the table.)

Mr. KASTEN submitted an amendment intended to be proposed by him to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

SPECIAL REQUIREMENTS FUND

Mr. KASTEN. Mr. President, I am submitting an amendment to S. 1196 which would provide for a special requirements fund under the economic support fund. The amendment would provide this fund subject to a 15-day notification procedure.

AMENDMENT NO. 516

(Ordered to be printed and to lie on the table.)

Mr. KASTEN submitted an amendment intended to be proposed by him to the bill S. 1196, supra.

AVAILABILITY OF FUNDS FOR SAHEL DEVELOPMENT PROGRAM

Mr. KASTEN. Mr. President, I am today submitting an amendment to S. 1196 which would condition the availability of funds for the Sahel development program on the maintenance of certain accounting procedures with respect to such funds.

AMENDMENT NOS. 517 AND 518

(Ordered to be printed and to lie on the table.)

Mr. KASTEN submitted two amendments intended to be proposed by him to the bill S. 1196, supra.

AUTHORIZATION OF APPROPRIATIONS FOR CERTAIN INTERNATIONAL PROGRAMS

Mr. KASTEN. Mr. President, today I am submitting two amendments which I intend to propose to S. 1196. One amendment reduces the authorization for appropriations for the American schools and hospitals abroad program from the $12 million reported by the Foreign Relations Committee to $7.5 million as requested by the administration.

The second amendment would reduce the authorization for international organizations and programs from the $229,050,000 as reported by the Foreign Relations Committee to $219,000,000 as requested by the administration.

ECONOMIC RECOVERY TAX ACT OF 1981

AMENDMENT NO. 519

(Ordered to be printed and to lie on the table.)

Mr. BENTSEN submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 520

(Ordered to be printed and to lie on the table.)

Mr. ROBERT C. BYRD (for himself, Mr. JACKSON, Mr. INOUYE, Mr. MATSUNAGA, Mr. MATHIAS, Mr. METZENBAUM, Mr. FORD, Mr. RANDOLPH, and Mr. HUDDLESTON) submitted an amendment intended to be proposed by them to the joint resolution House Joint Resolution 266, supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. DURENBERGER. Mr. President, I would like to announce that the Subcommittee on Intergovernmental Relations of the Governmental Affairs Committee is sponsoring a 3-day forum on "Alterative Service Delivery." This forum will bring together individuals, businesses, nonprofit organizations, and State and

local government officials who have been most active and successful in promoting alternative service delivery. The purpose of the forum is to explore the possibilities of more effective ways to meet public service needs through expanding the role of the private sector and evaluating new strategies for public-private cooperation.

The forum will be conducted at 2 p.m. on July 28 in room 3302 of the Dirksen Senate Office Building, at 9 a.m. and 2 p.m. on July 29 in room 357 of the Russell Senate Office Building, and at 9 a.m. on July 30 in room 318 of the Russell Senate Office Building. Those wishing to submit written statements to be included in the printed record of the forum should send five copies to Ruth M. Doerflein, clerk, Subcommittee on Intergovernmental Relations, room 507, Carroll Arms Building, Washington, D.C. 20510.

For further information on the forum, you may contact Julie Shaw of the subcommittee staff on 224–4718.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to have met during the session of the Senate on Thursday, July 23, to hold confirmation hearings on the nominations of William Dyess to be Ambassador to the Netherlands, John Loeb to be Ambassador to Denmark, and Keith Nyborg to be Ambassador to Finland.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERNATIONAL FINANCE AND MONETARY POLICY AND THE SUBCOMMITTEE ON SECURITIES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on International Finance and Monetary Policy and the Subcommittee on Securities of the Committee on Banking, Housing, and Urban Affairs be authorized to have met to hold a joint hearing during the session of the Senate on July 23, at 2 p.m., regarding S. 708, the Business Accounting and Foreign Trade Simplification Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

DECISION OF PRESIDENTIAL TASK FORCE ON CREW COMPLEMENT

● Mr. HOLLINGS. Mr. President, just a few weeks ago, a Presidential Task Force on Crew Complement made a controversial decision the effect of which allows future passenger-carrying aircraft to be built for operation by two, rather than by three, cockpit crew members.

While I make no claim to having the expertise to settle what is obviously an involved matter, I do want to emphasize the importance of the issue to the American public. Serious questions of airline passenger safety are part and parcel of the debate, and my hope is that discussions and planning for the future can be accomplished in an atmosphere of good will and of realization that the overriding goal must always be the public good.

Additionally, I would point to the outstanding record compiled by America's flight engineers over the years. Any change involving a diminution of their role has great implications, and we ought to be mindful both of their fine record and of the contribution they have made to air safety.

Mr. President, the executive committee of the Flight Engineers' International Association has just adopted a statement concerning the Presidential Task Force on Crew Complement decision, and so that their side of the story may be heard too, I ask that the text of this statement be included in today's edition of the RECORD.

The statement follows:

STATEMENT OF THE FLIGHT ENGINEERS' INTERNATIONAL ASSOCIATION

The Flight Engineers' International Association is disturbed and disappointed by the decision announced on July 2 by the Presidential Task Force on Crew Complement which would allow future passenger aircraft to be designed for operation by two rather than three cockpit crew members.

The Task Force has effectively removed the flight engineer from the cockpit of the new generation of commercial airliners. In extensive testimony before the Task Force our position that maximum air safety can be achieved only by three-member crews was amply documented.

The Task Force has made a tragic mistake. We stated repeatedly during these proceedings that the issue involved is air safety—not employment. No member of the Flight Engineers' International Association will lose a job because of the decision. We are convinced that maximum safety for future airline passengers has been compromised.

The Task Force was not justified in ignoring the unfortunate experience of the airline industry when it flew the DC 6 with a two-member crew. The many reliably reported situations in which the third crew member effectively assured the safety of the flight should have convinced the Task Force that notwithstanding new technology in the cockpit, maximum safety is not possible without a human pilot backup.

We do not question the integrity of the individual members of the Task Force or their staff; we do deplore the fact that the study was made hastily and without the benefit of technical testing in a trial period. Hopefully there will be no disastrous consequences and the Flight Engineers' International Association will use its expertise and influence to guarantee the use of proper crew complement certification procedures by the FAA to assure the flying public the best possible cockpit design under any and all circumstances.●

LASERS—THE NEED FOR A NATIONAL FOCUS

● Mr. HEFLIN. Mr. President, on July 9, 1981, I had the pleasure of addressing the American Institute of Aeronautics and Astronautics which was meeting here in Washington. This Institute was conducting a conference on laser systems and technology. The title of my speech was "Lasers—The Need for a National Focus." Much of the information contained in this speech has not been presented to the Members of Congress. I think that this information should be made available, so I ask that a copy of my speech be printed in the RECORD.

The text of the speech follows:

LASERS—THE NEED FOR A NATIONAL FOCUS

I. INTRODUCTION

Over the past decade, technological advances made possible only through the dedication and determination of gifted researchers and scientists, such as those here today, have provided a sufficient foundation for national application of lasers in both peaceful and military uses. Our scientists and technicians have lifted lasers from the pages of science fiction and made them real, everyday devices. This very transformation has brought high-energy lasers into the realm of defense weapons systems, and subsequently introduced a whole new concept in military strategy.

To date, the U.S. Senate has assumed a leadership role that is gaining momentum which I think will lead to the construction of decisive laser defense weapons in the foreseeable future. There are, as you well know, many good and meritorious ideas and technological opportunities that remain in obscurity, both unappreciated and underfunded, which may enable us to realize the needed laser weapons capabilities years sooner—if such ideas are adequately supported and managed.

II. NEED FOR AN "UP FRONT" PROGRAM

It is essential to realize that the correct technical decisions as to the detailed nature of actual laser applications cannot be made without a greatly expanded "up front" program—one to mature and test the needed technologies. We can look to the laser beam itself for an excellent model for this program. The astounding feats laser beams are capable of performing and in some cases are performing, from mending a torn retina, to dissolving a brain tumor, or to destroying an enemy missile or communications satellite, are all possible only because each atom contributes its bit of energy, which is organized and focused into a coherent beam.

By a somewhat strained analogy, our present, largely diffused laser and particle beam research programs need to be focused like a laser beam into a program capable of emitting energy—in our case, results. We need, in my judgment, a clearly focused national program for laser development, and that's what I am working toward.

This morning I wish to bring you up to date on efforts to provide such an "up front" program. But, I would first like to cover some pressing issues concerning laser technology.

III. PRACTICAL APPLICATION—FOSSIL FUELS

Since the initial discovery of the laser in 1960, practical applications of laser technology have already proven to be of great benefit in manufacturing, retailing, medicine, and advanced communications fields. And the possibilities for lasers are breathtaking. In my judgment, lasers will indeed play a key role in virtually every aspect of our future technology. However, the potential for laser application in space exploration and in the crucial areas of national defense and energy production has yet to be fully appreciated. And this very potential, I feel, makes laser technology the most exciting and important field of research for the remainder of this century. I am not exaggerating when I say that the future of this nation, especially in defense and energy, is inextricably tied to the full development and exploitation of laser technology.

You'll be happy to know that I do not plan to dwell on the numerous laser applications with which many of you are so thoroughly familiar. From a technical standpoint, most of you have forgotten more about lasers than I will ever know. But please allow me to mention laser technology as a

possible answer to our critical fossil fuel energy problem. The production of electricity through clean and safe nuclear fusion creates enormous implications for our economic state. However, the application of laser technology can offer our nation an inexhaustible supply of cheap and clean electric power, while avoiding the problems associated with nuclear reactors and radioactive wastes. This important civilian application cannot be ignored or scorned.

IV. LASERS FOR DEFENSE USES/SOVIET TECHNOLOGY

Undoubtedly, the peaceful beam uses are promising and must not be overlooked, but the defense-oriented possibilities possess the potential to cause a dramatic shift in the national security posture of the superpowers. And as we look at the uses of lasers for our national defense, we must also concern ourselves with the laser technology advances made by the Soviets.

Perhaps for the first time in the last twenty years, the United States is not confined by the military concept of MAD—Mutual Assured Destruction—which incorporates the idea that there is no defense against nuclear missile attack but only a balance of terror. The potential effects of high-energy laser systems on this strategic military balance are overwhelming. Space laser weapons, if they can be developed, and I believe they can be, should bring an end to the fear-filled era in which we have lived for the last few decades. Technology offers us, and the Soviet Union I hasten to add, the chance to begin to overcome this vulnerable mass destruction strategy—it, conversely, will enable us to employ a new and stronger defensive stance.

This stance, however, requires that a clear distinction be drawn between the needed "revolutionary" technology and the "evolutionary" advances in conventional technology. Our future strategic position awaits the accelerated, concentrated development of beam weaponry, not a slow-paced unfolding of laser uses. The key point here is that high-energy laser development and weaponization programs could give us a needed edge, but we must not drag our feet.

The reason I feel that any delay may become a decisive factor is that much has been written lately about the Soviet Union's extensive research and development of laser weapons systems. The Russians are well aware of military possibilities in space, obvious through their significant commitment of resources to their programs. According to a recent issue of Aviation Weekly and Space Technology, Soviet space launches have outnumbered those of the U.S. by a factor of 3½ to 1 during the last decade. A United States Air Force analysis recently revealed that Soviet technology today could exploit U.S. communications channels or even interrupt the control links of U.S. space systems.

Until this recent revelation by the Air Force, their intelligence agency had not been able to convince others in the intelligence community that the Russians were driving ahead in this vital area of weapon technology. The CIA, Defense Intelligence Agency, and Air Force Intelligence Agency had all expressed differing ideas as to the actual Russian abilities in laser systems. The information collected and analyzed over the past months has done away with their differences in opinions, but unfortunately, not with our problem.

Report after report show increasing Soviet activity in the area of laser development. Findings indicate that the Russians now have an operational, land-based laser weapon capable of putting low orbiting U.S. spy satellites out of action. Further evidence of Soviet progress was provided by a spy satellite which spotted a large laser or particle beam device under construction.

In another instance, what the Air Force once believed to be another nuclear plant now appears to be an experimental laser site. Reports continue as another facility, located just thirty miles north of Moscow, amazes U.S. intelligence because of the high level of work going on in the underground cavern. Here it is reported that the Russians have developed a ground-based laser that is capable of downing low-orbiting spy satellites, Big Bird, and the KH-11. Information has also been gathered that the Soviets are developing an eleven-ton space station to take multi-shot lasers beyond the interfering particles within the earth's atmosphere. This advancement is possible because the Russian program can boast five times as many people and dollars as we have. According to Clarence Robinson of Aviation Week, Soviet superiority in particle beam weaponry can be further evidenced by the fact that three out of four accelerators under testing in the U.S. are based on Soviet designs! This persistence and drive has given the Russians an undoubted edge.

Even so, if we would only admit that we have a problem and quickly set definite goals and objectives involving the advancement of beam weaponry, we could catch up to the Soviet level and enhance our world stance. But currently, organizational and political impediments are tying the hands of research. Even as the Russians blitz ahead, our own Department of Defense insists on studying, testing, and deliberating on research to the point that it practically suffocates needed breakthroughs. One senior Pentagon official was recently quoted describing the R&D pace as "academic," drawing attention to the fact that under present conditions, we are failing to devote the necessary all-out effort toward laser development. To simply be satisfied with our present level of organization and research and development may eventually lead us to being surprised once again by the Soviets, as we were with Sputnik, but with even graver implications.

V. SUBCOMMITTEE HEARINGS

In the face of this tremendous Soviet development, the Subcommittee on Science, Technology and Space of the Senate Committee on Commerce, Science, and Transportation held four days of oversight hearings on the status of our laser research and applications. These hearings, which were held during December of 1979 and January of 1980, allowed me to become informed on this subject as well as to become more aware of the vast possibilities lasers offer and the organizational problems holding back progress.

The purpose of these hearings was to provide a broad overview of the highly diverse and rapidly developing laser technology. The hearings were important and timely for several reasons, reasons which still exist today:

1. The possibilities of laser technology in improving national security, future energy production, and civil space applications are immense.

2. The federal government serves as the principal sponsor of laser research and technology applications. Federal funding for research since the invention of the first lasing device in 1960 exceeds $2.46 billion. Sustained, as we have seen today, increased government funding will maintain our degree of national interest.

3. This federal funding is spread among various departments and agencies of the government. The principal programs exist in the Department of Defense, the Department of Energy, and NASA; small additional amounts are contained in the budgets of other organizations. Some degree of synergism exists among the departmental research and applications programs, but there is no formal coordination and integration mechanism at the federal level. Program formulation and budget allocation are decentralized and focus on narrowly defined "mission" responsibilities.

4. Fourth, there are unusually strong and highly diverse views within the scientific community (and within the federal government) about the potential of high-energy lasers, the time when these applications could be realized, the ideas that should be emphasized, and the appropriate federal funding levels needed.

As I have already mentioned, the focus of the hearings was on laser research and technology applications. The subcommittee sought the extent to which technology currently was "in use" in industry and government, an understanding of the promising potential applications, the research and technology developments necessary to achieve future applications, whether additional federal dollars are needed, and if so, at what level.

Testimony was heard from witnesses representing a cross-section of federal organizations, industry, and non-profit and academic institutions engaged in laser work. The witnesses also represented the spectrum from creative, visionary thinkers to the developers of military and commercial hardware.

The hearings gave me the "inside story" I wanted to know on laser beam technology, and I was impressed with the vast range of important applications to date. However, I was disappointed in the absence of any formal, full-time coordination of the programs. These feelings were shared by others at the hearings and were ultimately expressed in the committee hearings recommendations.

IV. WORK AND PROGRAMS WITHIN GOVERNMENT AGENCIES AND DEPARTMENTS

The federal program structure, as analyzed by the subcommittee, lacks one ingredient necessary to synchronize a well planned, vital research program. While much has been done to nurture this infant technology during the first twenty years of its existence, a recurring theme developed during the laser hearings: To date, laser research and development has been highly compartmentalized with a number of federal agencies and civilian institutions working more or less independently, each within its own sphere of interest and influence. The laser research and technology programs of the federal government reside primarily, as you know, in the DOD, DOE, and NASA.

The hearings found the funding for the DOD high-energy laser program's being "stretched" to cover the maximum number of scaled down research projects and field experiments, leaving only small amounts for highly innovative research funds. Thus the hearings found that there is a compelling need to revise the DOD high-energy laser research and development planning and funding to achieve a balance between testing and needed innovative developments. It was therefore recommended that the achievement of this objective could be enhanced by the Secretary of Defense's designating a position in the Office of the Deputy Under Secretary for Research and Engineering to manage and direct the overall DOD high-energy laser program. But this advice from the hearing addresses only a part of the problem, since as mentioned earlier, the total national effort is fragmented and lacking cohesiveness.

Coordination among the federal departments and agencies is rather weak, and much of the coordination which does exist stems from the professional relationships among the senior managers and researchers, rather than from institutional relationships. The federal program structure stresses achievement of differentiated departmental, rather than national missions and goals. Thus, one of the major findings of the hearings, documented by the committee report, is that there is a need to improve the coordination of high-energy laser programs among the various departments and agencies of the government. This improved cooperation will in-

crease the effectiveness of each separate departmental and agency program, leading eventually to a more effective and efficient national effort. Increased synergism among the programs should be sought in the context of "opportunity at little or no cost."

It is in this context that I strongly recommend that an institutional mechanism be established to enhance coordination. It is imperative that a strategy be developed which balances technology and weapons systems development, specifying long-term systems objectives which would provide a framework for planning balanced and integrated development and experimental programs.

Interest in this strategic field is increasing every day. From the White House to the Senate, attention is being focused on laser research and development. Secretary of State Alexander Haig has displayed his interest in the possibilities of implementing space-based laser weapons by seeking a status report of current U.S. programs, their strategic, military, and political implications. Similarly, the National Security Council is considering a major study on space defense by a task force. From this particular study, the White House policy decisions on national objectives, programs, and the level of commitment are expected, according to high level staff officials.

Within the Senate, my colleague Malcolm Wallop of Wyoming is responsible for much of the interest in laser capabilities along with the concern over bureaucratic impediments hindering laser developments. Wallop's enthusiasm and admirable leadership qualities have brought about the serious consideration and treatment of laser beam technology. Senator Wallop, together with former Apollo astronaut, Senator Harrison Schmitt of New Mexico, introduced an amendment to the Senate floor which provided $50 million in the fiscal 1982 Defense Authorization bill specifically designated for space-based high-energy laser weapons development. By far, this action is the Senate's most outward, visible support in favor of laser programs. Through its passage, the Senate gave the Air Force the responsibility to formulate the program leading toward an early, in-orbit feasibility demonstration. Strong wording in the bill clearly states the Air Force's mission of establishing an airborne and space-based laser programs office.

The $50 million was only a fraction of the $250 million originally sought by Senator Wallop to be earmarked for the DARPA's space-based, high-energy laser weapons program and for the Air Force to expedite laser weapons development and testing. Instead, $20 million will be designated for the DARPA and the Air Force will receive the other $30 million.

Senator Schmitt sees the U.S. passing through a technological revolution, with the major component being laser weapons. President Reagan, according to Senator Schmitt, also regards lasers as offering a new strategic policy option aimed at the idea of protection instead of mass destruction. In meeting with Senator Schmitt, President Reagan has expressed an interest in developing laser weapons, favorably for ballistic missile defense.

Senator Wallop further stresses the urgency of positive government action before it is too late by comparing laser development to our MX development. In 1966 we toyed with the idea of a 10-warhead counter force missile while at about the same time the Soviets started on the SS–18. In fact, the SS–18 was fully deployed last year. The projected finishing date for the MX is 1990—it may be obsolete by then! Personally, I feel that we cannot afford to drag our feet with laser development. There must be an integrated, centralized research and development program.

VII. THE NATIONAL LASER INSTITUTE

I am sponsoring, along with eight other Senators, legislation which would mandate the establishment of a National Laser Institute. Its concise purpose is to provide a mechanism to improve the coordination of the federal efforts in laser research and technology development in order to accelerate the development and utilization of laser technology for the benefit of mankind.

The National Laser Institute Act would create in the Executive branch of the federal government an Institute to oversee the coordination of laser research and development efforts. The Institute would be comprised of key government officials, such as the Secretary of Energy, the Administrator of NASA, the Director of the Office of Science and Technology Policy, the Secretary of Defense, the Director of the National Science Foundation, and other recognized leaders of the scientific, business, academic, and governmental community who would be appointed by the President and by the Congress.

The Institute would be supported by a small, but competent, full-time staff and would be required to meet at least two times each year and would be mandated to study laser and particle beam research and technology applications for future civilian and national security uses; to make recommendations to the Congress and the President regarding implementation of the findings of the Institute; and to make recommendations to the Congress and the President regarding coordination of the efforts of the departments and agencies of the Federal government with respect to laser and particle beam technology, including cooperative programs and exchange of information, manpower, and facility resources.

Also, as outlined in the bill, the National Laser Institute will be required to prepare and submit to the President and the key committees in the House and Senate an annual report regarding its activities under the act. The Institute members and employees would have access to such classified or nonclassified information as is necessary for them to carry out their responsibility of an overall umbrella agency under the act.

The formation of an institute such as the one I am advocating is certainly not without precedent. When World War I broke out in 1914, the United States was last on the list of world powers equipped with military aircraft, running a poor fifth behind France, Germany, Russia, and Great Britain. Not only was the tangible evidence of aeronautical progress lacking, but there were few aeronautical research laboratories and facilities in this country, whereas the above-mentioned nations already had well equipped and well staffed research facilities. Italy and Russia had aeronautical laboratories long before the United States took the step.

A survey by the Smithsonian Institution showed clearly the dangerous gap between the state of air technology in Europe and in the United States. The resulting national concern over this problem led to the establishment of the National Advisory Committee for Aeronautics, which was charged with the duty of supervising and directing the scientific study of air flight. In time, the N.A.C.A. proved to be one of the most successful approaches to solving problems that has ever been devised by our Congress.

Within a few short years, the U.S. was able to assume the lead in aeronautical science and continues to this day to be the technological leader in air and space technology—all under the leadership of the N.A.C.A. and its offspring, NASA. If this Congress would draw upon the precedent set by that Congress so many years ago and establish the National Laser Institute, I am confident that 50 or 75 years from now Americans will look back with pride to the beginnings of the effort which made us the leader in the advancement of laser and particle beam technology.

Response to the proposal of the National Laser Institute has come from many concerned government and scientific organizations. My proposal was delivered to DOD, DOE, and NASA. And they were all invited to comment on the feasibility of the Institute. NASA and DOD have rejected the idea, believing that their sporadic correspondence and meetings were sufficient coordination devices. A classified report by the Comptroller General of the United States on the DOD's high-energy laser technology program came to the conclusion that the fragmented approach to solving a common problem was neither efficient nor effective.

The GAO recommends in its unclassified summary that the Secretary of Defense perform an assessment of its program, redefine their objectives, and restructure its management to one utilizing a more centralized approach. The GAO also recommended that DOD adopt a recommendation of the Defense Science Board that "the high-energy laser programs objectives be redefined and its management restructured to a centralized approach." Positive response to the proposed Institute ranges from endorsement of such diverse groups as American Society for Laser Medicine and Surgery to the Reserve Officers Association. Other interested parties, such as defense contractors, have indicated support for the concept, but are reluctant to do so on the record. I solicit the support of all of you here today, as well as any constructive criticism you might have. If you want a copy of my bill or the committee report, feel free to contact my office. I intend to try to move the bill forward this fall, and I am considering asking Senator Schmitt for one additional hearings day to update the record.

VIII. CONCLUSION

We must realize that decisions by the government on high-energy technology and weapons systems will make a dramatic difference in the emerging tactical and strategic balance between the superpowers. The time has come for the United States to make a commitment to future strength and defense. Nevertheless, as I mentioned earlier, there is within the scientific community strong and highly diverse opinions about the potential of high energy lasers and the time when these applications would be realized. In my judgment, a National Laser Institute would provide the forum for the resolution of this debate so that we could begin to achieve a consensus which would give this country a national laser program which will achieve the results we are seeking.

These are difficult times for the United States as we struggle with a serious inflation and national debt problem. At the same time, however, we must establish long-term national security goals which involve decisions about high-technology hardware procurement to be made with a large uncertainty about operational success. The Federal government is the principal sponsor of laser research for high-energy applications. Government sponsored basic research in the U.S. since World War II, particularly in our universities, laid the scientific foundation that later contributed to the discovery and development of the laser. These tremendous investments made by the government into laser research and development deserve careful coordination and supervision to facilitate speedy, worthwhile returns. We must also continue to fund adequately these projects and insure complete support. I feel that the best answer to the challenges that I have mentioned is the National Laser Institute.●

FOOD SAFETY: LET HISTORY REPEAT ITSELF?

● Mr. LUGAR. Mr. President, as we consider how best to accomplish regulatory reform in the coming months, I call attention to one very positive report of a food safety regulatory agency which has come to my attention during oversight hearings. Certainly, the accomplishments in terms of the attitudes of the industry toward regulation are exactly what we hope to accomplish this year as those of us in Congress, working in concert with the Reagan administration, streamline administrative procedures and, if necessary, refine the food safety laws themselves. Let me quote from the agency's report in the hearing, which makes the following statement:

> The administration of the food law has been vigorously pushed . . . One of the most gratifying results obtained during the year has been the abandonment of the position of hostility which many manufacturers up to that time held, and an assumption of hearty cooperation not only with the inspection work of the Department but also with the broadest views respecting the wholesomeness of the substances added to foods.

There is only one slight hitch in this good news; the regulatory agency, the Bureau of Chemistry at USDA, did indeed do a good job, but the date of the oversight hearing report is 1908, the year after the Food and Drug Act was first passed. I hope history repeats itself this year, some three quarters of a century later, with respect to restoring a positive attitude between the regulated and the regulators.

I hope history repeats itself in that as a Nation we will continue to strive toward a safer food supply. Such a goal should not require eating some sort of offbeat diet, the reading of hundreds of special warning labels, or constant worry on the consumer's part. However, it will require a positive attitude on the part of private industry, professional and voluntary consumer groups, and Government to work together to achieve these worthy public health objectives within a reasonable time frame and at a reasonable cost. Such cooperation has marked the history of past progress in the field. I hope it is a hallmark of our future efforts.

In two other ways, I hope history does not repeat itself. First, less regulation should not result in a more dangerous food supply. The history of our food safety laws shows most of the legislation in the field was preceded by major abuses or catastrophic events. These galvanized public opinion into taking steps to curtail the latitude permitted to manufacturers.

The desire of the public to have a safe food supply has not diminished one bit simply because it wants less Government redtape.

I certainly do not want people to get the idea that if refinements are made in the food regulations that it is necessary for them to eat natural, organic, or nonprocessed foods to lower possible food-related health risks. As a matter of fact, the evidence is not at all convincing that such natural, organic, or nonprocessed foods pose any less risks to health than does usual fare, although they often cost more money. While I respect the choices of those who wish to eat these particular foods, I think it is important to inform and educate all consumers so that they are aware of the fact that our food supply is safe, and that we are striving to make it safer in the future at the same time that we attempt to unscramble unnecessary and burdensome economic regulations which apply to food.

We need to be keenly aware that while we need to inform the public that absolute safety for the food supply is impossible to achieve, and some risk is always going to be present, we are not taking our lives in our hands every time we lift a fork. Commonsense is needed in making decisions about food safety and risks both among citizens and those of us who are legislators and who have the special responsibility of making refinements in food safety legislation, and regulations when they are necessary.

But in thinking through changes in procedures and laws, we do not want to go back to the days of 1908, when the Government had no authority to require premarket testing of food additives and we simply had to wait and see if some substances added to foods were harmful. All that Government could do was to try to keep use of untested additives and preservatives to a minimum. Prosecution was only possible in a situation where it was clear that the manufacturer had deliberately meant to do harm—fortunately a rare event. But for the cases in which human harm resulted simply from a failure to assess potential negative effect the Government did not have strong legal legs to stand on. To quote again from the Bureau of Chemistry's 1908 report, an understandable, but noticeable antiadditive bias was evident:

> A large number of prominent manufacturers during the year entirely abandoned the use of any kind of preservatives . . . Although there have been no suits brought so far involving the addition of a chemical preservative to a food, the practice has been openly discredited by so many first-class manufacturers as to warrant the statement that the cause of pure food, insofar as chemical preservatives are concerned, has been firmly established.

I would not be pleased if a regulatory agency were to issue such a report next year. Progress has been such that this would be unlikely, since the healthfulness of our food supply has increased. Fortunately, advances in food science, food technology, and toxicology have been striking in the past 75 years. We no longer have to use human beings as guinea pigs to test the safety of additives; our laws insure that they are tested before, instead of after they are permitted into the food supply. Thus, the dangerous tradeoffs we sometimes made at the turn of the century are no longer necessary. Our complex food supply system is heavily dependent upon certain additives and preservatives today. We could not continue to feed our population without many of them. Therefore, we need to continue our research efforts to find better additives and adopt prudent attitudes toward their use.

The second way in which I hope history fails to repeat itself is that more heat than light is generated by consideration of our food safety laws. There is little doubt that food safety legislation has some kinks and complexities which in the best of all possible worlds it would be nice to smooth out. In this session of Congress, we have the opportunity to consider refinements in the food safety laws without the impetus generated by emotions and hotheadedness when Congress is faced with an immediate crisis which has to be resolved.

We need to get rid of the complexities and ambiguities which resulted from acting in haste in amending the food safety laws in the past. We need to take time to consider the likely outcomes of the changes which are suggested. We need to hear all points of view. In summary, we have had an excellent food safety law which has served us well for three-quarters of a century. I hope that the past is prolog to the future and that the basic law, with such refinements as may be necessary to bring it in line with the current state of law and science continues to serve us long into the next century.●

ALTERNATIVES TO TOBACCO

● Mr. EAGLETON. Mr. President, in the near future the Senate will consider omnibus farm legislation, the Agricultural Act of 1981. One of the important farm commodities, tobacco, is not currently part of the bill that this body will consider. When the omnibus farm legislation was marked up by the Committee on Agriculture, Nutrition, and Forestry, it was widely assumed by many in the Congress that the tobacco price support program was not in need of modification. The committee's decision to report its bill came prior to an International Trade Commission hearing on June 24, that showed that this program, which many in the Congress believed was free of Federal taxpayer subsidy, could cost the American people between $223 and $273 million over the next few years. Some have said these figures underestimate what the actual cost will be. In view of this information, it is clear that the Senate may want to consider changes in the program.

Through the years, I and many others have been concerned that it may be unwise to abolish this program because farmers lacked sufficient alternatives to tobacco production. Recently, though, I have learned at least five commodities—tomatoes, fresh market strawberries, apples, peaches, and pick-your-own strawberries—yield even a higher return per acre than does tobacco. This information, incidentally, was developed by North Carolina State University.

It is enlightening to know that viable alternatives exist for tobacco producers so that they will not join grain farmers and others in the rapid exodus from rural areas to cities that has occurred. In view of the need to have sufficient information, I would like to share a copy of an article, "Viable Alternatives for Tobacco Farmers," from the current is-

sue of North Carolina Insight, with members of this Chamber. I am sure that my colleagues will find this particular article worth a thorough review in light of the upcoming debate that will take place on the tobacco program.

Mr. President, I ask that this article be printed in the RECORD.

VIABLE ALTERNATIVES FOR TOBACCO FARMERS

(By Frank Adams)

Hundreds of North Carolina's family farmers are quietly searching for profitable alternatives to tobacco, a crop many of them learned about at the knees of fathers or grandfathers, and a crop which is as much a way of life as a source of income. That way of life and of producing income has changed dramatically in recent decades. Tobacco operations have increased in size, requiring large capital investment. Bulk curing barns and mechanical harvesters are transforming tobacco production from a labor-intensive to a capital-intensive enterprise.

As a result, today fewer farmers than in years past can afford to grow tobacco. In 1972, according to the U.S. Department of Agriculture (USDA), there were about 40,500 flue-cured operations in the major growing regions of Virginia, North Carolina, South Carolina, and Georgia; by 1979 the number had fallen to 29,000 a 28 percent decline in seven years.*

The director of the N.C. Agricultural Extension Service, T. C. Blalock, sums it up: "Tobacco farmers are either going big and mechanized or they are leasing [their allotments].... Thousands of farmers who used to be full time have now taken a job in industry." This is especially true for tobacco farmers who haven't the capital to invest in mechanized systems, for small allotment-holders who can make more money leasing than growing, and for sharecroppers who have had the allotments they used to grow leased away to large-scale operations.

Farmers with small tobacco operations seem to have three options: (1) they can continue to borrow money and invest in their tobacco operations, hoping to be one of the shrinking number of survivors; (2) they can take an off-farm job (and perhaps grow a little corn, hay, or other pasture crop part-time); or (3) they can try to change to crops other than tobacco and remain on the farm. This article addresses prospects and problems of the third option.

Tobacco farmers have grown accustomed to guaranteed market outlets and sales price levels, both of which are assured through the federal support system. Coping with new crop systems can be a difficult challenge for a tobacco farmer, especially at the marketing end. "Yes, there are alternatives to tobacco," says J. E. Legate, dean of North Carolina State University's School of Agriculture. But he adds, "No other crop for which we have a stable market can provide the per-acre return that is realized from tobacco."

For those who determine agricultural policy in tobacco-belt states, the quest for suitable substitutes to tobacco and a regular market for those substitutes looms large in economic and political importance. Finding ways to keep people on their farms and out of unemployment lines and cities lowers the monetary and social costs of displacement out of tobacco. Keeping people on farms relieves the pressure that industrial recruiters face to provide jobs in rural areas for farmers forced off their land. Most importantly, alternative crops and new market mechanisms can help farmers continue what they want to do and know how to do: farm.

A LACK OF GOVERNMENT SUPPORT

Displaced tobacco farmers cannot make a transition to soybeans, corn, wheat, or some other grain. All these crops require large acreage units for a profit. In 1979, soybeans netted about $72 per acre in North Carolina; wheat, $63; corn, $106; and even fresh market corn, $250 (see table on this page). Meanwhile, the state's flue-cured tobacco crop brought about $1,200 profit per acre.

Various fruit and vegetable crops, however, are viable alternatives for tobacco farmers. Strawberries, for example, netted over $3,000 an acre in North Carolina in 1979. Trellis tomatoes, peaches, and apples also topped the per acre return of flue-cured tobacco; blueberries, cucumbers, and sweet potatoes weren't far behind (see table). Moreover, all these crops can be grown on small acreage units, similar to the old-style, three-to-five acre tobacco farm.

To switch to these crops, tobacco farmers need a great deal of technical advice and support. They face large, sometimes insurmountable hurdles. Many of them have large investments in modern curing and harvesting equipment; some lack the practical skills needed for growing unfamiliar crops. And the biggest constraint is the lack of a guaranteed market.

If strawberries, trellis tomatoes, apples, and other high-income yielding crops had guaranteed markets and sales prices, many now reluctant farmers might see their way clear to diversifying their operations into vegetables or fruits. In a state like North Carolina, the agricultural support systems are geared to those crops—like tobacco—where federal programs are already functioning, rather than to crops for which backup systems have yet to be developed. Research in Washington and in field stations, farm bulletins and surveys, and extension projects all have the funding and momentum of the tobacco program behind them. Alternative crops do not receive the same research or attention from the government support systems, such as the land-grant universities and the farmer loan agencies, that tobacco gets.

The N.C. Agricultural Extension Service, for example, has assisted in seeking alternative crops for tobacco farmers in only isolated instances. In the western counties, the Extension Service did assist in expanding the trellis tomato industry, which has helped some burley farmers. But it has not mounted any type of intensive effort to help tobacco farmers throughout the state adapt their operations to other crops. Its research efforts have also been limited. In 1978, when the Governor's office expressed concern regarding possible modification or loss of the tobacco program, the state extension office at North Carolina State University made a study of alternative gross farm incomes that might be generated in case of some catastrophic drop in tobacco income. The study put far greater hopes in beef cattle, poultry, swine, dairying, and horticulture than in a minor category called agronomy (new crops).[1] In addition, any initiatives toward finding new ways to adapt tobacco farms to fruit and vegetable operations do not appear likely. "We have not done any overall study since that report," says Extension Director Blalock.

The experiences of Phil Wood, a tobacco farmer in Fuquay-Varina, N.C., illustrate another limitation of government support for alternatives to tobacco. In 1980, Wood grew 55 acres of flue-cured tobacco, but even a farm that big wasn't enough. "Expenses were so high that I had to start borrowing for the winter," Wood says. "I just broke even, didn't make a thing." For the 1981 season, Wood wanted to grow 20 acres of peppers and 40 acres of cotton, but he ran into another kind of money problem. Farmers borrow large sums each year to get their crop in the ground, and Wood went to the usual lending source, Production Credit Association. But Production Credit, which was willing to lend Wood money to grow tobacco, would not take a risk on peppers or cotton. "I'm in a trap right now," Wood said in January, 1981, still deciding what to plant in the spring. "Production Credit won't loan me money so I can diversify and Farmers Home [Association] won't loan me any money unless Production Credit refuses [to give] me [money]." Since Production Credit is willing to loan Wood money for tobacco, he's stuck. "I can't diversify now because funds aren't available to me."

HOW TO SURVIVE THE CONSTRAINTS TO SWITCHING

In Wadesboro, N.C., a private, nonprofit research farm is working to provide models for small farmers to continue living and working on the land. A project of the 45-year-old National Sharecroppers Fund, the Frank Porter Graham Center has been training small farmers and conducting crop and livestock experimentation for almost 10 years. The bottom line for any commodity tested at the Graham Center is profits; the central concern is what the net income yield per acre will be. The farm's staff also examine closely possible constraints farmers face in growing particular crops, especially on three-to-five acre operations—the size of a small tobacco farm. The Graham Center has found that most of the crops listed on page 19 can be grown profitably on a small farm operation. Moreover, few carry with them technical or investment problems that cannot be overcome. Some possible constraints and ways to overcome them are:

Irrigation—Vegetables and berry crops require more water than tobacco, and irrigation would be necessary during especially dry years. Graham Center staff member Mark Epp says the cost of an irrigation system is not insurmountable to small farmers. An irrigation system for a 10-to-15 acre vegetable operation can be installed for $10,000–$15,000 by using a pond dug on the farm, says Epp. And the Farmers Home Administration will loan money for irrigation systems. "Though it's expensive, it's no more expensive than a lot of machinery and energy used in grains and tobacco," Epp explains.

Start-up time—Farmers interested in orchards as a livelihood are often deterred by the long wait for fruit trees to mature. Peach trees require a three-year start-up time; apple trees need five years before producing the first crop. The Graham Center suggests planting row-crops, such as sweet potatoes, sorghum cane, peanuts, or watermelons between the rows of young trees while they are maturing, thus alleviating an income dormancy during this period.

Machinery and labor—Many tobacco farmers have sizable investments in curing barns and other equipment associated exclusively with tobacco, and they naturally fear the loss of their investments if they switch to alternate crops. In addition, one initial reason for purchasing tobacco production technology was probably the farmer's difficulty in finding and affording seasonal labor. So, another obstacle to growing crops other than tobacco is the farmer's fear of a renewed, increased need for hand labor.

Farmers who own one-row planting and tilling equipment require little capital investment when starting alternative crop farming, aside from irrigation costs already mentioned. The tobacco transplanter can be used to set out sweet potatoes or tomato plants, and bulk barns might be used for sweet potato curing or peanut drying. Farmers might have to sell automatic tobacco harvesters since only one-row machinery transfers to vegetable crops, but many smaller tobacco farmers have not yet invested in that costly piece of machinery.

Labor used to produce flue-cured tobacco averaged about 172 hours per acre in 1979, with over two-thirds of that labor used to harvest and prepare the tobacco for market, according to the USDA. Most crops studied

Footnotes at end of article.

at the Graham Center to date require a similar amount of labor for production and harvest. If some alternate crops do require more hand labor than tobacco, the savings in capital costs and fuel bills may soften that particular blow.

Energy—Tobacco is an energy-intensive crop, particularly as the harvest and curing becomes more mechanized. Flue-cured tobacco accounts for over 60 percent of North Carolina's energy uses in agriculture. Approximately 316 gallons of fuel are needed on an average acre.[2] Nationally, tobacco grows on only 0.03 percent of the available cropland but consumes only 15 percent less energy than what is used to raise all the vegetables in the United States. Many farm chemicals are oil-based, and one USDA study found a higher percentage of tobacco acres sprayed with insecticides than any other major crop.[3] Alternative crops tested at the Graham Center pose no greater pest or disease threat than tobacco and historically have required less fuel and oil-based chemicals.

Soil and climate—There is nothing unique about the soil which supports the successful growth of tobacco. It can be raised on a great variety of soils in all climates from southern Canada to tropical areas. Tobacco production was frozen in its percent location by the federal tobacco program enacted in 1933. Most crops tested at the Graham Center would grow well in all the major tobacco belts.

In sum, then, other than the cost of irrigation for berries and some vegetable crops, changing over to any of the alternatives as profitable as tobacco does not present multiple hurdles. None would require additional machinery or labor; dependency on fuel and pesticides would probably decrease for tobacco farmers who switch; and soil and climate conditions offer no obstacles. But alternative crops grown widely would require a dependable and accessible market, plus additional organizational means for distribution.

MARKETING—THE BIGGEST DETERRENT

The key deterrent to tobacco farmers interested in growing alternative crops is the lack of a stable market and distribution system. Only tobacco has a guaranteed market. Warehouses are located in dozens of hamlets, and, due to the support price and quota system, tobacco prices do not fluctuate according to supply and demand. Prices for many other crops do fluctuate, rendering growers' incomes uncertain from year to year.

Footnotes at end of article.

It is ironic that North Carolina, with its bountiful fields and many miles of as yet undeveloped land, imports more than three-fourths of the vegetables its residents consume. In the central Piedmont alone, there are more than two million consumers who, conceivably, could buy local produce if farmers chose to grow it and if it were made accessible. But because of established marketing and distribution systems, getting large quantities of locally grown vegetables into consumers' grocery bags is no easy enterprise.

If enough vegetable farmers pool their individual harvests into an adequate quantity, it is possible to make the links to established bulk buyers—jobbers, wholesalers, and processors—who sell in large population centers and through supermarket chains. One such cooperative effort underway may handily serve Piedmont vegetable growers someday, and, if successful, will serve as a much needed marketing model for farmers in other areas.

In the Piedmont, where small-size tobacco operations are steadily dwindling in number, a group of farmers has been working to establish the Piedmont Vegetable Marketing Cooperative, Inc. The Co-op has its roots among a small group of Chatham County farmers who quickly discovered that a key step toward obtaining start-up capital from traditional lending institutions is a USDA feasibility study. The USDA ascertains the need for a marketing co-op, ensures that a sufficient number of farmers wish to take part, and finds the probable buyers for the co-op's supply of produce. In 1978, the farmers wrote USDA requesting the feasibility study, which USDA does for free. Two USDA agricultural economists surveyed 131 farmers in six Piedmont counties to learn about their current crop production and their interest in a vegetable co-op warehouse in their area. During this time, the North Carolina Land Trustees, a nonprofit group based in Durham, was providing technical assistance to the Co-op and holding meetings in the six counties to generate interest in the idea.

The economists found that 66 percent of those surveyed farmed full time, raising tobacco, soybeans, hogs, beef, and vegetables. They planted a total of 815 acres in vegetables, an average of about six acres each. (See table on page 23 for a description of the types of vegetables grown and their yields.) Twenty-two farmers sold their vegetables on consignment and four sold on contract. Fifteen relied on door-to-door sales. The economists multiplied the farmers' reported yields by the 1978 N.C. average seasonal price and determined their total gross revenue was $858,857.97 (see table). Nearly to a man, the 131 farmers told the economists that if a market were established, they would be willing to expand their vegetable production.

The feasibility study sought to determine the demand for home-grown produce, the prices farmers could expect, the location of the markets, and any requisite quality standards. In gathering data the USDA contacted packing sheds, wholesale shippers, processors, retailers, and a few consumer food co-operatives. Each operation was questioned about grading and packing preferences, minimum volume requirements, contractual arrangements, and pricing patterns. The USDA report suggested three marketing strategies for the Piedmont vegetable growers: (1) that the farmers form a cooperative based initially on sweet potatoes, cucumbers, and green peppers; (2) that the co-op find a warehouse where produce could be assembled, cleaned, graded, and packed on a large-scale basis; and (3) that the co-op hire a full-time manager.

With this blueprint in mind, the fledgling Piedmont Co-op set out to gather the membership and raise the equity necessary to lease warehouse space, to furnish it with loading docks and refrigerated storage, and to hire a manager. On July 15, 1980, farmers from six Piedmont counties voted to create a co-op for shipping green peas, cucumbers, summer squash, okra, and sweet potatoes to local markets and to Washington and Baltimore. In September, the Co-op formally organized and incorporated itself with about 50 members. Next came the critical step: generating the start-up capital.

To be a member, a farmer has to buy one share in the Co-op ($30). The feasibility study indicated that at least 650 acres of produce were needed as commitment from members before the Co-op's success could be assured. Lending institutions look closely at the portion of start-up capital invested by the Co-op members. The Co-op board decided that for the project to be on solid footing, the members would have to contribute 30 to 50 percent of the start-up capital needed. Depending upon inflation, grant applications, and other factors, the board thinks each member might have to invest up to $300 per acre for each acre of vegetables he plans to sell through the warehouse. If this equity could be raised from members, the rest of the financing necessary—some $150,000 to $200,000—could be secured more easily than if adequate member equity is lacking.

USDA FEASIBILITY SURVEY RESULTS FOR GROWERS IN 6 PIEDMONT COUNTIES

Crop (unit)	Acres harvested	Yield per acre	Price per unit	Total yield	Total revenue
Cabbage (pounds)	36.65	18,000	$0.08	659.700	52,776.00
Cucumbers (bushels)	155.40	188	3.07	29.215	89,690.64
Okra (pounds)	15.20	9,800	.20	148.960	29,792.00
Peppers (bushels)	57.50	338	6.09	19.435	118,359.15
Pole beans (bushels)	29.90	225	6.00	6.728	40,365.00
Snap beans (pounds)	37.15	3,000	.07	111.450	7,801.50
Summer squash (bushels)	23.50	225	7.00	5,288	37,012.50
Sweet corn (crates)	135.45	187	3.50	29.329	88,652.03
Sweet potatoes (bushels)	86.20	337	3.50	29.149	101,672.90
White potatoes (pounds)	25.30	15,000	.11	379.500	41,745.00
Tomatoes (pounds)	30.80	22,500	.15	693.000	103,950.00
Watermelons (pounds)	64.95	16,875	.04	1,096.131	43,841.25
Cantaloupes (pounds)	68.80	6,000	.25	412.800	103,200.00
Total [1]	766.80				858,857.97

[1] The figure for total acres harvested does not take into account that growers allocated 48.2 acres to the production of crops such as grapes, peas, collards, etc. The total acreage of all vegetables harvested thus becomes 815 acres.

Source: Preliminary Report, U.S. Department of Agriculture Economics, Statistics, and Cooperative Service, Washington, D.C. 20250. "Vegetable Growers Cooperative, Piedmont Area of North Carolina." n.d.

While farmers can sometimes get low interest loans from Production Credit or Farmers Home Administration for investing in a co-op, making such an investment commitment has been difficult for many farmers, especially after a poor 1980 crop. Consequently, the Co-op did not reach its goal of a 650-acre commitment from members in time for the 1981 season. "It's a chicken and egg problem," says Arnie Katz, a Land Trustees staff member who works with the Co-op. "There's no doubt several hundred farmers would join in a year once they saw it going." Katz has talked to many tobacco farmers who either want to diversify or leave tobacco altogether. An uncertain market remains a severe initial deterrent. The Piedmont Co-op's board of directors is continuing efforts to build interest—and equity—in their venture, and will coordinate a smaller, pilot operation during the 1981 marketing season.

CONCLUSION

These private endeavors to rearrange economic relations on a small scale provide policymakers with valuable practical examples of how new economic institutions

can be forged for the benefit of family farmers. The Graham Center's work reaffirms the viability of small farms; the efforts of farmers to establish their own marketing mechanism show that the will to continue their traditional way of making a living is as strong as ever. The problems enterprising small farmers face—and their reluctance to put their money and efforts into new ventures before they see some strong assurance of success—should point the way toward redirected government efforts as well, both in the administration of state-level agriculture programs and at the land-grant university centers such as North Carolina State University. Meaningful policies could result from public discussion about why family farmers are searching for alternatives to tobacco. Solid research and technical assistance is needed on ways to improve marketing and distribution systems for small farmers' potentially valuable contribution: food crops.

Tobacco farmers generally have had an edge over other kinds of farmers for many years because of their guaranteed market and support program. But small operators lack the capital to keep up with intensive mechanization trends. Tobacco farmers have to find new ways to survive on the land or join the hundreds of thousands who must search for non-farm employment. Tobacco farmers who wish to grow alternative crops, such as vegetables, have some advantages from the start: much of their equipment will transfer to their revamped operations; in most cases, they will save on energy costs; many of the alternative crops could provide them even better profits than does tobacco; and they can stay on the farm. In marketing their produce, though, they will need assistance, and that is the challenge that private and public interests must meet, cooperatively.

Ranking of crops according to net return per acre in North Carolina (1980)

1.	tomatoes (mountains; trellis)	$3,454.46
2.	strawberries (fresh market)	3,008.00
3.	apples	1,974.65
4.	peaches (fresh market)	1,960.00
5.	strawberries (pick your own)	1,278.00
6.	tobacco (flue-cured)	1,198.02
7.	blueberries (fresh market)	1,142.37
8.	cucumbers (fresh market)	799.19
9.	watermelons	775.15
10.	sweet potatoes	653.05
11.	okra (fresh market)	466.96
12.	cabbage	437.96
13.	summer squash (fresh market)	339.04
14.	snap beans (fresh market)	330.24
15.	pole beans	301.16
16.	white potatoes	260.84
17.	sweet corn (fresh market)	249.89
18.	peanuts	238.18
19.	alfalfa hay	171.00
20.	tomatoes (processing; hand harvested)	157.42
21.	snap beans (processing)	144.39
22.	cotton	130.44
23.	green pepper (fresh market)	125.00
24.	red clover/orchard grass hay	117.65
25.	okra (processing)	116.74
26.	cucumbers (processing)	107.41
27.	corn (no till)	106.34
28.	corn	101.71
29.	tall fescue hay	101.22
30.	wheat and soybeans (double cropped)	98.30
31.	grapes	97.52
32.	soybeans	72.45
33.	wheat	62.77
34.	milo	39.61
35.	barley	30.92
36.	oats	0.51
37.	coastal bermuda hay	—98.50

FOOTNOTES

*Grise, Verner N., "Flue-Cured Tobacco Farming: Structural Characteristics, Labor Use, and Mechanization," paper presented at the 29th Tobacco Workers Conference, Lexington, Ky., January 21, 1981, Economics and Statistics Service, USDA.

[1] Letter from T. C. Blalock, director of the Agricultural Extension Service, to W. D. Lewis, agricultural policy advisor to North Carolina Governor James Hunt, July 7, 1978, which said, in part:

"In view of the apprehension from the Governor's office regarding the possible modification or loss of the tobacco support program, I have asked our commodity-oriented departments to estimate the additional annual gross cash farm income that might be generated through accelerated efforts on the part of producers and processors working with the Agricultural Extension Service if a substantial drop in tobacco income were to occur. A summary of these estimates is attached. . . .

Commodity category	Present estimated annual gross farm income	Future estimated annual gross farm income
Christmas tress	$5,400,000	$21,000,000
Beef cattle	94,600,000	253,900,000
Horses	110,000,000	300,000,000
Dairying	171,130,000	214,378,932
Horticulture	246,200,000	432,900,000
Poultry	606,205,000	893,471,743
Swine	314,000,000	450,000,000
Agronomy (new crops)	671,000	2,240,000

These estimates are not considered additive because they were developed independently and do not reflect competition for the same resources of production. However, if all this expansion could occur under the most favorable circumstances, even so we could not replace all the income normally resulting from tobacco production. This optimistic pattern of increased production of alternatives to tobacco would require about as much land as is required for tobacco. Depending upon the degree of mechanization adopted, the alternatives to tobacco could require almost as much labor as for tobacco. Some of these enterprises would require substantial amounts of investment capital."

TRIBUTE TO JOHN DALTON

● Mr. JOHNSTON. Mr. President, I would like to invite the attention of my fellow Senators to three resolutions prepared on the occasion of John Dalton's departure from public service which testify to the esteem in which my good friend and fellow citizen of Shreveport, La., is held by the Federal Home Loan Bank Board, the Federal Home Loan Mortgage Corporation and the Federal Savings and Loan Advisory Council. Before becoming Chairman of the Bank Board and the Mortgage Corporation, Mr. Dalton served as chairman of GNMA, and thus has helped to guide the thrift industry through a very difficult period in its history. He has distinguished himself as an individual and as a public servant, and I would like to extend to him our thanks and best wishes in his return to the private sector.

Mr. President, I ask that the resolutions earlier referred to be printed in the RECORD.

The resolutions are as follows:

FEDERAL HOME LOAN BANK BOARD

Whereas, John H. Dalton will resign as a member of the Federal Home Loan Bank Board on July 15, 1981, after a period of loyal and distinguished public service; and

Whereas, Mr. Dalton has served with diligence, dedication, and devotion to the objectives of the agency, both as Chairman and Board Member of the Agency; and

Whereas, Mr. Dalton has particularly distinguished himself in his relations with other agencies, departments, and the Congress in an effort to develop creative solutions to problems besetting the thrift industry; and

Whereas, Mr. Dalton has taken a leading role in regulatory actions, such as the formulation of adjustable mortgage plans, increased investment authority, and more flexible reserve, liquidity, and liability structuring, in order to make more funds available for housing; and

Whereas, Mr. Dalton has helped direct the Agency's role in deregulation efforts, including reduction of applications, reports and other paperwork burdens and the simplification of many rules and regulations; now, therefore,

Be it resolved, that the Board, on behalf of the remaining Board Members and the staff, expresses our high esteem for Mr. Dalton as a colleague and friend, our admiration and respect for his integrity, loyalty, and outstanding performance, and our wish for him in the years ahead to enjoy good health, happiness, and fulfillment of his future career goals.

FEDERAL HOME LOAN MORTGAGE CORPORATION

Whereas, John H. Dalton served both as a Member and as Chairman of the Federal Home Loan Mortgage Corporation during the period February 28, 1980 to July 15, 1981;

Whereas, John H. Dalton carried out his responsibilities in an able and energetic manner and provided leadership and guidance to the Corporation during a critical period in its history; and

Whereas, John H. Dalton has decided to return to private life;

Now, therefore, be it resolved by the Board of Directors of this Corporation that John H. Dalton be, and hereby is, commended by the Board for his high level of service to the Corporation and the secondary mortgage market.

FEDERAL HOME LOAN BANK BOARD

Whereas, the Honorable John Dalton has served as a member of the Federal Home Loan Bank Board in a distinguished manner since February of 1980, and

Whereas, Mr. Dalton assumed the role of Chairman of the Board during an extremely critical period for the S&L Industry, and under his leadership, the Board continued to pursue solutions to the challenges facing the industry during this critical period, and

Whereas, as a result of Mr. Dalton's advice, assistance, support and gracious manner the transition of the Bank Board's Chairmanship took place with a minimum of disruption and no loss of leadership for the thrift industry, and

Whereas, Mr. Dalton has left a lasting legacy to the S&L Industry and to the American Public that the Industry serves, particularly in making financing for home ownership available to the widest possible spectrum of the American Public.

Be it resolved that (1) the membership of the Federal Savings and Loan Advisory Council express their gratitude for Mr. Dalton's outstanding efforts in behalf of the nation's public good, and (2) the Council membership wishes Mr. Dalton unlimited success on his return to the private sector.●

ABORTIONS

● Mr. HEFLIN. Mr. President, I want to enter into the RECORD an article

written by my friend, Joe Azbell of the Montgomery Independent, in the edition of that newspaper dated July 16, 1981. This article points out the high number of abortions being performed in Montgomery, Ala. This is extremely disturbing. The abortion issue continues to be an issue of serious concern to those that feel that life should be protected at every stage. I deeply regret that this is happening in my home State, but I suspect that similar activities are occurring in every State. I ask that the attached article be printed in the RECORD.

HERE, PERHAPS 5,000 ABORTIONS A YEAR—AS 3 ABORTION CLINICS BATTLE IT OUT

(By Joe Azbell)

Abortion clinics are in a fierce competitive fight for business in Montgomery and are running ads on radio, TV and newspapers to get clients.

It's paying off in cash dividends for the clinics, which are doing a vigorous business here.

Mary Farmer, a registered nurse who owns Beacon Clinic, says her clinic does 150 to 200 abortions a month. There are two other abortion clinics here—Montgomery Women's Medical Clinic and Reproductive Health Services of Alabama.

From our information, there are 400 to 500 abortions performed monthly in Montgomery, or about 5,000 to 6,000 annually.

Reproductive Health Services, at 1203 E. Southern Bypass, runs a typical ad: "Unplanned pregnancy . . . pregnancy testing . . . abortion services . . . abortions by board certified medical gynecologists."

Beacon Clinic goes with a similar ad but with extras: "Unplanned pregnancy . . . concerned sympathetic help . . . abortion . . . skilled doctor on staff . . . birth control, counsel and devices . . . free pregnancy testing . . . consultations strictly confidential." This clinic is at 1011 Monticello Court.

Montgomery Women's Medical Clinic, at 3866 S. Court, advertises itself as a "facility for performing therapeutic abortions." It offers "free pregnancy testing, family training and counseling, service, care and help for rape victims. We care. Call for answers on abortion, birth control, VD control."

AN EARLY START

We observed comings and goings at the three clinics one recent morning. Business starts early. Automobiles begin to arrive before 9 a.m. and usually the woman seeking an abortion is accompanied by another woman or often by a man.

Many women from Central and South Alabama counties come to Montgomery for pregnancy testing, followed later by abortions. Some come in pickup trucks but others drive expensive automobiles. The women seem to run from very poor to well-off economically. Ages vary from young to middle-age, but most are young.

It usually takes two trips to the clinic to complete an abortion, unless the patient has been referred by a physician. The first trip is for testing and discussion of fee, followed by the abortion operation. The abortions are performed on Saturdays at Reproductive Health Services. Two out-of-town physicians do the operations there. Local physicians are involved at the other clinics. It's an assembly-line operation that takes 10 to 15 minutes, with one patient following another.

Linda Stolarczyk, administrator at the clinic, said she didn't advertise except for small, discreet ads until Mary Farmer at Beacon Clinic "began her big promotional campaign." She added, "Now we are forced to advertise." She said she is in the newspapers, telephone book and on two radio stations. "I don't think it's proper to advertise on TV but others are doing it." The Southern Bypass clinic does from 20 to 25 abortions a week, or from 80 to 100 a month. The clinic is owned by an Alabama corporation, formed in Mobile. She said the principal stockholder is a Miami businessman (unnamed) who owns real estate and operates several businesses. The administrator said she has a degree in psychology. "Bruised emotions are more important than the 10 minutes it takes for the abortion," she said. "We care about our patients."

FROM ALL OVER

She said about a third of her patients are from out of the Montgomery area. "Dothan doesn't have a clinic so we get a lot of women from there. And they come from Opp and Andalusia and Enterprise and Ozark and Troy. There is one doctor in Selma who does abortions but he charges twice what we do so we get patients from Selma," she said.

A representative of the Montgomery Women's Medical Clinic said the clinic charges $225 for an abortion "and that includes your medical take-home package."

Ernest Harris of Birmingham, who at one time was in the auto racetrack business in North Carolina, owns the Montgomery Women's Medical Clinic and others in Birmingham and Mobile.

Summit Medical Center of Birmingham advertises for business in Montgomery. One reason out-of-town clinics do so is because some women here prefer to go out of town for fear someone might learn about their visits to a local clinic.

The women who run the local clinics are fluent, educated and outspoken about abortions and cooperative with information. At least two of the clinics indicate they are in a tough fight since Beacon Clinic has broadened the advertising. In many cities, billboards are the main medium for abortion clinics and for anti-abortion messages as well.

MILLION A YEAR

It is estimated that all three Montgomery clinics do a total of about $1 million a year in business. Physicians who perform the abortions get a great deal of this money. They usually operate one day at each clinic although special arrangements can be made. Besides doctors' fees, there's advertising, insurance, rent, employees, taxes, licenses, which indicates it's a profitable but not rich-quick business.

The big question is how fierce will the advertising campaign get? Will the promotion of abortion clinics become so blatant as to turn off even supporters or will it bring on a demand for new legislation?

The administrators appear often on TV and radio talk shows. They are candid about the business. Mary Farmer, who has received some national awards for her work, says she has appeared on "so many TV and radio shows that I couldn't count them."

"To me, I am performing a public service. Alabama has the highest teenage pregnancy rate in the United States. We've got to cut down on that rate. I think we are doing our part here. I am promoting the clinic and abortions at the same time."

The abortion clinics operate strictly on cash and credit cards. You can charge an abortion on Visa or Master Charge at Beacon Clinic, Mary Farmer said. "I don't accept checks. Every time I do, it comes back bad so we don't accept them—just cash and credit cards."

She said her charge for an abortion is ¢200.

As you talk to the heads of the local clinics, you sense a back-biting competition. They don't hide their adversary attitudes. They are fighting for business.

FROM THE OTHER SIDE

Montgomery's Right-to-Life groups are using billboards to promote abortion alternatives.

But the abortion clinics do not seem too concerned about the right-to-life groups. They have the law on their side and become concerned about the anti-abortionists only when state legislation is involved.

The growth of abortions in Montgomery has been rapid. When the first clinic opened, business was relatively slow. Today with some 5,000 to 6,000 abortions annually, business is booming.

The advertising campaign is intended to double or even triple the number of abortions.

One administrator put it like this: "Many young couples are having difficulty making ends meet. They can't afford to have a baby. They come to us for $200 and beat the costs of inflation. They simply wait until they can afford a child. The single mother comes to us for these and many other reasons. No two patients are alike. And it's a difficult subject to discuss with some people. I think I'm performing a real service."

Some people in Montgomery would violently disagree. They are trying to come up with methods for closing down the abortion clinics, which they call "murder factories." Meanwhile the promotion battle between the clinics goes on each and every day with no end in sight and the number of abortions continue to grow.●

DEPENDENCY AND INDEMNITY CARE BENEFITS

● Mr. DECONCINI. Mr. President, I am pleased to be a cosponsor of S. 917 and would like to commend the chairman of the Veterans Affairs Committee for insuring expeditious consideration of this legislation. All too often in recent years, legislation providing for cost-of-living increases in veterans' disability and dependency and indemnity care benefits has not received timely consideration by this body thereby delaying cost of living adjustments. Not only have such delays subjected veterans to unnecessary hardships, they have also created additional financial burdens for the Veterans' Administration which has had to process retroactive checks once the legislation cleared Congress. I am delighted that history will not repeat itself this year.

I am particularly grateful to the chairman, Senator SIMPSON, and the ranking minority member, Senator CRANSTON, for incorporating as part of the committee amendment to this legislation a provision to modify the application of section 1776 of title 38 of the United States Code.

Title 38 applies different criteria for the approval of educational institutions for GI bill purposes to educational institutions which have been fully accredited and approved by a nationally recognized accrediting agency or association (section 1775), and nonaccredited institutions (section 1776). Schools which are candidates for accreditation are considered, for title 38 purposes, to be in a nonaccredited status. One regulation which is applicable to nonaccredited schools—and thus to schools in candidate status—is the requirement that the school maintain a pro rata refund policy which provides that any unused portion of tuition, fees and other charges be

returned to the student veteran—on a pro rata basis—in the event he or she withdraws from a course of instruction.

Application of this regulation has worked an undue, and I believe unintended, hardship on large, public institutions with low tuition charges whose administrative and bookkeeping activities for all schools in the system are centralized. Let me cite an example of the onerous financial burden this policy would place on one community college in my State. Rio Salado Community College which charges tuition fees of $3 per credit hour has indicated that this policy could result in a refund to a veteran of less than 50 cents while it might cost the system as much as $25 to process the check. I ask unanimous consent that a more complete list of examples of the impact of the pro rata refund policy be printed at the end of my statement.

As a result of this burdensome policy, one institution within the Maricopa County Community College System has not sought VA approval for purposes of veterans' educational benefits, simply because the system cannot afford to implement the pro rata refund policy. And all new schools coming on line in the system—and there are several—will soon be confronted with the same problem. Since it takes anywhere from 4 to 8 years for schools to receive full accreditation, veterans electing to attend these new institutions will be deprived of educational benefits to which they are legally entitled. Although I am only familiar with the problems in my home State, it is possible that this problem could become national in scope, particularly if schools that do not now charge tuition find it necessary for State budgetary reasons to impose tuition charges.

Section 1776 was incorporated as part of title 38 in order to curb abuses and insure quality education for veterans at institutions in candidacy status. I wholeheartedly endorse those objectives. However, I do not believe it was the intent of Congress to place unreasonable financial and administrative burdens on large, public educational systems which are seeking to provide quality education.

The amendment incorporated in this bill is narrowly drafted. It does not delete section 1776; it simply provides the administrator with the authority to waive the pro rata refund policy if he determines that it will place an undue administrative hardship on institutions because the total amount of tuition, fees, and other charges is nominal.

Again, I thank the chairman for his assistance in rectifying this problem.

Mr. President, I ask that the material showing examples of pro rata refund policy be printed in the RECORD.

The material follows:

EXAMPLES OF A PRO RATA REFUND POLICY APPLIED TO VETERANS ENROLLED SPRING 1980

1. Veteran A enrolled in Fall 1979–80 semester for 3 credit hours. Dropped to 0 credit hours on October 23, 1979. Still enrolled at sister college for 6 credit hours. Amount of refund: $1.88

2. Veteran B enrolled in Spring 1979–80 semester for 3 credit hours. Dropped to 0 credit hours on March 14, 1979. Amount of refund: $16.00

3. Veteran C enrolled in Fall 1979–80 semester for 9 credit hours. Dropped to 6 credit hours on September 27, 1979 and to 0 credit hours on December 14, 1979. Amount of refund: (1) $2.82—(2) $2.53

4. Veteran D enrolled in Fall 1979–80 semester for 12 credit hours. Dropped to 7 credit hours on September 17, 1979 and to 0 credit hours on December 14, 1979. Amount of refund: (1) $22.95—(2) $2.71

5. Veteran E enrolled in Fall 1979–80 semester for 4 credit hours. Dropped to 0 credit hours on December 14, 1979. Amount of refund: $2.18●

PRODUCTIVITY: THE 1981 JEC MIDYEAR REPORT

○ Mr. JEPSEN. Mr. President, I submit for the RECORD today the Joint Economic Committee's unanimous midyear report on "productivity." The 20 members of the committee have been carefully studying and reviewing the critical economic issues of America's declining productivity. This report represents the committee's latest work and their agreement on the importance of reversing the productivity slump if we are to restore America's economic health. The report includes the committee members' consensus on recommendations to reverse America's declining productivity.

The committee hopes that Members will take note of the magnitude of the productivity decline, its effect on the economy, and the importance of reversing the slump. We hope that Congress will be moved to action on the committee's recommendations for reversing the negative trend in productivity.

During the three decades following the end of World War II, the American economy was the strongest and most productive in the world. Since 1973, however, our productivity growth has deteriorated sharply. Between 1950 and 1965, the level of productivity grew at an annual rate of 3 percent. For the period from 1967 to 1973, the annual rate was 2.4 percent. Between 1973 and 1980, the country experienced a dramatic drop in productivity as the rate of growth fell to 0.6 percent annually.

This fall-off in the growth of U.S. labor productivity has become a major source of concern for Congress and the American public. And for excellent reasons—declining productivity has far-reaching effects on the Nation's economic health; declining productivity leads to higher inflation, higher unemployment, and a weakening of the U.S. trade position. In addition, the absence of productivity gains prevents any general improvement in the standard of living of the American people.

Higher productivity is vital if America is to restore its image and position of strength in the world. Higher productivity is vital if America is to stop its inflationary spiral. Higher productivity is vital if America is to increase employment levels. Without productivity gains, it will be difficult, if not impossible, to achieve the healthy and strong economy we are all working for.

Congress has recognized the importance of this issue. The effort to reverse the productivity slump now takes center stage in virtually all congressional economic policy discussions. Efforts to improve the level of productivity must remain at the forefront of not only the work of Congress but also in the actions of business, labor, and the American people in general.

America still has the highest level of productivity in the world. Discussions about America's declining productivity refer to a decline in the rate of productivity growth and not total productivity. When one looks at the entire U.S. private economy compared to our competitors, American industry and workers rank as the most efficient and productive in the world. However, if current trends continue, it will not be very long before many of the other industrialized countries achieve productivity levels that meet or exceed the productivity of the American worker.

Although productivity growth has long been recognized as one of the most important determinants of national well-being, it has not until recently been a major source of concern for the Congress or for the American public. The members of the Joint Economic Committee are encouraged by the growing interest in this issue which the committee first began studying in 1957 with a study on productivity, prices, and incomes. The committee continued to review the productivity issue periodically throughout the 1960's and 1970's. Over the past few years especially, the Joint Economic Committee has been actively studying and reporting on the extent, causes, and effects of the productivity decline.

The Joint Economic Committee's midyear report calls attention, once again, to this most important issue. The report begins with a summary of America's productivity record and a discussion of the causes of the decline. In the main portion of the report, the committee presents their unanimously approved recommendations for improving America's productivity. The committee's eight recommendations, which are primarily microeconomic policies, involve both Government policies and private-sector activities that could help restore the American economy's productivity growth.

The specific recommendations for action are directed at three areas:

First, Congress and the administration should pursue economic policies aimed toward restoring our economy to healthy, long-run growth as well as toward lower inflation and unemployment.

Second, government and business should work together toward increasing the stock of capital available to America's workers. In both the public and private sectors, we should pursue policies to increase investment in both real and human capital, reduce waste and inefficiency, and improve the Nation's infrastructure.

Third, inflation and our Tax Code structure have forced many corporate managers to concentrate on short-term returns. In some cases, long-term planning has suffered. The members of the Joint Economic Committee recognize that only by reducing inflation and changing the Tax Code, can American

businessmen aim at the long run. In this report we make recommendations designed to reduce inflation and minimize the shortterm bias of the Tax Code.

The Joint Economic Committee's first recommendations calls for Congress and the administration to pursue policies which will promote economic growth, reduce inflation, and increase employment. High growth will enable industry to utilize their unused capacity, thereby increasing the output per unit of fixed costs. A reduced rate of inflation will improve productivity by increasing personal savings and by providing a stable and less risk economic environment conducive to business investment. High employment improves productivity by making it easy for workers to adjust to technological change by finding new jobs at comparable or better pay.

The second recommendation proposes that the tax system be changed to encourage productivity improvement in the private sector. Specifically, the Committee favors liberalized depreciation for capital-intensive industries in order to stimulate fixed investment, tax incentives for research and development activities, and improvement and increased use of the targeted jobs tax credit for labor-intensive industries. Adoption of this recommendation will help to resolve one of the most important factors in the productivity slowdown: the inadequate level of capital investment during the 1970's.

Creating conditions for lower interest rates is the focus of the third recommendation. The Democratic and Republican members of the Joint Economic Committee believe that lower interest rates will stimulate investment in business, agriculture, housing, and research, with the result being an expansion in productivity and competition.

The fourth recommendation calls for improved investment in vital public and private infrastructure. The proper macroeconomic policies or a well-designed capital depreciation program will not have a maximum effect without adequate highways, ports, railroads, bridges, utilities, and the like. The steady shift in population from the Northeast and Midwest to the South and West, coupled with declining tax bases in some parts of the country, has placed increasing, unmet demands on the Nation's infrastructure.

While public works investment in constant dollars by the Federal Government has remained near its 1968 peak, such investment by State and local governments declined by 40 percent and 25 percent, respectively. The committee believes that some revision or consolidation of existing Federal categorical grant programs may stimulate a more effective use of public funds and diminish the risks of waste and fraud occurring in these programs.

In the fifth recommendation, the committee advocates Government efforts to reduce the burden of paperwork and anticompetitive economic regulation. Efforts must also be made to insure that social regulation meets its objectives in cost-effective ways. It would be difficult to quantify the effect of Government regulation on productivity, but there can be little doubt that the rapid growth of Federal regulatory programs during the past 15 years has hurt.

A program to improve the productivity of the American economy must include measures to improve regulatory cost-effectiveness and reduce the unnecessary costs of redundant, ineffective, wasteful, and conflicting regulations and paperwork. Regulatory cost-effectiveness must be improved, but not at the expense of tampering or rescinding the significant contributions some of the regulations have made toward the overall well-being of consumers and workers.

The sixth recommendation focuses attention on the need to improve the productivity of the Federal Government. Just as America's businesses use scarce resources to produce private consumed goods and services, the Government also absorbs scarce resources in order to produce public goods and services. Improving the Federal Government's productivity would free up resources for use in the private sector or to permit more effective achievement of Government objectives without expanding the budget or Federal employment.

The final two recommendations focus on business and labor's responsibility in reversing the productivity decline. The seventh recommendation encourages business to develop a new emphasis on long-run competitiveness in product development, production, engineering, distribution, and marketing; rather than on short-term financial performance. A key component of increasing long-term competitiveness is increasing productivity. Therefore, the members of the Joint Economic Committee strongly urge each and every American business firm to develop its own productivity improvement program.

The final recommendation encourages labor and management to cooperate in improving long-run productivity and competitiveness. Cooperative activities by labor and management have already demonstrated their effectiveness in increasing productivity. The committee heartily supports continued labor-management cooperative activities.

There is no doubt that Government must play an important role in reversing the productivity decline. The committee's recommendations clearly outline Government's responsibility. The Federal Government must pursue policies which will reduce inflation, lower interest rates, and provide a more stable and less risky business environment. Congress and the administration must also develop a tax system which will encourage, rather than discourage, productivity growth. And all levels and branches of Government must work toward reducing unnecessary and anticompetitive paperwork and regulation.

In addition to Government, however, business, labor, and the American people in general must share in the responsibility for improving productivity. There is much that the private sector can do on its own that would significantly enhance productivity. I am pleased to report that business and labor have already undertaken successful efforts to improve productivity.●

ALCOHOL AND DRUG ABUSE PROGRAMS

● Mr. RIEGLE. Mr. President, I should like to take this opportunity to share with my colleagues an open letter to the Congress which addresses concerns I have expressed on a number of occasions over the Senate Labor and Human Resources Committee's proposal to include alcohol and drug abuse programs within a larger health services block grant contained in the Omnibus Reconciliation Act of 1981. The fate of these services is presently being decided by House-Senate conferees.

Over 20 national organizations and groups with first-hand experience and knowledge with the problems of alcohol and drug abuse have cosigned this letter urging the acceptance of the House proposal for a separate block grant for alcohol and drug abuse services. I urge my colleagues, especially those serving as conferees in health-related matters, to give serious consideration to the recommendations of these professionals.

I ask that this letter be printed in the RECORD.

The letter follows:

AN OPEN LETTER TO THE U.S. CONGRESS

Re: Discriminatory provisions against alcohol and drug abuse services contained in the Senate-proposed health services block grant.

The problems of alcohol and drug abuse are pervasive and continue to damage American families, business and our armed forces. The costly economic drain they create on the health services system, our criminal justice system and social services systems must be curbed. The Federal government has historically played a critical role in the effort to reduce these problems. However, under the proposed Senate health services block grant national leadership, as well as State and community efforts in alcohol and drug abuse are in grave jeopardy.

It is vital that our limited public health resources be used as effectively as possible. In this respect, the health services block grant as proposed by the Senate will spell disaster for alcohol and drug abuse services. Under the Senate proposal, States will be required to continue funding for community health centers, community mental health centers and migrant health centers. They are also empowered to transfer a portion of the block grant funds to continue child and maternal health programs, and to spend a sizeable portion on administrative expenses. No protections are retained for alcohol or drug abuse services, and in fact, as little as twenty percent of the block grant may be available for discretionary use by the States. This amount may be used for any of the following health functions: alcohol and drug abuse services, community health centers, migrant health programs, home health services, emergency medical services, and program management.

Under the best of circumstances, the States will experience massive reductions in their Federal funds for alcohol and drug abuse. Without specific statutory protections, such as those provided other health programs, alcohol and drug abuse services will be disproportionately reduced and many will cease to exist. This would reflect, by public policy, the discrimination which has been socially expressed against people with

alcohol and drug abuse problems for many decades.

A more productive approach is possible within current budgetary constraints. It is critical that the Congress seek changes in the Senate's health services block grant, through a mini-block grant approach, to offer the same protection to alcohol and drug abuse services as has been included for other categorical health programs. A mini-block grant will assure that necessary services continue. This would provide States with much greater flexibility than they now have to provide services according to their own needs. In fact a mini-block is far more embracing of the block grant concept than would be a further earmarking of the Senate health services block grant.

While we are appreciative of the important demonstration authorities for alcohol and drug abuse contained in S. 755, this alone is not enough to ensure an adequate response to our country's alcohol and drug abuse problems. Neither will further earmarking within the Senate proposal be a sufficient remedy. The most productive means to accomplish the goal of maintaining alcohol and drug abuse services is through a mini-block grant.

We the signers of this urgent appeal speak on behalf of people all over the country who will suffer if provisions of the Senate bill prevail and who feel that alcohol and drug abuse services were sacrificed in the construction of the Senate health service block. By denying statutory protections, alcohol and drug abuse services will be virtually the only health programs to have to compete for funding at the State level. And, given the cuts in major health programs across the board, most will cease to exist.

Critical decisions will soon be made concerning the future of our national response to the problems of alcohol and drug abuse. We strongly urge modifications to the Senate bill which will preserve the service systems and more effectively reduce the economic drain, family disintegration and human suffering related to alcohol and drug abuse. Since it is not possible to maintain current levels of funding, it is imperative to allocate available funds in the most effective way. We urge your support for the adoption of a conference report which contains provisions for an alcohol and drug abuse mini-block grant.

AMERICA'S PROMISE OF FREEDOM

● Mr. EAST. Mr. President, I should like to share with my colleagues the message given by Charles Malik, the Jaques Maritain distinguished professor of moral and political philosophy at the Catholic University of America, to an audience at the Cosmos Club here in Washington, D.C., on April 21, 1981. This message, which has been published in the June 15 issue of Vital Speeches, is important to us because, although it is one of optimism, the speaker emphasized the need for continued moral resolution in the face of the dangers of Marxist-Leninism which confront the world today.

America, Professor Malik concedes, is a providential land, promising abundance, social order, justice, and the rule of law. It is inhabited by a people who enjoy freedom, and who benefit from a pervasive sense of trust, but these blessings carry with them burdens and responsibilities. American freedom can only be preserved for so long as America is willing and able, in the words of John Foster Dulles, to dissolve and roll back the formidable glacier of slavery which is creeping over the world. America's allies in the struggle against Marxist-Leninist slavery are not necessarily the people that we shower money on, they are the unfree people around the world who seek to be free, and the free people who seek to remain free.

Cynics tell us that America cannot be the policeman of the world, but Professor Malik correctly warns that—

In this closely-knit world there can be no political vacuum, and every neglected area is going to be filled by someone else. When lesser men exude the impression that America should abdicate its world responsibilities, and should crawl back into its safety shell (the truth is that there is no shell and certainly no safety anymore) . . . then one is overtaken by the fear that faith in freedom has itself eroded.

There is a very real danger of falling into the Marxist-Leninist trap and seeing the contemporary struggle solely in terms of a conflict between rival economic and political systems, between "democratic capitalism" and "communism." According to Professor Malik:

Nothing would please Marx and Lenin and all their followers more than if the debate between them and their opponents were carried out only within the bounds of economics and politics. The ultimate philosophical point of Marxist-Leninism is precisely the reduction of all truth, all value, all meaning to the level of material-economic-bodily categories. Instead, Marxists should be forced to debate—and debating does not mean only the argument of words—on the plane of man and history and truth and value and freedom.

The sad truth is that the whole climate of opinion in the world today has become pervaded by materialistic and socialistic categories of thought, and in this sense Marxism, by dragging everyone into its frame of reference, has already gained a major advantage. Even the American family—America's holiest institution and one of the essential anchors of all American values—is in grave trouble and will remain so for so long as we allow people to beguile us by using the term "sexual revolution" in anything but a pejorative sense.

Yet even at this late hour America can still succeed in repelling the forces of slavery, provided we preserve our courage and will to do so. We must remember that it is freedom, not peace, that we seek to defend; we confront Marxist-Leninism with arguments that transcend restrictive materialistic terminology; and we must speak instead about man versus the state, about freedom versus slavery, and about the supremacy of the mind and the spirit.

Mr. President, I ask that Professor Malik's address be printed in the RECORD.

The address follows:

THE WORLD PROMISE OF AMERICA—THE TRUTH IS THE MOST IMPORTANT THING

(By Charles H. Malik)

The world promise of America is something providential. Nothing of the order of the American phenomenon can be fortuitous or accidental. America has been schooled and refined precisely for its world promise. It may still have to be chastened further before its authentic word to the world can be uttered. Whatever the trying and the chastening still, doubtless America's word will be articulated and uttered one day.

Already a few features are discernible. The authentic word of America is not going to descend upon America all of a sudden, as by magic: it is a slow ripening of a long process, and, therefore, the features already apparent must somehow enter into the constitution of the definitive product.

America promises abundance. Is there a need, or even a want or whim, that someone has not thought of and has not devised the means to satisfy? There is no waiting for the need or the want or the whim to arise of itself; it is artificially created, a process that need have no end. You can walk to the Drug Store around the corner, or to the Safeway a few yards beyond, or to a thousand other specialized stores, and fetch gadgets for your most exotic desires. And you need not go there yourself; you can order on the telephone through the yellow pages of the telephone directory almost anything your whim may covet, and in many instances it would be delivered to you. The quantitative abundance of goods is only matched by their qualitative diversity.

What about the personal financial means to share in this material abundance? This, too, America promises on an ever-widening scale. To be sure, there are millionaires and billionaires, but the middle class, both upper and lower, is probably more numerous and stable than middle classes elsewhere. Neither are the slums more slummy than they were in the past, or than they are today in other regions of the globe. And there is a growing social consciousness, both official and unofficial, to face and deal with the problem of poverty and privation. And while I do not preach poverty, but, on the contrary, advocate real social justice in the strongest possible terms, the truth is that above the level of subsistence there are many poor whom the rich may envy, and above the level of sufficiency there are many rich whom the poor may pity. There is a strict correlation between the multiplicity of wants and the multiplicity of woes. The proper retention of this distinction between the blessedness of poverty above a certain minimal level and the trials and tribulations of riches above a certain maximal level is one of

the promises of America. I counsel you to ponder the Bible or Saint Augustine or Saint John Chrysostom on the afflictions of the rich and the happiness of the poor. I know very well how this last sentence of mine is misunderstood or misrepresented or ridiculed by the cynics and materialists of this age.

America promises order. Practically all aspects of life are ordered. People stand in line; the bills reach you regularly; dealings with banks conform to an orderly procedure; the papers appear on time with the latest news; the TV and the radio are relentless in their neat performance, whether for good or evil; the telephone system connects you in a matter of minutes, and sometimes of seconds, with practically anybody in the Western Hemisphere and in Europe, Japan, Australia, and many other parts of the world, a population aggregate of about one billion and a half; and nothing is more impressive than the neatness and methodical orderliness with which the great hospitals and medical centers function. Things do break down now and then, of course, but that is not the rule: the rule is order, regularity, dispatch. The mind is thus relieved from many a care and worry. And the question then becomes: what will the mind, thus relieved, turn to?

America promises the rule of law. The mind is conscious all the time that, although the law can be broken, and sometimes indeed is broken, yet the law is there, a potent though invisible force. And just as there is no respect of persons with God, so there is no respect of persons with the law. In this sense and to this extent, the law is a sort of image of God. With the Constitution being the supreme law and with the judiciary impregnated with the British norm, the branches of the government know and keep their lawful limits and the citizens know that their duties are enjoined and their rights protected by law. That the law is above every person, including the President, and that the freedoms of the citizens, including their corporations, are safeguarded by the Constitution, these two matters are among the most important promises of America.

Social justice is another of America's promises. What is distinctive about America here is the fact that social justice has been considerably, even phenomenally, advanced since World War II without any impairment of fundamental freedoms. Social justice does not mean indiscriminate mechanical egalitarianism in America; plenty of room is allowed for structure, articulation, distinction, difference, individual genius. The Aristotelian principle of distributive justice is more or less recognized in America. Of course tensions in some respects have heightened, but the solid achievement in this realm speaks for itself. There is no comparison between matters as they stand now and as they did in 1945—both in custom and in law. The effective harmonizing of social justice with freedom belongs to the genius of America. While others could achieve a measure of social justice only at the expense of freedom, the American character and outlook has succeeded in reconciling the two.

American promises a pervasive sense of trust. People trust one another and take each other's word. You are asked for identification documents, but often you are not. In general, you trust your doctor, your lawyer, your colleague, your partner, your dealer. In general, social, business, professional and friendly relations are characterized by a spirit of honor and integrity. You move about in stores, churches, restaurants, hospitals, clubs, government buildings, the offices of great corporations, the streets, with the sense in general of complete safety. It does not occur to you that you are being shadowed or pursued. You unquestioningly trust the goods you buy to be as they are marked or advertised, and while fraud at times there is, the remarkable thing is that with the spirit of freedom and trust being so pervasive there is only so little of it. You do not go about suspecting that the people you meet are scoundrels. You take it for granted that what people are telling you is the truth. Despite the fact that the enemies of America are trying to fan the spirit of mutual mistrust among the American people, I do not believe they will succeed. There are enormous social problems in America but the spirit of trust and confidence remains remarkably steadfast. It is the most important factor that will enable America to overcome these problems.

American statesmen laugh. Do Japanese or Chinese or Soviet statesmen laugh? I have not seen any of them in pictures laughing. Maybe they consider it beneath their dignity; maybe they take themselves too seriously. Do European statesmen laugh? I have not seen Churchill or de Gaulle or Adenauer or Macmillan or Giscard d'Estaing laugh. But who can forget the face of Roosevelt or Eisenhower bursting with hearty laughter? Truman laughed, and what a magnificent laugh. Carter can hardly be remembered as not laughing. And the relaxed and relaxing laugh of Reagan is his most natural expression. This is not a trivial point; it signifies something deep; there must be a hidden source of joy in the American soul. Laughter is one of the promises of America.

Because I must dwell on one promise more than all the rest, I shall not belabor further the other promises of America: the distinctive American sense of zest and adventure; the perhaps unprecedented, but not unlimited, capacity of America to receive and assimilate so many different races, cultures, backgrounds, ethnic origins; the pluralism of America in which diversity and difference are preserved within the unity of an overarching law; respect for individual initiative and inventiveness, a respect not only honored by custom but enshrined in law; the vast American technology, unrivaled both in scope and variety; the amazing democracy of America, quite incomprehensible to the outside world, a democracy that stunned the world by its workings in the elections of last year; the great universities, libraries and museums of America; the fact that the English language is now the lingua franca of the whole world, a privilege that no other language enjoyed in all history, and therefore the infinite moral responsibilities devolving upon the English-speaking peoples, and especially the Americans, as to the quality of the message and meaning and influence that the use of that language carries in every country and culture today; the fact that America is the recognized leader of the Free World, and that if America, God forbid, should falter or stumble in its leadership, the cause of freedom and man would probably be doomed; the worldwide influence of the American system of government—even the Soviets call their head of state now president!; and the hidden resources of the spirit which de Tocqueville so preceptively observed in American existence.

The cynics, the resentful, will of course retort; I have exaggerated, I have idealized, I have been extravagant and sentimental, I have painted too rosy a picture of the American promise, a picture that will not stand full exposure to the light of the facts. For every promise they will depict a counter-promise: the darker and seamier side of American existence. Also they will say: America is not unique in these promises; other countries hold them out too. I know all that. But I claim that every proposition I made is true "for the most part," and, as Aristotle pointed out, for anything to be true "for the most part" and "in general" is itself most significant: it indicates the presence of an underlying law. To dwell only on the exception, to single out what is not true "for the most part," is to reveal a sickly soul within. In these contingent matters to be true "for the most part" is sufficient. And as to other countries being graced by some of these promises as well, that too I know very well. Their importance in the case of America stems from America's unparalleled importance in the world.

Now I come to the most important thing I want to say.

The greatest promise of America is freedom. Freedom is also the greatest, and in the end perhaps the only decisive, secret weapon which America can wield.

In all its aspects freedom must always be understood as responsible freedom. Thus it must be sharply distinguished from anarchy or from uncritically and thoughtlessly doing anything you please.

The aspects of freedom are numerous; they include free economic enterprise, free elections, free press, freedom of association, freedom of movement, freedom of thought, freedom of expression, freedom of belief, freedom at once to hold fast to and to change your belief, no arbitrary arrest or detention or interference in people's affairs, the inner serene spiritual freedom which creates—just letting people be themselves under the oversight of just law. To the extent to which these things do not exist or are hampered by social or political pressure or by bad personal habits, there is no freedom.

Leaders in the Western world talk about justice; they also talk all the time about peace; but they rarely talk about freedom. Such has been the deterioration in the scale of values in the Western world owing to the rising tide of materialism and sensualism that freedom, the highest gift of the free spirit, has dropped to the bottom of the ladder. People talk as though they would be quite happy if they had enough to eat and drink and live and enjoy themselves, and if they were left alone in peace, even if they were unfree. The burdens and responsibilities of freedom are too much for them; they would rather be relieved of them, as Dostoyevsky demonstrated in the Grand Inquisitor. What is the difference, then, between the ideas of totalitarianism and the ideas of freedom?

Justice is never the end, peace is never the end: unless justice and peace issued in freedom, especially the creative freedom of the spirit, they would be worthless. Justice and peace alone could so tyrannize over man as to produce the deadliest staleness and ennui. Freedom alone saves, freedom alone creates, freedom alone gives meaning to life, and it is this freedom that is the outstanding promise of America, not only for itself but for the world.

When we say the world promise of America we should mean, after all the other promises are enumerated, the promise of liberty.

There is a justice that is profoundly unjust and there is a peace that only the slave can covet; and once I asked an honorable lady, when are you going to have peace, Madam?, and she answered, only in the grave! So there is such a thing as the peace of the grave. And we pray for the dead, May they rest in peace!

But freedom means life, real life, abundant life; it means liberty, joy, being, and when it is the freedom of the spirit, which is the most original freedom from which all other freedoms flow, it means also love. In the guise of love, freedom is the total absence of fear, as the Bible teaches. And when you are wholly liberated from fear, you are a slave to nothing.

America's real friends are not the people you shower money on, nor the people you choke with material and military goods. America's most dependable friends are the free people who want to remain free and the unfree people who want to become free. And yet America's care for these people appears at times to be minimal.

America's other promises are important, but without the promise of freedom, they are empty. It is the enslaved whom you want to help liberate, it is the free who are threatened whom you want to succor. The ultimate real content of every promise is freedom. All other promises are in order to reach and rest in freedom.

Lenin used to say, the peoples of Asia and Africa, the less developed peoples, are the world reserves of the revolution; and the event proved him right. The West should dare say, America should dare say, the free peoples who are fighting for their freedom, and the enslaved peoples who want to fight to be free, are the world reserves of liberty.

And the circle of those who want to fight to be free could be widened indefinitely if only America and the West determined to arouse in the people who never tasted freedom their dormant yearning for freedom, and if only they made them feel that they would support them. And the way of arousing this yearning is a whole art by itself.

John Foster Dulles once spoke of dissolving and rolling back—this is his phrase—the formidable glacier of slavery which is creeping upon the world. Who would dare mention "roll back" today, who would even dare think of it?

But if you do not roll back slavery, or cause it to disintegrate from within—I mean the slavery of the mind, the slavery of the spirit, the slavery even of the body—you are going to be rolled back by it yourselves.

On this matter always two questions arise: America is not the policeman of the world, and think of the balance of terror!

That America is not the policeman of the world goes without saying, and indeed how could America be if she remained true to its own principle of freedom? But what does not go without saying, what should be emphatically pointed out, is that in this closely-knit world there can be no political vacuum and every neglected area is going to be filled by someone else. It is therefore not a luxury that America can dispense with to interest itself effectively and sustainedly in every part of the world. Thus those who say America is not the policeman of the world either have no idea of how isolationism is absolutely impossible from now on unto the end of time, or some of them may, for reasons to be independently ascertained, want to see the enemies of freedom win at the expense of freedom. Which of course does not mean that all regions of the world are of equal interest to America.

And as to the bogy of the balance of terror, again it goes without saying that nuclear war is unthinkable and must be avoided at all costs save the cost of being blackmailed into submission or slavery. And again what does not go without saying is, first, that if nuclear war is by mutual tacit agreement avoided, conventional and other kinds of war are not thereby excluded; and, second, why, if the terror is really balanced and equal, one side could muster courage to advance while the other could not? If the atom and nucleus have virtually abolished world nuclear war, why should one side, under the protective umbrella of the balance of terror, be more resourceful in waging other types of war? If there is equality of terror there should be equality of opportunity. And if the equality of terror provides one side with greater opportunities, then there should be something profoundly the matter with the whole moral and spiritual equipment of the other side—with its very thinking and planning, with its resolution and will. All problems finally resolve themselves into problems of moral preparedness—problems of the adequacy or inadequacy of thought and will. Let no man, let no nation, let no civilization, absolve itself from moral responsibility for its trials and tribulations. Let no man, let no nation, let no civilization, blame "cosmological" factors or blame others for its own "fate" or failure.

In his inaugural address last January President Reagan said:

"Above all we must realize that no arsenal or no weapon in the arsenals of the world is no formidable as the will and moral courage of free men and women.

"It is a weapon our adversaries in today's world do not have.

"It is a weapon that we as Americans do have.

"Let that be understood by those who practice terrorism and prey upon their neighbors."

To say, therefore, that courage and will are decisive, and that the free must lend a hand to those who are struggling to preserve and strengthen their freedom, and must encourage the unfree to free themselves, to say this is wholly in keeping with the sentiment of President Reagan.

But when lesser men, or when cynics, exude the impression right and left that America should abdicate its world responsibilities, and should crawl back into its safety shell (the truth is that there is no shell and certainly no safety shell any more), or that the unimaginable danger of nuclear war has effectively paralyzed America's will, then one is overtaken with the fear that faith in freedom has itself eroded. Faith is more important than courage, more important even than will. It is only the man of faith, the man that believes something, who will dare to will and dare. And if it is the case that faith in the values of freedom has withered away, then, believe me, God help us!

Attempts have been made lately to pit capitalism against socialism and to prove that what is called "democratic capitalism" is superior to communism. Such attempts are quite legitimate, but they could also be misguided. Nothing would please Marx and Lenin and their followers more than if the debate between them and their opponents were carried out only within the bounds of economics and politics, even if this debate should demonstrate that the communist "system" were inferior to the capitalist "system". The ultimate philosophical point of Marxism-Leninism is precisely the reduction of all truth, all value, all meaning—the reduction of everything (they would probably say the elevation of everything—to the level of material-economic-bodily categories. Their opponents should absolutely resist falling into that trap. Far from accepting to be shut up within the confines of that cage, they should shift the frame of reference of the discussion altogether from material-social-economic considerations to the state of the mind and the spirit. Marx and Lenin would still have won if they were bested in an argument confining itself only to social justice and economics and power and class relations, without being challenged in terms of freedom, man, mind, truth, the continuity of history and the supremacy of spiritual values. It is the affirmation of what they deny, namely, the primacy of value and will and mind and spirit and freedom, that they dread most.

They should be forced to debate—and debating does not mean only the argument of words—on the plane of man and history and truth and value and freedom. Not capitalism versus communism, even if you could win the argument; but man versus the state, freedom versus slavery, the established cumulative wisdom of tradition and history versus the arbitrary rebellious "wisdom" of party and politics, the grace of understanding and forgiveness versus the hardened, resentful heart that never understands and never can forgive. On these planes ought the argument with them to unfold itself.

The sad truth is that the whole climate of opinion in the world today, including America, is materialistic-socialistic-relativistic; that in this prevailing climate to shift the frame of reference of the discussion requires herculean efforts; that the self-styled arguers with communism—I mean not only arguers in words but in being, in existence—are both incompetent and incapable of raising the fundamental issues; and that Marx, in dragging everybody to his frame of reference, may already have won, at least for a while.

I must be frank with you. The truth is the most important thing, no matter how delicate or painful. And the truth is that whereas the world promise of America is unprecedented as to its meaning and magnitude, America cannnot deliver its promise with the American family being in the deep trouble in which it finds itself today. The same observation applies to Europe and the West in general. I beg you on my knees not to let anybody beguile you by using the term "sexual revolution" in a non-pejorative sense, namely, in the sense of liberation or progress. The seepage of the scourge of Freudianism into the holiest American institution, the family, can cancel out all your great world promises. If I read the history of American mores correctly, nothing is more un-American than the sexual and chemical revolutions. If technological civilization is to blame, then the whole place of technology in human life must be radically reconsidered.

If Billy Graham is right in a statement he made a short while ago, that whereas the average rate of divorce in America as a whole is one in three marriages, in one conservative Christian religious community, which he named, it is one in 700,—and I believe he is right,—then the only hope for America and the world is a vigorous and sustained return to the living God.

And this is what old Jeremiah said to his people 2700 years ago:

"Thus saith the Lord, Stand ye in the ways, and see, and ask for the old paths, where is the good way, and walk therein, and ye shall find rest for your souls. But they said, We will not walk therein." (Jeremiah 6:16) May this last sentence never be uttered by the people of America.●

VETERANS' DISABILITY COMPENSATION, HOUSING, AND MEMORIAL BENEFITS AMENDMENTS OF 1981

● Mr. MURKOWSKI. Mr. President, as a member of the Veterans' Affairs Committee I am pleased to join with my colleagues on this committee in cosponsoring S. 917, the veterans' disability compensation, housing, and memorial benefits amendments of 1981. I commend Mr. SIMPSON, the distinguished chairman of our committee for his leadership in bringing this measure to the Senate floor in such a timely manner.

Mr. President, S. 917, as unanimously reported by the committee, is important to our Nation's veterans for several reasons. While I support the bill in full, I would like to highlight the provisions directly affecting the service-connected disabled veteran. This country has a commitment to all veterans to insure that their needs are properly met—ranked highest are those of the service-connected disabled veteran. S. 917 would authorize a 11.2-percent cost-of-living increase for the service-connected disability compensation program, currently providing benefits for 2,276,542 service-connected veterans. In addition, dependency and indemnity compensation benefits for surviving spouses and children of veterans whose deaths were serv-

ice connected or who were totally disabled due to a service-connected cause at the time of death, will increase 11.2 percent.

The service-connected disabled veteran not only has served his country but he has made an extreme sacrifice. Along with the cost-of-living increase, I also believe it is necessary to increase the maximum automobile allowance from $3,800 to $5,000 and extend eligibility for automobile adaptive equipment to those veterans who suffer from favorable ankylosis, the stiffening of one or both knee joints, or one or both hip joints, resulting from an abnormal bone fusion. The Veterans' Administration also offers a special adapted housing grant program for blind veterans or those who have lost, or lost the use of, one lower and upper extremity or both lower extremities, to aid them in acquiring housing with the necessary adaptations for their disability. S. 917 provides an increase in this grant from the present $30,000 to $35,000 to offset the rising average cost of a specially adapted home.

Mr. President, along with my colleagues on the Veterans' Affairs Committee, I consider the benefits offered our service-connected veterans to be of the utmost priority. I am pleased that during this period of economic recovery we are able to continue to meet the needs of the service-connected veteran. I am proud to be a cosponsor of this legislation and urge my colleagues approval of this important measure.●

THE YEAR OF THE DAUGHTER

Mr. ROBERT C. BYRD. Mr. President, in addition to the congratulations I have extended to the majority whip, the Senator from Alaska (Mr. STEVENS) and his wife on the birth of their daughter, Lily, I should like to take this occasion to say that Senators on this side of the aisle are not going to be outdone. So I take this opportunity to inform my colleagues that a Senator on this side of the aisle, the Senator from Massachusetts (Mr. TSONGAS) and his wife are also the proud parents of a daughter, Molly, born Sunday, July 19. Mother and daughter and father are doing well.

It appears that Senators are producing daughters this year. So if we might appropriately designate the year, I would say it is the year of the daughter.

In addition to those two born this month, the Senator from Delaware (Mr. BIDEN) and his wife also welcomed a daughter, Ashley, born just last month on June 8.

I know that all three of these Senators are extremely proud of the new additions to their families and all of us extend our good wishes to them.

Mr. BAKER. Mr. President, I join the distinguished minority leader in extending my congratulations to the Tsongases and to the Bidens for their additions to the Senate family. In such a real way, it is a Senate family, because we work in such tightly closed and bound circumstances and our wives are so involved with our daily activities and the inconvenience that is essential to the functioning of the Senate that the Senate is, perhaps, more of a family than almost any other public institution that I know of. So all of us take special pleasure at the new additions to that family. I also note that daughters have been in abundance this year. I have a special affection for daughters and I think that is fine.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of no further business that must be transacted this evening. With the concurrence of the minority leader, I move, in accordance with the order previously entered, that the Senate stand in recess until tomorrow morning at 9:15 a.m.

The motion was agreed to and, at 10:06 p.m., the Senate recessed until tomorrow, Friday, July 24, 1981, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate July 23, 1981:

DEPARTMENT OF JUSTICE

J. Paul McGrath, of New Jersey, to be an Assistant Attorney General, vice Alice Daniel, resigned.

DEPARTMENT OF THE TREASURY

Anthony H. Murray, Jr., of Pennsylvania, to be Superintendent of the Mint of the United States at Philadelphia, vice Shallie M. Bey, Jr.

NATIONAL TRANSPORTATION SAFETY BOARD

James Eugene Burnett, Jr., of Arkansas, to be a Member of the National Transportation Safety Board for the term expiring December 31, 1985, vice Elwood Thomas Driver, term expired.

James Eugene Burnett, Jr., of Arkansas, to be Chairman of the National Transportation Safety Board for a term of 2 years, vice James B. King, term expiring.

DEPARTMENT OF ENERGY

Rayburn D. Hanzlik, of California, to be Administrator of the Economic Regulatory Administration, vice Hazel Reid Rollins.

DEPARTMENT OF THE INTERIOR

Dallas Lynn Peck, of Virginia, to be Director of the Geological Survey, vice H. William Menard.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Juan A. del Real, of Maryland, to be General Counsel of the Department of Health and Human Services, vice Joan Zeldes Bernstein, resigned.

Thomas R. Donnelly, Jr., of Virginia, to be an Assistant Secretary of Health and Human Services, vice William Brownlee Welsh, resigned.

INTERNATIONAL JOINT COMMISSION, UNITED STATES AND CANADA

L. Keith Bulen, of Indiana, to be a Commissioner on the part of the United States on the International Joint Commission, United States and Canada, vice Jean Lande Hennessey, resigned.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Paul J. Manafort, Jr., of Virginia, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1983, vice Wallace F. Bennett, term expired.

DEPARTMENT OF STATE

The following-named Foreign Service Information officers for promotion from class One to the class of Career Minister for Information:

Terrence F. Catherman, of the District of Columbia.

McKinney H. Russell, Sr., of Florida.

NATIONAL LABOR RELATIONS BOARD

Robert P. Hunter, of Virginia, to be a Member of the National Labor Relations Board for the term of 5 years expiring August 27, 1985, vice John C. Truesdale.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

William M. Bell, of Michigan, to be a Member of the Equal Employment Opportunity Commission for the term expiring July 1, 1986, vice Eleanor Holmes Norton.

DEPARTMENT OF AGRICULTURE

Charles Wilson Shuman, of Illinois, to be Administrator of the Farmers Home Administration, vice Gordon Cavanaugh, resigned.

SMALL BUSINESS ADMINISTRATION

Frank S. Swain, of the District of Columbia, to be Chief Counsel for Advocacy, Small Business Administration, vice Milton David Stewart, resigned.

DEPARTMENT OF DEFENSE

Edward C. Aldridge, Jr., of Virginia, to be Under Secretary of the Air Force, vice Antonia Handler Chayes, resigned.

IN THE ARMY

The U.S. Army Reserve officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, sections 593 (a), 3371 and 3384.

To be major general

Brig. Gen. Wayne Paul Jackson, xxx-xx-x... xxx-...

Brig. Gen. Thomas Milton Moore, xxx-xx-x... xxx...

Brig. Gen. William Francis Ward, Jr., xxx... xxx-xx-...

To be brigadier general

Col. John Alex Arkins, xxx-xx-xxxx.

Col. John Joseph Diggins xxx-xx-xxxx.

The Army National Guard of the United States officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, section 593(a) and 3385:

To be major general

Brig. Gen. Vincent William Lanna, xxx-xx-x... xxx-...

Brig. Gen. Elmer Lewis Stephens, xxx-xx-x... xxx-...

To be brigadier general

Col. Carroll Glenn Allen, xxx-xx-xxxx.

Col. William James Burns xxx-xx-xxxx.

Col. Keith Marvin Eggen, xxx-xx-xxxx.

Col. LeRoy Robert Evans xxx-xx-xxxx.

Col. Joe Arlon Forberg xxx-xx-xxxx.

Col. Kenneth Wayne Himsel xxx-xx-xxxx.

Col. Robert George McClellan xxx-xx-xxxx.

Col. Kenneth Lester Rieth xxx-xx-xxxx.

Col. Ivan Fay Smith xxx-xx-xxxx.

Col. Michael Thomas Sullivan, Jr., xxx-xx-x... xxx-...

Col. Arthur Albert Weller, Jr. xxx-xx-xxxx.

Col. Edward Herman Wulgaert, xxx-xx-x... xxx-...

The Army National Guard of the United States officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3392:

To be brigadier general

Col. Charles Hill Anderson, xxx-xx-xxxx.

Col. Robert Michael Fiorella xxx-xx-xxxx.

Col. Edward Lawrence Hanson, xxx-xx-x... xxx-...

Col. William Arthur Jackson xxx-xx-xxxx.

Col. Val Elmore McCreary, xxx-xx-xxxx.

Col. Charles McClung Scott, Jr., xxx-xx-x... xxx-...

Col. William Kinney White, xxx-xx-xxxx.

ENVIRONMENT PROTECTION AGENCY

Matthew Norman Novick, of the District of Columbia, to be Inspector General, Environmental Protection Agency, vice Inez Smith Reid.

EXTENSIONS OF REMARKS

UNITED STATES-WESTERN EUROPEAN TRADE RELATIONS

HON. DONALD J. PEASE
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. PEASE. Mr. Speaker, I would like to bring to the attention of my colleagues remarks made earlier this year by Sir David Nicholson, a Member of the European Parliament—European Democratic Group—from the United Kingdom. Sir Nicholson made his presentation during the course of meetings between the European Parliament and the U.S. House of Representatives, held in Washington on May 19-20, 1981.

Sir Nicholson addresses the issue of transatlantic trading relationships and the continuing problems in such areas as steel, textiles, automobiles, and export subsidies. The parliamentary exchanges between our two institutions have been occurring since 1972 and have provided a welcome and necessary forum for improving mutual understanding of a variety of problems affecting the United States-Western European relations.

I had the privilege of serving as chairman of the U.S. delegation which meets with representatives of the European Parliament on four occasions during the past 2 years, including this most recent meeting in Washington. The experience was a stimulating and rewarding one. The Honorable TOM LANTOS of California has now assumed the chairmanship of this group. I am certain that he will perform brilliantly in that position, and I will help him in any way I can to insure the continuing success of this valuable parliamentary exchange.

Sir David Nicholson's remarks on trade follow:

Thank you very much Mr. Chairman. I am going to try to respond to the United States' question which, amongst several points, asks about the trend in Western Europe towards protectionism and such factors as the multifibres agreement and export financing. I really welcome what Mr. Sam Gibbons said at the beginning about the need for us to try to approach these problems, all of these problems together. I would personally like to think that the two greatest trading blocks in the world, in the free world, the United States and the European Community, could in fact find some way to work together as partners to regulate free, and not only free but fair trading throughout the world. This is what we all want and, as I suggested yesterday, I think the time may come, perhaps has come, for some declaration of intent in this way and it would be just wonderful, of course, if you could persuade the President to come and make that declaration in the European Parliament, that goes without saying.

Now, turning to the more detailed points which the question raises, the rate of unemployment in Western Europe is rising at a very considerable speed as Mr. Giummarra has mentioned: up from 5.7% in the March 1980 to 7.5% in March 1981. This has fallen particularly heavily on the traditional industries such as steel, shipbuilding and textiles.

In the case of the textiles, between 1973 and 1979, no less than 700,000 jobs were lost and 200,000 more are estimated to have been lost since then and the remaining 4,000,000 jobs are also in danger so this is a very very significant drop.

In steel between 1975 and 1980 161,000 jobs have been lost in the Community so I am sure you appreciate how serious we feel this is and how difficult it is to maintain an attitude of free trade against protectionism when you have this kind of thing going on.

Now we have not been able to replace these jobs in new industries which, because of their technological base, tend to be capital rather than labour intensive and it is very understandable that workers in these very vulnerable industries become alarmed when they see their problems being exacerbated by an increasing flow of imports from the United States and elsewhere. Accordingly the political pressure on us as their political representatives builds up to a point where it is becoming almost irresistable. If the United States wishes, as I am sure she does, to preserve the open trading system, they must help us by giving us some tangible arguments for resisting the protectionists. At the moment we have a deficit in 1980. The deficit was 25 billion dollars, which was double the 1979 figure and we have very little ground on which to defend the free trade cause.

So I would like now, if I may, just to touch briefly on two or three specific areas. Firstly steel. By suspending and then raising the level of the trigger-price mechanism, the United States has substantially reduced imports of European steel at a time when we have real manifest crisis in the industry. They are now threatening further curbs on imports through an anti-dumping action in respect of fine and special steels brought by the Department of Commerce and I would like just to quote these figures about the export of steel from the Community to the United States. In 1978 7.4m tons were exported to the United States; in 1979 that figure had dropped to 5.4m and in 1980 to 3.9m tons.

My second example, if I may, is in clothing. Now here the United States refused to reduce their tariffs during the Tokyo round so as to bring them close to parity with those of the Community and the Community standard tariff is 7 percent while the United States' average is 33 percent.

Well now coming on thirdly to textiles, here we have a combination of a weaker dollar and artificial pricing of natural gas which is a principal feedstock, as you all know, for artificial fibres, which has enabled the United States' industry to compete cost effectively in the European Community in general and in the United Kingdom in particular. Textile imports in January to September 1980 were 122 percent up on the equivalent period in 1978 and in the first six months of 1980 alone 62,000 jobs were lost in the United Kingdom and over 100 mills were closed and the pace has not slackened since. Against this background you must see that it is easy to see why the industry has become protectionist.

Well, now we come on to cars. The rate of penetration of Japanese cars has risen startlingly, particularly in the Benelux countries, which have traditionally taken German, French and Italian production. In Britian penetration hovers around 11% which is, nevertheless, too high. The United States has now done a bi-lateral deal with the Japanese and inevitably there are worries that the surplus Japanese capacity will be aimed at the vulnerable European markets and any arrangement with Japan, in our opinion, should be tri-lateral. Now, in this respect, my group has put down a motion, I might as well warn you right now that my group has put down a motion in the European Parliament which I will read out:

1. That it considers the recent Japanese-American understanding could pose a threat to Community manufacturers of motor vehicles;

2. Believes that regulation of the trade in motor vehicles must be conducted on a multi-lateral basis;

3. Urges the Commission to seek immediate clarification of the nature of the Japanese-American understanding and report to Parliament.

Well, as regards the control of export finance, which was referred to in the question, a joint agreement would be welcome. Of course much depends on the movement of currency parities and domestic industry rate and we think the Ottawa conference would be an ideal time to discuss this, as also the whole concept of moving forward from where we got to with the multi-national trade negotiations, to develop a wider, broader system as partners for the regulation of free and fair trade which I referred to.

The most important thing I would like to try to get home to Members of the Congress is that there will have to be some agreement at Ottawa on the limitation of deficits between the European Community, Japan and the United States. We cannot go on financing the Japanese oil deficit indefinitely. They will no doubt point out that they do well because they are efficient and competitive. Well so be it, but we can point out that they feel no difficulty in protecting their automobile, steel and textile industries, and indeed the open trade system cannot survive if one player insists on picking up all the chips and beggaring the other. The best way of combating protectionism in Europe is for them to liberalize their market unilaterally in those industries which are most heavily protected and that way we can see some overall growth. Otherwise the whole GATT system will be in jeopardy for the excellent reason that it will have shown itself inadequate, inadequate to even out trade flows.

Now so far as the multifibre agreement is concerned, I would like to quote from my colleague Mr. Michael Welsh's opening ad-

dress in the European Parliament when the resolutions for re-negotiation of the multifibre agreement was passed by the Parliament. In this opening address, if I may quote, he says that the most important thing that we have to do, and I say this very seriously to the Commission, is to improve our understanding with the United States. You will find a passage in this resolution which refers to the under-pricing of oil and gas and to the extreme surges of American textile imports into the Community. He says "I do not propose to deal with this today because I do not regard it as part of the multifibre agreement itself. That is a bilateral question to be solved by the Community and the United States. What I do say however, is that it is absolutely critical that the United States be induced in these negotiations to take an increased share of low cost imports, thus easing the pressure on Community markets, and I would say that the liberalization measures that we propose later on are entirely contingent on the ability of the United States, and indeed other OECD countries, to take a fairer share of the burden. It is absolutely essential that the United States' Administration pushes ahead with a bill to de-regulate gas and that Congress passes it. This is really, if I may put it this way, a touchstone of their good intentions."

Well ladies and gentlemen, I have mentioned the significance of the Ottawa Conference and I am sure you have heard long enough from me now. I cannot emphasize too strongly how important it is for the Community and the United States to try to get together on some of these issues and try to develop a partnership approach to the regulation of free and fair trade. Thank you Mr. Chairman.

THE WAYNE/WESTLAND, MICH., POST OFFICE: AN EXAMPLE FOR THE ENTIRE NATION

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. FORD of Michigan. Mr. Speaker, many people believe that the U.S. Postal Service is an archaic and inefficient institution whose service declines in proportion to increases in its rates. The average American probably believes that postal productivity has been falling steadily for years and that its future is hopeless.

In fact, just the opposite is true. In 1980, when the productivity of American industry, as a whole, declined dangerously—by nearly 3½ percent—the Postal Service did such an outstanding job of improving its operations that productivity increased by 5.5 percent. Although postal rates increased by 20 percent over the most recent 3-year period, this price increase was well below the national rate of inflation.

The U.S. Postal Service is the most efficient, most productive postal system in the world. It moves more mail, at a lower price, to more people than the systems of any of our industrial rivals, including Japan, Germany, and France. Every American has reason to feel proud of this great public corporation and the men and women who make it work.

I am particularly proud of the contribution to the Postal Service's surge of productivity made by the postmasters and postal workers in my own congressional district of Michigan. As one example, let me cite the achievements of Postmaster Bill Stottlemyer and the clerks and letter carriers of the Wayne/Westland Post Office.

Under Postmaster Stottlemyer's leadership, letter carrier productivity has increased by more that 35 percent since 1968. The average carrier now makes each delivery in 0.927 minute, compared to 1.467 minutes 13 years ago. The Wayne/Westland Post Office thus saves 104,656 hours per year, which translates into $1,296,587 yearly. Postmaster Stottlemyer's carriers now make 10,272 more deliveries each day, with 96 fewer carriers than in 1968.

The Wayne/Westland office has reduced its vehicle usage substantially, despite the addition of 10,000 delivery points, and thus saves nearly a half million dollars a year. Through the introduction of improved letter-sorting machinery, mailer presort programs, and greater effort by postal clerks, the Wayne/Westland office has reduced its work force and saved $2½ million a year—savings which translate directly into lower rates for the mailing public. Postmaster Stottlemyer calculates that his office's increased productivity, when related to the population of Wayne/Westland, yields savings equal to $37.89 per person, or 210 first-class stamps per family member.

Mr. Speaker, I hope my colleagues will join me in applauding the efforts of Postmaster Stottlemyer and the Wayne/Westland postal workers to provide better and cheaper postal service to their community. Their efforts, which have been duplicated by hundreds and thousands of postal employees throughout the Nation, should serve as a model for other public employees and for the private sector as well.●

THE 100TH ANNIVERSARY OF WEINSTEIN'S PHARMACY

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. FISH. Mr. Speaker, last month, on June 27, Weinstein's Pharmacy of Katonah, N.Y., celebrated its 100th anniversary. This small business should be a model for the rest of the country—demonstrating the ability of the American entrepreneur to endure all the economic hardships of the past century, including recent high-interest rates and the Depression. In good times and bad, Weinstein's Pharmacy has provided invaluable services to the the local community.

First founded in the small hamlet of Whitlockville in 1881, the pharmacy moved to the town of Katonah after New York City flooded Whitlockville to expand its water supply. The original building was replaced early in this century. The Weinstein family has run the pharmacy since the early 1930's. The owner, Lionel Weinstein, is now 75 and in semiretirement. His devotion to his business is second to none, and I am sure Mr. Weinstein's semiretirement will last for some time.

I have visited the Weinstein Pharmacy and have consistently found the owners and employees to be courteous and friendly. The Katonah and northern Westchester community are fortunate to have access to the services of Weinstein's Pharmacy. I wish the pharmacy continued success for another 100 years.●

AWARD OF A SECOND AIR FORCE OUTSTANDING UNIT AWARD TO THE 146TH TACTICAL AIRLIFT WING

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Ms. FIEDLER. Mr. Speaker, in a time when the readiness of our Armed Forces is increasingly a matter for concern, I am pleased to report that the 146th Tactical Airlift Wing of the California Air National Guard, based at Van Nuys Airport in the San Fernando Valley of California, has just received its second Air Force Outstanding Unit Award. This unit, though outstanding, is typical of the Reserve and National Guard units that stand ready throughout our Nation. I think that for this reason, my address to this unit on the presentation of the award last weekend should be of widespread interest.

Mr. Speaker, the award of a second Air Force Outstanding Unit Award to the 146th Tactical Airlift Wing is a truly outstanding event. The Air Force has shown its recognition of "The Hollywood Guard" as one of the best units in its order of battle. I would like to add my own appreciation and, on behalf of my fellow residents of the San Fernando Valley, to join in the recognition of our friends and neighbors who serve in the 146th.

Field Marshal Viscount Slim of Burma, the famous British leader of the Second World War, said that a reservist is twice a citizen. I think the 146th is the best proof one can find of this. Not only do the vast majority of its members hold full-time civilian

jobs in our community, but they are fully ready both for their peacetime and wartime missions. They serve the community they live in through their commitment to the traditional National Guard role of disaster prevention, of helping in times of peril, of saving lives and property. They serve the Nation through their wartime mission, able to take their C-130's into unprepared airstrips anywhere in the world with troops, equipment, and supplies. Tactical airlift has often been the difference between victory and defeat in modern warfare, and history gives us many examples of its importance. Today, as the rapid deployment force becomes increasingly important in our national security planning, our vital tactical airlift assets have become even more vital. I am pleased that the 146th is performing this important mission so well.

I am sorry I cannot be here myself today, but the pressures of Congress are keeping me in Washington this weekend. I am pleased to report that more and more of my colleagues in Congress are joining with me in my appreciation of the fine work done not only by the 146th, but by Air Force Reserve and National Guard units throughout the country. This week, we have had under consideration the fiscal year 1982 Defense Authorization Act. I strongly support the provisions of this act procuring 12 brandnew C-130H Hercules transports especially for our Reserve airlift wings. More and more aircraft will be coming to the Reserves directly from the production line. I support and applaud these actions. We owe you the finest possible tools for your demanding tasks.

I remember fondly my visit with you here at Van Nuys last April, but, as a San Fernando Valley resident, I enjoy looking skyward at the sound of engines and seeing a Hercules going about its business as part of the valley's very own Air Force. So, to the men and women of the 146th Tactical Airlift Wing—keep them flying, folks. We are proud of you.●

AIR ISN'T FREE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. ASHBROOK. Mr. Speaker, the July 14 edition of the Wall Street Journal carried a reasoned, balanced editorial concerning the Clean Air Act and the improvements which must be made by the Congress when it considers revisions in the near future.

In the 1960's, few would have disputed the claim that the United States was suffering from an increasingly serious environmental problem, caused, in part, by increased pollution of the atmosphere. In 1970, Congress, in an attempt to rectify the problem, enacted the Clean Air Act.

Times have changed since 1970. The quality of our air has improved. Yet, in the years since 1977, when the Clean Air Act amendments were adopted, the costs associated with the implementation of the act have risen significantly and improvements in air quality have been only marginal. The Journal editorial makes a good case for Congress taking a long, hard look at the act when it comes before us for revision.

It is important to enact balanced legislation. We must allow local authorities to take into consideration local concerns. We must block the Environmental Protection Agency from recklessly regulating even though a direct loss of jobs can be attributed to its actions. We must take away from the EPA the carte blanche ticket which allows Federal bureaucrats to force standards on the States which make compliance impossible. And we must limit the authority of the EPA to issue regulations which do not take into account social, economic and environmental considerations.

I would recommend the Wall Street Journal editorial to my colleagues.

[From the Wall Street Journal, July 14, 1981]

AIR ISN'T FREE

The administration's proposed revisions of the Clean Air Act, which are expected to be sent to Congress this week, aim at reducing cumbersome bureaucracy and cutting costs to business and consumers. While many of the recommendations would make needed improvements in this 11-year-old legislation, the administration may not be going far enough to temper the act with a strong dose of economic realism. In particular, the White House is shying away from its self-avowed tenet of weighing costs against benefits of federal regulations.

President Reagan issued an Executive Order on Feb. 17 that requires agencies to evaluate the potential benefits and costs of their major regulatory proposals. Such analysis can have a healthy effect on the economy by stripping away unnecessary or overly costly regulations, but even the Reagan administration is not unfettered in its ability to introduce regulatory relief, as a recent U.S. Supreme Court decision made absolutely clear.

In a case about workers' exposure to toxic substances, the court ruled that the government cannot use cost-benefit analysis in setting occupational safety and health regulations because no such provisions were set in the original legislation. Rather, it said, the law states that safety and health risks must be reduced to the extent "feasible," i.e., without regard to how large the cost or how small the benefits. The court's decision highlights the danger of using vague legislative language to skirt around hard economic and health decisions.

When Congress passed the Clean Air Act in 1970, it similarly failed to address squarely the inherent economic and health choices. For instance, the act contains no provision explaining what the economy can afford to spend to improve the quality of the air. Instead, it says that national air quality standards must provide an "adequate margin of safety" against "significant adverse health effects." Given such vague language, it is not surprising that the courts have consistently ruled that costs cannot be taken into account in setting air quality standards.

Scientific research of the past 10 years or more has also shown that the health goals of the act are unattainable. The smallest amount of air pollution will always adversely affect small segments of the population, such as those people who suffer from, say, allergies or emphysema. Even if every man-made source of air pollution were closed tomorrow, natural sources of pollution such as decaying forests and swamps would continue to harm the health of some people.

The administration's working group on the Clean Air Act drew up three options to redress the problem of setting air quality standards: to leave the current wording intact; to eliminate the "margin of safety" language and to consider the "degree of significant risk of adverse health effect"; or to allow costs to be considered in providing protection against "unreasonable risk." The administration has apparently decided to abandon the cost-benefit approach and to opt for the middle course.

The Reagan administration may consider it sufficient to replace the current loosely worded air quality goals with a policy of risk assessment—implying that some degree of health risk is considered acceptable—without specifically requiring an analysis of benefits and costs. But that strikes us as unnecessarily conciliatory in political terms toward the environmental lobby and like-minded leaders on Capitol Hill. It is a gesture that is unlikely to win the administration much praise from either side in this year's debate.

Improvement in air quality remains a worthwhile goal. But what is less widely recognized—particularly along the corridors of the Environmental Protection Agency—is that clean air carries heavy costs and it is economically important to ask how clean is clean enough. The Council on Environmental Quality estimates that air pollution control cost the U.S. $25 billion in 1979 and the cost could exceed $40 billion by the mid-1980's. Moreover, expenditures on pollution control equipment also represent lost opportunities to invest in productive ventures which could materially improve our standard of living with input of new goods and services.

In revising the Clean Air Act, Congress should seek to facilitate the least costly way of maintaining or improving air quality. For instance, the requirement that new plants install the "best available control technology"—often meaning the most costly—should be scrapped in favor of a flexible and innovative approach. And in promulgating new air quality standards, the government should be required to weigh the benefits against the costs. There is no such thing as free clean air.●

TRIBUTE TO DONALD L. JACKSON

HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 16, 1981

● Mr. DICKINSON. Mr. Speaker, I did not have the privilege of serving with the late Don Jackson when I came to the House in the 89th Congress. He had already retired from this body before I arrived. However, I came to know, love, and respect him as a member of Chowder and Marching, an organization of Republican members, present and former.

Don was a man of great accomplishment, intelligence, patriotism, and humor. He was a man of ideas and principle—a fellow who you could not help but like the first time you met him. Although we did not serve together in the House concurrently, he was one of those solid and knowledgeable former Members who a newcomer would want to seek out for advice and counsel. He possessed that rare balance of energy, interest, commonsense, wisdom, humor and a down-to-earth understanding of life that always made him one of those rare men worth seeking out and listening to.

As one who gets a lift from good humor, I always will remember Don as a humorist par excellence. He enjoyed good humor and understood its mind and spirit renewing capacities. It was always fun to be in a group when Don was along.

In Don's passing, the Nation has lost a great lawmaker and statesman; the U.S. Marine Corps has lost a brave and courageous leatherneck; and I have lost a helpful mentor and friend.●

TAX-DEFERRED RETIREMENT PLANS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. ROTH. Mr. Speaker, a few years ago Americans could purchase an annuity payable during their sunset years at tax rates substantially lower than they would be when purchased. Not too different from many pension ideas, Keogh plans or individual retirement accounts, these tax-deferred annuities became quite popular, especially as confidence in the social security system began to slide downward. These plans became a hedge against the financial stability of that system.

Sadly, tax-deferred annuities have had their day. The IRS pulled the rug out from under the institutions making these annuities available. IRS withdrew its deferral and published other rulings having the opposite effect. Today, tax-deferred annuities of this kind have gone out of existence.

The Ways and Means Committee has again rejected changes in the tax law to breathe new life into the tax deferral of these plans. But, this administrative nightmare demands legislative remedy. Increasing support to this form of retirement savings by Members of Congress sustains supporters of this proposal to continued efforts to abolish the discriminatory policies of IRS, which have constituted a usurpation of the powers of Congress.

Revenue Ruling 80-274, which ended deferral of taxes on these plans, is a usurpation of the legislative power of Congress. In order to provide an honorable and dignified retirement, the Internal Revenue Code provides an annuity holder with tax deferral of earnings accumulated on the premiums paid for deferred annuities. The prior administration was unable to persuade Congress to amend the code to curtail this deferral. Nevertheless, that administration undertook to achieve the same objective by administrative fiat. To this end, the IRS issued the ruling about which I am upset.

Not only does Revenue Ruling 80-274 usurp the legislative power and authority of Congress, but it is also discriminatory in its intent and effect. The burden of this arbitrary and capricious ruling falls uniquely on four small life insurance companies and the local savings industry of this Nation, and those annuitants depending on the plans to provide for their retirements.

Revenue Ruling 80-274 has sounded the death knell for an annuity which encourages savings by middle America. People today are simply concerned about retirement and providing for their older years. Understandably, they are not convinced that social security will offer them adequate retirement benefits. In an effort to provide for their own self-sufficiency in retirement, they have looked to an annuity such as these for an assured income they cannot outlive.

This annuity is funded with certificates of deposit of banks and savings and loan associations in the locale of the annuitant. It provides these institutions with stable deposits, thereby creating a pool for local mortgage money. The benefits redound to the prospective homeowner, the local construction industry and its suppliers and workers, as well as those of ancillary industries. The importance of these savings institutions as a source of mortgage money is evidenced by the fact that in 1978, savings and loan associations held approximately 47 percent of the outstanding residential mortgage loans and commercial and savings banks held only 31 percent.

The experience of First Savings of Wisconsin, the State's largest savings and loan association, testifies to the importance of these annuity plans continued tax deferral. First Savings has a group annuity contract with an insurance company for a single payment deferred annuity that fell victim to Revenue Ruling 80-274.

In 1979, premiums paid by enrollees under this contract provided approximately one-third of First Savings net increase in savings after accounting for interest credited. In 1980, in spite of new annuity enrollments with premiums in excess of $16 million, First Savings suffered a net savings decrease. Both in 1979 and 1980, approximately 75 percent of these premiums represented new money to First Savings. Cancellations were minimal.

First Savings found that, on average, the enrollee is 54 years old, has a family income from all sources of approximately $26,300 and has paid an annuity premium of $9,943. Without the backbone of such middle-income savers, the thrift institutions cannot continue to support local home mortgages, all-savers certificates or not. Under these circumstances, it was not surprising that the then Chairman of the Federal Home Loan Bank Board, Jay Janis, urged the revocation of Revenue Ruling 80-274 upon its promulgation.

Revenue Ruling 80-274 is also discriminatory. It denies annuity tax treatment to our savings funded annuity. On the other hand, Internal Revenue Service has not made such actions against other forms of similar devices, such as money market funds—which are also widely popular—mutual funds; and should not. The Treasury Department announced that its attack of these other savings plans was going to be put off until after the 1980 election. Today, only these annuity plans remain offlimits to taxpayers.

The precipitous reversal of policy announced in Revenue Ruling 80-274 was not made because of any change in the law or regulations or court actions. It came about because this type of annuity was becoming popular. Incentives to saving should not receive such cavalier treatment. The Ways and Means Committee action this week should embrace these annuity plans and take action to end Revenue Ruling 80-274.

I introduced legislation again this year to supply total relief to this important investment device for retirement incomes. My bill, H.R. 567, squelches IRS policies announced in all revenue rulings pertaining to these annuity plans. I strongly urge my colleagues to support changes in the tax law to wipe Revenue Ruling 80-274 off the books. Prompt action by this House, putting all annuity plans and savings programs on the same footing

is the least Congress owes to those citizens planning to retire on income from these programs.●

THE SEVENTH ANNIVERSARY OF THE INVASION OF CYPRUS

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ROSENTHAL. Mr. Speaker, I rise with great sadness to mark the seventh anniversary of the Turkish invasion of Cyprus. The invasion was unjustified, and has created more misery than it could have ever aspired to alleviate.

The dead on both sides, the hundreds of thousands left homeless, and the profound decline in health care and education, all are memorials to the folly of the invasion.

There have been profound changes in Turkey since 1974, and I voice the hope that the new Turkish leadership, which is clearly committed to the prosperity and renewal of their country, will bear faith to the humanitarian vision of Ataturk and decide to withdraw their armed forces and enter into a serious negotiation to settle the issues in dispute.

The United States ought to enjoy the friendship of all three interested parties to the Cyprus invasion. There is a community of interests which supports the alliance of Greece, Turkey, Cyprus, and the United States. The immediate end to the Turkish invasion of Cyprus would allow these four democracies to draw closer together and work to insure the prosperity and peace of the Eastern Mediterranean.●

POSTAL WORKER SALUTED

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. SOLOMON. Mr. Speaker, we hear a lot these days about apathy, about people failing to help out their neighbors when they are in trouble. I am really not so sure that is entirely true. I think Americans still show the spirit of cooperation and selflessness that made this country strong.

In fact, Mr. Speaker, I have an example right here to prove that very point. Francis Girard, a letter carrier in Glens Falls, N.Y., has been honored by the Glens Falls Post Office for his quick thinking in an emergency situation that prevented a house fire and possibly saved a life.

Last summer Girard was carrying out his duties when he spotted a fire in a house on his mail route. He flagged down a policeman who fought the blaze with a fire extinguisher until the fire department arrived. Thanks to Girard's quick actions the damage was limited to a couch and part of a wall.

Glens Falls Postmaster John Collins recently presented Girard with a $100 check to reward that quick thinking. The post office also released a statement which I would like to put into the RECORD:

The Postal Service and the people of Glens Falls should be proud of Mr. Girard's eagerness to get involved and do his civic duty which many of our citizens today hesitate to do.

I would like to add my congratulations and the congratulations of the entire House of Representatives.

POSTAL WORKERS SALUTED

The Glens Falls Post Office has honored carrier Francis B. Girard, 59, for his quick thinking in an emergency situation.

Girard is credited with preventing a house fire and possibly saving a life last summer.

Girard, of 10 Hoyt Ave., Glens Falls, while performing his normal carrier duties, spotted a fire in the Marilyn LaPier residence at 203 Bay St., Glens Falls. He flagged down a policeman and the policeman fought the blaze with an extinguisher from his patrol car while the fire department was called. The fire occurred on July 23. Damage was restricted to a couch and the wall of the home near the couch.

Postmaster John J. Collins presented Girard with a $100 check for his quick thinking in an emergency situation.

"The Postal Service and the people of Glens Falls should be proud of Mr. Girard's eagerness to get involved and do his civic duty which many of our citizens today hesitate to do," the Post Office said in an announcement.

In other honors conferred Wednesday, $50 awards for being safety captains were given to carrier Louis Distasio; clerk William Kenny; data collection officer James Park and clerk Gerald Jones. In 1980, officials said, the Glens Falls Post Office had one of its best safety years, ranking second in the entire Northeast.

A $100 award was given to George Kumas, a maintenance employee, for a suggestion for an improved locking procedure.

Clerk Phillip Rosser was presented a special achievement award of $100 for his "consistent, above-average productivity, his mail processing know-how and his ability to get along with others."

Clerk Thomas Clum was presented a $25 award for a proposed modification to a letter-sorting case.

Clerk Ronald Bello was presented a $25 award for his proposed design of a local revenue protection form.●

ASIANS FEEL THE PERILS OF RACISM

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. DIXON. Mr. Speaker, recently in Los Angeles a group of Asian Americans formed an organization known as the Asian Pacific American Round Table (A-PART), which responds to the alarming and increasing incidents of slander against the Asian American community.

Since the 1960's, the Asian American population has been portrayed as a "successful" minority group. This stereotype of success was advanced both in popular press and academic journals. However, individual cases of success should not imply that the diverse peoples who make up the Asian American communities are uniformly successful.

Moreover, despite relatively high education attainment, Asian Americans earn far less than majority Americans with comparable education and are often victims to discriminatory employment practices.

I commend the actions of the Asian Pacific American Round Table, its Chairman Fred Fujioka, and offer a recent article published in the Los Angeles Times as background for my colleagues on the important challenge which this organization will undertake.

[From the Los Angeles Times, July 17, 1981]

ASIANS FEEL THE PERILS OF RACISM—NEW ORGANIZATION FORMED TO COMBAT IT

(By Patrick Lee)

The signs are there, says Fred Fujioka: Anti-Chinese vandalism, rumors of Ku Klux Klan attacks, Oriental ancestry as an issue in recent political campaigns, advertising blaming Japan for American's economic woes.

All represent growing antagonism to Los Angeles' growing Asian population, says the 30-year-old attorney, head of a newly formed group created to combat anti-Asian racism.

"There is a feeling that racism expressed against Asians is somehow more acceptable than that directed at blacks or Jews," says Fujioka. He is interim chairman of the Asian-Pacific America Round Table (A-PART), a loose coalition of Asian community leaders modeled after the Jewish Anti-Defamation League.

At a recent press conference announcing the group's formation, Fujioka said that the bipartisan, multiethnic group will publicly denounce attempts to "slander the Asian-American community," particularly "symptoms of bigotry that Americans fail to see."

"The problem with racism against Asians is that it's not blatant anymore, as it was just after Pearl Harbor," Fujioka says. "Now, it can be as subtle as a joke at which everybody laughs, including ourselves. And we shouldn't. It will creep up on us until we're not laughing anymore."

On the surface, Los Angeles' Asian-American community seems to be doing well. A Times story last year quoted city estimates that the median family income of Asians was $15,256, only $2,500 less than that of whites. Further, city figures showed that Asians and Pacific Islanders had the lowest unemployment rate of any L.A. ethnic group, despite the recent influx of Southeast Asian refugees. Asians now make up some 5.5% of the county's population and their numbers are growing.

But Fujioka says that racist threats are real and cautions the Asian community not to grow complacent.

The white population views the Asian community as a monolith, Fujioka maintains, and incidences of racism directed at any one group reflect on all groups. Moreover, he says, despite good economic position, Asians are vulnerable. "The parallel with the Jewish community is obvious," he says. "The Jewish people learned that no matter how well you are doing in society, when the going gets rough, you can become a scapegoat.

"To the extent we are doing well now, we can't forget that a generation ago we were the scapegoats of an entire nation," adds the third-generation Japanese-American, whose family suffered internment in California relocation camps during World War II.

Fujioka points to recent business advertising to illustrate rising anti-Asian feeling. A seemingly innocuous ad in Fortune magazine depicts a scowling Sumo wrestler facing a blond man in red-white-and-blue tights. The copy reads, "Japan is challenging the U.S. for a big new market in computer memory superchips."

BIG BLACK GUY

The racism is subtle, Fujioka asserts. "If the ad had depicted a big burly black guy facing Capt. America, that would have been racism."

A more blatant automobile ad quotes a National Enquirer story headlined, "Japanese Cars Killing Thousands of Americans." The ad continues: "We whipped the Japanese in World War II—but now they're getting even by shipping us millions of dangerous cars."

"Such advertising worries me because feelings directed against Japan parallel feelings in this country against Japanese-Americans," he says.

Examples of more outright hostility to Asian communities can be found in the news, Fujioka notes. He mentions the recent turf war in Texas between white shrimpers and Vietnamese refugees, in which a white man was killed. Locally, A-PART is concerned about vandalism against Chinese-language theaters last year in the West San Gabriel Valley. A-PART alleges that the Klu Klux Klan is involved, although Fujioka admits that his group has not substantiated the klan rumors circulating around Monterey Park, Alhambra and Montebello. These cities all have large Chinese- and Japanese-American populations.

The Monterey Park Progress/Post-Advocate received an unsigned letter in December from a self-styled klan group in Alhambra warning the paper to cease publication of its Chinese-language edition. The paper responded with editorials and stories critical of racist activities. In March, the paper's offices burned to the ground. Until police determined that teen-agers started the blaze accidentally, authorities feared klan involvement. Since then, except for isolated incidents of anti-Chinese and anti-Semitic vandalism, the police say they have no evidence of organized klan or neo-Nazi activity.

But Fujioka says the klan rumors indicate an awareness that organized racist attacks could happen. "If (klan activity) is not widespread, we should let our people know. If it is true, then we want to deal with it. In any case, we want to look into the rumors, if only to dispel them."

Racism has also encroached into the political arena, A-PART charges. The group's press conference was timed to coincide with City Council inaugurations, including that of Councilwoman Peggy Stevenson. Fujioka asserts that racism accounted for Councilwoman Stevenson's landslide victory over challenger Mike Woo, who is of Chinese descent, in the 13th-District campaign this year.

Councilwoman Stevenson's campaign materials referred to Woo's father as "a wealthy Chinatown banker" and to Woo himself as an "outsider." Woo and his backers charged Stevenson with using innuendo to inject the issue of race into the campaign. Stevenson denied any racist intentions. After the election, news analyses attributed Woo's defeat to his association with Tom Hayden and Jane Fonda and to perceptions of Woo as a "carpetbagger."

A-PART charges that Woo lost because his race was made a campaign issue. "The term 'outsider' was a code word for 'Chinaman,'" Fujioka says. He notes that Stevenson's campaign literature used the term "outsider" on one page while speaking of Woo's Chinatown connections on the next. In addition, Fujioka says, Stevenson included full photographs of Woo in her own brochures.

RACISM THAT WORKED

The campaign rankles Fujioka because, he says, it was an example of racism that worked. Woo's loss was one of the main reasons A-PART was formed. In future elections, Fujioka explains, the group, consisting of equal numbers of Republicans and Democrats, will act as a nonpartisan watchdog to respond when race becomes an issue. (Though he says he had no part in A-PART's inception, Woo has attended the group's organizational meetings. "I have a special interest in the group since race was an issue in my campaign," he explains.)

Fujioka says that A-PART is still defining the issues it will address and has not yet formulated a plan of action. The group has no formal charter, no office, no budget. It has a floating membership of some 70 persons, one-third of whom are Asian women. But Fujioka notes that the membership represents several prominent Asian-American civic organizations as well as the four largest Asian-American ethnic groups: Japanese, Chinese, Korean and Filipino.

The group's immediate goal is to "get the word out," to increase its membership, Fujioka says. The group has value plans for a recruitment drive and fund-raiser in the fall. At the group's last three meetings (held in Chinatown restaurants; the next is Aug. 20), the various ethnic groups have hammered out their differences, many resulting from historical and cultural animosities. "We don't love each other," Fujioka admits, "but we will come to respect each other." A coalition like this is a position of strength.

"But whatever our differences, we are agreed on one thing: Racism against any one Asian ethnic group is bad for all Asians," Fujioka says.

"As far as we have come, we are not fully integrated into society. It's no longer a question of getting our foot in the door. Now we want to kick it open."●

THE ARGENTINE GULAG

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an article which recently appeared in the New York Times by Hector Timerman and Tom Bernstein concerning the existence of concentration camps in Argentina. Hector Timerman is a son of Jacabo Timerman, a former political prisoner in Argentina and author of "Prisoner Without a Name, Cell Without a Number." Mr. Bernstein is a member of the Lawyers Committee for International Human Rights.

These two men detail some of the evidence contained in a comprehensive report, "Testimony on Secret Detention Camps in Argentina" which was issued last year by Amnesty International. The report shows how and why Argentine concentration camps are able to operate, and addresses the disappearances of over 20,000 people in Argentina.

It is becoming increasingly clear that the Argentine Government is one of the world's worst offenders of human rights. Despite the overwhelming evidence of the vicious, Nazi-like nature of that regime, the Reagan administration continues to seek to legitimize Argentine terror by maintaining cordial relations and selling arms to Gen. Roberto Viola. It is time for us to stop endorsing these terrible crimes against humanity.

I commend this important article to the attention of my colleagues.●

H.R. 1918—THE NEED FOR A PENSION AUTHORIZATION FOR OUR FIRST WORLD WAR VETERANS

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Ms. FIEDLER. Mr. Speaker, on July 21, it was my privilege to place the following testimony in support of H.R. 1918 before the Pension Subcommittee of the Veterans' Affairs Committee. I would like to reproduce this testimony here because I believe that it helps underline the importance of this bill to our First World War veterans and their families:

Mr. Chairman, I am pleased to be able to offer testimony on behalf of H.R. 1918, of which bill I have the privilege to be a cosponsor.

The authorization of a pension for our First World War veterans has one very strong argument for it—that of simple fairness. In all our Nation's armed conflicts before then, Congress made pensions available to each and every veteran and widow. Veterans of World War II and more recent conflicts have had the benefit of the GI bill and a battery of programs, all well deserved. The veterans of the First World War—the veterans of the Argonne, Siberia, or countless stateside camps—fell between the two different types of benefits. Even today, 60 percent of all surviving First World War veterans receive nothing from the Veterans' Administration. When our First World War

veterans see their Canadian comrades-in-arms of 1918 still receiving a general pension from a still-grateful nation, it would be hard for them not to feel at least a little overlooked.

I think that authorizing a pension, as proposed by H.R. 1918, would have a value to our First World War veterans and their families far above that of any payment they might receive. All people of courage and spirit deserve respect and recognition. If we had it in our power, the Congress should make every First World War veteran a living national monument, to be preserved for future generations with their memories and lessons there to guide us. But as that, alas, is not within our power, we must then show our appreciation of our First World War veterans here and now, which is why I believe it important for this Congress to pass H.R. 1918. We we are willing to learn, the generation of the First World War has much to teach us—what life was like before the war in years when, George Orwell wrote, it seemed like summer all year round; of what modern war is really like, in the gas- and flame-filled forests of the Argonne or the sodden heaped-up weariness of the North Atlantic in midwinter; or of a homecoming that was as often as turbulent and bewildering as it was for our Vietnam veterans, who are now realizing that they have more in common with their grandfathers than they might have thought. I think that all this deserves the recognition H.R. 1918 would award.

Justice is an imperative, and I believe that justice requires that our First World War veterans receive the general pension that should have been theirs many years ago. Since 1918, these people have seen turbulent and troubled times. They have seen yet another great and terrible war, and many smaller yet just as terrible wars, for we have learned from the First World War that all modern war is terrible. They have seen depression and recession, boom and bust. They have seen the world change out of all recognition from that which they marched away from in 1917 and 1918. I cannot say that all the changes have been for the best. With all of this, it would be a good and proper thing to allow them to point at one thing that has endured the years, and that is the thanks and gratitude of the American people for duties done, for courage past.●

AMERICAN PRODUCTIVITY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. HUBBARD. Mr. Speaker, one of the major challenges of the 1980's in American industry, business, and government, is to improve productivity through new approaches and techniques. Mr. Arnold Ligon, a longtime friend of mine and a businessman in Madisonville, Ky., a city that I represent in Congress, has some definite ideas about American productivity which I would like to share with my colleagues. The letter follows:

DEAR CARROLL: There has been much discussion lately on productivity. I have some definite ideas on this subject I would like to pass on to you. Just three days ago I was discussing my feelings on this subject and commented that productivity was at 50 percent. The responsible person I was talking with responded by saying I was wrong; he felt it was more like 25 percent. Therefore, I definitely think this matter should be brought to the attention of those who are in a position to do something about it.

If I walk out of my house and do not turn the lights off or if my wife prefers to buy pre-packaged food or pre-cut chicken, you could consider that a waste, but it is our business. We are wasting our money and paying for it with after-tax dollars. If your wife does something of a similar nature—or is extravagant when it is not necessary, that is her business or yours because she is spending your after-tax dollars.

There are many things that I, as a citizen, have no control over, but you, as a Congressman of this great United States do. I want to add that I think you are doing a fine job. However, if you would allow your staff to read newspapers every morning—other than checking on your home district for news—read books or any other means to allow the productivity to drop in your office (such as work six hours out of eight), I believe they would be stealing your money and mine by your permitting and condoning them to be unproductive.

This is what I am going to address in this letter—wastefulness—either through a very unthoughtful process or not caring. For example, productivity decreases if Congress passes laws that contribute to or allow waste—such as allowing labor laws to get to be what could be 50 percent productivity. There are labor rules that allow waste in management or management allowing labor or unions to be unproductive; i.e., pay for eight hours and only get four hours productivity.

Hypothetically, if it takes 100 hours to build a new car and we waste fifty percent (50 percent) of the time, then the labor cost would be twice as much. Again, the people who are doing shoddy work in automobiles, tire manufacturers, and any kind of productivity do not have to be unions, as such. It can be management, union plants or white-collar workers. I'm talking about total productivity. Whoever is not doing their job eventually makes prices so high that car sales or tire sales hurt Mr. Consumer—which is you and I. We are spending our after-tax dollars to pay for their wastes. Again, I believe this is contributing to the dishonesty of employees, and we are paying for it.

I have given this much thought in the past several weeks as there is so much talk about foreign automobiles, foreign steel, foreign tires, etc., in this country. I know, in my time, to my knowledge I have not purchased a foreign car or anything else substantial that is foreign-made. One of the finest tires made in the world, I believe, is a foreign radial tire. I never purchased any until they built a plant in the United States, and now we buy them. Our American workmanship became so bad on truck tires, in my opinion, there was not any way to support our American tire. Although foreign manufacturers now own many plants in this country—and I do not try to draw the line here—if they put a plant over here, then I feel free to buy the product that comes out of that plant. It seems that the foreign people that come over here who own and control plants have a better way of getting quality workmanship out of our working people in this country better than American-managed companies.

I could give you so many examples. For instance, we could pyramid all of the wastes that could be in a car from its start—such as the wastes in steel manufacturing or the wastes that might be in the coke processing or in coal mining. Another example would be if the coal miners are not being productive—and there is some question that non-union mines are allegedly more productive than the union coal mines (and it doesn't seem like this should be possible).

Union people should be the best qualified in the United States for productivity and should have proud, skillful, well-educated and managed people. There should be so much pride in union workmanship that when an employer wanted to call the union and get employees, they should be able to offer the best man in the United States for that job. He should be ready and willing to do the job and do it well. Once this attitude is handed down, there is not any question that our products will improve, our productivity will increase and inflation will stop and come down fast.

In our experience with buying many products, we run into things each day that you would find hard to believe. As you know, I am a truck man, and I have just finished the process of dealing with several new trucks and trailers. I'm not particularly picking on the make, but the component parts that were speced out from various suppliers. You would not believe how bad the workmanship is. I think pride in workmanship must be created anew someway in this country.

I recently had a discussion with a man that was driving a Volvo automobile. He talked about how good it was—and it is—as I have ridden in it. It is a quiet, good automobile—not too expensive. He said that American people or buyers should rebel until we get our products straightened out. You find all kinds of silly things—like a coke or drink bottle inside of an American made car door, and it will rattle. When you finally get your door panel off, there will be a note in the bottle—how long did it take you to find this rattle?

I'm not necessarily picking on union labor—just anyone that doesn't do their job as good as they could. I'm talking about everyone that serves the public—myself included. If I charge a shipper more money for hauling his freight because I've allowed myself to become wasteful and haven't used my time productively, I would be as bad as the rest of the nation that I am discussing.

Should productivity improve, as I predict, a person could purchase a home, car, etc., at half the price today. Many people need a new house or want a fuel-efficient automobile. If the people working in plants would really work and produce good items, sales would increase and lay-offs would decrease.

The purpose of this letter is not to pick on any person. I just strongly believe productivity in this country has to take a turn for the better. I also believe this county needs to get back to the basic Christian and moral principles upon which it was founded.

Sincerely,

ARNOLD LIGON.●

A TRIBUTE TO IVOR D. FENTON

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. YATRON. Mr. Speaker, I would like to take this opportunity today to recognize and pay tribute to an outstanding American who has contributed greatly to this Nation through a lifetime of distinguished service. On August 2, the friends and admirers of the Honorable Ivor D. Fenton, former U.S. Representative from Pennsylvania, will gather in Mahanoy City, Pa., to honor this very special individual on the occasion of his 92d birthday, which is August 3.

Congressman Fenton was born in Mahanoy City (Buck Mountain), Schuylkill County, Pa., in 1889. He attended Bucknell University and graduated from the Jefferson Medical College in Philadelphia, Pa., in 1912. He then served an internship at Ashland State Hospital in 1912 and 1913, and began practicing medicine in Mahanoy City in 1914. He enlisted in the U.S. Army Medical Corps and was commissioned as a lieutenant August 8, 1917, rising later to the rank of captain. After serving 20 months, 11 overseas, Congressman Fenton was discharged on June 6, 1919, and returned to Mahanoy City to resume his medical practice.

Representative Fenton was elected to the 76th Congress and served in the 11 succeeding Congresses, January 3, 1939 to January 3, 1963. He was the medical adviser to the secretary of welfare, State of Pennsylvania, and medical consultant to the State General Hospital, State of Pennsylvania from March 1964 to January 1968, when he retired.

From time to time, our Nation is blessed by the presence of men and women who bear the mark of greatness, who help us see a better vision of what we can become. Ivor Fenton is such a man. Each Member of Congress makes a contribution to the Nation in a unique and special way. Congressman Fenton's contribution was that he never lost faith in our Nation and the great opportunities it offers to those who are willing to participate fully in making it work. He was willing to dedicate himself to make it work, and it is because of men like him that it does.

Congressman Fenton's dedication to his country, his integrity and his selfless devotion to duty serve as an example to all of us. I know that my colleagues will join me in wishing Congressman Fenton the very best in his future endeavors.●

CALL TO CONSCIENCE VIGIL: CASE OF DR. MARK NASHPITZ

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. FOWLER. Mr. Speaker, I consider it a great honor to take part in the congressional vigil for Soviet Jews. More importantly, I consider it an obligation to participate in this expression of our country's dedication to human rights. Working to extend human rights appeals to our idealistic hope that we can improve the quality of life of all mankind. Idealism aside, however, our national interest dictates that we work to enforce human rights. We in the United States cannot feel secure in our freedom as long as the fundamental rights of others are violated elsewhere in the world.

Yet many countries, most notably the Soviet Union, continue to disregard the observance of human rights as set out in the international Helsinki final act. The most severe violations have come in the areas of suppression of political dissidents, censorship, denial of freedom of religion, and restrictions on travel and emigration. The Soviet state continues to subject its own citizens wishing to leave the country to innumerable obstacles.

The case of Dr. Mark Nashpitz is only one example of the many instances of Soviet repression. Examining Dr. Nashpitz's case history is extremely important in that it reminds us that we are not dealing with mere abstractions but rather with fellow human beings who are suffering without just cause.

Nashpitz, a refusenik of 10 years, was first denied a visa to emigrate to Israel in March 1971, on the ground that his father had left the country illegally in 1956, and that the son, 8 years old when his father defected, would have to pay the consequences of his father's actions. Repeatedly denied permission to leave, Nashpitz has served two terms in exile. He is one of a few former prisoners of conscience who has served his term and is still denied permission to emigrate.

Dr. Nashpitz received his first corrective labor sentence in 1972. Knowing that those who have served in the Soviet military are often denied permission to emigrate because of their exposure to secrets, he refused to serve when summoned.

Once out of exile, Nashpitz renewed his efforts to obtain a visa. His mother was allowed to emigrate to Israel in 1974, yet KGB officials told Nashpitz that his own emigration would be expedited if he agreed to act as a Soviet informer, investigating the means used by Israeli activist leaders to find out the emigration status of Jews living in the Soviet provinces. Nashpitz refused, and in February 1975, he participated in a peaceful demonstration with approximately 30 other Russian activists. Carrying placards asking for the right to emigrate to Israel and to halt harassment following visa applications, the refuseniks were arrested by militiamen in front of the Lenin Library. Their protest lasted about 2 minutes. While most of the other demonstrators were sentenced to only 10 or 15 days, Nashpitz's trial resulted in a sentence of 5 years of internal exile. Further, there is considerable evidence that the trial itself violated both Soviet law and internationally recognized human rights principles. Nashpitz was, for example, denied his right to a defense and to an open and fair trial.

While in exile in Siberia, Nashpitz got married. The pattern of harassment continued, as his wife also became a police target. Although Nashpitz was released in June 1979, he and his wife were not allowed to register as residents in Moscow.

On behalf of Mark Nashpitz and other prisoners of repression, I ask the officials of the Soviet Union to recognize the spirit and letter of the international Helsinki final act. These principles include the right to leave any country, including one's own, freedom of opinion and expression, and freedom of thought, conscience, and religion. The Helsinki final act cites reunification of families as an important humanitarian bond between nations. Mark Nashpitz should be granted permission to reunite with Ita Nashpitz, his mother, in Israel.

I take part in the congressional vigil for Soviet Jews and the hope not only that our efforts here may have some positive effect on Soviet human rights policy but also that this call to conscience may bring the plight of refuseniks to the attention of the President and other Members of Congress so that we may take the necessary steps to enforce the Helsinki final act throughout the world, thereby showing the full measure of respect for human rights in our own country.●

INSTITUTIONAL INVESTORS: WHO OWNS WHAT?

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. BEDELL. Mr. Speaker, the current wave of corporate mergers raises many questions that have been debated both in the news media and in the Congress. Concern has been raised about the sheer size of some of these mergers as well as about the vast amounts of capital that they may

drain away from other, more productive sectors of our economy. Questions concerning the antitrust implications of some of the proposed mergers have been raised as well.

In a letter I sent recently to David Clanton, the Chairman of the Federal Trade Commission, I sought to call the Commission's attention to another issue. That is the matter of the increasingly prominent role being played in these mergers by institutional investors.

In my letter to Mr. Clanton, I cited the example of the Conoco takeover war being fought by Mobil and DuPont as a classic illustration of how incestuous relations have become between major corporations. Of the 65 largest shareholders of Conoco, 36 appear in the list of major shareholders of either Mobil or DuPont. In fact, 20 investors show up in the list of the largest shareholders of all three companies. One financial institution, Bankers Trust of New York, manages the employee stock plans of all three firms.

The information on the ownership patterns in these companies comes from the Corporate Data Exchange Stock Ownership Directory—Energy, published in 1980.

The full text of my letter to Mr. Clanton follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 21, 1981.

Hon. DAVID A. CLANTON,
Chairman, Federal Trade Commission, Washington, D.C.

DEAR MR. CHAIRMAN: The recent wave of corporate mergers seems to have captured the public's attention, both because of the high visibility of the companies involved and because of the sheer size of the deals being proposed. I imagine the Commission is watching the unfolding scene with some interest.

While the specific individual mergers raise interesting and important issues of themselves, this current merger wave also seems to highlight an underlying matter that I wish to call to your attention. That is the issue of the increasingly prominent role being played in the stock market by institutional investors and the potential problems that arise as a result.

I am using the term "institutional investors" to include managers of pension funds, trust funds, corporate investment funds, mutual funds, insurance reserves, etc. While the money they handle may ultimately reside in individual accounts, as is the case with bank trust departments especially, decisions on the actual investment and the exercise of voting rights usually are made by the professional managers.

In recent years, the amount of money handled by these institutional investors has grown dramatically. Pension funds and mutual funds come to mind most immediately as examples of how rapidly this sector of the investment world has expanded.

With this growth in the amount of money they control, institutional investors have had to look for places to invest their funds. This has resulted in a spreading of their investments over a number of companies. Increasingly, we see the same investors showing up as major shareholders in a large number of major corporations.

I do not believe there is anything inherently sinister or conspiratorial about this. But it does raise some questions in my mind about the traditional view we have had of investors filling the role of impartial arbiters of economic disputes.

This issue first came to my attention last year when I chaired hearings on conglomerate mergers and their effects on small business and local communities. A question that troubled me throughout the hearings was: Why are so many corporate executives apparently willing to sacrifice the long-term health of their companies in exchange for short-term gains? The question has broad implications for our whole economy, as we see investments in new technology, expanded production capacity and increased productivity passed over in favor of tender offers designed to rearrange the ownership of existing assets. One possible explanation is the pressure institutional investors bring to bear for short-term payoffs in the stock market, as these investors are able to move very substantial sums of money in and out of a stock.

Another way of looking at the current merger wave is to start by observing that many institutional investors occupy prominent positions on the lists of shareholders of both the acquiring companies and the ones to be acquired. Thus, they may sit in judgment of the initial tender offer and then they help decide whether or not to accept it. Frequently, they are able to receive an enormous bonus for their holdings in the acquired company without diluting their holdings in the merger maker.

To illustrate how incestuous the relationships have become, I am enclosing a table prepared with information from Corporate Data Exchange, Inc. (Source: CDE Stock Ownership Directory: Energy, published in 1980.) We looked at the top investors in Conoco and in the two American companies that are leading the bidding war for control of Conoco.

Of the 65 largest shareholders in Conoco, 36 appear in CDE's list of major shareholders at either Mobil or DuPont. In fact, 20 investors show up in the list of largest shareholders of all three companies.

The pattern is most noteworthy in the case of major financial institutions. Bankers Trust of New York, for instance, is listed as the single largest holder of stock in Conoco and is also the No. 1 shareholder at Mobil; it slips a bit to No. 12 on the list of investors in DuPont stock. Citicorp is ranked No. 2 at Conoco, No. 4 at DuPont and No. 15 at Mobil. Chase Manhattan is No. 4 at Conoco, No. 5 at Mobil and No. 21 at DuPont.

The position of Bankers Trust is of interest for other reasons, too. According to CDE, Bankers Trust is the manager of the employee stock plans at all three companies. In other words, they will be casting the votes for employee/shareholders on both sides of a Conoco takeover, no matter whether the final offer comes from Mobil or DuPont or both.

At this point, I am not sure what, if any significance should be assigned to this pattern of spreading investment by institutional investors. However, I do believe it is a trend that warrants very careful consideration. As is illustrated in the Conoco-DuPont-Mobil table, there already is a substantial intertwining of holdings in major corporations by institutional investors and the present rush towards mergers within the Fortune 100 is likely to accentuate this pattern.

Consequently, I am wondering if the Federal Trade Commission has considered the issue of institutional investors controlling substantial blocks of stock in many large companies, some of which now are seeking to merge with one another. In the case of some of the largest investment banks, the question is compounded by the fact that some of these same institutions are deeply involved in the financial arrangements attendant to the pending mergers.

If the Commission or its staff has prepared any studies addressing this issue, I would like to see them. If no such studies have been done recently, I respectfully suggest that the Commission ought to take a close look at this matter as quickly as possible.

Sincerely,

BERKLEY BEDELL.

Enclosure.

The following chart lists major shareholders in Conoco who also appear in the top ranks of Mobil and/or DuPont investors. The numbers indicate the investor's ranking in the list of top shareholders at each company as of early 1979. TENNESSEE-TOMBIGBEE: MONUMENT TO PORK BARREL

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. CONYERS. Mr. Speaker, when the House considered the amendment to the energy and water development appropriations bill (H.R. 4144) offered by my colleague from Washington, Congressman JOEL PRITCHARD, I mistakenly voted against the amendment. Even though the amendment would

have lost, I want to take this opportunity to indicate my support for the objective of the amendment. I fully agree that we should strike the entire $189 million in construction funds for the Tombigbee Waterway in Alabama and Mississippi.

This body has moved in recent weeks to substantially cut programs that are basic to the survival of the majority of Americans—the poor, elderly, working class, and minority Americans. At the same time, we are defeating efforts to save the American taxpayers the burden of having to pay for a project that is highly questionable and has serious environmental, economic, and equity problems. Much like our decision on the Defense Department authorization, we are throwing money at projects that have not been proven to be cost effective or to have any real beneficial impact on the economy. The fact is, the Tennessee-Tombigbee project will not produce anywhere near the economic benefits that are claimed by its backers. I think it has been correctly described as the most expensive, needless ditch ever built.

We have to begin to look at these projects in terms of their long-term costs and not just the initial startup costs. This ditch will eventually cost the American taxpayer some $2.25 billion, a cost which is not being factored into congressional and administration economic projections. To avoid this excessive cost, the Congress should ditch the project, sell the land, and cut the losses.

The project was initiated as a political gift to southern politicians by the then President Nixon, and the House is continuing the giveaway by its actions today. This is no way to rebuild the Nation's economy and rationalize investment and spending on the part of the Federal Government.●

CENTRALIA, PA. MINE FIRE BURNS UNDER THE TOWN FOR 20 YEARS

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. NELLIGAN. Mr. Speaker, I am pleased that the Appropriations Committee has included in its report language which I suggested mandating the use of funds from the Abandoned Mine Reclamation Fund for a borehole project in Centralia, Pa., located in my congressional district.

This project is vital if the perimeters of the underground mine fire are to be identified. The fire has been burning under Centralia for the past 20 years. Once it is determined where the fire is burning, the people of Centralia will be in a position to voice their opinion on which of the several solutions that have been proposed to solve the problem will be preferable.

So that my colleagues will have an appreciation of the situation in Centralia, I call to your attention an article which appeared in the New York Times on March 28, 1981.

The article follows:

PENNSYLVANIA TOWN LIVES WITH FIRE THAT WON'T STOP

(By William Robbins)

CENTRALIA, PA., March 25.—For generations this was a town that Centralians loved. Those who left yearned for their valley and the surrounding hills, where green trees and flowers of summer hid old mining scars, and many returned to its modest but neatly painted homes, its gardens and fresh air.

But now part of the town finds living here like existing on some primordial planet where the earth belches noxious gases and where the ground sometimes opens up under the tread of unwary feet.

"It was awful scary," said Todd Domboski, 13 years old, describing his escape last month from a 250-foot hole that had opened in his grandmother's yard and almost swallowed him. "I just grabbed some roots and hung there; the smoke was so thick I couldn't see anything." He was rescued by a teen-aged cousin, but his mother, Florence, still tries to keep him calm with medication.

"I just thank God I'm alive," said John Goddington. Fumes from an underground fire, whose heat had already killed his business, last week robbed the 63-year-old service station owner of oxygen as he slept, and almost took his life. Found unconscious, he was taken to a hospital and revived with an oxygen pump.

OVERCOME WHILE SLEEPING

The villain of Centralia is an old coal mine fire that now threatens homes and lives in the south end of this village of 1,200 people in east-central Pennsylvania. A total of 109 of the village's 400 homes are in what is called the impact area, with about 20 threatened more seriously than the others.

The 19-year-old fire, ignited in 1962 from a waste dump that had been dug over a coal seam, had been burning for nearly 18 years before residents here sensed a serious danger to their lives and property, though it had long ago forced workers from the anthracite mines that honeycombed the earth beneath the village.

More than 250 other mine fires are now burning in the United States, including one in northeastern Pennsylvania in a vein that runs between the villages of Larksville and Courdale. In the mid-1980's one underground fire in Laurel Run, Pa., forced the removal of all of the town's 850 residents and the demolition of their 173 homes, their church, and their school.

Gases from the Centralia fire have burst holes through the earth in dozens of places around the homes, and plumes rise like steam in the crisp, mountain air. Pipes have been installed in most of the openings to carry the sulfurous fumes above breathing space, but the odors still float into houses when windows are opened.

In some of the homes, deadly carbon monoxide and carbon dioxide seep up through basements and into living rooms and bedrooms, displacing oxygen and sometimes causing headaches and nausea and fanning fears for the health of children.

Medical experts say that prolonged deprivation of adequate oxygen can cause brain damage, but no one has said for sure how low and how long are the limits of danger to a growing child.

In homes like those of John and Isabelle Coddington, above their gasoline station and in the nearby homes of David and Eileen Lamb, Thomas and Christine Oakum, and Tony and Mary Androtti the families live by monitors with gauges to set off alarms whenever oxygen levels fall below 19.5 percent or carbon monoxide rises above 35 parts per million.

A normal oxygen level in the air is 21 percent. No amount of carbon monoxide, which is the lethal substance that comes from automobile exhaust, is normal but 35 parts per million is regarded as the threshold of serious danger.

Whenever an alarm sounds, sometimes a bell and sometimes a beeping whine, someone gets up and opens a window until the alarm ends, letting in the cold and the odors from the fuming pipes.

"My God, what are we to do?" asked Carrie Wolfgang, Todd Domboski's 74-year-old grandmother. "You can't live with the windows closed and you can't stand to open them."

Columbia County, the state and Federal agencies have been discussing plans to go to Centralia's aid. The state has offered mobile homes as temporary living quarters for the most seriously threatened, but they are not available yet and those getting offers say they do not know how they can maintain two homes.

But Secretary of the Interior James G. Watt and Gov. Dick Thornburgh have reached an agreement on a $1 million emergency relief program under which the Interior Department will buy 26 of the homes and relocate the owners.

Meanwhile, many homeowners continue to worry about who will be moved and when and whether action will come in time to prevent dangers of the kind narrowly escaped by Mr. Coddington and Todd Domboski.

"You worry," said David Lamb, who said his daughter's asthma had been aggravated by the fumes. "You never know, any day a house and everybody in it could sink out of sight. That fire down there is burning away the timbers and the columns of coal the miners left to support the roofs of those old mine tunnels."

The reality of Centralia's fears is underscored by a recent report of the Federal Bureau of Mines. The most serious danger in Centralia, it said, is "the presence of hazardous combustion gases which have migrated into area homes through fractures in the strata overlying the fire."

Those gases, it said, may include "potentially lethal" carbon monoxide. "There is also the possibility," it continued, "that slightly elevated levels of carbon dioxide or deficiency of oxygen will cause some physical effects over a prolonged exposure."

Another threat of the mine fire, some people say, is that it may turn townspeople against one another as it also creates marital strains between husbands and wives locked by mortgages into homes they cannot sell while they are unable to meet the cost of a second dwelling.

"It's too bad," said Mrs. Lamb, alluding to tensions that neighbors said they sensed because people living in affected areas felt that those in unaffected areas had been lackadaisical about supporting demands for assistance "People here were so close if you sneezed at St. Ignatius they'd say 'God bless

you' at Duffy's," she continue, citing a church at one end of town and a home at the other.

One of the first to notice a serious problem from the fire was Mr. Lamb, who bought his home in 1978 but soon found there was not enough oxygen in his basement to keep his furnace burning. He spent $5,000 to convert to electric heat. Today, when he checked his basement with a portable meter, the oxygen reading was 9 percent.

For Mr. Coddington, the awareness struck Dec. 7, 1979, when his son Joseph found a basement wall hot to the touch. A test showed temperature in the walls at 180 degrees. Mr. Coddington then checked his underground gasoline tanks, and when he opened the caps fuel spurted out. Its temperature was 140 degrees. His pumps had to be closed and the gasoline removed.

Crews sent by the Bureau of Mines attempted to fill the steaming holes that had burst through the ground around the station, but the move seemed only to force more gases into surrounding homes. It was shortly after that when Mrs. Androtti began to suffer from headaches and nausea.

Over the years the Bureau of Mines has spent $3.4 million trying to solve the Centralia problem, an Interior Department aide said. Efforts by Federal and local agencies have included attempts both to smother the fire and to douse it with water but all have failed. Now some experts say the only sure solution would be removal of the 109 homes and excavation of the fire below.

"That would be the end of the town we have known," said John Wondoloski, a miner who is Centralia's parttime Mayor.●

H.R. 4243

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. BROYHILL. Mr. Speaker, I am today introducing H.R. 4243, a bill to set forth a comprehensive and detailed national tourism policy for both domestic and international tourism.

A section-by-section analysis of the legislation follows:

SECTION-BY-SECTION ANALYSIS

TITLE I: NATIONAL TOURISM POLICY

This title states a comprehensive and detailed National Tourism Policy covering both international and domestic tourism.

TITLE II: TOURISM POLICY COUNCIL; TOURISM ADVISORY BOARD

Section 201: This section establishes an interagency "Tourism Policy Council" in order "to assure that the national interest in tourism is fully considered in Federal decisionmaking." The Council would be chaired by the Secretary of Commerce, and would include the Secretaries of State, Interior, Labor, Energy and Transportation, and such other officials of Federal agencies as the President designates.

By defining the potential membership of the Council in terms of "Federal agencies," this section would provide for representation of all Federal agencies whose programs significantly affect tourism, whether or not they are part of the Executive Branch. Members of the Council could designate alternates from their respective agencies, but they must be persons who exercise "significant decisionmaking authority in the agency involved." The Council would be required to meet at least twice annually and to submit annual reports on matters considered by the Council.

Section 202: This section would authorize the Secretary of Commerce to establish, and maintain in an active status, a Tourism Advisory Board. The Board, consisting of at least 15 members representing all segments of the travel and tourism industries, would be established and operated under the Federal Advisory Committee Act. The Policy Council would be required to receive and consider recommendations of the Board as to matters appropriate for interagency consideration.

TITLE III: AMENDMENTS TO THE INTERNATIONAL TRAVEL ACT

Section 301: Amends Section 1 of the International Travel Act to refer to "providing for the implementation of the international aspects of the National Tourism Policy."●

THE PARADE MARSHAL CHOSEN

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. CLAUSEN. Mr. Speaker, over the Fourth of July recess I was unable to share with the citizens of Willits and Mendocino County, Calif., the pleasure of seeing one of their favorite sons serve as grand marshal of the annual frontier days Fourth of July parade because I was simultaneouly serving as a parade grand marshal in a neighboring county. However I want to take this opportunity to recognize a great American, a man who has given so much of his time, resources, and energy to make his community a better place to live. Robert E. Harrah and his family have been associated with the community of Willits since 1943. Through his initiative, innovation, and industry he has built two very successful business enterprises which have provided steady employment for a large number of local people while helping the local economy remain steady even during periods of economic turbulence.

But Bob Harrah is more than just a businessman. He and his wife Jayne and their entire family have been actively involved in a large number of civic, social, and fraternal activities, and have individually worked behind the scenes to help a very large number of people and projects.

Mr. Speaker I am submitting for the RECORD an article which appeared in the Willits News in order to recognize the unique contributions which Bob Harrah and his family have made. I do it so all may recognize a true success story, a favorite son in every sense of the word. His example should serve as an inspiration for others to emulate. Our purpose on Earth is not only to make a living but to make a life. Bob and Jayne Harrah, throughout a lifetime of hard work, dedication, commitment, and initiative, have enriched the lives of all fortunate enough to know them. We are all deeply in their debt. This is an all-American family that genuinely represents the good things in life and the greatness of our country.

The article follows:

[From the Willits News, June 3, 1981]

PARADE MARSHAL CHOSEN

The 1981 Frontier Days Parade Committee announced this week that local businessman Bob Harrah has been selected for the honor of serving as Grand Marshal of this year's Fourth of July parade and attendant activities.

Robert E. Harrah was born in Riverside, Washington in 1916 and spent his boyhood on a small apple farm and his growing up years in a succession of lumber camps in the Washington and Oregon woods where his father was employed in all phases of lumbering and sawmill operation.

When Bob was in the fifth grade, he rode horseback three miles back and forth to school every day and when he was ten, he was working as a whistle punker in the woods, a man-sized job that was vital to early day logging operations.

In later years, he worked in the oil fields of Southern California and in a variety of jobs, all involving use and care of heavy machinery.

In 1943 he and his wife Jayne came to Mendocino County from a job working on the Panama Canal, and in 1944 he opened the Harrah Brothers Machine Shop with his brother Joe in a small garage.

That was the beginning of a remarkable business career that eventually led to the growth of two of the largest employers in the city of Willits, Microphor and Remco Hydraulics.

Remco grew out of Harrah's Machine Shop, originally a sawmill machinery manufacturing plant.

In 1957 the facility was expanded to produce hydraulic equipment for the lumber, electric generation and defense industries, and the name was changed to Remco Hydraulics.

The business continued to grow under Harrah's vision and inventiveness, expanding into the manufacture on non-metallic hydraulic cylinders, which Harrah invented, until the small town factory was acquired by Stanray Corporation in 1968.

Harrah joined the Stanray Board of Directors, becoming its chairman and chief executive officer in 1975, and he and Jayne commuted between Willits and Chicago for two years until 1977 when Stanray was acquired by the multi-national firm of IC Industries.

Harrah is still involved with IC industries, serving as a director of the company, as well as serving on the Board of Directors of Abex Corporation, an IC Industries subsidiary.

Not to be bored, Harrah developed the low-flush toilet and began the fledgling company which grew into another successful business for him and his community, Microphor, which was recently sold to a group of New York investors.

In 1977 he received the Knottingham Man of the Year Award from the California State Environmental Health Association for

inventing and perfecting the low-flush toilet.

Along the way, Bob Harrah has always found time to devote his talents and energy to bettering his community.

He has served on the Willits City Council and Planning Commission; was a member of the Willits Unified School Board for ten years and served as its chairman; and is presently serving on the Boards of Directors of both Howard Memorial Hospital and the Bank of Willits.

He was a member of the Willits Volunteer Fire Department from 1945 until 1952 and was involved in the direction and operation of Frontier Days during those days when the Fire Department put on the annual show.

While still active in the administration of the various Boards on which he serves, Bob and Jayne are now devoting themselves to their Eden Valley Ranch which they bought in partnership with Max McKee and the late Earl Maize Jr. and Frank Crawford in 1954.

For a number of years the ranch was leased as a cattle operation, but in 1975 Harrah assumed full ownership of the ranch and now runs it himself as a cattle business, raising registered and commercial Brangus cows and bulls.

He is also doing some experimental planting of wild rice, corn for silage, barley, oats, rye and alfalfa along with permanent pasture, and developing water for an irrigation system.

Bob and Jayne Harrah have given in many ways to their hometown. No one but they know just how much they have given as most of their gifts are made anonymously.

The community of Willits will now reverse the giving process with this recognition of a Favorite Son during the 1981 Frontier Days celebration.●

IN MEMORY OF CHRIS BLENMAN OF BROOKLYN, N.Y.

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. SCHUMER. Mr. Speaker, recently, the people of Brooklyn suffered a great loss with the passing of Chris Blenman. I have been greatly moved by his contributions to our community and would like to share with my colleagues my thoughts about this great man.

Chris Blenman was a man who dedicated his life to serving his fellow man. During his adult life he worked for many community services giving of himself in a way which has been matched by few. His contributions to the people of Brooklyn were not limited to a single field; his efforts mirrored his expertise and ranged from education to better health care for the community.

Chris was a model citizen who did his best to insure that all citizens would have better community services and living conditions. He worked for our children as a volunteer in the local public schools; he worked for our senior citizens and founded the United Senior Citizens Transportation Service which serves the Crown Heights area. Chris also served as the first president of the Troy Senior Center and was reelected for 6 consecutive years. In 1978, Chris was elected again to the presidency of Troy and served until his untimely passing. Chris also served as a member of the board of directors of the Charles Drew Health Center. For all of his outstanding contributions, Chris was elected Senior of the Year by the community.

Chris Blenman was also a model husband and father who exemplified those characteristics which have made this country strong and great; it is an unusual man who can care for and serve his community and his family simultaneously. Chris Blenman was such a man. Chris Blenman was a person with whom I was very proud to have been associated. I would like to extend to his family, Mr. Speaker, his wife and son, his stepson, and his two grandchildren, the deepest sympathies of the people of Brooklyn and of the Congress.●

ISRAELI RAID ON IRAQI NUCLEAR REACTOR

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, I would like to express my dismay at the recent criticism of the Israeli raid on the Osiraq nuclear reactor site. This critical response merely reveals lack of understanding about the uniquely precarious position which Israel occupies in the midst of hostile neighboring countries.

The Israeli attack cannot and should not be classified as an act of aggression against Iraq. Israel and Iraq are in a formal state of war. Iraq first declared war on Israel when the nation was formed in 1948. Although Egypt, Lebanon, Syria, and Jordan signed armistice agreements in 1948, Iraq refused. Again in 1967 and 1973 Iraq joined the wars against Israel. Iraq refused to accept the 1967 cease-fire contained in the U.N. Security Council Resolution 242 and the 1973 cease-fire contained in the U.N. Security Resolution 338. On October 23, 1973, the Iraqi Government proclaimed, "Iraq does not consider itself a party to any resolution, procedures, or measure in armistice or cease-fire agreements or negotiations or peace with Israel, now or in the near future."

Given the state of war which exists between the two countries, the Israeli raid was a legitimate act of self-defense, justified under article 51 of the U.N. Charter. As explained by Sir Humphrey Waldock, current President of the International Court of Justice, in a lecture at The Hague in 1952, "It would be a travesty of the purpose of the U.N. Charter to compel a defending state to allow its assailant to deliver the first and perhaps fatal blow. To read article 51 otherwise is to protect the aggressor's right to the first strike." Clearly, to require Israel to sit by idly while Iraq proceeds, according to most analyses, to develop a nuclear capability would be contrary to the entire intent of article 51.

Self-defense and self-protection are universally accepted principles—principles which no country would surrender, voluntarily. No nation has the right to decide for another nation when its existence is threatened. Only Israel can determine when its national security is endangered, and when action must be taken to protect that security. Israel's fear that Iraq would use nuclear aggression against Israel is confirmed by Iraqi behavior as well as by the public statements of Iraqi leaders.

For over 33 years, Iraq has been committed to the destruction of what it refers to as the Zionist entity. Iraq routinely finances terrorist activity against Israel, causing the U.S. State Department in 1980 to label the Iraqi Government as a promoter of international terrorism. Furthermore, in an August 1980 radio broadcast, Saddam Hussein openly declared his intention to destroy Tel Aviv with bombs.

This threatened destruction of Israel undermines any hope for stability in the region. America's interests and traditions are firmly linked to Israel. As a stalwart champion of democracy and freedom, Israel represents and protects Western interests in a region vulnerable to terrorism and Soviet imperialism. Israel remains a strong deterrent to Soviet domination in a region crucial to world energy supplies. The United States thus suffers from violations against its most valuable ally in the Middle East.

R. Emmett Tyrrell, Jr. has written an excellent article on the subject of the Osiraq raid. In this article, which appeared in the Washington Post on Monday, June 15, 1981, Mr. Tyrrell states cogently the reasons why the United States should praise rather than condemn Israel's actions. For the benefit of my colleagues, I submit the article in its original, unedited form:

[From the Washington Post, June 15, 1981]

BOUQUETS TO THE ISRAELIS

(By R. Emmett Tyrrell, Jr.)

Why all the rending of garments over last week's Israeli air strike? The Iranians tried to bomb the very same Iraqi nuclear plant last September, and I noted no uproar. Why the anguished chorus over the Israeli attack? Is it because the Israelis were successful and the Iranians missed? Had Allah smiled on the Iranian bombers, would the United Nations have convened another of its hot-air confabulations? Imagine Iraq's

president, Saddam Hussein, in possession of atomic bombs. Would the Saudis sleep as comfortably then as they do now? Would Jordan's King Hussein? Would the Syrian Machiavel, Hafez Assad, or anyone less in that enormously volatile area?

The nations of the Middle East and, for that matter, all the peace-loving nations of the world ought to be sending the Israelis bouquets. And let us be spared any more of the Arab's emotional sonorities about international law. The Iraqis are at war with Israel. They want to be at war with Israel. They like to be at war with Israel. In fact, Saddam Hussein seems to relish war as fondly as the late Benito Mussolini did, though Hussein butchered a lot more of his countrymen in pursuing high office than did Mussolini.

Many of those now ardently criticizing Israel apparently are ignorant of the vicious and mercurial nature of Israel's enemies. They seem to doubt that any foreign peoples would ever be ruthless or unreasonable. Thus they favor ceaseless dialogue and public relations as instruments of diplomacy. Such people are simply ignoring the nature of international politics.

The goal of all serious political activity is control, generally control of one's enemies. If one is insufficiently powerful to subjugate one's enemies, one scales down one's ambitions. The difference is between choosing an offensive or a defensive policy. The third option is taking no action at all.

The Israelis will never be powerful enough to subjugate their enemies, and they cannot opt out of their political situation. Hence they are condemned to a defensive strategy, and their air strike last week was a masterful show of defense. Their critics wish they had exercised the third option and done nothing.

This is the option with which the West has been most comfortable with over the past 35 years. Those who prescribe it essentially see foreign affairs as apolitical. They refused to accept that there are struggles for influence going on in the world. They deny that there are malevolent forces. They believe all disagreements are reasonable disagreements. Always they counsel restraint.

By practicing restraint, the West has prospered. Every year more and more fashionably dressed people parade along the Champs Elysees, the Via Veneto and Central Park South. Life is sweet; all is well.

But the grim truth is that, in an increasing number of countries around the world, life has become hellish. And as the Western powers withdraw their influence, allowing the liberal order in international relations to be extinguished, the future of world peace itself is increasingly left in the nervous hands of men like Saddam Hussein. I for one do not like the drift of things. As the citizenry of the West continues to cut deals abroad and live the high life at home, more and more woebegone immigrants from foreign barbarism drop themselves to Western shores. It is an ominous sign.

The countries of the West abound with Africans, Asians and Latin Americans who have lost the struggle for political control in their countries. The Israelis understand the meaning of these signs. The outcome of the war in Southeast Asia should constitute the great political lesson of the late 20th century. The Israelis appreciate this. They do not want to become the next wave of boat people.

For over three decades the Israelis have steadfastly accepted the imperatives of their political condition. A nation of under 4 million, it has endured in an ocean of 134 million hostile faces. During this time, dozens of peoples have had their cultures snuffed out. Yet the irony is that by accepting the imperatives of their political condition, the Israelis have actually gained a degree of acceptance in that hostile ocean that their present critics would never have prophesied. More Arabs today view the Israelis as tolerable than ever before. In that turbulent and bloody-minded area, the Israelis have been the only truly effective peace-keeping force. The Lebanese understand this. The Egyptians understand it. Do the diplomats of the West understand?●

LOSING THE STAR AND "DOONESBURY"

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. LUJAN. Mr. Speaker, we are all stunned with the announcement today that the Washington Star will cease publication in just 2 weeks. It is hard to realize that the Nation's Capital cannot support two daily newspapers, in the city that generates more news than any other in the world. A free press is stimulated by the competition of ideas and philosophy. I am grateful that my hometown of Albuquerque, N. Mex., is able to maintain two viable daily newspapers.

As tragic as the loss of the Star itself, Mr. Speaker, will be the loss of the comic strip "Doonesbury." I am truly hopeful that "Doonesbury" has a life of its own. If its creator, Gary Trudeau, can bounce back as strong as his namesake, the Prime Minister of Canada, then I am sure we can all enjoy the strip for years to come. I am happy that readers in Albuquerque will not suffer an interruption in "Doonesbury."●

CHRYSLER RECOVERY AND NEEDS OF U.S. AUTOMOBILE INDUSTRY

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. SHARP. Mr. Speaker, yesterday's announcement by the Chrysler Corp. that it earned a quarterly profit for the first time since 1978 is welcome news. It was a major accomplishment, especially at a time when overall U.S. automobile sales and production have been depressed.

During July, the Chrysler Corp. was the only major U.S. automobile manufacturer to increase its sales. Last week, the mid-July auto sales statistics were released and produced continued concern about the health of the economy generally and the condition of the auto industry, despite the recovery of Chrysler.

Ford Motor Co. sales were down 34.2 percent below the level of a year ago. General Motors sales were 13.8 percent below the early July level of last year, AMC sales were down 4.5 percent and Volkswagen of America sales declined 17.1 percent. During the period, Chrysler recorded a 13.6-percent increase.

Mr. Speaker, it is unfortunate that an industry as important to our economy as the automobile industry must develop serious problems before we analyze the trends and developments to establish effective, long-term policies.

Allocation of the voluntary automobile import restriction agreement among Japanese manufacturers was recently announced and shipments to the United States have dropped 4 percent. This is helpful, but import restrictions are not the ultimate solution to the problems faced by American companies and American workers.

Major elements in a long-term policy must include stabilizing interest rates, stimulating capital formation, reforming unnecessary regulations as well as developing greater cooperation between labor and industry management.

Another significant part of a long-term solution must be to encourage Japanese automobile producers to establish manufacturing and assembly facilities here in the United States. That trend is just beginning, and must be encouraged as the structure of the industry shifts to the development of the global car whose parts are manufactured in many places in the world. One Japanese manufacturer, Honda, is building an automobile assembly plant in Marysville, Ohio; 2,000 American workers will have jobs when the plant is finished in 1982. Nissan Motors, producer of Datsuns, is building a $300 million truck assembly plant in Tennessee; 2,200 American workers will build an estimated 120,000 light duty trucks annually when the facility is completed in 1983. Toyota Motors announced last week the completion of a feasibility study for construction of a parts manufacturing plant in British Columbia, the first such Toyota facility in North America.

During 1980, U.S. auto production fell from 11.5 million vehicles to 8 million. The Japanese increased their production from 9.6 million to 11 million at the same time. The U.S. share of world production declined from 28 to 21.4 percent. Consequently, the Japanese became the world's largest producer, capturing 29.4 percent of the world market.

More than 50 percent of Japanese auto production is exported around the world; 43 percent of Japanese exports are sold in the United States.

The largest Japanese producer, Toyota, sold 582,000 vehicles in America, 18 percent of its total vehicle production. With this level of Japanese dependence on auto exports, it is clear they have a stake in the health of the American economy. There must be concern not only about how American interest rates are affecting immediate sales, but also with respect to the effects of long-term economic growth and the stability of U.S. employment on long-term sales projections.

If the current condition of the U.S. auto industry remains bleak, there will be long-term unemployment in auto-related industries throughout the economy. Unless the condition of our domestic industry improves, there will be renewed calls for import restraints. The United States is virtually the only major auto market in the world without mandatory import controls, such as percentage content requirements. Pressure will continue to grow for these types of restrictions unless the Japanese wisely use the time provided in the voluntary restraint agreement. We are giving up 27 percent of our automobile market to foreign manufacturers, predominantly the Japanese, and there must be a greater long-term commitment to the American economy if free trade is to resume.

Mr. Speaker, Volkswagen has pioneered many trends in the automobile industry. It has been operating a $400 million assembly plant in Pennsylvania for 3 years, and a new $300 million facility will be completed next year in Michigan. The competition provided by domestically produced foreign cars has spurred technological innovation. Americans have jobs, and our consumers and economy benefit without the foreign trade deficit problems associated with manufacturing and assembling vehicles abroad. This lesson must be communicated to Japanese industry and action taken. Whether the facilities are wholly owned or joint venture agreements, our own economy cannot sustain the loss of nearly 30 percent of a key market to manufacturers abroad.

Establishing a domestic manufacturing and assembly operation by a foreign company is a complex project, but one that must be undertaken. Relationships with domestic suppliers must be developed, and a management system keeping quality control but sensitive to the domestic labor force complexities must be established. Nonetheless, Volkswagen has very successfully overcome these obstacles, and the pattern can be followed by other foreign automobile producers.

As the industry adjusts to changing market forces and consumer demand, the structure of the industry is being altered. Joint ventures are developing in both production and marketing. Enormous capital investment requirements, technology innovation, varying Government safety and environmental standards, and the need for a product distribution system have encouraged greater cooperation between foreign and domestic manufacturers. Chrysler's relationship to Mitsubishi is continuing to develop; General Motors and Isuzu have joint marketing and production arrangements; Ford and Toyota attempted to negotiate an acceptable agreement for several months; Nissan and Volkswagen are jointly producing Audi Passats in Japan. Cooperation and competition can exist at the same time. Similar arrangements are likely in the near future to strengthen manufacturers and to minimize the risks of entering new markets with new products.

Mr. Speaker, the recovery of the Chrysler Corp., from the edge of bankruptcy will strengthen the company's position in developing joint ventures which will help in the long-run stabilization of the company and the U.S. automobile industry. Although the company should be justifiably pleased with the accomplishment, much remains to be done to assure the long-run survival of the company through the difficult economic conditions our Nation is facing.

Nearly 225,000 American automobile workers will not have jobs this year. The social and economic costs resulting from the conditions of the industry are enormous. It is in the long-term best interest of our international trade partners that they contribute more to the stability of the U.S. economy and labor force.●

THE NEED FOR CONGRESSIONAL SCRUTINY IN DEFENSE SPENDING

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. SYNAR. Mr. Speaker, let me begin by stating my unequivocable support for the administration's general plans to improve our Nation's defense posture. Very competent sources, representing all political ideologies, have repeated the message that America must bolster certain areas of our national defense. I am convinced that now is the time for a national commitment to this end. I feel that the general direction which has been set in the 1982 defense authorization bill is a very necessary step in meeting this very important goal.

Although I am committed to an increase in spending for national defense, Mr. Speaker, I nevertheless have a number of strong reservations about some of the details which were included in the defense authorization bill that the House has just passed. The President's plans for defense call for an outlay of $1.6 trillion over the next 5 years. In planning for the programs which will account for this enormous appropriation—the equivalent of spending roughly $1 billion each day for 5 years—it is absolutely imperative for Congress to act judiciously.

I believe that in defense appropriations, this prudence should include three very important components. First, Congress must apply the same strict budgetary guidelines to defense appropriations that it does for all other Federal programs. It is just as important to exercise careful congressional oversight, for example, in how the food stamp program is administered as it is to show accountability for all our defense expenditures. We must not let the sense of urgency in improving our Nation's defense make us blind to the very real problems which go with any large appropriation.

Next, Congress must be dedicated to locating and eliminating waste. Again, this should apply to all Federal programs. Finally, and perhaps most importantly, Congress should always consider military appropriations with the final goal in sight—that of military preparedness. Any deviation from this course is an abandonment of the intended goals of defense spending. I am afraid that in the debate over the defense authorization bill during the last few weeks, Congress lost sight of these basic components to a responsible defense authorization bill. Let me cite some examples.

One of the amendments offered by the Government Operations Committee to the defense authorization bill would have required yearly congressional approval for the Defense Department's multiyear contracts. Since the amendment applied only to major weapons systems rather than to every small project requiring a multiyear contract, this proposal would have allowed Congress to evaluate those programs with the greatest potential for overruns in cost. It would not have prohibited multiyear contracts, but instead would have provided an independent means of verification to insure that the projects were indeed as effective as intended. Unfortunately, Congress failed to pass this very simple means of assuring budgetary effectiveness.

There are a number of uncertain factors when multiyear contracts are awarded. The economic considerations involved in the procurement of multiyear contracts are simply too indefinite to allow for blind approval without periodic consideration. In my opinion, the failure of Congress to pass this amendment was a failure to accept the responsibilty for fiscal accountability to the very programs it has authorized. The free rein Congress

has given the Department of Defense in multiyear procurement is simply not consistent with the careful scrutiny Congress rightfully exercises in most other Federal programs.

Another serious concern I have about the defense authorization bill is its failure to come to grips with the potential for waste in the Defense Department's budget. A recent investigation by the nonpartisan General Accounting Office found over $16 billion worth of waste in the Defense Department. The GAO testified this year that $8.7 billion of this total could be located immediately. Despite these reliable reports, however, Congress failed to pass an amendment which would have requested the President to submit a message enumerating $8 billion in savings from the elimination of waste, fraud, abuse, and mismanagement.

The concern I have about this vote is that most Members perceived the amendment as a cut in defense spending; as a result, the measure failed. I believe that if this Congress is truly dedicated to the elimination of waste in bureaucracy, it must apply the priority to all programs. I am afraid that in the overriding concern to see that the Defense Department receives as much money as the country can afford, Congress has forgotten the equally important responsibility to seeing that the money is not spent unwisely.

The highest priority in passing authorization bills for the Department of Defense is to insure the highest degree of military preparedness. Included in the version of the defense authorization bill was an amendment to grant military personnel the authority to make seizures and arrests in Federal drug violations. Although I am committed to seeing that something be done to stem the flow of drugs into the country, the use of military personnel in making arrests is not the answer.

The most basic requirement for the U.S. Armed Forces to be able to take on this new responsibility is an adequate number of personnel. By no means does the military have a surplus of members. Reports indicate that in many areas the number of recruits in the All-Volunteer Military is insufficient. The provision in the defense bill to grant military personnel the authority to make arrests ignores this frightening condition of manpower strength. In addition, the training most members of the military possess is inadequate to make arrests. They are not trained as policemen. They are not trained as witnesses. They have not been given instruction in the issuing of Miranda warnings or accepting admissions and confession. Unfortunately, the military will be forced to take time from its duties of military instruction in order to train its members in making civilian arrests.

The amendment raises other problems. Throughout history, Western society has respected the need to keep separate a nation's military and police forces. We have seen problems arise in many countries this century when the military is used to enforce civilian law. I sincerely hope this breach of longstanding separation of military and police forces in the United States will not set a precedent we may later come to regret.

In addition, the amendment does not address the problems of drug enforcement. The administration has proposed to cut the budget of the Coast Guard—the result of this cut could lead to the dismissal of over 400 employees valuable to the Coast Guard's efforts in drug control. The administration wants to abolish the Drug Enforcement Administration and did not fund the Law Enforcement Assistance Administration. These are the agencies that should deal with this Nation's pressing drug problems. We cannot say we have solved the problems of drug smuggling by merely giving the responsibility of enforcement to the Defense Department.

In conclusion, Mr. Speaker, I believe that in our haste to assure a strong national defense we have left many questions unanswered. We must realize that defense spending does not exist in an economic vacuum. The Office of Management and Budget has used the unrealistically low inflation rate of 8.7 percent to estimate the costs of multiyear programs, a projection that could result in a $6.4 billion underestimation in defense costs according to the Congressional Budget Office. Our dependence on unstable foreign sources of certain raw materials has not been taken into consideration in planning for future weapons construction. Congress has failed to adequately address the questions about the ability of our industrial base to support such an ambitious program of defense procurement. These are a few of the many reservations I have about this defense bill.

Despite these reservations, I nevertheless voted for the bill; I fully support an increase in our defense expenditures. Congress must remember, however, that responsible management of the Federal budget does not mean that all scrutiny ends with the final passage of a bill. It is our obligation to see that waste is eliminated in this and other budgets. It is our responsibility to see that the expanded authority we have given the military is not abused. Finally, it is our elected duty to assure the American people that the procurement policies of the military will be watched closely by Congress in order to guarantee their maximum cost efficiency.●

DR. KOOP'S RELIGIOUS LIBERTY

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. COATS. Mr. Speaker, during the past several months there has been considerable controversy surrounding the nomination of Dr. C. Everett Koop to serve as U.S. Surgeon General.

As one surveys the opposition, one notices a variety of objections to Dr. Koop's nomination. Some complain that Dr. Koop is too old and still others remark that Dr. Koop has had virtually no experience in public health programs.

I think it is important to note that all of these concerns are actually rooted in an unarticulated opposition to Dr. Koop's religious and moral convictions. It is this objection I find highly regrettable. Can we bar an individual from assuming a Federal position simply on the basis of his or her religious beliefs?

I have recently received a letter from the National Association of Evangelicals which directly addresses the question of religious liberty and Dr. Koop. I would like to share this letter with my colleagues by placing it in the RECORD. I would also encourage my colleagues to sign discharge petition No. 5 so that the House can expedite the consideration of Dr. Koop's nomination.

The letter follows:

NATIONAL ASSOCIATION OF EVANGELICALS,
Washington, D.C., July 8, 1981.

Hon. DANIEL R. COATS,
U.S. House of Representatives,
Washington, D.C.

DEAR DAN: The National Association of Evangelicals enthusiastically supports the appointment of Dr. C. Everett Koop to be Surgeon General of the United States.

Right now the appointment of this eminently qualified pediatric surgeon is being held up in the House Subcommittee on Health and Environment for reasons related to his moral and religious convictions on the sanctity of human life. The NAE Office of Public Affairs, for forty years a watchdog for religious liberty, is concerned about this development.

We strongly believe that no individual, who is otherwise qualified for the post to which he or she is appointed, should be withheld for reasons related to legitimate religious conviction. Further, he has reassured the nation that he will uphold the laws of the land:

"My position on abortion is that of the President, the Secretary of Health, the assistant secretary and the Republican platform. But I am a law-abiding citizen. As a government official I can do nothing that is not the law of the land, and it is not my intent to disrupt anything that is considered legal and proper." (Wall Street Journal, June 19, 1981)

To release this appointment for Congressional approval, Representative Hyde has sponsored Discharge Petition No. 5. On behalf of our 38,000 NAE churches with a membership of four million, and a service constituency of ten to fifteen million, let me urge you to sign Discharge Petition No. 5. If your name is already among the approximately 160 who have signed the petition, we would welcome and appreciate your assistance in securing the signatures of your colleagues.

Cordially yours,

ROBERT P. DUGAN, Jr.,
Director.●

TRIBUTE TO ARCHBISHOP PHILIP M. HANNAN

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mrs. BOGGS. Mr. Speaker, I am proud to call to the attention of my colleagues a very special constituent of Louisiana's Second Congressional District. He is Archbishop Philip M. Hannan, an outstanding servant of the people and a dear personal friend.

I would like to insert in the RECORD a newspaper article from the New Orleans Times-Picayune/States-Item, dated July 13, 1981, that chronicles a historic segment of this fine man's life. It reports on Archbishop Hannan's successful efforts to save the Cathedral of Cologne in West Germany during World War II, when he was a young American chaplain. His quick thinking and courage saved the cathedral's priceless treasures from pillage and destruction.

In late August of this year, Archbishop Hannan will celebrate the 25th anniversary of his ordination as a Roman Catholic bishop. Since 1965, he has protected and cared for south Louisiana's most prized treasures—our people.

I offer a copy of the article for my colleague's edification:

[From the Times-Picayune/the States-Item, July 13, 1981]

WAR STORY—ARCHBISHOP IS PART OF THE HISTORY OF A HISTORIC CATHEDRAL

(By Angus Lind)

When a young German priest named Friedhelm Hofman was about to become canon of the historic Cathedral of Cologne in West Germany, old Canon Kleff sat him down and told him there were some things he must know about the cathedral that no one else knew.

The largest Gothic church in northern Europe is situated in the heart of Cologne, a large river port on the Rhine. It is a classic in German Gothic architecture, begun in 1248 and completed in 1880. Its great twin towers dominate the city, rising 516 feet into the sky. Its 14th-century stained glass choir windows are some of the most beautiful in the world. And the church's works of art—its relics, chalice and statues, and the Shrine of the Magi—are priceless.

Cologne, being a river port and a key transportation route, was ripped apart by 262 Allied air raids. There were 20,000 casualties. A population nearing one million at one point had shrunk to 69,000 by April, 1945. Ninety-one of Cologne's 150 churches were devastated. But the cathedral had somehow survived with only medium damage.

But this was not what Kleff wanted to tell the young canon about. He wanted to tell him the story of how a young American Catholic chaplain saved the church's treasures from pillage: The chaplain took it on himself to cross security lines to have himself named temporary pastor of the church so the treasures could be guarded from looters and more bombardment during the close of World War II.

Hofman listened attentively as the old canon told how the young American found him hiding in the basement of the church, trying to protect the valuables by himself. Then how the chaplain got permission to take charge of the church until the military government took over.

The Germans being the good record keepers they are, the American priest's name was recorded on a document. It was Capt. Philip M. Hannan, USA, of the 505th Parachute Regiment of the 82nd Airborne Division. Hofman filed the story away in his memory.

Three years ago, Sister Andre Becker, O.S.U., a member of the Ursuline community of New Orleans, visited Cologne and met Hofman. They talked about the priest from New Orleans, and Hofman was surprised to learn that he is now the Archbishop of New Orleans. The two toured a castle together, the sister thanked him for his hospitality, and she told him she would love to show him New Orleans if he ever got over here.

"Some day I will," he promised.

Last week, "some day" happened. Thirty-six years after the incident at Cologne, Friedhelm Hofman, Canon of the Cathedral of Cologne, stood in Archbishop Philip M. Hannan's office on Walmsley and warmly presented him a book about the Cathedral of Cologne. Inscribed in it is: "With heartful greetings and thanks for all you have done during the end of the war. Friedhelm Hofman, Canon of the Cathedral of Cologne."

To say the least, Hannan was stunned that a chapter from his past has come back to him on such a nice note.

The archbishop sat down and relived what happened. He had visited the cathedral before the war in 1938 when he was a student at Rome. So he was more than familiar with the value of the treasures in the church when the Allied forces took Cologne.

"I almost got killed trying to get in the cathedral," said the archbishop, who is prone to modestly understating his accomplishments, including his paratroop jumps. "The Germans across the river had a good field of fire. I jumped from one bit of rubble to another and finally got there.

"A priest came up from the cellar. He was Canon Kleff, and he is still alive today. He had been asked to stay there and guard the cathedral. When I saw him, he had dust all over him. I realized that in time of war, you need more than one priest to stand up and say, 'You can't come in here.'"

The treasures had been placed in specially-built bunkers inside the cathedral. They were made of masonry and shaped like igloos. But Hannan said a simple grenade could have blown them apart.

So he broke the security lines and found his archbishop. He convinced him that what he wanted to do was the right thing. The archbishop authorized him to take charge and appointed him pastor. "I stationed a guard at the cathedral to keep anybody from blowing up the bunkers. I also told the paratroopers that if they had taken anything at all from the cathedral as a souvenir to return it to me . . . and all of them did," he laughed.

"Cologne was devastated," Hannan said. "On our flank was an American infantry division, but I didn't know anybody in it. I didn't know if they realized the value of these art treasures. The German people were starving and they would do anything at this point."

So the guards stayed until the military government arrived and took over about two months later. "The link is," said Hannan, "that Canon Kleff remembered that I came there and passed it on."

"The treasures are still there today, some in their old places," beamed Canon Hofman. "They are still there for all to see.

"Some good things happened after the war," he said. "Excavations were begun, and three other cathedrals were found—one built in 870, one built in 560 and one built in 320. Even a Roman temple from 15 A.D. was uncovered."

In 1981, the cathedral's appearance is marred by crumbling stone, a problem made worse by pollution in the air.

It will take decades to carefully replace the destroyed parts. So large is the structure, which seats 18,000, that there is still unrepaired war damage.

Remodeling and construction is a permanent part of the decor, so much so that it can be safely predicted that no one living today will ever see the cathedral without scaffolding. There is a saying in Cologne: "When the cathedral is completed, the world will end."

Still, the treasures will be intact, thanks to the actions of a Catholic chaplain from New Orleans.●

THE LOSS OF A DISTINGUISHED CITIZEN

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. CLAUSEN. Mr. Speaker, last week the people of Arcata, Calif., Humboldt and Del Norte Counties, and the Redwood Empire lost one of their most distinguished citizens. Gordon Hadley was born, raised, and spent his life in the north coast area. He attended Arcata High School and Humboldt State University, where he showed early signs of the good citizenship which was to be the hallmark of his life. He was a great basketball player and also served as editor of his college newspaper, the Lumberjack. This newspaper experience, coupled with a stint as a reporter and sports editor of the Humboldt Times, led him to the Arcata Union. He later acquired the Del Norte Triplicate in Crescent City, and the McKinleyville News, and formed the Hadley Newspaper Corp.

He insured that his newspapers were responsive to the needs of the commu-

nities, and served as a vehicle to express various points of views on issues of local importance.

He was truly a pillar of the community, serving as chairman of the Humboldt State University Advisory Committee, for which he received the President's Distinguished Service Medal from HSU. He was a very active member of the Arcata Rotary, with a near perfect attendance record for almost 40 years. He also was an active member of a host of other social, professional, civic, and fraternal organizations. His reward for his toil on behalf of his fellow citizens was not what he got for it, but what he became because of it.

Mr. Speaker, life is a voyage in which we choose neither vessel nor weather, but must rely upon management of the sails and guidance of the helm. Through rough seas and smooth, Gordon Hadley was steady and dependable. He demonstrated that the true purpose of our existence is not to make a living but to make a life—a meaningful, purposeful, and well-rounded life.

He was ably assisted by his loving and very talented wife, Monica, who shared in so many of his personal and journalism activities, and by his son Craig. Perhaps the highest tribute a man receives is when his son chooses to follow in his footsteps, and Craig Hadley is continuing to provide the people of Arcata the same fine newspaper coverage his father did—in the tradition of forthright and objective journalism.

To recognize the unique contribution which Gordon Hadley made to the people of Humboldt County and the Redwood Empire, and so that all may know the high esteem in which he was held by his peers, I am submitting for the record an article about his death that appeared in the Arcata Union.

In this way, we can record for posterity the life story of a man for whom I had a profound amount of respect: A close friend upon whose advice and counsel I could rely; a tall man, with a friendly and warm personality who, like the giant redwoods of our native Humboldt area, stood straight and unbending in his commitment to the principles of life he believed in and used in the philosophical direction of the newspapers he and his family owned; a man of stature and character that related so well to the communities his newspapers served.

Gordon Hadley will not only be missed but genuinely remembered and appreciated for the life he shared with his multitude of friends.

[From the Arcata Union, July 9, 1981]

UNION PUBLISHER DIES; AGE 69; 34 YEARS AT THE HELM

Gordon G. Hadley, publisher of The Union for 34 years, died Tuesday, July 7 at the age of 69. He was born Jan. 15, 1912.

Mr. Hadley began his venture into the newspaper business at the end of the Depression years in 1939 when he purchased The Arcata Union from Robert W. Matthews Sr. With that start, he later formed Hadley Newspapers Inc., purchasing the Del Norte Triplicate in 1962 and the McKinleyville News in 1967.

Although he sold the business to his son Craig in 1972, Mr. Hadley continued to work full-time as president of Hadley Newspapers until four months ago when it was discovered he had cancer.

He is survived by his wife, Monica; his son, Craig; and three grandchildren, Megan, Heather and Ryan Hadley.

A native Arcatan, Mr. Hadley was graduated from Arcata High School, attended then Humboldt State College where he was a star basketball player and later served in the Merchant Marines.

He was an active alumnus of HSU, serving as president of the university's advisory board and was active in the HSU Century Club. Mr. Hadley received the President's Distinguished Service Award at the HSU Commencement exercises in June of 1970.

Mr. Hadley actively participated in community and professional affairs. He served as director and board member of the California Newspaper Publishers Association, was past president and historian of the Ingomar Club and was past president and founding member of the Baywood Golf and Country Club.

He was past president of the Rotary Club of Arcata and had perfect attendance for 30 years. He also was a member of the California Press Association.

Mr. Hadley was an avid outdoorsman, fly fishing for steelhead on the Klamath and regularly making hunting trips to Colorado.

Memorial contributions may be made to the Gordon G. Hadley Memorial Fund for Arcata Recreational Youth Facilities through the Humboldt Area Foundation or may be made to the Shriners Crippled Childrens Hospital, 1701 19th Ave., San Francisco.

Services will be held Friday, July 10 at 11 a.m., Paul's Chapel of the Redwoods, 11th and H Streets, Arcata.

Pallbearers will be Jim Yarbrough, George Yamor, C. LeRoy Starkey, Alistair McCrone, Lawrence Lario, Bob Johnson, Bill Smullin, Charlie Harris, John Judy, Con Daly, Jim Neslis, Ed Carpenter, Ed Goodwin and Merced Wrigley.

Honorary pallbearers will be Homer Balabanis, Jalmer Berg, Howard Libbey, Allen Lehman, Spud McNamara, Walter Warren, Jack Carson, Don Rioworts, George Black, Roy Stewart, Jack Dickinson, Arnold Cooper, Bud Van Deren, Happy Hill, Laurence Allen, Bill Hale, Bill Walker, Bud Ryerson, Curly Emmerson, George Knab, Darrel Norberry, Andy Rossia, Dr. Joe Walsh, Les Westfall, Steve Dolfini, Jack Daly, Dr. William Ashley, Ray Vellutini, Dick Nash and Walter Thoreson.●

CYPRUS ANNIVERSARY

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. ROUSSELOT. Mr. Speaker, this week marks the seventh anniversary of an event that came very close to splitting open the southern ranks of the Western alliance. I am, of course, referring to the attempted military coup by Greek officers and the subsequent Turkish invasion of the island nation of Cyprus.

This event was only the most visible in a series of tensions that had been building for several years between our two closest allies in that region of the world. In a progression of events that strained the ties of NATO as never before, Greece withdrew its armed forces from the organization, and the United States imposed an arms embargo against Turkey. In all, the future course of events seemed very much in doubt.

Today we can look back with a sense of relief that tensions have eased and relations seem once again to be on the mend. On October 28 of last year Greece, the mother of democracy, took her rightful place in the Western alliance as her military was reintegrated into the command structure of NATO. The United States has lifted its arms embargo against Turkey, who reciprocated by reaffirming U.S. usage of military bases in that country. Both countries are beginning to talk of settling longstanding conflicting claims concerning the Aegean continental shelf, and most importantly, the small nation of Cyprus, while still divided and occupied, is at least peaceful at this time.

It is my hope that this pattern of easing tensions will extend to the focal point of the Cyprus issue. Upon independence from the United Kingdom in 1960, Cyprus became a republic with constitutional guarantees for both the Greek majority and the substantial Turkish minority. There was a permanent division of offices on an ethnic basis. Greek and Turkish communal chambers dealt with religion, education, and other social matters. In a spirit of unity and cooperation this plan was agreed to by the United Kingdom, the new Cypriot Government, the United Nations, and both Greece and Turkey.

After an attempted coup in 1974 Turkish military forces invaded the island. In the last 7 years thousands of Cypriots, both Greek and Turkish have been turned into refugees in their own country, losing their homes, belongings and jobs.

President Reagan has stated that his administration is committed to a free and independent Cyprus based on the United Nations Resolution 3212 of November 1974 which "calls upon all States to respect the sovereignty, independence, territorial integrity, and non-alinement of the Republic of Cyprus and to refrain from all acts and interventions directed against it; urges the speedy withdrawal of all foreign armed forces and foreign military presence and personnel from the Re-

public of Cyprus, and the cessation of all foreign interference in its affairs."

Mr. Speaker, the people of Cyprus need, and in fact deserve peace and a chance to heal and rebuild their nation. All foreign forces on that island must be withdrawn. All refugees should be allowed to return to their homes, and the illegal provisional government in the north should be disbanded. As in all democracies, the majority will must prevail, but there must also be guaranteed rights for all minority groups.

This issue must be settled, and quickly, for the future well-being of the Republic of Cyprus, the stability of that important area of the world, and for the good of NATO.●

CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. DERWINSKI. Mr. Speaker, as examples of the great amount of public participation and spirit surrounding the commemoration of Captive Nations Week, I wish to insert several proclamations issued from Governors of States across the country. It so happens that the proclamations, which follow, were issued by former Members of this body:

STATEMENT BY GOV. PIERRE S. DU PONT IN OBSERVANCE OF CAPTIVE NATIONS WEEK

Whereas the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Servia, Croatia, Slovenia, Tibet, Cossakia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, Afghanistan and others; and

Whereas the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations: Now, therefore,

I, Pierre S. du Pont, Governor of the State of Delaware, do hereby declare July 12-18, 1981, as "Captive Nations Week" in the State of Delaware, and urge all Delawareans to offer their prayers and dedicate their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

STATE OF LOUISIANA, DAVID C. TREEN, GOVERNOR—PROCLAMATION

Whereas the United Nations Universal Declaration of Human Rights is being ignored by many of the atheistic communist member signers; and

Whereas these same nations are also ignoring their signing of the human rights provisions of the Helsinki Agreement of 1975, while hypocritically following a deceptive course of world conquest, destroying the freedoms of the citizens of the nations they capture; and

Whereas the State of Louisiana has been a haven for the refugees of these enslaved nations, granting the same human dignity and freedoms to these peoples as the citizens of the United States enjoy; and

Whereas The Congress of the United States of America has passed Public Law 86-90 establishing the third week of July as Captive Nations Week and inviting the peoples of the United States to observe such week with appropriated prayers, ceremonies and activities expressing sympathy for the just cause for all subjugated nations: Now therefore,

I, David C. Treen, Governor of the State of Louisiana, do hereby proclaim the week of July 12-18, 1981, as "Captive Nations Week" in Louisiana, and urge my fellow citizens to observe this week by prayer and by offering personal, moral and spiritual support for the subjugated peoples, in 33 nations and especially, those countries recently purged of their cultural heritage, such as Afghanistan, Nicaragua and Rhodesia.

STATE OF NEBRASKA—PROCLAMATION

Whereas Communist politics have led and continue to lead, through direct and indirect aggression, to the subjugation and enslavement of the peoples of many countries; and

Whereas over the past ninety-two years, millions of immigrants have passed under the torch of the Statue of Liberty to begin a new life of freedom; and

Whereas Nebraskans and millions of other Americans long for the day when all freedom-loving people will once again enjoy liberties which are basic to the right of self-government and the dignity of human beings; and

Whereas the Congress of the United States has established the third week of July each year as Captive Nations Week, inviting all Americans to observe such week with appropriate activities in support of the peaceful liberation of oppressed peoples all over the world: Now, therefore,

I, Charles Thone, Governor of the State of Nebraska, do hereby proclaim the week of July 12th through the 18th, 1981, as "CAPTIVE NATIONS WEEK" in Nebraska and call upon all citizens to join with others to rededicate themselves to the spirit of liberty, thereby giving support to all freedom-loving peoples abroad.

STATE OF MINNESOTA—PROCLAMATION

Whereas the imperialistic politics of Russian Communists have led, through direct and indirect agression, to the subjugation and enslavement of the peoples of many nations throughout our world; and

Whereas the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights, and as leaders in bringing about their freedom and independence; and

Whereas the Congress of the United States, by unanimous vote, passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such a week with appropriate prayer, ceremonies and activities, expressing their sympathy and support for the just aspirations of captive nations: Now, therefore,

I, Albert H. Quie, Governor of the State of Minnesota, do hereby proclaim the week of July 12 through 18, 1981 to be "CAPTIVE NATIONS WEEK" in Minnesota, and have asked Lieutenant Governor Lou Wangberg to prepare this proclamation for my signature and disseminate the same.●

A TRIBUTE TO JOHN PAUL JONES

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mrs. HOLT. Mr. Speaker, on July 21, the U.S. Naval Academy Band played the world premiere performance of the "John Paul Jones March," a musical composition by Prof. Charles T. Gabriele, the band's composer-in-residence. The performance was at a summer concert at Annapolis, Md.

The music is a tribute to the great American naval hero buried in the crypt of the Academy chapel. It was my pleasure to participate in a presentation in which Professor Gabriele dedicated the march to the very fine U.S. Naval Academy Band and its excellent leader-director, Lt. Comdr. Allen E. Beck.

Mr. Speaker, it is indeed fortunate that the medium of music will help perpetuate our national pride for John Paul Jones.●

THE MATTER OF MAX HUGEL

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. HERTEL. Mr. Speaker, an editorial in last Friday's Detroit News discusses the Reagan administrations appointment of Max Hugel to the CIA.

I would like to share this editorial with my colleagues:

[From the Detroit News, July 17, 1981]

THE MATTER OF MAX HUGEL

The resignation of Max Hugel as deputy director for operations for the Central Intelligence Agency (CIA) doesn't end the controversy surrounding his appointment.

Allegations that Mr. Hugel engaged in fraudulent securities transactions as a businessman in the 1970s are embarrassing enough. But how does CIA Director William Casey (also accused of financial indiscretions) explain the appointment of a man with no professional intelligence experience to direct the CIA's clandestine operations division?

Mr. Casey is supposed to have recruited Mr. Hugel, a Reagan campaign operative, believing that his unorthodox style was suited to rebuilding the service. He further reasoned that Mr. Hugel's business connections would assist in developing commercial covers for American intelligence agents operating overseas.

But the professional intelligence community was wary of Mr. Hugel from the beginning. As the CIA's "spymaster," he was responsible for the recruitment of overseas agents, counterintelligence operations, psychological warfare, and the dissemination of information by the agency in foreign lands. The position had always been held by a seasoned professional.

Fortunately, that description aptly fits John Stein, the newly appointed deputy director whose 20 years of experience has won high praise from colleagues and congressional leaders alike. His selection places the division in capable hands.

Yet the question remains how Max Hugel received the job in the first place. While it is an immutable law of politics that campaign staffers receive government posts in exchange for services rendered, it has been customary to pick the best talent available for such a sensitive post.

The White House has reason to be concerned about Mr. Casey's fumble.●

THE LENT SUBSTITUTE TO H.R. 1311, THE NATIONAL TOURISM POLICY ACT

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. EMERY. Mr. Speaker, I rise today in support of the Lent substitute to H.R. 1311, the National Tourism Policy Act. This legislation is an honest bipartisan effort to spur an aggressive national tourism policy, and I urge my colleagues, especially those who represent districts where the tourism industry plays a key economic role, to do the same.

In the State of Maine, for example, recently released employment information generated by the Department of Labor and analyzed by the U.S. Travel Data Center, reflects the tourism industry as the No. 1 employer compared to other Maine industries. Many other States in the Nation boast similar statistics and this fact, in my opinion, warrants an effort to create a more comprehensive and effective tourism policy. How better to capitalize on this obviously important ingredient to our economic stability? The Lent substitute offers the needed alternative.

Too long the U.S. Travel Service has played an ineffective role in shaping tourism policy in this country. Officials charged with the responsibility of attracting foreigners to our shores are in dire need of an upgraded image within the Department of Commerce. This bipartisan proposal changes the name of the U.S. Travel Service to the U.S. Travel and Tourism Administration, and upgrades its administrator to an Under Secretary.

Keeping in line with the President's budget philosophy, the time has come to replace inefficiency with an efficient and necessary organization, to replace the U.S. Travel Service with the U.S. Travel and Tourism Administration. Furthermore, I would like to point out that this proposal is consistent with the administration's budget request of approximately $6.5 million.

Again, I urge my colleagues on both sides of the floor to support and vote for this important bill.●

PRESERVING THE INTEGRITY OF THE CIVIL SERVICE RETIREMENT SYSTEM

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. WOLF. Mr. Speaker, as a member of the House Post Office and Civil Service Committee I have attempted to foster and promote the soundness of the civil service retirement system and insure its integrity. I have long felt that our commitment to career employees in their retirement years must be honored, for the retirement program is an integral part of the whole civil service system from recruitment and appointment through the close of a career of service.

The issue before us today focuses on our determination to preserve the long-range value of Federal civil service.

On two occasions this year I joined with fellow Republicans of our committee, under the able leadership of ranking minority member, EDWARD J. DERWINSKI, petitioning the administration to come forward with a commitment to oppose any future merger or consolidation of civil service retirement with social security.

In addition, I have personally lobbied the administration to come forth and oppose efforts to undermine the retirement system in the future. In response to these petitions, I am pleased to report that the administration has made a public comment and commitment that it opposes mandatory social security coverage for Government workers. I would like to quote at this point in the RECORD a portion of the letter which I received from Max L. Friedersdorf:

I just wanted to assure you that the President explicitly decided that sound National Retirement Policy requires that these two funds be maintained as separate entities.

BACKGROUND

Universal coverage—a proposal to require the enrollment of Federal, State, and local government employees under the social security system—is a proposal which has surfaced periodically since 1936. A number of bills establishing universal coverage in various forms were introduced; however, none of these measures were enacted.

Here are a few of the reasons why I oppose compulsory social security coverage for Federal employees.

Civil service retirement is a contributory benefit of Federal employment. The U.S. Government, as employer, enters a contractural obligation with its employees to share the cost of providing the employee an annuity, upon retirement, based on the length of service and earnings. Universal coverage would violate this contractual agreement by altering both the formula and the benefit calculations for civil service retirement.

Mandatory coverage would unjustly penalize Federal workers who have contributed to and vested in the civil service retirement system.

The inclusion of 2.8 million Federal employees would expand the social security base of contribution by a mere 5 percent in the short run but would mean more eligible beneficiaries in the long run, at a cost which would far exceed the revenues gained.

The Government's cost of administering and funding a jointly coordinated system of retirement and insurance—paying both Federal and postal retirees and their survivors their present benefits while continuing to meet the old-age, survivors, disability, and medical insurance obligations of those presently under the system—would add tremendous cost to the already financially troubled social security system.

Destruction of a fine civil service retirement system would not help the social security program. The merger would cost the taxpayers more, not less.

Social security is an income maintenance program, not a retirement plan, and its benefits were intended to be supplemented by a private pension and/or additional income. It was also designed to provide a broad range of support to the elderly, disabled, survivors' beneficiaries, and medically indigent.

Civil service retirement is an earned annuity, keyed to length of service and earnings. It was intended to provide an adequate retirement income; it was not intended or designed to provide the additional social insurance benefits offered by social security.

The civil service retirement and social security system cannot be effectively integrated because of the inher-

ent differences between the two systems.

Civil service retirement has been a useful tool in recruiting and retaining qualified employees for Federal service. Although pay caps imposed by a series of successive administrations have had the effect of depressing Federal salaries, a sound and viable retirement system has encouraged many workers to stay in Government service.

Universal coverage would rob Federal managers of a valuable tool in personnel management.

Finally, charges that universal coverage would eliminate "disparities" between civil service and other pension benefits are unfounded.

Recent statistics from the Bureau of Retirement and Insurance prove that the pensions of Federal retirees and their survivors are not excessive and do not surpass those of private-sector employees.

As one who represents a congressional district with a high concentration of Federal workers and retirees, I maintain a high degree of interest and concern over Federal personnel problems and policies. I am pleased that the President shares my view on the wisdom and necessity of maintaining the integrity and independence of the Federal civil service retirement fund.

Mr. Speaker, I insert the text of my April 20 letter to the President, the June 4 letter from the Republican delegation of the House Post Office and Civil Service Committee, and the White House reply at this point in the RECORD:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 20, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I concur with the recommendation of my fellow Republicans on the House Committee on Post Office and Civil Service that your Administration not extend mandatory Social Security coverage to Federal employees.

The issue of including Federal employees within the Social Security Retirement System has been considered frequently over the years. Eight times since 1938, Congress has considered and rejected the idea of universal Social Security coverage. In 1977, the Universal Social Security Coverage Study Group concluded a merger of the two systems would not result in any cost savings to the government, in fact, under one option, there would be an increase.

Also, the Congressional Budget Office, in its February, 1981 report, "Pay for Social Security: Funding Options for the Near Term" commented on the option, advanced by the 1979 Advisory Council on Social Security which sought to broaden coverage on an incremental basis; "The Advisory Council's recommendations do not address the administratively complex questions of integrating the two retirement systems' benefit contribution rates. Nor do they consider the potential effects of the Civil Service Retirement fund. With assets exceeding $70 billion in 1981, the Civil Service Retirement fund now appears strong. But without compensatory revenue provisions, incorporating civil service workers into Social Security would diminish the Civil Service Retirement fund's income. The effect of implementing this option would be to transfer part of Social Security's current problem to the Civil Service Retirement System."

The Civil Service Retirement System should continue to be maintained as a contributory staff retirement system, as it was originally conceived. To do otherwise is to ignore a long-standing commitment to Federal employees.

During these times when economic conditions suggest budgetary restraint, you have my support to the maximum extent possible in your efforts to control federal spending. I intend to work with your administration to address the financial problems with the Social Security System. I question, however, whether merger of the Civil Service Retirement System with the Social Security System would have a long-term impact on the financial health of the Social Security program.

Sincerely,

FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON POST OFFICE AND CIVIL SERVICE,
Washington, D.C., June 4, 1981.

Hon. RONALD REAGAN,
Office of the President,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: As the designate spokesman for Republican members of the Post Office and Civil Service Committee and colleagues with a high degree of interest in Federal personnel problems and policies, I am convinced you share our view on the wisdom and necessity of maintaining the integrity and independence of the Federal Civil Service Retirement Fund. We sincerely hope you will publicly affirm and endorse that position.

Federal employees and annuitants assign a high priority to the retention of an unfettered Civil Service Retirement Fund. For that reason, we think it would be highly advantageous for you to make a commitment disavowing any interest in merging the fund with Social Security. It would represent a positive gesture that your Administration is providing Federal employees and annuitants with long-range protection of the Civil Service Retirement Fund.

A White House statement on this issue would make it absolutely clear that your Administration has no intention of reneging on what amounts to a contractual agreement with Federal employees on their retirement security.

Sincerely yours,

Frank R. Wolf, Marjorie S. Holt, Daniel B. Crane, Charles Pashayan, Jr., Tom Corcoran, Edward J. Derwinski, Benjamin A. Gilman, Stan Parris, Gene Taylor, James Courter, Members of Congress.

THE WHITE HOUSE,
Washington, D.C., July 22, 1981.

Hon. FRANK WOLF,
House of Representatives,
Washington, D.C.

DEAR FRANK: This is to clarify our response regarding your continued concerns about the independence of the Federal Civil Service Retirement Fund and the Social Security trust funds, and to assure you that the President explicitly decided that sound national retirement policy requires that these funds be maintained as separate entities.

Please know that we very much appreciate your active interest on behalf of Federal employees and their retirement security. I hope you will not hesitate to contact me should you have any further questions concerning the Federal Civil Service Retirement Fund or the Social Security trust funds.

With cordial regard, I am

Sincerely,

MAX L. FRIEDERSDORF,
Assistant to the President.●

THE UNITED STATES IS STILL THE GREATEST NATION IN THE WORLD

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. RICHMOND. Mr. Speaker, I am sure that my colleagues will all find some thoughtful and thought-provoking comments in a recent speech by Mr. Frank Gard Jameson, chairman of the board of Glenair, Inc., a company that manufacturers airplane parts; and chairman of the board of the Freedom Foundation, a chairmanship he took over when President Eisenhower died.

In his address to the Rotary Club in Los Angeles, Calif., on June 12, 1981, Mr. Jameson took as his theme: "The United States Is Still The Greatest Nation In The World." However, Mr. Jameson's text contains a dismal litany of problems, including decline in U.S. military strength, as well as decline in U.S. economic, industrial, and technical power.

In addition, drawing heavily upon statistics and opinions of Gen. Alton D. Slay, former Commander of the Air Force Systems Command, Mr. Jameson paints a frightening picture of our "national industrial resource and productivity disease."

I am placing in the CONGRESSIONAL RECORD excerpts from Mr. Jameson's most impressive compilation of the problems now confronting our Nation, its industries and, especially, the Congress.

While I do not necessarily agree with every one of Mr. Jameson's statistics and comments, I believe my colleagues will be both interested and challenged by his presentation of the facts and his conclusions.

Excerpts from the address follow:

. . . When an industrialist who makes military hardware says he's going to talk about "decline", it's only natural that his audience would automatically expect him to talk about "military decline".

I'm not going to talk about our military decline at all.

I'm not going to talk about the fact that the overpowering strategic nuclear power

edge we had over the Soviet Union fifteen years ago has vanished.

I'm not going to tell you that during the last decade our armed forces' strength declined 40 percent, while Soviet armed forces strength grew by 25 percent.

I'm not going to mention the fact that during the 1970s, Soviet spending on things related to military research and development, military weapon systems acquisition, and military facilities, exceeded that which we spent on those things by $240 billion dollars.

Nor will I hint at the fact that last year the Soviets spent $50 billion more on these items than did we—an amount larger than the total Army, Navy, or Air Force budget.

I won't burden you down with the statistic that the Soviets now have three times as many engineers engaged in military research and development as do we, nor with the fact that they are graduating six times the number of engineers each year that we do.

And I won't even allude to the fact that the military equipment these engineers are designing is highly sophisticated, reliable and effective, or to the fact that the Soviets are efficient producers and their factories are modern and well equipped.

I do not intend to tell you that they are currently outproducing us in every single aspect of military weapon production.

And I won't try to support such a statement by telling you about the fact that they now outproduce us eleven and one-half to one in armored vehicles and artillery tubes; 18 to 1 in surface-to-air missiles; three to one in attack helicopters; and two to one in submarines, naval surface combatant ships, and tactical fighter aircraft.

Also, I won't try to make anything at all out of the fact that they've introduced three totally new types of ICBMs since we introduced our last one—the Minuteman III—over ten years ago;

And I won't expose the fact that they have deployed over 600 new ICBMs since we deployed our last minuteman III five years ago.

Nor will I trouble you with the fact that they have commissioned over 60 new ballistic missile subs since we commissioned our last Poseidon sub thirteen years ago; nor even with the fact that they're building 30 bombers every year and have built almost 600 bombers since we built our last B-52 twenty years ago.

I won't talk about any of those things today.

But I will talk about another type of decline—the decline of our economic, industrial, and technical power, relative to the rest of the world.

Now any rational discussion of a war has to include, as the very first consideration, the identity of the enemy, you just can't have a war without an enemy.

I have, for years, in all my talks quoted a possum—Pogo of the comic strips:

"We have met the enemy, and he is us".

Today, through our own folly and bad habits, we have contracted a disease—a particularly virulent disease, which is rapidly sapping our strength; a disease that continues to spread because we have lacked the will to combat it.

I speak of our national industrial resource and productivity disease.

I want to talk about the resource part of that disease first.

In past times, we in the United States, have always been proud to believe and to proclaim that we were basically a self-sufficient nation.

The bright side of the coin is agriculture, one farmworker—and that means a farmer, a family helper, or a hired farm worker, feeds 68 people; of those, 48 are in the U.S., and 20 overseas. If you want another comparison, each African and Asian farmer produces an average of 4,409 pounds of raw food products; Russian farmers, 33,059; European farmers, 35,274; and U.S. farmers, 375,000. . . . Here in America . . . this one great industry . . . feeds not only us, but the world, and provides our country with 50 billion dollars worth of foreign exchange to offset some of our 100 billion dollars in oil purchases.

The case for our agricultural self-sufficiency is still strong, but that is the only case that can be made, the OPEC oil embargo showed us all, through long gas lines, just exactly how insufficient we are in that important area, and when we look at our non-fuel minerals position today, the self-sufficiency myth is completely destroyed. In terms of many essential non-fuel minerals, the U.S. is a "have not" nation. . . .

Consider, if you will, the strategic implications of the following dirty dozen facts:

Fact One: We had to import over 25 billion dollars worth of non-fuel minerals last year.

Fact Two: Today, the U.S. is more than 50 percent dependent on foreign sources for 23 of the 40 essential non-fuel minerals we use in the United States: And almost totally import dependent for 12 of the most critical of these; and many of these essential minerals come exclusively from very unstable areas of the world.

And a corollary fact: The Soviet Union is totally independent on foreign sources for all but five of these 40 essential minerals and in none of those 5 are they 50% dependent.

Fact Three: Much of the world's production and reserves of a number of our critical materials are located in two areas of the world: Siberia and Southern Africa. These two areas contain 99 percent of the world's reserves of platinum group metals; 80 percent of the world's manganese ore; 97 percent of the world's vanadium; 96 percent of the world's chrome; 87 percent of the world's diamonds; 60 percent of the world's vermiculite; and 50 percent of the world's fluorspar, iron ore, asbestos, and uranium. Zaire and Zambia alone have 52% of the world's supply of cobalt and currently provide 65 percent of the world's needs and 90 percent of our needs.

Fact Four: OPEC controls only 52 percent of the world's oil supply and the power of that cartel needs no commentary. It is awesome. Third world non-fuel mineral cartels, based on the OPEC example, are brewing. We have already heard strident calls for a "new international economic order" and for the "right to nationalize, expropriate, or transfer ownership of foreign property." In many countries "foreign property" means mines and mineral deposits.

Fact Five: In 1973, in Prague, Leonid Brezhnev made the following comment to Siad Barre, President of Somalia, and I quote:

"Our aim is to gain control of the two great treasure houses on which the West depends. The energy treasure house of the Persian Gulf and the mineral treasure house of Central and Southern Africa." Think what's happened since. Five nations in Central and Southern Africa and about that number in the General Persian Gulf area already under heavy soviet influence or control.

Fact Six: Our national stockpile is grossly deficient in many of these essential minerals—in fact, we are below established goals in 37 critical materials: This shortage amounts to $11 billion or 61% of the desired inventory of $18 billion. And no purchases have been made to add to the stockpile in over 20 years.

Fact Seven: The U.S. could substantially reduce its dependence on foreign sources for raw material through expansion of domestic sources for cobalt, bauxite, chromium, platinum, zinc, fluorspar, gold, nickel, titanium, and many others. And every pound of productive capacity reduces the stockpile requirement by 3 pounds.

Fact Eight: It takes up to 10 years to develop and bring a mineral deposit into production without any federal constraints: But we do have many federal constraints to mining—80 different federal laws administered by 20 different federal agencies constrain mineral exploration and mining operations in the United States.

Fact Nine: As a result of these laws, over 75 percent of the public land in the United States has either been withdrawn or severely restricted from mining and mineral exploration—most of it in the last few years. This equates to an area the size of the entire United States east of the Mississippi River.

And most of that withdrawn land is in the most heavily mineralized areas of the country.

Fact 10: Even when we have adequate supplies of basic materials from friendly sources, we often don't have enough processing capacity. Titanium is a good example of that problem. We have only three companies in the U.S. which process titanium ore and, at maximum capacity, they still fall 20% short of domestic demand.

Fact 11: Moving up to the next industrial echelon, we find another capacity problem. There are, for instance, only three remaining U.S. suppliers of large forgings—the kind we need for aircraft landing gear and engine components. Literally hundreds of foundries were closed in the mid-1970s as a result of very ambitious OSHA/EPA rule making. Those which were able to stay alive had to make substantial investments in anti-pollution equipment which generally did nothing to improve their productivity—51 have closed just in the last two years.

Fact 12: This shrinking industrial base, coupled with increasing demand, not only nationally, but worldwide, for scarce materials, and products made from these materials has resulted in greatly lengthened lead times—as much as 200%—and greatly escalated costs—as much as 300 percent price rise in just the last two years.

Let's switch gears a bit away from resources to the productivity part of our disease.

The United States is dead last in productivity growth rate of all industrialized western nations and our productivity growth rate continues to decline.

According to the Bureau of Labor statistics, while Japan's rate has been increasing annually at almost 8%, and West Germany's at almost 5% for the past 20 years, the United States has been limping along at an average growth rate of 1.5% over that period.

But that's an average. Last year, we had a negative growth rate of 8/10ths of 1%. In other words, we didn't grow at all—our rate went down, not up.

And, based on data through September, it looks now as if we'll see another negative growth rate this year.

If, in the 1970s, we had maintained the 3 percent productivity growth rate we had in the early 1960s, real U.S. output would now be $400 billion higher. Think of the additional jobs that would have generated.

During that same decade, if we had kept a 3% growth rate our exports would have been about $125 billion higher. That alone would have generated over 2 million additional jobs.

There are a lot of reasons for our productivity decline.

One of the most important is low capital investment in modern plant and equipment, and low amounts spent for research and development.

Today the average U.S. plant is 20 years old—eight years older than the equivalent German plant and more than 10 years older than the equivalent Japanese plant.

The U.S. is dead last among industrial countries in investment in new and modern equipment as a percent of the gross national product.

Furthermore, a significant share of the capital investment that has been made in recent years has been for the installation of pollution abatement and health and safety equipment which do not contribute to productivity.

There is a similar picture in R&D investment.

The ratio of our national R&D expenditures to GNP has decreased nearly 24 percent in the last 15 years and much of today's R&D is spent to comply with government regulations—in some industries compliance R&D approaches 40 percent of the total amount spent.

A good indicator of the tangible output of a country's research and development is the number of patents granted. Of the total number of U.S. patents granted in the past 20 years, the percent granted to foreigners has steadily increased from 17 percent in 1960 to 38 percent of the total today.

Another reason for our productivity decline is poor quality of much of the output of our industry.

Poor quality and poor productivity are costing every man, woman and child in the U.S. It's costing the Department of Defense dearly in military preparedness; it's costing American industry dearly in profit and reputation; and it's costing the country dearly in international trade.

In 1960, we imported only 5 percent of our consumer electronic goods. Today we import 51 percent.

In 1960, we imported only 4 percent of our automobiles. Today we import 27 percent.

In 1960, we imported only 3 percent of our metal forming machine tools. Today we import 25 percent.

In 1960, we imported only a fraction of 1 percent of our electrical components. Today we import over 20 percent.

In 1960, we imported only 2 percent of our industrial chemicals. Today we import 20 percent.

In 1960, we imported only 4 percent of our steel, today we import 14 percent.

Those losses mean lost jobs, lost profits, lost taxes, lost opportunity.

Last year our balance of payments for merchandise was $29.5 billion in the red. For the first half of this year, we were $18.5 billion in the red. Oil imports generally get blamed for these deficits, but Japan and West Germany import all of their oil and yet they have a strong surplus of exports over imports. Why are they so different? We're losing our markets overseas, and at home, because we are failing to put out enough high quality products at a competitive price.

Foreign nations are now setting world productivity and quality standards—not the U.S.; and Japan is the leader.

Many people I've talked to about this Japanese phenomenon assert that the reason is the Japanese worker: That he is somehow different from his American counterpart and that we could never achieve the degree of dedication to quality that we see in Japan. That's pure hogwash. The American worker only needs leadership toward quality—it's our management that's failing.

Look at the many cases where businesses in the United States were failing or faltering and Japanese businessmen entered with the key ingredients—leadership, capital from Japan, and attitude—modernized and turned things around.

Look at Quasar, Sanyo, Sony of America, for instance; the facts are clear—remarkable yield improvements—40 to 1 at Quasar for instance—this record achieved with American workers—not Japanese.

In 1976, Sanyo Electric bought a TV manufacturing plant in Arkansas from an American producer. In less than four years they slashed the post delivery failure rate from ten percent to less than two percent. Again, the workforce is American.

In 1972, Sony Corporation set up a consumer electronics plant near San Diego. Today that plant holds the worldwide Sony record for quality—over 200 manufacturing days without a major defect.

Honda of America at Marysville, Ohio didn't have a customer complaint all last year.

"Well interesting," you say; "But what, pray tell, does all this portend?" I'm glad you asked.

For one thing, it portends absolutely nothing good for our economy—unless we get off our backsides.

Just look what Datsun, Toyota and Honda have already done to our automobile industry. And the fault is ours—not Japan's—we did it to ourselves. The Japanese merely stepped into a great market/void—quality autos at a reasonable price.

We pioneered that industry and had a hammer lock on it until a few years ago. But last year, Japan produced more automobiles and more trucks than we did. And in the past ten years, their share of the U.S. market has jumped from 3.7% to almost 20%. And, as I said earlier, the total foreign share of the U.S. auto market now stands at a whopping 27%!

Have you seen the TV ad that shows the "Official" auto of the U.S. Olympic Team? Ford? Chevy? Wrong!! Subaru!

And consider the implications of the recent action of the Ford Motor Company in closing their Mahwah manufacturing facility in New Jersey—idling 5,000 workers—because of, according to the Wall Street Journal, "bad quality".

Consider . . . if you will, the implications for defense of a sick and moribund automotive industry. I can't think of an industry more important to defense than our auto industry—unless it's our electronic industry.

And there's another black spot. Our electronic industry is fast being surpassed by the Japanese. For instance, they gained a toehold in the world's semiconductor markets a few years ago and now seem bound and determined to take it over. They now enjoy 41 percent of the world market in a key component of modern computers—a 16 kilobit random access memory chip.

Why? A combination of high productivity, reasonable price, and high quality.

Hewlett-Packard—an American electronics firm—recently performed a study that illustrates the situation very well.

Semiconductor chips supplied by three Japanese firms were tested and compared with similar chips supplied by three U.S. firms. The failure rate of the best American model was nine times higher than the best Japanese model.

What does all this talk about chips and memory devices mean to us? For starters, we're all dependent on these devices. All of our weapon systems have computers in them—satellites, fighters, bombers, missiles—even the bombs themselves have them.

And I believe that I would be safe in saying that every household represented in this audience owns equipment containing literally dozens of these semiconductor chips—automobiles, TVs, electronic watches, clocks, microwave ovens, speaker systems, tape decks and recorders, phonographs, games, calculators, etc., etc.

I mentioned earlier that we now import over half of the consumer electronic goods sold in this country. Most of these goods come from Japan.

If trends in consumer electronics continue, a lot of a very important segment of our defense industry will dry up, and, in wartime we'll have to worry about availability of sophisticated electronics and microcircuitry for our weapons, as we now do for jewel bearings and mechanical watch movements.

What's in store? More of the same. Let me give you a few more elevator stories to worry you.

Story No. 1: There is currently a great shortage of technically educated professionals and skilled labor in the United States and the forecast is that things will get worse. For instance, the N.S.F. projects an 80% shortage of computer professionals, an 87% shortage of statistical professionals and a 47% shortage of industrial engineers by 1990.

Story No. 2: The forging industry is currently 20% short of its needs for die designers, 18% short in impression die makers, and 13% short of trim makers. They forecast that these shortages will be double to triple those figures within 10 years.

Story No. 3: The tooling and precision machining industry could hire 60,000 journeymen right now if they were available and they say that that shortage could quadruple by 1985.

Story No. 4: In our U.S. universities, foreign students comprise 40% of the total enrollment in engineering at the masters, and 47% at the doctorate degree level. We have almost 80,000 foreign students enrolled in engineering majors in this country. Our current maximum physical capacity is just over 50,000 engineering bachelor graduates per year.

Last year 45 percent of the PhDs in engineering awarded in this country went to foreign students.

Story No. 5: Japan is graduating more engineers in Japan every year than the United States, even though their population is roughly one half of ours.

Story No. 6: In Japan 20 percent of their bachelors degrees and 40 percent of their masters degrees go to engineers vs. 5 percent for engineers at each degree level in the United States.

Story No. 7: Japan is graduating 50% more electrical engineers each year than we do.

Story No. 8: Japan has more consumer electronics engineers than does the United

States and they are expanding while we are shrinking.

They are looking toward the future. We are not. We are sitting complacently on our backside, selling our enemies the rope to hang us with.

I guess what I've been saying to you for the last few minutes is that, in my opinion, we are well on our way toward becoming a second-rate industrial power. That concerns me deeply and it should concern everyone in this audience, and for that matter, everyone in this country.

It is a gross contradiction to think that we can maintain our position as a first-rate military power with a second-rate industrial base. It's never been done in the history of the modern world.

I've talked about some of the direct causes for this sorry situation—poor productivity and quality, strategic minerals availability, a failing educational system, etc. But I haven't yet discussed the underlying root cases. They aren't new. They've been germinating and maturing for a long time.

A complacement, short-term planning, short-term profit oriented industry is one basic cause.

Too little competition in some areas, too much in others is another.

Attractiveness of investment in places like Korea, Ireland, Mexico and the Philippines versus investment at home is still another.

A penchant for liberal arts instead of engineering at too many of our universities is one more.

Too many restrictions and too many negative incentives for investment in mining and modern plant and equipment is certainly a basic cause.

Government over-regulation;

Repressive profit, depreciation and tax policies;

Repressive inflation and interest rates;

On-again, off-again defense budgets; to name just a few disincentives to investment for which Government is mainly responsible.

The biggest question in the world today is whether or not you and I and the other 230 million Americans, care enough for our children's and grandchildren's future, to work every day as hard as we can to change the national attitude, or will we just allow our forefathers dreams to sink like the Titanic as we sit about rearranging the deck chairs, waiting for others to save us. Twenty-three nations before us have lost the political and economic leadership of the world—from Egypt, Greece and Rome, to Germany, Spain, Holland and England. . . .

Is there hope? There is a lot more than hope. This is still the most productive, most powerful nation in the world. Instead of tying Americans down—turn them loose with proper incentives. If U.S. Steel, General Motors, even Chrysler, had the same incentives Japanese and German manufacturers had, we could positively go by them so fast it would look like they were standing still. We are the largest consumer in the world and if we just tucked in our fat gut, instead of spending the inheritance left by our working ancestors and borrowing recklessly from our future citizens, we could bring any nation in the world to its knees economically.

We should tell the Japanese—not ask them—to voluntarily bring our balance of payments into neutral within a year or we would do it for them with laws they certainly would not like.

Instead of rescuing industries with government money after they fail, we should give them the same tools—low interest loans, help in the foreign marketplace, and power that foreign companies have. . . .

What's to be done? Obviously most of these factors are not within the province of most of you Rotarians, and we can do little directly to change them. But there are a few things that we can do and I'll tell you about some of the things I've started.

I talk or write to at least one government official per day. . . .

Explain to people that we must pay for our past mistakes. The country was built on cheap energy, low interest rates and hard work. We must take our medicine, tighten our belts and show the same resolve that our forefathers did. . . .

Take the time to write to the editor or news commentator. . . .

Go to meetings of other groups and let them know how you feel.

In other words, get more active so that you can be one of those to help save America before it is too late.

There are three kinds of people—those that make things happen—those that watch things happen—and those that just sit back and say, "What happened?" Be sure you are in the first group.

Much of the material for this talk was taken from a speech given by my good friend, Four-Star General Alton D. Slay, who was Commander of the Air Force Systems Command, until recently, and given at the Dallas Council on World Affairs. General Slay has given me permission to use his material, without direct attribution, however, I do want to give him full credit for his work.●

NEED TO REFORM THE FOOD STAMP PROGRAM

HON. JOHN H. ROUSSELOT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. ROUSSELOT. Mr. Speaker, it is my strong belief that the food stamp program needs a complete, thorough and prudential reform. Food stamp costs have doubled in the past 3 years and 1 out of 10 Americans (22 million people) now participates in the program.

The original purpose of the food stamp program was to insure adequate nutrition for America's needy families. It was to supplement, not supplant. As it was originally conceived and operated, the program was designed to make sure that a given percentage of a family's income went for food. The combined effect of the current prospective income test and the large deductions from income has been to divert the food stamp program away from its original purpose and toward a generalized income transfer program, regardless of nutritional need. It is rather apparent to me that this program has been grossly liberalized, inadequately monitored and, as a result, has grown completely out of proportion from its origin. By restructuring food stamps to complement other nutrition programs and by targeting funds to those whose low income prevents them from maintaining an adequate diet, significant savings can be achieved while making certain that needy families have the resources to meet their nutritional needs.

The Gramm-Latta amendment to the House reconciliation bill, H.R. 3982, adopted benefit and eligibility changes to eliminate high income recipients and to assure that income is fully, accurately, and promptly reported.

THE GRAMM-LATTA PROPOSAL

First. Establishes a gross income eligibility limit of 130 percent of the poverty level (about $11,000 for a family of four);

Second. Restricts the expansion of income disregards and deductions which excessively inflate benefit levels;

Third. Prorates first month benefits to the actual period for which a recipient is certified; and

Fourth. Uses retrospective income accounting and other measures to limit fraud and abuse.

These changes are necessary to achieve substantial food stamp savings now and in the future ($1.9 billion in fiscal year 1982; $2.5 billion in fiscal year 1984) while maintaining the safety net for truly needy people.

I remind my colleagues that they will be voting on the approval of the conference report on the omnibus reconciliation savings bill, the fiscal year 1982 agriculture appropriations bill, as well as the omnibus farm bill reauthorizing the food stamp program. I would like to urge that they keep in mind the text of over 100 letters I have received from individual, concerned taxpayers from the 26th Congressional District of California. The time is now, Mr. Speaker, to reform the food stamp program in the true sense—reform that will concentrate on and help those who really need it and not on the people who are of adequate income and able to purchase sufficient food for their families. I cannot word it better than my constituents:

I'm one of the 9 out of every 10 Americans who pays for the food my family eats. I estimate that I spend ($125) per week on groceries.

I'm not a rich person. However, I am a hard-working taxpaying one. And I want you to know that I pay for my food with cash. I do not use food stamps and I'm proud of it.

Frankly, I feel that spending $11 billion a year to feed 1 out of every 10 Americans with food stamps indicates that this Government handout is being given to other than the truly needy. And that this is a shameful and dangerously expensive waste of my tax dollars.

As one of your constituents, I urge you to support major reforms of the food stamp program. I'll be watching to see how you vote.●

THE HISTORY OF LEXINGTON, MO.

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. SKELTON. Mr. Speaker, the history of my hometown of Lexington, Mo., has been compiled by a friend of mine, Rev. Donald S. Lintvet. His work on one of America's most historic communities, and one of the early western settlements of our State, is truly an outstanding historic endeavor. From that history, I offer for the RECORD an excerpt which tells of Lexington during the war between the States, which is an example of the thorough research and scholarship of Reverend Lintvet:

LEXINGTON IN THE CIVIL WAR

In 1860, C. F. Jackson was elected Governor of Missouri. Abraham Lincoln had been elected President of the United States, at the same time. Governor Jackson took his seat on January 4, 1861. In his inaugural address, he maintained that "Missouri must stand by the other slave-holding states, whatever course they may pursue." In April, Fort Sumter was fired upon. President Lincoln called for 75,000 troops. Men must now decide to take sides, for or against the national sovereignty of the lawfully constituted Federal authorities. In a message to the legislature on May 3, 1861, Governor Jackson said the President's call for troops "is most unconstitutional and illegal, tending toward a consolidated despotism."

On June 11, 1861, Governor Jackson stipulated, as a vital condition of peace, that no Federal troops should be stationed in or pass through Missouri. The proposition was rejected by the Legislature, a decision which clearly reflected the division of its members into northern and southern sympathizers.

On July 30, 1861, the State convention, by a vote of 56 to 25, declared the state offices and seats in legislature vacant, by reason of their occupants being engaged in "treasonable and armed hostilities against the lawfully constituted federal authorities, and that all legislature and executive acts in pursuance of such treason or armed hostility, pretended to be done in the name and by authority of the State of Missouri, were null and void." On July 31, 1861, Lt. Governor Reynolds, whose office had been declared vacant by the state convention, issued a proclamation which said, in part: ". . . The road to peace and internal security is only through union with the south. Rally to the stars and bars, in union with the glorious ensign of the grizzly bear." (Early in March, the confederate congress had adopted the "stars and bars" as the flag of their confederacy. The state seal of Missouri has two grizzly bear among its emblems.)

On August 30, 1861, General Fremont issued a general order proclaiming martial law, in Missouri. The property of all persons who had taken up arms against the United States was declared to be confiscated, and "their slaves to be free men." (President Lincoln at once annulled this last clause.)

Governor Jackson had appropriated the school fund of the State of Missouri to the arming and equipping of the state troops. To checkmate this action by the Governor, General Fremont, the Federal commander, in Missouri, ordered the funds of certain banks be sent to St. Louis, not for use of federal authorities, but to prevent their being employed to aid the forces of Governor Jackson and General Price. A Lt. Col. H. M. Day was, on September 7, 1861, directed by his commanding officer, T. A. Marshall, at Lexington, to "proceed, without delay, with one company, to take possession of the money in the State Bank of Lexington, and give your receipt for it, and a copy of this order."

Mr. Morrison, then one of the directors of the bank, later with Morrison-Wentworth Bank, stated he had buried the funds, but these were soon surrendered. The cashier, Mr. C. R. Morehead, was afterward censured and dismissed from the service of the bank for being the informant, but he declared his innocence.

The funds taken by Col. Marshall, amounted to $960,159.60, of which $165,650.60 was in gold. Col. Day gave the following receipt:

"Received at Lexington, Missouri, 7th September, 1861, of the Farmer's Bank of Missouri, at Lexington, seven boxes of American gold coin, marked and said to contain each, $20,000, and numbered from 1 to 7 inclusive. Also, one box of foreign and California coin, marked and said to contain $10,659.60; also three bags said to contain $5,000 each, amounting in all by the above estimate, to $165,659.60; also, seven cases of bank note circulation, being the circulation of the Farmer's Bank of Missouri, at Lexington, numbered and said to contain as follows and thus marked: "No. 1, $50,000; No. 2, $50,000; No. 3, $50,000; No. 4, $74,000; No. 5, $100,000; No. 6, $200,000; No. 7, $270,500. Total amount of bank notes circulation being, according to the above estimate, $794,500."

H. M. DAY,
Lt. Col., 1st Cav. Regt., Ill. Vols., USA.

On September 13, 1861, the siege of Lexington was commenced by General Sterling Price. His force had been variously estimated from 22,000 to 28,000, with 13 cannon. Colonel Mulligan, commanding Federal forces, had 2,780 troops, six brass cannon, two howitzers, and forty rounds of ammunition. On September 17th, there was a skirmish at Blue Mills Landing, or Missouri Bottom, in Clay County. A body of Confederates, variously estimated at 600 to 1,000 men, were on their way to join Price, at Lexington. Being pursued by a body of 700 Iowa and Missouri Unionist volunteers, they laid in ambush and were attacked. The Federals lost 16 killed and 80 wounded. The Confederates lost 10 killed and 60 wounded, repulsed their assailants, and then crossed over to Blue Mills, in Jackson County, on the south side of the Missouri, and marched on to Lexington.

The main Battle of Lexington was fought September 18th and 19th. On September 20th, Colonel Mulligan surrendered. General Price honorably recognized the pluck and splendid heroism of his opponents, who were out of both provisions and ammunition and, for two days, had no water except the night dews which settled in their blankets and was wrung out into camp dishes in the morning. He released the privates on parole, but retained the officers as prisoners. Of the Federals, 42 were killed and 108 wounded. General Price reported 25 killed and 72 wounded, from his regular muster rolls. However, nearly half the men there with him were not formally enrolled as soldiers, thus the losses among them could never be accurately ascertained although they were known to have been heavy.

On September 27th, General Fremont left St. Louis with an army of 15,000 infantry, 5,000 cavalry, and 86 pieces of artillery, in pursuit of Price. But Price was too good a general to be caught at a disadvantage and skillfully managed to lead the Federals on wild goose chases all over southern Missouri. Fremonts generals; Hunter, Pope, Siegel, Asboth and McKinstry, commanded some 38,789 men, all of whom seemed to be looking for Price, to give him battle, but he wasn't ready. Instead, he decoyed them into many a long and fruitless march. On October 16th, Lexington was recaptured by a Major White, who released Union prisoners, including two colonels of Mulligan's brigade.

On December 15th, General Pope captured 300 recruits and 70 wagons loaded with supplies going from Lexington to join General Price, who was then at Osceola with 8,000 men. Then followed a series of battles dating from December 18, 1861 to October 28, 1864. Among these battles was the Battle of Pea Ridge, in Arkansas, on March 7-8, 1862, a battle fought by the Confederates to regain a foothold in Missouri, thus it properly belongs to the history of Missouri military operations. The Federal losses were: 203 killed, 972 wounded, 176 missing. The Confederates lost: 1,100 killed, 2,500 wounded and 1,600 taken prisoner. Confederate Generals McCullock and McIntosh were killed and General Buckner was captured.

On October 28, 1864, General Price made another stand at Newtonia, in Newton County, and had a sharp fight with the Federals, but was defeated and escaped into Arkansas. This was the last encounter, that can be called a "battle", within the boundaries of our State.

Colonel Mulligan, after his release, reorganized his regiment and was sent east, where he took part in several battles or skirmishes in western and northern Virginia. He was wounded July 24, 1864 at the battle of Kernstown, near Winchester, and died of his wounds two days thereafter. His wife's brother, Lt. James H. Nugent, was killed while carrying him off the field.●

AMERICAN-BORN PROFESSOR SENTENCED TO SOVIET HARD LABOR CAMP

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. DERWINSKI. Mr. Speaker, according to various underground sources from behind the Iron Curtain, Vytautas Skuodis, also known as Benedict Scott, an American-born Lithuanian geologist claiming American citizenship has been serving a 7-year sentence since December 1980 in a Mordovian prison camp. As of June 15, 1981, Skuodis began a hunger strike protesting the illegal occupation of the Lithuanians by the Soviets and their denial of his American citizenship.

Skuodis was born in Chicago and baptized at Our Lady of Vilnas Church, 2337 West 23d Place, Chicago, Ill. In the 1930's he left for Lithuania.

However, following the end of World War II in the early 1940's Vytautas Skuodis still in Lithuania was caught in the illegal Soviet occupation of Lithuania. Since that time he has been denied his American citizenship by Soviet authorities.

This blatant denial by Soviet authorities to openly ignore Skuodis' American citizenship clearly demonstrates to the free world the Soviet's total lack of respect for human dignity and complete disregard for the basic rights that a political opponent dissenting against the authoritative political machine of Moscow must face.

A more complete biography of Vytautas Skuodis follows:

A geologist claiming American citizenship was sentenced by a Soviet court to 7 years strict regimen camp and 5 years internal exile for "anti-Soviet agitation and propaganda".

The trial of Vytautas Skuodis, also known as Benedict Scott, who was born in Chicago, March 21, 1929, took place in Vilnius, Lithuania, December 15-22, 1980. The U.S. Consul in Moscow requested permission by the U.S.S.R. to attend the trial.

The trial is reported in the samizdat Chronicle of the Catholic Church in Lithuania No. 46, which recently was smuggled out of Soviet Lithuania to the West.

Skuodis was charged under Article 68-1 of the Lithuanian SSR Criminal Code of systematically listening to foreign radio broadcasts, of producing the samizdat journals Perspektyvos/Perspectives/ and Alma Mater, or authoring a 300-page manuscript entitled "Spiritual Genocide in Lithuania," and of writing appeals to then President Jimmy Carter and to the signatories of the Helsinki Final Act allegedly distorting the "reality of Soviet life".

The Chronicle reports that Skuodis refused legal counsel, saying his state-appointed lawyer, a member of the Communist Party, would be unable to represent him objectively, in a political trial such as his.

On October 1, 1980, he requested Soviet authorities for a lawyer from the U.S., to no avail.

During the proceedings, Skuodis defended his work "Spiritual Genocide in Lithuania" as a scientific study, not anti-Soviet propaganda. It concludes that the academic level of atheistic literature in the U.S.S.R. is very low and unscientific.

During preliminary interrogations and during the trial itself, Skuodis is said to have refused to answer questions about his involvement in samizdat activity, especially his role in Alma Mater, geared to students of the 400-year old University of Vilnius.

In a defense speech lasting six hours, Skuodis stated: "I have not transgressed against the state. There is a personal conflict between me and the Party, which places itself above the State.

"Expression of opinion on economic and political questions cannot be treated as a criminal offense. The Constitution of the U.S.S.R. guarantees every citizen the right to free expression of opinion and to criticism."

Skuodis emphasized that he was not allowed to consult with a lawyer in advance and that his notes for his own defense were confiscated and used against him by the prosecution.

The Catholic Committee for the Defense of Believers' Rights, a group of seven Roman Catholic Lithuanian priests/Lithuania is predominantly Roman Catholic/announced the day Skuodis was sentenced, that he had been accepted as the first lay member.

Sentenced with Skuodis under Article 68-1 for alleged anti-Soviet agitation and propaganda were Gintautas Iesmantas and Povilas Peceliunas.

Iesmantas, a 51-year old journalist, was convicted of writing allegedly anti-Soviet poetry, listening to foreign radio broadcasts, duplicating and disseminating samizdat, and propagating secession of Lithuania from the U.S.S.R. in his articles, mainly in Perspectives. He was sentenced to 6 years strict regimen camp and 5 years internal exile.

Povilas Peceliunas/pronounced Pech-e-LYOO-nuhs/, a 53-year old high school teacher of Lithuanian language and literature, was sentenced to 3 years strict regimen camp and 5 years exile for writing articles allegedly slandering the Soviet system and for allegedly editing Perspectives, where they appeared. The journal professes to publish articles which cannot appear in the official press.

VYTAUTAS SKUODIS—PRISONER OF CONSCIENCE—PROFILE

Family: Skuodis' wife, Irena Skuodiene, and two daughters, Giedre and Daiva Skuodyte, reside at Vandentiekio g. 44-4, Vilnius, Lithuania, U.S.S.R. His mother, Elzbieta Skuodiene, lives on Gogolio g. 65-2, Panevezys, Lithuania, U.S.S.R.

March 21, 1929: Benediktas Vitautas Scott Skodzius/Vytautas Skuodis/Born to Peter Scott Skodzium and Elizabeth Markevicitue in Chicago, Illinois/Certificate and Record of Birth Registered No. 13870. Certificate of Baptism at Our Lady of Vilna Church, 2327 W. 23rd Place, Chicago IL 60608/.

1930: Skuodis family emigrates to Lithuania.

1953: Vytautas Skuodis graduates from the University of Vilnius.

1953-69: He works in his field as a supervisor of important geological surveys and hydroelectrical projects in Lithuania, Latvia and Siberia.

1969: Joins the faculty of the University of Vilnius as a lecturer of hydrogeology and geological engineering. His scholarly articles appear in various professional journals. An environmental protection group is founded and chaired by Skuodis at the University.

November 24, 1979: KGB agents conduct an eleven-hour search at the Skuodis residence in Vilnius. Skuodis' uncompleted manuscript Spiritual Genocide in Lithuania, notes, samizdat, two typewriters and a tape-recorder are confiscated.

November 25, 1979: Skuodis issues a worldwide appeal to religious believers and offers his services to the Catholic Committee for the Defense of Believers' Rights in Lithuania. He is subjected to a three-and-a-half hour interrogation.

November 27, 1979: Security policy question Skuodis.

November 28, 1979: Skuodis claims American citizenship in an open letter to President Jimmy Carter.

November 29, 1979: Skuodis joins the Lithuanian Helsinki Group.

December 6, 1979: In an open letter to L. I. Brezhnev, Skuodis demands implementation of rights guaranteed by the Soviet Constitution.

December 31, 1979: Skuodis is dismissed from the University faculty under Article 287-3 of the Lithuanian SSR Labor Code for "amoral conduct".

January 9, 1980: The Skuodis home is searched again. After the search, Skuodis is arrested.

January 1980: The Lithuanian Helsinki Group issues an appeal to L.I. Brezhnev on behalf of Skuodis.

January 14, 1980: United Press International reports the arrest of Skuodis based on information supplied by human rights, advocate Andrei Sacharov in Moscow.

December 22, 1980: Skuodis is sentenced to 7 years strict regimen camp and 5 years internal exile under Article 68-1 of the Lithuania SSR Criminal Code for "anti-Soviet agitation and propaganda". The Catholic Committee for the Defense of Believers' Rights announces that Skuodis has been accepted as the first lay member.●

A TRIBUTE TO JOHNNY GOYEN

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. LELAND. Mr. Speaker, I wish to pay tribute today to city of Houston Councilman Johnny Goyen, who has decided to retire from public service after 24 years of distinguished performance. I want to call to the attention of my colleagues an article from the Houston Post on July 12, 1981 by Tom Kennedy.

Johnny Goyen has served the city of Houston longer than anyone else. Houston has grown tenfold since he was first elected, and he played a significant role in that growth. Johnny Goyen is known as a friend of the policeman in Houston, a reputation that he is proud of.

Councilman Goyen has been one of the most consistently popular elected officials in the Houston area all through the years. His presence on the city council will be missed by many.

For these and many other reasons, Johnny Goyen is worthy of commendation by you, Mr. Speaker, and by all of my colleagues.

[From the Houston Post, July 12, 1981]

GOYEN PACKING AWAY 24 YEARS OF MEMORIES

(By Tom Kennedy)

As Johnny Goyen recalls his nearly 24 years around the horseshoe-shaped table where the Houston City Council makes decisions twice a week, he sometimes thinks of all he has to remember.

He remembers when he first took office in 1958, when only about 1.3 million air passengers flew through his native beloved city. That was the first year he served in elective office—after waging a campaign that cost $3,500, including the financing of two pairs of shoes.

Today those figures have multiplied by factors of 10. Houston has grown, and the man who has served on City Council longer than anyone else in history doesn't have as much fun as he did back when Houston was a city of about 800,000.

Goyen, 60, has not lost an election since the year 1941 when, as a University of Hous-

ton student before World War II he ran his first "at-large" race for the UH Student Council.

"I lost the UH election by 10 votes out of 900 cast," Goyen recalled last week, sitting at the same desk in the same office he has occupied at City Hall for 23½ years. "It taught me that it hurts to lose. I learned from that, that if you want something bad enough, put a little effort into it."

That fateful night more than 40 years ago his dear friend Jack Valenti—who would go on to become a trusted aide to President Lyndon Johnson and now serves as president of the Motion Picture Association of America—got the early returns at UH and phoned Goyen the bad news.

With that disappointment firmly implanted in his mind, Goyen, who eventually became chief clerk of the Municipal Courts in Houston, decided to run for City Council about two minutes before the 1957 midnight filing deadline.

He spent $3,500, mainly for push carts and two pairs of shoes, one black and one brown, both of which he used to walk all over town—through bowling alleys, restaurants and bank lobbies to urge people to cast their ballots for Goyen.

Goyen smiled as he recalled the memory and carefully fingered a memento of his November 1963 campaign for his Position 3 at-large seat. It was a yellowed piece of school paper addressed to "Nana," the name his two sons called him. It said, "Nana. Go . . . you will make it. Bobby."

"Now Bobby is 24 years old," the silver-haired Goyen said. "He doesn't remember when I didn't go to City Hall."

When that long-established habit ends Jan. 1, Goyen will spend full time with his real estate business, Bobby Goyen is getting his real estate license now while the older Goyen son, Johnny III, 32, is an FM radio disc jockey.

"Use to, people would ask him if he was related to Johnny Goyen the city councilman," Goyen said. "Now they ask me if I'm related to Johnny Goyen the disc jockey. It shows there's a new generation coming up. He's probably got a bigger following than I do right now."

The elder Goyen said the fun has been taken out of being a city council member, a feeling attributed mainly to what the considers needless harassment by federal officials during grand jury inquiries of recent years. At times, the veteran councilman said, it seemed he talked more with his colleagues about going to the Federal Building than about city business.

"It hasn't been the fun that it used to be," he said. "When you are called to the 'Funny Building' on matters you vote on, you wonder why you're called, and you know that you've not done anything wrong other than vote on what you think was right. That does have a tendency to take some of the fun and humor out of it."

Goyen remembers a pledge of the late Mayor Lewis Cutrer to establish expanded surface water supplies for the city in the early '60s, a commitment requiring touchy night meetings with citizens of the small towns up and down the Trinity River.

Cutrer and his councilmen, including Goyen, successfully convinced those people the establishment of Lake Livingston and Lake Conroe as surface water supplies for Houston was a decision beneficial to all concerned.

That decision and another to begin construction of Houston Intercontinental Airport during the administration of Mayor Louie Welch strike pleasant beats in Goyen's heart.

But he also recalls his undying support of Houston police officers as his greatest thrill and, alas, his greatest disappointment—one which clouds his political retirement.

Goyen always has supported the most minute cause of the police, going back to his early concern, in 1960 or thereabouts, for the comfort of patrol officers who wore scratchy, woolen shirts all year.

Back then, Goyen said, he approached Cutrer and pointed out Houston's tropical summers hardly are suited for wearing uncomfortable, long-sleeved uniforms. He urged the mayor to get cotton shirts for all officers.

"That's when cotton shirts came in for summer," Goyen said with pride. "I don't know if too many police officers around now remember that. But some of them do. Some of them are still on the force who remember that."

Goyen has supported virtually every police pay raise proposal, and one of his pet projects has been the infirmary at the Police Department.

Despite this devotion to police matters, Goyen—in an action he considers his greatest disappointment in office—was snubbed by the Houston Police Officers Association when it made political endorsements in the 1979 city elections.

"That was the first year the HPOA endorsed candidates," he said. "And they ignored even inviting me over for an interview and then endorsed the sister of one of the members of their screening committee, which hurt, was unfair."

And, said Goyen, it made him more empathetic "when citizens come before council saying they haven't been treated fairly by police. I can relate to that with some members of the police force because I've always backed pay raises."

Although Goyen missed winning reelection by about four tenths of a percent in the November election, he went on to defeat Olga Soliz in a runoff.

He spent about $35,000 to win that, his last election—10 times what he spent in 1957—and during his last term has served as Mayor Jim McConn's appointed mayor pro tem.

Goyen last saw his friend Valenti about two weeks ago and told him of his plans to forgo the filing deadline this October. "He told me, 'Being on the outside is not like being on the inside. Believe me, I know.'

"I told him: I want to work for Johnny Goyen now. I want to spend some time with my family."

Already cleaning out his office in preparation of leaving, Goyen is coming across many mementos of his years in office, items he will be reminiscing about with his wife Jody in the months after he officially leaves City Hall.

But perhaps his most cherished memories will come in the friends he has made—especially those, such as Councilman Ben Reyes, he initially didn't expect to make and maintain when the council expanded to 15 members for his last term.

As he sat in his office looking from the past to the future last week, he said he hopes his influence during his 24 years of service will not easily be forgotten.

"I don't want to sound corny," the mayor pro tem said, "but I have tried my best to be fair to all people while acting as a member of City Council. I think 'fairness' would be the word I would want to be remembered by. There are some people who may dispute that. I would hope they would be in the minority."●

GUN CONTROL IN SWITZERLAND

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. RODINO. Mr. Speaker, there was a recent reference in the CONGRESSIONAL RECORD to the low rate of gun-related crimes in Switzerland and the fact that the entire Swiss male population between the ages of 20 and 50 is in the military reserve and required to keep rifles at home. They may carry them wherever they want, so long as they are not used for criminal purposes.

From this it was deduced that national gun control laws are not the answer to our frightening crime rate.

I have introduced legislation that would place modest restrictions on the manufacture, sale, and purchase of handguns. I make no claim that this legislation would be the solution to our crime problem. I do believe, however, that it might keep handguns out of the possession of at least some criminals, sick persons, and would-be assassins.

I was curious, however, about the state of the law in Switzerland. The Swiss Embassy here in Washington has graciously provided me with a two-page summary that it entitles, "Gun Control in Switzerland." It reveals, for instance, that military authorities keep an exact record of all military rifles and pistols kept in the homes of Swiss militia members. It also reveals that, although there is no national gun-control law, all the cantons (states) have restrictions and that there is an intercantonal "concordat" on controls to which all cantons are parties. This pact requires licensing of all who sell firearms or ammunition and licensing of buyers, with restrictions on those who can be licensed. Dealers must keep detailed records of each sale.

In addition, some cantons require a special permit to carry and transport firearms.

Mr. Speaker, the summary provided me by the Swiss Embassy follows. It seems to me the Swiss have rather substantial gun control, far stricter than my proposals.

GUN CONTROL IN SWITZERLAND

1. All male Swiss citizens incorporated in combatant militia units are taught how to shoot, beginning at age 20 with basic military training. Rifle clubs teach younger men how to shoot in voluntary preparatory courses.

All combatant militia troops (ages 20 to 50) are permitted to keep their personal weapon and ammunition at home.

The military authorities keep an exact record of all military rifles and pistols kept in the homes of Swiss militia members.

2. There are no federal firearms control laws in Switzerland. Enactment of such laws and rules are under the jurisdiction of the Cantons (States). There exists however an intercantonal "Concordat" concerning the sale of firearms and ammunition approved by the Swiss Federal Council on July 20, 1944, to which all cantons have been parties since May 1, 1961. This "Concordat" in essence provides:

(a) That whoever sells firearms and ammunition commercially requires an authorization (firearm-sale permit) issued by the competent authority of the canton where the business is domiciled;

(b) Commercial sales of handguns (i.e. pistols and gasguns) are only allowed to persons presenting a duly signed "firearms purchase certificate" issued by the competent authorities of the canton where the purchaser is domiciled;

(c) Such purchase certificates are not issued to persons under 18 years of age, to mentally ill or deficient people, to persons under interdiction, to habitual drinkers under protective guardianship as well as to different categories of persons with a criminal record;

(d) Persons authorized to sell handguns and gasguns are required to keep detailed records containing the date of sale, the exact personal data of the purchaser, the number, issuing authority and date of the "purchase certificate" as well as the type and factory number of the firearm.

Under the provisions of the "Concordat" it would appear that whereas the commercial purchase of handguns and gasguns is subject to the presentation of a "firearm purchase certificate", this requirement does not at present extend to the purchase of rifles and shotguns.

A number, but not all cantons have subjected the carrying and transportation of firearms to the issuance of a special permit. Some cantons have regulated the carrying and transportation of all firearms, while others regulate only the carrying of firearms as well as pointed weapons.

The "Weapons Rules" of the Canton of Zurich, which regulates the trade in weapons and ammunition as well as the carrying and owning of weapons, and is representative of other cantonal rules, subjects the carrying of handguns, gasguns, pointed weapons (such as daggers, etc.), blunt weapons (such as knuckledusters, etc.), as well as the transportation of these weapons in public transport facilities to a personal permit (weapon permit), valid up to 2 years, if danger to the applicant's person or property can be substantiated. Private ownership of machine pistols, machine guns, explosive weapons (i.e. hand grenades and bombs) as well as weapon simulating articles of daily use, is prohibited.

Persons authorized to carry weapons under these provisions do not appear to require a special license to use these weapons.

3. Belonging to the Militia is a duty.

4. A militiaman who uses his military weapon and ammunition in self-defense to defend his or his family's life when not on active military duty, while infringing the service regulation concerning the unauthorized use of his emergency ammunition ration, would face no conviction under military law if no charges are held against him under civil criminal law.

5. A militiaman who used his military weapon for unauthorized and improper purposes may, under military criminal law, be sentenced to prison or, if the offense is of small gravity, be punished by a disciplinary action.

6. Under the Swiss Federal Criminal Code penalties for armed robbery, assault with a deadly weapon or killing someone during the course of committing a felony may vary from confinement in the penitentiary for one year up to a life sentence. It is not the use of the weapon as such, but the aggravating circumstances created by the perpetrator's willful and criminal intent that determine the imposed penalty.

7. Switzerland has still what could be termed a minor crime rate.

8. Accident rates involving guns are very small.●

H.R. 4230, THE COAL PIPELINE ACT OF 1981

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. UDALL. Mr. Speaker, yesterday my colleagues, Mr. HOWARD, Mr. LUJAN, Mr. CLAUSEN, Mr. MCCOLLUM, Mr. FUQUA, Mr. GIBBONS, Mr. BREAUX and I introduced the Coal Pipeline Act of 1981. The bill would increase competition for transporting coal by making eminent domain authority available to slurry pipeline carriers, as it is currently available for other types of pipelines and railways. Although coal is a relatively cheap fuel, the cost of transporting it by rail amounts to about 50 percent of its delivered price. It is time to let slurry technology compete with rail transportation on an equal footing to help drive down the cost to American consumers of energy generated from coal-fired powerplants.

It is imperative that we move quickly to replace imported oil with domestic coal as an energy source. Energy produced in a coal-fired powerplant is half the price of energy produced with gas, even taking into consideration the cost of air quality control equipment. The cost of oil is now roughly three times the cost of coal in the United States, and the unpredictable supply and pricing policies associated with imported oil should not be suffered by this country any longer.

Abundant supplies of coal will not contribute to energy security in this country if transportation systems to move it from mine to powerplant are inadequate. It is clear that the railroads will continue to be a leading transporter of coal, but in many areas of the country coal is not even considered as an alternative fuel because there are no rail tracks to transport it. Coal slurry pipelines should aid this country's fight for energy independence by serving areas which would otherwise have no choice but to buy expensive oil and gas. The recent deregulation of the railroads is evidence that Congress believes in the competitive health of the railroads, and slurry pipelines competing for routes with railroads will keep rates down in furtherance of congressional goals.

I want to emphasize that the legislation we are introducing today was written by the coal slurry industry and this is their proposal for consideration by the Congress. I do not necessarily agree with all the positions represented by the bill and will want to give careful study to certain important issues when the bill is subject to hearing scheduled by the Interior Committee, July 30.

This bill does not set up a complicated regulatory process for accomplishing its purposes. Rather, it simply authorizes slurry pipeline carriers to apply for rights-of-way to construct pipelines to move coal, using mechanisms already in place in the Federal Land Policy Management Act and the Interstate Commerce Act. It preserves the States' unqualified rights to appropriate, use, and regulate its water. I urge my colleagues to give this bill careful consideration in light of our country's policy on energy security and the Federal role in stimulating coal development.●

HARRY CHAPIN

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. DENARDIS. Mr. Speaker, 1 week ago today, America lost one of its most talented and compassionate citizens when Harry Chapin was killed in a tragic automobile accident in New York. Harry, singer, songwriter, and founder of World Hunger Year, was a tremendously warm and caring man. I am particularly grieved by his tragic death because he was to have performed at the Oakdale Summer Theater in Wallingford on Monday, Tuesday, and Wednesday of this week. It was to be Harry's seventh season at the Oakdale, and each year he has donated the proceeds from one of his performances to his causes—the fight against world hunger. Harry would annually entertain his many fans in my district with his down-to-earth, storytelling style. After each show, Harry would meet with his audience on the grounds of Wallingford's quaint theater-in-the-round to chat and sign programs, T-shirts, and his poetry books. No one was ever denied, and the profits made on his concessions went to his World Hunger Organization.

This warm, compassionate, human being had a genuine concern for those on this Earth who do not share in the fruits of life; the basics that we too often take for granted. I hope that his unselfish lifestyle has taught all of us

a valuable lesson. We must recommit ourselves to Harry's goal of ending world hunger. Now that Harry is gone, we must not let his dream die.●

WHEN WILL CONGRESS STOP WASTEFUL PROJECTS?

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. PORTER. Mr. Speaker, the American people have made clear to all their elected Representatives that they want wasteful Government spending ended and ended now. There are many examples of waste that come to mind, but perhaps three of the most evident and largest are the Tennessee-Tombigbee Waterway, SRC I, and the Clinch River breeder reactor.

The Washington Post put its finger on the problem of waste with an editorial published yesterday dealing with these three projects, and I share it here with my colleagues. We will find out soon whether the House has the courage to follow the dictates of the American people and of their own consciences or whether it will continue to be business as usual.

THREE THAT DESERVE TO LOSE

Three very large government projects—the Tennessee-Tombigbee Waterway, the Clinch River breeder reactor and SRC I (the solvent refined coal project)—come before Congress this week. All richly deserve to be defeated.

What else do these projects—a canal connecting the Tennessee to the Gulf of Mexico, a breeder reactor demonstration plant, and a plant to make solid and liquid fuels from coal—have in common? All three are to be paid for entirely or largely from federal government funds. All have incurred immense cost overruns beyond expenses due to delay and inflation. All are way behind schedule. All are extremely expensive—between $3 billion and $4.5 billion. And none of the three makes economic sense.

It took 25 years from the time the Tenn-Tom was first authorized for Congress to become sufficiently persuaded of its merit to appropriate money for it. Congress was right the first 25 times. The canal's cost has ballooned from about $300 million a decade ago to $3 billion, but less than 20 percent of its projected benefits for the last five years actually materialized. Nearly everything else about the project is uncertain, including where the canal could sensibly end, which direction barge traffic on it will travel, who would use it and for what, and whether the benefits would ever exceed the costs of construction.

Since Clinch River was first proposed, the rationale for plutonium breeders has evaporated. Only a large and growing number of traditional nuclear electric plants, using up the available uranium fuel, would offset the breeder's greater cost and make it economically competitive. But in the last few years projected nuclear demand has plummeted, estimates of uranium availability have risen sharply, and the price of uranium has dropped. Meanwhile, the cost of the Clinch River plant alone has risen fivefold—to $3 billion—and construction has not even begun. Utilities lobby strongly on Clinch River's behalf, but do not put their money behind it: the private share of the cost is now down to 9 percent. European breeder programs, including the most ambitious in France, are on hold or being reevaluated.

The SRC I project is the youngest of the three, but it may already have set the record for cost overruns: up 99.8 percent in 18 months. As in the case of Clinch River, the government would bear most of the costs—up to 97 percent, depending on how successful the project is. The revenues now being projected by the principal contractor assume that the solid and low-grade liquid products will sell at the equivalent of oil priced at $76 a barrel, which is very unlikely. The project suffers from a number of basic design flaws.

None of these projects will yield benefits commensurate to the government's investment. Some may yield none at all. Termination would be the best choice even if there were plenty of money available. But at a time when badly needed government programs are being cut to the bone, their presence in the budget is an affront.●

OFFICE MANAGEMENT DEMONSTRATION AND TRAINING CENTER OPENED

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. HAWKINS. Mr. Speaker, on behalf of the Committee on House Administration I am pleased to announce the opening of the Office Management Demonstration and Training Center.

The Center is located on the first floor of the House Office Building Annex No. 1, and is accessible through the C Street entrance. The Center provides a convenient location to display examples of up-to-date computer equipment which is on the House Approved Equipment List. A highly trained staff is available to demonstrate to Members and employees how best to use this equipment and the wealth of information which can be accessed through it.

The Center's staff can show how computer technology relates to specific job functions in a congressional committee, or House support office.

Training classes on computerized information systems will be offered in the training facility located at the Center, as well.

The Office Management Demonstration and Training Center will show how computer technology can:

Help offices manage and answer incoming and outgoing correspondence, and perform specialized mailings;

Help offices prepare a variety of documents, such as speeches, news releases, reports, and so forth;

Help offices manage the problems associated with storing constituent mail and other office files;

Be useful as a research tool through access to computerized information on the Member information network, including the status of legislation (LEGIS), House Floor action (SOPAD); the Federal budget (MBIS); grants information system; Federal laws (JURIS); and topics of interest to Congress and other information in the Library of Congress (SCORPIO).

Help keep track of daily schedules, by storing and retrieving information about meetings, appointments, and other events; and help to coordinate district and Washington schedules;

Help offices to speed up communications by sending and receiving messages via computer on the electronic mail system.

The Center is open to Members and staff from 8:30 a.m. to 6 p.m., Monday through Friday, and demonstrations and other assistance will be available on both a scheduled and walk-in basis.

I encourage my colleagues to take advantage of this service. For more information, please call the Center at extension 5-0542.●

ECONOMIC POLICIES AND BLACK PROGRESS: MYTHS AND REALITIES

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 1981

● Mr. LELAND. Mr. Speaker, the National Urban League this week released a report assessing the effectiveness of Government programs on the economic condition of black Americans. The major finding of this important new study is that more than two-thirds of the black poor have moved from poverty in the past 20 years as a direct result of certain Federal social programs.

A further result shows that poor blacks have not been locked into a permanent state of poverty as a result of these programs, but in fact 90 percent of this group have enjoyed improved economic health. This is a timely and significant study that clearly refutes the absurd claims of the Reagan administration.

I want to share a summary of this report with my colleagues:

ECONOMIC POLICIES AND BLACK PROGRESS: MYTHS AND REALITIES

(By Robert B. Hill, National Urban League Research Department)

MAJOR FINDINGS

1. Low-income black families are not overdependent on government aid. Three-fifths (58 percent) of all poor blacks receive benefits from no more than two of the seven major programs for the poor. And while

one-fourth of black families are currently on welfare, only 7 percent are completely dependent on it.

2. Contrary to popular belief, most low-income blacks are not "locked" into a permanent state of poverty and dependency. Of the blacks who had been poor at any time (66 percent) during 1967-75, only one-tenth (7 percent) remained poor throughout those 9 years.

3. The black "underclass" did share in the economic advances of the '60's and '70's. Two-thirds of them were lifted from poverty between 1967-75, primarily as a result of government programs.

4. Blacks have made their most significant gains as a result of targeted government efforts, in such areas as health, nutrition, education and employment. But they have made least progress under decentralized block grant programs with little federal oversight.

5. Help from relatives contributed more to the economic well-being of black female-headed families than welfare. Income from kin accounted for one-third (34 percent) of the change in the total income of female-headed black familes, while public assistance accounted for only 13 percent.

6. "Middle-class" and poor blacks have a high degree of convergence in their racial attitudes. The overwhelming majority of both middle-income (70 percent) and low-income (61 percent) blacks feel there is "a great deal" of discrimination today.

7. The gap between "middle-class" and poor black families appears to be narrowing rather than widening. Female-headed families increased 10 times faster among college-educated (308 percent) than grade school-educated (32 percent) black women between 1970-79.

8. The overwhelming majority (80 percent) of "middle-class" black men come from lower-status backgrounds. Only 18 percent come from "middle-class" origins, while 40 percent come from working-class backgrounds and 23 percent moved up from the "underclass."

SECTION SEVEN

CONCLUSIONS

At the outset of this study, we asked, "What kinds of policies and programs are needed to significantly enhance the social and economic conditions of blacks during the 1980's?" In order to properly answer this question, we felt it was necessary to systematically assess the effectiveness of past and current policies on the economic well-being of blacks.

We sought, therefore, to determine the empirical validity of much conventional wisdom about the efficacy of government policies on behalf of blacks and other economically disadvantaged groups. One belief that has become increasingly accepted is that the blacks who made the greatest progress in recent decades were these from college-educated or high-income "middle-class" backgrounds and their gains were primarily due to a significant decline in racism and not because of government actions. At the same time, according to this view, government intervention has not touched the black "underclass," who remain "locked" in a state of self-perpetuated poverty and dependency that is growing larger. This perspective is best illustrated in Gershman's analysis of black progress:

"But it has benefited, at best, two-thirds of the black population, divided almost equally between middle-class and working-class blacks. The bottom third has not only failed to participate in the progress of the last 15 years, but its social and economic condition has deteriorated to an alarming extent . . .

"The black underclass in the ghetto has been expanding at precisely the same time as the black middle class has also been expanding and moving ahead . . .

"Though the problem of the underclass has grown more intractable and has, in fact, been brought more sharply into focus by the 'deepening schism' in the black population, there is no greater readiness now than there was 15 years ago to acknowledge its true character."

But, as our study has shown, the black "underclass" has participated in the economic advances of blacks over the past two decades. Two-thirds of them were lifted out of poverty, primarily because of government economic support programs. And the greatest gains were not made by "middle-class" blacks, but by blacks from working-class and "underclass" origins. For example, while the proportion of college-educated black men in higher-level jobs rose by only 2 percentage points (from 76 percent to 78 percent) between 1960 and 1979, the proportion of black men with only an elementary school education moving into higher-level occupations soared by 11 percentage points (from 16 percent to 27 percent). Moreover, while the number of poor blacks did increase during the '70's the proportion of all black persons who were poor declined (from 34 percent to 31 percent)—because the number of non-poor blacks increased at a faster rate than the number of poor blacks. Furthermore, the gap between middle-income and poor blacks appears to be converging, rather than widening, because of some downward mobility among "middle-class" blacks. While the number of black families headed by women with elementary school education rose by only 32 percent between 1970 and 1979, the number of black families headed by college-educated black women soared 10 times as fast (i.e., by 308 percent).

What accounts for the discrepancy between the widely held view of a permanent "underclass" falling farther and farther behind an expanding black "middle-class" and the empirical reality of a changing "underclass?" A major reason for this difference is the failure of many social scientists: (a) to view poverty and dependency, especially among blacks, as dynamic, rather than static, and (b) to adopt a life-cycle perspective in the analysis of economic change. Both of these methodological deficiencies by most analysts of black economic well-being are largely due to their over-reliance on cross-sectional, rather than longitudinal data.

Cross-sectional data tend to provide a static perspective, since they can only measure the economic well-being of individuals and families at one point in time. Thus, they are not useful in systematically determining: (a) the nature and degree of economic change for the same individuals at different points in time and (b) the factors and processes that contributed to that change. Longitudinal data, on the other hand, provide a dynamic view of economic conditions because they are able to follow the same individuals over time. This superiority of longitudinal data over cross-sectional data was underscored by Lane and Morgan in describing the University of Michigan's Panel of Income Dynamics:

"The panel survey thus has produced a large and unique body of data useful for answering some major questions about the dynamics of income distribution. First, the data provides a description of such items as the amount of variation in the income of families through the years, the types of families whose economic status does and does not change and the amount of change in the composition of the poverty population. In addition, panel data have several advantages for explaining the causes of change, most existing causal analysis is based on comparing people at different income levels at a single point in time to determine what factors may account for past changes in their economic status. But such analysis cannot examine change itself because it is not based upon observations of the same individual at two different points in time. A panel study permits the direct measurement of change and provides information on the time sequence of different events so that causes and consequences of change in economic status can be more distinguished with more accuracy. While these features of a panel study do not solve all the problems of analyzing the causes of change, they provide considerably better information than that available from analysis of cross-section surveys."

"MUSICAL CHAIRS" PHENOMENON

Consequently, over-reliance on cross-sectional data obscures the significance of the "musical-chairs" phenomenon. This popular parlor game involves having a fixed number of chairs with different people occupying them at various points in time. Cross-sectional data tend to lead many analysts to infer that because the size of a group (such as the black "underclass") has remained virtually unchanged (or has even increased) at different time periods, that the same people belong to those groups at different points in time. However, longitudinal data reveal the occurrence of "musical chairs": that while the size of the group has remained virtually the same, their places have been taken by different people. Thus, the persons in the "underclass" category at one period of time may differ significantly from those persons in that category at another period of time.

In short, the composition of the black "underclass" and "middle-class" is constantly undergoing change. Based on longitudinal data and other analyses, we contend that a more accurate description of the economic changes among blacks over the past two decades would be as follows:

"Significant numbers of 'underclass' blacks moved up into the 'working-class,' while sizable numbers of 'working class' blacks moved in the 'middle-class.' At the same time, many members of the 'middle-class' moved down to the 'working-class,' while sizable numbers of the 'working-class' moved into the positions that had been vacated by the upwardly mobile 'underclass.'"

The most encouraging aspect of such economic patterns is that it has been possible for thousands of black individuals to move out of very impoverished conditions. But the most disheartening fact is that: (a) there are so many other blacks moving down to take the positions they vacated and (b) that it is very likely that they may be returning to those lower-level positions themselves some time in the near future. Thus, while there has been much upward mobility among blacks, their economic advances tend to be precarious and unstable. Yet, although "low-income" is a more enduring status for most blacks, poverty and dependency are not.

THE LIFE-CYCLE PERSPECTIVE

The second major impediment to a clearer understanding of economic change among blacks is the failure of many analysts to adopt a life-cycle perspective. Longitudinal studies also reveal that families have significantly different needs at different stages of their life-cycle because of constant changes in those families with regard to: number of members, ages of members, employment status, health status, etc. Thus, they are more dependent on external support from relatives, friends or public and private agencies at certain stages of their life-cycle than at others. Cross-sectional data provide a glimpse of their degree of economic dependence or independence at only one point in time in one life-cycle, while longitudinal data permit one to view the change in their degree of economic dependence at various points in time during many different life-cycles. Since the University of Michigan's panel study has been following 5,000 families over 10 years, it provides unique insights concerning the short-term and long-term aspects of poverty and dependency. For example, families headed by black women tend to be more dependent on support from relatives and from public agencies when they are in a life-cycle with very young children under six than when they are in a life-cycle when all of their children are over 18. Different economic policies are needed at different life stages of families.

Our study has indicated that the popular generalization "government programs have not worked for most poor blacks" needs to be significantly modified. First of all, it is true that most government programs for the poor have only reached a fraction of those who needed them. But the record shows that those low-income blacks who were reached did benefit from most of them. But one must clearly distinguish between programs. Some, such as those in the areas of health, nutrition and education, were much more effective than others, such as those in the areas of housing, tax incentives to businessmen to hire disadvantaged workers, and block grants to states and local areas.

In fact, past experience with block grants—a "new" strategy being proposed by President Reagan—has indicated that they are very ineffective and inefficient vehicles for meeting the needs of economically disadvantaged groups. Evaluations of past block grant programs (such as ESEA, CDBG, Title XX, LEAA and CETA) have revealed that large numbers of the poor were not being reached or adequately served by these programs, since a sizable portion of the funds was distributed to areas that has little need for them. Studies of the use of Community Development Block Grants, for example, have uncovered numerous instances of communities using the funds to build tennis courts and swimming pools rather than more low-income housing. Findings from evaluations of Title I of the Elementary and Secondary Education Act (ESEA) block grant revealed that:

"While federal aid is available only to local educational agencies serving areas with high concentrations of poor children, the funds may be used to assist any student who is "educationally deprived" regardless of family income. Although the intent of avoiding income segregation is laudable, the provisions of the law have created grave obstacles to the effective monitoring of the use of Title I funds at the local level. A recent Office of Education Study of Title I showed that the program actually serves more children who are not from poor families than it does low-income or AFDC children, and that a majority of participants cannot even be classified as "low achievers" when compared to their peers. This problem is more disturbing when it is considered that the program serves long an estimated one-third to one-half of all children who need compensatory instruction and that many of those served do not receive the full range of services they might require. Even though funds have been used to help non-poor children or have been misdirected for other purposes, ESEA has directed needed funds into districts where the poor concentrate and has opened possibilities for compensatory education.

Thus, studies have consistently shown that the poor and disadvantaged have been more effectively reached by targeted, categorical programs than by untargeted, decentralized block grants with little federal oversight. Thus, we agree that many of the government programs during the 1970's did not effectively help the disadvantaged, most especially the numerous block grant programs that were established by President Nixon to replace the more targeted, categorical programs.

It is clear that minorities and other subgroups in the population are most effectively aided by targeted efforts. But the new strategy or policy that is needed is one that complements, reinforces and builds on the already existing strengths, resources, assets and self-help efforts of low-income families, groups and communities.

For example, our study revealed that families headed by black women made their most significant economic progress when: (a) they were employed and (b) they received support from relatives. The new policies that are needed should be evident. A major priority should be given to providing meaningful employment opportunities to female-headed families before they go on welfare or are in dire economic straits. Secondly, all government policies—before and after they are enacted—should be periodically evaluated and modified to insure that they are complementing and reinforcing family strengths, especially the support from extended family members.

Equal national priority for enhancing employment and self-help should be directed toward black youth. Studies by a member of scholars, such as Douglas Glasgow and Robert Woodson, clearly demonstrate that black young people have the creativity and ability to play a major role in their own economic development. Woodson has effectively documented innovative community development efforts by groups of former youth gang members throughout the country. If government policies are designed to encourage the growth of such self-help strategies in low-income communities across the nation, then the economic well-being of all groups—both black and white—will benefit significantly.●

HOUSE OF REPRESENTATIVES—*Friday, July 24, 1981*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
July 23, 1981.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Friday, July 24, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We begin this day, O Lord, with a word of praise for the opportunities before us. Help us to know gladness of heart and joy of spirit that comes when we truly seek to minister to others and rejoice in Your presence. Strengthen our lives with the gifts You provide that hope, peace, faith, patience, understanding, trust, and wisdom may enlighten our lives. Breathe the power of Your spirit into the minds and souls of all who turn to You and grant us all Your eternal blessing. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

BIDDING WAR FOR VOTES ON TAX BILL

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEAVER. Mr. Speaker, we must all be appalled by the bidding war going on now for votes on the tax bills by both sides. "Sweeteners" are being offered to the wealthiest, most affluent people in this country, while at the same time we sit in a budget-cutting process, cutting funds for the poorest of this country, cutting funds for food stamps, for child nutrition, for other programs essential to the well-being of these people, while at the same time we offer billions of dollars in tax cuts to those already the most wealthy.

I for one cannot accept either position.

UPDATE ON RECONCILIATION CONFERENCE

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. PANETTA. Mr. Speaker, a further update on the reconciliation conference.

In general summary, of the 58 subconferences that were involved, 37 have been completed, for a total of $30 billion in savings that have been made to this point.

Yesterday, the Agriculture Committee met and completed work on differences with regards to forestry, alcohol fuels, food stamps, and will continue to meet today on the area of dairy reductions.

Small Business met and has come to a conclusion with regards to their conference.

Education and Labor continued to meet in the employment area, with the one outstanding issue being funding for the Women's Equity Act.

The Government Operations Committee has completed their work yesterday. The only issue remaining is language on the block grant title.

The Ways and Means Committee met all day yesterday, and has resolved a good portion of their differences. They are continuing to meet today, as is Energy and Commerce.

Today, those that are meeting are Agriculture, Ways and Means, Small Business, Education and Labor, and Energy and Commerce. We expect that in those conferences that are not completed, the chairmen and the members will meet over the weekend in order to complete action on the reconciliation hopefully by the end of this weekend.

The "Daily Report on Conference Activity" is as follows:

DAILY REPORT ON CONFERENCE ACTIVITY—JULY 23, 1981, 6 P.M.

SUBCONFERENCE COMPLETED

BAILOUT FOR BIG INDUSTRY IN WAYS AND MEANS TAX BILL

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, yesterday I reported to the House that the major business organizations have not endorsed the $3.3 billion bailout in the Ways and Means tax bill for some of the biggest businesses in our country.

I might note, however, that the trade associations for these six so-called distressed industries have been very curiously quiet so far. I point out to them that history shows that the Ways and Means Committee and the Congress itself wisely seldom addresses the same perceived need twice. Therefore, there is a message for them in this historical comment.

I say to my friends in the railroad, auto, mining, airlines, paper and steel industries which profess to be distressed under this provision that if this $3.3 billion bailout passes, it is highly unlikely we in the Ways and Means Committee and the Congress will address any further tax needs for these industries for a long time to come. So whether it is the need or the greed of a few within these industries, which causes their associations, silence, they may poison the well for all.

GENERAL LEAVE

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the consideration of the bill, H.R. 4144, making appropriations for energy and water development for 1982, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ENERGY AND WATER DEVELOPMENT APPROPRIATION, 1982

Mr. BEVILL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. BEVILL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4144, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Thursday, July 23, the Clerk had read through line 19 on page 16, and pending was an amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN).

Under the unanimous-consent agreement of Thursday, July 23, debate on the amendment by the gentleman from Pennsylvania to the paragraph pending is limited to 2 hours, 1 hour to be controlled by the gentleman from Pennsylvania (Mr. COUGHLIN), and 1 hour to be controlled by the gentleman from Alabama (Mr. BEVILL).

At this time the Chair recognizes the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, the amendment that is before the committee would delete $228 million for the Clinch River breeder reactor. Mr. Chairman, this is not just my amendment, but it is offered on behalf of a bipartisan group of Members who have examined the Clinch River breeder reactor and found it wanting. It is offered with the greatest deference to the distinguished chairman of the subcommittee and the distinguished ranking minority member, both of whom I have the greatest respect and who are my friends. Each year they go through

the very difficult procedure of trying to evaluate competing projects and everyone owes them a great debt of gratitude.

Mr. Chairman, since 1974 I have been calling attention to this question of a project which cannot be justified on either a research and development or a cost-benefit basis. This year the administration adopted a philosophy that if an energy R. & D. project does not warrant private investment it should not receive Federal support.

There followed a wholesale slaughter of subsidies for private energy research and development, with which I tend to agree, except very mysteriously for the Clinch River breeder reactor, which does have to say for it that it is located in the home State of the majority leader of the other body.

The authorizing committee, always strong for this project, after a painful and lengthy reevaluation, voted 22 to 18 on a bipartisan basis to terminate the project. Mysteriously it was slipped back in as a part of Gramm-Latta II.

It started in 1973 when a consortium of utilities agreed to contribute $257 million to the project of an estimated cost of $422 million. The cost has now soared to $3.2 billion, but the contribution of the utilities has remained where it was.

□ 1010

The burden of the taxpayers has increased from 39 percent of the project to 91 percent of the project.

Mr. Chairman, if we are to continue this project, we will be building a white elephant that will make the fiasco at Union Station Visitors Centers look like a peanut.

Mr. Chairman, I reserve the balance of my time.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman, I rise in strong opposition to this amendment. It is purely and simply an antisupply amendment aimed at stopping the construction of a critical technology demonstration plant. The Clinch River breeder is the steppingstone to achieving electrical independence in energy supply and we know that electricity is the most flexible way of providing energy for this Nation.

There are several points that I wish to make:

First, Clinch River is intended to be a technology demonstration plant and not a commercial plant, and, as such, should not be subjected to conventional arguments with respect to cost and overall economics. Nevertheless, when electricity revenues are included, the project passes this accounting test, with flying colors.

Second, the project and the fast breeder development program represent an investment of billions of dollars over several decades, and this amendment suggests that we throw away most of that investment. The skilled breeder team is focused on building this plant now and any delay or cancellation would cost us dearly.

Third, the breeder reactor is an energy insurance policy for which we cannot afford not to pay the premium because we have large uncertainties in electrical demand and uranium supply. We must be in a position to make a decision on commercial deployment by the end of this century.

A technology demonstration project is intended to verify key aspects of a technology, in this case the operating characteristics of breeder powerplants as they will fit in utility systems. Technical and economic data will be provided to government, industry and the public, so that sufficient experience with, and information about the concept will be available to permit the commercial deployment of the breeder.

Although operation of Clinch River is not intended to be a demonstration of commercial readiness, the anticipated electrical revenues of a 30-year life will exceed $20 billion! Using today's wholesale price of electricity at the plantsite, this amounts to a net income of more than $2.3 billion, which is just about the remaining project cost. There will be no waste in funds if any reasonable figure is put on the importance of the experience we will derive, and the present value of the net revenues comes to an astounding figure of over $800 million.

We have thousands of skilled technical people including engineers, scientists and managers in place, carrying out a broad breeder R. & D. program which supports the focused activity on the project. This highly skilled team has nearly completed the detailed design of the plant, procured several hundred million dollars' worth of hardware, and is ready to go ahead and put the pieces together. The design is the most advanced breeder in the world, and the CRBR team is anxious to move ahead so we can finally obtain important experience in operating such a plant.

Certain other developed nations are considerably ahead of us in plant experience, but far behind us in fuels and component technology. Clinch River gives us the opportunity to integrate our advanced technology into a viable program.

The size of this plant is an appropriate scale-up from our most recently built breeder reactor, the Fast Flux Test Facility in Washington. While this facility does not generate electricity, it is the world's most advanced breeder fuels test bed. This careful scale-up minimizes the risks and uncertainties in operating a U.S. breeder plant and promises to supply the necessary data in an orderly manner.

The CRBR is a critical premium on an insurance policy for a virtually limitless energy supply. This view is based on the fact that the breeder multiplies uranium supplies better than 60 times, providing nearly limitless fuel to generate electricity, which remains the most flexible way for us to substitute plentiful fuels for those in scarce supply.

I have heard and seen all too many energy demand and supply scenarios over the past 8 years since the Arab oil embargo. One conclusion is clear, projections of energy demand can become self-fulfilling prophecies and this country cannot afford to discourage itself into thinking small about its future. The fact is now well documented that a cradle-to-grave analysis of distributed energy technologies reveals that solar, biomass, and other so-called renewable approaches are by no means risk free. The breeder reactor will be even safer than light water nuclear plants and as of now, we still have no recorded fatalities from their operation. Fast breeders use sodium as a working fluid and it has a marvelous capacity for absorbing heat in the event of the most improbable reactor accident.

Mr. Chairman, before I sum up, there are two arguments of the anti-CRBR faction which I should like to address.

First, I am amused to hear the opponents repeat the phrase "free market" with respect to nuclear power. This country is burdened with a regulatory climate which has too long dwelled on safety through perceived rather than real risks. The suggestion that the nuclear industry and the financially stressed electric utilities can pledge $2 billion for a technology demonstration project is simply absurd. There is no free market for nuclear energy and even this energy-enlightened administration will have difficulty in forcing the regulatory system to focus on the real risks of energy techologies. I simply do not see how "we can get from here to there" through this regulatory maze.

Finally, the oft-used accusation of cost overrun should be placed in some perspective. All over this country massive cost overruns are encountered in construction projects which are simply brick and mortar and have no R. & D. connection with them. The CRBR project not only has been the victim of soaring construction costs, but in addition, its price tag has been escalated by 4 years of Carter administration opposition and a series of major changes in licensing requirements. In short, Mr. Chairman, CRBR has had more of its share of project delays and design changes which had nothing to do with

the capability of the team or the maturity of the techology.

I think the question is simple; are we going to move ahead and build this plant to convince the world that we are serious about energy independence or not? The answer I think should be given in three little words: supply, supply, supply.

Mr. COUGHLIN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. Mr. Chairman, it is important, as we begin this morning's debate on the Clinch River breeder reactor, to keep in mind some very basic elements of that project.

The first is what is at stake in the amendment before us today is far more than the elimination of an appropriation of $230 million from this year's annual budget. We are not only talking about $230 million this year. We are talking about another $237 million in 1983, $248 million in 1984, $252 million in 1985, and $274 million in 1986.

We are talking about a project, in short, that is going to cost an estimated $3.2 billion and that has increased in its estimated cost from an original figure of $669 million to the present $3.2 billion. That represents a 450-percent cost escalation in the project. And let there be no mistake about it. That cost escalation means the sacrifice of other programs, energy and nonenergy programs, in the Federal budget, in order to make room for that kind of cost increase.

At the same time, that the projected total cost of the project has increased by 450 percent, what has happened to the industry's contribution? When the project was first conceived, the industry contribution was placed at approximately 50 percent of the total cost. That industry contribution has not increased 1 penny from the original commitment. Consequently, today we are talking about an industry contribution of 9 percent of the total project cost. That is outrageous on its face.

The Members will be told today that this project is required in order to displace petroleum and to meet our Nation's energy requirements. Let there be no mistake. The supporters of the amendment before us today fully share the view of the opponents that our energy dependency, our petroleum dependency, is a major threat to our national security. It is precisely because of the urgency of that threat that we need to be certain that we are investing taxpayer dollars and private sector capital in those technologies that will most quickly and most cheaply displace petroleum. The Clinch River project simply does not meet that test.

It has survived to this point not because it has any relevance to the energy crisis we are facing—clearly it does not—but solely because of enormous special interest pressure. It is time to bring it to an end.

Mr. BEVILL. Mr. Chairman, we are trying to trim our time here to save time. Since we are going to use half the time the gentleman from Pennsylvania is going to use, if the gentleman will recognize two speakers to our one, we will move along.

Mr. COUGHLIN. Mr. Chairman, I yield 7 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I rise in support of the gentleman's amendment to cut funds from the Clinch River breeder reactor project. This amendment follows the decision of the Science Committee to deauthorize this project. Our committee has spent a great deal of time in discussing this project during the fiscal year 1982 authorization hearings, and I urge my colleagues to follow the Science Committee's recommendation for Clinch River, which was carefully reached after long, exhausting deliberations. Frankly, I just do not think that our Nation can afford the costs of this project anymore.

As my colleagues are fully aware, we have visited the Clinch River breeder reactor issue many times in the past. The proliferation risks, enormous costs, environmental concerns, and safety problems with this project have been discussed on this floor many times over the years. Much time has been spent on discussing the menace of huge stockpiles of plutonium created by the development of a breeder reactor, and the dangers are well known. In 1977, the NRC halted the licensing process for Clinch River with over 100 unresolved safety issues which still remain. Before we build a breeder, substantially more research is needed to comprehend, evaluate, and control the safety risks that will accompany the use of this technology.

After close to 10 years, ground still has not been broken on this project. We must now ask ourselves if the time has passed when Clinch River can serve our interests. In 1973, we were promised a breeder demonstration program after 6 years, or in 1979. Let us now look at what has happened. In 1981, after spending over $1 billion, we are now promised a demonstration project in 1990—9 more years along the road. Clearly, we are losing ground here. If the NRC licensing process requires an alternative site, the project could be set back another 4 years to 1994, at an additional cost of perhaps $1.7 billion. Overall, this would be an 11- to 15-year delay. Instead, in the 10 years since Clinch River was first authorized, we have gone forward with a strong base breeder program, and a conceptual design study for a large development plant has just been released.

In light of this inglorious history, the project bears a high burden of proof if it is to again receive more funding for fiscal year 1982. After much deliberation, the Science Committee believes and has recommended that this project be terminated. I strongly agree.

Mr. Chairman, one of the key reasons for the Clinch River project in the past has been our need to satisfy projected large increases in electric power demand during the next three decades. Under this scenario, breeders would be essential to help us meet our growing electrical power needs. Yet, we have all recently heard from many experts that these projected increases will probably not occur. From 7.8 percent in early 1970, the current rate is 2 to 3 percent.

The Science Committee has recently held hearings on the future of energy utilities. During these hearings, we heard from several witnesses that we should now expect significantly lower electricity growth rates in the future. Utility and Commission forecasts indicate that the rate will be 1.4 percent or less in the 1980's. Other recent estimates indicate that electric demand in the 1980's will probably grow at only half the rate of the 1970's.

Another claimed need for Clinch River has been that the breeder will be needed soon because of our diminishing supply of uranium. Clinch River was originally authorized in order to anticipate this shortage and to extend our uranium supplies farther into the future.

However, by all accounts we have now dramatically underestimated our supplies of uranium. Utilities have encountered numerous licensing difficulties for new nuclear plants, causing the cancellation of many of these plants, and corresponding less use of uranium. Preliminary reports from the NURE program have also indicated that we have more uranium than we originally thought. Thus, the original breeder demonstration scheduled no longer makes technical sense. As a result, I believe that we should now reexamine the Clinch River program before we further invest in it.

In a time of severe fiscal constraints, we should ask ourselves whether we need the breeder now. We need to seriously consider whether it is more important to devote our limited taxpayers' moneys to this project or to some other worthy program that is deserving of our immediate attention. I admit that the breeder is one of the so-called inexhaustible forms of energy, along with our fusion and solar energy resources, that may well be needed in the next century. But right now, we need to examine whether the breeder will be helpful in the short term.

The answer to this critical question is no. Our immediate interest is to reduce our dependence on petroleum.

The breeder cannot satisfy these immediate needs. At the present time only 8.8 percent of our annual oil consumption is used to generate electricity. Moreover, much of that oil is specifically used to fire small backup generators to meet peakload requirements. The size and scale of breeder reactors will always make them uneconomical for such intermittent applications. Thus, the Clinch River project will have virtually no impact on our present oil import problem.

It will be well into the 21st century before the breeder reactor even begins to look commercially attractive. By that time, oil-fired central power stations will have long since been replaced by coal and conventional nuclear powerplants. We hope to have other forms of inexhaustible energy supplies, such as fusion and solar, online by then. A viable synfuels industry will also have been developed.

I urge my fellow colleagues to recognize the economic realities of our present situation. There is no doubt that we will have to devote a great deal more money to Clinch River in future years if we go ahead with this project. Funding problems in these years will certainly be even more serious, as the administration tries to balance our budget in 1983 and 1984 with more difficult cuts. The estimated costs of the Clinch River project have increased more than sevenfold, from an original estimate in 1969 of $400 million to today's estimate of over $3 billion. Unfortunately, there is no guarantee that these exorbitant costs will not continue to escalate. In fact, an economic study considered in detail during hearings before the Science Committee suggested that the original estimates of the costs of new energy plants have been consistently underestimated, and that it would be very reasonable to conclude that the actual costs of demonstration projects such as Clinch River would probably be significantly higher if the project were carried to completion.

Furthermore, it is unreasonable for the Federal Government to be responsible for all of these increasing costs. Our taxpayers' liability in this project has grown from about $100 million to now over $3 billion—more than 30 times the original estimate. According to recent estimates, the utility and industry share of today's costs for Clinch River have dwindled from 50 percent to about 9 percent of total costs. This is in my opinion not a wise course to follow.

Mr. Chairman, many of my colleagues are concerned that we will severely restrict our Nation's ability to develop the breeder option if we do not build Clinch River. This is surely not the case. Even without Clinch River, we will still have an aggressive breeder program. The base breeder program that the administration has proposed, and for which $361 million has been authorized by the Science Committee, will provide for a strong breeder program which will, in fact, enhance the program by calling for a more rational design.

In a recent report to the members of the Energy and Commerce Committee, the staff also recommended that we evaluate alternative nuclear reactor programs before we continue to support Clinch River. They recommended that technical audits be performed on major alternative programs, even including safety and reliability improvements in the use of our conventional nuclear light water reactors, as well as more efficient use of our uranium resources. This is the way to go. We have the time. Given our serious funding problems, I believe that there are certainly much better ways to spend the money authorized for Clinch River than on the controversial type of breeder design that it would now demonstrate. In my opinion, it certainly would be better to go forward with research and development activities in several other nuclear activities, including the development of all of the breeder technologies, at this time.

Mr. Chairman, it is time for us to put aside projects that have only symbolic meaning. We cannot afford to devote our limited taxpayers' moneys to the demonstrations of technologies that have limited merits. If there is to be budget austerity, let it be across the board. We must expect concessions from all energy technologies and nuclear cannot be an exception. I urge my fellow colleagues to face the energy future and stop living in the past.

□ 1020

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Chairman, I rise in opposition to the pending amendment.

We have heard opponents discuss the cost of the Clinch River breeder reactor, but we have not heard them mention the revenues. The revenues are some $20 billion the project generates. Opponents also have said that the Clinch River breeder reactor will not impact the importation of oil into this country.

Let me cite some relevant studies on that very topic. In a study performed for the Government of Canada, it was reported that if electrical energy growth were increased by 7 percent per year, we could eliminate imported oil totally within 10 years just by allowing the marketplace to operate.

Second, a study performed by the Oak Ridge National Laboratory verified that 75 percent of the oil and gas used in the industrial sector could be replaced by using existing technology with electric energy.

If by 1990 electric energy replaces one-half of today's oil used in the home heating, one-half of the oil and gas used to produce electricity, and only 10 percent of the industrial use of oil and natural gas, we could achieve by 1990 a savings of 3½ million barrels a day.

At today's prices that amounts to over $4 billion a year. The price of oil, by 1990, of course, will undoubtedly be much higher. If commonsense alone does not persuade us that increased domestic supplies of energy will reduce imported energy, then we may safely rely on the vast body of research clearly demonstrating this simple fact of life.

Mr. Chairman, I oppose the pending amendment.

Mr. COUGHLIN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

Members will record their presence by electronic device.

The call was taken by electronic device, and the following Members responded to their names:

□ 1040

The CHAIRMAN. The total of 356 Members have answered to their names, a quorum is present, and the Committee will resume its business.

The Chair recognizes the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Chairman, may I inquire, how much time do I have remaining?

The CHAIRMAN. The Chair will inform the gentleman that he has 49 minutes remaining.

Mr. COUGHLIN. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Chairman, I rise in the strongest support of the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN) and congratulate him on his leadership.

First of all, I would like to point out that the cost of this project as represented by its proponents is grossly underestimated. It leaves out entirely the cost of reprocessing. The cost of reprocessing will run into hundreds of millions of dollars, and it is not even included. The costs of decontamination and decommissioning of the plant are also omitted.

□ 1050

Presently the estimated cost of decommissioning a conventional reactor is on the order of $60 to $100 million.

When the CRBR project costs are viewed from a cradle to grave perspective, the fact that large, additional financial obligations will be incurred by the U.S. Government becomes evident.

Those who vote to continue CRBR must understand that in so doing they are voting to commit U.S. taxpayers to 40 years of paying the unconsidered costs of reprocessing, decontamination, decommissioning, and disposal of radioactive wastes—costs which have been neatly overlooked in previous economic analyses.

These large, hidden costs, lurking somewhere in the future, are yet to be incurred and thus can still be avoided. By terminating the CRBR project now you will be saving not only the $2 billion-plus estimated by DOE to complete the project, but at least several hundred million perhaps even more than $1 billion in addition.

Terminating this economically unsound project is a long overdue step.

In addition to omitting the very high cost of reprocessing and decontamination and decommissioning, the costs of disposing of the high level and plutonium contaminated wastes at the end of the project are also omitted. These cost factors also overlook the very great likelihood that this plant will not operate at a high capacity factor which would be necessary to earn the revenues cited.

If you take a look at the French Phenix reactor in the first year of its operation, it operated at 47 percent of its capacity and in its second year at only 15 percent of its capacity.

The British Daunray reactor, when it started in 1979, operated at 9 percent of capacity; in 1980 at 3.7 percent of its capacity and in 1981 at only 15 percent of its capacity.

The figures that were presented concerning electricity revenues from CRBR assume that this plant is going to operate at greater than 60 percent capacity. I think that is exceedingly unrealistic.

Furthermore, the potential revenues cited by the proponents of this measure are clearly inaccurate.

A July 22, 1981, "Dear Colleague" letter from the gentlewoman from Tennessee (Mrs. BOUQUARD) and the gentleman from New Mexico (Mr. LUJAN) appears to assert that the Clinch River plant will produce revenues from the sale of kilowatt-hours to TVA for 30 years sufficient to cover the remaining costs associated with the project.

First of all, the contract with TVA is only for 5 years. At that, the TVA ratepayers are going to be closely subsidizing the cost of this plant, because the contract calls for TVA to purchase this power at the avoided cost, which is the highest possible cost, the cost of constructing a brandnew plant, whereas the TVA could well get their power much more cheaply from coal or nuclear plants, a far less cost.

After the 5 years have expired TVA will have to renegotiate a new contract and would likely not renew the contract at this rate which I believe is exorbitant. I am sure the gentlewoman from Tennessee does not want to see her ratepayers bilked for the next 25 years after this contract expires.

I am inserting into the RECORD the following comments which further show the dubious economics on which the Clinch River project is based:

A July 22, 1981 Dear Colleague letter from Mrs. Bouquard and Mr. Lujan appears to assert that the Clinch River Plant will produce revenues from the sale of kilowatt hours to TVA for 30 years sufficient to cover the remaining cost associated with the project. This assertion is not substantiated. Furthermore, whatever revenues are produced by the sale of electricity generated at the Clinch River Plant will be taken out of the hides of TVA ratepayers—at a cost above that at which TVA could conserve such energy.

NO LONG-TERM CONTRACT

The Bouquard/Lujan Dear Colleague's conclusion that electricity sales will cover remaining project costs is based on an assumption that the Clinch River facility will sell output to TVA for 30 years. At present, TVA has agreed, by contract, to purchase output only for the first 5 years of operation. During the initial five years TVA will determine whether to acquire the facility's output for additional years. Thus, there is no guarantee that the facility will have a ready market beyond the initial 5 years.

NO LONG-TERM PRICE

TVA has agreed to purchase the Clinch River output for 5 years at its avoided operating cost. There is no guarantee that this price can be attained for the Facility after these five years. Indeed, the normal arrangement between utilities attending a power sale is to "split the savings", an arrangement that would result in a lower price per kilowatt of Clinch River output after these five years.

ALLEGED REVENUES FROM POWER SALES ARE GREATLY OVERSTATED

TVA will purchase CRBRP output at TVA's avoided operating cost with no capacity credit. The price per kilowatt hour assumed by Bouquard/Lujan is based on the average wholesale rate charged by TVA and escalated. That rate, of course, has been set to cover all costs of capacity experienced by TVA, including the costs of considerable coal and nuclear plant capacity owned by TVA. Thus the rate used as the basis of the price per kilowatt hour is too high. As such, the revenues per kilowatt hour are overstated.

TVA RATEPAYERS WILL SUBSIDIZE CLINCH RIVER

Except in extraordinary circumstances, such as when Congress determined to encourage cogeneration and small power production in Title II of PURPA, utilities are required by the law to meet load at least or minimum cost. The purchase by TVA of Clinch River output at TVA's avoided cost is not consistent with this requirement. Effectively, the existing contract between TVA and Clinch River requires TVA to meet some if its load at "most cost", at a level above that occasioned by investment in conservation and maybe even in other generation plants, all for the purpose of generating some revenues to offset project costs. The TVA ratepayer is being asked to pay for energy generated by Clinch River which they could likely obtain more cheaply if Clinch River output were not purchased by TVA. Thus, TVA ratepayers help defray some of the cost of the subsidy to the facility.

UNREALISTIC PLANT PERFORMANCE ASSUMPTIONS

The alleged $3.2 billion revenues are based on an unrealistic assumption of near perfect operation of a highly complex, first-of-a-kind liquid metal plant.

Comparably sized breeders (Phenix in France and PFR in the United Kingdom) have not performed anywhere near perfection:

SAME CAPACITY FACTORS

[In percent]

	1976	1977	1978	1979	1980	1981
Phenix 600 MW (thermal)...	47	15	61	84	61	63
PFR (Daunray) 650 MW (+).....				9	3.7	15

CRBR earnings are most sensitive to the plant's performance during the first 5-10 years. This is precisely when technical difficulties due to start-up and initial operation will be most serious.

THE TECHNOLOGY BEING DEMONSTRATED IS UNRELATED TO A COMMERCIAL OPERATING BREEDER

The technology CRBR would demonstrate is very different from any future commercial plant.

First, CRBR is not even a commercial prototype;

Second, CRBR's size is one-third that of a commercial plant;

Third, the components and design will likely be different in a larger plant; and

Fourth, France, the United Kingdom and Japan all plan to by-pass a CRBR size breeder.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Washington (Mr. MORRISON).

Mr. MORRISON. Mr. Chairman, I rise in opposition to the amendment proposed and in support of the Clinch River breeder reactor project.

I would like to compliment Members of Congress, on wise investments in the past, perhaps greater investments than many realize, in the breeder reactor concept and in a balanced-energy approach to America's future.

In my State of Washington, we have just completed the fast flux test facility, a breeder reactor designed to return us to a position of world leadership in nuclear fuel technology.

I think history is going to measure all of us as representatives of the people by the wise use of our God-given natural resources, and that includes the fuels that we burn to generate electricity.

Nuclear fuels are one of those natural resources we burn, they are abundant, but limited to a 50-year supply. Keep in mind that less than 1 percent of the uranium ore mined actually ends up as nuclear fuel in today's light water reactors.

We have accumulated massive stockpiles of uranium-238, which is cast aside during the processing of nuclear fuels. That uranium-238, if processed in a breeder reactor, has the energy equivalent of more than all the coal reserves identified in the United States. It also equals approximately 1.4 trillion barrels of oil. If you want to calculate the dollar value, multiply today's price of oil times 1.4 trillion barrels.

All of a sudden that 50-year supply of uranium that we have in this Nation multiplies out to several conturies.

Timing of the Clinch River reactor has been questioned. Let me remind you that with the light water reactor and other complex technologies, it takes about 25 to 30 years from the time the technology is complete until we are able to make commercial application.

There is much talk of waiting for fusion energy, and I am excited about the prospects. Congress has done a great deal under my predecessor to establish fusion energy for the future, but do not hold your breath. The committee, in this bill, does make a continuing investment in the future of fusion, but the fusion engineering device called for in last year's legislation will not be ready until the year 2000 at best, and it will take years from there to achieve commercial use.

The question of size has been brought up about the Clinch River reactor. I personally had some questions myself, but having made several visits to the test facilities at Hanford, Wash., now believe that we must stay with the three times extrapolation that has been so safe and successful in the past. That is, you can multiply existing facilities by three times in determining the size of the next unit, and the Clinch River reactor fits precisely into that dimension.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. BEVILL. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. FOLEY. Mr. Chairman, will the distinguished gentleman yield to me?

Mr. MORRISON. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I thank the gentleman.

I want to join with him in his statement. I congratulate him on it.

I join with him also in opposing this amendment and in strong support of the breeder reactor program.

I urge Members on both sides to oppose the amendment.

Mr. MORRISON. I thank the gentleman from Washington for his comments.

Mr. Chairman, I think that the Clinch River reactor is a good investment; a justifiable investment in America's energy future.

I oppose the amendment and urge my colleagues to do likewise.

(By unanimous consent Mr. CONTE was allowed to speak out of order.

IT IS TIME TO PLAY HARDBALL

Mr. CONTE. Mr. Chairman, I have had just about enough of this soft pedaling and petty politics which the Congress has been experiencing this year. I stand here with the deepest possible conviction, for everyone present to hear, the Republicans are out to play hardball this year.

No longer will the Republicans precariously stand by waiting for the boll weevils to make up their minds or to set the stage for the next Democratic/Republican confrontation this year. From the very first pitch next Wednesday night the Republicans will be in complete control, and we will not need any assistance to maintain our edge of victory.

No longer will the Republicans stand for the thrashing that we took last year. Although I could not convince the young slasher, I have recruited our chief thrasher, JOHN "RAZOR-TONGUE" LEBOUTILLIER, to cut the Democrats down to size.

Mr. Chairman, if you think that big JOHN has any trouble moving around the—"mound,"—you can check it out next Wednesday night and see for yourself how agile and aggressive my new colleague can be.

Mr. Chairman, in your role as head umpire of this fine Chamber, it would be my natural inclination to ask you to umpire next Wednesday night's contest; however, due to JOHN'S affinity for the hard, high, fast ball in situations such as this, I suggest that you toss the ceremonial first pitch and allow us young bucks to lock horns on the field.

It is not that I doubt your ability to handle the high velocity of a Republican pitch, it is that inevitable curve ball that questions the sanity of allowing you to umpire behind the plate.

Whatever you decide, the game is part of a double header at the Alexandria Dukes home field at 4-Mile Run Park. Tickets are available through the Congressional Staff Club and various other outlets on the Hill, and bring your family and have a good time.

□ 1100

CONGRESSIONAL BASEBALL GAME

Mr. CHAPPELL. Mr. Chairman, I ask unanimous consent I be permitted to speak out of order for 2 minutes.

(By unanimous consent, Mr. CHAPPELL was allowed to speak out of order.)

Mr. CHAPPELL. Mr. Chairman, I want to say with reference to this year's baseball game that I hope the gentleman from Massachusetts (Mr. CONTE) is able to put a team together that will play hard ball, because last year there was some misunderstanding, apparently, on their part. He apparently thought we were trying to play a softball game, and finally had to call it at the end of the fifth because we had so many runs that he was afraid that he could not keep the score within his ability to count.

Even an old blind hog roots up an acorn once in awhile, and I do hope that my good friend from Massachusetts (Mr. CONTE) is able to root up a good team this year. God knows he is going to need it. If he is counting on the boll weevils to help him on the baseball game, he has the wrong idea, because while some of us may vary here and there on certain votes, he may be certain that the boll weevils are not going to move to his side of the aisle when it comes to a baseball game, and we are going to teach him the lesson of his life.

While the Democratic team roster represents players from every ideological base, we want the gentleman to understand that he is going to be in for it when we come out to the ball game next Wednesday. Clearly when we all get through our distinguished opponents will wish that it were not the major leagues who were on strike.

While I am sure my Republican colleagues are still reeling from last year's Republican defeat, I hope they will be able to muster the necessary enthusiasm and at least give the Democratic team a good batting workout this year.

Mr. Chairman, I hope we will all find the time to attend this year's game. To my Republican colleagues, I urge them all to come and support their team because God knows it is going to need it.

To all of our colleagues, let me invite them to come out for this very worthy cause of Washington's Children's Hospital. Let us have a good time. Let us have a good game, and let us show the people of America that at least the Congress is still interested in baseball, and good baseball, whether our professionals are or not.

Mr. COUGHLIN. Mr. Chairman, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOLLENBECK).

Mr. HOLLENBECK. Mr. Chairman, I rise in opposition to the Coughlin amendment to delete funding for the Clinch River breeder reactor. I believe that this country needs to continue development of the breeder to assure that it is available if needed to meet our future energy requirements and Clinch River is a key element in this development. The United States is dependent upon fossil resources for most of her energy requirements. Our country still imports large amounts of crude oil, which severely impacts our balance of payments and all aspects of our economy, not to mention the uncertainty in assuring a continued source of supply. Although we have large amounts of fossil energy reserves, it would be wise to preserve these materials for energy uses that require hydrocarbon material, such as transportation and petrochemical feedstocks.

Fortunately, our country has energy sources other than fossil fuels that have the potential for making major contributions to our general energy requirements, including light water fission reactors, breeder reactors, fusion reactors, and solar power systems. All of these except light water reactors, which are available now, have future potential. The breeder reactor concept has been under development for many years, and its technological feasibility has already been proven.

The United States has large amounts of uranium, and this resource is capable of lasting thousands of years if breeder reactors are introduced. Compared to the breeder's efficient utilization of uranium, light water reactors utilize only a small percentage, one-sixtieth, of usable energy in uranium. As a result, they require large amounts of uranium ore to be mined every year. The deployment of hundreds of these reactors in the United States which we will likely need could quickly deplete our known uranium ore reserves.

Considering the uncertainties in uranium availability and cost and the potential range in commercial introduction dates they imply for breeders, the course that seems most logical is one that brings this country to a state of readiness for breeder deployment by the earliest possible need date. The risks of being late in achieving breeder commercial viability poses the potential for a much greater risk to the United States than any perceived penalty associated with continuing its development to a point of commercial deployment readiness too early. In other words, we simply must have this insurance policy—and Clinch River is part of the premium.

Although there are a number of potential deployment routes for the breeder, the most logical and cost-effective next step in the breeder program is completion of Clinch River. The decision to proceed with Clinch River is not a commitment to commercialize the breeder, but is a commitment to obtain the design, construction, and operating information that is necessary for the industry to make rational decisions on the future course of development of breeders.

Mr. Chairman, I feel it is appropriate at this time to insert a copy of the dissenting views on the CRBRP as they appeared in the Science Committee's report for the Department of Energy authorization bill for fiscal year 1982.

DISSENTING VIEW ON CLINCH RIVER BREEDER REACTOR PLANT PROJECT

These views are presented to underscore our strong support of the Clinch River Breeder Reactor Plant Project as a key element in our nation's breeder reactor development program.

The action of the Committee on Science and Technology to terminate the Clinch River Breeder Reactor Plant (CRBRP) is in direct opposition to the will of Congress as expressed over the last four years and to the intent of the new Administration. This action comes just at the time when we can move ahead with construction of CRBR and revitalize our national and international commitment to the development of nuclear energy. Our support for this project is based on a broad consensus in the scientific and technical community as well as the federal governments of the U.S. and the major developed countries that breeder technology is important to future energy security. In pursuing this goal, we believe, for a number of reasons, that CRBRP is the next step that the U.S. should take in its breeder development program.

Clinch River is the best plant to accomplish the goals of the U.S. breeder program. No alternative can offer more than this plant without greater cost or a serious loss of time. The design has been favorably reviewed at least 20 times by independent government and industry organizations with the objective of insuring that it was sound and at the forefront of technology. The Clinch River Breeder Reactor is the most advanced design in the world today in all aspects except size, and the size of CRBP was properly selected so that it would not be too large a scale-up from the predecessor plant, the Far Flux Test Facility.

CRBRP is ready to go now. Project design is about 86 percent complete and engineering research and development is about 96 percent complete. By the end of fiscal year 1981, about $218 million worth of completed hardware will have been delivered and more than $540 million worth will be in fabrication. We could complete the plant about seven years after receiving regulatory consent to begin construction.

Every other major industrialized nation in the world is building breeder reactors. The Soviet Union, France, the United Kingdom, Japan, Italy, and West Germany are actively developing breeder reactors with four fast breeder reactors larger than 250 MWe already operating and nine under construction or planned. All these nations realize that without breeder reactors to assure long-term fuel supplies, nuclear power will be a relatively short-term energy resource.

The U.S. must have a high-confidence, energy strategy. We must assure ourselves and future generations of a secure supply of energy. The prudent course is to preserve the breeder option by proceeding with CRBRP. The General Accounting Office in its 1979 report, "The Clinch River Breeder

Reactor—Should the Congress Continue to Fund It?", said flatly that if this nation wants a strong breeder program the Clinch River Breeder Reactor should be built. The GAO said further that a decision not to develop breeders implies the phasing-out of nuclear fission as an energy source. GAO support of CRBRP has been consistent and is included in subsequent GAO reports dated July 10, 1979 and September 22, 1980.

The proper stewardship of our indigenous resources requires that we utilize the breeder reactor to assure adequate supplies of nuclear fuel for centuries to come. The breeder promises to use uranium at least 50 times more efficiently than today's light water reactors. The prestigious National Academy of Sciences in its report, "Energy in Transition", came to the conclusion that we need all our resources—but we especially need coal and nuclear. The Academy said that the breeder would essentially make uranium a potential source of energy for hundreds of thousands of years. While current nuclear fuel resource projections indicate that breeders may not be needed until after the year 2020, significant uncertainties surround the long-term production capacity for this fuel.

The United States last year sent an estimated $100 billion overseas for oil. We are exporting our money and jobs for a resource that we burn rendering it unavailable for satisfying a wide range of human needs such as plastics, medicine, and fertilizer. Nuclear power cannot replace all that oil or its substitute fuel natural gas, but it can make a substantial contribution in modifying the energy mix so as to lessen our dangerous dependence on a foreign and depletable oil resource. A typical 1000 megawatt nuclear plant can replace 10 million barrels of oil per year if it is used to displace some of the more than 420 million barrels of oil consumed each year for generating electricity.

Those who say we could abandon our development effort and buy foreign breeder technology are wrong because of the licensing and economic aspects attendant to such an action. The U.S. has been a leader in technology, especially nuclear technology, until the present. Whether we retain this lead and build our own advanced fission plants according to our own safety standards and economics will be decided this year. The delays encountered in adopting foreign technology to our needs as well as the direct costs of design modifications would significantly add to the cost of breeder reactors in the U.S. On the other hand developing the breeder for the U.S. market will assure us the safest and most efficient machine possible.

Nuclear power is needed to meet our growing electric energy demand. Even doubling our present coal consumption for electric energy production—a prodigious task—we still will not be able to meet our projected electricity needs in the year 2000 without significantly expanding our nuclear generating capacity even assuming an electricity growth rate that's only one-half our historical growth rate during healthy economic times. Furthermore, nuclear is economical. For example, the Commonwealth Edison Company uses coal, oil and nuclear fuel to generate electricity. Because of its heavy reliance on nuclear power, its ratepayers saved $460 million in 1980 alone over what costs would have been if these nuclear plants had been constructed as coal-fired units. Projections for their system indicate that electricity from new nuclear plants will continue to be about 20% cheaper than from new coal plants.

Opponents of CRBR have argued that it is uneconomic and too expensive. A first-of-a-kind technology demonstration is never judged on economically competitive grounds. Arguments about the costs of breeder reactors 20 or 30 years into the future have to be based on assumptions that cannot be verified. The market conditions of the future will dictate the rate of breeder deployment. Furthermore, the return on the Federal dollar for developing CRBRP includes more than that gained from the advancement of breeder technology. The economic arguments against CRBRP ignore the tremendous revenues from the sale of generated electricity that will be realized over the plant lifetime. These net revenues are estimated at $2.3 billion at today's wholesale cost of electricity for TVA (almost $20 billion at projected costs). The present value of this failure revenue is $540 million.

The Clinch River Plant will cost less, can achieve critical program objectives sooner, and will entail less technical risk than any alternative yet proposed. Any other plant would add at least eight to ten years more to the demonstration project schedule and increase costs by several billion dollars. Additionally, to increase the plant size would also increase the risk of failure. In order for breeder reactors to have any impact on nuclear fuel supplies before the year 2030, we must move ahead now with a demonstration plant. That plant can only be the CRBR.

Some support for CRBR has been lost because of a desire to shift the financial burden for costly demonstration projects to the private sector. While we support this approach in concept, it cannot be implemented independent of the realities of the marketplace. Private industry has previously demonstrated its willingness to take risks in the development of nuclear power as shown by the utility contribution to CRBR as well as other private nuclear ventures such as the Barnwell nuclear facility. Current conditions, however, make it nearly impossible for the highly regulated utility industry to purchase new generating capacity needed to displace oil-fired units, much less finance expensive R&D plants. If nuclear energy is to continue to provide power for America in the 21st century, the government must make a comparatively minor investment now.

A severe critic of the CRBR in the past is Mr. David Stockman. He recently sent to the Committee, through the Ranking Republican Larry Winn, a letter dated May 11, 1981. Mr. Stockman noted that "Republicans over the years have seen the development of the breeder reactor as * * * a logical part of a complete and efficient total nuclear fuel cycle. The Clinch River Breeder Reactor is the first material evidence that the United States is willing to move toward such a goal." In addition, he stated that "The Reagan Administration favors the economical and safe development of nuclear energy. And, in particular, this Administration supports construction and operation of the Clinch River Breeder Reactor. This Administration intends to reinvigorate the effort on this project by joining the long struggle by the Congress to complete this project."

The CRBR project is important in near term to the future of nuclear power. If Congress acts to terminate CRBR, this will be one more in a series of policy reversals (including closing the enrichment order books, prohibition against domestic and foreign reprocessing, and the Carter Administration's identification of nuclear power as an energy source of last resort) which, in conjunction with regulatory uncertainty and private financing constraints, make additional investment in nuclear power difficult at best. If we are to meet our growing electric energy needs, these uncertainties must be removed. The focus of attention today is on the government's willingness to continue with the CRBR project.

We strongly support the completion of the Clinch River Breeder Reactor Plant and believe it is one of the most important energy technology development decisions facing the Congress this session. Moving ahead with CRBR will not only move us once again toward world leadership and influence in breeder technology but permit the much needed domestic development of nuclear power.

ROBERT ROE, MARILYN L. BOUQUARD, RONNIE FLIPPO, ALBERT GORE, JR., ROBERT A. YOUNG, RICHARD C. WHITE, HAROLD VOLKMER, RALPH M. HALL, LARRY WINN, JR., BARRY M. GOLDWATER, JR., MANUEL LUJAN, JR., HAROLD C. HOLLENBECK, ROBERT S. WALKER, EDWIN B. FORSYTHE, WILLIAM CARNEY, JOE SKEEN, BILL LOWERY.

I strongly support the continuation of Clinch River. It is a step in the right direction for our country and will maintain us as a strong, viable, and independent Nation. I urge my colleagues to support the Clinch River breeder reactor.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentlewoman from Rhode Island (Mrs. SCHNEIDER) the author of the amendment in the authorizing committee.

Mrs. SCHNEIDER. Mr. Chairman, I rise in support of Congressman COUGHLIN's amendment to eliminate funding for the Clinch River breeder reactor.

I know many of you have been subjected to a lot of pressure in the past few weeks by the corporate interest groups in favor of this project. As we knock down the arguments for the project—one by one—the lobbyists have been reduced to waving the American flag in our faces and crying, "National Security."

Do not be fooled for a minute. All the talk about Russians, and the French and the Germans and war in the Middle East is a smokescreen to hide the fact that this project will mean nothing to the America taxpayer.

By now, you have been swamped with facts and figures, but several points are worth repeating. First—this project will make no real contribution toward ending our dependence on oil imports. Only 7 percent of all foreign oil imports are used to generate electricity. Every year, oil-fired powerplants are replaced by coal and conventional nuclear powerplants. We will not have a commercial breeder reactor for another 50 years—by then, there will not be any oil-fired powerplants left. Where is the oil displacement claimed by breeder proponents? Are

we going to hook our cars up to breeder reactors?

A second point—I understand that Westinghouse lobbyists have circulated a rumor that it will cost more to end this project than it will to build it. If you believe that, then I have a bridge to sell you. The Science and Technology Committee held a full day of hearings on termination costs. It was obvious from the testimony of industry witnesses that their inflated claims about termination costs were nothing more than hot air.

After the hearing, the Science Committee settled on a first-year installment of $44 million, an amount which was suggested by our chairman. If you are worried about the financial strain on the utilities, you might be interested to know that their contributions to the project have already been collected from their own ratepayers. We should also remember that the cost of completing this project now being quoted—$3.2 billion—is a preconstruction estimate. Ask the utilities if they will share in any cost overruns beyond that $3.2 billion. They will most emphatically decline.

Finally, you have been reassured—particularly by the gentleman from Tennessee, for whom I have a great deal of respect—that there are no problems with the Clinch River contracts. Well, that is simply untrue, and let me give you just one example.

Six years ago, the Government contracted for delivery of 11 steam generators at a price of $56.9 million. We were supposed to have had those steam generators 3 years ago.

What has happened instead? By August of this year we might have two steam generators at a total cost of $143 million. That is a cost overrun of over 1,000 percent. I call that a problem. This story has been widely circulated in the newspapers—including the Nashville Tennessean—and has never been denied.

We face a very basic choice today—will we choose between the taxpayers who will have to shell out billions for this boondoggle, or the corporate interest groups who have been pressuring us?

The Clinch River breeder reactor project is a hoax.

Let us say no—to the lobbyists who treat this Congress like a flock of sheep that can be manipulated by self-interested appeals to national security.

Let us say no—to the bureaucrats at DOE who oppose this project one year, and turn around and support it the next.

Let us say yes to the American taxpayer.

Let us say yes to the Coughlin amendment, and make this a Congress we can be proud of.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New Jersey (Mr. ROE).

Mr. ROE. Mr. Chairman, I thank the chairman for yielding me the time to present some thoughts and views to our colleagues.

I have listened intently to this debate, and I particularly listened to the last speaker. I am amazed when you talk about what is wrong with America, and you are out in the field, and you listen to people respond to you—the utter frustration that people sense and feel. Now we come back and the big debate is going to be next week on saving money for the taxpayers. That is what the issue is going to be on, and who can provide the best deal for the American taxpayers.

We come back and say what is wrong with America and the people are concerned; we cannot get anything done or anything built. It takes 10 years to build a sewer plant in the United States, if you can get it done at all. Eighteen years of delay to build a water supply vital to the needs of the people of this Nation. It takes at least 15 years to get a navigational channel dredged.

The cost of money to the people of this country is at least 10 to 15 percent a year in interest, and we have inflation that is about 12 percent. The cost of construction is 15, 16, and 18 percent a year.

The charge and what is wrong with the Clinch River breeder reactor lies in the House of Representatives and it lies in the administration. There is not an overrun in this program at all. It has cost us $1.5 billion more because we cannot make up our mind or get a decision, so much that some people know about that, which is not true. If you asked them where the top of the breeder reactor was technically or where the bottom was, they would not even know; they could not even distinguish between that and those fat cows we saw on that chart as to what the breeder reactor is.

Let me tell my colleagues something. America's future lies in our independence in energy, energy to the cost of production. Do we have the right to waste another $1 billion by holding up this project or $2 billion or more in the only area that the United States has now that is free to move, which is in the breeder reactor to be able to recoup the investments we have made in the future that we are talking about in this great country of ours? To lose this project now would be the biggest fraud cast upon the people of this Nation, and we would be responsible in this House of Representatives for throwing away 5 billion dollars' worth of taxpayers' money.

That is what this debate is about, about the last and final hour, the last chance we have to carry our leadership through in energy and our leadership through in technology.

□ 1110

That is what made our country great, not our retreating from our responsibilities but what we should be doing for tomorrow.

I implore you, when you vote this time, do not worry about areas of the country; worry about the sovereignty of the United States. Yes, it is that important—and that important to this Nation.

Mr. COUGHLIN. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from California (Mr. BROWN), a member of the committee.

Mr. BROWN of California. Mr. Chairman, I rise in favor of the amendment offered by my distinguished colleague, LARRY COUGHLIN, to delete funding from the water and energy development appropriations for the Clinch River breeder reactor.

Mr. Chairman, for over 4 years now, I have been involved in the debate to terminate the Clinch River breeder reactor project (CRBR) in Tennessee. I feel compelled once again to speak in opposition to the construction of this project. In spite of the multitude of reasons to put Clinch River behind us, this multibillion-dollar mistake is still alive in the pending legislation.

While I feel that the arguments made during the past several years are valid and reason enough to terminate CRBR, the particular circumstances surrounding this year's vote overwhelm any possible justification for continuing support of the project. The Science and Technology Committee earlier this year voted to terminate Clinch River. But authorization for CRBR was slipped through in Gramm-Latta II under the guise of so-called fiscal restraint despite the fact that the estimated cost before groundbreaking is over $3 billion.

Mr. Chairman, I would like to make it clear that I am strongly in favor of federally supported research efforts of various energy technologies including nuclear, solar, conservation, and alternative sources. However, and I think my colleagues would have to agree, this support should not be indiscriminate. Unfortunately for this country, and for the Federal budget, the Clinch River project has come to symbolize our support for nuclear power and serve as an indicator of our commitment to resolving this Nation's energy problems. The reality, however, is that the commitment of the industry itself to the project is questionable. Although this project started as a 50–50 Government-industry venture, the Federal Government is now expected to bear 95 percent of the costs with industry contributing only 5 percent. It is no wonder, I suppose, that CRBR is considered a symbol by its proponents, as it hardly hurts their purses. And yet they want the Government to carry the major burden of the costs.

As for solving this country's energy needs, as a producer of electricity, Clinch River will hardly contribute to alleviating our liquid fuels problem.

Construction of Clinch River is another, less positive symbol as well. This reactor would be the first step to the development of a plutonium economy. We cannot pretend that our own country's entry into the commercial breeder era is not a nuclear proliferation threat. If anyone believes that the present generation of light water reactors, with their relatively low-grade nuclear fuels, are nuclear weapon proliferation threats, they can only be terrified at the prospect of a plutonium economy.

When the Joint Committee on Atomic Energy, of which I was a member, approved a timetable for acceleration of the development of breeder reactors, the assumptions under which the committee operated were significantly different than they are today. Simply stated, changes in energy demand, uranium supply, and governmental policy have rendered the original assumptions outdated. The Republicans who led the fight against this project in the Science and Technology Committee won because the CRBR no longer makes economic sense, if it ever did. Furthermore, the technology is now hopelessly obsolete; 12 years after the original plans were completed for the project, ground has yet to be broken.

Mr. Chairman, this country underwent significant disruptions under the oil embargo of 1973 and has felt the repercussions since then of higher energy prices and the effect of this on inflation. Can any Member of this body honestly say that the construction of this project and the development of this technology will alleviate any of our problems? As one who has long been involved in solving our energy needs, and as one concerned with safe and economical energy technologies, I believe that the Clinch River breeder reactor is an unreasonable proposal. I urge my colleagues to adopt the Coughlin amendment.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. PORTER), a member of the Appropriations Committee.

Mr. PORTER. Mr. Chairman, the Clinch River breeder reactor project has outlived its usefulness and not one more cent should be expended on it. Although it once offered the great hope of unlimited electrical power at low cost, the enormously expensive breeder program has run hard into the realities of lower projected electricity demands and an expansion of the world's known uranium base.

These changed circumstances have undercut the very reason for Clinch River's existence, while its cost explosion has made continued funding not only unwise but thoroughly wasteful.

In the early 1970's Clinch River was proposed because it apparently provided the answer to two troubling aspects of atomic power: the projected shortage of uranium fuel for nuclear reactors, and the concomitant inability of nuclear power to meet the projected demand for electricity by the year 2000.

The breeder uses low grade uranium and plutonium fuels and generates still more plutonium as a byproduct—which, in turn, can be consumed by other reactors to generate even greater power. It was a magic pyramid of energy that stimulated the imagination of an energy-hungry world and that whetted the appetite of decision-makers for its rapid development.

The on-again off-again history of the project over the course of four administrations is well known to the Congress. Through the distracting recriminations and acrimonious exchanges over who is to blame for the delays and exponential cost overruns, some significant factors have crystallized in the last decade:

First, electricity demand has dropped as the price has risen, actually creating excess capacity. According to the Edison Electric Institute, electrical demand growth rates dropped to 1.9 percent in 1980 and could range from zero to minus 1 percent in the near future.

Additionally, the known reserves of uranium in the world have grown dramatically, reaching the point where the need for any fuel reprocessing or plutonium fuel generation is doubtful.

All of this has occurred against a background of reduced role expectations for nuclear power. In the early 1970's Government and industry studies projected 1,000 operating nuclear plants by the year 2000. Current DOE estimates are closer to 170.

Mr. Chairman, if we are to proceed with development of a new and expensive technology no longer essential to meeting electrical demand, it must at least be justifiable for sound economic reasons.

Unfortunately, this has not proven to be the case with Clinch River. At a now estimated $3.2 billion price tag for the breeder—up from the original 1969 estimate of $400 million and the 1973 figure of $649 million—Clinch River's electricity is going to be the most costly in American history. Over $1,100 million has already gone into this project and construction has not yet begun.

No; economic factors do not weigh in favor of continued support for this enterprise. A generator that will need to sell its product at below cost of production is a poor investment. The business community, which understands the bottom line, has lost its enthusiasm for Clinch River. Private utilities' contribution to the breeder has fallen from 61 percent in 1973 to only 9 percent today.

In addition to the changed circumstances that have undercut the need for the breeder, there have been other factors which have undercut the value of the program itself: There are safety concerns that may make NRC licensing impossible without a site relocation at an additional cost of $1½ billion, and there are experts who claim that the technology itself is fast becoming obsolete—among them Edward Teller, a nuclear pioneer—and the wrong path toward continued nuclear energy development. These doubts are reflected worldwide as the French and other European boosters of the breeder have themselves backed away from it.

Finally, there remains the agonizing question of whether or not we would, in any case, want to pursue a system that generates unwieldy amounts of plutonium—the most toxic substance known to man and the material of nuclear weaponry. We have discouraged others from doing so; can we really afford to contradict ourselves?

Mr. Chairman, it is rare for this House to face such an obviously avoidable expenditure as continued funding for Clinch River. The movement to purge is a bipartisan one that originated with our very able colleagues in the Science and Technology Committee after a lengthy review that reevaluates years of prior support.

Surely these dollars would be better spent on productive energy research. Speaking as a Member who has supported the safe use of nuclear power, let me say that this is not a vote against atomic energy; it is a vote for fiscal sanity and prudent public policy.

There has been no better assessment of this question than that of our esteemed former colleague from Michigan, and now Director of the Office of Management and Budget, who said in 1977: "(Clinch River) is totally incompatible with our free market approach to energy policy."

Mr. Chairman, this project has become an indefensible white elephant, and every Member of Congress knows it. If private industry wants to pursue it, fine. But the American taxpayers should not have to foot this exorbitant bill any longer.

I yield back the balance of my time.

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Chairman, the Clinch River breeder reactor project and the U.S. LMFBR program have the support of a wide variety of individuals and groups throughout this country, from the nontechnical laymen and women who urge U.S. energy independence to the distinguished scientists whose technical

knowledge of the program is testimony to its correctness.

Many of the most respected scientists in the United States stand firmly behind our breeder program and CRBRP. Representing the group Scientists and Engineers for Secure Energy, Inc., known as SE2, several of these renowned technical experts have felt compelled to speak out again recently to counter opponents who want to delay or terminate our breeder program by cancelling Clinch River. Notable experts, such as Alvin Weinberg, Norman Rasmussen, Dixy Lee Ray, and Manson Benedict as well as four Nobel laureates including Hans Bethe, are some of the 17 SE2 members whose recent concensus in favor of the breeder bears repeating.

These distinguished scientists summarized their support by four key points: First, that the LMFBR is the only already proven technology which can serve as guaranteed insurance against possible, future energy crises;

Second:

At the time of possible, future deployment, LMFBR's will be a secure, and most probably economical way by which to convert nuclear power technology into a truly renewable energy resource of unlimited potential;

Third:

In many respects, the CRBRP is the most advanced development project of its kind. If promptly pursued and properly followed up, it may open the way for the United States and the world to acquire, by the turn of the century, a fully commercially applicable, advanced breeder technology at precisely the time when a massive introduction of such a resource may become necessary.

Their fourth point states:

In view of recent political developments in certain Western Countries, particularly, France, the Clinch River Breeder Reactor Project may become the only reliable technological undertaking of its kind in the Free World.

These four points carry powerful significance since they come from such a respected group. In their wisdom, these scientists further state:

Our support for the steady development of the LMFBR technology in this country does not in any way reduce our enthusiasm for the search for, and development of, alternative sources for the secure generation of nuclear power. In particular, we fully endorse the call by Edward Teller for an ongoing assessment by a national body of technological experts of various known and promising technical options . . . Nevertheless, we strongly believe that such an assessment of additional alternatives should proceed concurrently with the vigorous, and rapid, development of the Clinch River Plant.

These eminent scientists clearly recognize that the United States cannot turn its back on any potential future energy resource and that no one source by itself is sufficient to meet our energy needs. Dependence on one or two sources to the exclusion of others with promise is indefensibly poor stewardship. Let us return to better management of our resources by completing the Clinch River project which we can only do by voting against this amendment.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Chairman, this is the fourth year of controversy in Congress over the Clinch River breeder reactor project, and I have heard a lot of arguments on the subject. There have been endless paper studies, reports, investigations, and hearings. There have been a lot of misconceptions. I would like to address several of the key areas of misconception.

One basis of arguments by CRBR opponents is that the design is obsolete. This would be an effective criticism since very few Members of Congress are technical experts in breeder design areas. However, the design of the Clinch River plant has been continually updated as it has proceeded. R. & D. and proof test programs as well as requirements indentified in the course of NRC licensing proceedings have been the basis of upgrading. New features, such as the most advanced core design in the world, have been incorporated. We are leading the world in our ability to analyze the core activity. A recent comprehensive study has confirmed that the loop-type design of Clinch River is also the correct design for U.S. breeder reactors. The French would like to incorporate many of our design features in their superPhenix.

At the Science and Technology Committee hearings, we heard representatives of the previous administration; they could not identify one single obsolete system or component; they could not suggest one feature that could be modernized. At least 13 independent Government reviews since 1975 have confirmed that the Clinch River is not technically obsolete. In addition, unique features to meet U.S. safety and licensing requirements, not contained in foreign design, have been incorporated. If we were to rely on buying a breeder design from a foreign country, as has been suggested by some opponents, these designs would be unlikely to meet U.S. safety and environmental requirements.

The CRBR has been opposed on economic grounds. Stopping the CRBR now would not save money. Ending the breeder would also mean a heavy cost. With close to $1 billion already spent, the General Accounting Office has estimated that it would cost as much as $350 million more to terminate the project. This means that even if it is halted now, nearly half the cost of completing it would be spent anyway—without benefits to the taxpayers. In addition, we could incur the eventual cost of $3 billion to build another demonstration reactor if we don't continue to support this option.

On the contrary to arguments that stopping the CRBR would save money, the breeder offers society positive economic benefits. In his 1979 American Society of Mechanical Engineers paper, "Perceptions of Risks and Timing in Breeder Development Decisions," C. Braun, research manager of the Electric Power Research Institute, states:

The conclusion of this section is that breeders introduction into the generation mix offers the potential for significant reduction in electricity cost and beyond the confines of the electric sector-increase in total personal consumption. Foregoing or delaying the FBR option will result in an economic penalty. The magnitude of the unexpected FBR introduction savings cannot be exactly computed due to our inability to foresee the future evolution of all the relevant parameters. A reasonable range of the economic risk of delayed FBR commercialization is up to 300 billion discounted 1978 dollars or up to 10 percent of generation costs.

Critics have pointed to cost increases since the CRBR was first conceived. We all have seen cost increases since then. But the overwhelming majority of cost increases for the CRBR are due to changes and cost factors imposed on the project by external factors—continuing indecision attributable to the national policy debate over the breeder, licensing changes, the impact of delays and escalating inflation. Critics of the project claim that the cost increases demonstrate that the CRBR is not cost beneficial and is no longer justified. However, we all know that much of the cost increases are attributable to factors beyond the control of the project management.

Finally, the project can be completed, by 1990, for about $2.2 billion—about what 10 days' worth of imported oil currently costs the United States, and less than what only one synthetic fuel plant will cost.

We have heard a great deal of debate about the need for the CRBR. This country has indeed many energy options, but there is a concurrence among the experts in energy policy that no one option will satisfy all of our future national energy needs—not solar, not nuclear, not geothermal, not coal, not conservation, and certainly not oil. We need each and every one of these energy options. The breeder technology is a crucial piece of our nuclear option and to foreclose that option now is to restrict the flexibility this country will have in responding to energy problems in the future. In summary, I believe the Clinch River breeder reactor project is not only needed but that this country cannot afford to foreclose the option that the CRBR project offers. I urge my fellow Members to support this appropriation and to vote against the Coughlin amendment.

□ 1120

Mr. COUGHLIN. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague from Pennsylvania (Mr. COUGHLIN) which deletes the fiscal year 1982 funds appropriated for the Clinch River breeder reactor.

I have always supported the reactor in the past, because I believe that we must pursue all available means of energy development if we are ever to solve our energy crisis. I continue to believe that breeder technology is an important option in our energy future. However, my general support for breeders does not now extend to the Clinch River project for several reasons.

Most importantly, this year we are considering Clinch River under circumstances of unprecedented budgetary stringency. The difficult choices that we have made this year necessarily put Clinch River's funding on a different footing. After making cuts in a wide array of Government programs, keeping Clinch River in the Federal budget would be irresponsible. Budgetary economies require priorities, and Clinch River, with its $3.2 billion price tag, its lack of commercial viability, and its progressively more dated technology, cannot be considered a priority.

Time is simply passing this project by. Clinch River was established on the basis of two energy assumptions: A great rise in the demand for energy, and a great drop in the supply of uranium, and neither assumption has proven correct. The economic environment in which Clinch River was intended to operate has never materialized, and probably will not until sometime between the years 2030 and 2050. While I believe that someday we will have to spend money on a breeder project of at least Clinch River's scope, that day is some years away. Furthermore, when we do spend that money, it will be for a project that is the up-to-date product of the breeder research then being done, rather than on Clinch River, which is rooted in assumptions and technology that are over 10 years old.

Clinch River is also not commercially viable—the generally gloomy economic outlook of our allies' breeder programs, and the falling percentage of our utilities' contribution to Clinch River's costs are evidence of this. The new administration has claimed it will only support commercially viable programs, yet it continues to support Clinch River. Clinch River cannot compete economically with other forms of energy generation, so that its continued Federal support represents a subsidy for nuclear interests that is inconsistent with the administration's stated policies. Furthermore, Clinch River is funded at a disproportionately high level compared to other alternative sources of energy. This funding bias works to the disadvantage of solar and conservation programs, for example, and is also contrary to the administration's stated objective of getting the Government out of the business of determining the optimal mix of the Nation's energy sources.

No program can be immune from budget scrutiny, and I believe that such scrutiny bears out deleting Clinch River's funding at a time of Federal spending cutbacks. Cutting this project's funding will not harm our energy situation, and will save a good deal of money. Considering all the cuts that we have made this year, Clinch River should also go. I urge my colleagues to vote "yes" on this amendment.

Mr. COUGHLIN. Mr. Chairman, I yield 1 minute to the gentleman from Illinois (Mr. PHILIP M. CRANE).

Mr. PHILIP M. CRANE. Mr. Chairman, the Clinch River breeder project has been with us for a long time now. Since 1970, when the project was originally authorized, it has suffered the fate of many Government-run, bureaucratically managed projects—its costs have skyrocketed, its schedule has slipped, its management and contractual problems have multiplied.

After 10 years of this type of Government management—what do we have?

We have a project that is running 450 percent over cost.

We have a project that is not an economical source of power.

And, worst of all, we have a project for which the American taxpayer will be picking up 91 percent of the tab.

All this is before construction has even begun.

After 10 more years of this kind of management—what will we have?

We will have a project that will cost the American people billions more in precious Federal dollars—it is unclear how much the costs will escalate when construction actually begins.

We will have a 375-megawatt powerplant that is not needed by the region for which its power is intended.

And we will have a demonstration breeder which cannot be marketed or commercialized by anyone in the private sector.

The current Director of OMB, when he was my colleague in the House, made this point very clear. Let me quote him:

> Development of energy technology options should not be confused with their marketing and commercial introduction * * * therefore, the only justification for any continued funding of the Clinch River project is the hard economic judgment that the market would select the breeder during the 1990's as the lowest cost form of nuclear electric power production. (The Market Case against the Clinch River Breeder Project, Sept. 17, 1977)

David Stockman did not think it very likely that the private markets would justify this lavish funding for a breeder demonstration.

So the question is clearly one of whether the Government should step in and make this decision for the private sector.

Whether we in the Congress should substitute our judgment for the wisdom of the market.

Whether we should commit untold billions of dollars of taxpayers' money to a project which the market will not support.

I think it is time we stopped making these decisions for the market. That was one of the meanings of the election last November. I intend to vote against further funding of this project, because it is apparent to me that it is unnecessary and, in a true sense, out of control.

If we are ever to control the Federal budget, if we hope to achieve a balanced budget by 1984, we must have the discipline to oppose such runaway ventures as the Clinch River breeder reactor.

I urge support of the gentleman's amendment.

Mr. BEVILL. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Chairman, in the breeder reactor, our Nation has a technology which will allow us to use our domestic energy sources more thoroughly than ever before. Breeder reactors will renew our unrenewable uranium supplies which cannot be used in today's reactors by converting them into plutonium fuel. This fuel can then be used in both conventional nuclear plants and in breeders.

Nuclear power, along with coal, will become increasingly important to a more balanced U.S. energy supply mix. These sources can displace the burning of precious oil and natural gas for electricity generation. Currently, the oil U.S. utilities burn to generate electricity is equal to nearly half of the petroleum imported from the Middle East. A single nuclear plant can replace 10 million barrels of oil annually. The oil burned for electrical generation can thus be freed for essential transportation uses.

Even at the lower electrical growth rate expected in the United States—estimated to be roughly 3 percent—our electricity needs will double in only 23 years. That means twice as many powerplants. While new technologies such as solar will help, they cannot make the contribution of proven technologies such as nuclear and coal.

To insure that the nuclear option remains open, utilities must be assured of future fuel availability. The breeder

reactor can help to provide this assurance. Conventional nuclear plants now supply approximately 12 percent of the Nation's electricity, but they do not derive the maximum benefit from our natural uranium resources because they can use only a fraction of the energy value that the uranium resources contain. In the process of making fuel for today's light water reactors (LWR's) the abundant portion of uranium (U^{238}) is removed. Millions of tons of this presently useless material represent an energy resource equivalent to 100 times the total energy now being consumed annually in the United States.

Uncertainties over future electrical growth rates and fuel availability demand prudent planning. If we halt the Clinch River breeder demonstration plant, we retard the breeder option and invite continued dependence on costly and unreliable foreign oil.

The United States needs energy made in America. In our breeder program, the Clinch River plant is the next prudent step to demonstrate breeder technology in a time frame which will allow private enterprise to make confident decisions about future breeder use.

France, Japan, the Soviet Union, Great Britain, and West Germany are all ahead of us in actual breeder operation. The commercial-size Super Phoenix in France is scheduled for 1983 operation under joint European sponsorship. These nations have recognized the breeder's potential value as a necessary future energy source. Our technical base, however, still surpasses theirs. If we want to retain our leadership in breeder technology, Clinch River must be completed. We hold the promise of this technology in our grasp today. We must not again lose our leadership in an important technical area.

I strongly support the continuation of Clinch River, and I urge my colleagues to support it as well by voting against this amendment.

Mr. SAM B. HALL, JR. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Missouri. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. I thank the gentleman for yielding.

I would like to associate myself with the remarks of the gentleman from Missouri in support of the Clinch River breeder project.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I rise in support of the Coughlin amendment.

Mr. LUNDINE. Mr. Chairman, I rise in support of the amendment of the gentleman from Pennsylvania (Mr. COUGHLIN).

We have, as my colleagues know, a very tight research and development budget situation this year. This is too large an allocation of Federal research and development dollars to one project possibly to be justified. This investment cannot be justified because demand for electricity has been reduced.

We have enough uranium to produce electrical energy from light water reactors for the next 50 years. We have much more promising research and development under way which can address the 21st century energy needs of this country.

This takes valuable resources away from our research and development programs for fusion, for advanced breeder research, and for nuclear safety.

Now I favor the generation of electricity by nuclear energy and I want to make it very clear this is not an argument between the pronukes and the antinukes. I really believe that in order to accomplish the transition to a renewable source of energy in the next century we are going to need nuclear energy and we are going to need more of it.

However, if we examine objectively the Clinch River project, neither is it high enough priority to be included to this extent in our research and development activity, nor is it a prudent investment in our energy future.

This is a simple question. It is a question of cost, a question of priorities, a question of market conditions.

This project will cost upward of $3 billion. Today, the utility contribution is less than $100 million. That is less than 10 percent of the total amount spent to this date. There is a reason for this lack of support. It is not just that there have been cost overruns. It is clearly that the project will not suffice in market analysis today. The Stockman memorandum has been already widely discussed and it goes, I think, even though 4 years old, very incisively to the point that utilities are not investing because utilities realize that this is a poor investment.

The total amount spent today, $1 billion, is an investment, there is no question about that, but we can save well over $1.7 billion by terminating this project today.

So, in conclusion, I would say whether one is for nuclear energy or one is opposed, look at it from the standpoint of the priorities of our research and development activities, look at it from the standpoint that our resources are by no means unlimited and I urge my colleagues to support the amendment of the gentleman from Pennsylvania (Mr. COUGHLIN) and defeat the further waste of these funds on this project.

Mr. BEVILL. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I rise in opposition to the amendment. The opponents of Clinch River try to tell us that the energy policy of this country is a free market energy policy. I assume they consider OPEC a figment of one's imagination. They believe that the Nuclear Regulatory Commission has not been overly cautious in delaying the licenses of a dozen nuclear plants which are costing the consumers hundreds of millions of dollars in construction loans and other financing costs each year.

Now these same people want to throw away the $1 billion already invested in this project which is the focal point of over 20 years of breeder reactor research and development. Add to that over $300 million in unsettled claims and termination costs that the Government will have to pay to close down the project and you come out with a net loss of $1.3 billion as a minimum.

If you proceed in building the plant you will soon have a facility which will generate over $2.6 billion in revenue in its first 5 years of operation—while providing important operating experience. In the 30-year lifetime of the plant you will generate revenue of more than six times that amount for a total of close to $14 billion.

If it is really a case of economics, I think that would make good sense to these opponents. On top of that benefit is the engineering and fabrication experience which would be gained in building this plant in the United States to our safety standards.

President Reagan supports Clinch River. The scientific and engineering communities support Clinch River. Even Dr. Teller has changed his position and supports Clinch River. Let us build this research and development project and get our domestic energy program moving forward again. Let us be able to use our uranium resources 60 times more efficiently. And let us bring to an end the misstatements in the media about an energy program that can provide us with an energy source equal to all the oil in the free world.

□ 1130

Mr. COUGHLIN. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. DUNN), a member of the authorizing committee.

Mr. DUNN. Mr. Chairman, I rise as a supporter, a strong supporter, of nuclear energy. However, I also rise in support of this amendment. I rise in support of utility companies across this Nation, utility companies that are facing regulatory problems, that

cannot get decisions from the NRC, while the attention of this Congress and a great deal of the taxpayers' money is being spent on the Clinch River reactor, an uneconomical and ill-advised project.

I rise in support of utility companies that cannot find adequate funding for many technologies due to money being spent on projects like Clinch River, utility companies that say there are increased sources of uranium, utility companies that are facing problems of lesser demand for electrical energy. Until we solve important problems of transportation and disposal of nuclear waste, and until we solve some public perception problems, there certainly is no need for Clinch River and other projects of huge expense and questionable value.

I rise in support of an administration that has continually said to our committee, "We support basic research. We are against funding near-term commercialization that better belongs in the hands of free enterprise."

Finally, I rise in support of the American taxpayers. The administration has urged that we cut wasteful Government spending. The Clinch River breeder reactor is an excellent example of it.

Mr. COUGHLIN. Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman has 27 minutes remaining.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentleman from New Hampshire (Mr. GREGG), a member of the authorizing committee.

Mr. GREGG. Mr. Chairman, I do come from New Hampshire. I think that is an important fact in this debate because New Hampshire has the Seabrook powerplant which is, and unfortunately has become, the lightning rod of the issue of nuclear energy in this country.

I am a strong supporter of Seabrook. I am a strong supporter of completing Seabrook. I am a strong supporter of nuclear power, but I do not support the Clinch River breeder reactor. The simple fact is that this is not a referendum on nuclear power, as some would have the Members believe. This is a referendum of economics. This is a referendum on the question of how one is going to justify in today's economy a project which is clearly not economically viable.

No matter how one looks at this project, it is not a commercial technology within this century. That is the important point.

We are asked here to build a plant which, for it to be commercially viable, must have a uranium cost of at least $100 per pound. Today uranium does not cost $100 per pound. It is not projected it will cost $100 per pound in this century.

The result of that is that we are building a plant which cannot compete—simply cannot compete—with light-water technology as a commercially viable entity in this time or in the time of its life.

We are told by many that the reason to build this plant is so we will be ready for the time when commercial technology breeder reactors will be available. We are told to build this plant because it is needed to design and prepare for that time which will occur some time around the year 2020 if one is optimistic, but most likely later.

What we are really doing is, we are forcing this technology on the marketplace by building this plant today. We are artificially taking the assets of the country and directing them toward a technology which simply cannot compete. We are not planning for the future; we are creating a situation which today will demand a nationalization basically of the nuclear industry, because we will have created a technology which is not viable without huge Government subsidy. Once you have that huge subsidy supporting the industries which build that plant, the $3 billion to $4 billion in industries which have been built up around the construction of that plant, we will have basically nationalized those industries, because they cannot survive in the marketplace without Federal support.

We have also heard that the termination costs are going to outweigh the benefits of terminating. That is simply not true. In our committee it was made very clear. That termination argument simply does not work. The facts are the termination costs, as our committee found them, were somewhere between $45 million and $50 million and they are still going up and nothing has been put in the ground.

I ask that the Members support nuclear energy in the free marketplace by voting for this amendment.

Mr. BEVILL. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Chairman, as the ranking member on the Science and Technology Committee, I rise in opposition to the Coughlin amendment to delete funding for the Clinch River breeder reactor.

Rising in support of this CRBR project is something that I have often done in the past. I must admit that almost all that can be said has been said in those past debates, to support the idea of building the Clinch River plant, and it is being repeated here today for us. But there are some issues that have not been answered. Nowhere in the debate today have I heard a reasonable answer to some disturbing questions:

What is to follow if Clinch River is terminated? Will the large plant visualized in the recently completed contractual design study be constructed? If not, what will substitute for Clinch River as the focus of the Nation's breeder reactor program, and what form will the program take?

Will the domestic industrial infrastructure be available when needed to design, fabricate components, and build the large plant at some future time?

Is it prudent to construct and operate on a utility grid a large breeder reactor without benefit of intermediate scale up?

What effect will termination of the Clinch River project have on utility confidence in the Federal Government's commitment to fast breeder reactor development and on possible utility financial participation in any future project?

What will be the effect on our position as a leader in the world for nuclear energy policy?

What are the answers to these questions? What do we have left if we decide to kill the CRBR? The General Accounting Office was equally concerned about the result of a lack of focus for the breeder program. They stated in a September 1980 report on the overall fast breeder research and development program that if the Congress wished to maintain a nuclear option or if it wishes to commit to nuclear power as a long-term energy source, a breeder reactor should be constructed and operated to demonstrate the technology. If Congress is unable to agree on an approach for preserving the breeder option, or if it does not wish to do so, then the GAO believes we should consider terminating the breeder program. But, once terminated, any future decision to restart the program would cost many years of development time and leave the United States with the possible alternative of purchasing breeder reactors from foreign sources if future energy developments indicate a need for the technology.

So the Coughlin amendment would leave us in this worst of all possible worlds: Spending over $300 million on liquid metal breeder reactor research, with no focus to the program. This is the truly fiscally irresponsible thing to do.

I would like to shift my discussion to the latest investigation effort concerning the CRBR. On July 20, 1981, the House Committee on Energy and Commerce held a hearing on the Clinch River breeder reactor (CRBR) project, called by the Investigations and Oversight Subcommittee. The purpose of the hearing, according to headlines in the Washington press prior to the hearing, was to expose the CRBR project as "a management fiasco and a growing financial disaster."

The hearing produced no significant new information. There were no new charges. Similar subjective comments

have been made in the past that the project is grossly mismanaged and that the Federal Government is being ripped off. However, after something in excess of 400 investigations, none of these charges have been substantiated. As a consequence, I do not know how an individual of apparent "folk hero" status could provide a more indepth review of the project in just 2 months' time.

At this time, I wish to insert a partial list of the reviews and investigations that have been made of the LMFBR demonstration program, stretching back to November 1962 and continuing up to February of this year:

REPORTS ON CRBR PROJECT BY THE OFFICE OF THE INSPECTOR GENERAL AND ITS PREDECESSORS, JULY 20, 1981

Jun. 1975 (44-2-356): "Allegations of Conflict of Interest on Part of Acting Assistant Director, CRBRP."

Oct. 1976: "Inspection of Clinch River Breeder Reactor Plant Project Office."

Nov. 1976: "Audit of ERDA's Administration of the Westinghouse Procurement Function."

Dec. 1976: "Audit of Employee Relocation Costs."

Jan. 1977: "Audit of CRBRP Project Office Unpaid Obligations and Other Financial Matters."

Mar. 1977: "Payroll and Travel Support Services Provided for the CRBR Project Office."

Apr. 1977: "Review of CRBR Project Office Audit of TVA Costs During fiscal year 1976."

Jul. 1977: "Review of Budget Administration"

Oct. 1977: "Evaluation of CRBR Audit of Project Management Corporation's Accounts and Records."

Oct. 1977: "Review of CRBR Financial and Accounting Reporting System."

Oct. 1977: "Annual Audit Statement—CRBRP Project Office."

Nov. 1977: "Review of CRBRP Contracting and Procurement Activity."

Feb. 1978 (26-2-197): "Allegation of Loan to and Attempted Bribe of an Employee of Atomics International."

Feb. 1978: "Audit of CRBRP Project Office Unpaid Obligations and Other Financial Matters."

Apr. 1980 (OIG-9-12): "Allegation of Procurement Irregularities on Part of Two Employees of Rockwell International."

Feb. 1981 (PI-71): "Allegation of Misuse of CRBRP Computer Resources."

A BIBLIOGRAPHY OF MAJOR LMFBR AND/OR CRBRP PROGRAM REVIEWS—DEPARTMENT OF ENERGY, JULY 20, 1981

Nov. 1962: A Report to the President, USAEC.

Feb. 1967: The 1967 Supplement to the 1962 Report to the President, U.S. AEC.

July 11, 1969, and June 2, 1970: Congressional debate on the merits of the proposed program resulted in Authorizing Legislation for the First U.S. LMFBR Demonstration Plant: Public Law 91-44, Project Definition Phase (PDP); and Public Law 91-273; Definitive Cooperative Arrangement Phase (DCA).

Mar. 1972: LMFBR Demonstration Plant Program: Proceedings of the Senior Utility Steering Committee and Senior Utility Technical Advisory Panel, WASH-1201, U.S. AEC.

Aug. 7, 1972: Memorandum of Understanding signed by PMC, BRC, TVA, CE, and U.S. AEC; Resulting from a review to establish the intent and needs to be fulfilled by the Project. Presented to and approved by the U.S. JCAE following public hearings before the Committee on September 8, 9, and 12, 1972.

Sept. 25 through Oct. 17, 1972: Contractor Selection Evaluation Panels, PMC/U.S. AEC/CE. Convened to evaluate contractor proposals for accomplishing the objectives of the Project, including technical ideas.

Annually from 1973 to present: PMC Annual Reports to the BRC Project Review Committee, R. Jortberg and D. Keeton, PMC.

Dec. 1973 LMFBR Program Plan—2nd Edition, WASH 1101-1110.

Dec. 1973: Report of the Cornell Workshops on the Major Issues of a National Energy R&D Program. Included: Workshop on the Short-Term Nuclear Option, A. M. Weinberg, Chairman, and the Workshop on Advanced Nuclear Power, H. Bethe, Chairman.

June 1974: CRBRP Reference Design Report (Vols. 1 & 2), Baseline Cost Estimate (Vols. 1 & 2, the "White Book"), and Baseline Schedule; compiled for PMC as part of the U.S. ERDA LMFBR program with input from the Contractors. In support of these documents, the following reviews transpired:

Oct. through Dec. 1973: Review of Initial Conceptual Design, Cost, and Schedule Estimates by U.S. AEC, PMC, Contractors.

Jan. through Mar. 1974: CRBRP Re-Design and Cost Reduction Task Forces, a total of eight groups including the short-shaft pump and steam generator building task forces.

Apr. through May 1974: Independent Cost Review by U.S. ERDA (other than RDT), including the Comptroller, Construction, and Contracts Divisions, and the Project Cost Review by U.S. ERDA/RDT.

Apr.-Aug. 1974: Reactor Manufacturer/Utility Co./National Lab Recommendations on the LMFBR Program ("Tampa Meeting" Reports, consisting of ten letter reports and U.S. AEC summary).

June 1974: Operation Genesis, A Comprehensive Report of the CRBRP Project, U.S. AEC and PMC.

Aug. 7-9, 1974: Procurement Review of WARD, Chicago Operations Office.

Sept. 1974: Revised Cost Estimate for CRBRP, U.S. AEC (SECY-75-244).

Fall 1974: Blackwell Committee Review (reviewed FFTF at Richland, than CRBRP at Germantown with Riley, Ross, et al.).

Jan. 1975: Report of the LMFBR Program Review Group (Klein/Culler Report).

Apr. 4, 1975: Comments on Energy Research and Development Administration's Proposed Arrangement for the Clinch River Breeder Reactor Demonstration Plant Project, RED-75-361, U.S. GAO.

Apr. 10, 1975: CRBRP Environmental Report docketed by the U.S. NRC following extensive acceptance review.

Apr. 28, 1975: The Liquid Metal Fast Breeder Reactor Program—Past, Present, Future, RED-75-752, U.S. GAO.

May 22, 1975: Cost and Schedule Estimates for the Nation's First LMFBR Demonstration Power Plant, RED-75-358, U.S. GAO.

May 1975: Independent Reactor Development Program Review, Manson Benedict et al., review convened at Tampa Airport.

June 5, 1975: CRBRP PSAR docketed by the U.S. NRC following extensive acceptance review.

July 31, 1975: The Liquid Metal Fast Breeder Reactor: Promises and Uncertainties, OSP-76-1, U.S. GAO.

Aug. 1975: CRBRP Current Cost Estimate (Blue Book), PMC.

Aug. 1975: CRBRP Revised Cost Estimate (Green Book), PMC.

Nov. 1975: The LMRBR—Decision Process and Issues, EPRI SR-20.

Dec. 15, 1975: The LMFBR Program later designated ERDA-67, U.S. AEC.

Dec. 1975: Final Environmental Statement for the LMFBR Program, 3 Volumes, ERDA-1535.

Dec. 1975: Alternative LMFBR Program Plans—A Preliminary Examination of the Scope and Timing of LMFBR Plants and Test Facility Projects, ERDA.

1975: Analysis of the ERDA Energy Plan, Office of Technology Assessment, ERDA 48, U.S. Congress.

1975: Hans Bethe Committee Review, Nemzek, Kintner, Riley, Cunningham, et al., held at the Key Bridge Marriott Hotel.

1975: Review of the LMFBR Program and the Role of CRBRP, Review convened by Commissioner Anders with about 20 participants including Levenson, Van Nort, Taylor, Iacobellis, Nemzek, et al., at H Street.

Jan. 1976: Review of National Breeder Reactor Program, U.S. JCAE.

May 6, 1976: Can the U.S. Breeder Reactor Development Program be Accelerated by Using Foreign Technology, RED-76-93, U.S. GAO.

Aug. 1976: Final Generic Environmental Statement on the Use of Recycle Plutonium in Mixed Oxide Fuel in Light Water Cooled Reactors (GESMO), NUREG-0002, 5 Volumes, U.S. NRC.

Nov. 29, 1976: Considerations for Commercializing the LMFBR, EMD-77-5, U.S. GAO.

Dec. 1976: Liquid Metal Fast Breeder Reactor Program—Overall Plan, ERDA 67.

Jan. 1977: Report of the Task Force on CRBRP Scope, Status, and Design (the Rizzo Report), U.S. ERDA.

Feb. 1977: Final Environmental Statement Related to Construction and Operation of the CRBRP, NUREG-0139, U.S. NRC Office of Nuclear Reactor Regulation.

Apr. 5, 1977: CRBRP Cost Estimate Review Team; Final report to the LMFBR Steering Committee (the Passman Review), U.S. ERDA.

Apr. 5, 1977: The Fission Breeder—Why and When, U.S. ERDA.

Apr. 6, 1977: LMFBR Review Steering Committee, U.S. ERDA, Convened by President Carter. Majority Opinion by Culler, Ayers, Benedict, Everett, Laney, Starr, Walske.

July 25, 1977: An Evaluation of the National Energy Plan, EMD-77-48, U.S. GAO.

Oct. 1978: Alternative Breeding Cycles for Nuclear Power: An Analysis, Congressional Research Service, Library of Congress.

May 7, 1979: The Clinch River Breeder—Should the Congress Continue to Fund It? EMD-79-62, U.S. GAO.

May 11, 1979: The Clinch River Breeder Reactor Project—An End to the Impasse, (White House White Paper).

May 23, 1979: Nuclear Reactor Options to Reduce the Risk of Proliferation and to Succeed Current LWR Technology, EMD-79-15, U.S. GAO.

July 10, 1979: Comments on the Administration's White Paper—"The CRBR Project; An End to the Impasse," EMD-79-89, U.S. GAO.

Dec. 1979: Nuclear Proliferation and Civilian Nuclear Power Report, DOE/NE-001, U.S. DOE. This is the final report of the Non-Proliferation Alternative Systems Assessment Program (NASAP).

Dec. 25, 1979: Final Report of the Committee on Nuclear and Alternative Energy Systems (CONAES); Energy in Transition 1985-2010.

Mar. 1980: Assessment of the Status of the CRBRP Project and Update of the Total Estimated Cost to Complete the Project (the Rizzo Task Team Review), U.S. DOE.

Feb. 25, 1980: Final Report of the International Nuclear Fuel Cycle Evaluation (INFCE). Summary Volume published by the IAEA, Vienna Austria, March 1980.

Sept. 22, 1980: Report to the Congress; the U.S. Fast Breeder Reactor Program Needs Direction, EMD-80-81, U.S. GAO.

Perhaps the saddest mistake made in this investigation is this obsession to rehash, retrench, and renounce. We should be addressing this challenge of designing, constructing, and operating breeder technology which has the ability to use our own resources, to utilize our own expertise, to strengthen our energy arsenal, to expand our national capabilities, and to spend our money at home.

Therefore, I urge my colleagues to oppose the Coughlin amendment and support the wise use of our uranium resources, by developing the breeder technology.

□ 1140

Mr. Chairman, with my remarks today I wish to include a letter from the Secretary of Energy, dated July 21, 1981, and addressed to me. The letter is as follows:

THE SECRETARY OF ENERGY,
Washington, D.C., July 21, 1981.

Hon. LARRY WINN, Jr.,
House of Representatives,
Washington, D.C.

DEAR MR. WINN: As we approach a probable vote in the House of Representatives on funding of the Clinch River Breeder Reactor (CRBR), I want to reaffirm the strong support that the President and those of us in the Department of Energy have for this project.

We believe that in order to resolve the technical uncertainties associated with the breeder—which at present preclude the private sector from determining its commercial feasibility—it is necessary for us to move ahead with the basic research and development work in order to lower risks and uncertainties to levels consistent with normal commercial ventures.

The CRBR offers an opportunity to demonstrate a technology which would enable a 60-fold increase in the amount of energy which can be extracted from our domestic uranium resources. It is an ongoing project in which a one-third down payment on estimated completion costs has already been made.

Thus, I urge you to vote to provide funds for this most important and ongoing project.

With best wishes,
Sincerely,

JAMES B. EDWARDS.

Mr. COUGHLIN. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, there will be a lot of whispers around the floors and the corridors of this body that a vote against this amendment is a vote against nuclear power. Nothing could be further from the truth.

Members can believe the Clinch River breeder reactor is a bad idea and still support nuclear power in general. They can support Seabrook, they can support Diablo Canyon, they can support Indian Point, they can support Three Mile Island, they can support any existing conventional light water reactor and at the same time come to the same conclusion the Wall Street Journal has come to. Their conclusion is that they think a seven times increase in the price of uranium is necessary for the breeder reactor to become economical; second, that 450-percent cost increases are unjustified in terms of the allocation of limited economic resources in our society; and third, it unnecessarily enhances the likelihood that we will spread nuclear bombs throughout our society.

Those three reasons combined are the reasons the Wall Street Journal reached this conclusion, and this does not come from the granola-chomping people of Vermont. They are opposed to the breeder reactor because it does not meet the tests of economics, and if we do not vote to slam the door on the Clinch River today, we cannot with conviction face the rest of the world. We cannot discuss with credibility with the French President Mitterrand, who has begun to turn his administration around on the question of the breeder reactor, on the implications of spreading this plutonium technology around the world, and on having a worldwide conference on the question.

We should oppose this technology because of economics, but, more importantly, we should oppose it because the plutonium material we are discussing in this particular technology is the stuff of atom bombs. It is the stuff of Armageddon, and it is our responsibility at this point in time to reject it, to reject it upon the grounds of economics and also to reject it upon the grounds of world peace and nonproliferation, which ought to be the goals that guide this body today.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Chairman, the eyes of the world are again focused on international nuclear policy as a result of events in Iraq last June. This administration most recently reaffirmed its commitment to assure that nuclear nonproliferation goals are met worldwide, and instructed appropriate Government agencies to expedite these efforts.

For the United States to influence other nations in the peaceful uses of nuclear energy, we must maintain a strong position domestically. Our continued rapid development of the U.S. LMFBR program and Clinch River enhance international nonproliferation objectives. The DOE nonproliferation alternative systems assessment program has concluded that if the United States wants to influence foreign programs, we must show leadership as an LMFBR developer.

The Carter administration's attempt to restructure the U.S. breeder program by terminating Clinch River was viewed as a sign of weakness by those nation's with fluid breeder programs who recognize the vast potential benefits LMFBR's promise. In fact this and related pious but unrealistic changes in our nuclear policies reduced our nonproliferation goals rather than strengthened them.

The United States must maintain its technical position among foreign nations rapidly moving ahead with large-scale breeder plants. This is mandatory, since it allows us to speak with authority on any foreign developments which could threaten nonproliferation principles.

Additionally, from an economic standpoint, if and when a commercial LMFBR market develops internationally, U.S. industry should be in a position to compete for a fair market share. We must proceed with Clinch River because it is an integral part of our program to retain our strong leadership role and membership in the breeder technology community. We cannot continue our dependence on foreign energy sources, or permit the future import of LMFBR whose safety and licensability are uncertain. What is more, such counterproductive action would further erode our already negative balance of trade.

A strong U.S. breeder program that includes Clinch River construction will increase our Nation's ability to have a voice in international safeguards and controls over the sale and use of peaceful nuclear energy sources, including breeder reactors. Furthermore, we need the Clinch River project in order to keep the nuclear option open for the United States and our allies in the free world who need the energy security to which the nuclear option contributes. Therefore, I urge your support to assure that Clinch River moves ahead by voting against this amendment.

Mr. Chairman, I have enjoyed the debate up to this point, because one of the arguments that those who are in support of the Coughlin amendment continue to use is that the proponents of this project try to justify it on the basis of economics.

This is not a commercial project we are discussing today. This is a research and development project, and with respect to the economic arguments, we are looking several years down the road. It seems to me that nobody has the clairvoyance to know at this point just what the economic market opportunities might be in the next century but there is one thing that we do know, and that is that in this country we have some productivity problems and we have some problems with respect to our influence over the international control of the nuclear technology. Those are the two issues that I want to address.

I find it very interesting that many of those who are in support of the amendment offered by my friend, the gentleman from Pennsylvania (Mr. COUGHLIN), come from the Midwest and the Northeast. One of the interesting things about the Frost Belt States in comparison to the Sun Belt States is that we are net energy importers. If we want to revitalize our economies, if we want to deal with the migration of business and industry away from the Frost Belt to the Sun Belt, I think we have to recognize that we need to deal decisively and with vision with respect to our lack of energy.

It seems to me that the productivity potential that is involved in this kind of project, the need to invest the basic research in this project, and the need to put our Midwestern and Northeastern States back into the position of having control of our energy future, are critical to the arguments in behalf of this project.

Second, with respect to the nuclear nonproliferation issue, when we look back to 1977, when the previous administration made its ill-advised decision with respect to Clinch River and with respect to reprocessing on behalf of the goals of nonproliferation, we need to examine what the effect of that has been. The effect of that has been that the United States is further behind in our control over the use of the advanced technologies in nuclear power.

Just recently we had the occasion, to the consternation of so many people around the world and particularly in the United States, of the Israeli bombing of Iraq. Now, what does that indicate? It indicates the United States does not have control over advanced nuclear technology as we once did, and the breeder project is part of this technology so we should continue the development of this important energy source for reasons beyond our domestic energy considerations.

I know the gentleman does not intend to do this, but the gentleman from Pennsylvania (Mr. COUGHLIN) by his amendment will have the effect, if the amendment should prevail, of driving more and more countries into the hands of other nuclear technology exporters, particularly the Soviet Union.

So, Mr. Chairman, I would suggest that we examine this issue as President Reagan has examined it. I would suggest we examine this issue as the President and the Office of Management and Budget have examined it and conclude that the overall policy of the United States, not just for energy but also in terms of our relationship with other countries around the world, particularly our allies, should be that we need to keep the nuclear option open, particularly because we may want to exercise it at the turn of the next century for both ourselves and our allies. Therefore, I urge the defeat of this shortsighted amendment.

Mr. COUGHLIN. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. MCGRATH) a member of the authorizing committee.

Mr. McGRATH. Mr. Chairman, I rise in support of the amendment to delete funding for the Clinch River breeder reactor project.

I have studied this issue carefully when we were considering it in the Science and Technology Committee, and the conclusion I reached is that the project simply does not make good economic sense at this time.

I am sure we have all heard the arguments against the Clinch River project, so I will not go into great detail here. Briefly, they are these:

First. Our projected energy demand is lower than was anticipated when the project was undertaken. Electrical growth rates since this project was undertaken have dropped from a high of 9 percent in 1969 to 1.9 percent in 1980.

Second. The slowdown in conventional reactor construction means uranium fuel supplies will last much longer than expected, so there is no particular need for the breeder at this time.

Third. Electricity from a breeder reactor is more expensive than that from light-water reactors. Experience from the world's first and only commercial breeder reactor reflects electricity costs twice that of conventional reactors.

Fourth. Clinch River would probably have little relevance to our immediate oil import problem in this country. Coal is proving to be an economic competitor for the large central power stations that use oil. Consequently, it may be well into the 21st century before breeder reactors may be needed.

In addition to these points, we cannot afford to ignore the facts presented in the Energy and Commerce Committee's report. This project is a management fiasco.

Mr. GORE. Mr. Chairman, will the gentleman yield?

Mr. McGRATH. Certainly, I yield to the gentleman from Tennessee.

Mr. GORE. Mr. Chairman, there was no report from the Energy and Commerce Committee. I will address that later.

There was a staff draft which was thoroughly and completely discredited in the hearing held based on the staff draft. So I would caution the gentleman on that if he intends to base his argument on that staff draft.

Mr. McGRATH. Mr. Chairman, I thank the gentleman for his comments.

Certainly further funding of this project would simply be throwing good money after bad.

American taxpayers have invested close to $1 billion in this project over the last 10 years. In spite of this tremendous expenditure, not one spadeful of dirt has been overturned to begin this project. When all of our citizens are being asked to make sacrifices, I cannot justify additional funding for a project whose necessity is questionable at this time.

For all these reasons, Mr. Chairman, I support the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN).

□ 1150

Mr. BEVILL. Mr. Chairman, I yield 1 minute to our distinguished colleague, the gentleman from New York (Mr. CARNEY).

Mr. CARNEY. Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN). I believe that we must press forward vigorously with the development of all of our domestic energy resources if we are to reach our goal of energy independence. The breeder option can play a major role in satisfying our future energy needs.

Our Nation's energy problems are certainly unsettling, if not downright dangerous. I am afraid that our energy future could be much worse than our energy present if we do not make the proper adjustments now. We are all aware of the fact that both oil and natural gas are versatile energy resources, but that their supply will not last indefinitely. Someday we will have to turn to other options to provide our needed energy reserves. Many, if not most, experts agree that coal and uranium will be the most appropriate domestic fuels for the generation of electricity in the future.

The breeder will help our Nation insure that nuclear power will be a useful long-term energy option. Breeder reactors have the capability to extend our uranium resources for hundreds of years. If our existing uranium resources are totally utilized, they would supply almost 3,000 times more than the total energy consumed in our

country each year, or the equivalent of almost 50 trillion barrels of oil.

The Clinch River program is one of vital importance. We must insure in this legislation that its construction goes ahead without any further delay. Testimony before my Committee on Science and Technology has clearly indicated that the United States has fallen far behind in the development of the breeder technology. This is a very disturbing trend, one which must be reversed as soon as possible. The French are now proceeding with the development of a 1,200 megawatt-electric super Phenix plant, and the Soviet Union is progressing with its BN 600 project. Several other countries, most notably the United Kingdom, Japan, and West Germany, have mounted aggressive development and construction programs to commercialize the breeder.

To abandon the Clinch River project now would be a crippling blow to our Nation's breeder program. It would freeze our technological base, and weaken our technical capability to continue to pursue breeder development. It would also signal to the world that our Nation is no longer serious about maintaining a key role in technical advancement in the nuclear field.

A recent GAO report indicates that a breeder demonstration project was an essential step in the development of this technology. Without a demonstration project, GAO found that the program would become hopelessly mired. For the benefits of my colleagues, I would just like to quote one significant finding from this report:

> Consequently, if this country wants to rely on nuclear power as a long-term energy source or even if it chooses only to preserve a future energy supply option for possible use if other energy technologies cannot carry the load, the information gathered by GAO supports the position that fast breeder technology should move forward to the construction and operation of an LMFBR demonstration plant.

Many recognized energy experts have indicated that it is imperative that our Nation go ahead with the breeder. The International Nuclear Fuel Cycle Evaluation, a 2-year study initiated by the previous administration and endorsed by 66 nations and 5 international organizations, concluded that the early development of fast breeder reactors is necessary to provide an assured supply of electricity from our nuclear resources in the future. A recent study by a distinguished panel of scientists under the auspices of the National Academy of Sciences also recommended the continued development of the breeder reactor.

Mr. Chairman, the single most important objective for our breeder program is to build Clinch River as soon as possible. Killing Clinch River will be saying to the world that we are really not serious about solving our energy problem, that we really do not care. We cannot ignore the fact that nuclear is one of the only two important energy resources we have to solve our problems in the present century, as well as the next. We cannot ignore the great fuel resources promised by this technology. A decision to go ahead will be a long overdue signal to the world that we are once again serious about nuclear energy and solving our energy problems.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentleman from North Carolina (Mr. JOHNSTON).

Mr. JOHNSTON. Mr. Chairman, I rise in support of the Coughlin amendment.

I rise in support of nuclear power and I rise especially in support of those who 10 years ago this month had the courage to cut off the funds for another very, very similar project, because 10 years ago this month the Congress of the United States voted to cut off the funding for the supersonic transport.

Now, let us think what would have happened if we had listened to those who said, "Well, we have spent hundreds of millions of dollars on developing an SST, so we have got to keep pushing forward."

Well, we would be in the same position that the French and the British are now in. We would have a bunch of them sitting on the ground unused because the economic assumptions of the SST proved invalid.

There are four SST's on the ground in France that cannot be sold. There are going to be a lot of breeder reactors in this country and elsewhere in the world that will also prove economically unfeasible.

A consortium of the French, the Germans, the English and the Dutch, have tested and demonstrated breeder reactor technology in Phenix. They are now underway with super Phenix.

It is not a question of whether or not this technology exists, just like it was not a question of whether or not an SST would fly. The French and the British have proved it; but the question is whether America's resources are best devoted to the development of a technology utilizing fission rather than fusion.

Even the experts will tell you that fission technology will always carry with it a high degree of risk.

Let us look where the smart money is putting its money. Where are Texaco and Sohio spending their research dollars? It is not in nuclear fission. It is in nuclear fusion. In a world of finite resources, let us take the billions of dollars that we would devote to a technology that is already being exploited and devoted to fusion technology, not fission technology, because some day we will have safe, efficient fusion plants, utilizing lasers, utilizing a technology that does not carry with it the risk of fission technology.

We will do it because we acknowledge that the economic assumptions of Clinch River are no longer true. In 1973 we were projecting Yellow Cake at $50 or $60 a pound in the 1980's going up to $100 a pound. The Nuclear Regulatory Commission told us that 1,000 light water reactors would be operational by the year 2000. Now they are telling us maybe 170.

Our problem is not technology. Our problem is the NRC, because the only reason we cannot use the French and the German technology is because of our own rules and regulations. If we ever need it, all we have to do is get control of the NRC and we can license the Phenix technology and construct a breeder reactor in the United States.

I beg my colleagues, let us not devote billions of the taxpayers' dollars to a technology we now know enough about to know that it does not represent the solution on the long range basis to our energy requirements.

I am totally in favor of the atomic energy program, but let us go for the real opportunity fusion, not fission.

Mr. BEVILL. Mr. Chairman, I yield 1 minute to the gentleman from Tennessee (Mr. DUNCAN).

Mr. DUNCAN. Mr. Chairman, I rise in strong opposition to this amendment, an amendment which may be better called a turn back the clock amendment, or an amendment which may make our country further dependent upon foreign nations for energy.

We are challenged once again by critics of Clinch River, many who for years have had a general antinuclear sentiment.

At a time when other industrialized nations are proceeding with their breeder program, it is certainly no time to curtail our program. Attempts to terminate Clinch River directly opposes a consensus of opinion in its favor as clearly demonstrated by congressional action during the previous administration efforts to stop it. Moreover, the current administration fully endorses this project, intending that it move ahead without further jeopardy.

Clinch River is not only the cornerstone of our current breeder program, but also a milestone project for continued domestic nuclear power development and growth. Among others, the GAO has indicated that a decision not to develop breeders implies the phasing out of nuclear fission as an energy source. A decision to stop Clinch River will have the same result. Without breeder reactors to assure long-term fuel supplies, nuclear power becomes a relatively short-term energy resource. It is for this reason that breeder foes are so determined and why we must

not be misled by their flawed reasoning.

Breeders promise to use our natural uranium at least 50 times more efficiently than current light water reactors. The respected National Academy of Sciences in its "Energy in Transition" report concluded that we need all our resources, especially coal and nuclear. The Academy has said that breeders would make uranium a potential source of energy for thousands of years.

We need not even look to the future to recognize nuclear power's economic benefits. They exist today. For example, the Commonwealth Edison Co. uses coal, oil and nuclear fuel to make electricity. Because of its heavy use of nuclear, Commonwealth's customers saved $460 million during 1980 over what they would have paid if these nuclear units had been coal-fired plants.

Regulatory uncertainty and financing limitations already place a heavy burden on nuclear power viability. If Clinch River is terminated, the nuclear option will be even more in peril. I firmly believe Clinch River is an opportunity for greater energy independence that we cannot afford to ignore. This amendment should not be accepted by the Congress.

Mr. COUGHLIN. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, I rise in support of the amendment. The reason is, we have to establish our priorities in energy. We have to start looking at the priorities among solar, coal, conservation, oil shale, and fusion energy and a lot of other technologies.

I look at Clinch River and it does not fit into any kind of energy scheme that I see for America. Clinch River to me is a waste of our money, but abandoning Clinch River does not mean we are abandoning breeder technology. We are going to be spending over $400 million on breeder technology without Clinch River.

So then why spend $3.2 billion on this reactor, especially when the noted physicist, Edward Teller wrote in a telegram to one of the Members of Congress:

> Clinch River is technically obsolescent, its small size and large cost make it thoroughly inconsistent with badly needed economy in Government.

Now, some people will say that Edward Teller backed away from that position in later letters. I would suggest if you look at the context of those letters, the first telegram he sent was unsolicited, the later letter was solicited, and I would suggest to you that Edward Teller was heavily lobbied to change his position for this solicited letter comprises what was unsolicited and what he was lobbied to do.

This is the same thing we saw once before with one of our noted physicists, Hans Bethe, noted Cornell physicist, who came before the Science and Technology Committee about 3 years ago. I was sitting there, when the Nobel Prize winner stated the same thing as Edward Teller said—that Clinch River was outdated. Then a couple of months later, when I had pointed this out to one of the contractors that was working the Clinch River project, they said, "We will come back with a letter showing you where Hans Bethe is." And they did. The contractor came back with a letter that changed Bethe's position and was signed by Bethe.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BEVILL. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. ERTEL. So what has happened, we have seen a very effective lobbying effort; but really, what is the truth? Do they really believe it is obsolescent? Do they really believe it is too small? I would suggest that is exactly what they believe.

It seems to me it is time we get our priorities straight in this country especially when we are cutting back on coal development, when we are cutting back on other types of development of energy sources, the priorities leave no room for $3.2 billion to be spent on a Clinch River project which is obsolete and does not fit into our energy program.

Mr. Chairman, I would suggest that we approve this amendment to delete Clinch River.

□ 1200

Mr. COUGHLIN. Mr. Chairman, I yield 5½ minutes to the gentleman from Michigan (Mr. WOLPE), a member of the authorizing committee.

Mr. WOLPE. Mr. Chairman, it is not uncommon up here to find many lobbyists and many special interests playing what is termed, "hardball." But in this particular issue I think someone is out there playing with pistols and tommyguns.

The gentleman from Pennsylvania (Mr. ERTEL) a moment ago referred to the position of Dr. Edward Teller, one of the most prestigious and prominent nuclear scientists in the country, who not long ago observed that Clinch River is technically obsolete and its small scale and large costs make it thoroughly inconsistent with badly needed economy in government.

That was not the only time Dr. Teller spoke to that issue. On another occasion he wrote:

> In 36 years of development, in which billions of dollars have been spent in the United States and even more worldwide, and in which the best nuclear engineers have been involved, a fast breeder reactor still remains years away from a practical economical possibility. * * * The Clinch River Breeder Reactor might well be considered a symbol for the renewed support of the nuclear industry. However, a symbol that cost three or four billion dollars might well be considered too expensive.

Then Dr. Teller only this week sent another letter out—this time to Martin Anderson over in the White House saying, and I quote:

> I have sent you a copy of my recent letter to all Members of Congress in connection with the Clinch River Breeder Reactor, about which I had serious doubts.

He goes on to state:

> I have agreed to the request of people from Oak Ridge to give a talk generally supporting the Clinch River project.

The gentleman from Pennsylvania indicated that Dr. Teller is not alone in doing an about-face on his position. So has Dr. Hans Bethe, another leading American nuclear scientist who, in testimony before our Science and Technology Committee last year, acknowledged that while he, too, was very concerned with the development of an effective breeder program in this country, that the particular breeder design, the particular Clinch River project in question, was already obsolete.

Then only this very week we had still another turnaround. This time it was Bob Staker, Department of Energy Director of the Office of Reactor Research and Technology, the office in charge of the breeder project. A few years ago Mr. Staker said, and I quote:

> If we proceed with the Clinch River, by 1988 we'll have a 350 megawatt plant. That would be 15 years after the French and the Soviets have the same thing. We must leapfrog if we want to maintain our position.

Then, in the hearing that occurred under the chairmanship of the gentleman from Michigan (Mr. DINGELL), this past week, Mr. Staker interestingly also changed his position, saying that he has had to rethink this whole question in the context of new realities.

Finally, David Stockman. As Congressman, Mr. Stockman declared in 1977:

> After a careful in-depth review of the economics of the project, I have come to the conclusion that it is totally incompatible with our free-market approach to energy.

Now, as OMB Director, Mr. Stockman has suddenly found himself to be in support of the Clinch River breeder reactor project.

Do we need any more evidence of the extent to which this project continues to be motivated by heavy-handed special interest pressure, rather than by an analysis of energy crisis that faces this country and of the most effective solutions to that crisis. Let there be no mistake. When Dr. Teller felt free to speak his mind, he was opposed to the Clinch River breeder reactor. When Dr. Bethe felt free to speak his mind, he was opposed

to the Clinch River project. When Bob Staker of the DOE felt free to speak his mind, he was opposed to the Clinch River project. And when David Stockman felt free to speak his mind, he was opposed to the Clinch River project.

The issue that is facing the Congress today is whether this Congress will feel free to speak its mind—and record its opposition to a project that should have been terminated long, long ago. We do ourselves and we do the American taxpayers no favor when we throw wholly unjustified subsidies to every energy technology and every energy interest that comes before this Congress.

The reality is that some technologies represent a sound taxpayer investment because they will displace petroleum and they will do so at the lowest possible cost. But there are other technologies and projects—and the Clinch River project is perhaps the classic example—that are nothing but a huge drain upon taxpayer resources and a drain upon private sector capital. And investments in technologies that do not represent an effective displacement of petroleum are only prolonging our dependence upon imported petroleum and thereby weakening our national security.

Mr. Chairman, I urge this House to support the Coughlin amendment and terminate funding for the Clinch River breeder reactor.

Mr. BEVILL. Mr. Chairman, I yield 5 minutes to our distinguished colleague from Tennessee (Mr. GORE).

Mr. GORE. Mr. Chairman, I rise in opposition to this amendment.

I want to speak briefly about some of the arguments we have heard and some of the arguments we have not heard.

First of all, with respect to our future energy needs in the United States, some would have us believe perhaps that they have a crystal ball at their disposal and can predict the future. The country has seen in the recent past that the energy picture is the most unpredictable, and the fact remains that the United States faces massive uncertainties with respect to energy supply and demand in the coming decades.

It is true that energy demand is going down compared to what it was expected to be. It is also true that electricity demand is a special case. We have seen people switching to electricity from other sources of energy.

It is also true that we have difficult problems and massive uncertainties with respect to the continued use of fossil fuels in the large quantities in which we are now using them, and in the quantities we expect now to use them in the future. Acid rain, the air problems, the greenhouse effect, these problems could lead our civilization to need nuclear power in the future. If we decide that we do need nuclear power, then we will need breeder technology.

This project is not a commercialization project, it is a research, development and demonstration project to answer the questions that must be answered if we are to develop this technology.

I would like to address in the time I have remaining some of the arguments that we have not heard during this debate today. For the past several weeks Members have read in their hometown newspapers and in the Washington press about allegations of waste, fraud and abuse and mismanagement at the Clinch River project. It is interesting that no one from the subcommittee who participated in the hearings on those allegations has spoken out during this debate to refer to those allegations. Let me tell my colleagues why.

These allegations were based upon a staff draft that did not stand up to the scrutiny applied to it during the hearings we held. There were three alleged cases of waste, fraud and abuse. All three of them were extremely minor in nature, immediately caught and identified by the management of the project, immediately referred to the Inspector General and the FBI, and immediately stopped. In fact, before the hearing was over the managers of this project were being commended for having caught these allegations and for having seen to it that the project was managed tightly, and that money was not wasted.

□ 1210

The hearing, in fact, backfired, Mr. Chairman. It demonstrated that the managers of this project have kept a close eye on the taxpayers' funds.

Now, what has happened during the past 10 years? We have seen 10 tumultuous years over the lifetime of this project. This project has lasted through four presidents, through the OPEC revolution, through the national energy debate and through the bitter struggle between the Congress and the executive branch in the last administration about whether or not this project would be continued.

It is not surprising that there has been a stop-and-start, a stop-and-go approach, when the executive branch orders a halt to it and unilaterally asks that it be stopped. That causes problems. And it has caused an escalation in many of the costs.

Before yielding, I would simply ask my colleagues to vote no on this amendment, and I said I would yield to my colleague, the gentlewoman from New Jersey.

Mrs. ROUKEMA. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks that the gentleman from Tennessee (Mr. GORE) has made here today. I think the gentleman has made an eloquent and persuasive case behalf of the need for a nuclear option and the uncertainty of our energy future.

Mr. Chairman, I rise in opposition to the amendment offered by Mr. Coughlin that would delete funding for the Clinch River breeder reactor. I am rising in support of our energy future and a continued commitment toward keeping our long-term options open.

Every Member in this room knows the consequences of failing to make progress toward our goal of energy independence. We have already paid a high price because of an uncertain energy supply. We know that we cannot rely upon one source of energy, and that we should be doing all we can to lessen our dependence upon imported oil.

The issue is, Do we take a chance, as critics would have us do, that we will not need the breeder technology in the future—or do we take the conservative, sensible approach and develop this demonstration project now, in case we do need this energy option later on? We all know that past predictions of energy trends have caught the United States virtually unprepared. I, for one, prefer to opt for preparedness in this case.

We spend billions to subsidize research for war; surely it is prudent for this small expenditure on behalf of the peaceable use of nuclear power.

In 1980, a GAO report on Clinch River concluded:

> If a long-term future for nuclear power is desired, or even if the future role of nuclear power is viewed as uncertain but a nuclear option is to be maintained, constructing and operating a fast breeder demonstration plant is needed now to determine the actual costs and operating performance.

Mr. GORE. I thank the gentlewoman for her remarks.

Mr. BEARD. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from Tennessee.

Mr. BEARD. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment. There are many reasons why we need the Clinch River breeder reactor program.

CRBR is needed to help confirm and demonstrate the potential value and environmental desirability of the LMFBR concept as a practical and economic future option for generating electric power.

CRBR is needed as a key element of the U.S. breeder reactor development program for assuring nuclear fuel resources in the 21st century. This technology will permit the use of already mined uranium resources greater in energy equivalence than either the U.S. coal reserves or the estimated oil reserves of the entire world. Also, since breeders consume plutonium,

they will actually reduce the inventory of stored plutonium that is generated in conventional nuclear powerplants.

CRBR should be built so the United States can be ready to commercially deploy breeder reactors by the end of the century when we most likely will begin to need them.

CRBR is needed to provide the design, construction, and operation experience necessary for the development of large-scale breeder reactors.

CRBR is needed to help to verify certain key characteristics of breeder powerplants for operation in utility systems; that is, licensability and safety, operability, reliability, availability, maintainability, flexibility, and prospects for economy.

CRBR is needed to develop technological and economic data for the benefit of Government, industry, and the public, and to provide the broad basis of experience and information necessary for commercial and industrial application of the LMFBR concept.

CRBR is needed to achieve the intended benefit from $1 billion already spent on the project. These funds as well as the Nation's multibillion investment in breeder technology will be mostly wasted unless the project is completed.

CRBR is needed to demonstrate Government support for the continued development of nuclear power. Long-term uncertainties in fuel supplies will preclude further development of conventional nuclear power if breeder development is not continued.

A national commitment to an orderly breeder development program is urgently needed now as an essential part of proceeding with the nuclear option, and CRBR is a key part of that program.

The CRBR design is current, incorporating many U.S. and foreign technological advances.

The CRBR size is also an appropriate scale up from the Fast Flux Test Facility and represents a prudent balance of risk, cost, and schedule.

Finally, completion of the CRBR will provide the comprehensive sound technical base needed to move breeder technology forward toward the goal of breeder deployment early in the next century.

These conclusions are supported by a broad consensus of scientists, engineers, and even foreign governments, and form the basis for the U.S. breeder development program. As you can see, there is ample justification for proceeding with this project.

I urge you to carefully consider the need for CRBR as well as the facts dealing with the criticisms of the project. I am confident that these facts will lead you to vote against the amendment offered by the gentleman from Pennsylvania which would delete funding for the project.

Mr. COUGHLIN. Mr. Chairman, I yield 4½ minutes to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Chairman, it is hard, after having been through all of the debate and the discussion in the Science and Technology Committee prior to our deauthorization vote on this issue, and now having listened to all of the debate today, much of which is rather repetitive, to find many points to make that are new at this stage of the debate. And in fact that is because the most compelling arguments against this project are relatively simple; yet, compelling nonetheless.

The fact is that this project is not economically sensible. And you can only say that so many different ways and so many different times. It is not economically sensible because of the short-term cost, in terms of the direct fiscal impact on the fiscal year 1982 budget, and it is not economically sensible because of the long-term energy picture that our country faces.

Let us review once again, before we conclude this debate, those very simple, compelling arguments so that Members will be fully and precisely aware of what they are voting for when they vote on this amendment and on this project.

In the short run, we are talking about a very expensive project, $228 million in actual appropriations in this year, $3.5 billion additionally required to complete this project under present estimates, and those are estimates before construction has even begun. The likely completion cost of this project will certainly be much higher once we break ground and actually start building the project. That is likely to mean that year after year after year we will be appropriating in the neighborhood of $300 to $400 million annually, while at the same time we attempt to approach the goal of a balanced budget by the year 1984.

Members of this body are going to be asked to make additional difficult economic decisions to reduce the Federal budget, more difficult than those we have made with great difficulty in this Congress, if we are to achieve a balanced budget by 1984. And if we are going to fund this project at still higher levels in additional years, where are other additional cuts to be made? We have already cut virtually every other program in the energy budget to the bone. It is going to be exceedingly difficult to find additional places to cut within the energy budget, and Members are going to have to make some very, very tough decisions, or we are going to have to forsake the goal of a balanced budget by 1984. I do not believe our country can afford the economic consequences of such excessive Federal spending much longer.

But let us also look at the long-term economics of this project. The basic economics of this country's energy situation and of breeder technology mean that this facility will not be commercially viable today. And no one argues that. Other Members have pointed out that that is not relevent to this argument, that this is not meant to be a commercially viable facility, that this is an R. & D. project. While I would dispute the fact that this is purely an R. & D. facility, as would other members of the scientific and energy community, leaving that aside for the moment, I would point out that point is largely irrelevant to the discussion we are having today because many Members will be voting on this amendment with the presumption that after we construct the Clinch River breeder reactor, then breeder technology will become commercially viable.

We are told that this is the next logical step in the development of our overall nuclear power program. It may be the next step, but it is not a logical step. It is, however, the next step on a virtually endless ladder of Government subsidizations that are going to be required to foist this technology on an unwilling and an unwanting energy market.

Members who believe that this project will yield us commercially viable breeders over the short term are mistaken.

OMB Director Stockman made this point compellingly when as a Member of Congress he argued against the continued subsidization of the Clinch River breeder reactor. He stated, and I quote:

> The CRBR will generate a vast industrial support and supply infrastructure among private companies engaged in all phases of reactor design, component manufacture and plutonium fuel cycle support. The development of this infrastructure is in fact one of the central goals of the project. What will happen is that the breeder will develop still greater institutional momentum.

And that institutional momentum will pressure us as a body to vote to fund still additional breeder reactors with additional multibillion-dollar price tags. This means that financial support of this particular technology will remain largely a public sector responsibility for the next 50 years.

Edison Electric Institute, one of the chief proponents of breeder technology, is quick to concede this point. They do not argue that this is going to be the last vote that we have to cast to spend billions of dollars of taxpayer's money on breeders. No; they say that after we complete Clinch River, we will have to construct a near-size prototype at Government expense. So we build the fast flux facility at Government expense, we build Clinch River at Government expense, we build the near-size prototype at Government ex-

pense; and then at some point in the far distant future perhaps in the second or third decade of the 21st century, when virtually everyone here is no longer a Member of Congress, and half the people alive today are probably no longer with us, then we are told we will have commercially viable breeders.

Simply put though, support for continued Federal subsidization of Clinch River represents a rejection of significant new efforts to foster a free market in energy technology. A truly market-oriented approach should reject massive, long-term subsidization of any one energy technology, and should instead center around a cost-effective response to the energy problem—that is, arriving at a competitively derived energy mix that will provide maximum productivity at the least possible cost to both the energy consumer and the taxpayer. This, in my opinion, will inherently exclude a project like Clinch River, which most energy experts agree is one of the least cost-effective energy alternatives available given the enormous capital investment requirements and the likelihood of reduced electrical demand over the next several decades.

The figures before us today make a compelling point—that there is a fundamental and irreconcilable conflict between the administration's oftenstated commitment to reducing unnecessary and inefficient Federal subsidization of energy technologies and the continued development of a nuclear white elephant such as Clinch River.

In fact, past statements by both Secretary of Energy Edwards and Budget Director Stockman essentially indicate acceptance of the fact that breeder technology could not possibly survive when subjected to the rigors of the marketplace.

Mr. Chairman, Clinch River is an ineffective and poorly devised approach to our Nation's critical energy problems, which both the taxpayers and energy consumers of this country can ill afford. It has been my hope that the free market premises of the new administration could be applied equitably and without bias to all areas of Federal involvement in the energy field. With Clinch River, however, this has not been the case. As Mr. Stockman has put it:

* * * early commercialization of the breeder will result in large economic losses to society * * * Therefore, no futher subsidization of the Clinch River project, an integral step in the early commercialization program, can be justified.

I can find no legitimate reason why a program whose sole merit and support rests on institutional momentum and narrow financial interests should receive an extraordinary amount of Federal largesse at a time when far worthier programs are being sacrificed in the name of budget restraint.

I urge the adoption of the Coughlin amendment.

Mr. BEVILL. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, we have been funding this project now for 10 years. The two Houses of Congress have overwhelmingly supported this project. Countries such as Great Britain, France, and Russia are moving on with their breeder program. And here we have to go through this continuing debate. We have been doing this every year since 1977. I think this is a matter that we should move on with. I do not think that there is any Member of this House who would question the fact that this country does have limited energy supplies. This is what we are talking about. I do not believe that there is any Member in this House who would question the fact that we must have nuclear power to produce electricity. We know that the world supply of oil is running out and we know that this country cannot afford the luxury of not having the use of nuclear power.

So we are talking about fuel for nuclear power, and this breeder project is a very important project. The Secretary of Energy and witnesses from the U.S. Department of Energy, who testify before out committee each year, point out the importance of continuing this project. We hear all of these figures this project now is going to cost, and, of course, it depends on what dollars you use, but we have $3.2 billion as the cost now, including inflation. We have spent $1.1 billion.

The public utilities will invest $360 million into this project. Are we just going to stop the project now?

My good friend, the gentleman from Pennsylvania (Mr. COUGHLIN), has offered this amendment that would delete the funds in the bill for the project. As you know, it is going to take money to terminate the project. You cannot do it for nothing. It is just not practical. You have the utilities. What are we going to do about the utilities? Are we going to pay them back? There are going to be claims filed. We are going to set off some fireworks here with this amendment.

□ 1220

I think that this House will defeat this amendment. I urge my colleagues to defeat this amendment. I think that one of the best statements that I have heard about this project came from President Reagan. He recently made this statement about the Clinch River breeder project that we are talking about right now. Here is what he said:

Nuclear energy could supply electricity for thousands of industries and millions of jobs and homes. It must not be thwarted by a tiny minority opposed to economic growth which often finds friendly ears in regulatory agencies for its obstructionist campaigns.

I urge my colleagues to vote against this amendment.

PREFERENTIAL MOTION OFFERED BY MR. OTTINGER

Mr. OTTINGER. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. OTTINGER moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken.

Mr. OTTINGER. Mr. Chairman, I take this time because there was not adequate time on the other side to read this letter from a distinguished scientist all of us who work in the energy field know very well, who has not been co-opted by pressures by the administration or by other scientists. He is Dr. John Deutch, who was formerly Under Secretary of Energy and Assistant Secretary of Energy in charge of all energy research and development, including this project.

Yesterday, because he felt so strongly about this he wrote me a handwritten letter which I will read to the Members at the present time:

DEAR CONGRESSMAN OTTINGER: This letter confirms public and private remarks that I have made concerning the inadvisability of continuing with the Clinch River breeder reactor (CRBR) project. As you know, I am in favor of nuclear energy and breeder research and development, but I believe that the date when breeders might be economically deployed is well into the future, quite likely beyond the year 2020; the CRBR project is, therefore, not needed. It is technically obsolete and wastes precious research and development resources.

A much better course of action would be to plan ahead for a new breeder R. & D. plant that would incorporate technical advances that have taken place within the United States breeder program since 1968 and to cancel the obsolete CRBR plant.

It seems to me that the recent debate has raised some issues that deserve comment. First, the CRBR has not incorporated new technology, as some of its advocates claim. For example, it is still based on FFTF fuel design, an outdated fuel transfer system and a questionable steam generation design.

Second, some argue that money spent on CRBR will be recovered from operational revenues that would be raised during operation of the plant. This view, in my opinion, is misinformed.

The CRBR is a 350 megawatt (electric) plant whose operating cost, when waste management and reprocessing costs are included, is certainly larger than the total cost including operation, plus investment of electricity from a light water nuclear plant that would be available in the region.

Under no circumstances, when inflation is taken into account, could revenues from CRBR operation ever repay the $3 billion plus Federal investment.

Third, most informed observers of the nuclear industry recognize that near term needs to support this important energy source are: regulatory reform, reactor safety, waste management and utility financial strength not proceeding at great expense with the CRBR project.

I hope the House terminates this project.

Sincerely yours,

JOHN DEUTCH.

I hope that this House will follow Mr. Deutch's very wise advice.

Mr. COUGHLIN. Mr. Chairman, I rise in opposition to the motion.

Mr. Chairman, we have heard a lot of argument today, and the distinguished chairman of the subcommittee just referred to a letter from President Reagan. I hasten to add that letter, of course, is not directed toward the Clinch River breeder reactor in favor of or against; it was directed to the broad question of nuclear energy which many of us who oppose the Clinch River breeder reactor also support the broad development of nuclear energy.

Through all the argument we have had today, Mr. Chairman, one thing has become clear, that no matter how we look at the Clinch River breeder reactor, no matter how we look at it, it cannot be justified.

Mr. Chairman, it was originally justified as a commercialization demonstration project, but with escalation of costs that have taken place, my colleagues, there is no way, there is no way we are going to recoup the costs of this project through the sale of electricity at commercial rates, and indeed, the plant is being built in an area where there is a surplus of electricity at the present time.

Costs will continue to escalate. Not a single allegation in the study that indicates that the whole project is a management disaster, has been refuted.

Now, having found we cannot justify this as a commercialization demonstration project, some people say that this is a breeder research and development project.

But, my friends, it is unnecessary to have this project, if we are talking about it as research and development, because the research and development of the breeder program can go on at the fast flux test facility in Hanford, Wash., and at other places in the country without Clinch River.

In fact, in this bill, without Clinch River, there is almost a half billion dollars for breeder research—without Clinch River. In this bill, more is spent for breeder research than in any other country in the world.

My distinguished chairman talked about other countries going ahead with their programs. The United States is going ahead and spending more money on breeder research than any other country in the world. Clinch River is not necessary for research and development.

Finally, then, having said it is not a commercialization demonstration project and it is not an R. & D. project, they say, well, it is a technology demonstration project, to demonstrate the technological capability of adapting a breeder to electrical generation.

But by all the best estimates that we have, by all the best estimates, the breeder technology will not become economical until sometime around the year 2030—50 years from now.

At today's uranium prices, there is no way that a breeder can compete with a light water reactor until that time frame and produce energy more cheaply. So why do we build a technology demonstration project when the need is 50 years or so away and the technology is still developing?

It is not a technology demonstration project. What we are really talking about is a single reactor that is going to be built out there, that is going to—sure as heaven made apples—be a white elephant. It will not produce economical electricity. Its cost will not be recouped. It will be technologically obsolescent and will have been a massive extraordinary expenditure of taxpayers' dollars that is totally unwarranted.

My colleagues, in your heart of hearts, and maybe better in your stomach of stomachs, there is no way we can support this project.

□ 1230

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent to withdraw my motion.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. COUGHLIN), who has 2 minutes remaining.

Mr. COUGHLIN. Mr. Chairman, I yield back the balance of my time.

Mr. BEVILL. Mr. Chairman, I yield 1 minute to our distinguished colleague from Iowa (Mr. HARKIN).

Mr. HARKIN. I thank the gentleman for yielding.

Mr. Chairman, I just wanted to point out that in 1970, when the Atomic Energy Commission came to Congress for this project, they asked Congress for $50 million. In 1971, they came back and asked to increase that to $100 million. Congress agreed with that, but only after Mr. Hosmer, the ranking minority member on the Joint Committee at that time, a Republican from California, offered an amendment which was adopted by the House limiting the Government's total involvement to this project at no more than 50 percent of the cost of that $100 million.

What has happened since then? The cost has gone up from $100 million to $700 million to $1.5 billion to $2 billion to maybe $3 billion, and yet the Government's costs have increased year after year after year.

What we have here is another one of those situations where we start out very small. The Government gets involved. The need for it has long since passed, and yet the project continues.

I ask that the Members of this body for once and for all put an end to this project and vote for the Coughlin amendment.

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to our distinguished majority leader, Mr. WRIGHT.

The CHAIRMAN. The gentleman from Texas, the distinguished majority leader, is recognized for no more than 11 minutes.

Mr. WRIGHT. Mr. Chairman, I am not a scientist. There is a great deal about nuclear energy I do not pretend to understand. It would be foolish of me to enter into the presumption of a knowing discourse with some of the other Members about the feasibility of techniques that are here being employed; but I think I know something about history. I believe I understand something about the needs of this Nation of ours for a continued commitment to energy independence. I believe I know something about where we are in the world. I think I know something about the continued need of any nation that is to be a leader of the world to maintain its commitment to scientific pursuit.

Ever since the beginning of time, there have been people who wanted to turn back having committed themselves to a goal and then having discovered that the goal was difficult of achievement, they were willing to turn back.

The children of Israel, we are told, in the Old Testament times, left Egypt to flee from bondage. They wearied of the costs of wandering in the desert and in the wilderness and some of them wanted to return to the fleshpots of Egypt, the comfort, the convenience.

Some today want to return to the idea of the comfortable notion that we do not have to do expensive and costly things in order to achieve energy independence. When Copernicus and Gallileo were speaking of the world being round, there being galaxies and firmaments, they were persecuted by people who saw apostasy in some of the things that they were teaching because they wanted to return to the comforts of doing things as usual. I am sure when Christopher Columbus set sail for a new world, he did not know exactly where he was going, but he knew there was a world to be sought, There were those among his crew who wanted to turn back when, after a little while, they had not sighted land.

I know this is not the time to turn back. Seven different times the Congress has voted to go forward with this project, seven times in the last three Congresses. We have already spent $1 billion on it. That is an investment the American people have made in this phase of energy security for the United States and energy supremacy.

If we stop now, we have wasted that $1 billion and we have wasted the time, the effort, and the energy that has been put into it. I am told by those who have studied the economics of the project that it will, in the course of its lifetime, pay back that billion and the remainder that we have proposed to put into it to its completion seven different times. The Government will get back $7 for every $1 it has put into it from the sale of electrical energy.

I guess it really comes down to a question of whether we are really committed to the idea and whether we are willing to pay for energy independence. How short our memories can be. How short a time ago it was that we had gas lines here in the United States and people were willing, for a very brief while, to do just almost anything it took to make this Nation energy supreme again. We are still spending $60 billion or $70 billion for foreign oil, even though we have, by means of many devices—and some of them heroic—curtailed our consumption of foreign oil. The energy crisis is far from over. We need to pursue it will diligence.

I am reminded of two contrasting reactions experienced by men who viewed the first blinding flash of light which accompanied the world's first nuclear explosion. Out there on the sand flats of the New Mexico desert, a physicist said, "I am sure that on doomsday, in the last millisecond, the last man on Earth will see what we have just seen."

But William L. Lawrence of the New York Times said he felt as though he had been present at the dawn of creation when God has said, "Let there be light."

At every step up the path of man's increasing physical knowledge, we have had the same choice. Either we cringe before the future in fear or we could look it in the eye with faith. Either we could want to return to the fleshpots of Egypt, back to the more comfortable, less costly ways, seek some solace in the belief that we have an oil glut now, and sure enough, we do not have an energy problem, will not have one; or we can look the future in the eye with faith and determine that this will continue to be not only the greatest nation on Earth, but it will become an even greater nation.

Our future is not behind us. It would be foolhardy for us now to turn our backs upon what we thus far so nobly have advanced.

So I say to the Members, let us vote down this amendment as we have done on the previous occasions and let us demonstrate once again that the Congress of the United States is indeed committed to the proposition that this Nation of ours will become energy independent, that we will discover and master all of those means that are made available to us by science and by He who put the electricity in the storm cloud in the first place, who locked the Promethean quality of the Sun in the tiniest of atoms, there to lie until man was given the knowledge of how to unlock them and how to use them for the benefit of the future of mankind.

I yield back the balance of my time.

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to my colleague, the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Chairman, I do rise in opposition to the amendment, and I would compliment the majority leader. He truly is a spokesman for the future.

I can remember back just a few years ago when we were all crying for energy independence. I think the majority leader has pointed out quite well that here is an opportunity for the future.

Did you know we can make energy from our wastes and cut our environmental impact as well? I am not talking about municipal wastes. I am talking about the wastes from uranium enrichment. I am talking about the breeder reactor. All of the wastes, of tailings from the enrichment process for light water reactors are a resource for the breeder reactor. Thousands of canisters of this material are sitting in storage yards at enrichment plants in Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio, just waiting to be used in a breeder reactor.

We can use this already mined uranium to produce literally hundreds of years' worth of electrical energy at our present consumption rate. Right now we are mining uranium ore in this country, with some associated health and environmental hazards. The fast breeder reactor option would roughly cut in half our need for uranium mining and milling. Since our uranium, like fossil fuels, is a limited resource, we buy uranium from other countries. A deal was recently made with Russia to buy uranium for U.S. needs. The breeder's ability to make energy from enrichment tails is certainly to our country's strategic advantage.

There are other environmental benefits as well. The ecological effects for the enrichment processes are avoided. There should be less radiological impact, less thermal impact, and less waste disposal problems.

The Clinch River breeder reactor project offers us an opporunity to make energy from present wastes and reduce the environmental impacts. This is a valuable form of conservation.

Did you know that the Clinch River breeder reactor project represents the largest utility commitment ever made to a single research and development project? A total of 753 utilities agreed to pay $257 million of the breeder's cost for the learning experience. But already, because of the opposition to the CRBR, industry's confidence in Government in large projects has been severely damaged. The cancellation of the CRBR will only strengthen the image of Government as an entity that has too little regard for the sanctity of contracts. This will have negative effects on technology transfer for other energy technologies as well.

Synfuel, solar, geothermal, ocean thermal, and wind technologies will be received skeptically by industry when the Government wants to encourage industrial takeover of the development of those options.

There is a similar effect on this country's image overseas. France, the United Kingdom, West Germany, and Japan all have breeder programs; and Russia started operating its fourth breeder last year.

Leaders abroad are aware of the inconsistencies in the U.S. nuclear programs, and have been urging our Government to restore its credibility in nuclear power and proliferation matters. The less-developed countries that must use oil disapprove of a nuclear power slowdown in the United States. Cancellation of the CRBR will clearly aggravate the issue.

Use of nuclear power in the future depends on reasonable assurance that nuclear fuel will be available at reasonable prices. The fast breeder reactor provides that assurance. If we turn our backs on the breeder, we are turning our backs on decades of scientific research, analysis, and careful planning. Billions of taxpayers' dollars and private risk capital have gone into the fission energy program.

This was done with the full understanding of the commitment of the Government to push development of the whole technology; there was faith in that commitment.

Fission energy, with breeder technology, offers the option of expanding our energy resource base. It is not prudent to stop 30 years of effort and stop current development. To do so with the present fast breeder reactor program is to throw away the option and go back to square one. To start now on a new concept in a new breeder project is to embark on a project that will not reach the CRBR's present status for 10 or more years. In addition, for every year the Clinch River project is set back, the project's total cost goes up by at least 10 percent, or about $300 million.

There is a very good chance that the Nation does not have this much time to get the answers it needs.

In the name of our past commitments and our energy future, I urge my colleagues in the strongest possible way to support continuation of this essential technology development.

Thank you.

Mr. AuCOIN. Mr. Chairman, as chairman of the House Task Force on Industrial Innovation, I spend a lot of time trying to convince people that it makes sense to spend Federal tax dollars on research and development of new technologies.

But it is pretty tough to sell that idea to anybody who has heard about the Clinch River breeder reactor.

Clinch River is the kind of project that gives research and development a bad name.

It is a textbook example of a project run amok: Poorly conceived, fraught with waste and cost overruns, gobbling up tax dollars at an alarming pace while producing no tangible benefits.

It would take days to catalog the problems surrounding Clinch River, but as I see it, they boil down to three basic questions:

Is the project worthy of public investment—that is, will it deliver a technology that meets a genuine need?

Do we know what the project will cost, and if so, are the results worth the price?

What are the implications for nuclear proliferation?

No prudent agency should embark on a research and development project without having answers to those questions at the outset. Yet in the case of Clinch River, we have been pouring money down the drain for 10 years, and still do not have answers.

Scientists, engineers, and economists are debating whether the project is obsolete, given changing economic assumptions and technological advances. The price tag has escalated from $500 million to over $3 billion and shows no signs of stopping there. And we still do not know how the breeder fuel will be reprocessed, let alone what kind of safeguards there will be against theft and loss.

Clinch River is especially troubling to me because I know we can make good use of our tax dollars in energy research and development. A good example is the Federal research effort in photovoltaics—silicon cells which convert the Sun's rays directly into electricity. Only a few years ago, this technology was prohibitively expensive, with a price per kilowatt-hour more than 100 times greater than conventional fuels.

But in the 6 years that the Federal Government has been involved in photovoltaic research and development, the price per kilowatt-hour has dropped by more than 200 percent, and is now within shooting distance of the conventional fuels. Thirteen U.S. companies are now manufacturing and marketing photovoltaic arrays.

Here is a technology that is needed, that has proven its worth and is rapidly moving toward commercialization.

The research has not been cheap—about $600 million has been spent so far—but we have something to show for the dollars we have spent. We have already spent $1 billion on Clinch River, and construction has not even started.

Mr. Chairman, Clinch River is a mistake—an expensive, embarrassing, shameful mistake.

It is time we acknowledged the mistake, and corrected it—today—by deleting funds for Clinch River.

When we talk about Clinch River, we are talking about priorities. If we reward obsolete, overpriced technology at the expense of innovation and ingenuity, if we bail out a wasteful program while cost-effective programs go begging, if we empty our pockets today without investing in tomorrow—then we abandon the traditions on which this Nation was built, and jeopardize our future as a world leader.

I do not accept this shortsighted thinking, and I do not think the American people do, either.

Mr. BEVILL. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. COUGHLIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 186, noes 206, answered "present" 1, not voting 40, as follows:

[Roll No. 161]

□ 1250

The Clerk announced the following pairs:

On this vote:

Mr. Richmond for, with Mr. Biaggi against.

Mr. Mattox for, with Mr. Cheney against.

Mr. Florio for, with Mr. Quillen against.

Mr. Vento for, with Mr. Lewis against.

Mr. Edwards of California for, with Mr. Burgener against.

Mr. FORD of Tennessee changed his votes from "aye" to "no."

Messrs. GILMAN, HUNTER, FORD of Tennessee, and DANIELSON changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. GOODLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time just to indicate that I realize we must move ahead in nuclear energy whether we like it or not, but I take this time just to indicate that we as the Federal Government should not be doing anything in the nuclear energy field until we make a decision about what we are going to do about Three Mile Island. Three Mile Island has been sitting there for 2 years and no one knows when it is going to blow. The Federal Government refuses to allow the company to produce energy in order to generate money in order to clean it up, and at the same time the Federal Government refuses to do anything about helping to clean it up.

We have no idea what could happen. We do know that my constituents are now paying $14 million a month more every month because that company must purchase energy. They are not allowed by the Federal Government to produce it.

So let us not move ahead in the area of nuclear energy, until we take care of our responsibilities at Three Mile Island, an area as I said where we have no idea when it could blow. That could be any day.

Two weeks ago they could not even open the doors to get in to investigate. The Federal Government is responsible for that area. If we are not allowed as a company to produce energy, then we cannot get any resources in order to pay for it. If the Federal Government does not help a little bit, then the Federal Government has the alternative which means they will be stuck with the entire $1 billion amount, because there is no other entity to pick it up when the company goes bankrupt.

So I merely am calling on the Congress of the United States to meet its responsibilities before we have a total disaster in that area. All scientists say it should be cleaned up and it should be cleaned up promptly. They do not know how much time we have.

So again I say, please, Congress, meet your responsibilities before it is too late.

□ 1300

RECONCILIATION UPDATE

(By unanimous consent, Mr. JONES of Oklahoma was allowed to speak out of order for 5 minutes.)

Mr. JONES of Oklahoma. Mr. Chairman, I take the time of the committee to give a progress report on the conference on reconciliation. We had hoped to complete as much of this conference as possible by today with the hopes that we could vote on the conference report by the end of next week.

I am pleased to report that we have made considerable progress to date. Of 58 subconferences involving approximately 260 Members of this body and the other body, so far 40 of those subconferences have reached agreement with a total savings of approximately $33 billion of the $35-plus billion that the reconciliation bill called for. We hope that another 7 of those subconferences will complete agreement by the end of the day, leaving just about 10 or 11 subconferences to complete their work.

It is the hope of this chairman that the chairmen involved in the other committees will meet over the weekend and try to complete their subconferences. The majority leader, Mr. WRIGHT, has urged, and will continue to urge the chairmen involved to meet this weekend in order to complete this conference.

On the Senate side, the majority leader, Mr. BAKER, is also urging his chairmen to meet this weekend.

We hope that if the conferences are completed over the weekend or early next week that the bills can be drafted and printed and given to the Members in enough time so that we could vote on this toward the end of next week.

I particularly want to pay tribute to the gentleman from California (Mr. PANETTA), the distinguished chairman of the Reconciliation Task Force, who has done an even more superb job this year in moving these conferences along than he did last year.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Just to follow up on the gentleman's comments, we have had 58 subconferences. We expect as of the close of business today to have 47 completed. Committees are still working. We have 40 completed and we expect the remaining 7 to be completed, and that will leave 11 conferences that still need to be focused on, 10 of which I might say are energy related.

I understand the chairman of the Energy and Commerce Committee is prepared to meet this weekend to try and complete the work on those pieces.

We have 17 committee jurisdictions involved here. It is extremely complicated to begin with to try to assemble the reconciliation package, but we want to do it in enough time to give the Members the opportunity to read the reports and know what is contained in this obviously very large and complex package. For that reason we need to try to complete work on all conferences, hopefully by Sunday evening or Monday.

Mr. JONES of Oklahoma. So I would urge that particularly the conferees from the Budget, Ways and Means, and Energy and Commerce Committees make plans to be here this weekend to carry on these conferences until they are completed.

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. JONES of Oklahoma. I am happy to yield to the gentleman.

Mr. MICHEL. I just want to take this opportunity to commend both the gentleman from Oklahoma but particularly the gentleman from California for heading up this task force group and the monumental job that has been done up to this point. There were those skeptics who said that it could not be done, and it would get ensnarled, and bogged down, and as the gentleman well knows, we have been meeting every morning regularly to monitor the progress.

It has been good, and I would simply like to admonish those Members who are yet to get their final resolutions to heed the chairman's suggestion here and work over the weekend so that next week we can have it all put in place.

The chairman of the Ways and Means Committee just asked me a little bit ago whether we would be amenable for coming in, for example, at 9 o'clock on Wednesday and we might dispose of the entire tax bill on Wednesday. That is agreeable with me.

I would like to think that immediately following the tax bill resolution that if we could not do it before, certainly by Thursday then we could wrap up reconciliation, and then we will be in a position of simply resolving

the differences on the tax bill before having that August recess. We are toeing the mark very well. If we continue to do so we can meet that target date next week.

I thank the gentleman for all of the cooperation and I yield back.

Mr. JONES of Oklahoma. I thank the gentleman for his comments and yield back the balance of my time.

Mr. BEVILL. Mr. Chairman, I ask unanimous consent that the debate on the amendments of the gentleman from South Carolina (Mr. DERRICK) and all amendments thereto be limited to 1 hour, the time to be controlled equally by the gentleman from South Carolina and myself.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

AMENDMENTS OFFERED BY MR. DERRICK

Mr. DERRICK. Mr. Chairman, I offer two amendments.

The CHAIRMAN. Pursuant to the rule, it shall be in order to consider en bloc amendments printed in the CONGRESSIONAL RECORD of July 17, 1981, by Representative DERRICK, and said amendments shall not be subject to demand for a division of the question.

The Clerk read as follows:

Amendments offered by Mr. DERRICK: Page 16, line 15, strike out "$2,115,499,000" and insert in lieu thereof "$2,105,499,000".

Page 21, line 14, strike out "$1,063,453,000" and insert in lieu thereof "$1,073,453,000".

The CHAIRMAN. The gentleman from South Carolina (Mr. DERRICK), pursuant to the unanimous-consent agreement, will be recognized for 30 minutes.

Mr. DERRICK. Mr. Chairman, I yield myself such time as I may consume.

The amendment I am offering with Representative CORCORAN does two things. The first thing it does is transfer $10 million from the privately-owned Barnwell nuclear fuel plant to the defense waste processing facility at the adjoining Department of Energy's Savannah River plant, both located in South Carolina. The Savanna River plant is located in my district. The Barnwell nuclear fuel plant is located adjacent to my district. There is a 95-percent chance that it will be in my district under reapportionment.

First I want to state that I do support commercial nuclear reprocessing as long as it is carried on by the private sector. Back in the early 1970's a consortium went to South Carolina to reprocess spent nuclear fuel rods that come from these nuclear reactors. They went down there with the intent of spending around $70 million, $80 million, or $90 million, and in the course of the next several years spent somewhere between $250 million and $300 million.

As a result of some regulatory problems, and as a result, in my opinion, of some bad mismanagement, they really have done very little since 1974-75 to bring about the licensing of this facility. They came to the Congress in 1977 and asked that the Congress provide them with research and development funds to be used to give them an opportunity to look for alternate uses for this facility.

The Congress did provide these funds, and over the next 4 years the Congress provided in research and development grants, the sum of some $54 to $55 million. Last year, the 4th year that they came before the Congress, they indicated that this would be the last year that they would require our funding. I would think that a number of Members supported them on this basis. I know that was the basis on which I supported the 4th-year funding.

However, they approached the Congress for fiscal year 1982 again asking for $11.5 million, of which $10 million was put in this bill.

□ 1310

This was $10 million to be used for research and development, admittedly some of it very worthwhile research and development, but in my opinion, research and development that could be carried out at Federal installations at probably less expense to the Federal Government.

They also came to the Congress in March of this year with an ultimatum, and that ultimatum was that the Federal Government must purchase this facility. Either the Federal Government purchase this facility, or they were going to close it down and take a writeoff.

So they are the ones who created the bottom line in the ultimatum.

According to figures of the Corps of Engineers and DOE, it is estimated to buy this plant, this privately owned plant, and to put it on line would cost about $1.04 billion. At a time when everything in this Government is directed to getting the Federal Government out of the private sector, we would be committing $1.04 billion to becoming involved in the private sector.

I do not think that it is proper for the Federal Government to become involved in commercial nuclear reprocessing. I think it would preclude in the future the private sector from adding the ingenuity, the creativity, that they have available to them in this particular area.

I suggest that the $10 million will accomplish some research, that is true. But it will also help them to keep this facility limping along so that the Federal Government might be lobbied over the next year for a Federal takeover or a Federal bailout.

True, this company has had some problems, and they have some legitimate gripes when it comes to the Federal Government, about the regulatory procedure; but, after all, we provided them with some $54-$55 million of taxpayers' money, and this should well compensate for that.

So I have offered this amendment that takes the $10 million from this facility and lets the private sector do it and transfer it to the Savannah River plant.

This $10 million that goes to the Savannah River plant will be used as a part of a solidifying high-level nuclear waste, a vitrification process. As all of us understand, I hope, the solidification and the final disposal of high-level nuclear waste is one of the great environmental problems that we face in this country today and it is going to be one of the great environmental and economic problems that we face as we go into the next century if we do not begin now to solve this problem. We have taken the advantages of the nuclear industry, both from a military standpoint and the commercial standpoint over the last 35 or 40 years, but we have not dealt with the disposal of high-level nuclear waste.

The Savannah River plant requested this $20 million. The committee gave them $10 million. This will give them what they requested. And by giving the Savannah River this additional $10 million, it will mean that this project will be on line 6 or 8 months ahead of schedule if they do not have it and will save, according to the Department of Energy, an additional $40 million.

Now, in closing, let me say that if we really believe and the business community really believes that we want to get the Federal Govenment off the backs of the free enterprise system and give the free enterprise system an opportunity to act and to use the creativity and the forcefulness that they have, then I ask the Members to support this amendment.

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from Georgia.

Mr. BARNARD. Mr. Chairman, I rise in support of the Derrick-Corcoran amendment. This amendment is deserving of support by my colleagues because it will transfer $10 million from the Barnwell nuclear fuel plant to fund the solidification work on high level radioactive wastes at the Department of Energy's Savannah River plant. These high level wastes are produced under DOE's nuclear weapons programs carried out at the Savannah River plant.

President Reagan rejected and actively opposed funding for the AGNS reprocessing plant. In a March 20 memo to DOE Secretary James Edwards, the President stated that it was not appropriate for the Federal Government to continue to fund this commercial enterprise.

It would require more than $1 billion to acquire and complete the Barnwell plant. These are funds we simply do not have if we are to reach our goal of a balanced budget by 1984. The commercial reprocessing of spent nuclear fuel is best left to the private sector—it is not a proper role for the Federal Government.

This amendment would transfer the $10 million targeted for the Barnwell plant to the defense waste processing facility at the Savannah River plant. This waste project, when complete, will solidify liquid high level radioactive wastes left over from the production of plutonium for nuclear weapons. Solidification is the first and absolutely essential step toward final disposal of this waste. The $10 million will bring the total appropriation up to the $20 million level approved by the Armed Services Committee and the full House of Representatives in the fiscal year 1982 authorization to complete design work for the project.

Mr. Chairman, this amendment will not broach the overall budget request for the Savannah River plant put forth by the administration and I would urge my colleagues to join with me in support of this amendment.

Mr. BEVILL. Mr. Chairman, I yield 5 minutes to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Chairman, I oppose the amendment offered by Congressman DERRICK to cut the Barnwell funds from the fiscal year 1981 budget.

My distinguished colleague has always been a staunch supporter of nuclear energy as a viable energy alternative.

I also want to compliment him on his excellent white paper titled "Nuclear Energy," dated July 1981—I found it well written and more importantly understandable. I also understand his concern about storage of waste in his State of South Carolina.

However, I must disagree with his amendment cutting out the funds for continuation of R. & D. work at the Barnwell plant. Right at the time when many see the early valuable role Barnwell can play in this country's commercial nuclear power planning, an amendment is offered that would set the national nuclear program back years.

I would hope that during the hearings on my bill to set up Barnwell as a private commercial activity, convincing facts would be developed that would justify passage of my bill. It would in my opinion be a disservice to this Nation's commercial nuclear programs, to consider an amendment to shut down Barnwell, until my bill to set up a privately owned commercial fuel reprocessing operation has been debated. I believe the amendment is a step backward, in our attempt to set up a commercial plant to reprocess nuclear spent fuels, store spent fuels and demonstrate high-level waste solidification and volume reduction and to demonstrate the proper handling of nuclear waste.

There are many telling arguments as to why, we must not lose the "Barnwell option."

Early activation of the Barnwell nuclear fuel plant under private ownership will provide many benefits. It represents the most cost-effective way to achieve several important national objectives; such as, early reprocessing of power reactor fuel on an industrial scale, maintaining control of the plutonium and other special nuclear materials which is supportive to the national nonproliferation policy, and the development of a national waste management program that is cost effective and consistent with our goal to provide a safe method to store nuclear wastes.

If the Barnwell operation is brought to a halt Allied General Nuclear Services (AGNS) will be forced to plan and initiate decommissioning procedures. Such a move would be a terrible setback to several civilian nuclear power programs, as I pointed out in my statement when I introduced my Nuclear Fuel Management Corporation bill.

Not to use the Barnwell facility for early commercial reprocessing, fuel storage and waste preparation is ill-advised. If the Barnwell option is lost we may later have to initiate a Greenfield program—starting from scratch—which will cost much more and be very time-consuming.

The technology for both reprocessing and even waste vitrification and stabilization is reasonably well known, but needs to be quickly implemented, in anticipation of the availability of the permanent or long-term national waste repositories—I do not envision the permanent storage of solidified nuclear waste at Barnwell.

As I have stated earlier, my bill provides that Barnwell is to be operated as a commercial facility subject only to expressed national policy and laws on safety, environmental impacts and nonproliferation of nuclear technology. I would hope that this body would reject the amendment offered by my colleague Congressman DERRICK.

□ 1320

Mr. CORCORAN. Mr. Chairman, will the gentleman from South Carolina (Mr. DERRICK) yield me 2 or 3 minutes so I might engage the gentleman from New Mexico (Mr. LUJAN) in colloquy?

Mr. DERRICK. I yield 5 minutes to the gentleman from Illinois.

Mr. CORCORAN. I thank the gentleman for yielding.

I would like to ask the gentleman from New Mexico (Mr. LUJAN) a question. I want to congratulate the gentleman from New Mexico for his initiative in introducing the legislation dealing with commercial reprocessing because I think, as the House knows, I have a very long-term interest in commercial reprocessing and I am unhappy with the progress of our Government up to this point in order to provide the appropriate regulatory framework within which, in my judgment, commercial reprocessing ought to be examined and ultimately allowed to go forward if acceptable from environmental and safety standpoints.

But there is an inconsistency or perhaps a misunderstanding on my part I would like to get clarified. It is my understanding that the company that presently owns the Barnwell facility has made it absolutely clear in testimony before the House of Representatives and I would judge the Senate of the United States as well, that under no circumstances do they want to resume the option of either commercial reprocessing or federally owned reprocessing. And so, I have a question about the legislation the gentleman has introduced as it would impact on Barnwell. The gentleman said that the legislation that he introduced would facilitate the development of commercial reprocessing and that the facility that would be involved under the gentleman's legislation in this reprocessing would be the facility at Barnwell, but yet as I said, there is this inconsistency in terms of what AGNS has already said, and that is they are not interested. So I wonder how the gentleman's legislation could promote private sector commercial reprocessing involving Barnwell?

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to the gentleman from New Mexico.

Mr. LUJAN. As the gentleman very well knows, the reason that AGNS decided not to go on ahead and add the reprocessing facilities to Barnwell is because they have been burned by the Federal Government. They spent, what, $300 million to build it, and all of a sudden the Nuclear Regulatory Commission imposes so many additional requirements that they have decided not to go.

That is why they do not want to go, simply because of the rigmarole they have to go through and all the expense they had to go through and then finally the Government says, "You can't do it."

We are beginning to form a private corporation that would not have the inhibitions that AGNS has. Perhaps AGNS might want to be part of it, I do not know, but that really is not the point. It is somebody new coming in with a fresh approach and we are in different times today.

I think we can convince the Nuclear Regulatory Commission to move on

ahead with licensing. After all, there has been a change in policy.

Mr. CORCORAN. I understand that. I would like to further this colloquy because I do not understand how Barnwell could be involved in the gentleman's legislation when the only condition on which Barnwell would ever resume its interest in reprocessing would be if there would be a Federal takeover, and yet the gentleman is telling us that legislation is needed to permit a private corporation to go into this business.

One of the reasons that the gentleman from South Carolina and I have involved ourselves in this amendment is because we want to clarify the situation so that private industry can come forward on reprocessing as was the original intention, as the gentleman well knows.

I just wondered, what is the magic formula? Is there going to be Federal money involved in the gentleman's legislation?

Mr. LUJAN. No. The Federal Government would start the corporation and then eventually as stock is purchased and as fees come in for either temporary storage or for reprocessing, those moneys would be used to enlarge the facility.

In this particular case, if we take this money out, what AGNS has said is they will have to start decommissioning Barnwell. I do not want to see that happen. I think the research that is now going on at Barnwell is very necessary from two standpoints. One is, of course, the results of research and what we can learn in the safeguards programs that we have research work going on and second, it provides the option of leaving Barnwell intact, and that serves the national interest.

Mr. CORCORAN. I would remind the gentleman that the President of the United States, Ronald Reagan, examined that option and he concluded that we should not put one penny of taxpayers' money into that project.

Mr. GOLDWATER. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to the gentleman from California.

Mr. GOLDWATER. I thank the gentleman for yielding.

I think the point that has to be made here is that the amendment of the gentleman from South Carolina (Mr. DERRICK) does not offer a solution to the question of what do we do with Barnwell.

All we are trying to do is find a solution.

Mr. BEVILL. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from South Carolina (Mr. SPENCE).

Mr. SPENCE. Mr. Chairman, I rise in opposition to the amendment offered by my colleague from South Carolina (Mr. DERRICK). I regret that I find it necessary to do this and I sincerely trust that none of my colleagues has ever had to do what I have to do, because this facility is located in my district and I hope my colleagues never have someone from their State get involved in a facility in their particular district and find themselves in this situation.

I have here letters, telegrams, editorials in newspapers, from people in South Carolina. I have letters from 120 senators and members of the house of representatives in South Carolina in support of Barnwell and its continuation.

I think when someone says that we should keep the Federal Government out of this business of reprocessing, that is partly true, but I think at the same time we in the Federal Government owe a responsibility to Barnwell, the reprocessing facility there, because after all in 1967 the U.S. Government, then the old AEC, encouraged private industry to start and operate this facility. As a matter of fact, they wanted three of them throughout the United States, regional reprocessing facilities.

As a matter of fact, Congress carved out, according to the report of the gentleman from South Carolina (Mr. DERRICK), 1,730 acres from the Savannah River plant owned by the Government and deeded this property to Barnwell County and Barnwell County in turn leased the property to Allied Gulf nuclear facility.

The South Carolina Legislature even had to pass legislation for this facility to operate. Since that time, private industry has spent $362 million and assembled an expert staff of 340 people to operate this facility.

Everything was going along on schedule until the last administration held up the licensing of Barnwell.

Since that time, this Congress, each fiscal year, has appropriated for research and development and other grants and contracts to Barnwell $67 million to keep research going at Barnwell.

The research has developed the best nuclear safeguard system that we have in this world today and is presently being used—research in the waste disposal and also further reprocessing research.

□ 1330

Why reprocessing in the first place? It has not even been touched on yet. If people are truly concerned about nuclear waste and nuclear waste disposal, reprocessing retrieves the good, reusable fuel from the waste and reduces by a factor of 7 the amount of the waste we have to deal with. So after all, it helps to dispose of the waste. Also, it retrieves the good from the bad and keeps it under Government control to prevent the problem of proliferation.

As to the Government buying Barnwell, the administration has said that they did not want to buy Barnwell. That is true. I agree. But they still want reprocessing to continue and we need reprocessing to continue. As a matter of fact, right now private talks are going on, as another Congressman alluded to, in an effort to form a consortium to take over this facility and to operate it as a reprocessing facility.

We need this $10 million to keep open this facility long enough for these private interests to conclude their talks and to take over this facility.

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. SPENCE. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I would just like to associate myself with the gentleman's remarks and his analysis of this amendment. I think the gentleman is right. I sincerely hope that the House will support the gentleman in his stand on this issue. I think the gentleman's position is absolutely correct.

Mr. SPENCE. I thank the gentleman for those remarks.

I would like to say finally, in conclusion, that I am not opposed to the additional funds for the Savannah River plant. As a matter of fact, that facility is located in my district, too. I am in favor of those funds, but there are separate funds that can be used.

Mr. DERRICK. Mr. Chairman, how much time has been consumed?

The CHAIRMAN. The gentleman from South Carolina has 16 minutes remaining.

Mr. DERRICK. I yield 5 minutes to the gentleman from Michigan, (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, I rise in support of the amendment offered by my colleague, the gentleman from South Carolina (Mr. DERRICK). I commend the gentleman for offering the amendment.

Mr. Chairman, we have here a very interesting set of circumstances. A private facility has received in the last few years something on the order of about $50 million in taxpayers' funds to keep open a facility for the reprocessing of spent nuclear materials. During that time, that was in part justified by the fact that the Carter administration had said that there would be no reprocessing privately. That ban has now been removed by the Reagan administration. So a private facility which desires to reprocess can do so. I think that is appropriate.

In addition to that, the art and the technology of reprocessing is not new. It is well understood. For some 10 years it was done at the West Valley facility in New York. The technology is understood. It is known.

What is really at stake here? The question here is: Is there any impediment to private citizens and the marketplace permitting technology to go forward and permitting reprocessing to go forward? The answer is: There is none. If there is a market demand for this to take place, then the facility will be able to function and the market should carry it.

But if there is no market, then there is no reason why we should be spending $10 million a year to keep the facility going, which is ultimately going to probably cost the taxpayers a great deal of money. We probably are going to have to buy this if we do not sever the umbilical cord pretty soon. It could cost something on the order of about $1 billion. We are probably going to be paying $10 million a year to buy ourselves $1 billion white elephant at some time in the not too distant future. I do not think that makes good economics.

I would point out to the Members that if there is a market for private reprocessing, the Barnwell plant can be a success. If there is not, it will not be. The technology is understood. We have just the problem of finally saying, "Fellows, the free market should function and you should be able to reprocess, if you so desire, or you should get out of the business if you find there is no market for it."

There is a real question about whether we ought to go ahead and stuff an additional $10 million down the throat of the administration when they say it is not needed. President Reagan has indicated in a March 20 memo that he does not believe that it would be appropriate for the Federal Government to acquire the Barnwell plant or to finance construction or operation of any of its facilities. It appears to me rather clear the administration does not feel they need the money; they do not feel they want the money; they do not feel we ought to be financing it. In a time when we have budgetary structures, when we are cutting everything from EDA to school lunches to social security to education to health to FAA to navigation safety to the Coast Guard and all of the other programs we are cutting, when we are eliminating money for water and air pollution, and we are eliminating programs which would benefit every age and economic class in this society, then it strikes me that maybe, just maybe, this is $10 million that we can well dispense with in the public interest.

I would urge my colleagues to support the amendment. Let us sever the umbilical cord. Let us let these people move out into the private sector; and if they can do business, let them then do business. Let them profit and prosper according to that.

If they cannot, let us not continue them as a potential supplicant for the Federal Government to spend $10 million on a project which is apparently not even near completion.

For the last few years, I have been deeply involved in the energy problems confronting the Nation, and I fully recognize the importance of preserving all of our present and potential energy options. Certainly, nuclear power is one energy option which should be preserved. Given our finite fossil fuel resources, it is essential for not only our generation but for future generations that we pursue policies which preserve and conserve energy resources. The energy that remains in spent nuclear fuel is a potential resource that should not be lightly discarded, and reprocessing is the technology that can extract that energy for subsequent use. And so I do not speak to you today as one who is opposed to reprocessing.

The question presently before the House is not one of whether this Nation should or should not pursue a policy of reprocessing spent nuclear fuel. Instead the question is whether the Federal Government should continue to financially support the maintenance of the reprocessing technology. I support the gentleman's amendment because I believe that reprocessing of spent nuclear fuel is an activity which should be performed by the private sector.

We are not talking about supporting the development of a new technology, for reprocessing is a known technology which for years was employed by the private sector. For 10 years spent fuel was commercially reprocessed at the West Valley facility. This facility was closed not for technical reasons, but for economic reasons, when the operators determined that they could not continue to operate the plant profitably. The decision was based upon economics, and not technology.

The West Valley experience did not deter the owners of Barnwell from undertaking this project. Work on the project was terminated when the Carter administration announced that it was the administration's policy to "indefinitely defer" commercial reprocessing. However, despite the previous administration's policy, the Congress provided funds to maintain this technology. During the last 4 years, the Congress has appropriated over $54 million to preserve this technology. The new administration has now changed the Nation's policy toward reprocessing, and the private sector is free to pursue this economic activity. The Congress has fulfilled its obligation to the owners of this facility by providing funds to them to preserve this technology. There are now no legal or administrative impediments preventing the private sector from engaging the commercial reprocessing of spent nuclear fuel. It is now simply a question of economics, and, in this instance, I believe that is a question that should be left to the private sector to decide.

This is the position of the Reagan administration. In a March 20, 1981, memorandum to Secretary of Energy Edwards, President Reagan stated:

> I have disapproved the Department's request for additional funds for use in connection with activities at the Barnwell, South Carolina reprocessing plant. I do not believe it would be appropriate for the federal government to acquire the Barnwell plant or to finance the construction or operation of any of its facilities.

Thus, this amendment is consistent with the administration's budget request to the Congress.

In closing, I should like to note that during the last few days much of the discussion in this Chamber has focused on the question of whether the Federal Government should continue to support some very costly projects of dubious technical merit. To date, the Federal Government has invested only a relatively small amount in the Barnwell facility. However, we must realize that the owners of the Barnwell facility are aggressively supporting a bailout in the form of Federal acquisition. The report of the Senate authorizing committee directs the Department of Energy to submit a study on the feasibility of Federal acquisition of this facility. Unless we terminate Federal funding for this project now, we will fall into a quagmire of continuing and escalating Federal expenditures.

The Congress has fulfilled its obligation to the owners of this facility by providing over $54 million during the last 4 years to preserve this technology. The new administration has now removed all impediments to commercial development of reprocessing. Thus, the question before the House is one of economics, and I submit that as a question which should be addressed by the private sector.

I urge my colleagues to join with me in supporting this amendment.

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from North Carolina.

Mr. ANDREWS. Mr. Chairman, I understand the learned gentleman to be saying the Federal Government should not be expending further moneys for purposes such as are being carried out at Barnwell. I understand the amendment not to be in that nature but, rather, to say to still spend the $10 million, just shift it from Barnwell to Savannah.

Mr. DINGELL. That is right. That makes excellent good sense.

Mr. LUGAN. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, I do not think the gentleman wished to mislead

the House into believing that this has been some kind of boondoggle.

Mr. DINGELL. I did not say it was a boondoggle. I said it was money that does not need to be spent. If the private sector wants to spend it, fine. Why should we pay $10 million a year for something that apparently is uneconomic at this time?

Mr. LUJAN. If the gentleman would continue to yield, there have been great advances at Barnwell with the moneys we have put in for research like this money is.

Mr. DINGELL. I applaud that. If they are that good, Barnwell should be a financial success.

Mr. LUJAN. It is doing the research for the Federal Government.

Mr. DINGELL. That is why we have the NRC.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman form New York (Mr. CARNEY).

Mr. CARNEY. Mr. Chairman, I wish to address the issue of the Barnwell reprocessing plant. There has been some discussion about this administration's policy regarding Barnwell and the relative roles of the Government and industry in the future of reprocessing. President Reagan in his letter of March 20 emphasized that the Department of Energy should consult with industry and develop recommendations for his further review on how to create a more favorable climate for reprocessing efforts. It is my understanding that the administration fully recognizes that it will take some time to work out the details for commercial reprocessing. The funding for Barnwell for this year gives us the right amount of time to do this and it is fully consistant with the administration's policy. I fully support and encourage the concept of commercial reprocessing, but this needs to be done carefully. It is important that we keep alive the capabilities at Barnwell as we carefully consider what the relative roles of industry and government should be.

Therefore, I oppose the Derrick-Corcoran amendment and urge my colleagues to vote against the amendment and in favor of the Barnwell project and our reprocessing options.

The letter of President Reagan says:

THE WHITE HOUSE,
Washington, March 20, 1981.

Memorandum for the Secretary of Energy.

Subject: Decisions on Department of Energy budget appeal.

As you know, I have approved the Department of Energy's request to add $27 million to its civilian nuclear budget in FY 1982 for the purpose of conducting research and development at the damaged Three Mile Island nuclear plant. As noted in the Department's request, the use of these funds is contingent upon an agreement between the Department, General Public Utilities, the Pennsylvania Utility Commission, and the U.S. Nuclear Regulatory Commission that will limit the Federal role to necessary research activities in support of private-cleanup efforts.

Further, I have disapproved the Department's request for additional funds for use in connection with activities at the Barnwell, South Carolina reprocessing plant. I do not believe it would be appropriate for the Federal Government to acquire the Barnwell plant or to finance construction or operation of any of its facilities.

I wish to emphasize that the Department of Energy should consult with industry to determine which regulatory barriers are of greatest concern to it and, working with the Vice President's Task Force on Regulatory Relief, should develop recommendations for my further review on how to create a more favorable climate for private reprocessing efforts.

RONALD REAGAN.

Mr. DERRICK. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Chairman, I rise in support of the amendment of my colleague from South Carolina. The facts I have seen to date make a compelling case for terminating Federal involvement in the Barnwell reprocessing facility. Although the $10 million at question for this project is a relatively small amount in comparison to some of the other white elephants that have been funded in this bill, continued Federal funding this year raises the distinct possibility of locking the taxpayers into a $1 billion-plus commitment to a project which Allied General, the industrial partner, has itself stated is uneconomic to complete or operate. In fact, President Reagan, in a March 20 memorandum to Secretary of Energy Edwards, said, and I quote:

I do not believe it would be appropriate for the Federal Government to acquire the Barnwell plant or to finance construction or operation of any of its facilities.

It is the administration's belief, and it is my belief, that the Federal Government should not invest public moneys in research and development efforts at private facilities of this sort, particularly when comparable Government research programs already exist.

The owners of the plant have made it clear that they do not intend to bear the financial burden of completing and operating the Barnwell plant, and have asked the Government to purchase it. President Reagan, however, has stated that reprocessing is a responsibility of the private sector, and that is a decision I intend to support.

The Federal Government should not be involved in or forced to bear the financial burden of bailing out every research effort which private industry finds uneconomical. Congress should not establish itself as a benefactor of last resort for projects of this sort, and we have the opportunity of putting that on record today by adopting this amendment. If the Barnwell reprocessing facility can indeed make a contribution to this Nation's energy picture, and can do so on a cost-effective basis, then it should go forward. However, the gentleman from South Carolina and the gentleman from Illinois do not believe this to be the case, the President does not, nor do I. Barnwell promises to be an unnecessarily expensive Federal investment, and I would urge the adoption of the amendment to delete the funding from this bill.

□ 1340

Mr. BEVILL. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Chairman, I rise in opposition to the amendment which would delete all funding for the Barnwell nuclear fuels plant and transfer $10 million in additional funding for the defense waste processing facility at Savannah River.

For 4 long years, the Federal Government has seen fit to leave the only nuclear fuel reprocessing plant available in the United States—Barnwell—in limbo while the rest of the world forges ahead with continued development of their nuclear technology. We have seen the leadership role in the peaceful production of nuclear power slip from our fingers while France and other Western European nations take the lead.

Due to the Government's indefinite deferral of commercial reprocessing and the previous administration's foot-dragging, Barnwell has never been operated as a reprocessing plant. The facility—and the reprocessing option—have been kept barely alive by minimal funding for research and development. That R. & D. funding, by the way, has allowed Barnwell to provide valuable research which has contributed to the nonproliferation objectives of the Nation as well as transportation safety and waste management technologies.

Now, however, the new administration through DOE has given the private companies which own Barnwell assurances that they will receive some indication of Government intent with regard to Barnwell and reprocessing by the end of this year. It only makes sense to keep the reprocessing option open during this interim period by approving the $10 million bridge for Barnwell, as the Appropriations Committee did by unanimous vote.

Mr. Chairman, this amendment has been touted as a budget-cutting amendment. It is not. It is a simple transfer of funds from one project to another, and does not cut the energy and water appropriations bill by a dollar. Let me emphasize that the Office of Management and Budget does not support this amendment. The Department of Energy does not support this amendment. While the President in a much-circulated memorandum dated March 20 opposed Federal

acquisition of the Barnwell plant, he did not speak to the reprocessing option and, in fact, he has supported nuclear energy as an essential element in our energy mix. The minimal funding providing in the committee bill is simply designed to keep the reprocessing—and the nuclear—options open. The fact is that the decision not to support the pending amendment was made in OMB's daily policy meeting Wednesday, with Dave Stockman in attendance. The Department of Energy's position was reaffirmed Wednesday by Energy Secretary Jim Edwards.

Those who support this amendment contend that we have wasted enough of the Government's money on Barnwell in the last several years. If we fail, however, to continue the research program now underway, then we have indeed wasted the money already spent on these programs without having produced a result. And, if we force Barnwell to shut down—which it will do without this funding—and then decide that we should pursue the capability for reprocessing spent nuclear fuel, it will cost us a minimum of 5 years and $500 million and probably as much as 10 years and $1.2 billion. With studies on Barnwell scheduled to be completed by the end of the year, it seems clear to me that the economic approach is to maintain Barnwell in a research mode while optional uses for Barnwell are explored.

Mr. Chairman, I would also like to address the other aspect of the pending amendment—adding $10 million in funding for the defense waste processing facility at DOE's Savannah River plant. It is my understanding that the Armed Services Committee doubled its authorization for this facility from $10 million in fiscal year 1981 to $20 million in fiscal year 1982 on the assumption that the construction plan called for $20 million this year. DOE testimony before the Energy and Water Development Subcommittee on Appropriations, under the leadership of our able colleague from Alabama, however, showed that the $10 million requested by the administration is entirely adequate to maintain the Department's schedules for beginning construction in late 1983 or early 1984. No data has been submitted to that subcommittee, I am told, to indicate that any additional money is required. Rather it is a complex design and engineering process that controls the length of time leading to construction. I am assured, moreover, by the gentleman from Alabama that the subcommittee supports the Savannah River facility and would, if it should become necessary, give every consideration to providing additional funding if the need is shown.

The whole question of nuclear power is a knotty one. Very frankly, I share the concerns raised by the authors of this amendment that reprocessing plants could be converted at some point to away-from-reactor storage sites. One of the reasons I oppose this amendment is because I think it would encourage such a result, by diverting Barnwell from its intended purpose of reprocessing spent nuclear fuel.

Transferring the modest $10 million appropriation from Barnwell will not save the taxpayers of this country a dime, Mr. Chairman, but it would cost them dearly in the years ahead as the United States sees the last of its nuclear technology lead evaporate.

I submit that the question is a simple one: Do we or do we not support retaining the nuclear option? Members who cast a vote for this amendment must know that its effect will be to foreclose the option to move ahead with reprocessing of spent nuclear fuel, our best hope of closing the nuclear cycle. In the long run, that will severely limit or eliminate the use of nuclear power.

Mr. DERRICK. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, this is a knotty issue, as my friend, the gentleman from South Carolina (Mr. CAMPBELL), has pointed out. It does cause us some political strain perhaps, but I think there have been a number of misunderstandings about what the authors of these amendments propose to do.

First of all, I think we need to look at the merits of the issue, and the merits of the issue suggest that in order to deal in a rational, sensible way with the nuclear waste management program of the United States, we should be moving toward research and development at the demonstration scale level, and testing the long-term, permanent disposal of nuclear waste. Moreover in order to get to that point we need to be moving ahead, as I have argued in previous sessions of Congress, to have a framework to get the regulatory environment within which private companies can develop reprocessing facilities on a commercial basis.

I would cite no less an authority than President Reagan in support of that view. My friend and colleague, the gentleman from South Carolina (Mr. CAMPBELL), has referred to the fact that the President disapproved the money that some people wanted, particularly that DOE Secretary Edwards wanted, for the Federal ownership of the Barnwell facility in order to take it off the hands of Allied General Nuclear Services. But he failed to mention that in that memorandum the President did address the question of reprocessing, and I quote from it:

> I wish to emphasize that the Department of Energy should consult with industry to determine which regulatory barriers are of greatest concern to it and, working with the Vice President's Task Force on Regulatory Relief, should develop recomendations for my further review on how to create a more favorable climate for private reprocessing efforts.

In other words, Mr. Chairman, this administration has made a judgment on whether or not we ought to have public ownership of reprocessing or whether we ought to go back to what we had originally planned when we embarked on the effort to use the atom for peaceful commercial purposes.

So I think it would be a mistake to do as the committee recommends, and that is to put the $10 million into the Barnwell facility. That door has been closed; that issue is over. As my friend, the gentleman from Michigan (Mr. DINGELL), has pointed out, if the private companies want to come forward, they can come forward, and we need to take some steps, as I attempted to do in the last Congress, to move ahead on the so-called GESMO proceedings so we have a regulatory proceeding or a regulatory framework in which the private companies can develop reprocessing.

Mr. Chairman, certainly we ought to look at what happens in the private sector as we make some of our public policy decisions. Yesterday everybody saw with regret the major banner headline in the Washington Star, "Star To Cease Publishing." Now I suppose that we can expect, as with Chrysler and many other entities, that there is the possibility that they will come forward asking for a Federal bailout. That is precisely what is happening in this case.

□ 1350

I would suggest that if the people who are asking for this $10 million are thwarted, as my colleague, the gentleman from South Carolina (Mr. DERRICK) and I would do with the effect of this amendment, they will have plenty of opportunity to find employment. They are very capable lobbyists who for 4 years in a row have come to this Congress and sold us a bill of goods, and they have kept that option alive; so they can go over to Time, Inc., and go to work and maybe they could get employment as lobbyists for Time, Inc., in order to get a Federal bailout for the Washington Star.

Mr. Chairman, the money that we transfer from this ill-advised proposal would go to a very sensible, desirable public interest activity, and that is the part of the nuclear waste management program that we need research and development on. It is the effort to solidify the nuclear wastes, to test on an engineering scale the work that needs to be done in order to get that waste into a solid form, the borsilicate process, the solidification process, so that we can put the nuclear waste in a safe

inert form, underground, so that it can be protected for generations to come.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to my friend, the gentleman from South Carolina.

Mr. CAMPBELL. Mr. Chairman, I thank the gentleman for yielding.

I would pose two questions, and I know that the gentleman did not mean it this way, but certainly the gentleman does not mean to suggest that the Washington Star has been banned from publishing for a 4-year period by the Federal Government, as had Barnwell for a period of time.

Mr. CORCORAN. Well, if I may reclaim my time, that is simply not true. What happened with respect to Barnwell is that 4 years ago the previous administration made the decision to stop reprocessing and unfortunately the consequences were painful in many respects.

Now, lots of companies can come forward and develop the reprocessing option on a private basis as the Reagan administration reverses this and other past mistakes. I support this new policy and our pending amendment is helpful in this regard.

Mr. BEVILL. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Chairman, the problem with this amendment is that it does not offer a solution to a very, very difficult problem. The problem is, what do we do about reprocessing?

Now, let us go back. Back in the 1960's it was determined that the Federal Government had put up most of the money for the front end of the fuel cycle, the enrichment process. Now, it was in our national interest to encourage private investment, so under this national policy of encouraging private involvement, these companies, Gulf and Allied General came along in 1968 and got a permit. They started construction in 1970. Then all of a sudden about 1974 we began to see some change of national policy at the Federal level. We had the Nuclear Regulatory Commission issue some requirements. Then came President Ford who further put a slowdown on reprocessing and then, of course, in 1977 President Carter terminated any reprocessing and here was the private sector, Allied General, under good faith, trying to proceed along and capitalize on their investment and complete the fuel cycle.

So this is not a question of whether the private sector is involved. This is a question of a national policy; a question of what we are going to do with completing the fuel cycle.

I am sure that the private sector is totally disillusioned, totally turned off from participating in this process because of the on-again, off-again statements coming from the Federal Government.

We have to make up our minds what we are going to do. That is what this money has been spent for over the past several years. It was, in essence, to put it into a holding pattern until we in the Congress and the administration make up our minds.

It is irresponsible, in my opinion, to take this $10 million and put it someplace else, because it does not offer a solution to the problem that we have to address.

I would vote down this amendment.

Mr. DERRICK. Mr. Chairman, I yield 1 minute to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I thank the gentleman.

I rise in support of this amendment. I think it is a good one.

I think it is important for us to remember here that we are not talking about transferring money from one public function to another public function or one private to another private. It is from a private function to a public function.

In April of this year, AGNS, those people who run Barnwell, said in a letter to the Department of Energy that there is no realistic combination of circumstances that could make private reprocessing practicable.

What we are doing is taking that money from a process which cannot be made practicable and putting it into an area that has to be dealt with as a national matter of public policy and that is to deal with defense wastes in this country.

It is a good amendment. It is a solid amendment. It is one which makes a wise expenditure of a limited national resource in our country.

Barnwell is no longer economical. By pulling the money out, we would end subsidization of the private sector. We are taking that money, though, and putting it into a problem that has to be solved, the national nuclear waste disposal question.

Mr. BEVILL. Mr. Chairman, I yield such time as she may consume to the distinguished gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman: I am rising to oppose the Derrick amendment. Reprocessing of spent nuclear fuel is essential to provide the necessary plutonium for our breeder reactor program and for more effective waste management. The Barnwell Nulear Fuel Plant (BNFP) in South Carolina, which is capable of fulfilling these roles, is the only large scale reprocessing facility in the United States.

In 1977, President Carter indefinitely deferred commercial reprocessing. The Nuclear Regulatory Commission (NRC) subsequently terminated all licensing of the Barnwell facility. Because of policy and regulatory uncertainties and delays, and the prospect of history repeating itself, there is no prospect at this time for Barnwell to operate on a commercial basis.

Since 1977, Congress has maintained Barnwell in a research mode while optional uses for Barnwell are explored. The R. & D. conducted at the Barnwell Plant has developed what many believe to be the most sophisticated nuclear safeguards system in the world. This system is being used for safeguards training under provisions of the Nuclear Non-Proliferation Act of 1978. This important R. & D. will allow the Nation to retain the invaluable expertise to bridge the gap of time until other important uses of the facility can be facilitated. These possible uses include storage and reprocessing of utility spent fuel and use as a safeguards research, development, and training center.

The Energy Research and Production Subcommitee, which I chair, authorized a continuation of the Barnwell program through fiscal year 1982 for a number of very good reasons.

First, it will allow Secretary Edwards a chance to complete his current evaluation and discussions with industry leaders on how Barnwell might be started up. Second, it will allow us to continue to collect the valuable information coming from the safeguards program at Barnwell. And third, it will keep alive a facility that we vitally need to support our breeder reactor and nuclear waste management programs in this country.

While the administration's budget request did not contain funds for continued research and development activities at Barnwell or for acquisition of the Barnwell reprocessing plant, the President nevertheless directed DOE to encourage a more favorable climate than presently exists for the resumption of private reprocessing activities.

The actions of the President and of the Department in meeting with and encouraging corporations in pursuing private reprocessing efforts clearly indicate a reversal of the policy regarding commercial reprocessing of spent fuel. It will take time for private commitments to materialize. In the interim continuation of research, development and demonstration activities at Barnwell can further advance our ability to safeguard special nuclear materials.

Contracting with Barnwell for research and development does not imply a commitment to acquire the plant for Federal operation. This contracting will be considered on its merits. Current administration policy prohibits Federal acquisition of Barnwell, but does not prohibit DOE-sponsored research and development there.

Fear of Federal purchasing of Barnwell is a misdirected and invalid basis

for deleting R. & D. funding at this facility and I urge my colleagues to oppose this amendment.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished chairman of the Committee on Science and Technology, the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Chairman, I rise in opposition to the amendment offered by my very good friend, the gentleman from South Carolina (Mr. DERRICK) to eliminate the funding for this R. & D. program.

I do this with great reluctance, because I have worked with the gentleman from South Carolina (Mr. DERRICK) in previous Congresses to include money for this project. The Committee on Science and Technology has the jurisdiction over this project and all during the time of our hearings and markup of our bill, we were unaware of the position of the gentleman from South Carolina (Mr. DERRICK) about Barnwell. They asked for $13 million and we included $10 million in the budget for this project. I have been to Barnwell.

Mr. DERRICK. Mr. Chairman, will the gentleman yield? The gentleman mentioned my name. I think I have a right to respond.

Mr. FUQUA. Well, I have a very limited amount of time.

Mr. DERRICK. I understand that, but the gentleman has mentioned my name and and I want to tell the gentleman that I did advise the gentleman from Alabama (Mr. BEVILL). I assumed that meant advising the gentleman from Florida as well.

Mr. FUQUA. Well, the gentleman did not communicate to me until this week when I found out about this.

But I had been to Barnwell. I have been through that facility. I spent a Saturday there along with my colleague, the gentleman from New Mexico (Mr. LUJAN).

Some people wonder why we do need this. Well, we do need to keep the plant available in case there is some decision to use it. There is a study going on now and, hopefully, it will be completed by the end of the year, at least by the time of the 1983 budget, so that we can decide what to do with this facility.

It is premature at this time and I do not think you will see me in the well next year asking for any more money for Barnwell, because I have asked them to conclude some final disposition of this project; but this amendment is premature at this time. They are developing some very sophisticated safeguards at this plant that have been the idol of the world as far as nuclear safeguards that are being used in the enforcement of the Nuclear Nonproliferation Act of 1978.

They are doing many other very worthwhile things in research and development at this facility.

I would urge my colleagues at this time to reject this amendment so that we can continue this for this last year, so that this administration, who has a different policy regarding the processing than the previous administration, that some ultimate resolution can be made of this program.

I urge defeat of the amendment offered by my good friend, the gentleman from South Carolina.

Mr. DERRICK. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Chairman, as chairman of one of the committees which has jurisdiction over this very difficult area, we have studied it at some length. I come down on the side of a close and interesting question.

I support Congressman DERRICK's proposal to move the Barnwell funding into a more productive effort for waste solidification at Savannah River.

The Interior Committee has been investigating the possible public and private uses for the Barnwell plant over the past several years. During this time, we have recognized substantial barriers to operation of the plant and significant questions about its economic viability.

This year, Congressman LUJAN has introduced legislation which would turn the plant over to a private corporation to see whether sufficient private financing can be put together to get it onto operation. I believe this legislation could be a positive approach to resolving the Barnwell issue. But continued funding of Federal activities at the site will not contribute to a reasonable private-sector approach.

Transfer of the funds to keep waste disposal activities on track is a more urgent and more productive priority. The defense wastes at Savannah River should not be put on a back burner. We should have facilities constructed to get the liquids removed from the tanks at the site and put into a safe solid form ready for permanent disposal.

My colleague's amendment is wise; I believe he is doing the best thing for the citizens of South Carolina and that his amendment is in keeping with the priorities of our national nuclear program.

□ 1400

So I asked my colleagues to vote and suggest they are voting in the best interests of our pocketbook and the pocketbook of our constituents and the best interests of the environment.

Mr. BEVILL. Mr. Chairman, I yield myself such time as I may consume.

I rise in opposition to this amendment and urge everyone to vote against the amendment.

I endorse the statement by the distinguished chairman of the Science and Technology Committee, the gentleman from Florida (Mr. FUQUA). He has covered this matter well and I urge the defeat of this amendment.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. BEVILL. I yield to my good friend and colleague, the ranking minority member of the subcommittee, Mr. MYERS.

Mr. MYERS. Mr. Chairman, I join my chairman in opposing this amendment. I have heard no argument this afternoon that this type of research need not be done. All recognize that we are getting pretty deep in wastes, so the decision has to be made.

In order to make the proper decision, first on the process to be used, and even more importantly how it shall be handled, the safety factors, research must be conducted. The only place where it is being done today is at Barnwell. To transfer this money today would start the process all over again and would not be wise. It certainly would not save the taxpayers any money.

This is the only place this very badly needed research is being done.

Our colleague from the Three Mile Island area this afternoon was critical of the Government and the fact the decision had not been made and was not handled properly. Do we want to create another catastrophe like this in the handling of wastes? I think not.

The proper way to do this is to fund this research where it is being done today. I urge a "no" vote.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BEVILL. I yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I have a large nuclear generating plant in my congressional district. Disposing of the spent fuel is a problem for us. What is the best way to go: To support the amendment which would apparently move us toward vitrification of the materials? Is the reprocessing route the best?

As I understand, if we defeat the amendment the reprocessing process is apt to move forward more expeditiously. Would the gentleman help to resolve my dilemma for me?

Mr. BEVILL. The committee has provided $10 million for this, after hearing the testimony and discussing this matter with the Department of Energy, because this option should be kept open. This is an important project. It is one that does take spent fuel, and it helps solve our waste problem. It can help in solving the waste problem.

As far as transferring this money to the Defense waste processing facility, our committee would consider whatever is needed there. We put in the amount the administration requested, $10 million. If they need another $10 million, we will consider it. We do not

have to take the money from this project to do that.

So I hope that answers the gentleman's question.

Mr. McCLORY. I thank the gentleman.

Mr. BEVILL. I urge my colleagues to vote against this amendment and yield back the balance of my time.

The CHAIRMAN. The question is on the amendments offered by the gentleman from South Carolina (Mr. DERRICK).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. DERRICK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 157, noes 213, answered "present" 1, not voting 62, as follows:

[Roll No. 162]

□ 1410

The Clerk announced the following pairs:

On this vote:

Mr. Moakley for, with Mr. Anthony against.

Mr. Barnard for, with Mr. Biaggi against.

Mr. Vento for, with Mr. Cheney against.

Mr. Garcia for, with Mr. Quillen against.

Mr. Richmond for, with Mr. Beard against.

Mr. Mattox for, with Mr. Taylor against.

Mr. MICA changed his vote from "aye" to "no."

Mr. GONZALEZ changed his vote from "no" to "present."

So the amendments were rejected.

The result of the vote was announced as above recorded.

Mr. BEVILL. Mr. Chairman, I move to strike the last word and I yield 1 minute to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, I had originally planned to offer a floor amendment today to reduce the nuclear energy appropriations for the Department of Energy to its fiscal year 1981 levels. However, in view of the short time and in view of the Clinch River vote, I have agreed to accede to the chairman's request and not offer the amendment. Nevertheless, I would like my colleagues to be aware of the reasons behind such an amendment.

President Reagan's request for the Department of Energy budget for fiscal year 1982 singled out the nuclear fission budget for special treatment. At a time when the administration was proposing that the budgets for all other energy technologies be slashed, nuclear fission was to receive a 30-percent increase over last year's budget for a total of $1.2 billion.

At the same time, the President proposed to cut energy conservation, our most cost-effective energy source, by 79 percent over last year's spending. Solar energy and other renewables were to suffer a 65-percent cut from last year's spending. Fossil energy was to be reduced 71 percent.

I find this special treatment for the nuclear industry most curious, especially coming from an administration that claims to put so much faith in the free market to test out reliable technologies. For some reason, solar energy, one of our youngest sources of energy, is expected to prove itself in the cold world of the marketplace. Yet nuclear energy, which is presumably an already commercial energy source—and on which the Federal Government has lavished some $21 billion in subsidies over the last 30 years—is to continue to receive special favors at the expense of the taxpayers of this Nation.

The imbalance in Mr. Reagan's budget becomes even more outrageous

once we study which sectors of the economy are most dependent on petroleum use. Our oil dependence in the electricity sector is minimal. Electricity accounts for only 9 percent of our petroleum use, and nuclear energy provides only 11 percent of our electricity.

Our biggest oil users are transportation, accounting for 53 percent of national oil use; industry, accounting for 26 percent; and the residential/commercial sector, accounting for 13 percent. How are we to rid ourselves of this national security threatening oil dependence? Studies by the Harvard Business School, the Mellon Institute, the Ford Foundation, and the Solar Energy Research Institute unanimously conclude that energy conservation is our most cost-effective energy source. According to a recent SERI report, energy conservation in existing and new buildings could save more than the equivalent of our total annual imports at half the cost of providing that same energy from oil, gas or electricity.

In the transportation sector, if the average American car were to increase its mileage to 55 miles per gallon by the year 2000, the Nation would consume nearly 3 million barrels per day less gasoline than it does today.

Yet the Nation's programs aimed at improving efficiency in all these sectors of the economy will be decimated under President Reagan's budget.

Mr. Chairman, I can only conclude that my amendment was too generous in proposing to keep the nuclear budget at its fiscal year 1981 level, for if energy conservation had been treated so well, it would receive a 79-percent increase over President Reagan's proposed levels. While the appropriations committee made significant improvements on the administration's sorry proposals for conservation, it is indeed regrettable that they have increased the taxpayers' subsidy to the nuclear industry.

Mr. BEVILL. Mr. Chairman, I ask unanimous consent that the remainder to title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. Are there any points of order on any of the provisions of title III?

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: Page 16, line 19, insert immediately before the period the following: ", and *Provided further,* That $5,000,000 of the funds provided herein shall be made available to the Secretary of Agriculture for the establishment of pilot wood utilization projects and demonstrations as authorized by the Wood Residue Utilization Act of 1980, Public Law 96-544.".

POINT OF ORDER

Mr. BEVILL. Mr. Chairman, I make a point of order against the gentleman's amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. BEVILL. The amendment is not germane to this paragraph of the bill nor to the bill as a whole. The wood residue program is authorized by Public Law 96-554, and clearly is to be administered by the Forest Service, Department of Agriculture, which is funded under the Interior appropriations bill.

This program was not authorized to be administered or funded by the Department of Energy, which is where the gentleman's amendment applies.

Under clause 7, rule XVI, it is stated that it is not in order during consideration in the House to introduce a new subject by way of amendment, and an amendment inserting an additional section should be germane to the portion of the bill to which it is offered.

I contend this amendment is not germane to this paragraph or this bill and is in violation of clause 7, rule XVI.

I ask for a ruling by the Chairman.

The CHAIRMAN. Does the gentleman from Oregon (Mr. WEAVER) wish to respond to the gentleman from Alabama (Mr. BEVILL) with respect to the gentleman's point of order?

Mr. WEAVER. Briefly, Mr. Chairman, and that is the Department of Energy now funds wood utilization programs. This bill is law. We are not changing existing law. We are referring only to existing law and it is an energy manufacturing program and, therefore, definitely germane to this bill.

The CHAIRMAN. The Chair is prepared to rule on the point of order made by the gentleman from Alabama (Mr. BEVILL).

For the purposes stated by the gentleman from Alabama, the distinguished chairman of the subcommittee, the point of order is sustained and the amendment is held not germane to the pending title of the bill, which relates only to the Department of Energy.

Are there further amendments to title III? If not, the Clerk will read.

The Clerk proceeded to read title IV.

Mr. BEVILL (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title IV be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. Are there any points of order against the provisions of title IV?

AMENDMENT OFFERED BY MR. STRATTON

Mr. STRATTON. Mr. Chairman, I offer an amendment.

(The portion of the bill to which the amendment relates is as follows:)

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Commission in carrying out the purposes of the Energy Reorganization Act of 1974, as amended, and the Atomic Energy Act, as amended, including the employment of aliens; services authorized by 5 U.S.C. 3109; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; reimbursements to the General Services Administration for security guard services; hire of passenger motor vehicles and aircraft; $477,534,000, of which not to exceed $1,455,000 shall be available for the Office of the Commissioners, and of which $80,610,000 shall be available for the Office of Nuclear Reactor Regulation, and of which $62,667,000 shall be available for the Office of Inspection and Enforcement: *Provided,* That from this appropriation, transfer of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further,* That moneys received by the Commission for the cooperative nuclear safety research programs may be retained and used for salaries and expenses associated with those programs, notwithstanding the provisions of 31 U.S.C. 484, and shall remain available until September 30, 1983: *Provided further,* That funds available for nuclear reactor research shall remain available until September 30, 1983: *Provided further,* That transfers between accounts may be made only with the approval of the Committees on Appropriations of the House of Representatives and the Senate: *Provided further,* That no part of the funds appropriated in this Act may be used to implement section 110 of Public Law 96-295.

The Clerk read as follows:

Amendment offered by Mr. STRATTON: Page 30, line 3, strike out the period and insert in lieu thereof the following: ": *Provided further,* That no funds appropriated to the Nuclear Regulatory Commission in this Act may be used to implement or enforce any portion of the Uranium Mill Licensing Requirements published as final rules at 45 Federal Register 65521 to 65538 on October 3, 1980.".

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRATTON. Mr. Chairman, my Subcommittee on Procurement and Military Nuclear Systems of the Armed Services Committee held 2 days of hearings on the remedial action programs for the decontamination and decommissioning of sites formerly associated with nuclear defense programs and for sites which contain uranium mill tailings or other uranium

ore residues. These remedial action programs are being developed to meet the requirements of Public Law 95-604, the Uranium Mill Tailings Radiation Control Act of 1978.

The act assumes that uranium mill tailings pose a potential and significant radiation health hazard to the public. Without any evidence that uranium mill tailings are a hazard, Public Law 95-604 requires EPA and NRC to develop standards and regulations that have been interpreted, for instance, to require dirt piled 10 to 30 feet on the piles because our future Government might not continue for another 1,000 years. Without any evidence of hazard, EPA proposed the promulgation of standards that could require cleanups at certain sites that would place those sites at or below the background levels for radon and radium that occur naturally in neighboring areas.

The act directed EPA to issue final cleanup and disposal standards by November 8, 1979. This deadline was not met, but interim standards were proposed on April 22, 1980, and January 19, 1981. A comment period was established which ended on July 15, 1981. The Deputy Administrator of EPA testified at hearings on June 24,, 1981, that EPA would take 2 to 3 years to establish final standards because they wished to consider very carefully all of the public comments available to this agency.

Public Law 95-604 required the Nuclear Regulatory Commission to promulgate rules which would implement and enforce the EPA final standards. There are no EPA final standards; and there should not be NRC rules.

The cost to the private sector and to the U.S. Government to follow the NRC final rules could be in the billions of dollars without providing any real improvements in the health and safety of the American public. Until such time as epidemiological studies are done, until such time as EPA publishes its standards and until we know what hazards actually exist, the Nuclear Regulatory Commission should be prohibited from enforcing the arbitrary, capricious and expensive-to-apply rules they have promulgated.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentlman from Alabama.

Mr. BEVILL. Mr. Chairman, I agree with the gentleman from New York that in this era of budget stringency there should be careful controls on the expenditure of funds which provide marginal benefits to the public. I thank the gentleman for bringing this serious deficiency to our attention. We accept this amendment on this side.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, we certainly do not want to get into a situation where we would needlessly spend hundreds of millions or billions of dollars to modify areas that pose little, if any, hazard to the public. We accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. STRATTON).

The amendment was agreed to.

□ 1430

Mr. DECKARD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it was at this point that I intended to introduce an amendment affecting the Columbia Dam. For technical reasons, I am unable to do so.

Last December, the Government Operations Committee, of which I am a member, unanimously approved a report criticizing the Columbia Dam project in Tennessee as a waste of money. Completion of the project would cost taxpayers an additional $100 million, simply to create the eighth recreational reservoir within a short radius. To that end, TVA proposes to destroy a river, condemn 440 farms, and force 1,500 people from their homes.

The TVA appropriation in this bill is $15.8 million—the amount of money for the Columbia Dam project for fiscal year 1982. These funds were deferred in the fiscal 1981 supplemental appropriation and rescission bill which we adopted a short time ago, pending acquisition by TVA of the necessary permits. These have now been obtained, and only by cutting these funds can the project be halted. A vote to do so would save $15.8 million immediately and more than $100 million in downstream costs.

The committee found that—

First, this project would not produce a single benefit that could not be achieved by a less costly alternative. Indeed, the Columbia Dam is the highest cost alternative for addressing the problems noted by project sponsors.

Second, the primary justification of the project—fully 60 percent of claimed benefits—is for flat water recreation in an area which already has seven reservoirs within a short drive of the project site.

Third, 440 farms would be destroyed and 1,500 people would be forced from their homes to make way for this recreational reservoir.

Fourth, over $100 million remains to be spent on this project, but all the claimed benefits—aside from those associated with a speedboating lake—could be realized by spending between $15 and $25 million on nondam alternatives.

Fifth, the TVA's own staff acknowledged that the alleged benefits could be realized more cheaply, but the TVA did not disclose the existence of this cheaper alternative until the Government Operations Committee investigation.

Sixth, the project will cause the loss of 13,000 acres of farmland and the economic activity associated with this farm business—again, in order to create yet another recreational lake.

Seventh, the project will eliminate 54 miles of the Duck River, as stream of great biological diversity, whose wood duck population give the stream its name.

Eighth, for 6 months of the year, the reservoir would be reduced in size by two-thirds from 12,000 acres to 4,000, thereby creating extensive recreational mudflats.

Ninth, flood control, at times alleged to be a significant benefit, amounts actually to less than 2 percent of projected benefits. The project floods more acreage upstream than it protects from occasional flooding below the dam. Most of the flood control benefit is claimed for an area of substandard housing and abandoned buildings comprising 43 structures; to protect these, TVA proposes to destroy 440 farms. An alternative would have been to adopt a voluntary relocation and flood-proofing program; this could have done the job at far lower cost, but it would not, of course, have produced a motorboating lake.

Tenth, improved water supply, which accounts for 19 percent of claimed benefits, could be achieved simply by appropriate operation of the existing Normandy Dam which is 111 miles upriver.

Eleventh, the Columbia Dam offers no navigational benefits and will generate no power.

It is incredible that, had the Government Operations Committee not investigated the project, we never would have known that TVA itself is in possession of a staff report which says that all the project objectives can be met without the Columbia Dam, and for a cost of between $15 and $25 million. All, that is, except the substitution of yet another lake for a natural river.

Since the convening of the 97th Congress, we have done little but look for areas in which spending can be cut. Many of us have cost votes we would have preferred not to make, but felt that no alternative existed if we were serious about making economies. But having done so, we should be determined that questionable spending be eliminated from every area of the budget. If we are prepared to reduce spending for human services in order to battle inflation, we should be prepared to vote against expenditures for motorboating as well.

The CHAIRMAN. Are there further amendments to title IV?

AMENDMENT OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. May the Chair inquire, is this an amendment offered by the gentleman?

Mr. BEVILL. This is a correctional amendment.

(The portion of the bill to which the amendment relates is as follows:)

TENNESSEE VALLEY AUTHORITY

PAYMENT TO TENNESSEE VALLEY AUTHORITY FUND

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended (16 U.S.C., ch. 12A), including purchase, hire, maintenance, and operation of aircraft, and purchase and hire of passenger motor vehicles, $137,743,000, to remain available until expended.

The Clerk read as follows:

Amendment offered by Mr. BEVILL: On page 30, line 20, strike out "$137,743,000" and insert in lieu thereof "$140,743,000".

Mr. BEVILL. Mr. Chairman, the amendment I offer would provide the Tennessee Valley Authority with $3 million to conduct a biomass fuels research program utilizing waste hardwood now abundant in the TVA region. The committee had originally recommended deletion of these funds from the budget request because of insufficient information by the TVA, but now has the information.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. BEVILL. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, this side concurs that this is a unique opportunity to develop ethanol. It is a known process. We feel this is the fastest way to accomplish this. We accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama (Mr. BEVILL).

The amendment was agreed to.

Mr. BINGHAM. Mr. Chairman, I move to strike the last word. I would appreciate clarification of the committee's intent with respect to the language proposed on page 30 of H.R. 4144 prohibiting the use of funds to implement section 110 of Public Law 295. I was the original author of section 110 which provides for the first systematic safety evaluation of all U.S. operating commercial nuclear power plants. Specifically, I would like the distinguished chairman's assurance that the committee does not intend by its bill or report language to impede in any way ongoing efforts within the Nuclear Regulatory Commission and the industry, in connection with the existing systematic evaluation plan (SEP), to assess and, where appropriate, to upgrade the safety of currently operating plants. As I am sure the gentleman knows, as part of this effort, the NRC is at this very moment improving the safety features of its standard review plan (SRP), the basic document used in the licensing process, and is working with industry to review the 11 oldest plants against current safety criteria. This exercise is scheduled to be repeated for the newer plants as well.

Mr. BEVILL. I would assure the gentleman from New York that the committee does not intend by its bill or report language on section 110 of Public Law 96-295 to impede ongoing safety programs.

Mr. BINGHAM. I appreciate the gentleman's remarks. I would also, and finally, seek his assurance that the language we are discussing would not prevent the NRC from deciding in the future to modify and improve its ongoing systematic evaluation plan, if, in the judgment of the Commission and the staff, the SEP needs further revision.

Mr. BEVILL. The gentleman is correct in noting that it is not the committee's intent to prevent the Commission from revising and upgrading such existing safety programs.

Mr. BINGHAM. I thank the distinguished chairman.

The CHAIRMAN. Are there further amendments to title IV? If not, the Clerk will read title V.

The Clerk proceeded to read title V.

Mr. BEVILL (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title V be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. Are there any points of order against the provisions of title V of the bill? The Chair observes no one standing.

Are there any amendments to title V?

Mr. AUCOIN. Mr. Chairman, I move to strike the last word.

I wonder if I might use this time to engage the chairman of the committee in a colloquy.

Mr. Chairman, I am troubled by the prospect that there is something missing in our suggestion of an appropriate Federal solar program. Industry and Government have been working to provide the Nation with additional supplies of renewable energy resources for the heating and cooling of residential and commercial buildings. As the result of our suggestions, I am worried that neither the Government nor the industry will succeed in their attempts to realize the potential of passive solar technology in the shortest practicable time.

The major research is almost completed. All that remains to be done is to incorporate the knowledge that has been developed into both new and existing buildings. The problem is that the construction industry is highly fractionalized and comprised of numerous small entrepreneurs. Any weak link in the long progression of incorporating a novel building concept will severely retard its early development. Builders, mortage lenders, product manufacturers, contractors, designers, craftsmen, and, ultimately, the consumer all must hear a single voice that measures the progress of passive solar. Further, because of certain added costs of passive solar, greater economic risk is involved. The homebuilder, in desperate circumstances now, will only build what he has been able to sell this year. The economy has dictated that he will neither be able to introduce nor to market innovative ideas and designs such as passive solar in this continuing building depression, unless he is assured that the consumer is being appraised of passive solar's considerable merit.

The passive solar technology which has been developed by the efforts of the Department of Energy and the construction industry is ready to be incorporated into our buildings. Increased utilization of passive solar designs and materials will not only result in a reduction of the Nation's nonrenewable resource requirements but will lower the consumer cost of maintaining a residence or commercial property and will ultimately provide additional funds for the purchase of buildings.

Passive solar energy relies primarily on the building industry for its introduction into the marketplace. I believe that the Federal Government should share with the construction industry the responsibility for the continued development and distribution of passive solar energy information. Through provision of useful information to builders, to the investment community, and to consumers, the Department of Energy will encourage the building community to incorporate passive solar into their design and construction systems. As the result of Government and industry cooperation, the Nation will benefit from a reduction in the cost and use of nonrenewable fuels, without the attendant risk of creating another permanently supported industry.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Chairman, I rise to echo the sentiments expressed by the gentleman from Oregon (Mr. AUCOIN). In the process of reining in on Government spending, we must not waste past expenditures and present opportunities by only investing the public's money in long-term research programs.

While it may appear that the subcommittee, in its decisions, is emphasizing long-term solar research to the exclusion of short-term applications, I

do not believe, Mr. Chairman, we intended for the apparent programmatic imbalance to be our policy.

Within the subcommittee's recommended level, there is actually sufficient flexibility for pursuit of both long-term cooling research and near-term application of already developed technologies through development of an industry/Government partnership. The establishment of a successful partnership will not only provide the beleaguered construction and home-building industries with new opportunities for employment, investment, and growth, but it will insure that the often valuable results of past Federal programing will be carried forward into the private marketplace.

I believe this is how we intend for the Department of Energy to pursue this program in fiscal year 1982 and in the future. When we are again resolved into the House, I will ask permission to insert in the RECORD as a part of the history of our committee's deliberations a list prepared by the Passive Solar Industries Council of the type of near-term passive solar projects that merit study and development.

Thank you.

The Passive Solar Industries Council recommends establishment and implementation of a passive solar energy program which contains the following components:

1. Basic Research

Residential

Advanced high performance materials, components and systems (Phase change materials, e.g. thermal storage, dense masonry aggregate for thermal storage, glazing systems and hybrid systems, etc.).

Commercial

Occupancy effects and time of day energy use.

Interrelationships of passive heating, cooling and lighting systems.

Integration of passive heating, cooling and lighting systems with conventional mechanical systems.

2. Thermal Behavior of Occupied Buildings

Residential

Provide baseline data needed to evaluate the thermal performance of passive solar systems.

Field measurements of dynamic heat loss/gain of occupied buildings.

Measure performance of specific retrofit options in various climates.

Commercial

Multizone interaction.

Total system performance.

3. Prototype and Component Development and Testing

Residential

Phase change storage building components.

High density masonry.

Advanced glazing systems.

Movable insulation and shading devices.

Packaged in modular passive systems.

Commercial

Glazing materials.

Advanced building shell materials.

4. Collect, Analyze and Present Actual Cost and Performance Data on All Innovative Technologies in a Variety of Climates for Residential and Commerical Applications

5. Develop Design and Analysis Methods Which Accurately Predict Performance of Passive Systems for Residential and Commercial Applications

6. Disseminate Research Results through Targeted Technology Transfer Program Using Existing Industry Channels

Residential and commercial

Notebooks, design manuals.

Simplified calculation program.

Seminar for design and building professionals, code officials, lenders, etc.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the distinguished gentleman from Alabama.

Mr. BEVILL. Mr. Chairman, the gentlewoman has stated it correctly. The gentleman from Oregon is correct. This is the intent of the committee. We certainly agree with you and accept your statement.

I have become impressed by the efforts of the building community, working in partnership with the Federal Government over the last 3 years, to develop what has been commonly referred to as passive solar energy for residential and commercial heating and cooling.

Unlike other forms of solar energy producing systems, passive solar heating is not founded upon the development of exotic machinery or new gadgets. Passive solar is the integration of several commonsense principles for both energy conservation and energy production within a building system. Passive solar buildings are being constructed and are performing to specification in numerous test site locations across the Nation.

Some polishing of design material and technology remains to be done, but clearly, the primary impediment to passive solar's near-term potential is the absence of a single entity to coordinate and assist in the production of industry-generated research and design information. The point made by my colleague, Mr. AUCOIN, is central to this issue. There must be a clearinghouse for this widely disparate industry group. The logical place for such activity is the Department of Energy's Office of Passive and Hybrid Solar Heating and Cooling, which has established an extremely effective working relationship with the building community. Mrs. BOGGS is quite correct when she laments the economic waste that would result by terminating Federal passive solar efforts while yet in the breech.

The need for passive solar is clearly defined, the potential return on investment is so high and the private sector options yet so limited, that continued involvement of the Federal Government for the next 3 to 5 years is strongly endorsed.

There is ample evidence that the private sector is eager to assume the coordinating role now being performed by the Federal Government. The recent incorporation of a broad-based construction industry association group is testimony to the fact that there should be no fear of the Federal Government creating a permanently supported industry. Unfortunately, given economic circumstances, this is not the best of times to be founding an association to be supported by the construction industry, and it is doubtful that such an association can become self-sustaining and assume a greater role on behalf of passive solar for another 2 to 3 years.

My committee has reviewed the past program of activities for passive solar within the Department of Energy and has engaged in productive discussion with the building industry concerning its perceived needs. I feel that the funding level of $15 million is adequate to achieve the continued implementation of a passive solar energy program which will contain essential information transfer and continued basic research components.

I will do my best to insure that these concepts will be accepted by our colleagues in the Senate, and I further pledge careful and concise review of the Department of Energy's ongoing passive solar programing.

□ 1440

Mr. DICKS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I wish to engage the subcommittee chairman in a colloquy, if I may. I note that in your report on page 88 "Other Energy Programs" under the subheading of "Energy Storage Systems" you have added $3 million to support programs in the physical and chemical storage area which are unlikely to be picked up by the private sector if Federal funding is terminated. There is a program funded under "Physical and Chemical Storage" which involves the recovery of industrial waste heat from aluminum plants and through the use of energy storage technologies the distribution of that energy to heat homes, commercial buildings and schools. This program is located in the State of Washington and currently faces severe funding restrictions in fiscal year 1982. The program has been most successful and holds great potential for the Nation in energy savings. The coalition of industry, the city and educational institutions will not be able to continue should Federal support be terminated as now planned. Is this the type program your committee anticipated funding through the addition of $3 million?

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Alabama.

Mr. BEVILL. Mr. Chairman, it is certainly the type of program we had in mind. I would add that these programs which have been successful and show such promise and have such a high national impact are indeed the types which should not be terminated in midstream. That is why we added the money.

Mr. DICKS. I might add that the city involved, Bellingham, Wash., has contracted to repay the Federal Government a portion of the dollars invested when they build the full-scale system.

Mr. BEVILL. That seems to be an even greater reason for the program to continue.

Mr. DICKS. Mr. Chairman, I thank the gentleman very much.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 31, after line 19, insert the following:

SEC. 504. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, the amendment I am offering would prevent the use of any funds by the departments and agencies funded by this bill for the implementation of any regulations or actions which have been vetoed by Congress using the specific veto procedures provided by applicable law.

There are several programs and agencies funded under this bill which are subject to some sort of legislative veto. For example, all regulations promulgated under the Energy Security Act with regard to synthetic fuels authorities of the President, U.S. Synthetic Fuels Corporation and energy targets are subject to congressional veto. Congress also has the right to veto FERC rules involving natural gas pricing passthrough under the Natural Gas Policy Act. Futhermore, under the terms of the Energy Policy and Conservation Act, the Secretary of Energy may propose standby energy rationing plans which Congress may veto if it so chooses.

The basic issue here, however, transcends the question of legislative veto. Even the few Members who still do not support legislative vetoes, surely must support the doctrine of following the law under which legislative vetoes are enacted and then duly exercised.

I have offered this amendment because past administrations have stated their intentions not to obey the law with regard to legislative vetoes. This unfortunate circumstance became concrete under the Carter administration last year after Congress vetoed four sets of regulations proposed by the Department of Education. In response, the Carter administration through Attorney General Benjamin Civiletti and Secretary Shirley Hufstedler, announced a decision to ignore these vetoes. In short the Carter administration said it would not obey the law, providing for legislative veto of these regulations, as it was duly enacted by Congress and signed by the President.

The law in this case is very simple. It is very explicit. It says that where both Houses of the Congress have adopted a congressional veto, the regulations become null and void.

However, the problem was not just with the Department of Education. It was the general policy of the Carter administration. While I would hope that the Reagan administration will not be willing to disregard the law, we must be sure that the law is followed. This amendment will act as a safeguard to prevent this disregard for the law from occurring again.

The action of past administrations makes the issue one of whether we in Congress are going to allow the law to be ignored. I do not believe any Member of Congress can stand by and allow our mandates to be treated in such cavalier fashion. The Constitution of the United States requires the President of the United States to faithfully execute the laws. He is not given the authority to pick and choose those laws he wants to implement and those that he does not want to implement.

It is not for the executive branch to decide what laws will be enforced. There is a very important case that illustrated that point, Kendall against United States, decided by the Supreme Court in 1838. In that instance, the President of the United States directed the Postmaster General not to pay a certain sum required to be paid by Congress to a contractor with the Post Office, and in issuing the writ of mandamus, the Court said:

To contend that the obligation imposed on the President to see the laws faithfully executed implies a power to forbid their execution is a novel construction of the Constitution and entirely inadmissible.

No, the President of the United States does not have the power or the right or the prerogative not to enforce the laws. Where such disputes exist the proper forum for resolving them lies within the court system and ultimately within the jurisdiction of the Supreme Court. The administration's questions about this provision of the law should be resolved in that arena, not by noncompliance.

Mr. Chairman, this is a simple proposition. Once a legislative veto has been exercised, it is a disobedience of the law by those charged with the responsibility of executing the law to disregard it, and I do not think we ought to give them money to disobey the law. The only way we can effectively enforce these provisions of the law is to provide a limitation for funding so that no funds can be used for purposes of implementing disapproved or vetoed actions.

That is the reason I have offered this amendment, Mr. Chairman. We are facing a significant challenge to our constitutional powers, and we must rise to meet it. My amendment will do so in a simple direct fashion. I urge every Member of this body to support its passage.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Alabama.

Mr. BEVILL. Mr. Chairman, we have reviewed the gentleman's amendment, and we accept it. There are no objections to it.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, we on this side accept the amendment.

Mr. EDGAR. Mr. Chairman, if the gentleman will yield, could he give us just a brief further explanation of his amendment?

Mr. LEVITAS. Mr. Chairman, the amendment is one that we have adopted on other appropriation bills. It simply says that where there is a procedure already in the law where we have rejected the use of funds for regulations by agencies or other branches of government, there shall be no funding for those regulations which have been rejected by the Congress.

Mr. EDGAR. Mr. Chairman, I thank the gentleman for explaining his amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 31, immediately after line 19 insert the following new sections:

SEC. 505. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency.

SEC. 506. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001

with an EPA estimated miles per gallon average of less than 22 miles per gallon.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I am happy to yield to the gentleman from Alabama.

Mr. BEVILL. Mr. Chairman, we are familiar with the gentleman's amendment. It has been added to every appropriation bill. We have no objection to it, and we accept it.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, this side will accept the amendment.

Mr. EDGAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will ask the gentleman from Pennsylvania (Mr. ERTEL) if he will explain what his amendment does.

Mr. ERTEL. Mr. Chairman, if the gentleman will yield, the amendment would merely eliminate the utilization of chauffeurs, servants, or waiters for the personal service of people who would be funded under this bill, and, second, what it would do is provide that any car procured or leased under the bill would be required to have an EPA rating above 22 miles per gallon. I refer to passenger automobiles.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, I thank the gentleman for yielding.

I do not want to take much time on this because I have a plane to catch also. Let me just ask the author of the amendment this question.

If I understand the definition of "passenger automobile," under the section he is relating this to, it may include pickup trucks. I ask the question because the only pickup trucks which meet this mileage requirement are Japanese pickup trucks.

Mr. ERTEL. Mr. Chairman, my recollection of the definition of "passenger automobile" is that it does not include pickup trucks. It is only the vehicles which carry passengers up to 10.

Mr. TRAXLER. Mr. Chairman, if the gentleman will allow me, let me say that I just wanted to alert the gentleman to that point. I will talk to him further about this. I wish the gentleman would look at this section, because I am fearful of what he is doing. I do not think we have the time to straighten this out now, but I will be glad to talk to him next week.

Mr. EDGAR. Mr. Chairman, just for the information of the House, the reason I have asked that the amendment be explained is simply that 2 years ago when we were in the same situation, when we were in a rush to finish completion of this bill, we had the spectacle of a Member coming in and asking unanimous consent that an amendment be read; the ranking Republican Member and the ranking Democratic Member accepted the amendment, and everyone was happy. We discovered, however, the next day that we had reauthorized the Tellico Dam without any vocal consideration or any words being spoken on the House floor.

My caution is simply that the Members of the House ought to know what amendments we are accepting quickly at this late hour of legislation.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

● Ms. OAKAR. Mr. Chairman, today's vote by the House in approving the fiscal year 1982 energy and water appropriations bill is of special interest to me because it provides my constituents back home in Greater Cleveland with funds for several necessary and worthwhile water projects.

Specifically, the bill would fund the entire cost of utility relocation in the vicinity of the Cleveland Zoological Park as part of an important flood control project, at a cost of $3.3 million; and would continue funding of the Corps of Engineers Advanced Phase I Study on general navigation improvements to Cleveland Harbor ($202,000), continue study on flood prevention measures to the Cuyahoga River Basin ($100,000), and rehabilitate sections of the Cleveland Harbor's breakwater and dredge the harbor ($7.4 million).

These funds are critical toward improving and modernizing Greater Cleveland's waterfront and river facilities. The people of my city hope one day to have our harbor dredged to a depth to permit the entry of the 1,000-foot giant iron ore carriers to promote greater industrial employment and production and commercial development of the Greater Cleveland and northeast Ohio area. Toward this end, it is my hope that Congress will act on comprehensive water resources legislation, especially in view of the many recommendations by the Corps of Engineers for improving Cleveland Harbor and port facilities to handle the 1,000-foot carriers.

In the meantime, I wish to commend the House for its adoption of this legislation which will specifically permit the corps to proceed toward completion of the very important flood control project in the Cleveland Zoological Park. Now that relocation of utilities will be undertaken at full Federal expense, thus relieving the local sponsor—Cleveland Metroparks—of an inequitable and inordinate expense—the corps can complete this project which is so critical to prevent annual flooding (which has resulted in animal life loss and extensive property damage) of low-lying areas of the Cleveland Zoo.●

Mr. BEVILL. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. COUGHLIN

Mr. COUGHLIN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. COUGHLIN. I am, in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. COUGHLIN moves to recommit the bill, H.R. 4144, to the Committee on Appropriations.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WEAVER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 244, nays 104, not voting 85, as follows:

Florio	McKinney	

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Zeferetti against.

Mr. Mattox for, with Mr. Vento against.

Mr. Biaggi for, with Mr. Russo against.

Mr. Nelson for, with Mr. Richmond against.

Mr. Anthony for, with Mr. Garcia against.

Until further notice:

Mr. Chappell with Mr. Beard.

Mr. Boland with Mr. Horton.

Mr. Young of Missouri with Mr. Kemp.

Mr. Wright with Mr. Quillen.

Mr. St Germain with Mr. Dornan of California.

Mr. Mottl with Mr. Burgener.

Mr. Gaydos with Mr. Rousselot.

Mr. Rosenthal with Mr. Taylor.

Mr. Crockett with Mr. Fish.

Mr. Barnard with Mr. Mitchell of New York.

Mr. Peyser with Mr. Brown of Ohio.

Mr. Moakley with Mr. Tauke.

Mr. Florio with Mr. Lewis.

Mr. Reuss with Mr. Cheney.

Mr. Patterson with Mr. Benedict.

Mr. Hutto with Mr. Solomon.

Mr. Ford of Michigan with Mr. Davis.

Mr. Hightower with Mr. Chappie.

Mr. Fowler with Mr. McKinney.

Mr. Frost with Mr. Martin of North Carolina.

Mr. Huckaby with Mr. Frenzel.

Mr. Early with Mr. Pritchard.

Mr. Bowen with Mr. Sawyer.

Mr. Flippo with Mr. Railsback.

Mr. Hatcher with Mr. Butler.

Mr. Gray with Mr. Coleman.

Mr. Jenkins with Mr. Roberts of South Dakota.

Mr. Dixon with Mrs. Martin of Illinois.

Mr. Downey with Mr. Hansen of Utah.

Mr. Kazen with Mr. Hendon.

Mr. Santini with Mr. Dymally.

Mr. CARMAN and Mr. WYDEN changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO FILE REPORT ON H.R. 4074, REVISING LAWS PERTAINING TO MARITIME ADMINISTRATION

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight tonight, July 24, 1981, to file a report on the bill (H.R. 4074) to revise the laws pertaining to the Maritime Administration.

The SPEAKER pro tempore (Mr. MINETA). Is there objection to the request of the gentleman from North Carolina?

There was no objection.

PERSONAL EXPLANATION

(Mr. FORD of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Michigan. Mr. Speaker, I was attending and chairing a meeting of the Franking Commission and returned to the floor too late for the vote just passed and would have voted "yea" had I been on the floor.

RESIGNATION AS MEMBER OF COMMITTEE ON GOVERNMENT OPERATIONS

The SPEAKER pro tempore laid before the House the following resignation as a member of the Committee on Government Operations:

WASHINGTON, D.C., *July 24, 1981.*

Hon. THOMAS P. O'NEILL,
Speaker of the House,
Capitol Building, Washington, D.C.

DEAR MR. SPEAKER: I hereby resign my post, effective today, on the Committee on Government Operations.

Thank you very much for your consideration in this matter.

Sincerely,

DAVID DREIER,
Member of Congress.

The SPEAKER pro tempore. Without objection, the resignation is accepted.

There was no objection.

ELECTION AS MEMBER OF COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

Mr. MADIGAN. Mr. Speaker, I offer a privileged resolution (H. Res. 195) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 195

Resolved, That David Dreier, of California, be and hereby is elected to the Committee on Banking, Finance and Urban Affairs.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. MADIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MADIGAN. Mr. Speaker, I ask unanimous consent to proceed for 1 minute for the purpose of asking the distinguished majority whip if he could explain to the House the program for the balance of the day and the program for next week as well.

Mr. FOLEY. Will the distinguished acting Republican leader yield to me?

Mr. MADIGAN. I will be happy to yield.

Mr. FOLEY. I thank the gentleman.

This concludes the business for today and this week.

On Monday the House will meet at noon and consider 10 bills under a suspension of the rules. They are:

H.R. 2803, National Oceanographic (NOAA) authorizations;

H.R. 3115, EPA authorizations;

H.R. 4074, Maritime Administration law revisions;

H.J. Res. 223, gold medal for Fred Waring;

H.R. 4053, Mineral Leasing Act amendments;

H.R. 4182, airport development authorizations;

H.R. 1898, James A. Burke Post Office;

H.R. 1855, Fort Point Channel Bridge;

H.R. 1311, National Tourism Policy Act; and

H.R. 2120, Risk Retention Act.

Monday is also District day; and there will be two bills under consideration, these are:

H.R. 2818, increase District borrowing authority; and

H.R. 2819, increase District payment from Federal Government.

Finally, the House will consider H.R. 4419, Agriculture appropriations, fiscal year 1982.

I would like to advise all Members at this time that there will be votes on Monday on the two District bills as well as on the Agriculture appropriations bill. Votes on the suspensions, however, will be postponed until Tuesday.

On Tuesday the House will meet at noon, and first vote on those suspensions debated on Monday.

Following that we will consider:

H.R. 4121, Treasury-Postal appropriations, fiscal year 1982; and

H.R. 4120, legislative appropriations, fiscal year 1982.

□ 1510

It is my intention to request unanimous consent that the House meet at 9 o'clock on Wednesday. It will meet at 10 o'clock on Thursday and Friday. On Wednesday and the balance of the week the House will consider H.R. 4242, the Tax Incentive Act of 1981, subject to a rule being granted; H.R. 4169, State, Justice, Commerce, Judiciary appropriations for fiscal year 1982; H.R. 4209, Transportation appropriations, fiscal year 1982; and H.R. 4241, military construction appropriations, fiscal year 1982.

The conference report on budget reconciliation will be brought to the floor as soon as possible.

Adjournment times will be announced daily.

It is possible that there will be a late session on all days, including Friday, as well as a Saturday session that could also run late.

I will repeat: Adjournment times will be announced daily. There will be a Friday and possibly a Saturday session. Members should expect late evenings each night, including Friday and Saturday.

Mr. MADIGAN. If the gentleman will allow me, I should like, on behalf of the distinguished minority leader (Mr. MICHEL), to pursue for the record several understandings that I understand have been reached.

It is my understanding that the conferees on the budget resolution will continue to work over the weekend, in the hope that the budget resolution can be completed and that the conference report can be filed early in the week, with possible action on it by Wednesday. I would like to clarify that that is the understanding of the gentleman from Washington.

Mr. FOLEY. It is certainly the hope.

Mr. MADIGAN. And that the Rules Committee will meet on Tuesday for the consideration of a rule on the tax bill, that we will have a 9 o'clock session on Wednesday, and the hope, at least, is expressed, as I understand it, by the leadership of both parties, that the conference on the tax bill can be expedited so that we will be able to vote on the tax bill by Saturday; but that in the event that we are not at that point by Saturday next, there is a possibility that the House would continue to be in session for the following week until action on the tax bill conference is completed.

Is that the gentleman's understanding?

Mr. FOLEY. That is the gentleman's understanding and, again, hope. No one can predict with any certainty at what point a conference on the tax bill could be concluded. In fact it is hoped that the tax conference might actually be concluded before the end of next week. The Speaker has indicated, however, that if necessary, the House may stay in session the following week in order to complete the tax conference.

Mr. MADIGAN. So the three things important for the Members to understand are that the members of the budget conference have some obligations this weekend, that all Members can expect the possibility of night sessions all next week, and on Saturday, and there is the possibility that we will be working the first week in August.

Mr. FOLEY. Yes; while I am not aware of the schedules of various subcommittees with respect to the budget reconciliation, I believe some will have sessions over the weekend in an effort to conclude their work.

It is true, as the gentleman says, that next week will be somewhat unusual in that Members should expect not only votes on each day, but adjournment times to be announced daily, the virtual certainty of a Friday session, or the possibility of a Saturday session, and the possibility of late sessions each night including Friday and Saturday.

Also, Members would be well advised to make no firm plans for the beginning of the recess. If a conference report on the tax bill has not been concluded by next week, the likelihood of a further schedule the following week is very high.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Is it not also our understanding with regard to the Rules Committee meeting on Tuesday, with

regard to the tax bill, that only amendments that were filed before 3 o'clock this afternoon would be considered by the Rules Committee at that point? Is that the gentleman's understanding? Is that the understanding of the gentleman from Washington?

Mr. FOLEY. That is not my understanding, I will tell the gentleman, frankly. I have no authority to make any such representation.

Mr. MADIGAN. It is my understanding that that was an idea expressed by the chairman of the Rules Committee, but it is nothing that has been agreed to by the leadership of either party or the leadership together.

Mr. WALKER. I thank the gentleman.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to my colleague, the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, I just want to be sure, with all of the leaders involved, is it proper for me to assume that this basic understanding has the OK of the gentleman from California, Mr. JOHN L. BURTON?

Mr. FOLEY. I must tell the gentleman, frankly, I have not discussed the matter with either of the distinguished gentlemen from California, Mr. PHILLIP BURTON or Mr. JOHN L. BURTON; but knowing those gentlemen, I am sure that the gentleman himself may be able to consult on that.

Mr. DERWINSKI. I feel relieved that the gentleman is still aware of them.

Mr. FOLEY. I am certainly aware, and I thank the gentleman for his contribution.

ADJOURNMENT TO MONDAY, JULY 27, 1981

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

HOUR OF MEETING ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House convenes on Wednesday next, it meet at 9 a.m.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

MOTIONS TO STRIKE WITH REFERENCE TO VARIOUS PENDING TAX PROPOSALS

(Mr. PHILLIP BURTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHILLIP BURTON. Mr. Speaker, I rise at this time, having watched the clock, hoping this will prove to be a successful effort to qualify in the course of revising my remarks to note certain motions to strike with reference to the various pending tax proposals.

APPLY THE CREDIT ELSEWHERE TEST TO BIG BUSINESS, TOO

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, the Nation's largest corporations seem to be overcome by a sudden urge to merge. As part of this merger frenzy, major oil companies are lining up huge loans in order to finance takeover battles. The sudden rush of these companies into the credit market should be great concern to all of us.

When six oil companies can arrange new lines of credit totaling $28 billion in just 3 weeks, the effect has to be that less money is available for others to borrow for more productive uses, and the huge surge in demand for loans must help to keep interest rates high for smaller borrowers.

Three of those six oil companies, incidentally, have applications pending before the Synthetic Fuels Corporation for Government financial assistance.

I have written to the chairman of the Synthetic Fuels Corporation, urging them to apply a strict credit elsewhere test to the energy companies who are seeking Government financial support. This is what we require of small businessmen and farmers who come to the Government for assistance, and it is what we should demand of the big oil companies, too.

At this point in the RECORD, Mr. Speaker, I wish to insert the complete text of my letter to Edward Noble, chairman of the Synthetic Fuels Corporation.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., July 24, 1981.

Mr. EDWARD E. NOBLE,
Chairman, Synthetic Fuels Corporation, Washington, D.C.

DEAR MR. NOBLE: I am sure you are following the daily news accounts of the bidding that is going on for control of Conoco. The recent wave of merger activity among some of the nation's leading energy companies has caused many such firms to publicize the lines of credit that they have opened recently.

Just in the past month, we have seen published reports that various oil companies have arranged for loans totaling $28 billion. A list of six oil companies and the credit that each is reported to have lined up recently: Conoco, $3 billion; Gulf, $6 billion; Marathon, $5 billion; Mobil, $6 billion; Pennzoil, $2.5 billion; and Texaco, $5.5 billion.

Of course, these sums are in addition to any cash those firms may have on hand. And the numbers do not reflect any additional lines of credit that may be available to other companies.

The $28 billion in loans recently arranged by the six companies listed above practically dwarfs the $18 billion in loan guarantees that the Snythetic Fuels Corporation is authorized to issue this year. You may recall that Congress authorized that $18 billion on the premise that funds otherwise would not be available for the development of synthetic fuels projects by the energy companies.

On April 29, 1981, I recognized from R. G. Romatowski, then Acting Undersecretary of the Department of Energy, a list of 61 proposals pending before the Synthetic Fuels Corporation. That list of applications for U.S. Government financial assistance included requests from three of the six companies listed above.

Texaco is seeking loan guarantees on two projects and joint venturing on a third. *Conoco* is seeking a loan guarantee for one project. And *Mobil* has requested both price and loan guarantees in one proposal.

At this time, it seems appropriate to recall that Section 131(r) of the Energy Security Act provides that "any financial assistance by the Corporation for (a) project will not compete with nor supplant such available private capital investment and that adequate financing for the project would not otherwise be available. . . ."

As a member of the Small Business Committee I am, of course, more familiar with the workings of government loan guarantees for small businesses rather than those proposed for multinational corporations. The Small Business Administration applies a very strict "credit elsewhere" test to all applicants for SBA loans or loan guarantees. Under this provision, a small business cannot even apply for SBA financial assistance until after it has been turned down for a loan by at least two banks. And as a member of the Agriculture Committee, I know that the Farmers Home Administration not only applies a credit elsewhere test to the applicant for an FmHA loan but sometimes also applies the test to members of the farmer's family.

It seems to me that it is not unreasonable to require that big energy companies should play by the same rules the government imposes on operators of small business and family farms. Last year we required tens of thousands of small businesses and family farmers to show that they had been refused credit elsewhere before they could apply for SBA or FmHA financial assistance. I believe nothing less should be required of the oil companies that are lined up at the Synthetic Fuels Corporations door, waiting for its loan window to open.

In order to assure the public that U.S. Government financial assistance is not going to corporations that can finance their

own projects, one of the first actions taken by the new Synthetic Fuels Corporation ought to be the establishment of a clear and unequivocal credit elsewhere test. Not only will this help instill confidence in the Corporation, but it will also direct assistance to those smaller firms that truly need the Government's help.

Sincerely,

BERKLEY BEDELL.

RAMSEY CLARK, WHERE ARE YOU WHEN WE NEED YOU?

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

● Mr. DERWINSKI. Mr. Speaker, hardly a day goes by in Iran without the radical government there announcing it has executed someone else for antirevolutionary activity. More than 200 Iranians have been shot in the wake of Bani-Sadr's ouster from the presidency. The cruelty of this regime is abundantly clear, yet I have detected no expressions of outrage from those "human rights" activists who were so long critical of the Shah. Indeed, the silence is deafening from the likes of Ramsey Clark and company who were so quick to condemn the Shah and embrace Khomeini as an alternative. Such silence is particularly perplexing, given the fact that most of the victims have been from the left end of the political spectrum Mr. Clark identifies with.

Admittedly, the Shah and his associates had their shortcomings. But this regime makes them look thoroughly benevolent in contrast. In fact, the Islamic militias and secret police have resorted to tactics that are far worse than those attributed to the Shah's savak.

I also want to call the attention of the House to the continued persecution of members of the Baha'i religious group in Iran by the Khomeini government. The Baha'is in Iran have long suffered tremendous pressure and persecution but they are now being murdered by the Khomeini regime for adherence to their faith.

Mr. Speaker, it is high time that this Congress spotlighted what is happening in Iran. Therefore, today I am asking the chairman of the Foreign Affairs Committee's Human Rights Subcommittee to hold hearings posthaste on the human rights situation in Iran. In view of his consistent record on human rights, I am confident that the chairman of that subcommittee, Mr. BONKER, will respond in a forthcoming manner.●

CONGRESSMAN HENRY B. GONZALEZ INTRODUCES BILL OF IMPEACHMENT FOR FEDERAL RESERVE BOARD CHAIRMAN PAUL VOLCKER

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GONZALEZ. Mr. Speaker, yesterday, ironically, the Washington Star had a pretty strong editorial taking me to task for what was then my threat to introduce a bill of impeachment for the Chairman of the Federal Reserve Board, Paul Volcker, which, incidentally, I have since introduced today.

I have replied to that editorial, and I wish to offer it for the RECORD at this point, in that the attack, ironically, came at a time in the same edition, on another page, the newspaper was confessing that it was going out of business for the very reasons that have impelled my introduction of the impeachment resolution on Mr. Volcker.

WASHINGTON, D.C.,
July 24, 1981.

Mr. EDWIN YODER,
Editor, the Washington Star,
Washington, D.C.

DEAR MR. YODER: It was a special irony to read the Star's editorial defense of the Federal Reserve's ruinous policy in the same pages that the Star announced its own demise, yet another company destroyed by an inability to finance the kind of effort needed to stay afloat.

I'm serious about impeachment proceedings against the Fed's chief. After all, the Fed is supposed to be independent of the White House, but all evidence suggests that it is merely a messenger boy for the Oval Office. Your editorial had it right when it said I want to get rid of the messenger. The Fed isn't supposed to be a messenger; it is supposed to be a manager. It isn't supposed to respond to the whims of the White House, but that's what it does. Even an old friend of mine, an ardent defender of the current Fed policies, has published studies showing how subservient the Fed is to whatever Administration happens to be in power.

Look at it this way. Why should we pretend that the Federal Reserve should maintain the image of independence, if it swings with the political wind? Why not just put it under the Treasury, where its actions would be seen for what they are, namely; instruments of political policy, and similarly accountable? Interest rates aren't a divine act, they are deliberately induced.

There is something dreadfully wrong when the money can be found to finance multibillion dollar corporate raids, but can't be found to keep two newspapers alive in a town as big and rich as Washington. There is something amiss when gigantic speculations can always get cash on favorable terms, but the corner merchant can't finance an inventory at less than loan-shark rates. There is something sadly wrong when a Federal deficit that is progressively smaller (in terms of GNP) somehow is supposed to be crowding interest rates up to historically high levels.

It isn't necessary to destroy small business by the thousands, to drive home building and auto industries into depression, or to turn millions into the streets to fight inflation.

The Federal Reserve privately says that Ronald Reagan's policies are reckless and might be ruinous. If they believe that, why won't they say so publicly? I don't see any reason why Congress or the American people should put up with the pretense that the Fed is either independent of White House demands, or even that it knows what it's doing. It would be healthy to air the linen in some forum other than a sterile academic debate like that we always see in Congressional reviews on the conduct of monetary policy.

Sincerely yours.

HENRY B. GONZALEZ,
Member of Congress.

P.S.—I enclose a copy of my impeachment resolution, just introduced.

□ 1520

HISTORICAL EVENT

The SPEAKER pro tempore (Mr. MINETA). Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I want to report today on a historic event this morning. For the first time in history, a President visited the Republican Conference.

The Republican Conference is a gathering of Republican Congressmen, and while Presidents have often, beginning with Woodrow Wilson, come down and addressed the entire Congress, this is a unique event in the history of the House and I think the beginning of a new and closer working relationship.

What has finally happened is that we are developing within the framework of the American Constitution a defacto parliamentary team, an effort to knit together the President and the members of his bipartisan coalition, the conservative Democrats and Republicans, in an effort to genuinely govern. We are a team.

The tax bill which we will be fighting for next week is a jointly designed bill in which the Treasury, a branch of the White House, the center of the executive, worked closely with Republicans and convervative Democrats in the House, a branch of the legislature, to develop a team effort, a team bill, as part of a team program, to fight inflation, high-interest rates, and unemployment.

Back in the 1980 campaign, we personified this team by bringing to the steps of the Capitol the Republican candidates for the Presidency, the Vice Presidency, the Senate, and the House as well as those sitting Members of the Senate who were not up for reelection.

It was, to the best of my knowledge, the first time in American history that a party had brought together all of its Federal officeholders and candidates to one place to jointly pledge to enact a series of steps to improve America.

We are in the process of keeping our word of enacting those steps. We have cut the budget as we promised to, we have cut the congressional budget, as we promised to, we have developed a stronger national defense as we prom-

ised to, and now we are fighting to cut taxes as we promised to.

In fact, if anything, in the last 24 hours we have dramatically improved the Conable-Hance bill that it is now a permanent reduction in taxation.

We have added to it indexing. Indexing is that process which says that if the cost of living pushes you up in your income just in paper dollars, because of inflation, then the Tax Code should go up at the same time, so that you would not—I repeat, not—be in a higher tax bracket.

By indexing the Tax Code, we will guarantee in the future working Americans will not see more of their pay raise go to the Federal Government, but in the future working Americans, when they receive a cost-of-living increase will get to spend that cost-of-living increase, that in the future, the Federal Government will be put on a diet, instead of putting the American family on a diet.

Indexing means that the Federal Government will have to plan the future to have honest open tax increases, not just to receive a huge windfall profit from inflation, pushing Americans into higher brackets.

Indeed, the Conable-Hance bill is in effect a revolution in tax policy.

As President Reagan himself said this morning, the people on the other side, the liberal Democratic leadership, are offering us a bill that is more of the same kind of so-called phony tax cuts we have had in the past decade. We have had five tax cuts in the last 10 years, and tax revenues have gone up $400 billion.

Those are President Reagan's figures. In other words, every time there was a short tax cut brought to you by the liberals, taxes end up being higher.

The Rostenkowski tax bill is in the same tradition.

President Reagan pointed out that the Rostenkowski-O'Neill bill is in fact better for you, if you plan to live only 2 more years. But in the short run, if all you can see is the immediate future, they have a slight argument but not much of one. It is a good gimmick, it is more of the same kind of short-term cuts, short-term efforts that failed throughout the seventies, that gave us a 249-percent tax increase.

But if you hope to live at least 3 years, then what happens under Rostenkowski-O'Neill is once again taxes go down very slightly, then they start back up immediately. So that by 1984 you are back with tax increases.

What you have is a gimmick on their side versus a plan on President Reagan's side.

Now, people are tired of the phony tax cuts of the last 10 years. People want real tax cuts.

For example, in response to one national survey recently people were asked, President Reagan has proposed a 25-percent reduction in Federal income tax rates for all individuals spread over 3 years starting with a 5-percent cut beginning October 1 of this year. Do you approve or disapprove of this tax cut proposal?

Sixty-eight percent of the American people approved, 23 percent opposed, and the rest were not certain.

In every region there was approval. The most amazing thing is that traditionally most Democratic regions of the country, the Northeast approved the most, those of you who live in Massachusetts, New England, New York, New Jersey, Connecticut, in areas where incomes average higher and therefore people are in higher tax brackets.

The margin in the Northeast was 70 percent approval, 21 percent disapproval.

In the Midwest it was 68 percent approval, 21 percent disapproval.

In the South, it was 66 percent approval, 23 percent disapproval.

In the West, it was 68 percent approval, 25 percent disapproval.

Think of that. In every part of the country by an average of 2½ to 1, 2½ to 1, the American people are asking for a tax cut, for a real tax cut, for real tax relief.

This weekend, as the Congress scatters and goes back home, as Members have a chance to see their friends and neighbors, the American people have a chance to register their commitment, their support, for a bill that is now out that is available.

□ 1530

The Conable-Hance bill, with its full 25 percent tax rate reduction over the next 3 years, with its commitment to more jobs, to new machinery, to new factories, to creating the prosperity that will give our children a chance to have a better life, the Conable-Hance bill has President Reagan's support and it deserves your support.

BLUEPRINT FOR A HOUSE THAT WORKS—PART VIII

The SPEAKER pro tempore (Mr. LOWRY of Washington). Under a previous order of the House, the gentleman from Mississippi (Mr. LOTT) is recognized for 5 minutes.

● Mr. LOTT. Mr. Speaker, I would like to remind my colleagues that the hearing record on House Resolution 100, the Committee Improvement Amendments of 1981, will remain open until Friday, July 31. Members wishing to submit statements on this package of House rules amendments designed to make our committee system more manageable and accountable should send them to the Subcommittee on Rules, House Rules Committee, 1628 Longworth House Office Building.

Mr. Speaker, I have termed this package of rules changes a "Blueprint for a House That Works," because it is my feeling that the legislative process is not working as it should due to a variety of flaws in our committee system. To date 105 of our colleagues have cosponsored this committee reform resolution.

At this point in the RECORD, Mr. Speaker, I insert the testimony I presented on House Resolution 100 before a joint Rules Subcommittee hearing on July 13. I commend it to the attention of my colleagues and invite them to submit their own views on it for our hearing record. The testimony follows:

TESTIMONY OF HON. TRENT LOTT

Messrs. Cochairmen and members of the Subcommittees, I am grateful to the Subcommittees on Rules and Legislative Process for holding these joint hearings on H. Res 100, the "Committee Improvement Amendments of 1931," which currently has 104 cosponsors.

I especially want to commend the chairman of the committee for referring this resolution to the subcommittees. As the Patterson Select Committee on Committees reluctantly concluded in its final report last year, select committees may not be the appropriate vehicles for attempting institutional changes, and such efforts may have a greater chance for success if drafted, promoted and managed by a standing committee. And the minority views to that report added, "The Committee on Rules possesses the necessary continuity, experience and considerable authority that is required to deal intelligently and effectively with institutional problems generally and with committee system revision in particular." The minority went on to urge this committee "to employ its augmented resources to remedy what its distinguished chairman has characterized as a 'House Out of Order.'."

The underlying premise of my "Committee Improvement Amendment" is that this is indeed a House out of order—our committee system is in disarray, and, as a result, our representative form of government as we know it is in danger of collapse. And I am not alone in this view. Nearly 70 percent of the House respondents to a select committee survey in the last Congress agreed with the statement that our committee system is in disarray. And this assessment is shared by numerous political scientists and other students of the Congress.

It is not difficult to identify the underlying causes of this breakdown in the legislative process in the House: the growing independence of Members and consequent loosening of party ties and discipline; the factionalization of the political process with the growth of single-issue interest groups and resultant difficulty in achieving a national consensus on major issues; the decentralization of power in the House with the proliferation of semi-autonomous subcommittees and the consequent jurisdictional duplication and conflict; and a system overload that has Members spread so thinly over such a sprawling subcommittee maze as to make intelligent and conscientious deliberation and decision-making an almost impossible task.

Identifying a problem is one thing. Doing something about it is quite another. As we have painfully learned from past reform efforts, any proposals for institutional im-

provement will run up against powerful resistance because they necessarily involve some new sacrifice of power, prerogatives and turf. They also often involve the imposition of new self-disciplines which we are reluctant to embrace in the free-wheeling-and-dealing political arena to which we have grown accustomed. But I would submit that institutional change and improvement is no longer some luxury which we can indulge when it suits us. It is now a necessity which is critical to the survival of our democratic system of government. Lord Macaulay once advised the British Parliament to "reform, that you may preserve." That advice, given some 150 years ago, is just as relevant to our situation in the House today.

Woodrow Wilson wrote in his 1885 treatise on "congressional government" that, "Congress in session is Congress on public exhibition, whilst Congress in its committee rooms is Congress at work." Yet it's a wonder today that Congress gets any work done. Members complain that they spend more time shuttling back and forth between committee and subcommittee meetings and hearings and floor votes than they do in actual committee work. It's little wonder that we've had to resort in recent times to such phantom legislative devices as one-third quorums and proxy voting to markup legislation. Yet is this any way to write our Nation's laws that affect tens of millions of people and involve tens of billions of taxpayers' dollars?

I think it's high time we recognized that this House is not working as it should and that what is clearly needed is a new "Blueprint for a House that Works." That's what I've termed my package of "committee improvement amendments." It recognizes that the very heart of the legislative process—the committee system—is badly flawed and in need of repair. The Bolling Select Committee on Committees in the 93rd Congress observed that, "Committees are the nerve ends of Congress—the gatherers of information, the sifters of alternatives, the refiners of legislation. Few organizations are so critical to the continued effectiveness of Congress as a policy-making body." Yet those very nerve ends are being rubbed exceedingly raw by our existing organization and procedures.

At the heart of my committee improvement package is the belief that we must drastically reduce the number of subcommittees which have spawned more problems than solutions in this body. Section 4 of my resolution would limit all standing committees, except Appropriations, to no more than six subcommittees, and all Members to no more than four standing subcommittee assignments. This is virtually identical to a proposal reported by the Patterson Select Committee on Committees in the last Congress. Moreover, the Member survey conducted by that select committee revealed that 81 percent of the Members agreed that the number of subcommittees should be reduced, and 82.6 percent agreed that a limitation should be placed on Member subcommittee assignments. Sixty-four percent of the respondents felt committees should be limited to six or less subcommittees, and 62 percent felt Members should be limited to four or less subcommittee assignments.

I can't think of any proposal which would do more to reduce system overload and conflict than these two reforms. In the last Congress we had 152 standing subcommittees in the House. As a result of a Democratic Caucus rule in this Congress, limiting committees to eight subcommittees or the number they had in the last Congress, whichever is fewer, we've brought the total down to 141. But that's still far too many. My proposal would result in a further reduction of some 17 subcommittees, bringing the total down to 124.

Section 2 of my resolution is also aimed at reducing the workload of our committees. It would eliminate the practice of joint referral of bills, while retaining split and sequential referrals. The current joint referral practice has guaranteed a duplication of effort and a marked increase in jurisdictional conflict, controversy and confusion. The Select Committee on Committees in the last Congress found that multiply referred bills consume four times as much hearing and meeting time and yet have less chance of being reported or passed than singly referred bills.

My proposal is similar to one put forward by the select committee in the last Congress. Joint referrals would be abolished and instead the Speaker would initially designate a committee of principal jurisdiction to consider a measure. At the same time the Speaker would be given additional discretionary authority for sequentially referring a measure, either on its introduction or after it has been reported from the principal committee. And, as I already mentioned, the current practice of split referral of the same bill would be retained. I think this is a reasonable compromise that recognizes legitimate jurisdictional concerns while avoiding many of the problems which currently result from the joint referral procedure.

With the reduction of subcommittees and assignments and the elimination of joint referrals, I think we can abolish the phantom legislative devices of one-third quorums and proxy voting. Section 5 of my resolution would abolish all proxy voting—something which the House voted to do back in 1974 but which was reversed at the beginning of the next Congress in the House Rules resolution reported from the Democratic Caucus. Section 6 of my bill would restore the majority quorum requirement for the transaction of any business, including the markup of legislation, returning us to the practice which existed prior to 1977.

I cannot stress enough the importance of insuring that our committees and subcommittees act in a more responsible, conscientious and representative manner in considering legislation which will be reported to the House. To the extent that we have permitted phantom legislating in committees and subcommittees through mini-quorums and proxy voting, we have only guaranteed that a more flawed legislative product will be reported to the House. And I think this explains in large part why we've witnessed such an explosion of amendments when these bills reach the House floor. To the extent that the committees and subcommittees have not adequately reflected House sentiment in their work, the House has had to rewrite their bills on the floor.

This same argument applies with equal force to section 3 of my resolution which would require that the party ratios on committees and subcommittees reflect the overall party ratio of the House. I do not consider this a partisan matter, as some have lightly dismissed it. The shoe may just as easily be on the other foot in the next Congress. Rather, it is a matter of fairness, equity, of minority rights, and of basic democratic theory and practice. I appreciate that there is some precedent for having greater majority representation on the Rules, Appropriations, and Ways and Means committees; but there is no justification whatsoever in our precedents for the bloated majorities which have been retained this year on the Rules and Ways and Means committees—69 and 66 percent Democrat, respectively. I strongly suspect that this blatant departure from precedent will come back to haunt the majority party when the tax bill finally reaches the floor with whatever conditions of debate may be imposed by the rule reported from this committee.

The issue of equitable party representation on committees was eloquently addressed in a chapter of the final report of the Select Committee on Committees in the last Congress, and I quote:

"Establishing committee ratios which inadequately correspond to the political cast of the full House, in effect, disparages the basic principles of democratic representation. Party alignments in the House reflect the conscious choices made by the American electorate every two years."

And the chapter goes on, and again I quote:

"This popularly-decided division of partisan strength, one assumes, should be mirrored in all aspects of the congressional process. Yet the systematic skewing of ratios has discounted the effective participation of the minority at the focal point of legislative determination—the committee system."

Perhaps just as important as our committees' legislative procedures is their oversight responsibility. This is particularly true in this era of budgetary constraints and spending reductions imposed by the reconciliation process of the Budget Act. Our committees must be in a better position to intelligently determine which programs and agencies are working as they should and which are not. And yet, some 75 percent of the House respondents in last year's select committee survey felt that the House was not doing an adequate job at oversight.

Section 1 of my resolution, which has been referred to the subcommittee on legislative process, is offered as an alternative to the more rigid oversight procedures which would be imposed by H.R. 2, the "Sunset Act," and H.R. 58, the "Sunset Review Act." Despite the large number of cosponsors of such measures in the House, I sense that enthusiasm for such new disciplines as would be ordained by these bills, is on the wane. One of the past strong supporters of sunset legislation in the other body, Senator Eagleton, recently expressed the view that, "Sunset Is an Idea Whose Time Has Come and Gone." Indeed, to the best of my knowledge, a Sunset bill has not even been introduced in the other body.

Nevertheless, I do not think the waning interest in sunset legislation means there is not a need or desire for some form of strengthened oversight. My section 1 offers a fexible yet meaningful alternative. Unlike H.R. 2 and H.R. 58, it does not tie oversight agendas to the authorization process directly, though obviously committees would have upcoming reauthorizations in mind in formulating their oversight plans.

Under existing House Rules, at the beginning of each Congress "appropriate representatives of the Committee on Government Operations shall meet with appropriate representatives of the other committees of the House to discuss the oversight plans of such committees." The Government Operations Committee must then publish these oversight plans within 60-days after the convening of a new Congress, and may make any

recommendations for coordination of such activities.

The problem with the present procedure is that "appropriate representatives" has been construed to permit an intra-staff operation, subject of course to supervision by committee chairmen. But, in most cases, committees are not formally involved in formulating their oversight plans for the Congress. I suspect there are many committee members who haven't even seen a copy of their oversight plan for this Congress. Part of the problem is that most committees are barely organized before these plans must be submitted. The Committee on Government Operations has repeatedly criticized this 60-day reporting requirement in the preface to its reports. In addition, in this year's preface it has indicated that it "is still not convinced that, as presently structured, this is the most effective solution to the problems of coordinating the oversight activities of the standing committees of the House."

My resolution addresses these problems of inadequate committee participation in oversight plan development, unrealistic time frames, and coordination, in the following ways: First, committees would have 60-days in which to consider and formally adopt their oversight agendas for the new Congress; secondly, the Committee on Government Operations would hold hearings on these plans at which the chairman and ranking minority member of each committee would appear and testify; third, the Committee on Government Operations would report a consolidated oversight agenda resolution not later that 90-days after Congress convenes, and the resolution may only contain such changes as may have been agreed to by the chairman and ranking minority member of the committee involved in order to insure proper coordination and avoid unnecessary duplication; and fourth, the oversight agenda resolution would only be subject to amendments offered by direction of the Government Operations Committee or the majority and minority leaders.

I might add that this is one of the options considered by the Bolling Select Committee in the 93rd Congress, and it also draws heavily on the work of the Legislative Process Subcommittee in the last Congress. It differs from the latter mainly in that it does not require action by both Houses, and it does not directly tie the oversight plans to subsequent authorization requirements. Obviously, it differs from H.R. 1 in that it contains no rigid timetables or program termination. I think Members are already straining under the requirements and timetables of the budget process and we should therefore avoid any burdensome new timetables and workloads. The important thing is that committees do pay more attention to their oversight responsibilities, and I think my proposal will accomplish that by requiring formal committee involvement in the development of oversight plans, and formal House endorsement of those plans, subject to limited changes proposed by the leadership and the Government Operations Committee.

My final proposal, contained in section 7 of the resolution, would require the House to vote on an overall committee staff ceiling at the beginning of each year. The survey of House Members conducted in the last Congress revealed that 63 percent think committee staffs are too big, 62 percent think this has contributed to the fragmentation and unmanageability of the committee system, and more than 80 percent think some kind of ceiling should be placed on committee staff overall.

I think the clash we had over committee staffs at the beginning of this year and the resultant reductions is a clear indication that this sentiment is just as strong in this Congress if not stronger. The House Administration Committee is understandably in a difficult position in attempting to arbitrate the competing demands for austerity and for more staff at the same time. I think that job would be made easier if the committee had clear direction from the House at the outset on an overall committee staff ceiling so that the committee-by-committee allocations could be made within that House-imposed framework.

I am indebted to the Schroeder-Breaux Task Force of the Select Committee on Committees in the last Congress for this proposal. To quote from their report:

"The establishment of an aggregate ceiling would force committees to justify more specifically their staffing needs in annual funding requests. Committees would know that their requests would be balanced against those from other committees, and would be forced to limit their requests only to those new positions for which a strong need existed."

Under my resolution, the House could not consider any primary expense resolution until the House had adopted an overall committee staff ceiling resolution reported from the Committee on House Administration. In allocating staff to committees in the subsequent primary expense resolutions, the House Administration Committee would take into account the past and anticipated legislative and oversight workloads of each committee. The total staff authorized in all such primary expense resolutions, taken together with the existing statutory staff, could not exceed the ceiling adopted by the House. Any subsequent supplemental expense resolutions which breached that ceiling could not be considered except by a two-thirds vote of the House.

The time has come to halt the exponential growth in staff which has occurred over the last decade. Between 1973 and 1979, committee staffs grew from 918 at a cost of $14 million, to 1,939 at a cost of over $40 million. I think we have reached a point of diminishing returns in terms of what can be accomplished with additional committee staff. We are still only 435 Members with a limited amount of time to accomplish our work. More staff only generate more work which we do not have time to do. This only means that more work and decisions are delegated to unelected staff, and this in turn poses a real danger to the representative nature of our government. Thank you.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, yesterday afternoon, July 23, 1981, while I was absent from the floor of the House in order to attend the memorial services for a dear friend, Harry Chapin, I missed a number of rollcall votes and take this opportunity to announce how I would have voted had I been present:

On rollcall No. 156, the Pritchard amendment, to delete funds for the Tennessee-Tombigbee water project, I would have voted "no." The motion failed, 198 to 208. Although there are some valid criticisms of this project, since this project has progressed quite far to date, I believe it would be wasteful to leave it incomplete at this juncture.

Rollcall No. 157 was a quorum call in the Committee of the Whole.

Rollcall No. 158 was on the Frank amendment, reducing funds for general construction by the Corps of Engineers by approximately $18 million by eliminating funds for the Stonewall Jackson Lake project, West Virginia. This amendment failed, 137 to 267. Had I been present, I would have voted "no."

Rollcall No. 159 was the Conte amendment, to reduce funding for the Garrison diversion project. The amendment failed, 188 to 206, and had I been present, I would have voted "yes."●

OFF-BUDGET SPENDING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

● Mr. COLLINS of Texas. Mr. Speaker, we must review off-budget spending by Congress. In 1974 this totaled $1.4 billion and off-budget has zoomed up to $23.2 billion in 1981. Congress issues press statements on the size of the Nation's deficit, but the true mark is the rise in the national debt. In the past 12 months the national debt has increased $91 billion.

The folks at home are entitled to know about off-budget financing and its impact on our inflation.

Recent rapid growth of off-budget loan activity has had serious effects on the Nation's economy and has prevented a comprehensive analysis of the unified budget. Outlays of off-budget agencies are not subject to review through the regular appropriations process. Since 1976, off-budget outlays have grown faster than any other Federal program (table 1). Budget projections show that in 1981 off-budget direct loans will increase by a towering $23.2 billion, while on-budget loans will only increase by $3.9 billion.

By far the most active off-budget agency is the Federal Financing Bank (FFB), which accounts for almost all off-budget net outlays. The FFB is authorized to purchase: First, agency debt; second, agency-guaranteed loans; and third, agency loan assets. The FFB is financed by borrowing exclusively from the Treasury, from which it has unlimited borrowing authority. Since its 1974 total of $0.1 billion in off-budget outlays, the FFB has increased its obligations to an estimated $23.1 billion in 1981.

PURCHASING AGENCY LOANS

When an agency sells a loan to a private entity, the loan is considered repaid for budgetary purposes. An agency's on-budget loan can become an off-budget loan by selling it to the FFB. In 1981, about seventh-eighths of all Federal agency loans and loan asset sales will be to the FFB, resulting in off-budget financing.

PURCHASING GUARANTEED LOANS

A guaranteed loan occurs when a Federal agency guarantees a loan to a private lender against any loss as a result of default by the borrower. When the FFB purchases the loan guarantee, it is recorded as a direct loan from the Government and is not included in the budget. In 1979, the FFB purchased more than $5 billion in guaranteed loans, which resulted in a net outlay of over $3.9 billion; thus the unified budget is understated by $3.9 billion from this source alone.

Since the FFB is off-budget, its outlays are not subject to the regular congressional review which the budget process requires. This makes its role of purchasing loan assets and loan guarantees attractive to an on-budget agency, which can reduce its outlays by selling to the FFB—while at the same time becoming off-budget. Selling agencies such as the Farmers Home Administration (FHA) and the Rural Electrification Administration (REA) record the proceeds of such sales as repayments, thereby rolling over their loanable funds and reducing agency outlays by the amount of the sale. Loan guarantees have also been made to experimental or troubled industries, such as Amtrak, Conrail, TVA—which has $11 billion in outstanding loans, and New York City. Much activity has been directed at the energy industry to finance the research and development of solar and geothermal energy, electric vehicles, and underground coal mines.

Off-budget guarantees have become the vehicle for Government intervention or subsidization without any budgetary review.

Brief summaries follow for several off-budget FFB programs and the proposed changes recommended by the Reagan administration's budget revisions for 1982:

REA

The Rural Electrification Administration (REA) of the USDA makes direct and guaranteed loans for construction and operation of electric and telephone utilities in rural areas. The REA relies almost entirely upon the FFB as the originator of these off-budget guaranteed loans, and receives almost $5 billion annually in loan guarantees from purchases of the FFB.

The rationale for this proposed change in REA is that availability of subsidies reduces the incentive for utilities to improve their financial condition. Recent data shows less than 1 percent of U.S. farms are currently without electricity as compared to 89 percent without electricity when the program began in 1935.

EDA

The purpose of the Department of Commerce's Economic Development Administration (EDA) is to provide grants, loans, and loan guarantees to assist economically distressed areas, and to deal with problems of economic adjustment. However, the effectiveness of EDA is questionable, because its programs are not targeted to those most in need; in fact, over 80 percent of the country is eligible for EDA assistance, and those areas no longer in distress remain eligible for assistance. This unregulated loan policy is expected to total over $500 million in EDA off-budget loan guarantees for fiscal year 1981. By contrast, a more controlled EDA totaled only $18.5 million as recently as fiscal year 1977.

HUD

The New Community Development Corporation (NCDC), an agency within HUD, provided $10 million in off-budget loan guarantees for a new development in North Carolina called Soul City. Individual grants totaling approximately $26 million were used in Soul City to construct pathways, build toilets, install water, and sewer lines, and erect street lights. However, despite these HUD-sponsored loans, the Soul City project failed, becoming the eighth Government-sponsored community to fail since the NCDC program began in the early 1970's. Ventures such as these exemplify the recurring problem of off-budget loans which are made without adequate evaluation.

The existence of off-budget entities result in the budget and the deficit being understated by billions of dollars each year. A major step in bringing about a more realistic and comprehensive budget would be to move the off-budget agencies into the on-budget category, thereby properly attributing to agencies their respective subfunctions. Because off-budget programs receive less scrutiny than on-budget programs, much of their activity goes without congressional scrutiny. To put them under better control, some programs such as the Export-Import Bank, the housing for the elderly or handicapped fund, and the Pension Benefit Guaranty Corporation, have been returned to an on-budget status, with little or no effect on their operational process. Therefore, all off-budget activities, should be returned to the unified budget. (Including the FFB.) If all loan activity were included in the unified budget, it would eliminate much wasteful spending of taxpayer dollars.

TABLE 1.—OFF-BUDGET OUTLAYS BY AGENCY

[In billions of dollars]

	1974	1980	1981
Federal Financing Bank	0.1	14.5	23.1
Rural Electrification and Telephone Revolving Fund[1]	.5	([2])	([2])
Rural Telephone Bank	([2])	.2	.2
U.S. Postal Service Fund	.8	—.4	—.2
U.S. Railway Association	([2])	([2])	.3
Total off-budget outlays	1.4	14.3	23.2

[1] No net outlays are authorized after fiscal 1980.
[2] Less than $50 million.

ISRAELI BOMBING OF BEIRUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 5 minutes.

● Mr. CROCKETT. Mr. Speaker, I wish to state for the record my strong disapproval of Israel's bombing of a suburb of Beirut, Lebanon, last Friday. This so-called defensive preemptive act of Israel, which resulted in more than 300 civilian deaths and 800 injuries, is unjustifiable and deplorable.

The bombing was totally devoid of strategic or military merit. The Israeli Government has gained nothing except worldwide condemnation and eroding American support for Prime Minister Begin's aggressive policies.

The overriding concern of the United States—aside from the fact that human lives have been expended—should be that the planes that bombed Beirut were U.S. made and supplied by the United States in accordance with the Military Sales Act, which states that "defense articles and defense services shall be sold by the United States * * * to friendly countries" for internal security and for legitimate self-defense. The massive destruction of a civilian area and the killing and maiming of hundreds of

Lebanese citizens, who have no quarrel with Israel, hardly falls under the rubric of "legitimate self-defense."

As William Raspberry pointed out in Wednesday's Washington Post:

> Already, the Palestinians—and not just the PLO—are making the case that the failure of the United States to take strong action against Israel for violating the terms of the arms agreements amounts to a tacit complicity of the United States in Begin's madness.

It is clear to me that the United States should unequivocally disassociate itself with the bombing and moreover should formally reprove Israel for carrying out this action.

This latest action by the Israeli military establishment makes clear their intention to heighten tensions in the Middle East even further, and to flaunt the use of American-made military equipment to do so. Although I was willing to join some of my colleagues on the Foreign Affairs Committee in urging the President to send Israel the previously promised four F-16 fighter planes, I now see that the Begin government has no intention of adhering to the terms of sale in the Military Sales Act.

I suggest, Mr. Speaker, that the administration should, at the very least, clarify to the Israeli Government what constitutes "legitimate self-defense" and, pending that clarification, we should suspend all military deliveries to Israel. I suggest further, Mr. Speaker, that it should be the concern of this Congress to consider seriously if the recommended fiscal year 1982 U.S. military assistance of $1.4 billion to Israel and $1.1 billion to Egypt, the Sudan, and other friendly Arab nations, is not an exacerbation of an already highly explosive and dangerous Middle East situation.●

CONFEREES REACH AGREEMENT ON VETERANS BENEFITS AND SERVICES RECONCILIATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, I am pleased to announce that the conferees of the House and Senate Veterans' Affairs Committees have reached agreement on that part of the reconciliation bill related to veterans' benefits and services.

I can report to the Members of the House that we have reached the total reduction in spending levels we were instructed to bring about—$110 million in budget authority and outlays in 1982, $108 million in 1983, and $106 million in 1984.

I want to express my sincere appreciation to the chairman of the Senate Veterans' Affairs Committee, ALAN SIMPSON, for his cooperation and leadership in bringing about a most reasonable compromise of the differences between the bills passed by the House and Senate. The compromise will be fully explained in the statement of the managers soon to be filed by the Budget Committee. I am most grateful to Senator ALAN CRANSTON, the ranking minority member of the Senate Veterans' Affairs Committee, who is always most willing to work with us in resolving issues in disagreement. I also want to express my appreciation to Senators BOB KASTEN, FRANK MURKOWSKI, and JENNINGS RANDOLPH, who worked with us to reach agreement.

Finally, Mr. Speaker, I want to thank the very distinguished ranking minority member of the committee, the gentleman from Arkansas, JOHN PAUL HAMMERSCHMIDT, and our other conferees, DON EDWARDS, BOB EDGAR, SAM HALL, MARVIN LEATH, MARGARET HECKLER, CHALMERS WYLIE, and HAL SAWYER, for the splendid cooperation I received from each of them in working out the agreement with the other body. Resolving differences between us, where we are faced with terminations of certain programs or limiting the level of benefits paid to individuals, is a most difficult task, and I am most grateful for the willingness of our Members to work together in resolving our differences with the other body.●

THE 41ST ANNIVERSARY OF THE SOVIET ANNEXATION OF LITHUANIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 5 minutes.

● Mr. STRATTON. Mr. Speaker, June 15 marked the 41st anniversary of the military occupation and forcible annexation of Lithuania by the Soviet Union. I am glad to take this opportunity to join once again with my colleagues in Congress and with Lithuanians throughout the world in commemorating this important anniversary, and in reaffirming my commitment to work for the right of the Lithuanian people to self-determination.

During two horrible nights in June 1940 the Soviets rounded up 35,000 people in Lithuania and shipped them by train to Siberia—a journey from which most of them would never return. Since that date Lithuanians have lived under Soviet rule, victims of repeated terrorism—one more captive nation. Many have managed to escape from their troubled country and have continued in other lands to keep Lithuanian pride and culture alive, and to fight for their country's freedom. The vital Lithuanian-American community is a leader in that effort.

Recently I returned from a trip behind the Iron Curtain, to Romania and Hungary. One could sense the feeling that foreign military dominance brings to a country. But one was also heartened by the spirit and courage of the people in these countries who do somehow continue to strive for a decent way of life under Communist rule.

The Soviet invasion of Lithuania occurred four decades ago, but the march of conquest has not stopped as seen by the recent, swift occupation of Afghanistan. And the struggle against the Soviets is perhaps today most dramatically seen in Poland, as those brave people have indeed transformed the shape of political rule in a Soviet satellite.

These events, plus the annual commemoration of the anniversary of Lithuanian occupation help to focus international attention on the plight of all captive nations, as well as our efforts to secure self-government for all of them. To that same end, earlier this year I introduced a resolution, House Concurrent Resolution 36, to express the sense of Congress that the right of self-determination should be returned to the people of the Baltic States, and that it should be made a prime political objective of the United Nations.

Under leave to extend my remarks, I include a statement entitled the "1979 Balkan Memorandum" issued by the Lithuanian-American Community of the U.S.A., Inc.

1979 BALTIC MEMORANDUM

DISSIDENTS IN SOVIET UNION URGE FREEING OF THREE BALTIC REPUBLICS

To: Government of the USSR; Government of the Federal Republic of Germany; Government of the German Democratic Republic; Governments of all countries which have signed the Atlantic Charter; Secretary-General of the U.N., Mr. Kurt Waldheim.

Soviet juridical science interprets the term national sovereignty as a nation with all the rights, its political freedom, and a real possibility to fully and completely determine its own destiny, and, first of all, a capability for self-determination, including cessation and formation of an independent state. National sovereignty is characterized by political, territorial, cultural and linguistic independence, a state which has full sovereign rights in all indicated areas of public life, guaranteeing their fullest possible realization.

One can neither give nor abolish national sovereignty; it can only be violated or established.

In 1919 Lenin recognized the existence de facto of Estonia, Latvia and Lithuania, which had recently separated from the Russian Empire. In 1923 Soviet Russia concluded peace treaties with these countries which signified de jure recognition of the Baltic States on the part of Russia. In the name of the Soviet government Lenin gave up in perpetuity any sovereign rights to Estonia, Latvia and Lithuania. However, 19 years later Stalin and Hitler encroached on the sovereignty of these nations. August 23 of this year marks the 40th anniversary of the so-called Molotov-Ribbentrop Pact, the implementation of which meant the end of independence for Estonia, Latvia and Lithuania.

On August 23, 1939, a non-aggression treaty was concluded between the German

Reich and the Soviet Union. A secret protocol on the division of Eastern Europe into so-called spheres of influence was attached to it. The objects of the confidential negotiations between the Peoples' Commissar for Foreign Affairs of the USSR, V. M. Molotov, and the Minister of Foreign Affairs of Germany, J. Ribbentrop, were Finland, Estonia, Latvia, Lithuania, Poland, Bessarabia and Northern Bukovina. The essence of the secret protocol was that the fate of Finland, Estonia and Latvia was to be entrusted to the USSR, while that of Lithuania to the German Reich.

On September 28, 1939, the USSR and Germany concluded the treaty on friendship and borders. This treaty amended the secret protocol of August 23, 1939, in that now Lithuania as well was to go to the USSR, with the exception of the area of the left bank of the Sesupe River which in case of "special measures" was to be occupied by the German army.

From June 15–17, 1940, on the order of the Government of the USSR, the Red Army executed the "special measures" on the territory of Lithuania, Latvia and Estonia. Also annexed was that territory of Lithuania which, according to the agreement between Stalin and Hitler, the German army was to annex to Germany.

On January 10, 1941, the German ambassador in the USSR, Dr. von Schulenberg, on the one hand, and the chairman of the Council of the Peoples' Commissars of the USSR, V. M. Molotov, on the other, signed a new secret protocol in which the object of trade was the above-mentioned Lithuanian terrritory. The German government gave up to the USSR the territory to the West of the Sesupe River for a monetary compensation of 7.5 million dollars in gold or 31.5 million Reichsmarks.

The Molotov-Ribbentrop Pact became a conspiracy of two of the greatest tyrants in history—Stalin and Hitler—against the world and humanity, which began the Second World War. We consider August 23 as a day of infamy.

On August 14, 1941, the President of the USA, F.D. Roosevelt, and the Prime Minister of Great Britain, W. Churchill, signed the so-called Atlantic Charter which has six points. Point two of the Charter declared that the USA and England "do not consent to any territorial changes which are not in agreement with the freely expressed wishes of the nations involved." Point three: "They respect the right of all nations to choose for themselves that form of government under which they want to live; they strive to re-establish the sovereign rights and self-rule of those nations which were deprived of these by means of force." The USSR joined the Charter on September 24, 1941.

The declaration of the USSR said: "The Soviet Union in its foreign policy . . . will be guided by the principle of self-determination of nations. . . . The Soviet Union defends the right of every nation to claim independence and territorial integrity of its country, the right to establish such a social system and to choose such a form of government which it considers expedient and necessary in order to secure the economic and cultural prosperity of the country."

One should recall that, according to international law, the realization of the right of nations for self-determination is impossible, if occupational forces are located on the territories of these nations. This is also emphasized in Lenin's Peace Decree, which says, that if a nation "is not granted the right by means of free elections, under conditions of complete withdrawal of foreign troops or influence of a foreign power, to decide the forms of national existence, without the slightest coercion, then the joining of its territory to another country in annexation, i.e. it is a capture and a taking over by force."

The consequences of the notorious Munich agreement of September 29, 1938, were liquidated by the very fact of Germany's defeat in World War Two. The government of the F.R.G. under pressure of Czechoslovak public opinion, recognized the Munich agreement as null and void from the moment of its signing.

However, the Molotov-Ribbentrop Pact apparently still has legal force. We consider that the silence of world public opinion on this matter encourages aggressors of the past, present and future.

We appeal:

To the government of the USSR with a request that it publish the full text of the Molotov-Ribbentrop Pact and all secret protocols that go with it. We remind that the Soviet government in the Peach Decree declared that it refused to resort to secret diplomacy. At the same time, we request that the Molotov-Ribbentrop Pact be declared null and void from the moment of its signing;

To the governments of the F.R.G. and G.D.R. with a request to publicly declare the Molotov-Ribbentrop Pact as null and void from the moment of its signing, and to assist the government of the USSR to liquidate the consequences of the above-mentioned Pact—by withdrawing foreign troops from the Baltic territories. In order to accomplish this, a commission for the liquidation of the consequences of the Molotov-Ribbentrop Pact should be created, made up or representatives of the USSR, F.R.G. and G.D.R.;

To the governments of the signatory countries to the Atlantic Charter with a request that they, from a position of moral responsibility, express their decisive condemnation of the Molotov-Ribbentrop Pact and its consequences. We remind that, according to international law, such actions are not considered internal affairs if, because of their essence and purpose, they present a threat to peace and security and do grave injustice to generally recognized international norms. The principle of self-determination of nations and peoples presupposes the legality of any forms and methods in the struggle against colonialism, an international crime. To this is bound the legality of international support for the struggle for liberation. Furthermore, according to the Declaration of the Principles of International Law, every state, by means of combined and independent actions, must promote the realization of the principle of equality and self-determination of peoples;

To the Secretary-General of the U.N. with a reminder that this international organization is the legal successor to the League of Nations, of which Estonia, Latvia and Lithuania were also members before the "special measures" were taken. Therefore, the legal responsibility for the fate of these countries rests with you.

We request that the question of liquidating the consequences of the Molotov-Ribbentrop Pact be raised at the next session of the General Assembly of the U.N.

We remind that the principle of self-determination of nations was fixed in contemporary international law. This took place as a result of affirmation of the principle of self-determination of nations in such important international documents as the U.N. Charter (Art. 1, 13, 55, 76); the Declaration on Granting Independence to Colonial Countries and Peoples, adopted by the 25th General Assembly session on December 14, 1960; the Resolution of the General Assembly of December 20, 1965 which recognized the legality of the struggle of the colonial peoples; the International Convention on the Liquidation of all forms of racial discrimination, adopted at the 20th General Assembly session on December 21, 1965; the International Pacts on Rights of Man, adopted by the 21st General Assembly session on December 16, 1966; the Declaration on the Principles of International Law, adopted by the 25th jubilee General Assembly session on October 24, 1970. In these and other international legal acts of the U.N. the contemporary content of the principle of equality and self-determination of peoples reveals itself: It signifies:

The right of all peoples to manage their fate freely, i.e. under conditions of complete freedom to determine their domestic and foreign policy status without foreign interference and to realize according to their wishes their political, economic, social and cultural development;

The right of nations to dispose freely of their natural wealth and resources;

An obligation of all states to promote through combined and independent actions the implementation of the principle of equality and self-determination of peoples in accordance with the provisions of the U.N. Charter.

Equality and the right to manage one's fate are declared as a most important principle of international law in the Final Act of the all European Conference on Security and Cooperation in Europe.

And you, Mr. Secretary-General, are aware that the above-mentioned international documents, which are binding, are violated by certain countries which are members of the U.N. We request that at the next Assembly session of the U.N., the question of the situation of Latvia, Estonia and Lithuania be discussed, inasmuch as the peoples of these countries are deprived of the right and opportunity to manage their fates.

Dated August 23, 1979.

Romas Andrijauskas, Stase Andrijauskiene, Alfonsas Andriukaitis, Edmundas Bartuska, Vytautas Bogusis, Priest Vladas Bobinas, Romas Vitkiavicius, Jonas Volungevicius, Jonas Dambrauskas, Jonas Eisvidas, Angele Pauskuskiene, Kestutis Povilaitis, Vytautas Bastys, Liutauras Kazakevicius, Rimas Zukauskas, Ivars Zukovskis, Alfredas Zaideks, Juris Ziemelis, Leonas Laurinskas, Rimas Mazukna, Priest Mocius, Mart Niklus, Priest Napoleonas Narkunas, Sigitas Paulavicius, Kestutis Subacius, Enn Tarto, Antanas Terleckas, Jonas Petkevicius, Ints Calitis, Jadvya Petkeviciene, Jonas Protusevicius, Sigitas Randis, Endel Ratas, Henrikas Sambore, Julius Sasnauskas, Leonora Sasnauskaite, Algis Statkevicius, Erik Udam, Petras Sidzikas, Arvidas Cedanavicius, Vladas Sakalys, Jonas Serksnas, Zigmas Sirvinskas, Mecislovas Juravicius, Priest Virgilijus Jaugelis.

The Baltic Republics—Lithuania, Estonia, Latvia—have been included in the composition of the USSR independent of the will of the peoples of these countries—in essence as a result of occupation by troops of the USSR.

Dedicated to the principle of equality and self-determination of nations, respecting the right of every nation to manage its fate independently, we consider that in the given historical situation, the question of the self-determination of Lithuania, Latia and Estonia must be decided by means of a referedum, conducted in each one of these countries under conditions which provide for a free expression of the people.

We support the appeal of the respresentatives of Lithuania, Estonia and Latvia to examine the violation of the right of the peoples of these countries to self-determination and their rights to freely determine their own destiny.

1981 STATUS REPORT OF THE SIGNERS OF THE 1979 BALTIC MEMORANDUM

Arrested: Liutauras Kazakevicius, Julius Sasnauskas, Antanas Terleckas, Mart Niklus, Algis Statkevicius, Mecislovas Jurevicius.

Psychiatric institutions: Petras Sidzikas, Arvidas Cekanavicius.

Deceased: Zigmas Sirvinskas, Priest Virgilijus Jaugelis.

Compulsory resettlement: Alfonsas Andriukaitis.

Escaped to West: Vladas Sakalys.●

DID REAGAN REPLACE THE FORMAL GRAIN EMBARGO WITH A DE FACTO EMBARGO?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 15 minutes.

● Mr. ALEXANDER. Mr. Speaker, President Reagan, during the 1980 campaign, made much ado about the grain embargo on the Soviet Union which was disadvantaging the American farmer.

After taking office, Secretary of State Alexander Haig and Agriculture Secretary John Block got into an unseemly dispute over whether the embargo ought to be lifted. Secretary Block called for the lifting of the embargo and the resumption of grain sales to the Soviet Union. Secretary Haig, on the other hand, sought to continue the embargo to demonstrate to the Soviets the new administration's policy of "linkage."

While the debate lingered on in the Cabinet, farm prices drifted lower as the prospect of regaining the Soviet market dimmed.

Finally, after a good deal of public agonizing, the President lifted the embargo and the American farmer heaved a sigh of relief, assuming that negotiations for the sale of U.S. grain would be quickly renewed with Soviet trade officials.

Unfortunately, Secretary Haig continued his opposition to grain sales to the Soviet Union and the bureaucratic infighting continued as before. The result: commodity prices have slipped to dangerous lows and the promise of expanded exports has diminished.

The Washington Post reported Monday, July 20, that the White House had moved to end the bureaucratic infighting by placing it under the leadership of Ambassador Bill Brock at the office of the Special Trade Representative.

Many of my colleagues may not know that the 5-year grain agreement between the United States and the U.S.S.R. expires in September. The issue of renegotiating that agreement has been confused by the absence of policy consensus since the decision by President Carter to suspend grain sales in January 1980 and the decision by President Reagan to end the suspension earlier this year.

The central policy question is: Under what conditions will the Soviets be allowed to purchase U.S. grain and in what amounts? The 1975 U.S.-U.S.S.R. agreement provided assurances that the Soviets would buy at least 6 million tons of grain and could buy up to 8 million tons each year. In addition, after consultations with the United States, they were authorized to buy more for each of the last 3 years. When President Carter suspended exports in 1980, the Soviets had contracted for 25 million tons of grain. They ultimately received only the 8 million tons provided for in the 1975 agreement.

The central political question is: Can the President satisfy his instincts to curb trade with the Soviet Union to maintain his tough foreign policy stance while retaining his support among farmers who voted for him because he offered to lift the embargo? There is a suspicion that the President would like to have it both ways. He has formally lifted the embargo but has done virtually nothing to restore the trade agreement with the Soviet Union.

It makes no sense to replace a formal trade embargo with a de facto embargo enforced by indecision and delay. I hope that the President has not adopted such a cynical policy.

As for the Soviets, they have been moving with dispatch to line up grain supplies from Argentina, Brazil, Canada, and other countries. Still, they will need to purchase a portion of their requirements from the United States. I am informed that over a month ago in London, Soviet officials indicated their willingness to initiate additional purchases and renew the purchase agreements at the earliest possible date.

It is time to stop the bureaucratic squabbling and reach a policy consensus. If it is truly the policy of the administration to help farmers by negotiating a new grain sales agreement with the Soviet Union, then Messrs. Haig, Block, and Brock should get on with the task while there is still time to salvage something from this year's crop.

If it is the policy of the administration to maintain a de facto embargo, permitting—even encouraging—the policy differences between the State and Agriculture Secretaries, it will not take the American farmer long to figure out what is going on.

Mr. Speaker, when a farmer plants his crop, he does not have the luxury of delaying until a time which would insure that his harvest would come when prices are highest. I suggest the administration does not have the luxury of delaying until the political costs are lowest to move ahead with renegotiating the grain deal with the Soviets.●

THE TAX CUT—A SUBJECT TO PURSUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 30 minutes.

Mr. FRANK. Mr. Speaker, we have just heard some disquisition on the tax bill and it seems to me that that is a subject we ought to be pursuing. As a member of the Banking Committee, I heard this week extensively from Paul Volcker, the Chairman of the Federal Reserve Board. He made it very clear, although tact and his interest in good relationships with the administration kept him from being quite explicit himself, one of the most serious consequences that will eventuate if we were to adopt a tax bill which committed us now irrevocably to three rounds of tax cuts—and I should just like to say, Mr. Speaker, that it seems to me unfortunate semantically that we have fallen into a pattern of talking about 1-year tax cuts, 2-year tax cuts, or 3-year tax cuts. These are forever tax cuts. None of these tax cuts are triggered to destruct at the end of 1, 2, or 3 years. We are not talking about a 1-, 2-, or 3-year cut. We are talking about cutting once forever, or two times or three times, or until a later Congress undoes a tax cut.

To those of us in elected office today, the notion that there will someday be a body of elected officials prepared to raise taxes seems indeed a very wonderous and fantastic one. We are assuming these tax cuts are here for a long time.

What we have is a situation, then, economically where we are being asked to lock ourselves in today to 3 years of fairly substantial tax reductions. I believe substantial tax reductions are desirable. I believe that proper stimuli to investment, to capital formation, are desirable. I believe that dealing with the problem of inflation as it has hit tax brackets is essential. It costs a lot more money to be rich than it used to cost, Mr. Speaker,

and our tax code does not reflect that. We have to adjust it for that purpose.

The question is not whether we should cut taxes and not by and large the amount we should cut them in the near term. The question is, given a time of raging inflation—and economists can sense this, which may in fact augur poorly for the accuracy of the fact—but there is at least an economist consensus that the underlying rate of inflation, the basic inflation rate in the economy, remains higher than the recent drops in the Consumer Price Index would indicate. The recent drops in the Consumer Price Index have been welcome, but they have been tied in substantial part to a leveling off of oil prices as conservation and previous higher prices have taken their toll on usage and they reflect, as well, some very special circumstances in the agricultural area.

We cannot count on those drops in the CPI to continue. We cannot either claim that they are a result of national economic fiscal and monetary policy. There remains a serious problem with a rate of inflation, and particularly a rate of interest rates, that is, to many segments of the economy, intolerable.

Interest rates have remained for a long time at rates that most of us had come to associate with illegal activity. The prime rate today is at a level which, when I was growing up in Jersey City, other people used to get when they loaned you money, not banks; people who had more efficient and rugged collection methods.

The question is: Are we at all concerned about high interest rates? That is where Mr. Volcker comes in. Mr. Volcker made it very clear in his 4 hours of testimony, which he graciously spent before the Banking Committee, that he intends to keep money very tight and, consequently, interest rates very high. He is not seeking higher interest rates as an end in itself, but higher interest rates are the inevitable and accepted consequences of his tight money policy. He intends to keep the money policy as tight as it can be as long as we have inflation, and particularly, he says, as long as we are faced with Federal deficits.

The problem we face is that the financial community in particular has been always skeptical of the Congress and the President's ability to bring inflation under control, particularly to reduce Federal deficits.

We have had what some say is an anomaly, but it is a costly one and one that the economy is having trouble bearing up under, of the inflation premium on interest rates being far higher than it usually is, of the interest rates on long-term bonds in particular—so essential for capital work, so essential for our municipalities and State governments, as well as to the private sector in doing capital construction and investment—the rate on long-term bonds has been staggeringly high.

The clear message of Mr. Volcker's testimony is that for the Congress this week to lock itself into three rounds of tax cuts which will, on paper, produce staggering deficits in years 1983 and 1984 would, in fact, have a very negative impact on our interest rate situation.

The Chairman of the Federal Reserve Board has made it very clear that he and his conferees on the Board intend to keep money tight and to keep interest rates high as long as the deficits persist.

Nothing we could do in this Congress would send more of a negative message about inflation and deficits than adopting the third year of tax cuts, the third round of tax cuts. We cannot constitutionally lock ourselves into spending cuts. There is no way that Congress can this year vote in a binding fashion spending reductions for fiscal year 1983 or fiscal year 1984. Certainly not in any way remotely approaching the degree of tax reduction we are voting.

What that means is that the financial markets, the Federal Reserve Board, and others whose expectations and views will have an enormous impact on interest rates will, in fact, respond in a way that says inflation is going to continue and interest rates will continue. The effect of higher interest rates we found even in Washington, D.C.—now it is often speculated on as to whether or not reality can ever pierce the confines of the Capital, and it has a very difficult time. Washington's bulwarks against crude reality are perhaps as well developed as any fortification since the Great Wall of China.

But high interest rates and the consequent problems in the real estate market have breached our fortress. People in Washington who have been participants in the great game of musical chairs, of buying real estate and selling it at inflated prices, are stuck. For the first time we have people here in Washington, D.C., with property they cannot sell. The housing market, whether it is a question of selling homes or constructing homes, is in the worst doldrums it has been in in the memory of most of us.

This has an enormously depressing economic effect and it has an enormously depressing social effect. For the first time, perhaps, since the depression, a generation of young Americans in their twenties, young people who are married, who earn incomes it seems to them by historical standards adequate for a decent lifestyle, who are about to enter the phase of family formation, are finding that they simply cannot afford a home.

The average price for a new home, shown by FHA figures, in the Northeast for the last quarter, was $94,000. The average interest rate was 16.75 percent. If one can save up $20,000, a pretty good feat for some young people, and put that down as a down payment, they have to finance $70,000 in loans at 16.75 percent. They are paying double numbers in the thousands without, in the first year, without having done a thing to reduce the principal.

□ 1540

These are the consequences of interest rates remaining at such intolerably high figures. We have, I believe, a responsibility as Members of this Congress to deal with this problem of high interest rates.

We, I thing, do exactly the wrong thing in that regard by passing a third round of tax cuts without regard to what the inflation situation or the interest rate situation or the deficit situation will be at that time.

So the question is not whether we are talking about cutting taxes for only this year and next year. Of course, those tax cuts would remain in effect. The question is not whether a tax cut in fiscal year 1984 is a good idea. The question is: Is it sensible now, in the face of this inflation and the face of interest rates persisting far beyond the administration's expectations? According to their projections, particularly after they succeeded to the extent they succeeded in changing the spending patterns of the Federal Government, interest rates should have been lower by now.

We have the spectacle of the President telling us, "Don't believe Wall Street." This particular President tells us not to believe Wall Street because the financial community simply will not behave the way his scenario wants them to behave. That is the problem.

The question is, Do we make it conclusive? The question is not whether a third round of tax cuts is or is not a good idea. The question is whether a third round is something to which we should commit ourselves now irrevocably. No one thinks that a tax cut voted now would be altered or diminished or watered down 2 or 3 years from now, certainly not in a year when we are facing a Presidential election. Congress or the President facing a 1984 election would not in fact raise taxes.

So we face the prospect of voting now for tax cuts, along with massive spending increases on the defense side, with the overruns coming and the definite increases in defense that we voted this year, some of which are quite necessary and some of which are excessive.

I still do not understand what the supposed mission is of a World War II battleship. I mean to adhere to a principle I personally developed to vote for no weapon older than myself, because

I do not believe anyone or anything substantially older than I is going to be much good any more in a fight.

But with these increases in defense spending added to these decreases in revenue, much of which is a good idea, we build in a deficit on paper for fiscal year 1984 which is staggering, and the day we do that in a binding fashion is the day we will have a terribly negative effect on interest rates which affects the small business community, the construction market, the people who need homes, and a whole range of others in an absolutely devastating fashion.

Of course, there is an alternative. We could commit ourselves to the third year of tax cuts, to a third round—I keep forgetting my own semantic warning—and we could then commit ourselves to making spending reductions in equivalent amounts. The administration itself is already having difficulty providing for that new round of spending reductions. The fact is that the administration, if this tax bill goes through and if it gets its third round, will by its own terms have to make allowance for tens of billions of dollars in additional spending reductions.

If we look at Federal Government spending and set aside defense, where in fact they want to increase it, if we set aside the safety net, which is at varying dimensions and has a very tensile strength but which certainly takes up a certain percentage of the budget, we find that what is left is not a substantial part of the Federal budget, and its ability to sustain further cuts is not very great.

That is why the administration has had the extraordinary dilemma of trying to cope with the problem of social security. While the President campaigned quite sincerely on a promise never to cut social security benefits, he now finds he has to cut social security benefits.

I know we were told that the proposal the President made was not a cut in existing benefits in respect to the people getting a cost-of-living increase. We were told that we were not cutting the benefits; we were going to postpone them. But the increases due now are the increases coming July 1, and the President's proposal was that they would not come until October 1. There was, however, under the President's proposal the proposal that there would be no retroactivity. There was to be on October 1 no backpayment to June, July, August, and September.

Mr. Speaker, I rent an apartment down here, and I guess I have a lease that expires sometime. If that lease expires on July 1, I would like to go to my landlord and tell him, "I am not going to pay for June, July, August, or September. I am going to reduce them. I am just not going to pay you for July, August, or September. I will pay you October 1."

I do not think even congressional immunity would keep me housed; I think I would be evicted under those circumstances.

I think the older people who are receiving social security have every right to consider the cancellation of increases for July, August, and September as a flat reduction. I do not think the President wanted to do that. I do not think he is unmindful of the needs of the elderly. It is true, simply with the minimum benefit, that for many people the minimum benefit of $122 is not very much, but for many, many others it is the difference between absolute degrading, grinding poverty and a little chance for dignity in their lives. People will not starve in the absence of the minimum benefit, but there are older Americans who have worked very hard and have built their lives, up to the ages of 70 and 80, on the expectation of including that minimum benefit, and that minimum benefit for many of them is, 20, 30, or 40 percent of their income.

Take away 30 or 40 percent of their meager income and see what it does to their lifestyles. The disruption of the lifestyles of these innocent elderly people is not something that the President easily decided to do. He is forced to do that—forced, I believe, in a self-imposed way, but nonetheless forced.

If we enact a third round of tax reductions without a trigger, if we commit ourselves irrevocably to that third round of tax cuts, we put no money in anybody's pocket for 2 years. When we talk about a fiscal year 1984 tax reduction, to that effect we are not talking about anybody being worse off in the intervening period. We are arguing now that it would be prudent to wait, that we hope the economy would be in a situation where further tax reductions would be possible, but that inflation could be a problem.

The alternative, as I say, is to give the wrong signals about inflation and to confront ourselves with a dilemma about spending cuts. I think the members of the administration understand that. I think that is why there has been a campaign.

The Senator from New York, Senator MOYNIHAN, aptly characterized this as terrorism, as "political terrorism." It is a conscious effort to persuade older people to accept a reduction of their benefits. It is a conscious effort to say to older people that their benefit level simply cannot be sustained.

I do not think that that is morally acceptable, and I do not think it is economically necessary. I think we can find the resources to meet our various needs without substantially disrupting or diminishing what they get.

But if we now do the third round of tax cuts, the inflationary impact and the high interest rate impact of that commitment would be very great. We should be very clear about this. If we adopt now a third round of tax cuts and we project the spending that is likely to take place, we will be voting for the largest deficits in the history of the U.S. Government. We will be voting for deficits that are close to $100 billion a year.

If we do that, it will in itself, I think, be a serious economic mistake, and it will also generate pressures on us in return to make some reductions in spending that some people may not find acceptable. That does not mean that we should not make reductions in spending.

I voted, Mr. Speaker, today against today's appropriation. I voted against the Clinch River breeder reactor and the Tennessee-Tombigbee waterway and a few others that seemed to me to be excessive spending proposals.

It seems that sometimes we operate in a kind of time machine. According to the administration, on programs like social security or housing for the elderly or other necessary programs, we are told that this is 1981, not 1965, and we have to be careful how we spend; we have to economize, we have to cut back. But then, on the other hand, we take up these waterway projects and take up some of the other projects which may indeed be attractive but which I do not think we can afford, and then, boom, it is 1965 again. We manage to get ourselves transported back in time.

So I think we greatly exacerbate our dilemma if we vote to commit ourselves now to a third round of tax reductions. That, as I say, is the issue. It is the issue we ought clearly to be addressing. There are other issues, however, with regard to tax reductions that I think have to be addressed. The gravest one, I think, is the new option that is taking place, and that is to reduce the taxes on the oil industry.

□ 1550

Of all the beleaguered and inflation ridden and negatively affected groups that exist in our society and who are in need of relief at this time, I would guess that a poll of the public or of economists or of any sector would put the oil industry rather low on that particular totem pole. We are told by some that the windfall profit tax was a terrible blow, but it does not seem, for instance, to have diminished the effectiveness of Conoco to a host of suitors. There is massive bidding war going on now for Conoco without any further tax breaks to the oil industry.

Despite that, we have the unseemly spectacle of both parties, I am unhappy to have to say, engaging in an auction for the fortunes of the oil industry.

We are told that we are going to take care in the Democratic tax bill of the independents, the little guys, we are told. We are supposed to conjure up, I suppose, some rugged figure striding alone on his 2 or 3 acres.

In fact, as I understand our bill, the definition of independents is people who have up to 500 barrels a day. At $32 a barrel, that is $16,000 a day gross income.

Mr. Speaker, I understand why they call them independents. I could be pretty independent with that kind of activity. That would guarantee my independence.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Speaker, I want to thank the gentleman for yielding and commend him for beginning this colloquy in preparation for our last week in connection with the debate that will flow around the tax bill.

I would like to remind the gentleman that a number of Members in the Congress joined with the Congressional Black Caucus with a tax alternative that was included within the alternative budget that the Congressional Black Caucus presented on May 6 in this body. I cannot recall whether my colleague in the well had joined with us in that.

Mr. FRANK. Mr. Speaker, if the gentleman will yield back to me briefly, yes, I was proud to vote for what I thought was a very excellent budget that the caucus put forward.

Mr. CONYERS. I thank the gentleman for refreshing my memory.

I would like to just review, if I can for a few moments, some of the considerations that were raised in that regard. It seems to me that the tax bill has raised a number of questions. I am very pleased that the Democratic Study Group quoted the Congressional Black Caucus alternative as providing—and this is a direct quote:

> The largest and fairest tax cut of any of the proposals before the House.

And to further quote them:

> As taking the boldest step of any proposal being offered to the House to deal with the Federal deficit.

Now, it follows from that that the House Budget Committee in fiscal year 1982 has found that the tax expenditure will amount to $266 billion; namely, more than one-third of the total directed outlays for fiscal year 1982. This raises some rather enormous questions.

I would like to ask my colleague in the well whether he has information about whether or not there will be an opportunity to discuss this proposal that was introduced relative to the tax question in May or whether he has some other alternative.

Mr. FRANK. I did not quite get all of that. Could the gentleman refresh me? Is that the tax proposal of the President that was introduced, or does the gentleman mean the one in the Black Caucus budget?

Mr. CONYERS. Yes; in our budget there was a tax proposition that was raised, but not disposed of because it was inappropriate.

Mr. FRANK. I appreciate the gentleman's question. I think we ought to point out, as I remember, that was the most fiscally responsible budget of the four on which we voted. It had the smallest deficit. It provided a tax reduction of an important sort, while also providing some tax equity by closing down some unproductive loopholes.

Unfortunately, to date the rules under which we have debated some very important questions on tax and on budget matters have not allowed for adequate discussion. Indeed, as the gentleman from Michigan knows, one of the problems we face is that it is rumored that we would be dealing with tax legislation next week of the most far-reaching sort, again without what many of us would consider an adequate opportunity to discuss it.

So I would hope that we could prevail, those of us who would be in a majority, on the question of structuring the rules so that there could be a debate and a discussion that would allow for full hearing of the very many genuine merits of that tax package.

Mr. CONYERS. Well, will the gentleman yield further?

Mr. FRANK. I would be glad to yield?

Mr. CONYERS. Does the gentleman contemplate a proposal that might be adequately taken up under the rule and under that subject matter for next week?

Mr. FRANK. I have not yet seen the tax bill, and being in an out-party and not the other, that means I am not yet ready to vote for it. If I were in the other party I would not have to. Seeing is no prerequisite to believing, certainly to acting on it; but I have seen the outlines of a proposal proposed by our colleague, the gentleman from Wisconsin (Mr. OBEY) and the gentleman from Arizona (Mr. UDALL), modified some at the suggestion of the gentlewoman from Maryland (Ms. MIKULSKI). It is a proposal which resembles the proposal that the Black Caucus put forward in several respects. It does not conform as much as I think I or the gentleman or the authors of the amendment might like because of the time constraints; but it does come closer, I think, in its general outlines than any other proposal.

Mr. CONYERS. Will the gentleman yield further?

Mr. FRANK. Yes; I yield.

Mr. CONYERS. This then follows in a way the same scenario that occurred on the debate of the budget itself. If my memory serves me correctly, the gentleman from Wisconsin (Mr. OBEY) in fact offered an alternative budget proposal which followed along the lines of the Congressional Black Caucus. It was certainly far superior to either the administration or the majority proposals, and so I am very happy to tell my colleague in the well and the rest of my colleagues in the House that they may anticipate the Rules Committee granting the same allotment or some fair allotment of time, that they will have an opportunity to review and to reconsider the merits of the proposal offered by the Congressional Black Caucus in the original budget.

In other words, what we have done is broken out the tax proposal and have introduced that separately and presently calling upon the Rules Committee to grant additional time; so we may be in a very related operation in which we may if the beneficience and wisdom of the leadership in the House and the decision of the Rules Committee obtains, we will have the Obey-Udall proposal, the Congressional Black Caucus proposal, as well as the administration proposal and the majority proposal.

Mr. FRANK. I thank the gentleman.

Mr. SHANNON. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I would be glad to yield to my friend, the gentleman from Massachusetts.

Mr. SHANNON. Mr. Speaker, I would like to commend my colleague, the gentleman from Massachusetts, and my colleague, the gentleman from Michigan.

I know that during the course of this debate on tax policy there has not been much of an opportunity for those Members of the House outside of the Ways and Means Committee to state their positions on these very important issues. I think that that is unfortunate, because certainly whatever the ultimate shape of the tax bill which will be sure to be enacted this year, it is going to be affecting the course of the economy and all our lives and the lives of all the people we represent for years to come. So I think it is wholly appropriate that Members should go to the Rules Committee and express their positions and certainly over the next few days try to broaden the debate as best they can.

I think it also important to point out that until this morning when the administration unveiled its latest proposal, nobody knew what the alternatives were going to be. In fact, there has not been sufficient time for anybody to analyze them.

Mr. FRANK. Well, if the gentleman will allow me to reclaim my time briefly, as the gentleman well knows there are Members on the other side who do not want to know. They follow the

principle in voting of the need-to-know basis and the only one who needs to know is the author of the amendment. Those who merely vote for it are not considered. It is a security-conscious administration, I understand that. They are simply carrying out that principle. There is no point in reading an amendment just because you are expected to vote for it.

Mr. SHANNON. Well, as the gentleman knows, I have been spending much of my time for the last few weeks talking to Members from the other side of the aisle and what I have heard time and time again from them, particularly from those Members from our region of the country, is that they do not know what the final proposals will be, so they really cannot say how they are going to vote when the vote is cast next week.

Well, I guess that excuse is gone now, but one thing is clear and that is in the last closing days of this debate on tax policy, an element has entered into the debate which I think should concern all of us here and that is the question of oil taxes.

Now, we on the Ways and Means Committee did not want to do anything to tinker with the windfall profit tax or deal with this energy at all. Our chairman and our members were quite candid about that.

We wanted the administration to express its willingness to take oil out of the picture, so that we would not have to consider it in the context of this economic recovery program.

The administration and the Republicans in the Senate were unwilling to do that, so it did enter into the picture.

Now, that has added a very disturbing new element, which is a real serious attack by the administration as of its proposal today on the very windfall profits tax itself. I think it is something which should cause concern to all Americans, but particularly to those Americans from our region of the country.

Mr. FRANK. If I can reclaim my time briefly, I think the gentleman can perform a service by sharing his views. I say the gentleman from Massachusetts has been in the Ways and Means Committee one of those who have fought for a tax cut that is truly productive and stimulative and also equitable.

I think the gentleman might scoop the Nation by telling them some of what is in that particular set of oil tax breaks that was unveiled today by the President.

□ 1600

Mr. SHANNON. It is unclear. If I can take a little of the gentleman's time, it is unclear exactly what the total price tag on this proposal is going to be.

But what is clear is that the administration's new proposal has taken out the tighteners on the oil tax, on the multinational oil companies that the Ways and Means Committee included, and has doubled the size of the tax cut that the oil companies would get. We are talking about $16 billion in tax relief to oil producers in the administration's latest proposal.

I cannot understand how any American, particularly Members of Congress from the Northeastern part of the United States, of whatever party, can support this tremendous giveaway to the oil companies, and that is what it has become, I am afraid to say.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. I would like to ask through the gentleman who has the time a question of the member of the Ways and Means Committee. The latest information I have, and the gentleman may help me out here, is that the administration is now bargaining with a new sweetener to top the Democratic proposal so that they may win back the conservative Democratic votes that apparently have fallen in line as a result of the oil giveaways put on through the committee, onto the committee bill. Could I get some enlightment on that?

Mr. FRANK, I will be glad to yield to the gentleman, but first I would like to point out that that is what I believe. Sometimes in a restaurant that is what is called one of those nonnutritional sweeteners, because it certainly is not going to do anything to the economy.

I will yield to the gentleman from Massachusetts.

Mr. SHANNON. That certainly has happened. There is no question about it. Once the energy area entered into the debate, a number of Democratic Members who were reluctant to get into this at all, but were forced into it by the administration, supported a proposal which would have cost less than half in the energy area of what the administration's proposal will cost the taxpayers and the energy consumers of this country. We are talking about a $16 billion tax break for oil producers at a time when oil prices continue to go up.

Mr. CONYERS. If the gentleman will continue to yield, is that the administration proposal or the committee proposal?

Mr. SHANNON. That is the administration proposal.

Mr. CONYERS. Is that their latest proposal or is that the latest one the gentleman knows of?

Mr. SHANNON. That is the proposal as of this morning. There might be another proposal this afternoon. I think there have been five administration proposals since we first started talking about taxes, but the latest one I heard of was released this morning, and that is the one that contained the big oil giveaway.

Mr. CONYERS. Can the gentleman advise me which one has the biggest giveaway?

Mr. SHANNON. The administration's proposal, the so-called Hance-Conable II, III, IV, whichever number this is, the latest Hance-Conable proposal has the biggest giveaway to the oil companies by a wide margin.

Mr. CONYERS. Does that then jeopardize the small balance in which the administration, in which the majority of the House of Representatives assumed that they would be able to carry the day in this? After all, it is about time we, the majority of the House, won one in this incessant goround with the administration.

Mr. SHANNON. If I could take some time from the gentleman, I am not as concerned about winning or losing as I am concerned about what is going to happen to the economy of this country if we make tax policy in the way in which the administration indicates it wishes to make tax policy.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I am glad to yield to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. I want to address the gentleman from Michigan in regard to the proposal I understand may come forth from the Black Caucus. I felt that some of the proposals of the Black Caucus in regard to the budget showed a great deal of creativity and were, indeed, tremendous proposals. Are you working on some proposals that might be of similar importance to our country in that regard?

Mr. CONYERS. Mr. Speaker, will the gentleman yield to me?

Mr. FRANK. I yield.

Mr. CONYERS. We are taking that same language and have already rewritten it into a legislative package, and are introducing it for consideration for the next week. We are prayerful that the Rules Committee will grant us time so that this proposal can at least minimally be considered. The question is what will it do?

Mr. BEDELL. If the gentleman will yield further, it would certainly be my hope at the minimum you would have the opportunity to get the information on that out to all of the Members. It is my personal belief that a great many Members did not realize just what was in the proposal by the Black Caucus in regard to the budget, which not only would have given, in my opinion, greater encouragement for business expansion and reinvestment in business, but also move toward a balanced budget. I felt that the big problem was people did not understand.

I have great problems with what I see happening here in regard to tax legislation.

It seems to me that the situation is the same as if we were in a poker game and everyone is trying to raise everybody else. The only problem is the chips we are playing with are great big chips of taxpayers' money that are apparently in the latest bid going to go to special-interest groups. I would hope again that the people would be aware of what seems to be happening is the administration is now apparently trying to outbid the Ways and Means Committee, and I personally want to commend those people who have some responsibleness, who come forward such as the gentleman from Michigan and say that we had better take a look at what has happened.

I guess there is some truth to the fact that we better move fairly quickly or everything we have in America will be given away as everybody tries to outbid everybody else.

Mr. CONYERS. If the gentleman will yield again to me, I appreciate this. Since we have a very important and valuable member of the Ways and Means Committee on the floor who has indulged us in this discussion so far, and I am personally grateful for him doing that, I would like to now posit this question. Is there a chance that the committee, chaired by the distinguished gentleman from Illinois (Mr. ROSTENKOWSKI) will try to meet the administration's new bid and raise it? Is there a possibility that we can have one last crack at this by reopening the oil boondoggle and offer some additional sweeteners to make sure that those Members who may now be attracted and swinging gradually over to their original administration position, since there were 29 of them I understand who supported the budget and created the problems that we are now confronted with, is there a chance now that the committee can meet the administration and raise it?

Mr. FRANK. I would say before yielding to the gentleman from Massachusetts that I share the views of the gentleman from Michigan. We should note that the gentleman from Massachusetts (Mr. SHANNON) has been among the virtuous on the Ways and Means Committee.

Mr. CONYERS. Absolutely. There is no question.

Mr. FRANK. But I would now turn to the gentleman from Massachusetts (Mr. SHANNON) for an inside report from the Ways and Means Committee.

Mr. SHANNON. I would like to think we are all virtuous on the Ways and Means Committee, at least on our side of the Ways and Means Committee. We have completed our deliberations. I think it is open record. Everybody knows that there was no unanimous agreement among Democrats on the Ways and Means Committee as to every single element that is in the bill. We have tried to accommodate the wishes of the various parts of our party and the various parts of our country, and I think we have done a pretty good job of it.

But the principle upon which we have worked is that when this tax bill is enacted by the Congress it should be a tax bill that addresses the needs of the average working American. It should not be a tax bill which skews all of the benefits just toward high-income earners, It should not be a tax bill that skews all of the benefits just toward large business corporations. It should not be a tax bill which takes from the pockets of the average individuals, working families and gives it to the oil companies or the large business corporations.

I think we have done a pretty good job of structuring a tax bill that all Democrats, in the final analysis, should be able to support. I am happy to say we have completed our work. The committee has completed its work and it has reported a bill which will be considered.

Mr. FRANK. If the gentleman will yield back for a moment, I wish somebody else would complete their work so that we could complete our work.

Mr. SHANNON. I am sure that is going to happen imminently. At least I hope so. But I am happy to say we have completed our work, and while I do not agree with every single word of that work product or every detail of it, I think it is a product which we can be proud of. That is not to say that others should not have other ideas.

□ 1610

And certainly I urge all of my colleagues to express their ideas in the next few days, not to feel the least bit embarrassed about expressing those ideas at this point in the debate, because certainly the President has not been embarrassed about injecting a lot of new ideas into the debate in the very last days.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. On this matter of virtue, it is very important in the Congress that we not only preserve the virtue of all of the members of the Ways and Means Committee, but we preserve the consideration of virtue of all of the Members of the House of Representatives.

So let us not cherish this important principle just for the Democratic members of the Ways and Means Committee. I would like to extend it to everybody in the House of Representatives.

Now, the problem that evolves is that some are more virtuous than others. Therein lies the problem.

Mr. FRANK. Or the opportunity.

Mr. CONYERS. There is an abundance of virtue in the House of Representatives, but it is not coequally spread among the membership, nor even in the gentleman's committee as the gentleman must well know by now.

Mr. SHANNON. If the gentleman from Massachusetts will yield, certainly virtue is in the eye of the beholder. We on this side would define virtue differently than some Members of the other body might define it. But I think that the important thing is that in the next few days the American public has the ability to understand exactly what we are talking about here, because we are talking about policies that are going to affect the lives of every American, and we are past the point where we can just speak in slogans or speak in political bumper sticker terms. We are talking about who is going to get what, as far as tax policy is concerned, for the next decade, really. It is going to seriously affect the growth of our economy over the next decade, it is going to seriously affect all of our constituents, and I am just very pleased that our colleagues are so active in this debate.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from California.

Mr. LUNGREN. Mr. Speaker, I was sitting in my office watching this debate, just prior to going to the airport to fly back to California, but it was so interesting that I felt I would even possibly delay my visit out to California to join in this.

I would just like to ask, if the gentleman will yield me the time, the gentleman from Massachusetts, who is on the Ways and Means Committee, who seems to be complaining about the fact that "we do not know what the Republican bill is," could he tell this Member when the committee bill was ready? Because I asked for a copy of it yesterday about 6 o'clock, and we were told that in concept the democratically controlled Ways and Means Committee had agreed on what they wanted last week but they had not been able to work it up as of about 6 o'clock last night for any Member here in the House to get it. Could the gentleman tell me whether we have a print of that at the present time?

Mr. FRANK. I would be glad to yield to the gentleman from Massachusetts to respond to that, but I would point out to the gentleman from California that it can be very sticky here on the weekend. I would not want to endanger the gentleman's weekend.

Mr. LUNGREN. This is much more fun.

Mr. SHANNON. I am very happy that the gentleman raised that question. Quite definitely there were copies available last night at 6 o'clock. I am sorry that the gentleman was

unable to obtain a copy, but others of us had them available, and certainly I thing the Republican members of the committee had them available.

But I think the point that really has to be outlined is that this is really a revolutionary thing we are going through here. Normally the way legislation works is that the administration makes its proposals and then the committees work on those proposals and come to some conclusions and come to the floor of the House. Of course, this is a reversal. We have been working on this legislation for months, feeling that the administration had made its proposal, only to find out just a few days before we are going to vote on it that they have not yet made their proposal and that we have been working under a false assumption, and that is that their ideas on tax policy had been laid out to us at the beginning of our deliberations.

Mr. LUNGREN. Mr. Speaker, will the gentleman from Massachusetts yield further?

Mr. FRANK. I yield to the gentleman from California.

Mr. LUNGREN. I noted that there were comments by some of my friends on the other side of the aisle that somehow this tax bill development process had become somewhat of a bidding war and suggested that somehow those of us on this side of the aisle and this administration had voluntarily wanted to enter that.

I would just ask my friends on the other side of the aisle whether or not they recall the President asking for a clean bill, a simple bill on cutting the tax rates across the board and depreciation reform, and his request that we deal with all of these other things in a second bill, and whether my friends recall that that request was denied by the majority on the Ways and Means Committee.

So it seems rather difficult for me to accept the fact that the President of the United States and this side of the aisle ought to be criticized for being involved in a bidding war when in fact we requested that that war never begin and the President requested that we have just a pure bill to be dealt with at this time, and he was rebuffed in that effort.

Mr. SHANNON. If the gentleman will yield, let me say that nothing would have pleased me more than if the President had sent to us as his substitute to be offered next week that clean bill that he spoke about in the beginning of the year, and then we could hold our ideas up about tax policy and measure them against those ideas expressed in that clean bill. Nothing would have pleased me more if he would have stuck to his guns on that.

TAX BILL DEVELOPMENT PROCESS

(Without objection, Mr. BEDELL was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, does the gentleman from California agree that there has been a bidding war?

Mr. LUNGREN. Absolutely. One would have to have not listened around here, been around here, not had his eyes open around here to recognize that we had a bidding war, with the chairman of the Ways and Means Committee as the chief auctioneer, for the last several weeks.

Mr. BEDELL. Well, we could argue about who is the auctioneer, but I would submit that you only have a bidding war when several people are bidding. And one can bid or not bid. I think legitimately there can be criticism of more than one person, but I do not believe you can say that somebody who is in a bidding war was not one of those who helped contribute to cause the war to go on.

Mr. LUNGREN. If the gentleman will yield, the gentleman will admit the fact that even though the Republicans make up about 46 percent of the House of Representatives, when we got a split of 23 Democrats on the Ways and Means Committee and 12 Republicans on the Ways and Means Committee, the game was stacked somewhat against us, and we did not have, in essence, control of the game. When you are involved in a game, you have got to play the game the way the referee tells you to play the game. Unfortunately, we have got a situation where the majority party not only in some cases is the opposition in terms of the game that is being played, but also the referee.

Mr. BEDELL. I do not agree with the gentleman at all

Mr. LUNGREN. I did not think the gentleman would.

Mr. BEDELL. If the gentleman agrees with what he says, the fact is that both parties are at fault, in the opinion of the gentleman from Iowa.

THE LATE JOHN S. KNIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, the passing of John S. Knight was a momentous loss to America and to the world. On the 16th day of June after a day's work at the office, in the home of a friend, John S. Knight, herculean figure that he was, passed this life into another. John S. Knight was one of the great empire builders of America. Few men have the ability and the good fortune to be able to build an empire from the ground up to an institution of magnificent proportions. At 83, John S. Knight could see the Knight-Ridder Newspapers as his empire, built with his own hand and head and heart. One of the great newspaper enterprises of the Nation and the world had risen from the Akron Beacon-Journal and the Miami Herald by the genius and the determination of John S. Knight. Years before he reached the end, it was all put together and thriving by the sure hand of John S. Knight. He was not only a great publisher but he had received the Pulitzer Prize for his own writing. He used to religiously write a column which gained for him admiration and honors. John Knight's long life embraced sunshine and shadow, many joys and many sorrows; but he had such equanimity of spirit and such stability of character that he never lost his head or his brave heart whether fortune smiled or frowned upon him. He established standards of propriety, integrity, and quality in the publication of newspapers and he stood fearlessly by those standards whether what his papers said was popular or unpopular.

John Knight was not an uncertain friend. While he was not a man to throw his affections wildly about, he respected those who were honest and courageous in their views even if they differed from his and he had contempt for those who were hypocrits. John Knight has made the press of America better. He has immeasurably added to the stature of his State and his country and to the free world. He has left a large place upon this Earth upon which he played so great a part. His work will live into the long future and he will stand as a stalwart figure of our time in the memories and records of millions.

A beautiful service for Mr. Knight was held on June 23 and upon that occasion, one of those brilliant men who had helped Mr. Knight to achieve his great success, who had been constantly by his side as his coworker, confidante and friend, Lee Hills, director of the Knight-Ridder Newspapers and editorial chairman emeritus of those papers, with eloquence and moving beauty, delivered the eulogy at the Church by the Sea in Bal Harbour. None was closer to Mr. Knight than Lee Hills. None knew him better, and none could speak of him more understandingly and compassionately than Mr. Lee Hills. I, therefore, Mr. Speaker, include following my remarks the eulogy of Mr. Knight by Mr. Lee Hills in the body of the RECORD:

[From the Miami Herald, June 24, 1981]

MIAMI FRIENDS PAY RESPECTS TO KNIGHT

Only John S. Knight could pack that many editors into a church, let alone get them to sing.

Knight, the father of Knight-Ridder Newspapers and editor emeritus of The Miami Herald, appeared to be smiling wryly from his black-draped portrait at the

Church By the Sea Tuesday morning as his relatives, his employes, and his friends worked their way, rather rustily, but with feeling, through four stanzas of Isaac Watt's 18th-Century hymn, *Our God, Our Help in Ages Past.*

Knight died last week at 86, in Akron, Ohio. He was buried there last Saturday. Tuesday morning he was eulogized in the same church where he married his third wife, Elizabeth Augustus, who died earlier this year.

The Rev. Ernest Simon officiated at the ceremony.

"Lift us above the shadow and the sadness of mortality into the light of Thy countenance," he prayed. "Into Thy keeping we commit the soul of Thy servant, John S. Knight, confident that he will live with Thee for all eternity."

Standing in the pulpit at the edge of the church's sanctuary, which twinkled with the light of seven-branched candelabra, Lee Hills, editorial chairman emeritus of The Miami Herald and Knight-Ridder Newspapers, told the congregation of more than 200 people that they ought not to feel too sad at the "terrible finality of death."

Instead, Hills said, "Let us celebrate the fact that we witnessed a life lived long and well."

For Knight, Hills said, "was interested in everything. He loved horse racing and football, politics and world affairs, with genuine relish. He was a natural athlete and a champion golfer. He knew how to calculate the odds, whether in dice or in newspaper acquisitions. He played the percentages and he always played to win."

The reference to dice-playing drew some quiet chuckles. One of Knight's reputed exploits was his winning $5,000 in a craps game on a homeward-bound troop ship at the end of World War I.

"Entrepreneur, reporter, sportsman, business executive, a writer of clarity and grace, publisher, philanthropist, columnist—but first and last an editor. Nothing else was a close second," Hills said.

Irascible too Hills was bound to admit. He said Knight's marriage to Betty Augustus six years ago rejuvenated him, that her benign influence was appreciated by more people than just her husband.

"He . . . proudly proclaimed himself the 'new Knight'—he was patient, sweet, lovable, contented and agreeable."

Pause. "Well, up to a point," Hills said, and the mourners smiled again.

"When I commented one day that he was never irascible anymore, he said he would probably prove me wrong in 24 hours. He did. He picked up one of his papers and complained that the type was too small to read."

Hills concluded: "And so, Jack, we are here today to say goodby to you as we did so recently to Betty. We honor you, not with tears, but with unforgettable remembrance. We shall miss you personally as a friend. We shall miss you professionally as a colleague."

TEXT OF EULOGY FOR KNIGHT

(Here is the text of the eulogy for John S. Knight, editor emeritus of Knight-Ridder Newspapers. It was delivered by Lee Hills, Knight-Ridder director and editorial chairman emeritus.)

We are gathered here to bid our last farewell to a remarkable man—father, brother, professional colleague and friend.

It is difficult not to be sad in the face of the terrible finality of death. But let's put that aside. Instead, let us be joyous, let us celebrate the fact that we witnessed a life lived long and well.

I stand here very humbly aware of the awesome assignment that I have to translate the deep emotions of the heart into language in some meaningful way.

John Shively Knight was not a person you would easily forget. Our memories of him are vivid and lasting.

He was a strong and forceful leader. He exuded confidence and what we call "presence," which enhanced his qualities of wisdom and intellect. He was not a person you overlooked. Wherever he sat was head of the table. By sheer strength of character, he achieved extraordinary stature.

For many years, from the time he and Jim Knight acquired The Miami Herald in 1937, he was conspicuous in the civic life of this community. He chaired committees and helped raise funds for a myriad of causes. People from all walks of life came to him for advice about the affairs of this, his second hometown. People would call and say every fall, "When is John Knight coming down? We need to talk to him." Freely given, that advice on more than one occasion rescued some local institution in trouble because of management or finances.

He was interested in everything. He loved horse racing and football, politics and world affairs, with genuine relish. He was a natural athlete and a champion golfer. He knew how to calculate the odds, whether in dice or in newspaper acquisitions. He played the percentages and he always played to win.

Jack had some flashes of his flamboyant and gifted father, C.L. Knight, and the caring and grace and humanity of his sensitive mother, Clara. It was a combination that made him a source of inspiration for those whose lives he touched. The more you knew him, the more you respected him.

He was equally at ease with presidents and printers, princes and preachers. He was a keen businessman with a hard-boiled, handsome flair that attracted both men and women.

His personal life was marked by great happiness and, yes, great tragedy, but he met the latter with courage of the highest order. He suffered sadness without surrender.

Some of his older friends remember with affection his first wife, Katie, mother of his three sons, and his second wife, Beryl, who shared nearly half his life.

He did not talk about it, but those close to him knew the strong thread of religious belief that ran through his life and of his many generous acts of charity.

If you read that his heart caused his death, don't believe it. There was nothing wrong with his heart, and it never failed him or anybody else. Indeed, he had a giant heart. His manner could sometimes be crusty and his wit caustic, but we remember him as a kind warm-hearted, dear friend. The heart governs understanding, and that was his special quality. It also ruled his unfailing sense of responsibility and public trust. He knew that ideals and traditions are not automatically carried on, so he worked to perpetuate them through others.

Jack Knight would not want us to linger long over his fabulous achievements. But he was a Renaissance man. He did it all:

Entrepreneur, reporter, sportsman, business executive, a writer of clarity and grace, publisher, philanthropist, columnist—but first and last an editor. Nothing else was a close second. In fact, he was at his office critiquing his papers the day he died.

He believed fiercely that newspapers must be independent editorially and economically, and that is the way he ran his. He practiced his profession of journalism with passion, energy and courage. He was an independent thinker. It was impossible to fit him into any slot. He loved being unpredictable.

He served his country in a variety of special missions. He repeatedly turned down bids to enter politics, and received countless letters from readers urging him to run for President. Over the years he was showered with honors.

His strong sense of integrity touched the lives of hundreds of journalists and millions of readers. He left a legacy of excellence.

In a career spanning most of this century, Jack Knight leaves an impressive mark on American journalism. As founder of today's most widely read newspaper group, his will be a continuing presence. Those who come after him have the guidance to continue the standards he set.

Jack's last five years were crowned with great happiness, brought by Betty Augustus Knight.

He not only loved Betty with all his heart—it was a joyful thing to see them together—but he also revered her in a way that made this a marriage of rare beauty—a wedding which was solemnized in this church.

He gave her full credit and proudly proclaimed himself the "new Knight"—he was patient, sweet, lovable, contented and agreeable—well, up to a point. When I commented one day that he was never irascible any more, he said he would probably prove me wrong in 24 hours. He did. He picked up one of his papers and complained the type was too small to read. That was typical. Jack would fret and stew over some minor annoyance, but if an editor or general manager really blew a big one when he was trying to do his best, Jack would usually comfort rather than scold him.

Betty brought a whole new dimension into Jack's life, and her large and loving family became part of it.

After she died last New Year's Day, he didn't get over it. He could not talk about her without a tear.

And so, Jack, we are here today to say goodby to you as we did so recently to Betty.

We honor you not with tears but with unforgettable remembrance.

We shall miss you personally as a friend.

We shall miss you professionally as a colleague.

You were one of us. We admire and respect you.

We love you, Jack, and we will treasure your memory.●

TAX BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 60 minutes and to revise and extend his remarks.

Mr. CONYERS. Mr. Speaker, I would like to raise a question with my colleagues, particularly the distinguished member of the Committee on Ways and Means, who is or was here, because in this bidding war we have now conceded exists on both sides of the aisle, the question that now revolves is whether the Democratic committee version, which has been report-

ed, as I understand it, probably sometime last night or this morning, whether this precludes them from any more bidding. Since the administration has now topped everybody, does this in fact jeopardize the consolidation of support and votes that surround the committee bill?

And I am very concerned that we find out what the answer is to this before we leave.

□ 1620

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Iowa.

Mr. BEDELL. It appears to me when you have a poker game with people bidding, you need to get in the game or you do not have to get in and bid. The concern I have is that there is presently a game going around everywhere. It is my contention, to make the excuse that you have to bid, is a very poor excuse. It appears to me very clearly what should be done by either the administration or the Ways and Means Committee is to put forth a proposal that they think is the best proposal and the proper proposal and that is the only way you can properly serve the American people.

If I read it correctly, that is exactly what the Black Caucus tried to do in the budget considerations as they put forth their proposal.

It would be my hope that the Black Caucus would do something similarly in regard to this opportunity and would not become involved in the poker game, but would simply say this is what I believe and would stand for that.

Mr. CONYERS. I thank the gentleman and I will continue to expect his support in these matters.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Massachusetts.

Mr. FRANK. I would like to say that I think this has served a useful purpose here today and I am glad that our colleague from across the aisle, from California, was stimulated to come and join the debate on the issues about which there has been too little discussion.

I am pleased to tell my colleagues and my friends I think it is now clear there will be amendments filed to this bill that will give us all a chance, we hope, to express some of our concerns.

The proper framework having been set in motion, I think we can rest assured as we adjourn today, that there will be an opportunity, if we continue to press, on Tuesday or Wednesday of next week, whenever the tax bill comes to the floor, for those of us who do not think the oil companies ought to be further cosseted and other special interests to be dealt with. I believe we will have an opportunity to do so.

Mr. CONYERS. Could I ask the gentleman from Massachusetts if he is familiar with this language—I am quoting:

> They went out and gave 2,500 wealthy speculators on the floors of the Chicago Board of Trade and other commodity exchanges a tax break of $400 million. Now couple that with what they have been doing in the oil fields, offering the oil producers 1,000-barrels-a-day exemption from the windfall profits tax; they do not have a poor man's bill, they are trying to buy their way to victory over us.

Mr. FRANK. I would have to confess that I am not familiar with that language.

Mr. CONYERS. Well, I was not either until very recently. It came from the Treasury Secretary, Mr. Donald Regan, talking about the Democratic version of the tax bill which is a little bit disappointing to me and makes it even more important that we consider as carefully as we can the implications of this measure.

I might say to my colleagues that after spending months debating the budget, for us to pass superficially or casually over the way that the tax laws of this country will be written and revised for the next several years, would be catastrophic to the national welfare, to the individual citizens and families in this country, and would be a very careless fulfillment of our obligation.

We write the tax laws; the House initiates them. It seems to me to be an incredibly important undertaking that commences next week.

Mr. FRANK. I was amused to learn that Donald Regan had that to say about tax provisions which the Republicans have now trumped and I await with eager anticipation and bated breath—which is different from a baited tax bill, which is what we also have—to see who it can attract. I am eager to see how ferociously the Secretary of the Treasury will denounce the tax bill, which his employer has sent over to us.

I am sorry our friend from California has left the floor, though I am pleased he may have caught the plane home. He asked when the Democratic tax bill was going to be printed, and through the good offices of my friend from Massachusetts, I have been presented with one.

So if the gentleman from California, as he packs, is listening, we do have a copy of H.R. 4242. We will leave it in the Republican cloakroom if he wants to pick it up for reading on the long flight home.

Mr. CONYERS. The gentleman's contribution has been very important. I would take further time to outline the congressional Black Caucus tax program, but it has been printed previously in the RECORD and there will be more consideration on it and it will be distributed to all of the Members starting on Monday.

Mr. Speaker, I yield back the balance of my time.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. GAYDOS (at the request of Mr. WRIGHT) for today, on account of personal reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SMITH of Oregon) to revise and extend their remarks and include extraneous material:)

Mr. LOTT, for 15 minutes, today.

Mr. GILMAN, for 5 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, today.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. CROCKETT, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. STRATTON, for 5 minutes, today.

Mr. ALEXANDER, for 15 minutes, today.

Mr. FRANK, for 30 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. ADDABBO, for 60 minutes, on July 27.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. AUCOIN, to revise and extend his remarks prior to the vote on the Coughlin amendment.

Ms. OAKAR, to revise and extend her remarks, on H.R. 4144, immediately before the vote in the Committee of the Whole today.

Mrs. BOGGS, to place in the RECORD a list immediately following her remarks in the deliberations in the Committee of the Whole today.

(The following Members (at the request of Mr. SMITH of Oregon) and to include extraneous matter:)

Mr. RITTER.

Mr. BROWN of Ohio.

Mr. WYLIE.

Mr. CRAIG.

Mr. BEARD in four instances.

Mr. BROOMFIELD.

Mr. MARRIOTT in two instances.

Mr. DORNAN of California.

Mr. PAUL.

Mr. SMITH of New Jersey.

Mr. CARNEY.

Mr. LUJAN.

Mr. HOPKINS.

Mrs. ROUKEMA.
Mr. GREEN.
(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)
Mr. D'AMOURS.
Mr. KASTENMEIER.
Mr. WAXMAN in two instances.
Mr. MATSUI.
Mr. DYSON.
Mr. WEAVER.
Mr. GARCIA in two instances.
Mr. ALEXANDER.
Mr. PATTERSON.
Mr. MOAKLEY.
Mr. LEHMAN in two instances.
Mr. DIXON.
Mr. BINGHAM.
Mr. PEPPER.
Mrs. SCHROEDER.
Mr. ANDREWS.
Mr. RAHALL.
Ms. OAKAR.
Mr. DONNELLY.
Mr. OTTINGER.
Mr. MOFFETT.

ADJOURNMENT

Mr. HOYER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 25 minutes p.m.), under its previous order, the House adjourned until Monday, July 27, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1886. A letter from the Secretary of Health and Human Services, transmitting the third annual report on drug abuse prevention, treatment, and rehabilitation, covering fiscal year 1980, pursuant to section 405(b) of the Drug Abuse Office and Treatment Act of 1972, as amended (92 Stat. 1268); to the Committee on Energy and Commerce.

1887. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to U.S.C. XXX 112b(a); to the Committee on Foreign Affairs.

1888. A letter from the Assistant Secretary of Housing and Urban Development for Adminstration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations

1889. A letter from the Administrator of General Services, transmitting reports on building project surveys for Huntsville and Decatur, Ala. and Florence, Ala.; to the Committee on Public Works and Transportation.

1890. A letter from the Administrator of General Services, transmitting a prospectus proposing a succeeding lease for space located at 500 Dallas Avenue, Houston, Tex.; to the Committee on Public Works and Transportation.

1891. A letter from the Acting Comptroller General of the United States, transmitting an assessment of the reporting requirements of the Bank Secrecy Act (GGD-81-80, July 23, 1981); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

1892. A letter from the Acting Comptroller General of the United States, transmitting a report on the fund distribution formula and management controls in the Head Start program (HRD-81-83, July 23, 1981); jointly, to the Committees on Government Operations and Education and Labor.

1893. A letter from the Acting Comptroller General of the United States, transmitting a report on consumer products advertised to save energy (HRD-81 -85, July 24, 1981); jointly, to the Committee on Government Operations and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 1855. A bill to grant the consent of Congress to the city of Boston to construct, maintain, and operate a causeway and fixed-span bridge in and over Fort Point Channel, Boston, Massachusetts, with amendments (Rept. No. 97-196). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 1898. A bill to designate the building known as the Quincy Post Office in Quincy, Massachusetts, as the "James A. Burke Post Office" (Rept. No. 97-197). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4182. A bill to extend the airport development aid program through fiscal year 1981 (Rept. No. 97-198). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 4074. A bill to revise the laws pertaining to the Maritime Administration with amendments (Rept. No. 97-199). Referred to the Committee of the Whole House on the State of the Union.

Mr. ZABLOCKI: Committee on Foreign Affairs. Report submitted pursuant to section 302 of the Congressional Budget Act of 1974 (Rept. No. 97-200). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 4242. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small business, and incentives for savings and for other purposes (Rept. No. 97-201). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEARD:
H.R. 4257. A bill to amend section 4205 of title 18 of the United States Code to provide in Federal criminal cases that two-thirds of a prison sentence must be served in order to be eligible for parole, and increasing to 25 years the portion of a life sentence or sentences of over 30 years that must be served to be eligible for parole; to the Committee on the Judiciary.

H.R. 4258. A bill to amend section 924 of title 18, United States Code, to revise the mandatory penalty for the use of a firearm during the commission of a felony, and for other purposes; to the Committee on the Judiciary.

H.R. 4259. A bill to amend titles 18 and 28 of the United States Code to eliminate, and establish an alternative to, the exclusionary rule in Federal criminal proceedings; to the Committee on the Judiciary.

By Mr. CONABLE (for himself and Mr. HANCE):
H.R. 4260. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers, acceleration of capital cost recovery of investment in plant, equipment, and real property, and incentives for savings, and for other purposes; to the Committee on Ways and Means.

By Mr. BEARD.
H.R. 4261. A bill to amend the Controlled Substances Act and Controlled Substances Import and Export Act to provide mandatory minimum sentences for violations involving large quantities of marihuana, cocaine, and opium derivatives, and to establish conditions under which certain individuals may be denied bail; jointly to the Committees on the Judiciary and Energy and Commerce.

By Mr. CONYER:
H.R. 4262. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth and improve fairness through reductions in individual income tax rates, reform of the treatment of depreciable property, incentives for small business, and for other purposes; to the Committee on Ways and Means.

By Mr. HENDON (for himself, Mr. JONES of North Carolina, Mr. FOUNTAIN, Mr. WHITLEY, Mr. ANDREWS, Mr. NEAL, Mr. JOHNSTON, Mr. ROSE, Mr. HEFNER, Mr. MARTIN OF NORTH CAROLINA, MR. BROYHILL, Mr. PHILLIP BURTON, Mr. CHENEY, Mr. CLAUSEN, Mr. DE LA GARZA, Mr. FOLEY, Mr. LUJAN, Mr. UDALL, Mr. WAMPLER, and Mr. YOUNG of Alaska):
H.R. 4263. A bill to authorize the Secretary of the Interior and the Secretary of Agriculture to designate the "Roy A. Taylor Forest" in the Nantahala National Forest, Jackson County, N.C. and erect appropriate signs and markings at a suitable location on the Blue Ridge Parkway to commemorate the "Roy A. Taylor Forest"; to the Committee on Interior and Insular Affairs.

By Mr. HUGHES:
H.R. 4264. A bill to amend chapter 207 of title 18 of the United States Code with respect to detention of defendants before trial in criminal cases; to the Committee on the Judiciary.

By Mr. LUJAN:
H.R. 4265. A bill to amend and supplement the acreage limitation and residency provisions of the Federal reclamation law, as amended and supplemented, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MARRIOTT (for himself and Mr. MARTIN of New York):

H.R. 4266. A bill to amend the Strategic and Critical Materials Stock Piling Revision Act of 1979 in order to prescribe the method for determining the quantity of any material to be stockpiled under such act, and for other purposes; to the Committee on Armed Services.

By Mr. RINALDO:

H.R. 4267. A bill to require the inspection of imported meat and meat food products, to require the grading of meat and meat food products, to require the Secretary of Agriculture to establish a labeling system for meat and meat food products, and for other purposes; to the Committee on Agriculture.

By Mr. SANTINI:

H.R. 4268. A bill to provide hospital care facilities operated by the Veterans' Administration within a reasonable distance of veterans with service-connected disabilities who live in the area of Las Vegas, Nev.; to the Committee on Veterans' Affairs.

By Mr. UDALL (for himself, Mr. OBEY, Mr. REUSS, Mr. FAZIO, Mr. LOWRY of Washington, Mr. D'AMOURS, Mr. SABO, Mr. MCHUGH, Mr. MILLER of California, Mr. GORE, Mr. OBERSTAR, and Mr. WAXMAN):

H.R. 4269. A bill to amend the Internal Revenue Code of 1954 to reduce individual and business income taxes, and for other purposes; to the Committee on Ways and Means.

By Mr. WILLIAMS of Montana:

H.R. 4270. A bill requiring the use of underground structures for public buildings whenever appropriate; to the Committee on Public Works and Transportation.

By Mr. GONZALEZ:

H. Res. 196. Resolution providing for the impeachment of Paul A. Volcker, Chairman of the Board of Governors of the Federal Reserve System; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 116: Mr. LAGOMARSINO and Mr. HOYER.

H.R. 123: Mr. GINGRICH.

H.R. 1914: Mr. HOYER.

H.R. 2322: Mr. ANNUNZIO and Mr. DANNEMEYER.

H.R. 2859: Mr. JAMES K. COYNE.

H.R. 3262: Mr. MURPHY, Mr. CLAY, Mr. PATTERSON, Mr. WOLPE, Mr. KRAMER, Mr. LOWRY of Washington, Mr. BAFALIS, Mr. KILDEE, Mr. BEDELL, and Mr. SIMON.

H.R. 3268: Mr. NELSON.

H.R. 3375: Mr. SMITH of Iowa and Ms. OAKAR.

H.R. 3412: Mr. EDWARDS of Oklahoma, Mr. WAXMAN, Mr. PEASE, Mr. LOWRY of Washington, Mr. LUNDINE, Mr. DYMALLY, Mr. CONYERS, Mr. NEAL, Mr. STUDDS, and Mr. WEAVER.

H.R. 3465: Mr. WOLPE and Mrs. HOLT.

H.R. 3485: Mr. GRAMM.

H.R. 3599: Mr. JEFFRIES.

H.R. 3911: Mr. MURPHY, Mrs. CHISHOLM, Mr. OTTINGER, Mr. WOLPE, and Mr. LEBOUTILLIER.

H.R. 3958: Mr. LOWRY of Washington, Mr. LAFALCE, Mr. ADDABBO, Mr. SCHUMER, Mr. CHAPPELL, Mr. RAILSBACK, Mr. HANSEN of Idaho, Mr. DICKS, and Mr. BOWEN.

H.R. 3960: Mr. FAZIO and Mr. GOODLING.

H.R. 4059: Mr. DAUB.

H.R. 4074: Mr. HUGHES, Mr. BREAUX, Mr. BONKER, Mr. FOGLIETTA, Mr. DYSON, Mr. HUTTO, Mr. OBERSTAR, Mr. ANDERSON, Mr. SNYDER, Mr. FORSYTHE, Mr. PRITCHARD, Mr. YOUNG of Alaska, Mr. LENT, Mr. EMERY, Mr. EVANS of Delaware, Mr. DAVIS, Mr. CARNEY, Mr. DOUGHERTY, Mr. SHUMWAY, Mr. FIELDS, Mrs. SCHNEIDER, Mr. SHAW, and Mr. BOWEN.

H.R. 4212: Mr. DYSON, Mr. LEHMAN, Mr. DAUB, and Mr. BROOMFIELD.

H.J. Res. 174: Ms. MIKULSKI, Mr. MATSUI, Mr. TRAXLER, Mr. WRIGHT, Mr. TAUZIN, Mr. ROSENTHAL, Mr. DICKS, Mr. COTTER, Mr. BARNARD, Mr. RAILSBACK, Mr. ALEXANDER, Mr. FINDLEY, Mr. GRISHAM, Mr. O'BRIEN, Mr. DIXON, Mr. DAUB, Mr. EVANS of Delaware, Mr. DYMALLY, Mr. YATRON, Mr. BREAUX, Mr. BARNES, Mr. GREEN, Mr. FRANK, Mr. HUNTER, Mr. WEBER of Ohio, Mrs. SMITH of Nebraska, Mr. BROWN of Ohio, Mr. YOUNG of Missouri, Mr. WAMPLER, Mr. SMITH of Iowa, Mr. HOWARD, Mr. PHILLIP BURTON, Mrs. BOUQUARD, Mr. MARKEY, Mr. BOLAND, Mr. BOWEN, Mr. OTTINGER, Mr. JACOBS, Mr. EMERY, and Mr. HAMILTON.

H. Con. Res. 160: Ms. OAKAR.

H. Res. 101: Mr. BEDELL.

H. Res. 176: Mr. AUCOIN.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

147. By the SPEAKER: Petition of the Democratic Club of North Dade, North Miami Beach, Fla., relative to Israel's strike at Iraq's nuclear facility; to the Committee on Foreign Affairs.

148. Also, petition of the City Council, New York, N.Y., relative to Raoul Wallenberg; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3275

By Mr. SENSENBRENNER:

—Strike all after the enacting clause, and insert in lieu thereof the following:

That this Act may be cited as the Civil Rights Commission Authorization Act of 1982.

SEC. 2. Section 106 of the Civil Rights Act of 1957 (42 U.S.C. 1975e), as amended is further amended to read as follows:

"SEC. 106. For the purposes of carrying out this Act, there is hereby authorized to be appropriated for the fiscal year ending September 30, 1982, the sum of $12,318,000 together with such additional amounts as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law which arise subsequent to the date of the enactment of the Civil Rights Commission Authorization Act of 1982.".

H.R. 4242

By Mr. ALEXANDER:

(Amendment offered by Mr. ALEXANDER to the Michel-Conable substitute.)

—At the appropriate place in title I insert the following new section:

SEC. . TAX REDUCTIONS TAKE EFFECT ONLY AFTER A BALANCED FEDERAL BUDGET ACHIEVED.

(a) GENERAL RULE.—Notwithstanding any provision of this subtitle—

(1) no amendment made by this subtitle shall apply to any taxable year beginning before the calendar year described in subsection (b), and

(2) the amendments made by this subtitle shall apply to any taxable years beginning in the calendar year described in subsection (b) and in calendar years thereafter in the same manner as they would have without regard to this section.

(b) YEAR IN WHICH AMENDMENTS TAKE EFFECT.—For purposes of subsection (a), the calendar year described in this subsection is the first calendar year (after 1980) which begins after the close of a fiscal year with respect to which the Secretary of the Treasury determined that there was no deficit in the Federal budget.

—Add at the end of subtitle A of title I the following new section:

SEC. 103. TAX REDUCTIONS TAKE EFFECT ONLY AFTER A BALANCED FEDERAL BUDGET ACHIEVED.

(a) GENERAL RULE.—Notwithstanding any provision of this subtitle—

(1) no amendment made by this subtitle shall apply to any taxable year beginning before the calendar year described in subsection (b), and

(2) the amendments made by this subtitle shall apply to taxable years beginning in the calendar year described in subsection (b) and in calendar years thereafter in the same manner as they would have without regard to this section.

(b) YEAR IN WHICH AMENDMENTS TAKE EFFECT.—For purposes of subsection (a), the calendar year described in this subsection is the first calendar year (after 1980) which begins after the close of a fiscal year with respect to which the Secretary of the Treasury determined that there was no deficit in the Federal budget.

(Amendment offered by Mr. ALEXANDER: to the Obey substitute.)

—At the appropriate place in title I insert the following new section:

SEC. . TAX REDUCTIONS TAKE EFFECT ONLY AFTER A BALANCED FEDERAL BUDGET ACHIEVED.

(a) GENERAL RULE.—Notwithstanding any provision of this subtitle—

(1) no amendment made by this subtitle shall apply to any taxable year beginning before the calendar year described in subsection (b), and

(2) the amendments made by this subtitle shall apply to taxable years beginning in the calendar year described in subsection (b) and in calendar years thereafter in the same manner as they would have without regard to this section.

(b) YEAR IN WHICH AMENDMENTS TAKE EFFECT.—For purposes of subsection (a), the calendar year described in this subsection is the first calendar year (after 1980) which begins after the close of a fiscal year with respect to which the Secretary of the Treasury determined that there was no deficit in the Federal budget.

By Mr. PHILLIP BURTON:

—Strike from H.R. 4242 title V (tax straddles) in its entirety, and substitute therefore the following language:

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Straddle Tax Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. POSTPONEMENT OF RECOGNITION OF LOSSES, ETC.

(a) GENERAL RULE.—Part VII of subchapter O of chapter 1 (relating to wash sales of stock or securities) is amended by adding at the end thereof the following new section:

"SEC. 1092. STRADDLES.

"(a) GENERAL RULE.—In the case of a straddle—

"(1) that portion of any loss with respect to such straddle which exceeds the recognized gain with respect to such straddle shall be treated as sustained not earlier than the close of the balanced period, and

"(2) the running of the holding period for each position which is part of such straddle shall be suspended for the balanced period.

"(b) STRADDLE DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'straddle' means offsetting positions with respect to personal property.

"(2) OFFSETTING POSITIONS.—A taxpayer holds offsetting positions with respect to personal property if there is a substantial diminution of the taxpayer's risk of loss from holding any position with respect to personal property by reason of his holding 1 or more other positions with respect to personal property (whether or not of the same kind).

"(3) PRESUMPTION.—

"(A) IN GENERAL.—For purposes of paragraph (2), 2 or more positions shall be presumed to be offsetting if—

"(i) the positions are customarily treated as offsetting positions (whether or not such positions are called a straddle, butterfly, or any similar name),

"(ii) the aggregate margin requirement for such positions is lower than the sum of the margin requirements for each such position (if held separately), or

"(iii) there are such other factors as the Secretary may by regulations prescribe as indicating that such positions are offsetting.

"(B) PRESUMPTION MAY BE REBUTTED.—Any presumption established pursuant to subparagraph (A) may be rebutted if the taxpayer establishes to the satisfaction of the Secretary that the positions were not offsetting.

"(c) BALANCED PERIOD.—

"(1) IN GENERAL.—For purposes of this section, the term 'balanced period' means any period during which the taxpayer holds the straddle plus the 30-day period after the day on which the positions which make up the straddle cease to be offsetting.

"(2) SHORTENING OF 30-DAY PERIOD WHERE TAXPAYER DISPOSES OF ALL POSITIONS.—If, before the close of the 30-day period specified in paragraph (1), the taxpayer disposes of all of the positions which make up a straddle, the balanced period shall be treated as ending on the day on which the taxpayer makes the last such disposition.

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) PERSONAL PROPERTY.—The term 'personal property' means—

"(A) commodities,

"(B) evidences of indebtedness,

"(C) currency, and

"(D) any other type of personal property (other than publicly traded stock which is not commodity substitute stock).

"(2) POSITION.—

"(A) IN GENERAL.—The term 'position' means an interest (including a futures contract or option).

"(B) SUCCESSOR POSITION.—If the taxpayer (within the period beginning 30 days before and ending 30 days after the date of the disposition of a position) acquires a successor position, such successor position—

"(i) shall be treated as the same position as the position to which it succeeds, and

"(ii) shall be treated as held on each day which intervenes between the disposition of the interest which it succeeds and the day on which such successor interest is acquired.

For purposes of the preceding sentence, personal property acquired by the taxpayer pursuant to a futures contract, option, or other interest shall be treated as a successor position to such interest.

"(3) POSITIONS HELD BY RELATED PERSONS, ETC.—

"(A) IN GENERAL.—In determining whether two or more positions are offsetting, the taxpayer shall be treated as holding any position held by a related person.

"(B) RELATED PERSON.—For purposes of subparagraph (A), a person is a related person to the taxpayer if—

"(i) the relationship between such person and the taxpayer would result in a disallowance of losses under section 267 or 707(b), or

"(ii) such person and the taxpayer are under common control (within the meaning of subsection (b) or (c) of section 414).

For purposes of clause (i), an individual's family shall consist only of such individual, such individual's spouse, and a child of such individual who has not attained the age of 18.

"(C) CERTAIN FLOW-THROUGH ENTITIES.—If part or all of the gain or loss with respect to a position held by a partnership, trust, or other entity would properly be taken into account for purposes of this chapter by a taxpayer with respect to whom the entity is not a related person, then, except to the extent otherwise provided in regulations—

"(i) such position shall be treated as held by the taxpayer, and

"(ii) the offsetting positions held by the taxpayer shall be treated as held by the entity.

"(4) PUBLICLY TRADED STOCK; COMMODITY SUBSTITUTE STOCK.—

"(A) PUBLICLY TRADED STOCK.—The term 'publicly traded stock' means any stock of a corporation which is regularly traded on an established securities market.

"(B) COMMODITY SUBSTITUTE STOCK.—The term 'commodity substitute stock' means any stock of a corporation 80 percent or more in value of the business and investment assets of which consist of interests in commodities. For purposes of this subparagraph, the term 'business and investment assets' means assets used or held for use in the trade or business, and assets held for investment.

"(e) EXCEPTION FOR HEDGING TRANSACTIONS.—This section shall not apply in the case of any hedging transaction (as defined in section 1256(e)).

"(f) CROSS REFERENCE.—

"For provision requiring capitalization of certain interest and carrying charges where there is a straddle, see section 263(g)."

(b) CLERICAL AMENDMENTS.—

(1) The table of sections for such part VII is amended by adding at the end thereof the following new item:

"Sec. 1092. Straddles."

(2) The heading for such part VII is amended to read as follows:

"PART VII—WASH SALES; STRADDLES".

(3) The table of parts for subchapter O of chapter 1 is amended by striking out the item relating to part VII and inserting in lieu thereof the following:

"PART VII—WASH SALES; STRADDLES".

SEC. 3. CAPITALIZATION OF CERTAIN INTEREST AND CARRYING CHARGES IN THE CASE OF STRADDLES.

Section 263 (relating to capital expenditures) is amended by adding at the end thereof the following new subsection:

"(g) CERTAIN INTEREST AND CARRYING COSTS IN THE CASE OF STRADDLES.—

"(1) GENERAL RULE.—No deduction shall be allowed for interest and carrying charges properly allocable to personal property which is part of a straddle (as defined in section 1092(b)). Any amount not allowed as a deduction by reason of the preceding sentence shall be chargeable to the capital account with respect to the personal property to which such amount relates.

"(2) INTEREST AND CARRYING CHARGES DEFINED.—For purposes of paragraph (1), the term 'interest and carrying charges' means—

"(A) interest on indebtedness incurred or continued to purchase or carry the personal property, and

"(B) amounts paid or incurred to insure, store, or transport the personal property.

"(3) EXCEPTION FOR HEDGING TRANSACTIONS.—This subsection shall not apply in the case of any hedging transaction (as defined in section 1256(e))."

SEC. 4. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

"SEC. 1256. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

"(a) GENERAL RULE.—For purposes of this subtitle—

"(1) each regulated futures contract held by the taxpayer at the close of the taxable year shall be treated as sold for its fair market value (and any gain or loss shall be taken into account for the taxable year),

"(2) proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of paragraph (1),

"(3) any gain or loss with respect to a regulated futures contract shall be treated as—

"(A) short-term capital gain or loss, to the extent of percent of such gain or loss, and

"(B) long-term capital gain or loss, to the extent of percent of such gain or loss, and

"(4) if all the offsetting positions making up any straddle consist of regulated futures contracts to which this section applies, sections 1092 and 263(g) shall not apply with respect to such straddle.

"(b) REGULATED FUTURES CONTRACTS DEFINED.—For purposes of this section, the term 'regulated futures contract' means a contract—

"(1) which requires delivery of personal property (as defined in section 1092(d)(1)) or an interest in such property,

"(2) with respect to which the amount required to be deposited and the amount which may be withdrawn depends on a system of marking to market, and

"(3) which is subject to the rules of a domestic board of trade or domestic exchange or of any foreign board of trade or foreign exchange which the Secretary determines has rules adequate to carry out the purposes of this section.

"(c) TERMINATIONS.—The rules of paragraphs (1), (2), and (3) of subsection (a)

shall also apply to the termination during the taxable year of the taxpayer's obligation with respect to a regulated futures contract by taking or making delivery or otherwise. For purposes of the preceding sentence, fair market value at the time of the termination shall be taken into account.

"(d) ELECTIONS WITH RESPECT TO MIXED STRADDLES.—

"(1) ALL POSITIONS UNDER MARK TO MARKET.—The taxpayer may elect to have this section apply to all positions of each mixed straddle of the taxpayer in the same manner as if all such positions were regulated futures contracts.

"(2) ALL POSITIONS UNDER SECTION 1092.—The taxpayer may elect to have this section not to apply to all regulated futures contracts—

"(A) which are part of a mixed straddle, and

"(B) which, before the close of the day on which acquired by the taxpayer, are clearly identified as being part of a mixed straddle.

"(3) TIME AND MANNER.—An election under paragraph (1) or (2) shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(4) ELECTION REVOCABLE ONLY WITH CONSENT.—An election under paragraph (1) or (2) shall apply to the taxpayer's taxable year for which made and to all subsequent taxable years, unless the Secretary consents to a revocation of such election.

"(5) MIXED STRADDLE.—For purposes of this subsection, the term 'mixed straddle' means any straddle (as defined in section 1092(b)) if at least one (but not all) of the positions which are a part of such straddle are regulated futures contracts.

"(e) MARK TO MARKET NOT TO APPLY TO HEDGING TRANSACTIONS.—

"(1) SECTION NOT TO APPLY.—Subsection (a) shall not apply in the case of a hedging transaction.

"(2) DEFINITIONS.—

"(A) HEDGING TRANSACTION.—For purposes of this subsection, the term 'hedging transaction' means any transaction if—

"(i) such transaction is entered into by the taxpayer in the normal course of the taxpayer's trade or business primarily to reduce risks from price movements of inventory held or to be held by the taxpayer, and

"(ii) before the close of the day on which such transaction was entered into, the taxpayer clearly identifies such transaction as being a hedging transaction.

"(B) INVENTORY.—For purposes of this subsection, the term 'inventory' means property described in paragraph (1) of section 1221.

"(3) SPECIAL RULE FOR SYNDICATES.—

"(A) IN GENERAL.—Notwithstanding paragraph (2)(A), the term 'hedging transaction' shall not include any transaction entered into by a syndicate.

"(B) SYNDICATE DEFINED.—For purposes of subparagraph (A), the term 'syndicate' means any partnership or other entity (other than a C corporation)—

"(i) if at any time interests in such entity have been offered for sale in any offering required to be registered with any Federal or State agency having authority to regulate the offering of securities for sale, or

"(ii) if more than 35 percent of the losses of such entity during any period are allocable to limited partners or limited entrepreneurs.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) C CORPORATION.—The term 'C corporation' means any corporation other than an electing small business corporation (as defined in section 1371(b)).

"(ii) HOLDING ATTRIBUTABLE TO ACTIVE MANAGEMENT.—An individual shall not be treated as a limited partner or limited entrepreneur with respect to any entity for any period during which such individual actively participates in the management of such entity.

"(f) SPECIAL RULES.—

"(1) DENIAL OF CAPITAL GAINS TREATMENT FOR PROPERTY IDENTIFIED AS PART OF A HEDGING TRANSACTION.—For purposes of this title, gain from any property shall in no event be considered as gain from the sale or exchange of a capital asset if such property was at any time identified under subsection (e)(2)(A)(ii) by the taxpayer as being part of a hedging transaction.

"(2) SUBSECTION (a)(3) NOT TO APPLY TO ORDINARY INCOME PROPERTY.—Paragraph (3) of subsection (a) shall not apply to any gain or loss which, but for such paragraph, would be ordinary income or loss."

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by adding at the end thereof the following new item:

"SEC. 1256. REGULATED FUTURES CONTRACTS MARKED TO MARKET."

SEC. 5. CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.

Section 1212 (relating to capital loss carrybacks and carryovers) is amended by adding at the end thereof the following new subsection:

"(c) CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.—

"(1) IN GENERAL.—If a taxpayer (other than than a corporation) has a net commodity futures loss for the taxable year and elects to have this subsection apply to such taxable year, the amount of such net commodity futures loss—

"(A) shall be a carryback to each of the 3 taxable years preceding the loss year, and

"(B) to the extent that, after the application of paragraphs (2) and (3), such loss is allowed as a carryback to any such preceding taxable year—

"(i) percent of the amount so allowed shall be treated as a short-term capital loss from regulated futures contracts, and

"(ii) percent of the amount so allowed shall be treated as a long-term capital loss from regulated futures contracts.

"(2) AMOUNT CARRIED TO EACH TAXABLE YEAR.—The entire amount of the net commodity futures loss for any taxable year shall be carried to the earliest of the taxable years to which such loss may be carried back under paragraph (1). The portion of such loss which shall be carried to each of the 2 other taxable years to which such loss may be carried back shall be the excess (if any) of such loss over the portion of such loss which, after the application of paragraph (3), was allowed as a carryback for any prior taxable year.

"(3) AMOUNT WHICH MAY BE USED IN ANY PRIOR TAXABLE YEAR.—An amount shall be allowed as a carryback under paragraph (1) to any prior taxable year only to the extent—

"(A) such amount does not exceed the net commodity futures gain for such year, and

"(B) the allowance of such carryback does not increase or produce a net operating loss (as defined in section 172(c)) for such year.

"(4) NET COMMODITY FUTURES LOSS.—For purposes of paragraph (1), the term 'net commodity futures loss' means the lesser of—

"(A) the net capital loss for the taxable year determined by taking into account only gains and losses from regulated futures contracts, or

"(B) the sum of the amounts which, but for paragraph (6)(A), would be treated as capital losses in the succeeding taxable year under subparagraphs (A) and (B) of subsection (b)(1).

"(5) NET COMMODITY FUTURES GAIN.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'net commodity futures gain' means the lesser of—

"(i) the capital gain net income for the taxable year determined by taking into account only gains and losses from regulated futures contract, or

"(ii) the capital gain net income for the taxable year.

"(B) SPECIAL RULE.—The net commodity futures gain for any taxable year before the loss year shall be computed without regard to the net commodity futures loss for the loss year or for any taxable year thereafter.

"(6) COORDINATION WITH CARRYFORWARD PROVISIONS OF SUBSECTION (b)(1).—

"(A) CARRYFORWARD AMOUNT REDUCED BY AMOUNT USED AS CARRYBACK.—For purposes of applying subsection (b)(1), if any portion of the net commodity futures loss for any taxable year is allowed as a carryback under paragraph (1) to any preceding taxable year—

"(i) percent of the amount allowed as a carryback shall be treated as a short-term capital gain for the loss year, and

"(ii) percent of the amount allowed as a carryback shall be treated as a long-term capital gain for the loss year.

"(B) CARRYOVER LOSS RETAINS CHARACTER AS ATTRIBUTABLE TO REGULATED FUTURES CONTRACT.—Any amount carried forward as a short-term or long-term capital loss to any taxable year under subsection (b)(1) (after the application of subparagraph (A)) shall, to the extent attributable to losses from regulated futures contracts, be treated as loss irom regulated futures contracts for such taxable year.

"(7) OTHER DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) REGULATED FUTURES CONTRACT.—The term 'regulated futures contract' means any regulated futures contract (as defined in section 1256(b)) to which section 1256 applies. Such term includes any position treated as a regulated futures contract under section 1256(d)(1).

"(B) EXCLUSION FOR ESTATES AND TRUSTS.—This subsection shall not apply to any estate or trust."

SEC. 6. CERTAIN GOVERNMENTAL OBLIGATIONS ISSUED AT DISCOUNT TREATED AS CAPITAL ASSETS.

(a) GENERAL RULE.—Section 1221 (defining capital asset) is amended by striking out paragraph (5) and by redesignating paragraph (6) as paragraph (5).

(b) TREATMENT OF AMOUNTS RECEIVED ON SALE OR OTHER DISPOSITION.—Subsection (a) of section 1232 (relating to bonds and other evidences of indebtedness) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN SHORT-TERM GOVERNMENT OBLIGATIONS.—

"(A) IN GENERAL.—On the sale or exchange of any short-term Government obligation, any gain realized which does not exceed an amount equal to the pro rata share of the acquisition discount shall be treated as ordinary income. Gain in excess of such amount shall be considered gain from the sale or exchange of a capital asset held less than 1 year.

"(B) SHORT-TERM GOVERNMENT OBLIGATION.—For purposes of this paragraph, the term 'short-term Government obligation' means any obligation of the United States

or any of its possessions, or of a State or any political subdivision thereof, or of the District of Columbia which is issued on a discount basis and payable without interest at a fixed maturity date not exceeding 1 year from the date of issue. Such term does not include any obligation the interest on which is not includible in gross income under section 103 (relating to certain governmental obligations).

"(C) ACQUISITION DISCOUNT.—For purposes of this paragraph, the term 'acquisition discount' means the excess of the stated redemption price at maturity over the taxpayer's basis for the obligation.

"(D) RATABLE SHARE.—For purposes of this paragraph, the ratable share of the acquisition discount is an amount which bears the same ratio to such discount as—

"(i) the number of days which the taxpayer held the obligation bears to

"(ii) the number of days after the date the taxpayer acquired the obligation and up to (and including) the date of its maturity."

(c) TECHNICAL AMENDMENTS.—

(1) Subparagraph (D) of section 1231(b)(1) is amended by striking out "paragraph (6)" and inserting in lieu thereof "paragraph (5)".

(2) Subparagraph (B) of section 341(c)(2) is amended by striking out "(and governmental obligations described in section 1221(5))".

SEC. 7. PROMPT IDENTIFICATION OF SECURITIES BY DEALERS IN SECURITIES.

Subsection (a) of section 1236 (relating to dealers in securities) is amended—

(1) by striking out "before the expiration of the 30th day after the date of its acquisition" and inserting in lieu thereof "before the close of the day on which it was acquired", and

(2) by striking out "expiration of such 30th day" and inserting in lieu thereof "close of such day".

SEC. 8. TREATMENT OF GAIN OR LOSS FROM CERTAIN TERMINATIONS.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by inserting after section 1234 the following new section:

SEC. 1234A. GAINS OR LOSSES FROM CERTAIN TERMINATIONS.

"Gain or loss attributable to the cancellation, lapse, expiration, or other termination of a right or obligation with respect to personal property (as defined in section 1092(d)(1)) which is (or on acquisition would be) a capital asset in the hands of the taxpayer shall be treated as gain or loss from the sale of a capital asset."

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by inserting after the item relating to section 1234 the following new item:

"Sec. 1234A. Gains or losses from certain terminations."

SEC. 9. EFFECTIVE DATES.

(a) IN GENERAL.—Except as otherwise provided in this section, the amendment made by this Act shall apply to property acquired by the taxpayer after May 5, 1981, in taxable years ending after such date.

(b) IDENTIFICATION REQUIREMENTS.—

(1) UNDER SECTION 1236 OF CODE.—The amendments made by section 7 shall apply to property acquired by the taxpayer after the date of the enactment of this Act in taxable years ending after such date.

(2) UNDER SECTION 1256(e)(2)(A) OF CODE.—Clause (ii) of section 1256(e)(2)(A) of the Internal Revenue Code of 1954 (as added by this Act) shall apply to property acquired by the taxpayer after December 31, 1981, in taxable years ending after such date.

(c) ELECTION WITH RESPECT TO PROPERTY HELD ON MAY 5, 1981.—If the taxpayer so elects (at such time and in such manner as the Secretary of the Treasury or his delegate shall prescribe), the amendments made by this Act shall also apply to regulated futures contracts or personal property held by the taxpayer on May 5, 1981, effective for periods after such date in taxable years ending after such date. For purposes of the preceding sentence, the term "regulated futures contract" has the meaning given to such term by section 1256(b) of the Internal Revenue Code of 1954, and the term "personal property" has the meaning given to such term by section 1092(d)(1) of such Code.

(d) NO CARRYBACK TO YEARS ENDING BEFORE MAY 5, 1981.—No amount shall be allowed as a carryback under section 1212(c) of the Internal Revenue Code of 1954 to any taxable year ending on or before May 5, 1981.

—Strike from H.R. 4242, section 321, Exclusion of Interest on Certain Savings Certificates (the All Savers Plan).

Strike from H.R. 4260 (the Conable-Hance substitute to H.R. 4242), section 301, Exclusion of Interest on Certain Savings Certificates (the All Savers Plan).

By Mr. DASCHLE:

(An amendment to H.R. 4242, as reported, and to any amendment in the nature of a substitute to H.R. 4242, the Tax Incentive Act of 1981.)

—At the end of title I of the bill, insert the following new section:

SEC. . DELAY IN RATE REDUCTIONS FOR 1982, 1983, AND 1984 IF FEDERAL SPENDING EXCEEDS REVENUES.

(a) DELAYED APPLICATION.—

(1) IN GENERAL.—In the case of calendar years 1982, 1983, and 1984, if total outlays exceed total revenues for the fiscal year ending in such calendar year, the individual income tax rate and withholding schedules which would otherwise take effect for taxable years beginning in such calendar year shall not take effect.

(2) EXCESS OF OUTLAYS OVER REVENUES DETERMINED UNDER BUDGET RESOLUTION.—For purposes of paragraph (1), the determination of whether total outlays exceed total revenues for a fiscal year shall be such determination as specified in the second concurrent resolution on the budget (and any further concurrent resolution on the budget under section 310 of the Congressional Budget Act of 1974) adopted by the Congress before the end of the calendar year ending in such fiscal year.

(b) PRIOR YEAR'S SCHEDULE TO REMAIN IN EFFECT IF OUTLAYS EXCEED REVENUES.—If, by reason of subsection (a), schedules do not go in effect for taxable years beginning in a calendar year, the schedules in effect for taxable years beginning in the preceding calendar year shall continue to apply.

(c) RATE REDUCTIONS TO COMMENCE WHEN REVENUES EXCEED OUTLAYS.—If any scheduled tax reduction does not go into effect during the calendar year for which it is scheduled by reason of subsection (a), any reduction scheduled to go into effect in subsequent years shall take effect as scheduled unless precluded by the application of paragraph (1).

By Mrs. FENWICK:

—Strike out section 121 and insert in lieu thereof the following:

SEC. 221. ELIMINATION OF THE MARRIAGE PENALTY.

(a) IN GENERAL.—

(1) TAX IMPOSED.—So much of subsection (c) of section 1 (relating to tax imposed) as precedes the table is amended to read as follows:

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS) AND CERTAIN MARRIED INDIVIDUALS.—There is hereby imposed on the taxable income of—

"(1) every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)),

"(2) every married individual (as defined in section 143) who—

"(A) does not make a single return jointly with his spouse under section 6013,

"(B) who elects at such time and in such manner as the Secretary prescribes, to have this subsection apply, and

"(C) whose spouse elects, at such time and in such manner as the Secretary prescribes, to have the provisions of this subsection apply, a tax determined in accordance with the following table:".

(2) SPECIAL RULES FOR MARRIED INDIVIDUALS ELECTING SECTION 1(c).—Section 1 is amended by adding at the end thereof the following new subsection:

"(f) MARRIED INDIVIDUAL ELECTING SUBSECTION (c).—In the case of a married individual (as defined in section 143) who elects to have the provisions of subsection (c) apply with respect to his taxable income for any taxable year—

"(1) DEDUCTIONS AND DEPENDENT EXEMPTIONS.—The amount of any—

"(A) deduction allowable by part VI or VII of subchapter B to such individual or the spouse of such individual for the taxable year, or

"(B) personal exemption allowable under section 151(e) to such individual or the spouse of such individual for the taxable year,

shall be allocated between such individual and the spouse of such individual so that 50 percent of such amount is allocated (and allowed as a deduction) to such individual.

"(2) INCOME FROM JOINTLY OWNED PROPERTY.—The income (other than earned income) received by such individual and the spouse of such individual during the taxable year from property held by such individual and the spouse of such individual as tenants in common, joint tenants, or tenants by the entirety, shall be allocated between such individual and the spouse of such individual. The amount allocated to an individual under the preceding sentence shall be an amount which bears the same relationship to such income as the amount of such individual's gross income for the taxable year (determined without regard to this subsection) bears to the sum of—

"(A) such individual's gross income for the taxable year (determined without regard to this subsection), plus

"(B) the gross income of the spouse of such individual for the taxable year (determined without regard to this subsection).

"(3) COMMUNITY PROPERTY LAWS.—The computation of such individual's taxable income shall be made without regard to any community property laws.

"(4) EARNED INCOME.—For purposes of this subsection, the term 'earned income' has the meaning given such term in section 911(d)(2) or 401(c)(2)(C).".

(b) CONFORMING AMENDMENTS.—

(1) Subsection (d) of section 1 is amended—

(A) by inserting "Certain" before "Married" in the heading thereof, and

(B) by inserting ", or who does not elect to have the provisions of subsection (c) apply," after "section 6013".

(2) Subsection (d) of section 63 (relating to the definition of taxable income) is amended—

(A) by inserting ", or who is married and makes an election under section 1(c)" before the comma at the end of paragraph (2), and

(B) by inserting "under section 1(d)" after "return" in paragraph (3).

(3) Clause (i) of section 6012(a)(1)(A) (relating to persons required to make returns of income) is amended—

(A) by striking out ", is not" and inserting in lieu thereof "and is not", and

(B) by inserting "or who is married (as so determined) and makes an election under section 1(c)," before "and for the taxable year".

(4) Subsection (c) of section 42 (relating to general tax credit) is amended by inserting "under subsection (d) of section 1" after "return".

(5) Section 44A (relating to expenses for household and dependent care services necessary for gainful employment) is amended—

(A) by inserting ", or a married individual who makes an election under section 1(c) for such year" after "year" the first place it appears in subsection (e)(1)(A),

(B) by inserting "and who has not so elected" after "year" the first place it appears in subsection (e)(1)(B),

(C) by inserting "Certain" before "Married" in the heading of subsection (f)(2), and

(D) by inserting "or make the election provided under section 1(c) for such year" before the period at the end of subsection (f)(2).

(c) FORMS.—The Secretary shall provide a form which enables a married individual electing the provisions of section 1(c) of the Internal Revenue Code of 1954 and the spouse of such individual to make their respective returns of income for the taxable year (required under section 6012 of such Code) on the same form.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

By Mr. FRANK:

—Strike out title V of the bill and insert in lieu thereof the following:

TITLE V—TAX STRADDLES

SEC. 501. POSTPONEMENT OF RECOGNITION OF LOSSES, ETC.

(a) GENERAL RULE.—Part VII of subchapter O of chapter 1 (relating to wash sales of stock or securities) is amended by adding at the end thereof the following new section:

SEC. 1092. STRADDLES.

"(a) RECOGNITION OF LOSS IN CASE OF STRADDLES, ETC.—

"(1) LIMITATION ON RECOGNITION OF LOSS.—

"(A) IN GENERAL.—Any loss with respect to 1 or more positions shall be taken into account for any taxable year only to the extent that the amount of such loss exceeds the unrealized gain (if any) with respect to 1 or more positions which—

"(i) were acquired by the taxpayer before the disposition giving rise to such loss,

"(ii) were offsetting positions with respect to the 1 or more positions from which the loss arose, and

"(iii) were not part of an identified straddle as of the close of the taxable year.

"(B) CARRYOVER OF LOSS.—Any loss which may not be taken into account under subparagraph (A) for any taxable year shall, subject to the limitations under subparagraph (A), be treated as sustained in the succeeding taxable year.

"(2) SPECIAL RULE FOR IDENTIFIED STRADDLES.—

"(A) IN GENERAL.—In the case of any straddle which is an identified straddle as of the close of any taxable year—

"(i) paragraph (1) shall not apply for such taxable year, and

"(ii) any loss with respect to such straddle shall be treated as sustained not earlier than the day on which all of the positions making up the straddle are disposed of.

"(B) IDENTIFIED STRADDLE.—The term 'identified straddle' means any straddle—

"(i) which is clearly identified on the taxpayer's records, before the close of the day on which the straddle is acquired, as an identified straddle,

"(ii) all of the original positions of which (as identified by the taxpayer) are acquired on the same day and with respect to which—

"(I) all of such positions are disposed of on the same day during the taxable year, or

"(II) none of such positions has been disposed of as of the close of the taxable year, and

"(iii) which is not part of a larger straddle.

"(3) UNREALIZED GAIN.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'unrealized gain' means the amount of gain which would be taken into account with respect to any position held by the taxpayer as of the close of the taxable year if such position were sold on the last business day of such taxable year at its fair market value.

"(B) REPORTING OF GAIN.—

"(i) IN GENERAL.—Each taxpayer shall disclose to the Secretary, at such time and in such manner and form as the Secretary may prescribe by regulations—

"(I) each position (whether or not part of a straddle) which is held by such taxpayer as of the close of the taxable year and with respect to which there is unrealized gain, and

"(II) the amount of such unrealized gain.

"(ii) REPORTS NOT REQUIRED IN CERTAIN CASES.—Clause (i) shall not apply—

"(I) to any position which is part of an identified straddle,

"(II) to any position which, with respect to the taxpayer, is property described in paragraph (1) or (2) of section 1221 or to any position which is part of a hedging transaction (as defined in section 1256(e)), or

"(III) with respect to any taxable year if no loss on a position (including a regulated futures contract) has been sustained during such taxable year or if the only loss sustained on such position is a loss described in subclause (II).

"(b) CHARACTER OF GAIN OR LOSS; WASH SALES.—Under regulations prescribed by the Secretary, in the case of gain or loss with respect to any position of a straddle, rules which are similar to the rules of subsections (a) and (d) of section 1091 and of subsections (b) and (d) of section 1233 and which are consistent with the purposes of this section shall apply.

"(c) STRADDLE DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'straddle' means offsetting positions with respect to personal property.

"(2) OFFSETTING POSITIONS.—

"(A) IN GENERAL.—A taxpayer holds offsetting positions with respect to personal property if there is a substantial diminution of the taxpayer's risk of loss from holding any position with respect to personal property by reason of his holding 1 or more other positions with respect to personal property (whether or not of the same kind).

"(B) ONE SIDE LARGER THAN OTHER SIDE.—If 1 or more positions offset only a portion of 1 or more other positions, the Secretary shall by regulations prescribe the method for determining the portion of such other positions which is to be taken into account for purposes of this section.

"(3) PRESUMPTION.—

"(A) IN GENERAL.—For purposes of paragraph (2), 2 or more positions shall be presumed to be offsetting if—

"(i) the positions are in the same personal property (whether established in such property or a contract for such property),

"(ii) the positions are in the same personal property, even though such property may be in a substantially altered form,

"(iii) the positions are in debt instruments of a similar maturity or other debt instruments described in regulations prescribed by the Secretary,

"(iv) the positions are sold or marketed as offsetting positions (whether or not such positions are called a straddle, spread, butterfly, or any similar name),

"(v) the aggregate margin requirement for such positions is lower than the sum of the margin requirements for each such position (if held separately), or

"(vi) there are such other factors (or satisfaction of subjective or objective tests) as the Secretary may by regulations prescribe as indicating that such positions are offsetting.

For purposes of the preceding sentence, 2 or more positions shall be treated as described in clause (i), (ii), (iii), or (vi) only if the value of 1 or more of such positions ordinarily varies inversely with the value of 1 or more other such positions.

"(B) PRESUMPTION MAY BE REBUTTED.—Any presumption established pursuant to subparagraph (A) may be rebutted.

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) PERSONAL PROPERTY.—The term 'personal property' means any personal property (other than stock) of a type which is actively traded.

"(2) POSITION.—

"(A) IN GENERAL.—The term 'position' means an interest (including a futures or forward contract or option) in personal property.

"(B) SPECIAL RULE FOR STOCK OPTIONS.—The term 'position' includes any stock option which is a part of a straddle and which is an option to buy or sell stock which is actively traded, but does not include a stock option which—

"(i) is traded on a domestic exchange, and

"(ii) is of a type with respect to which the maximum period during which such option may be exercised is less than the minimum period for which a capital asset must be held for gain to be treated as long-term capital gain under section 1222(3).

"(3) POSITIONS HELD BY RELATED PERSONS, ETC.—

"(A) IN GENERAL.—In determining whether 2 or more positions are offsetting, the taxpayer shall be treated as holding any position held by a related person.

"(B) RELATED PERSON.—For purposes of subparagraph (A), a person is a related

person to the taxpayer if with respect to any period during which a position is held by such person, such person—

"(i) is the spouse of the taxpayer, or

"(ii) files a consolidated return (within the meaning of section 1501) with the taxpayer for any taxable year which includes a portion of such period.

"(C) CERTAIN FLOWTHROUGH ENTITIES.—If part or all of the gain or loss with respect to a position held by a partnership, trust, or other entity would properly be taken into account for purposes of this chapter by a taxpayer, then, except to the extent otherwise provided in regulations, such position shall be treated as held by the taxpayer.

"(4) SPECIAL RULE FOR REGULATED FUTURES CONTRACTS.—In the case of a straddle—

"(A) at least 1 (but not all) of the positions of which are regulated futures contracts, and

"(B) with respect to which the taxpayer has not elected to have the provisions of section 1256 apply.

the provisions of this section shall apply to any regulated futures contract and any other position making up such straddle.

"(5) REGULATED FUTURES CONTRACT.—The term 'regulated futures contract' has the same meaning given such term by section 1256(b).

"(e) EXCEPTION FOR HEDGING TRANSACTIONS.—This section shall not apply in the case of any hedging transaction (as defined in section 1256(e)).

"(f) CROSS REFERENCE.—

"For provision requiring capitalization of certain interest and carrying charges where there is a straddle, see section 263(g).".

(b) PENALTY FOR FAILURE TO DISCLOSE.—Section 6653 (relating to failure to pay tax) is amended by adding at the end thereof the following new subsection:

"(g) SPECIAL RULE IN CASES OF FAILURE TO REPORT UNREALIZED GAIN ON POSITION IN PERSONAL PROPERTY.—If—

"(1) a taxpayer fails to make the report required under section 1092(a)(3)(B) in the manner prescribed by such section and such failure is not due to reasonable cause, and

"(2) such taxpayer has an underpayment of any tax attributable (in whole or in part) to the denial of a deduction of a loss with respect to any position (within the meaning of section 1092(d)(2)).

then such underpayment shall, for purposes of subsection (a), be treated as an underpayment due to negligence or intentional disregard of rules and regulations (but without intent to defraud).".

(c) APPLICATION WITH SECTION 1233.—Paragraph (2) of section 1233(e) (Defining property to which section applies) is amended by inserting ", but does not include any position to which section 1092(b) applies" after "taxpayer" in subparagraph (A).

(d) CLERICAL AMENDMENTS.—

(1) The table of sections for such part VII is amended by adding at the end thereof the following new item:

"Sec. 1092. Straddles.".

(2) The heading for such part VII is amended to read as follows:

"PART VII—WASH SALES; STRADDLES".

(3) The table of parts for subchapter O of chapter 1 is amended by striking out the item relating to part VII and inserting in lieu thereof the following:

"PART VII. WASH SALES; STRADDLES.".

SEC. 502. CAPITALIZATION OF CERTAIN INTEREST AND CARRYING CHARGES IN THE CASE OF STRADDLES.

Section 263 (relating to capital expenditures) is amended by adding at the end thereof the following new subsection:

"(g) CERTAIN INTEREST AND CARRYING COSTS IN THE CASE OF STRADDLES.—

"(1) GENERAL RULE.—No deduction shall be allowed for interest and carrying charges properly allocable to personal property which is part of a straddle (as defined in section 1092(c)). Any amount not allowed as a deduction by reason of the preceding sentence shall be chargeable to the capital account with respect to the personal property to which such amount relates.

"(2) INTEREST AND CARRYING CHARGES DEFINED.—For purposes of paragraph (1), the term 'interest and carrying charges' means the excess of—

"(A) the sum of—

"(i) interest on indebtedness incurred or continued to purchase or carry the personal property, and

"(ii) amounts paid or incurred to insure, store, or transport the personal property, over

"(B) the sum of—

"(i) the amount of interest (including original issue discount) includible in gross income for the taxable year with respect to the property described in subparagraph (A), and

"(ii) any amount treated as ordinary income under section 1232(a)(4)(A) with respect to such property for the taxable year.

"(3) EXCEPTION FOR HEDGING TRANSACTIONS.—This subsection shall not apply in the case of any hedging transaction (as defined in section 1256(e)).".

SEC. 503. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

"SEC. 1256. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

"(a) GENERAL RULE.—For purposes of this subtitle—

"(1) each regulated futures contract held by the taxpayer at the close of the taxable year shall be treated as sold for its fair market value on the last business day of such taxable year (and any gain or loss shall be taken into account for the taxable year),

"(2) proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason by paragraph (1),

"(3) any gain or loss with respect to a regulated futures contract shall be treated as—

"(A) short-term capital gain or loss, to the extent of 40 percent of such gain or loss, and

"(B) long-term capital gain or loss, to the extent of 60 percent of such gain or loss, and

"(4) if all the offsetting positions making up any straddle consist of regulated futures contracts to which this section applies (and such straddle is not part of a larger straddle), sections 1092 and 263(g) shall not apply with respect to such straddle.

"(b) REGULATED FUTURES CONTRACTS DEFINED.—For purposes of this section, the term 'regulated futures contract' means a contract—

"(1) which requires delivery of personal property (as defined in section 1092(d)(1)) or an interest in such property;

"(2) with respect to which the amount required to be deposited and the amount which may be withdrawn depends on a system of marking to market; and

"(3) which is traded on or subject to the rules of a domestic board of trade designated as a contract market by the Commodity Futures Trading Commission or of any board of trade or exchange which the Secretary determines has rules adequate to carry out the purposes of this section.

"(c) TERMINATIONS.—The rules of paragraphs (1), (2), and (3) of subsection (a) shall also apply to the termination during the taxable year of the taxpayer's obligation with respect to a regulated futures contract by offsetting, by taking or making delivery, or otherwise. For purposes of the preceding sentence, fair market value at the time of the termination shall be taken into account.

"(d) ELECTIONS WITH RESPECT TO MIXED STRADDLES.—

"(1) ELECTIONS.—The taxpayer may elect to have this section—

"(A) apply to all positions of all mixed straddles of the taxpayer in the same manner as if all such positions were regulated futures contracts; or

"(B) not apply to all regulated futures contracts which are part of all mixed straddles.

"(2) TIME AND MANNER.—An election under paragraph (1) shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(3) ELECTION REVOCABLE ONLY WITH CONSENT.—An election under paragraph (1) shall apply to the taxpayer's taxable year for which made and to all subsequent taxable years, unless the Secretary consents to a revocation of such election.

"(4) MIXED STRADDLE.—For purposes of this subsection, the term 'mixed straddle' means any straddle (as defined in section 1092(c))—

"(A) at least 1 (but not all) of the positions of which are regulated futures contracts, and

"(B) with respect to which each position forming part of such straddle is clearly identified, before the close of the day on which such position is acquired, as being part of such straddle.

"(e) MARKED TO MARKET NOT TO APPLY TO HEDGING TRANSACTIONS.—

"(1) SECTION NOT TO APPLY.—Subsection (a) shall not apply in the case of a hedging transaction.

"(2) DEFINITION OF HEDGING TRANSACTION.—For purposes of this subsection, the term 'hedging transaction' means any transaction if—

"(A) such transaction is entered into by the taxpayer in the normal course of the taxpayer's trade or business primarily—

"(i) to reduce risk of price change or currency fluctuations with respect to property which is held or to be held by the taxpayer, or

"(ii) to reduce risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or obligations incurred or to be incurred, by the taxpayer,

"(B) the gain or loss on such transactions is treated as ordinary income or loss, and

"(C) before the close of the day on which such transaction was entered into, the taxpayer clearly identifies such transaction as being a hedging transaction.

"(3) SPECIAL RULE FOR SYNDICATES.—

"(A) IN GENERAL.—Notwithstanding paragraph (2), the term 'hedging transaction' shall not include any transaction entered into by a syndicate.

"(B) SYNDICATE DEFINED.—For purposes of subparagraph (A), the term 'syndicate'

means any partnership or other entity (other than a C corporation)—

"(i) if at any time interests in such entity have been offered for sale in any offering required to be registered with any Federal or State agency having authority to regulate the offering of securities for sale, or

"(ii) if more than 35 percent of the losses of such entity during any period are allocable to limited partners or limited entrepreneurs (within the meaning of section 464(e)(2)).

In the case of any person which is a dealer in securities, the Secretary may on a case-by-case basis increase the percentage under clause (ii).

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) C CORPORATION.—The term 'C corporation' means any corporation other than an electing small business corporation (as defined in section 1371(b)).

"(ii) HOLDING ATTRIBUTABLE TO ACTIVE MANAGEMENT.—An individual shall not be treated as a limited partner or limited entrepreneur (within the meaning of section 464(e)(2)) with respect to any entity for any period during which such individual actively participates in the management of such entity.

"(f) SPECIAL RULES.—

"(1) DENIAL OF CAPITAL GAINS TREATMENT FOR PROPERTY IDENTIFIED AS PART OF A HEDGING TRANSACTION.—For purposes of this title, gain from any property shall in no event be considered as gain from the sale or exchange of a capital asset if such property was at any time identified under subsection (e)(2)(C) by the taxpayer as being part of a hedging transaction.

"(2) SUBSECTION (a)(3) NOT TO APPLY TO ORDINARY INCOME PROPERTY.—Paragraph (3) of subsection (a) shall not apply to any gain or loss which, but for such paragraph, would be ordinary income or loss.".

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 1256. Regulated futures contracts marked to market.".

SEC. 504. CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.

Section 1212 (relating to capital loss carrybacks and carryovers) is amended by adding at the end thereof the following new subsection:

"(c) CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.—

"(1) IN GENERAL.—If a taxpayer (other than a corporation) has a net commodity futures loss for the taxable year and elects to have this subsection apply to such taxable year, the amount of such net commodity futures loss—

"(A) shall be a carryback to each of the 3 taxable years preceding the loss year, and

"(B) to the extent that, after the application of paragraphs (2) and (3), such loss is allowed as a carryback to any such preceding taxable year—

"(i) 40 percent of the amount so allowed shall be treated as a short-term capital loss from regulated futures contracts, and

"(ii) 60 percent of the amount so allowed shall be treated as a long-term capital loss from regulated futures contracts.

"(2) AMOUNT CARRIED TO EACH TAXABLE YEAR.—The entire amount of the net commodity futures loss for any taxable year shall be carried to the earliest of the taxable years to which such loss may be carried back under paragraph (1). The portion of such loss which shall be carried to each of the 2 other taxable years to which such loss may be carried back shall be the excess (if any) of such loss over the portion of such loss which, after the application of paragraph (3), was allowed as a carryback for any prior taxable year.

"(3) AMOUNT WHICH MAY BE USED IN ANY PRIOR TAXABLE YEAR.—An amount shall be allowed as a carryback under paragraph (1) to any prior taxable year only to the extent—

"(A) such amount does not exceed the net commodity futures gain for such year, and

"(B) the allowance of such carryback does not increase or produce a net operating loss (as defined in section 172(c)) for such year.

"(4) NET COMMODITY FUTURES LOSS.—For purposes of paragraph (1), the term 'net commodity futures loss' means the lesser of—

"(A) the net capital loss for the taxable year determined by taking into account only gains and losses from regulated futures contracts and positions to which section 1256 applies, or

"(B) the sum of the amounts which, but for paragraph (6)(A), would be treated as capital losses in the succeeding taxable year under subparagraphs (A) and (B) of subsection (b)(1).

"(5) NET COMMODITY FUTURES GAIN.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'net commodity futures gain' means the lesser of—

"(i) the capital gain net income for the taxable year determined by taking into account only gains and losses from regulated futures contracts, or

"(ii) the capital gain net income for the taxable year.

"(B) SPECIAL RULE.—The net commodity futures gain for any taxable year before the loss year shall be computed without regard to the net commodity futures loss for the loss year or for any taxable year thereafter.

"(6) COORDINATION WITH CARRYFORWARD PROVISIONS OF SUBSECTION (b)(1).—

"(A) CARRYFORWARD AMOUNT REDUCED BY AMOUNT USED AS CARRYBACK.—For purposes of applying subsection (b)(1), if any portion of the net commodity futures loss for any taxable year is allowed as a carryback under paragraph (1) to any preceding taxable year—

"(i) 40 percent of the amount allowed as a carryback shall be treated as a short-term capital gain for the loss year, and

"(ii) 60 percent of the amount allowed as a carryback shall be treated as a long-term capital gain for the loss year.

"(B) CARRYOVER LOSS RETAINS CHARACTER AS ATTRIBUTABLE TO REGULATED FUTURES CONTRACT.—Any amount carried forward as a short-term or long-term capital loss to any taxable year under subsection (b)(1) (after the application of subparagraph (A)) shall, to the extent attributable to losses from regulated futures contracts, be treated as loss from regulated futures contracts for such taxable year.

"(7) OTHER DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) REGULATED FUTURES CONTRACT.—The term 'regulated futures contract' means any regulated futures contract (as defined in section 1256(b)) to which section 1256 applies. Such term includes any position treated as a regulated futures contract under section 1256(d)(1).

"(B) EXCLUSION FOR ESTATES AND TRUSTS.—This subsection shall not apply to any estate or trust.".

SEC. 505. CERTAIN GOVERNMENTAL OBLIGATIONS ISSUED AT DISCOUNT TREATED AS CAPITAL ASSETS.

(a) GENERAL RULE.—Section 1221 (defining capital asset) is amended by striking out paragraph (5) and by redesignating paragraph (6) as paragraph (5).

(b) TREATMENT OF AMOUNTS RECEIVED ON SALE OR OTHER DISPOSITION.—Subsection (a) of section 1232 (relating to bonds and other evidences of indebtedness) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN SHORT-TERM GOVERNMENT OBLIGATIONS.—

"(A) IN GENERAL.—On the sale or exchange of any short-term Government obligation, any gain realized which does not exceed an amount equal to the ratable share of the acquisition discount shall be treated as ordinary income. Gain in excess of such amount shall be considered gain from the sale or exchange of a capital asset held less than 1 year.

"(B) SHORT-TERM GOVERNMENT OBLIGATION.—For purposes of this paragraph, the term 'short-term Government obligation' means any obligation of the United States or any of its possessions, or of a State or any political subdivision thereof, or of the District of Columbia which is issued on a discount basis and payable without interest at a fixed maturity date not exceeding 1 year from the date of issue. Such term does not include any obligation the interest on which is not includible in gross income under section 103 (relating to certain governmental obligations.)

"(C) ACQUISITION DISCOUNT.—For purposes of this paragraph, the term 'acquisition discount' means the excess of the stated redemption price at maturity over the taxpayer's basis for the obligation.

"(D) RATABLE SHARE.—For purposes of this paragraph, the ratable share of the acquisition discount is an amount which bears the same ratio to such discount as—

"(i) the number of days which the taxpayer held the obligation, bears to

"(ii) the number of days after the date the taxpayer acquired the obligation and up to (and including) the date of its maturity.".

(c) TECHNICAL AMENDMENTS.—

(1) Subparagraph (D) of section 1231(b)(1) is amended by striking out "paragraph (6)" and inserting in lieu thereof "paragraph (5)".

(2) Subparagraph (B) of section 341(c)(2) is amended by striking out "(and governmental obligations described in section 1221(5))".

SEC. 506. PROMPT IDENTIFICATION OF SECURITIES BY DEALERS IN SECURITIES.

Subsection (a) of section 1236 (relating to dealers in securities) is amended—

(1) by striking out "before the expiration of the 30th day after the date of its acquisition" and inserting in lieu thereof "before the close of the day on which it was acquired (before the close of the following day in the case of an acquisition before January 1, 1982)", and

(2) by striking out "expiration of such 30th day" and inserting in lieu thereof "close of such day".

SEC. 507. TREATMENT OF GAIN OR LOSS FROM CERTAIN TERMINATIONS.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by inserting after section 1234 the following new section:

Sec. 234A. GAINS OR LOSSES FROM CERTAIN TERMINATIONS.

"Gain or loss attributable to the cancellation, lapse, expiration, or other termination of a right or obligation with respect to personal property (as defined in section 1092(d)(1)) which is (or on acquisition would be) a capital asset in the hands of the taxpayer shall be treated as gain or loss from the sale of a capital asset.".

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by inserting after the item relating to section 1234 the following new item:

"Sec. 1234A. Gains or losses from certain terminations.".

SEC. 508. EFFECTIVE DATES.

(a) IN GENERAL.—Except as otherwise provided in this section, the amendments made by this title shall apply to property acquired and positions established by the taxpayer after June 23, 1981, in taxable years ending after such date.

(b) IDENTIFICATION REQUIREMENTS.—

(1) UNDER SECTION 1236 OF CODE.—The amendments made by section 506 shall apply to property acquired by the taxpayer after the date of the enactment of this Act in taxable years ending after such date.

(2) UNDER SECTION 1256(e)(2)(C) OF CODE.—Section 1256(e)(2)(C) of the Internal Revenue Code of 1954 (as added by this title) shall apply to property acquired and positions established by the taxpayer after December 31, 1981, in taxable years ending after such date.

(c) ELECTION WITH RESPECT TO PROPERTY HELD ON JUNE 23, 1981.—If the taxpayer so elects (at such time and in such manner as the Secretary of the Treasury or his delegate shall prescribe) with respect to all regulated futures contracts or positions held by the taxpayer on June 23, 1981, the amendments made by this title shall apply to all such contracts and positions, effective for periods after such date in taxable years ending after such date. For purposes of the preceding sentence, the term "regulated futures contract" has the meaning given to such term by section 1256(b) of the Internal Revene Code of 1954, and the term "position" has the meaning given to such term by section 1092(d)(2) of such Code.

—Strike out section 601 of the bill.

By Mr. LEVITAS:

(Amendments to Conable-Hance; amendment in the nature of a substitute.)

—Add at the end of title I, subtitle A, the following new section:

"(5) TAX REDUCTIONS FOR 1983 AND 1984 ONLY IF CERTAIN CONDITIONS ARE MET.—

"(A) IN GENERAL.—Paragraphs (3) and (4) shall apply if (and only if) the Secretary determines, and publishes such determination in the Federal Register, before October 15, 1982, that all of the following conditions have been met:

"(i) The deficit in the Federal budget for fiscal year 1982 was $37.7 billion or less.

"(ii) The Consumer Price Index for All Urban Consumers, as published by the Bureau of Labor Statistics, for September 1982 was 300 or less.

"(iii) The average investment yield for United States Treasury bills with maturities of 91 days (which were auctioned during the third quarter of calendar year 1982) was 8.5 percent or less.

"(B) TAX REDUCTIONS MAY TAKE EFFECT WITHOUT REGARD TO CONDITIONS IF CONGRESS AND PRESIDENT AGREE.—Notwithstanding subsection (a), paragraphs (3) and (4) shall apply if before November 1, 1982—

"(i) the President determines, and publishes such determination in the Federal Register, that such paragraphs shall apply, and

"(ii) neither House of Congress adopts a resolution indicating that such paragraphs shall not apply.

"(C) SCHEDULES FOR 1983 AND THEREAFTER IF CONDITIONS ARE NOT MET.—If paragraphs (3) and (4) do not apply, the Secretary shall, not later than November 15, 1982, prepare and publish in the Federal Register, the schedules which shall apply for taxable years beginning in 1983 and later. Such schedules shall reflect the tables under section 3402(a) which took effect on July 1, 1982, but as if such tables reflected a 5-percent reduction effective on such date."

Page 8, line 2, strike out "The schedules" and insert in lieu thereof "Except as provided in paragraph (5), the schedules".

Page 11, line 2, strike out "The schedules" and insert in lieu thereof "Except as provided in paragraph (5), the schedules".

Page 19, line 3, strike out "and".

Page 19, line 6, strike out "date.'" and insert in lieu thereof "date, and".

Page 19, after line 6, insert the following:

"(iii) on January 1, 1983, if paragraphs (3) and (4) of section 1(b) does not apply.'"

By Mr. LUKEN:

—After section 102 of the bill, insert the following:

SEC. 104. ADJUSTMENT TO INSURE THAT INFLATION WILL NOT RESULT IN TAX INCREASES.

(a) ADJUSTMENTS TO INDIVIDUAL INCOME TAX RATES.—Section 1 (relating to tax imposed) is amended by adding at the end thereof the following new subsection:

"(f) ADJUSTMENTS IN TAX TABLES SO THAT INFLATION WILL NOT RESULT IN TAX INCREASES.—

"(1) IN GENERAL.—Not later than December 15 of 1984 and each subsequent calendar year, the Secretary shall prescribe tables which shall apply in lieu of the tables contained in subsections (a), (b), (c), (d), and (e) with respect to taxable years beginning in the succeeding calendar year.

"(2) METHOD OF PRESCRIBING TABLES.—The table which under paragraph (1) is to apply in lieu of the table contained in subsection (a), (b), (c), (d), or (e), (which is in effect for taxable years beginning in the preceding calendar year), as the case may be, with respect to taxable years beginning in the following calendar year shall be prescribed—

"(A) by increasing—

"(i) the maximum dollar amount on which no tax is imposed under such table, and

"(ii) the minimum and maximum dollar amounts for each rate bracket for which a tax is imposed under such table,

by the cost-of-living adjustment for such calendar year,

"(B) by not changing the rate applicable to any rate bracket as adjusted under subparagraph (A)(ii), and

"(C) by adjusting the amounts setting forth the tax to the extent necessary to reflect the adjustments in the rate brackets.

If any increase determined under subparagraph (A) is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the next highest multiple of $10).

"(3) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (2), the cost-of-living adjustment for any calendar year is the percentage (if any) by which—

"(A) the CPI for the preceding calendar year, exceeds

"(B) the CPI for the calendar year 1983.

"(4) CPI FOR ANY CALENDAR YEAR.—For purposes of paragraph (3), the CPI for any calendar year is the average of the Consumer Price Index as of the close of the 12-month period ending on September 30 of such calendar year.

"(5) CONSUMER PRICE INDEX.—For purposes of paragraph (4), the term 'Consumer Price Index' means the Consumer Price Index for all-urban consumers published by the Department of Labor.".

(b) DEFINITION OF ZERO BRACKET AMOUNT.—Subsection (d) of section 63 (defining zero bracket amount) is amended to read as follows:

"(d) ZERO BRACKET AMOUNT.—For purposes of this subtitle, the term, 'zero bracket amount' means—

"(1) in the case of an individual to whom subsection (a), (b), (c), or (d) of section 1 applies, the maximum amount of taxable income on which no tax is imposed by the applicable subsection of section 1, or

"(2) zero in any other case.".

(c) PERSONAL EXEMPTIONS.—

(1) GENERAL RULE.—Section 151 (relating to allowance of deductions for personal exemptions) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(2) EXEMPTION AMOUNT.—Section 151 is amended by adding at the end thereof the following new subsection:

"(f) EXEMPTION AMOUNT.—For purposes of this section, the term 'exemption amount' means, with respect to any taxable year, $1,000 increased by an amount equal to $1,000 multiplied by the cost-of-living adjustment (as defined in section 1(f)(3)) for the calendar year in which the taxable year begins. If the amount determined under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10 (or if such amount is a multiple of $5, such amount shall be increased to the next highest multiple of $10).".

(d) RETURN REQUIREMENTS.—

(1) AMENDMENTS TO SECTION 6012.—

(A) Clause (i) of section 6012(a)(1)(A) is amended by striking out the dollar amount and inserting in lieu thereof "the sum of the exemption amount plus the zero bracket amount applicable to such an individual".

(3) Clause (ii) of section 6012(a)(i)(A) is amended by striking out the dollar amount and inserting in lieu thereof "the sum of the exemption amount plus the zero bracket amount applicable to such an individual".

(C) Clause (iii) of section 6012(a)(1)(A) is amended by striking out the dollar amount and inserting in lieu thereof "the sum of twice the exemption amount plust the zero bracket amount applicable to a joint return".

(D) Paragraph (1) of section 6012(a) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(E) Paragraph (1) of section 6012(a) is amended by adding at the end thereof the following new subparagraph:

"(D) For purposes of this paragraph—

(i) The term 'zero bracket amount' has the meaning given to such term by section 63(d).

"(ii) The term 'exemption amount' has the meaning given to such term by section 151(f).".

(2) AMENDMENTS TO SECTION 6013.—Subparagraph (a) of section 6013(b) (3) is amended—

(A) by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount",

(B) by striking out "$2,000" each place it appears and inserting in lieu thereof "twice the exemption amount", and

(C) by adding at the end thereof the following new sentence "For purposes of this subparagraph, the term 'exemption amount' has the meaning given to such term by section 151(f).".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1984.

By Mr. MOORE:

—Strike all of title II, subtitle F, "Treatment of Existing Carryovers of Certain Distressed Industries," beginning on page 150, line 1 through page 156, line 19.

By Mr. PEPPER:

—Paragraph (2) of section 221(b) of the Internal Revenue Code of 1954 (as proposed to be added by section 122 of the bill) is amended—

(1) by striking out clauses (ii) and (iii) of subparagraph (A) and redesignating clauses (iv) and (v) of such subparagraph as clauses (ii) and (iii), respectively, and

(2) by adding at the end thereof the following new sentence: "Such term includes an amount received as a pension or annuity which arises from an employer-employee relationship or from a tax-deductible contribution made to a retirement plan or Individual Retirement Account.".

—At end of title VII, add the following new section:

SEC. 709. BORROWING BY OLD-AGE AND SURVIVORS INSURANCE TRUST FUND FROM THE DISABILITY INSURANCE TRUST FUND OR HOSPITAL INSURANCE TRUST FUND.

Section 201 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(l)(1) If in any month the assets of the Federal old-age and survivors insurance trust fund are insufficient to provide that such trust fund shall have assets equal to or greater than 25 percent of the amount disbursed from that trust fund during the 12 immediately preceding months, the managing trustee may borrow (without interest) from the Federal disability insurance trust fund or the Federal hospital insurance trust fund, for deposit in the Federal old-age and survivors insurance trust fund, an amount not to exceed the difference between the assets of the Federal old-age and survivors insurance trust fund and 15 percent of the amount so disbursed from such trust fund.

"(2) If the assets of the Federal old-age and survivors insurance trust fund in any month equal or exceed 25 percent of the amount disbursed from that trust fund during the 12 immediately preceding months, all amounts that would otherwise thereafter be paid into that trust fund shall instead be paid into the above-mentioned trust fund from which the Federal old-age and survivors insurance trust fund has borrowed sums pursuant to paragraph (1), except so much as shall be required to maintain the assets of the Federal old-age and survivors insurance trust fund at 25 percent of the amount so disbursed, until the loan (or loans) under this subsection are repaid.".

By Mr. RAHALL:

—Paragraph (4) of section 168(b) of the Internal Revenue Code of 1954, as added by section 201 of the bill, is amended by adding at the end thereof the following new sentence: "Subparagraph (B) shall not apply to property described in section 48(1)(17)(A)(ii) with a present class life of 18 years or less."

Subsection (f) of section 168 of the Internal Revenue Code of 1954, as added by section 201 of the bill, is amended by adding at the end thereof the following:

"(8) CERTAIN COAL-RELATED POLLUTION CONTROL EQUIPMENT.—This subsection shall not apply to any property described in section 48(1)(17)(A)(ii)."

Paragraph (11) of section 48(a) of such Code, as added by section 201 of the bill, is amended by inserting before the period "and to any property described in 48(1)(17)(A)(ii)."

Subsection (b) of section 201 of the bill is amended by adding at the end thereof the following new paragraph:

(3) ENERGY PERCENTAGE TO APPLY TO COAL UTILIZATION PROPERTY.—

(A) Subparagraph (A) of section 48(1)(2) is amended by striking out "or" at the end of clause (viii), by inserting "or" at the end of clause (ix), and by inserting after clause (ix) the following new clause:

"(x) coal utilization property,".

(B) Subsection (1) of section 48 is amended by redesignating paragraph (17) as paragraph (18) and by inserting after paragraph (16) the following new paragraph:

"(17) ENERGY PERCENTAGE TO APPLY TO COAL UTILIZATION PROPERTY.—

"(A) COAL UTILIZATION PROPERTY.—The term 'coal utilization property' means public utility property which is—

"(i) a boiler or burner the primary fuel for which will be coal,

"(ii) pollution control equipment required (by Federal, State, or local regulations) to be installed in connection with equipment described in paragraph (1), or

"(iii) coal cleaning equipment.

"(B) SPECIAL RULE.—Paragraph (18) shall not apply to coal utilization property."

By Mr. SAVAGE:

—Strike out subtitle A of title II (relating to expense-method depreciation) and insert in lieu thereof the following:

Subtitle A—Shorter Useful Lives

SEC. 201. 30 PERCENT REDUCTION IN USEFUL LIVES.

(a) IN GENERAL.—Section 167 is amended by adding at the end thereof the following subsection:

"(t) 30 PERCENT REDUCTION IN USEFUL LIVES.—Notwithstanding any other provision of this section, the taxpayer shall be entitled to use a useful life for any property which is 30 percent less than the shortest useful life permitted under—

"(1) subsection (m) for such property, or

"(2) facts and circumstances, if no useful life for such property is prescribed under subsection (m)."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to property placed in service after December 31, 1980.

—Strike out title IV of the bill (relating to estate and gift tax provision).

By Mr. STARK:

—Strike out subsection (c) of section 810 of the bill (relating to effective date for property transferred to employees subject to certain restrictions) and insert in lieu thereof the following:

(c) EFFECTIVE DATE.—The amendment made by subsection (a), and the provisions of subsection (b), shall apply to transfers after July 21, 1981.

H.R. 4260

By Mr. ALEXANDER:

—At the appropriate place in title I insert the following new section:

SEC. TAX REDUCTIONS TAKE EFFECT ONLY AFTER A BALANCED FEDERAL BUDGET ACHIEVED.

(a) GENERAL RULE.—Notwithstanding any provision of this subtitle—

(1) no amendment made by this subtitle shall apply to any taxable year beginning before the calendar year described in subsection (b), and

(2) the amendments made by this subtitle shall apply to taxable years beginning in the calendar year described in subsection (b) and in calendar years thereafter in the same manner as they would have without regard to this section.

(b) YEAR IN WHICH AMENDMENTS TAKE EFFECT.—For purposes of subsection (a), the calendar year described in this subsection is the first calendar year (after 1980) which begins after the close of a fiscal year with respect to which the Secretary of the Treasury determined that there was no deficit in the Federal budget.

By Mr. PHILLIP BURTON:

—Strike from H.R. 4260 (the Conable-Hance substitute to H.R. 4242) title V (tax straddles) in its entirety, and substitute therefore the following language:

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Straddle Tax Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. POSTPONEMENT OF RECOGNITION OF LOSSES, ETC.

(a) GENERAL RULE.—Part VII of subchapter 0 of chapter 1 (relating to wash sales of stock or securities) is amended by adding at the end thereof the following new section:

"SEC. 1092. STRADDLES.

"(a) GENERAL RULE.—In the case of a straddle—

"(1) that portion of any loss with respect to such straddle which exceeds the recognized gain with respect to such straddle shall be treated as sustained not earlier than the close of the balanced period, and

"(2) the running of the holding period for each position which is part of such straddle shall be suspended for the balanced period.

"(b) STRADDLE DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'straddle' means offsetting positions with respect to personal property.

"(2) OFFSETTING POSITIONS.—A taxpayer holds offsetting positions with respect to personal property if there is a substantial diminution of the taxpayer's risk of loss from holding any position with respect to personal property by reason of his holding 1 or more other positions with respect to personal property (whether or not of the same kind).

"(3) PRESUMPTION.—

"(A) IN GENERAL.—For purposes of paragraph (2), 2 or more positions shall be presumed to be offsetting if—

"(i) the positions are customarily treated as offsetting positions (whether or not such positions are called a straddle, butterfly, or any similar name),

"(ii) the aggregate margin requirement for such positions is lower than the sum of the margin requirements for each such position (if held separately), or

"(iii) there are such other factors as the Secretary may by regulations prescribe as indicating that such positions are offsetting.

"(B) PRESUMPTION MAY BE REBUTTED.—Any presumption established pursuant to subparagraph (A) may be rebutted if the taxpayer establishes to the satisfaction of the Secretary that the positions were not offsetting.

(c) BALANCED PERIOD.—

"(1) IN GENERAL.—For purposes of this section, the term 'balanced period' means any period during which the taxpayer holds the straddle plus the 30-day period after the day on which the positions which make up the straddle cease to be offsetting.

"(2) SHORTENING OF 30-DAY PERIOD WHERE TAXPAYER DISPOSES OF ALL POSITIONS.—If, before the close of the 30-day period specified in paragraph (1), the taxpayer disposes of all of the positions which make up a straddle, the balanced period shall be treated as ending on the day on which the taxpayer makes the last such disposition.

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) PERSONAL PROPERTY.—The term 'personal property' means—

"(A) commodities,

"(B) evidences of indebtedness,

"(C) currency, and

"(D) any other type of personal property (other than publicly traded stock which is not commodity substitute stock).

"(2) POSITION.—

"(A) IN GENERAL.—The term 'position' means an interest (including a futures contract or option).

"(B) SUCCESSOR POSITION.—If the taxpayer (within the period beginning 30 days before and ending 30 days after the date of the disposition of a position) acquires a successor position, such successor position—

"(i) shall be treated as the same position as the position to which it succeeds, and

"(ii) shall be treated as held on each day which intervenes between the disposition of the interest which it succeeds and the day on which such successor interest is acquired.

For purposes of the preceding sentence, personal property acquired by the taxpayer pursuant to a futures contract, option, or other interest shall be treated as a successor position to such interest.

"(3) POSITIONS HELD BY RELATED PERSONS, ETC.—

"(A) IN GENERAL.—In determining whether 2 or more positions are offsetting, the taxpayer shall be treated as holding any position held by a related person.

"(B) RELATED PERSON.—For purposes of subparagraph (A), a person is a related person to the taxpayer if—

"(i) the relationship between such person and the taxpayer would result in a disallowance of losses under section 267 or 707(b), or

"(ii) such person and the taxpayer are under common control (within the meaning of subsection (b) or (c) of section 414).

For purposes of clause (i), an individual's family shall consist only of such individual, such individual's spouse, and a child of such individual who has not attained the age of 18.

"(C) CERTAIN FLOW-THROUGH ENTITIES.—If part or all of the gain or loss with respect to a position held by a partnership, trust, or other entity would properly be taken into account for purposes of this chapter by a taxpayer with respect to whom the entity is not a related person, then, except to the extent otherwise provided in regulations—

"(i) such position shall be treated as held by the taxpayer, and

"(ii) the offsetting positions held by the taxpayer shall be treated as held by the entity.

"(4) PUBLICLY TRADED STOCK; COMMODITY SUBSTITUTE STOCK.—

"(A) PUBLICLY TRADED STOCK.—The term 'publicly traded stock' means any stock of a corporation which is regularly traded on an established securities market.

"(B) COMMODITY SUBSTITUTE STOCK.—The term 'commodity substitute stock' means any stock of a corporation 80 percent or more in value of the business and investment assets of which consist of interests in commodities. For purposes of this subparagraph, the term 'business and investment assets' means assets used or held for use in the trade or business, and assets held for investment.

"(e) EXCEPTION FOR HEDGING TRANSACTIONS.—This section shall not apply in the case of any hedging transaction (as defined in section 1256(e)).

"(f) CROSS REFERENCE.—

"For provision requiring capitalization of certain interest and carrying charges where there is a straddle, see section 263(g)."

(b) CLERICAL AMENDMENTS.—

(1) The table of sections for such part VII is amended by adding at the end thereof the following new item:

"Sec. 1092. Straddles."

(2) The heading for such part VII is amended to read as follows:

"PART VII—WASH SALES; STRADDLES".

(3) The table of parts for subchapter O of chapter 1 is amended by striking out the item relating to part VII and inserting in lieu thereof the following:

"Part VII. Wash sales; straddles."

SEC. 3. CAPITALIZATION OF CERTAIN INTEREST AND CARRYING CHARGES IN THE CASE OF STRADDLES.

Section 263 (relating to capital expenditures) is amended by adding at the end thereof the following new subsection:

"(g) CERTAIN INTEREST AND CARRYING COSTS IN THE CASE OF STRADDLES.—

"(1) GENERAL RULE.—No deduction shall be allowed for interest and carrying charges properly allocable to personal property which is part of a straddle (as defined in section 1092(b)). Any amount not allowed as a deduction by reason of the preceding sentence shall be chargeable to the capital account with respect to the personal property to which such amount relates.

"(2) INTEREST AND CARRYING CHARGES DEFINED.—For purposes of paragraph (1), the term 'interest and carrying charges' means—

"(A) interest on indebtedness incurred or continued to purchase or carry the personal property, and

"(B) amounts paid or incurred to insure, store, or transport the personal property.

"(3) EXCEPTION FOR HEDGING TRANSACTIONS.—This subsection shall not apply in the case of any hedging transactions (as defined in section 1256(e))."

SEC. 4. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

"SEC. 1256. REGULATED FUTURES CONTRACTS MARKED TO MARKET.

"(a) GENERAL RULE.—For purposes of this subtitle—

"(1) each regulated futures contract held by the taxpayer at the close of the taxable year shall be treated as sold for its fair market value (and any gain or loss shall be taken into account for the taxable year),

"(2) proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of paragraph (1),

"(3) any gain or loss with respect to a regulated futures contract shall be treated as—

"(A) short-term capital gain or loss, to the extent of percent of such gain or loss, and

"(B) long-term capital gain or loss, to the extent of percent of such gain or loss, and

"(4) if all the offsetting positions making up any straddle consist of regulated futures contracts to which this section applies, sections 1092 and 263(g) shall not apply with respect to such straddle.

"(b) REGULATED FUTURES CONTRACTS DEFINED.—For purposes of this section, the term 'regulated futures contract' means a contract—

"(1) which requires delivery of personal property (as defined in section 1092(d)(1)) or an interest in such property,

"(2) with respect to which the amount required to be deposited and the amount which may be withdrawn depends on a system of marking to market, and

"(3) which is subject to the rules of a domestic board of trade or domestic exchange or of any foreign board of trade or foreign exchange which the Secretary determines has rules adequate to carry out the purposes of this section.

"(c) TERMINATIONS.—The rules of paragraphs (1), (2), and (3) of subsection (a) shall also apply to the termination during the taxable year of the taxpayer's obligation with respect to a regulated futures contract by taking or making delivery or otherwise. For purposes of the preceding sentence, fair market value at the time of the termination shall be taken into account.

"(d) ELECTIONS WITH RESPECT TO MIXED STRADDLES.—

"(1) ALL POSITIONS UNDER MARK TO MARKET.—The taxpayer may elect to have this section apply to all positions of each mixed straddle of the taxpayer in the same manner as if all such positions were regulated futures contracts.

"(2) ALL POSITIONS UNDER SECTION 1092.—The taxpayer may elect to have this section not to apply to all regulated futures contracts—

"(A) which are part of a mixed straddle, and

"(B) which, before the close of the day on which acquired by the taxpayer, are clearly identified as being part of a mixed straddle.

"(3) TIME AND MANNER.—An election under paragraph (1) or (2) shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(4) ELECTION REVOCABLE ONLY WITH CONSENT.—An election under paragraph (1) or (2) shall apply to the taxpayer's taxable year for which made and to all subsequent taxable years, unless the Secretary consents to a revocation of such election.

"(5) MIXED STRADDLE.—For purposes of this subsection, the term 'mixed straddle' means any straddle (as defined in section 1092(b)) if at least 1 (but not all) of the positions which are a part of such straddle are regulated futures contracts.

"(e) MARK TO MARKET NOT TO APPLY TO HEDGING TRANSACTIONS.—

"(1) SECTION NOT TO APPLY.—Subsection (a) shall not apply in the case of a hedging transaction.

"(2) DEFINITIONS.—

"(A) HEDGING TRANSACTION.—For purposes of this subsection, the term 'hedging transaction' means any transaction if—

"(i) such transaction is entered into by the taxpayer in the normal course of the taxpayer's trade or business primarily to reduce risks from price movements of inventory held or to be held by the taxpayer, and

"(ii) before the close of the day on which such transaction was entered into, the taxpayer clearly identifies such transaction as being a hedging transaction.

"(B) INVENTORY.—For purposes of this subsection, the term 'inventory' means property described in paragraph (1) of section 1221.

"(3) SPECIAL RULE FOR SYNDICATES.—

"(A) IN GENERAL.—Notwithstanding paragraph (2)(A), the term 'hedging transaction' shall not include any transaction entered into by a syndicate.

"(B) SYNDICATE DEFINED.—For purposes of subparagraph (A), the term 'syndicate' means any partnership or other entity (other than a C corporation)—

"(i) if at any time interests in such entity have been offered for sale in any offering required to be registered with any Federal or State agency having authority to regulate the offering of securities for sale, or

"(ii) if more than 35 percent of the losses of such entity during any period are allocable to limited partners or limited entrepreneurs.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) C CORPORATION.—The term 'C corporation' means any corporation other than an electing small business corporation (as defined in section 1371(b)).

"(ii) HOLDING ATTRIBUTABLE TO ACTIVE MANAGEMENT.—An individual shall not be treated as a limited partner or limited entrepreneur with respect to any entity for any period during which such individual actively participates in the management of such entity.

"(f) SPECIAL RULES.—

"(1) DENIAL OF CAPITAL GAINS TREATMENT FOR PROPERTY IDENTIFIED AS PART OF A HEDGING TRANSACTION.—For purposes of this title, gain from any property shall in no event be considered as gain from the sale or exchange of a capital asset if such property was at any time identified under subsection (e)(2)(A)(ii) by the taxpayer as being part of a hedging transaction.

"(2) SUBSECTION (a)(3) NOT TO APPLY TO ORDINARY INCOME PROPERTY.—Paragraph (3) of subsection (a) shall not apply to any gain or loss which, but for such paragraph, would be ordinary income or loss."

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 1256. Regulated futures contracts marked to market."

SEC. 5. CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.

Section 1212 (relating to capital loss carrybacks and carryovers) is amended by adding at the end thereof the following new subsection:

"(c) CARRYBACK OF LOSSES FROM REGULATED FUTURES CONTRACTS TO OFFSET PRIOR GAINS FROM SUCH CONTRACTS.—

"(1) IN GENERAL.—If a taxpayer (other than a corporation) has a net commodity futures loss for the taxable year and elects to have this subsection apply to such taxable year, the amount of such net commodity futures loss—

"(A) shall be a carryback to each of the 3 taxable years preceding the loss year, and

"(B) to the extent that, after the application of paragraphs (2) and (3), such loss is allowed as a carryback to any such preceding taxable year—

"(i) percent of the amount so allowed shall be treated as a short-term capital loss from regulated futures contracts, and

"(ii) percent of the amount so allowed shall be treated as a long-term capital loss from regulated futures contracts.

"(2) AMOUNT CARRIED TO EACH TAXABLE YEAR.—The entire amount of the net commodity futures loss for any taxable year shall be carried to the earliest of the taxable years to which such loss may be carried back under paragraph (1). The portion of such loss which shall be carried to each of the 2 other taxable years to which such loss may be carried back shall be the excess (if any) of such loss over the portion of such loss which, after the application of paragraph (3), was allowed as a carryback for any prior taxable year.

"(3) AMOUNT WHICH MAY BE USED IN ANY PRIOR TAXABLE YEAR.—An amount shall be allowed as a carryback under paragraph (1) to any prior taxable year only to the extent—

"(A) such amount does not exceed the net commodity futures gain for such year, and

"(B) the allowance of such carryback does not increase or produce a net operating loss (as defined in section 172(c)) for such year.

"(4) NET COMMODITY FUTURES LOSS.—For purposes of paragraph (1), the term 'net commodity futures loss' means the lesser of—

"(A) the net capital loss for the taxable year determined by taking into account only gains and losses from regulated futures contracts, or

"(B) the sum of the amounts which, but for paragraph (6)(A), would be treated as capital losses in the succeeding taxable year under subparagraphs (A) and (B) of subsection (b)(1).

"(5) NET COMMODITY FUTURES GAIN.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'net commodity futures gain' means the lesser of—

"(i) the capital gain net income for the taxable year determined by taking into account only gains and losses from regulated futures contract, or

"(ii) the capital gain net income for the taxable year.

"(B) SPECIAL RULE.—The net commodity futures gain for any taxable year before the loss year shall be computed without regard to the net commodity futures loss for the loss year or for any taxable year thereafter.

"(6) COORDINATION WITH CARRYFORWARD PROVISIONS OF SUBSECTION (b)(1).—

"(A) CARRYFORWARD AMOUNT REDUCED BY AMOUNT USED AS CARRYBACK.—For purposes of applying subsection (b)(1), if any portion of the net commodity futures loss for any taxable year is allowed as a carryback under paragraph (1) to any preceding taxable year—

"(i) percent of the amount allowed as a carryback shall be treated as a short-term capital gain for the loss year, and

"(ii) percent of the amount allowed as a carryback shall be treated as a long-term capital gain for the loss year.

"(B) CARRYOVER LOSS RETAINS CHARACTER AS ATTRIBUTABLE TO REGULATED FUTURES CONTRACT.—Any amount carried forward as a short-term or long-term capital loss to any taxable year under subsection (b)(1) (after the application of subparagraph (A)) shall, to the extent attributable to losses from regulated futures contracts, be treated as loss from regulated futures contracts for such taxable year.

"(7) OTHER DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) REGULATED FUTURES CONTRACT.—The term 'regulated futures contract' means any regulated futures contract (as defined in section 1256(b)) to which section 1256 applies. Such term includes any position treated as a regulated futures contract under section 1256(d)(1).

"(B) EXCLUSION FOR ESTATES AND TRUSTS.—This subsection shall not apply to any estate or trust."

SEC. 6. CERTAIN GOVERNMENTAL OBLIGATIONS ISSUED AT DISCOUNT TREATED AS CAPITAL ASSETS.

"(a) GENERAL RULE.—Section 1221 (defining capital asset) is amended by striking out paragraph (5) and by redesignating paragraph (6) as paragraph (5).

"(b) TREATMENT OF AMOUNTS RECEIVED ON SALE OR OTHER DISPOSITION.—Subsection (a) of section 1232 (relating to bonds and other evidences of indebtedness) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN SHORT-TERM GOVERNMENT OBLIGATIONS.—

"(A) IN GENERAL.—On the sale or exchange of any short-term Government obligation, any gain realized which does not exceed an amount equal to the pro rata share of the acquisition discount shall be treated as ordinary income. Gain in excess of such amount shall be considered gain from the sale or exchange of a capital asset held less than 1 year.

"(B) SHORT-TERM GOVERNMENT OBLIGATION.—For purposes of this paragraph, the term 'short-term Government obligation' means any obligation of the United States or any of its possessions, or of a State or any political subdivision thereof, or of the District of Columbia which is issued on a discount basis and payable without interest at a fixed maturity date not exceeding 1 year from the date of issue. Such term does not include any obligation the interest on which is not includable in gross income under section 103 (relating to certain governmental obligations).

"(C) ACQUISITION DISCOUNT.—For purposes of this paragraph, the term 'acquisition discount' means the excess of the stated redemption price at maturity over the taxpayer's basis for the obligation.

"(D) RATABLE SHARE.—For purposes of this paragraph, the ratable share of the acquisition discount is an amount which bears the same ratio to such discount as—

"(i) the number of days which the taxpayer held the obligation, bears to

"(ii) the number of days after the date the taxpayer acquired the obligation and up to (and including) the date of its maturity."

(c) TECHNICAL AMENDMENTS.—

(1) Subparagraph (D) of section 1231(b)(1) is amended by striking out "paragraph (6)" and inserting in lieu thereof "paragraph (5)".

(2) Subparagraph (B) of section 341(c)(2) is amended by striking out "(and governmental obligations described in section 1221(5))".

SEC. 7. PROMPT IDENTIFICATION OF SECURITIES BY DEALERS IN SECURITIES.

Subsection (a) of section 1236 (relating to dealers in securities) is amended—

(1) by striking out "before the expiration of the 30th day after the date of its acquisition" and inserting in lieu thereof "before the close of the day on which it was acquired", and

(2) by striking out "expiration of such 30th day" and inserting in lieu thereof "close of such day".

SEC. 8. TREATMENT OF GAIN OR LOSS FROM CERTAIN TERMINATIONS.

(a) General Rule.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by inserting after section 1234 the following new section:

"SEC. 1234A. GAINS OR LOSSES FROM CERTAIN TERMINATIONS.

"Gain or loss attributable to the cancellation, lapse, expiration, or other termination of a right or obligation with respect to personal property (as defined in section 1092(d)(1)) which is (or on acquisition would be) a capital asset in the hands of the taxpayer shall be treated as gain or loss from the sale of a capital asset."

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by inserting after the item relating to section 1234 the following new item:

"Sec. 1234A. Gains or losses from certain terminations."

SEC. 9. EFFECTIVE DATES.

(a) IN GENERAL.—Except as otherwise provided in this section, the amendments made by this Act shall apply to property acquired by the taxpayer after May 5, 1981, in taxable years ending after such date.

(b) IDENTIFICATION REQUIREMENTS.—

(1) UNDER SECTION 1236 OF CODE.—The amendments made by section 7 shall apply to property acquired by the taxpayer after the date of the enactment of this Act in taxable years ending after such date.

(2) UNDER SECTION (e) (2) (A) OF CODE.—Clause (ii) of section 1256(e)(2)(A) of the Internal Revenue Code of 1954 (as added by this Act) shall apply to property acquired by the taxpayer after December 31, 1981, in taxable years ending after such date.

(c) ELECTION WITH RESPECT TO PROPERTY HELD ON MAY 5, 1981.—If the taxpayer so elects (at such time and in such manner as the Secretary of the Treasury or his delegate shall prescribe), the amendments made by this Act shall also apply to regulated futures contracts or personal property held by the taxpayer on May 5, 1981, effective for periods after such date in taxable years ending after such date. For purposes of the preceding sentence, the term "regulated futures contract" has the meaning given to such term by section 1256(b) of the Internal Revenue Code of 1954, and the term "personal property" has the meaning given to such term by section 1092(d)(1) of such Code.

(d) NO CARRYBACK TO YEARS ENDING BEFORE MAY 5, 1981.—No amount shall be allowed as a carryback under section 1212(c) of the Internal Revenue Code of 1954 to any taxable year ending on or before May 5, 1981.

—Strike from H.R. 4260 (the Hance-Conable substitute to H.R. 4242) sections 601, 602, 603, and 611 of title VI, subtitles A and B, entitled "ENERGY PROVISIONS."

Strike from H.R. 4242, some or all of the sections of title VI, subtitle A, (sections 601, 602, 603, 604 and 605) entitled "CHANGES IN THE WINDFALL PROFIT TAX."

—Strike from H.R. 4260 (the Conable-Hance substitute to H.R. 4242) "SECTION 402, REDUCTION IN MINIMUM RATES OF TAX."

Strike from H.R. 4242 "SECTION 402, REDUCTION IN MINIMUM RATES OF TAX."

SENATE — *Friday, July 24, 1981*

(Legislative day of Wednesday, July 8, 1981)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

O give thanks to the Lord, for He is good; His steadfast love endures forever.—Psalm 118: 1.

We thank Thee, Lord, for the physical, mental, and emotional energy which made it possible for the Senate to engage in the intensely demanding work of this past week. We thank Thee for the unity of the Senate despite the great differences emerging in debate and negotiation. We thank Thee for the good will of honorable men and women who are committed to the good of all people and pursue it relentlessly. We thank Thee for wise and patient leadership who guide their parties to just and equitable decisions. We thank Thee for the tireless labors of dedicated office and Senate staffs who give indispensable support to the legislative process.

Gracious Father, help all who have worked so hard this week to give attention to their personal health and family relationships. Though responsibility remains heavily upon them, may they make time to relax and rest and give themselves to their spouses and children.

In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there is a great amount of routine business to be transacted, but I understand that we are not prepared to do it at this time. I will provide a time for morning business, if the Senate will consent, later in the day, to do those things which have accumulated.

Mr. President, there are two special orders for the recognition of Senators today. Is that correct?

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. And a period for the transaction of routine morning business, with the resumption of House Joint Resolution 266 to commence at 10 a.m. Is that correct?

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. In order to conserve time, then, and to provide an opportunity for other Senators to speak, in addition to the Senators recognized under special orders, I yield 5 minutes to the Senator from Kansas.

Mrs. KASSEBAUM. I thank the majority leader.

TAXES AND HIGH INTEREST RATES

Mrs. KASSEBAUM. Mr. President, I wish to speak for a few minutes on a matter of great concern to us, as we have been debating the tax bill this week, a bill which in many ways is for all seasons and, in the matter of the House, is still up for the highest bidding.

I believe that the chairman of the Finance Committee has guided this bill through this Chamber with extraordinary skill. However, there are two issues which I believe are related and of great concern. One is high interest rates, which we focus on periodically in the Senate Chamber. But I think that high interest rates and taxes share some common characteristics. They are too high and they are not fair. They also have interrelated economic impacts.

It is argued that interest rates must remain high in order to bring inflation down and that some taxes must come down in order for productivity to increase.

There are academic cases to be made for this, but economic policy right now is simply too important to be left solely to the economists. Some measure of commonsense and equity must be taken into account.

It seems clear that whatever beneficial anti-inflation effect has been gained from high interest rates is being offset by the devastating impact on select segments of the economy. Any farmer, homebuilder, or auto dealer can attest to the economic slowdown resulting from tight money interest rates that have become legalized usury.

For many, the term "slowdown" is a cruel understatement. It is the virtual depression in these economic sectors that is producing the nationwide statistical improvement in inflation rates.

In fact, that paper benefit is more apparent than real. In any event, beating inflation at the cost of the destruction of these small entrepreneurs is not my idea of good policy.

The tight money attack on inflation cannot continue much longer when farmers cannot get operating loans, but an aggregate line of credit for big business mergers can total $40 billion in a single week. The sheer unfairness of that situation should, and I believe will, ultimately require the independent Federal Reserve Board to capitulate in its insistence on tight money. As one who has felt that monetary policy should be given a chance to work, and I strongly do believe that, I am now serving notice that I must be firmly opposed to this ruinous experiment.

Unlike the inequity of interests rates, which essentially flows from the diverse nature of individual business practices, the unfairness of the tax system stems from the very design of that policy. The complexity of the tax code is not an accident. It has resulted from years of using and designing the tax law to shape social and economic policy through a confusion of credits, exemptions, deductions, and an ever-growing list of what has become known simply as "loopholes."

Untangling the tax code would be a political nightmare. Every tax break has a constituency and a justification. Almost no credit, exclusion or exemption can be identified as malevolent. Who can be against the interest deduction for home mortgages or charitable contributions? Some loopholes are less defensible, of course, but all of them are premised on accomplishing some presumably good purpose. Taken together, however, they are bad policy. They erode respect and confidence.

Whether people consent to be governed depends in large part on their belief in the fairness of government's demands upon them. The complexity and intentional unequal treatment of our tax code engenders an understandable contempt of the system. Every special provision pushes general rates higher and encourages other special provisions. There is a growing sense that public values are being subordinated to the self-centered tactics of tax manipulation. Financial gain is no longer a mark of distinction, but rather has become suspect. The very fabric of our self-respect and the social contract is weakened.

What is needed is a massive simplification of the tax law. Most of us in Congress know that. Unfortunately, few of us understand the urgency of that need. If we do not fundamentally reform our tax laws in a way that restores popular respect for the system, I fear we will unravel the already frayed thread of public confidence.

As we listen to economic theorists propound their strategies of monetary and fiscal policy—of interest rates and taxes—it is our duty in Congress to remember the context of this debate. In our democracy the people, through their

representatives, seek a broader perspective. Our economic conditions cannot be allowed to obscure the uniquely American principle of fairness. As we fashion our policies we must temper them with equity or we will give sustenance to much graver, though less measurable, troubles ahead.

Thank you, Mr. President.

Mr. PROXMIRE. Mr. President, will the Senator from Kansas yield briefly?

Mrs. KASSEBAUM. I am happy to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank my good friend from Kansas for a superlative statement. I think it is about time we debate monetary policy and high interest rates, and I think the statement made by the distinguished Senator from Kansas is most constructive and helpful.

It is a terrific problem: What can we do? What can we do to see that farmers and small businessmen get access to the credit markets when we see these enormous corporations borrowing billions of dollars for some takeover at the same time.

I think the Senator from Kansas asked a very appropriate question. We had Paul Volcker before our committee 2 days ago, and Mr. Volcker, I think, is doing an heroic job under very tough circumstances and suffering, I think, a great deal of unfair criticism, but at the same time we do face this dilemma: The situation in which high interest rates are impeding our economy, and at the same time we have enormous vacant capacity, growing unemployment, a homebuilding industry that is flat on its back, an auto industry that is in very serious trouble, primarily because of high interest rates.

So I think we do need a debate and discussion of this, and I think the Senator from Kansas made a very constructive beginning in that direction.

I thank her.

Mrs. KASSEBAUM. Mr. President, I thank the Senator from Wisconsin. I join him in saying that I do think Chairman Volcker has certainly led the Federal Reserve Board with extraordinary heroism under growing criticism, but I think, as the Senator from Wisconsin points out, we are in many ways dealing with a tax bill which may well compound rather than alleviate the high interest rates under which we have been operating.

I thank the Senator.

Mr. President, I yield back any further time that I have.

Mr. BAKER. Mr. President, I yield any time I have remaining to the Senator from California.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. SPECTER). The Senator from California, the assistant minority leader, is recognized.

Mr. CRANSTON. Mr. President, the minority leader yielded such time as he might have remaining to me, and I yield 2 minutes to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank my good friend, the minority whip.

A HISTORIC OPPORTUNITY

Mr. PROXMIRE. Mr. President, in his latest book, "Infiltration," Albert Speer, Hitler's onetime Minister of Armaments, looks back to the years when he daily authorized the torture of forced laborers. Speer writes:

> I hid my conscience behind the countless problems that I had to settle at such times.

Mr. President, when difficult moral questions arise, there will always be day-to-day problems to hide behind. At such times it will always be easier to avoid the hard choices. But by ignoring an issue like the Genocide Treaty we commit a crime of omission—an easy crime, a quiet crime, but a crime no less worthy of blame.

Our moral responsibility may be diluted—but it does not disappear. We still must share a little of the guilt for each instance of alleged genocide, whether in Cambodia, Uganda, or elsewhere. Washing our hands of the problem does not remove the stain.

Mr. Speer writes of an "ethical hardening" that became prevalent under Hitler, and which still exists today, going beyond any one ideology or any specific regime. I hope that such hardening has not advanced so far that it numbs us to the sufferings of those victims of genocide abroad.

It is not necessary to find Albert Speer an admirable figure in order to acknowledge that he has, in recent years, tried to come to terms with his past. Mr. President, I ask that this Senate come to terms with the present and ratify the Genocide Convention.

I thank my good friend, the minority whip.

ORDER OF BUSINESS

Mr. CRANSTON. Mr. President, may I ask how much time remains on behalf of the majority and minority leaders?

The PRESIDING OFFICER. The time of the majority leader has expired. The Senator has 3 minutes and 8 seconds remaining.

Mr. CRANSTON. I yield back that time.

TIME OF SENATOR THURMOND IS VITIATED

Mr. President, I understand the distinguished President pro tempore, Senator THURMOND, wishes his time vitiated, so I will now proceed with my special order.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from California is recognized.

JAMES WATT, THE EXTREMIST, THE RADICAL, THE CHAMPION OF NARROW SPECIAL INTERESTS

Mr. CRANSTON. Mr. President, as a Westerner and as a Californian, I share the anger felt by so many people by the policies of this Nation's 43d Secretary of the Interior, James Watt. I voted against Mr. Watt's confirmation. Still I expressed the hope that once confirmed he would be transformed by his elevation to the Cabinet, that he would shake off his parochial, philosophical, and partisan biases, as some past nominees have done, and carry out his responsibilities according to the highest standards of the public good.

I grew up with a view of the foothills of the Coast Range, south of San Francisco, and drew into myself at an early age that special affection Californians have for the beauty of landscape that surrounds and sustains them.

Secretaries of the Interior are charged with custodial care for hundreds of millions of acres of public land. They must see to it that some of the resources on and in those lands are used now, but that something of value is saved for generations to come.

The post of Secretary of the Interior calls for a skilled touch to maintain a balance between many competing and conflicting interests. But I must conclude, 6 months into his term of office, that Mr. Watt has exceeded even the worst case fears of his harshest critics.

Mr. Watt, in less than a half-year, has grossly tipped the scales in favor of those lumber and mining interests, big oil companies, big ranchers, and short-term profiteers who covet the West for their own purposes without regard to environmental values.

The National Wildlife Federation, the country's largest and perhaps most conservative environmental organization, declares that this Secretary has no conservation program but only a master plan for resource exploitation.

Mr. Watt recently told people who operate businesses in our national parks:

> We will use the budget system to be the excuse to make major policy decisions.

We now know what policy decisions he has in mind. His hidden agenda is out in the open.

The Watt budget would stop additional parkland purchases, including acquisitions in areas like Santa Monica Mountains that have been specifically authorized by Congress.

His policies would cripple real enforcement over strip mining, and would end effective protection and identification of endangered species. They would eliminate the cost-efficient Youth Conservation Corps and gut the popular urban parks program.

By his excessive rhetoric and reckless actions, Mr. Watt has trampled what many of us cherish as an article of faith and commonsense: that the land is not a grab bag of resources but an interweaving of life with man himself as part of the fabric.

Californians are not the only people aroused by the Secretary's appalling indifference to the beauty and adventure of the West.

Americans in other States are also justly proud of their natural surroundings. They too have had enough of Mr. Watt's nature-baiting and confrontation tactics in just 6 months to last a lifetime.

Still it is true in California—the birthplace and headquarters of much of the conservation movement in America—that feelings toward this Secretary and his policies run especially deep.

It is a California tradition to feel uniquely challenged by beauty and to feel a new passion for life inspired by the magnificent setting in which we find ourselves.

Our history and identity as Californians are inseparable from the lure of sunlight, blue water, the pine and cypress-lined coast, mountain meadows, and great silent deserts.

We have learned to love and respect the web of natural gifts that support the California ideals of health, outdoor life, physical and spiritual renewal.

However, not everyone who came to California was interested in gentle pursuits.

Writing about California in the last half of the 19th century, the philosopher Josiah Royce explained:

> You get a sense of power from these wide views, a habit of personal independence from the contemplation of a world that the eye seems to own.

The exploiters were not content to own California with their eyes alone. The sense of power that came from wide horizons was often turned against the land.

During California's gold rush much of the mother lode became a wasteland of muddied rivers and streams, caved-in hillsides, heaped debris, and tree stumps.

Our history remembers when much of California was overlogged, overroaded, and overbuilt in a headlong scramble to cash in on the State's lush promise.

In the late 19th century the mining regions of the State reminded poet and essayist Bayard Taylor "of a princess, fallen into the hands of robbers, who cut off her fingers for the sake of the jewels she wears."

In the absence of a conservation ethic scarcely anyone was particularly upset when, in 1853, five Americans spent 25 days in the Calaveras Grove cutting down a 3,000-year-old Sequoia that was 302 feet high and 96 feet in circumference.

They polished the stump into a dance floor and hollowed out the fallen trunk into a bowling alley.

Eventually such mindless destruction gave rise to a new California attitude. It held that life is to be savored, not just compulsively gotten through.

And since nature is the most obvious and overwhelming fact of life in California, it is something to be nurtured rather than to be exploited.

From John Muir to Ansel Adams, with many in between, California has produced a legion of gifted individuals who have spread the conservation ethic beyond the Pacific slope.

In the 1860's a group of Californians led by Frederick Law Olmstead—who later planned the Capitol Grounds as well as Central Park in New York and the Stanford University campus—successfully persuaded Congress and President Lincoln to give over to California a huge tract of land including Yosemite Valley and the Mariposa big trees to protect against commercial exploitation for all times.

It was the first major donation of public domain land for Federal park purposes—the birth of the national park idea.

Yellowstone became the first official national park in 1871, but it was the addition of Yosemite and Sequoia Parks in California that provided real momentum to the establishment of a national park system.

Theodore Roosevelt, a Republican, was our great conservation President, who did much to promote the idea of national parks. But it was Democrat Woodrow Wilson who finally signed the legislation in 1916 that established the national park system.

Wilson's Secretary of the Interior was Franklin Lane, a Californian. Lane received a letter from a prominent businessman and former classmate at the University of California, Steven Mather, who was distressed by poor management of Yosemite and Sequoia Parks.

Secretary Lane invited his former UC classmate to come to Washington, D.C., to improve the situation as the first director of the National Park Service. Mather was succeeded in that office by another Californian, Horace Albright, who also had played a key role in the legislation which founded the parks system.

Newton Drury, also a Californian, founded the bipartisan Save the Redwoods League in 1910 and became the Park Service's fourth national director in 1940.

William Kent, a Republican Congressman from California, pushed for a national park system and donated a redwood grove in Mill Valley which became Muir Woods National Monument.

The conservation movement in California was embodied in others besides politicians and government officials. In 1892 California citizens of varying political faiths and backgrounds formed the Sierra Club as a mutual expression of this new attitude. According to historian Kevin Starr the club's founding "attested to the fact that many Californians of a very fine sort were in dialogue with the environment and wanted the premises of their conversion shared with others and preserved for the future. Americans in California, many of them at least, came to recognize along with John Muir that in the wilderness was strength and sanity and healing."

Had James Watt been Interior Secretary in the 1890's no doubt he would have blasted these pioneer conservationists as "extremists."

He probably would have seen these Californians as pursuing "narrow special interests," engaged in a "greedy land grab," depriving honest loggers and hydraulic miners from a chance to "develop" the State.

That is how he has described the legitimate heirs of the conservation pioneers, today's environmentalists in California and elsewhere.

Who is the extremist? Who is out of sync with a long and honorable bipartisan tradition of care for the land?

In my opinion it is Mr. Watt who is the extremist, the radical, the champion of narrow special interests. For him to apply those labels to men and women who treasure the environment is a gross distortion of California history.

Let us look at what Mr. Watt has done and plans to do and let us see his record in a California context, because that is where the weight of this man's excesses have been particularly damaging.

Secretary Watt proposes to lease to energy companies very nearly the entire Outer Continental Shelf of the United States.

Mr. Watt wants to lease 200 million acres each year on the OCS amounting to nearly 1 billion acres over the next 5 years. For comparison, a total of 43 million acres have been leased for energy development since 1954.

In California Mr. Watt restored to lease sale 53 the possibility of oil and gas drilling in four northern California offshore basins which the previous Secretary of the Interior had deleted entirely. The coastal areas that are affected comprise some of the most spectacular and unspoiled shoreline in the Nation.

Development of the minuscule amount of energy assumed to be in these basins would imperil the entire marine and coastal environment offshore such breathtaking and spectacular areas as Big Sur, Mendocino, Bodega, and Point Reyes.

The Eel River Basin off the Humboldt and Del Norte County coasts is one of the world's most productive fishing grounds. Nearly half of all California's Dungeness crab catch comes from this basin.

Secretary Watt with this one action alienated California's fishing and shipping industries, recreation and tourism businesses, environmental groups, Governor Brown, and virtually every California Member of Congress, and every State, county, and municipal official—Democrat and Republican—who represent the State.

In addition, he has attempted to lease—over the objection of most of those I just mentioned and in apparent violation of Federal law—31 environmentally sensitive tracts in the northern end of the Santa Maria Basin off San Luis Obispo and Santa Barbara Counties.

And to what end? Government geologists estimate that 80 percent of the oil and gas in lease sale 53 could be obtained by limiting drilling to the lower half of just the Santa Maria Basin where environmental risks are minimal.

It is estimated that all the oil in the four northern basins would supply the Nation for about 11 days—provided it could be extracted and piped ashore, and there is serious question if that is feasible.

The Reagan administration, in an attempt to regain credibility in California, has stated that the President—not Secretary Watt—will make the final determination whether to proceed with leasing in the four northern basins.

The irony is that most of the oil and gas could have been obtained in a fraction of the area with relatively little risk to the environment.

Secretary Watt could have avoided incurring the wrath of so many people con-

cerned with the scenic and economic values of the California coast.

Why did he not do so?

Perhaps because Mr. Watt is seeking to prove a point that is generally lost on most of us. Maybe he wants to show that he can beard the lion of a bipartisan environmental movement in its own den and get away with it.

On the offshore leasing issue and on others that directly affect California, Mr. Watt's extreme positions remind me of what George Santayana said about fanaticism: That it consists in redoubling your efforts when you have forgotten your aim.

Look at Mr. Watt's butchery of the Land and Water Conservation Fund which he once called one of the most effective preservation and conservation programs in America. That is what he said as a nominee for Secretary of the Interior.

Congress authorized $900 million annually from the fund for parkland acquisitions and for matching grants to State and local governments for their own park and recreation projects.

Once he was confirmed in his job, however, Mr. Watt set about slashing the fund from an authorized $900 million a year down to $45 million—a phase-out figure to cover obligatory court awards and minor administrative costs.

His slashing of the fund will delay completion of the Golden Gate National Recreation Area and the Channel Islands, and saddle U.S. taxpayers with higher future costs. His action was a deliberate devastating move to wipe out plans for a 70,000-acre park in the Santa Monica Mountains.

Perhaps there is not contradiction here. Perhaps Mr. Watt sincerely believes this fund is the most effective preservation and conservation program in America and, therefore, he is against it.

As a result of his antagonism to this program there are authorized parks and recreation areas around the Nation that will be nothing more than boundary markings on paper without the buying power of the Land and Water Conservation Fund.

In California this means that years of painstaking efforts by private citizens and government officials to plan a 70,000-acre park in the Santa Monica Mountains of Los Angeles and Ventura Counties may have been in vain.

Some $35 million requested by the Park Service for acquiring key land parcels in fiscal 1982 will not be forthcoming if the Secretary has his way.

Mr. Watt's moratorium on park acquisition brought a halt to negotiations to obtain these lands for the public.

His actions have accelerated the scramble to develop this area for private homes, subdivisions and businesses.

Since the Santa Monica Park was authorized by Congress in 1978, local governments have received applications for building permits for nearly 3,000 homes in this area. More than a third have been approved.

Just since May of this year applications for another 1,500 housing units have been received and 372 building permits issued.

Construction has not yet begun. The Santa Monica Mountains are still open space. As yet it still could be a high quality park and recreation area. But with every day that Federal land acquisition remains frozen, the prospects grow dim for providing a near-at-hand wildlands preserve for the people of the Los Angeles basin.

Because of what Secretary Watt has done to the Land and Water Conservation Fund additions to the Golden Gate National Recreation Area and to the Channel Islands will be delayed, at best, therefore saddling taxpayers with higher future costs.

Secretary Watt says he would rather spend money to maintain facilities at existing parks properly. No one questions the need for maintenance and upgrading of present park resources. But until Mr. Watt appeared on the scene no one in a position of responsibility in Government suggested that money should be spent on maintenance instead of on expanding and acquiring new parks.

We desperately need both.

America's proud national parks are more popular—and more crowded—than ever before.

As gasoline becomes more expensive and more precious we must provide national park preserves closer to where the bulk of Americans live—in urban areas.

In terms of use these are the most valuable wildlands in America. As more and more Californians year after year escape urban crush and seek temporary respite it is irresponsible to draw an arbitrary line and say: No more parks!

But Mr. Watt thinks there are too many urban parks in the care of the Federal park service now. He scorns them as "playgrounds" and wants them deauthorized by Congress.

If Mr. Watt thinks little of parks that are near at hand he is contemptuous of the classic rugged and remote wilderness areas that since 1964 have been preserved by the Federal Government in their natural state.

Mr. Watt has generally taken a dim view of pristine wilderness, suggesting that mining and oil drilling might satisfactorily be allowed in areas being considered for wilderness designation.

In a memorandum to his Assistant Secretaries he listed what he called "open wilderness areas" as a major goal of his Department.

I do not know exactly what Mr. Watt means by that phrase. I do not know if anyone knows its true meaning. But if Mr. Watt means to open wilderness areas to industrial uses, the term wilderness as it has been understood, at least since 1964 in this country, will have lost all meaning.

Californians love the desert. In fact, we have learned in the past few years that they may be loving it to death.

Five years ago Congress enacted a law I sponsored in the Senate to formulate a land use plan for some 12 million acres of federally owned desert lands in California.

The Bureau of Land Management with the assistance of the California Desert Advisory Committee held numerous public hearings and learned much about the harm that off-road vehicles do to the thin crust that covers the desert, and to the plants and animals that depend on that crust for their survival.

The plan the BLM developed after years of public meetings and negotiations with interested parties does not forbid motorcycles and dune buggies from the desert. It does provide certain areas for off-road vehicle recreation.

Mr. Watt, without benefit of a single hearing, urged the President to rescind existing requirements that ORV's be controlled.

At present the Bureau of Land Management must restrict ORV's unless it can be shown that they can be operated without damage to the environment. If this order is revoked, BLM managers will have to seek approval for restricting ORV's on a case-by-case basis.

In the meantime there could be irreparable damage to the fragile desert environment.

The desert does not possess the regenerative powers of less arid land. Trails left by burros leave their imprint for decades. Tank tracks are still visible in the Mojave Desert where Gen. George Patton conducted desert warfare maneuvers 40 years ago.

There is still time to save those portions of the California desert that should be saved, and to use those that should be used.

The Bureau of Land Management has recommended that 2.1 million acres in 45 separate locations in the California desert be studied for wilderness designation.

But between Mr. Watt's policies for mining and drilling in and around wilderness study sites and his effort to revoke restrictions on off-road vehicles, it will be a hard fight indeed before Californians see a new wilderness area designated in their desert lands.

We must be concerned for the future—even if James Watt is not.

What will become of Death Valley, one of the most desolate and hauntingly beautiful places on Earth?

Legislation that I cosponsored in 1976 brought a temporary halt to surface mining for talc and borates in the national monument and in five other units of the national park system that had been left open to mining. The moratorium established by that law now has expired. The Secretary of the Interior will decide whether to acquire for the public the scenic areas around Zabriskie Point and Gower Gulch or to yield to claims that these vistas should be destroyed for their mineral wealth.

On which side will Mr. Watt exert the power of his important office?

The decisions of any Secretary of the Interior call for a skilled touch to maintain a balance between competing and often conflicting interests on public lands.

Some say the quality of Mr. Watt's custodial sensitivity was best displayed in a recent speech to the business interests that operate concessions inside the national parks.

This was the speech that Nathaniel Reed, a Republican Assistant Secretary of the Interior under Presidents Nixon

and Ford, called, "surely one of the most fawning, disgusting performances ever given by a Secretary of the Interior. He was so eager to please that he all but gave away the park system."

Mr. Watt extended an open invitation to concessioners to propose commercial development schemes for the parks, including cutting themselves in for a greater role in those functions traditionally performed by Park Service rangers and personnel.

This too carries a special resonance for Californians. Many of us still remember that a park commissioner embarked on filming a television series a few years ago and found it necessary to try to improve on nature by painting some of the rocks in Yosemite Park to provide better contrast for the TV screen.

Mr. Watt's generous invitation to concessioners can be expected to revive other plans for building aerial tramways and cog railways in the most scenic areas of Yosemite, Sequoia, and other national parks.

I voted against Mr. Watt's confirmation. In a careful study of his background, and from his testimony before the Senate committee, I could find nothing to reassure Americans who support land preservation and conservation that Mr. Watt would protect the public lands for present and future generations.

Still I express the hope in my speech cpposing his nomination that once confirmed he would be transformed by his elevation to the Cabinet—that he would shake off parochial, philosophical, and partisan biases as some past nominees have done and carry out his responsibilities according to the highest standards of the public good.

It gives me no pleasure to conclude that 6 months into his term of office Mr. Watt has exceeded even the worst-case estimate of his harshest critics.

He proclaimed a good neighbor policy toward State and local government in the West. But his every official act toward California turns his professed policy into a sad joke.

He reopened considerations of OCS drilling off California without consulting State officials. Then he had the temerity to suggest he was acting to give Governor Brown an opportunity to express himself on this issue though Jerry Brown has been firmly and on record, repeatedly, in opposition to drilling on the north coast.

Given authority to manage air quality over the Outer Continental Shelf, he has promulgated regulations that will permit development to occur that will substantially retard California's vital, long-term effort to achieve cleaner air.

He has revoked the designation of two California coastal marine sanctuaries in order to open those areas for previously banned oil and gas drilling.

He has instructed the Park Service to hold public hearings in California with a view toward repealing the ban on snowmobiles in Lassen, Sequoia/Kings Canyon and Yosemite National Parks.

In thought, word and deed, Mr. Watt has played out his role of Interior Secretary as puppet of the exploiters and the destroyers, with flourishes that remind Californians of those loggers who made a dance floor and a bowling alley out of a 3,000-year-old tree.

His proposals do not come from the mainstream of diverse Americans political views, but from an antigovernment bias so primitive that for awhile I had trouble believing Secretary Watt was serious about them.

Six months in office have proved he is deadly serious.

His policies are reckless and irresponsible. They reflect a radical reversal of longstanding bipartisan California tradition of love and respect for the land that includes probably as many Republicans as Democrats—yes, in some cases even Ronald Reagan.

Most of the developers of our national resources—the oil, timber, and mining interests—are selective in their opposition to park development and protective land use policies. Not Mr. Watt.

Secretary Watt lacks even the sophistication of the exploiters. His policies are more than capricious and irresponsible—they are a radical reversal of a longstanding California bipartisan tradition of love and respect for the land.

Mr. Watt misses the point when he excoriates environmentalists. What he is attacking in California is not something cooked up in the 1970's or 1960's by well-to-do Bohemians. It is a very old and honored tradition in California to identify with the outdoors and to treasure the intricately interrelated web of nature that supports human life and all else.

The California adherents to this philosophy number in multiple millions. They probably include as many Republicans as Democrats. And for Mr. Watt's enlightenment, I would like to list just a few of those Republicans: Mather, Albright, and Kent, whom I have mentioned, Hiram Johnson, Earl Warren, Robert Gardner Sproul, and more recently Ike Livermore, William Penn Mott, former Congressman and Ambassador Bill Maillard, former Senator Tom Kuchel, Dr. Ed Wayburn, and yes, in some cases, Ronald Reagan.

Then-Governor Reagan vetoed the Dos Rios Dam despite opposition from the water lobby. He supported wild and scenic river designations and he greatly increased acreage in the State parks.

I wish President Reagan had nominated someone other than Mr. Watt for Interior—someone who would have been both closer to the President's own feelings toward the outdoors and closer in spirit to the traditional California attitude toward the environment.

I have concentrated here on Secretary Watt's impact on my State, California. In the coming weeks I will be looking at what his policies are doing to public lands and public expectations in other States and in our country as a whole.

I am not alone in keeping a watch on Mr. Watt. People all over America have had enough of Mr. Watt's nature-baiting and confrontation tactics. They clamor for his removal.

The Los Angeles Times recently editorialized:

Try as he may to force the lock on so much of America's protected public lands, Watt is not likely to break the conservation ethic that put those areas under lock in the first place. But he could do a lot of damage in that time. He must be stopped.

As a Westerner and Californian who loves the land and reveres man's proper role in the natural scheme of things, I want Mr. Watt stopped. Now.

Mr. President, I yield back whatever time remains, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, is the Senate in morning business?

The PRESIDING OFFICER. There has been no order for morning business yet.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may proceed as in morning business for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE AFGHAN RESISTANCE FIGHTS ON

Mr. ROBERT C. BYRD. Mr. President, the New York Times of July 23 contains an article entitled "Three-Day Battle in Kabul Suburb Called One of Biggest for Afghans." The report describes a major clash between the Afghan freedom fighters and Soviet and Afghan Army units just outside Kabul.

While it is difficult to obtain detailed information on much of what occurs inside Afghanistan, even the Soviet-dominated Karmal regime cannot hide evidence of the battle that occurred last week near Kabul.

The clash, as the Times report makes clear, was hard on the Soviets and their Afghan Army clients. The rebels once again fought bravely against very heavy odds, and apparently inflicted several hundred casualties. Sadly, several hundred Afghan civilians may also have died during the Soviet attacks.

This battle shows that the will and spirit of the free Afghan people cannot be broken. They are at the point of the Soviet dagger, where tough talk is meaningless, and the price of liberty is often life itself. They deserve the help of freedom-loving countries and the admiration of all.

I ask unanimous consent that the article be inserted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THREE-DAY BATTLE IN KABUL SUBURB CALLED ONE OF BIGGEST FOR AFGHANS

(By Michael T. Kaufman)

NEW DELHI, July 22.—Three days of fighting around a Kabul suburb last week were described here today in Western diplomatic reports as some of the fiercest and costliest fighting near the capital since the onset of Afghanistan's guerrilla war and the arrival of Soviet troops.

The reports agreed that the fighting had centered on Paghman, 16 miles northwest of

Kabul, once a community of summer villas belonging to the rich and favored classes. More recently the town and the hills around it sheltered groups of guerrillas raiding Soviet and Afghan Government positions.

The Western sources said that, on July 14, after warning civilians to evacuate their homes, Soviet and Afghan forces began a clearing operation involving artillery shelling and rocketing from helicopter gunships. Civilian casualties were said to have been high and the diplomats told of hearing from people who returned to look for survivors that in some places bodies were stacked "like firewood."

CADETS' FUNERAL SHOWN ON TV

In the initial operations, eight days ago, a force of 300 cadets from a military academy in Kabul, were sent in to search for rebels. According to one of the dispatches, the cadets were at one point encircled by rebels who with bullhorns ordered them to either join the insurgents or face death. The diplomats' informants said 200 cadets had defected and 100 had been killed.

The diplomats said Kabul television showed the funeral of 30 cadets who were described as "martyrs." The showing of the bodies on television followed a protest at the military hospital where relatives of cadets sent to Paghman shouted abuse at the Government.

During the next two days, Soviet and Afghan planes carried out air raids over the Paghman area in what a diplomatic report described as an apparent retaliatory and punitive effort. In one instance, according to two reports, Soviets and Afghan forces on the ground were accidentaly strafed and bombed by Soviet helicopters and planes.

One Western report said the rebels around Paghman were being reinforced by guerrilas from nearby provinces as word of the fighting spread. On the second evening, the rebels attacked a Government military encampment at a former botanical garden on the outskirts of Paghman, but were pushed back.

One source reportedly told a Western diplomat that, in an effort to intimidate the residents, a Soviet armored personnel carrier traveled back and forth from one end of town to the other for four hours after midnight firing a heavy machine gun in all directions.

By the afternoon of July 16, the Soviet troops began pulling back and one observer said he had watched for more than an hour as more than 300 tanks, trucks and armored cars moved back to the Kabul plateau.

CASUALTY FIGURES CALLED SUSPECT

On overrall casualties, one of the diplomatic reports cautioned that body counts were suspect, but the report went on to say that a reconstruction of available information suggested that several hundred Soviet and Afghan soldiers had been killed or wounded, with at least 70 cadets dead. The report added that there had probably been "50 to 100 rebels killed and several hundred civilians."

One of the reports said that, as a result of advance warning, many residents had evacuated their homes and sought refuge with relatives elsewhere. The scene of the fighting was a few miles beyond the zone where diplomats are free to travel.

Because of the proximity of the fighting to Kabul, would spread quickly and apparently led the authorities to permit the showing of the cadets' funeral.

The diplomats said that violence in Kabul abated somewhat during the battle in Paghman. A woman who had appeared on television singing her compositions in praise of the Government was kiled the next day in her home, her body reportedly mutilated. A guard posted at the home of a United States diplomat was shot and killed by a passer-by who took the dead man's machine gun and calmly escaped in a taxi, according to Western diplomats.

TRIBUTE TO DENVER DICKERSON

Mr. ROBERT C. BYRD. Mr. President, I want to say a few words in memory of Denver Dickerson, a veteran of many years of able and loyal Senate service, who died at his home in Bethesda, Md., on Sunday afternoon, July 19. He was 67 years of age.

He retired early in 1980 after 7 years as staff director of the Joint Committee on Printing. Earlier he had served with distinction as professional staff member of the Committee on Rules and Administration, under the chairmanship of my distinguished colleague, Mr. CANNON, and during the 1950's as press secretary and later as executive assistant to former Senator Alan Bible of Nevada.

Son of the late Gov. Denver S. Dickerson of Nevada, Denver was born in Carson City and studied at the University of Nevada in Reno.

He became a highly regarded newspaperman and columnist on newspapers in Carson City and Reno, and had a brief career as a state legislator as well, including a term as speaker of the Nevada Assembly, to which post he was elected when he was 28.

His long and varied experience also included service as a technical sergeant in World War II; director of the Nevada State Employment Security Department; press officer for the U.S. Embassy in Burma; and Lieutenant Governor of Guam under Presidents Kennedy and Johnson.

Mr. Dickerson was widely and affectionately known among Senators and the Senate community in general, who share a sense of deep loss with his family.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HATFIELD). Without objection, it is so ordered.

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. BAKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The present business is that, under the previous order, the hour of 10 a.m. having arrived, the Senate will now resume consideration of House Joint Resolution 266, which the clerk will state.

The assistant legislative clerk read as follows:

A joint resolution (H. J. Res. 266) to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the joint resolution.

The PRESIDING OFFICER. Under the previous order, the Senator from Indiana (Mr. QUAYLE) is to call up an amendment dealing with the rehabilitation of housing.

Mr. BAKER. Mr. President, I am advised that the Senator from Indiana is on his way to the floor. In the meantime, I suggest the absence of a quorum, with the time utilized therefor to be charged against the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I understand that the distinguished Senator from Indiana (Mr. QUAYLE) has an amendment which has been worked out with the joint committee and approved by both myself and Senator LONG. I yield the floor to the distinguished Senator from Indiana.

UP AMENDMENT NO. 279

(Purpose: To increase to $40,000 the expenditures per dwelling unit of low-income housing eligible for 5-year amortization in certain situations providing for sale of the units to tenants)

Mr. QUAYLE. Mr. President, I thank the distinguished chairman of the Finance Committee for yielding.

I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. QUAYLE) proposes an unprinted amendment numbered 279.

Mr. QUAYLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

After line 16, page 85, insert the following:

"(e) AMORTIZATION OF LOW-INCOME HOUSING.—Paragraph (2) of section 167(k) (relating to rehabilitation of low-income rental housing) is amended by striking out 'The' in subparagraph (A) and inserting in lieu thereof 'Except as provided in subparagraph (B), the'; by redesignating subparagraph (B) as subparagraph (C), and by inserting after subparagraph (A) the following:

"(B) The aggregate amount of rehabilitation expenditures paid or incurred by the taxpayer with respect to any dwelling unit in any low-income rental housing which may be taken into account under paragraph (1) may exceed $20,000, but shall not exceed $40,000, if the rehabilitation is conducted pursuant to a program certified by the Secretary of Housing and Urban Development, or his delegate, or by the government of a State or political subdivision of the United States and if—

"(i) the certification of development cost is required;

"(ii) the tenants occupy units in the property as their principal residence and the program provides for sale of the units to tenants demonstrating home ownership responsibility; and

"(iii) the leasing and sale of such units are pursuant to a program in which the sum of the taxable income, if any, from leasing of each such unit, for the entire period of such leasing, and the amount realized from sale or other disposition of a unit, if sold, normally does not exceed the excess of the taxpayer's cost basis for such unit of property, before adjustment under section 1016 for deductions under section 167, over the net tax benefits realized by the taxpayer, consisting of the tax benefits from such deductions under section 167 minus the tax incurred on such taxable income from leasing, if any."

Mr. QUAYLE. Mr. President, today, I am offering an amendment to the Economic Recovery Tax Act which has been worked out with both the chairman and the ranking member of the Committee on Finance.

Mr. President, this amendment to the Economic Recovery Tax Act will have little effect on the Treasury, but it may have a profound effect on thousands of people, in hundreds of neighborhoods, in dozens of cities and towns.

This amendment simply raises from $20,000 to $40,000 the amount that may be depreciated over a 60-month period for money spent on upgrading low-income housing for qualified low-income housing rehabilitation projects.

Section 167(k) of the Internal Revenue Code presently permits that accelerated depreciation on the first $20,000 spent on rehabilitating such housing. Last year this program was extended until 1984. This amendment will permit those who choose to upgrade low-income housing, and who qualify under this section, to depreciate the first $40,000 instead of the first $20,000. We are changing the statute to reflect financial reality.

Mr. President, let me take a moment to describe how this program has been used in one city of my State, Fort Wayne, Ind.:

An insurance company which is headquartered in Fort Wayne has been buying abandoned, or otherwise unsuitable housing and spending the amount of money necessary to make those structures habitable. In conjunction with several banks, the insurance company has been taking half of the amount they have invested and getting a 15-year mortgage for that amount.

It is the insurance company's position that the other half—the half not mortgaged—is a donation to the community. It is a corporate contribution to Fort Wayne.

The insurance company, having renovated a single family dwelling, then rents that house to a low income tenant for only the amount necessary to cover the mortgage, taxes, insurance, and a small reserve for repairs.

The city of Fort Wayne, as its part in the program, has been fixing the streets, curbs, and lighting.

After 5 years, if the tenant has lived up to the terms of the lease, the insurance company sells the house to the tenant for $1. The bank transfers the remaining 10 years of the mortgage to the new owner, thereby completing the cycle.

Mr. President, this program does more than rehabilitate dwellings; it creates homes. It does more than improve the tax base; it creates neighborhoods.

We have worked this out to take care of a particular situation in my State, more particularly, in Fort Wayne, Ind., where some of the companies have been involved in rehabilitating low-income housing. They have done this in a unique way. They have bought property for virtually $1. They have rehabilitated the property and assumed mortgage for one-half the amount of the project.

Then they have obtained tenants to come in, to pay rent based upon those mortgages. After a period of 5 years, the companies transfer the property to the tenant. The tenant assumes the mortgage, and owns the property.

What they have done is unique, and it is hoped that we can get other corporations and foundations to take an interest in this type of project particularly as we have increased the exemption from $20,000 to $40,000—to take a keen interest in rehabilitating low-income housing in the cities.

The $20,000 limit was put in 4 years ago. We are simply facing reality, that $20,000 simply is not sufficient. We are going to raise this to $40,000; but under the direction and stewardship of the Senate Finance Committee, we have put in certain parameters as to where the additional $20,000 will be allowed as a deduction.

I yield to the distinguished chairman of the Finance Commitee. I thank him and the ranking minority member of the committee, Senator LONG, for their cooperation. I also thank the staff for coming up with the precise language to take care of this program.

Mr. DOLE. I thank the Senator from Indiana.

Mr. President, under the amendment as proposed by Senator QUAYLE and worked out by the Treasury—and we also appreciate the cooperation of the Joint Tax Committee—the cap of the depreciation deduction for low-income rental housing will be raised to $40,000. However, the cap will be raised only if there is a special benefit provided to the tenants. Under present law, a taxpayer may elect 60-month straight-line amortization of costs incurred in the rehabilitation of low-income rental housing. The amortization is limited to $20,000 per dwelling unit.

Under the amendment, the $20,000 limit would be raised to $40,000 per unit if the rehabilitation is pursuant to a program under which the tenants who demonstrate home ownership responsibility may purchase their units for a sales price that limits the profit to the sellers.

I understand that the revenue loss is less than $5 million.

Mr. LONG. Mr. President, this proposal has been tried, and apparently it seems to be working very well. It certainly deserves to be tried on a broader basis.

I commend the Senator for offering this amendment, and I hope very much that the Senate will go along with it.

Mr. DOLE. I thank the Senator from Louisiana.

I yield back the remainder of my time.

Mr. QUAYLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 279) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under previous order, the Senator from Tennessee (Mr. SASSER) is recognized to call up an amendment dealing with social security interfund borrowing.

Mr. DOLE. In the absence of Mr. SASSER, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 280

(Purpose: To provide a credit against federal income tax for expenses involved in the planting of pecan trees to replace pecan trees destroyed by Hurricane Frederick)

Mr. HEFLIN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an unprinted amendment numbered 280.

Mr. HEFLIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 284, line 5, insert the following: new section 509:

SEC. 509. CREDIT AGAINST INCOME TAX FOR PLANTING OF CERTAIN PECAN TREES.

(a) ALLOWANCE OF CREDIT.—That notwithstanding any other provision of law, there shall be allowed as a credit against the tax imposed by Chapter 1 of the Internal Revenue Code of 1954 an amount equal to the product of—

(1) $10, multiplied by

(2) the number of pecan trees planted by the taxpayer to replace pecan trees destroyed by Hurricane Frederic during September 1979.

(b) LIMITATIONS BASED ON AMOUNT OF TAX.—

(1) IN GENERAL.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by chapter 1 of such Code for such taxable year, reduced by the sum of the credits allowable under subpart A of part IV of subchapter A of chapter 1

of such Code, other than the credits allowable under sections 31, 39, and 43 of such Code. For purposes of the preceding sentence, the term "tax imposed by chapter 1 of such Code" shall not include any tax treated as not imposed by chapter 1 of such Code under the last sentence 53(a).

(2) CARRYOVER OF CREDIT.—If the credit allowable under subsection (a) for any taxable year exceeds the limitation under paragraph (1), such excess shall be carried forward to the succeeding taxable year and added to the credit allowable under subsection (a) for such succeeding taxable year.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The provisions of this Act shall apply to taxable years beginning after December 31, 1980, and before January 1, 1986.

(2) PRE-1981 EXPENDITURES ALLOWED FOR 1981.—In the case of the taxpayer's first taxable year beginning after December 31, 1980, this Act shall be applied by taking into account the period beginning on August 31, 1979, and ending on the last day of such first taxable year.

Mr. HEFLIN. Mr. President, the amendment I am offering today is simple and straightforward. What this amendment will do is allow a credit against income tax for planting pecan trees in south Alabama which were destroyed by Hurricane Frederick in September 1979.

I am sure, that each Member of this body will recall that the gulf coast was devastated by Hurricane Frederick in September 1979, and one group which was particularly hard hit was the Alabama pecan growers. We have explored all the possibilities, but we can find no Federal aid programs which will enable this industry to get back on its feet. Accordingly, during the 96th Congress, I introduced a bill, S. 1900, which would give special tax relief to all fruit and nut growers who suffer damage because of the whims of nature, such as floods, fires, or storms. At a hearing on this measure, the administration spoke in opposition to it, basically because it would impact on the symmetry of the tax code. Thus, because of this problem and because the cost of the bill is estimated at $20 million per year, that particular measure did not move forward.

In a spirit of compromise and to provide at least some measure of relief for these small family businesses, I introduced S. 531 this Congress. Basically, my amendment would allow persons who lost pecan trees a tax credit of $10 for each tree that was destroyed in the hurricane if a tree was planted by the taxpayer to replace the destroyed tree. The cost of pecan trees in the market in Mobile today is approximately $10 per tree. Thus, a $10 tax credit will enable the pecan growers at least to recover the cost of initial planting of the tree. It does not even approach the cost to nurture the tree and bring it into full production, which takes a period of 8 to 10 years; but at least it would provide some resources to get the trees in the ground at their earliest possible date.

Last year, fewer than 10 percent of the trees that were destroyed were replaced, primarily because the pecan growers, mostly on small family farms, just do not have the funds to purchase new trees to set out.

Over 144,000 trees were destroyed by the hurricane. Even if every single tree were replaced and the tax credit claimed, the maximum amount of tax loss under this measure would be about $1.4 million. Most likely, the actual tax loss will be considerably less than that; and thus, it is really not as significant an amount of money for the national treasury to absorb. It is significant, however, in that it may enable the crippled pecan industry of south Alabama to get back on its feet and once again to be a tax-producing industry.

Mr. President, I hope that the Members of this body will feel compassion for these small businessmen and approve this bill.

I point out that at the time of this devastating storm, there was no such things as crop insurance for pecan growers. Since newly enacted legislation does bring pecan and other fruit and nut trees under the Federal crop insurance programs, this should be a one-time, nonrecurring disaster. In the future, insurance will be available to offset these kinds of losses. Because this is a special situation, I think that special legislation is appropriate, and I urge my colleagues to support this bill.

Mr. President, I have discussed this amendment with the majority floor manager and the minority floor manager. I believe there is no objection to it.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HEFLIN. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The assistant legislative clerk continued to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as indicated by the distinguished Senator from Alabama, the amendment provides a nonrefundable credit for expenses involved in the planting of pecan trees for the purpose of replacing trees destroyed in September 1979 by Hurricane Frederick. The amount of the credit would be $10 per pecan tree. Credits exceeding tax liability could be carried forward to succeeding taxable years. The credit would be available for taxable years beginning after 1980 and before 1986. For the first taxable year beginning after 1980, the credit would be extended to cover trees planted after August 31, 1979.

The reduction in revenue would be less than $1 million a year for all years to which the amendment applies.

Mr. President, I have discussed this amendment with the Senator from Alabama. I have no objection to adding it to the bill and taking it to conference. I cannot guarantee what will happen at that point.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I oppose this amendment. I believe it provides a special category in the tax code for circumstances that could be oppressive.

I do not think it is the way we should treat matters of this kind. I sympathize with my good friend from Alabama concerning the problem, but I believe that once we start down this road there will be no end to it.

I do not feel it is a matter of great enough moment for me to make a matter of a rollcall vote.

I do wish to rise to indicate my opposition to it and recognize it is in the hands of the Finance Committee for consideration and will be in the hands of the Finance Committee for further disposition after the matter goes to conference.

I do think it is the wrong way to go and strongly object to it, but I am completely satisfied the chairman of the Finance Committee is prepared to accept it. If we do handle it on a voice vote, I at least record my own voice in the negative.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DOLE. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 280) was agreed to.

Mr. HEFLIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I understand the distinguished Senator from Tennessee (Mr. SASSER) and the Senator from New York (Mr. MOYNIHAN) are in the process of modifying an amendment that now would be on the floor otherwise.

I simply say to those who may be listening in their offices that the way we are moving, if no one has any amendments, we could wrap this joint resolution up by noon today.

I hope that, if anyone has an amendment he is interested in, he propose it soon. I hope the distinguished majority leader will underscore the need to move on. I also hope that after the next rollcall vote the majority leader will have another inventory on the amendments and we will find out how many Members are serious about their amendments. I

really believe that about half of those amendments still pending will never be offered and that many of the others are in negotiations that could lead to their acceptance. So we may be fairly near completion.

Mr. BAKER. Mr. President, will the Senator yield to me then?

Mr. DOLE. I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I underscore every word that the distinguished chairman of the Finance Committee has said and indeed I think his suggestion is a good suggestion.

I understand there will be a rollcall vote on the Sasser amendment. After that rollcall vote or after the next rollcall vote, as the case may be, I will ask Senators to remain in the Chamber so that we can canvas the amendments that are—I hesitate to use the word "serious"—let me say that are going to be called up so that we can have some reading on where we are and how much time it will take to get there to get to final passage.

Mr. President, I also urge Senators to take account of the fact that today, as I said last night, we are going to have a full day and a long day and we are going to have votes all day right up to the time that we recess.

So, Mr. President, I urgently request Senators to remain in the Chamber after the next rollcall vote while we do an inventory of amendments and we will see how we are getting along.

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. Mr. President, I suggest the absence of a quorum, and I ask to have it charged against the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

UP AMENDMENT NO. 281

(Purpose: Expressing the sense of the Senate that the Senate Finance Committee report a bill authorizing interfund borrowing to the Senate by September 30, 1981)

Mr. SASSER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. SASSER), for himself, Mr. MOYNIHAN, Mr. SARBANES, Mr. CANNON, Mr. MELCHER, Mr. RANDOLPH, Mr. BRADLEY, Mr. PELL, Mr. WILLIAMS, and Mr. PRYOR, proposes an unprinted amendment numbered 281.

Mr. SASSER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

"SEC. . (a) It is the finding of the Senate that—

"(1) a crisis of confidence exists about the fiscal integrity of the Social Security System, and

"(2) the three trust funds that comprise the Social Security System face two separate and distinct problems—a short-term cash flow problem confronting the Old Age and Survivors Trust Fund over the next five years and the long-term financing problem that becomes acute in the next century, and

"(3) there is general agreement that interfund borrowing will resolve the immediate cash-flow problem, and

"(4) it is of paramount importance that the Congress restore faith in the fiscal integrity of the Social Security System by acting quickly and responsibly in solving the financial problems of the system.

"(b) It is therefore the sense of the Senate that the Senate Finance Committee report a bill to the Senate authorizing interfund borrowing or such other provisions as may be required by November 15, 1981."

Mr. SASSER. Mr. President, may I inquire how much time we have to a side?

The PRESIDING OFFICER. Fifteen minutes.

Mr. DOLE. Fifteen minutes.

Mr. SASSER. I yield myself 5 minutes, Mr. President.

Mr. President, over the last 2 months, since Health and Human Services Secretary Schweiker announced the Reagan administration's social security financing plan, the Nation has been subjected to a constant barrage of facts and a daily trading of charges about the fiscal integrity of the social security program.

Well, the American people are confused. They want to know what are the facts. Is the social security system bankrupt? If not, how bad is the funding situation? What are the options and what are the impacts for various options if they are exercised? Who is trying to do what to whom? These are the questions, Mr. President, that the American people have been asking. The answers vary along all points of the political and economic compass.

Most recently, the President sought to clarify his administration's position on the problems confronting social security. In a July 18, 1981, letter to the minority leader, the President stated:

Thirty-five million Americans who depend on social security expect and are entitled to prompt bipartisan action to resolve the current financial problem.

Mr. President, I could not agree more with the President of the United States.

Furthermore, President Reagan has asked the Congress to "lay aside partisan politics" and join him in a "constructive effort" to put the social security system on a sound financial basis.

Again, I could not agree more with the President of the United States. I would venture to say that the overwhelming majority of the American people also agree.

I believe that the able and distinguished chairman of the Finance Committee (Mr. DOLE) will agree with me that the social security faces two different and distinct financing problems:

First, a short-term cash-flow problem confronting the old age and survivors trust fund over the next 5 years; and, second, the longer term, more difficult problem with questions facing financing of the other two trust funds around the turn of the century, if one uses the economic projections the administration submitted to support its economic recovery tax bill and the budget cuts.

Moreover, Mr. President, I expect that the distinguished chairman of the Finance Committee will confirm that there is general agreement among the experts who have studied these problems that at least one option has broad-based support and should be taken as soon as possible—authorization for interfund borrowing.

The 1980 Social Security Administration report recommended interfund borrowing. Mr. Stanford Ross, Mr. William Driver, and Mr. Robert Ball, three former Social Security Administration Commissioners have all recommended interfund borrowing. The American Enterprise Institute and the Brookings Institution, two organizations that seldom agree on anything, agree that interfund borrowing should be authorized. President Reagan, the President's Commission on Pension Policy, the National Commission on Social Security, and the trustees of the old age and survivors trust fund agree on interfund borrowing. All in all, Mr. President, that is a very, very impressive group. Indeed, there is agreement among the Nation's experts that this is the solution to our immediate short-term cash-flow problem, the solution is interfund borrowing.

In addition, the concept of interfund borrowing has been endorsed by the Coalition To Protect Social Security, an umbrella organization consisting of 100 organizations representing between 35–40 million people—both contributors and beneficiaries. The National Education Association, the American Association of Retired Persons and the National Retired Teachers Association, the National Council of Senior Citizens, and the National Association of Retired Federal Employees all support enacting an interfund borrowing proposal as soon as possible.

This amendment is a prompt and constructive approach to solve the immediate problems that face the OASI trust fund. This amendment asks the Finance Committee to report a bill authorizing interfund borrowing to the Senate by November 15, 1981.

As a practical demonstration of a willingness to work on a bipartisan basis, I ask for administration support and the support of our friends from across the aisle on this amendment—to meet us half way—to solve first things first.

The immediate problem, Mr. President, is a short-term cash flow problem now confronting the old age and survivors trust fund in the fall of 1982. The answer is the authorized interfund borrowing.

This amendment speaks only to the short-term problem. It is narrow in focus. It proposes only one acceptable answer—interfund borrowing. It sets a specific deadline for bringing this solution to the floor of the Senate.

Mr. President, before I close my remarks on this amendment, let me reiterate several points about the need for prompt action to authorize interfund

borrowing to preserve the fiscal integrity of social security.

First, it has been made abundantly clear that the administration's May 12 social security proposals would wreak havoc with public confidence in social security.

Delays in cost of living adjustments would affect nearly 36 million social security recipients.

The 18.1 million individuals eligible for retirement at the age of 65 within the next 5 years would receive a 10-percent benefit reduction due to a technical change in benefit computations.

Over 7 million workers and spouses electing early retirement within the next 5 years would receive benefits cuts of up to one-third of expected benefits.

And some 4 million beneficiaries currently on the rolls would receive reduced benefits as a result of pending cuts in the minimum benefit, student benefit, and death benefit features of social security.

Second, the American business community has been caught off guard by the proposed social security changes. If the administration's proposals were put into effect immediately, employer social security cost would rise by as much as 7 percent. Large and small companies alike, because their pension plans are integrated with social security, would see their pension costs increase dramatically with the enactment of the administration's sweeping changes. Again, this is another aspect of the administration's reform package that has received little consideration due to the hasty and premature way in which these revisions were adopted.

Third, to avoid taking hasty action on social security, it is imperative that we take immediate action to authorize interfund borrowing now. That is the intent of the Sasser-Moynihan amendment.

The administration's own estimates of the combined trust fund balance contained on page 116 of the 1981 social security trustee's report indicate that the combined trust fund balance would average 19.7 percent from 1981 through 1990. This is a combined trust fund sufficient to provide that no monthly benefit checks will ever be in jeopardy through 1990. If the administration wishes to provide an immediate guarantee that the social security retirement program will not go broke, it must provide for a program of interfund borrowing.

And even if we turn to other sources, such as the Congressional Budget Office, which uses more pessimistic economic projections than the administration, we find that they too indicate that interfund borrowing will provide for a solvent social security system through 1986 at the very least. As my distinguished colleague, Senator MOYNIHAN, noted the other day, with some of the proposed benefit reductions in social security that are contained in the Omnibus Reconciliation Act, we will have a combined trust fund balance that will not dip below 14 percent of the combined trust fund between now and 1986.

Once again, with interfund borrowing in effect in the short term, there would be sufficient funds in the program to prevent any "bankruptcy" in the social security system.

Mr. President, I ask unanimous consent that pertinent material from the 1981 trustee's report be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE G1.—PROJECTED ASSETS OF THE OASI, DI, AND HI TRUST FUNDS AT BEGINNING OF YEAR AS A PERCENTAGE OF ANNUAL EXPENDITURES DURING YEAR UNDER THE 5 ALTERNATIVE SETS OF ASSUMPTIONS, CALENDAR YEARS 1981-90

Calendar year	OASI	DI	OASDI	HI	Total OASDI and HI
Alternative II-A:					
1981	18	20	18	46	23
1982	[1] 13	13	13	57	21
1983	[1] 5	33	[2] 8	66	18
1984	[1]—4	62	[2] 3	70	15
1985	[1]—13	96	[2]—1	70	13
1986	[1]—18	155	[2] 1	69	15
1987	[1]—21	219	[2] 4	70	18
1988	[1]—24	285	9	68	22
1989	[1]—26	352	14	61	25
1990	[1]—28	418	20	51	27

[1] Assets of fund would be insufficient to pay benefits when due during part or all of this year.

[2] Assets of combined trust funds would be insufficient to pay combined benefits when due during part or all of this year.

Note: The assumptions underlying the projections are described in the section entitled "Economic and Demographic Assumptions" of this report and in app. A of the HI Annual Report. The OASI, OASDI, and combined OASDI and HI trust fund ratios in 1982 and later under each alternative are theoretical, because the OASI trust fund is projected to be depleted and no provision for additional income exists in present law. See text for details; the economic assumptions in alternative II-A for 1981-86 are identical to or derived from the assumptions underlying the President's fiscal year 1982 budget.

Mr. SASSER. Finally, Mr. President, even the administration itself has indicated by its May 12 presentations that they regard interfund borrowing as a prudent way of solving the social security system's problems.

Every Senator who has studied the social security system knows that we are going to have to have interfund borrowing to help solve the cash flow problems of social security.

The administration most surely will have interfund borrowing as a part of its overall social security reform package.

Interfund borrowing is part of the major social security reform bills now pending in the House and Senate.

Interfund borrowing is a concept endorsed by a variety of groups concerned with the social security system, among them:

The American Association of Retired Persons;

The National Council of Senior Citizens;

The National Education Association;

The National Association of Retired Federal Employees; and

The Coalition To Protect Social Security (SOS).

I think that this demonstrates the breadth of national concern about this matter, and I ask unanimous consent that several letters calling on the Senate to authorize interfund borrowing be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL RETIRED TEACHERS ASSOCIATION AND AMERICAN ASSOCIATION OF RETIRED PERSONS,
Washington, D.C., July 23, 1981.

Hon. JIM SASSER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SASSER: The National Retired Teachers Association and the American Association of Retired Persons support interfund borrowing among the three Social Security Trust Funds: Old Age and Survivors Insurance, Disability Insurance, and Medicare Hospital Insurance. Therefore, we support your resolution which would express the sense of the Senate that the Senate Finance Committee report a bill authorizing social security interfund borrowing before July 29, 1981.

We fully recognize that interfund borrowing alone will probably not be sufficient to solve the projected cash flow problem for OASI. Consequently, we favor a comprehensive financing package which responds fully and fairly to the short-term and long-range problems confronting social security. But the development of such a package will take time.

We strongly believe that Congress should approve interfund borrowing now. This would provide a clear signal to the public to assure that social security's financial integrity is maintained. Moreover, it would help to reassure workers and older Americans alike who are deeply concerned over statements that social security is on the verge of bankruptcy. Such remarks—even though they may be well-intentioned—oftentimes have the effect of frightening older Americans. Social security is faced with short-range and long-term financial problems. But they can clearly be solved in an equitable manner for today's and tomorrow's retirees. Enactment of interfund borrowing is an important and necessary step to achieve this objective.

Sincerely,

CYRIL F. BRICKFIELD,
Executive Director.

COALITION TO PROTECT,
SOCIAL SECURITY,
Washington, D.C., July 20, 1981.

DEAR SENATOR: The Save Our Security Coalition is made up of about 100 organizations with a combined membership between 35 and 40 million adults about equally divided between current contributors to social security and current beneficiaries—retired persons, the disabled and surviving family members of workers.

We strongly support the current efforts to amend the tax bill in the Senate to authorize interfund borrowing among the social security trust funds.

According to the Congessional Budget Office's alternative set of economic assumptions (much more pessimistic than those being used for the budget and tax bills), interfund borrowing even under present law would solve social security financing problems through F. Y. 1985. With reduced expenditures growing out of the reconciliation process, interfund borrowing would be sufficient through F. Y. 1986 or longer.

Interfund borrowing, therefore, would permit the Congress to address any remaining social security financing problems free from the pressure of near term shortages in a particular fund.

The principle of interfund borrowing is noncontroversial. Administration support was restated by Secretary Schweiker in testimony before the Subcommittee on Social Security of the Senate Finance Committee on July 8, 1981, and is also backed by the Democrats in the Senate. We believe it needs to become law just as quickly as possible.

There is a high level of anxietv about social security among our members. We believe it is important to provide for interfund borrowing now to reassure them and the country

that social security checks will be paid on time and in full.

We understand that another amendment to permit interfund borrowing will be offered in the next few days. The SOS Coalition urges your support of this amendment.

Sincerely yours,

WILBUR J. COHEN,
Former Secretary of HEW and Chairman, SOS Coalition.

WILLIAM J. DRIVER,
Former Commissioner of Social Security and Executive Vice Chairman, SOS Coalition.

ROBERT M. BALL,
Former Commissioner of Social Security and Chairman of SOS Coalition.

NATIONAL EDUCATION ASSOCIATION,
Washington, D.C. July 23, 1981.

Hon. JAMES R. SASSER,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR SASSER: The National Education Association, representing 1.8 million professional educators, most heartily supports your amendment to H.J. Res. 266, the Economic Recovery Tax Act of 1981, which would direct the Committee on Finance to authorize interfund borrowing to relieve the shortfall in the Old Age and Survivors Insurance trust fund.

We believe it is important to take this first step to ensure the solvency of the trust fund. It has been used before under legislation enacted by the Congress, and we feel it is necessary to do so again in the interest of prudent stewardship and to relieve widespread public anxiety about the ability of the Social Security ssytem to meet its obligations in timely fashion.

We appreciate your initiative in this matter and wish you well.

Sincerely,

JAMES W. GREEN,
Assistant Director for Legislation.

Mr. SASSER. Mr. President, millions of Americans pay into the social security trust fund every day by a single unified payroll social security tax deduction. They do not make detailed calculations about how much of this payroll tax is earmarked for each of the three social security trust funds. All the worker knows or cares about is the fact that his taxes go to support the overall social security system. He expects his taxes to keep the social security system solvent. Therefore, we owe it to the American worker and the American social security system to adopt this amendment which will promote prompt action on interfund borrowing and thereby keep the social security system from going broke.

Mr. President, I ask Senators on both sides of the aisle to support this amendment and thereby send a strong message to the American people that we will not permit the social security system to default on its obligations in the years ahead. That is the best way of building up confidence in the social security system—confidence that has been badly shaken by the recent turmoil surrounding recommendations for precipitous and unwarranted changes in the social security system.

I yield 5 minutes to the distinguished Senator from New York.

Mr. MOYNIHAN. I thank my friend from Tennessee. I wish to express my appreciation for his allowing me to be a cosponsor. I believe we are beginning to reach a degree of consensus in this body, Mr. President. The subject of social security has divided us in the last few months on several occasions. It has caused Members to put forth propositions not acceptable to the other side, and yet in the end we will come together on this matter, as we have done before. I think the distinguished chairman and the ranking member of the committee wish that to happen.

I know, as a member of the subcommittee, that our distinguished chairman, the Senator from Colorado, wishes it.

This is the emergence of such an agreement and I welcome it most heartily.

Mr. President, it is with great seriousness of purpose that I rise in support of Senator SASSER's measure to instruct the Finance Committee to report a bill authorizing borrowing between the three social security trust funds. I am delighted to be an original cosponsor of the measure.

No one is more sensitive than I to the need to insure social security's financial stability. The system has two separate financial problems. There is a long-range problem that we must address or the system will have difficulties during the next century. There is a short-term problem in one of the funds, the old age and survivors insurance (OASI) trust fund, which, by all accounts, will begin to run a deficit by the end of fiscal year 1983, and recover before the decade is over.

The long-range problem is the result of major demographic changes in our society. Simply stated, society will have to support more retirees during the second quarter of the next century than it has ever done. We can and will make sure that social security is financially able to absorb those larger cohorts of retirees. But the more pressing problem is how we will cover the smaller deficit that the OASI fund will run in the next few years.

The administration has proposed cutting benefits by $80 billion during the next 4 years, advocating this cutback

in social security as the means to insure the programs' financial soundness. Surely such a drastic cutback must be viewed only as a last resort, never to be undertaken as long as any other way of meeting the system's financial needs exists. Those who depend upon social security deserve as much. Deserve to know that their retirement income will not be reduced as long as there is any alternative.

President Reagan used to agree. This plan to reduce benefits is antithetical to his campaign promises. Consider this statement, made during his debate with President Carter:

> What is needed is (to make) the system actuarily sound, but with the premise that no one presently dependent on Social Security is going to have the rug pulled out from under them. . . . We cannot frighten, as we have with the threats and the campaign rhetoric that has gone on in this campaign, our senior citizens—leave them thinking that in some way they're endangered and they would have no place to turn. They must continue to get those checks.

I agree. Recipients of the minimum benefit agree. Early retirees agree. But the administration no longer agrees. Instead, it eliminates the minimum benefit. Student benefits. Now it asks Congress to support a scheme to reduce retirement income drastically. And unnecessarily.

There is an alternative to cutting benefits. A good alternative. A fair way to insure that OASI meets its short-term payroll problems in a way that does not undermine the overall stability of social security and that cuts no one's benefit.

It is intertrust fund borrowing.

There are three social security trust funds. All money in them is social security money. There is a problem in one of the funds, the OASI fund. The others, the disability insurance (DI) and hospital insurance (HI) funds, are solvent. They are solvent enough to cover the OASI shortfall.

According to the most recent economic estimates of the Congressional Budget Office, combining the three social security trust funds will provide all but $12.9 billion of the funds needed to meet payments during the next 4 years. After that point, the funds will remain solvent until the next century.

Those figures do not take into account the savings that the system will realize because of reconciliation. CBO estimates those to be $29 billion. These savings will lead to additional interest income on the funds. Robert Ball, former Commissioner of Social Security, estimates that at approximately $11 billion. Others, including the actuaries of the Social Security Administration, put the figure much lower, at about $5 billion. Using the more conservative estimate of interest income, total savings from reconciliation will be approximately $34 billion.

Those $34 billion should be more than enough to cover the $12.9 billion shortfall.

With interfund borrowing, then, there is no short-term deficit in the funds, and we can begin to consider ways to solve the real problem, the long-term deficit. And we will insure that the millions of Americans who depend upon social security for their income today, and the millions more who count upon it for their retirement income in the future, know that Congress will not blithely acquiesce in a move to cut their benefits. Not while there is any other option open to us.

The distinguished economist Walter Heller put it well in an article in today's Wall Street Journal. Permit me to quote from his article, "The Social Security Muddle":

> Yes, the Social Security system has problems. Yes, revenues are "out of sync" with benefit payments because of high unemployment and inflation. Yes, if nothing is done, the system will be in crisis 30 years from now when the baby boom generation retires.
>
> But none of this calls for calamity-howling or rash action to slash benefits. Let's see where a calm appraisal, anchored in fact rather than fear, might lead us.
>
> It would serve everyone's interests if the debate were stripped of its overheated, cry-wolf rhetoric; if the administration would stop trying to stampede Congress into making precipitate changes that would squeeze an already hard-pressed segment of our population in the name of avoiding a bankruptcy that is not going to occur, and if Congress would promptly undertake a tiding-over operation that will enable the Social Security system, especially OAS", to meet its full obligations in the short run and then turn to the desirable reforms in the system for the long run.

Dr. Heller is correct. Congress must undertake the simplest action that will at once insure social security's solvency and protect retirement benefits. That action is interfund borrowing. I urge my colleagues to vote for this amendment.

Mr. DOLE. Mr. President, I have looked at this resolution. It is a sense of the Senate resolution. It does recognize the short- and long-term problems we have in social security. It is devoid of political rhetoric, which is an improvement over others we have had before the Senate. It indicates that we ought to proceed to do the job that we have the responsibility for doing in the Senate Finance Committee. Certainly, I consider that appropriate.

I think the distinguished Senator from Louisiana has no problem with the resolution.

I can say to the sponsors, some of whom are on the committee, that we will be addressing the entire social security problem after the recess. Hopefully, the tax bill will have been disposed of and the budget reconciliation bill will have been disposed of. That will give us almost full time to work on the long- and short-term financial problems in the social security system. They will not be solved simply by authorizing interfund borrowing, and I believe this resolution acknowledges that fact. The sponsors of the resolution recognize that we will have to move ahead on several fronts.

It is still the belief of this Senator that we need a bipartisan approach to resolving some of these problems in an effort to restore confidence in the system and to assure the American people that we will preserve the integrity of the social security system. That is the goal of every Senator I know of.

On that basis, I have no objection to the amendment. I am happy to accept it. I thank the distinguished Senator from Tennessee for bringing it to the floor, along with the Senator from New York.

Mr. SARBANES. Mr. President, I am very pleased to join the Senator from Tennessee and the Senator from New York as a cosponsor of this amendment calling on the Senate Finance Committee to report a bill authorizing social security interfund borrowing before September 30, 1981. I applaud the Senator for bringing this very important matter to the floor again and urge my colleagues to give their support to this amendment.

The recent statements by the administration that we will have the greatest bankruptcy in history on November 3, 1982, when the old age and survivors trust fund will experience a slight shortfall of funds and the announcement of $88 billion cuts in our social security program has caused deep concern, fear, and anxiety among older Americans. As you know, the social security program is this Nation's basic source of retirement income for over 35 million people. For 66 percent of these people it is their main source, or many times their only source of income. To tell them that come November 1982 there will not be any money to send out their monthly checks is irresponsible of this administration.

The problem that the old age and survivors trust fund will experience next year is a short-term financing problem. The other trust funds, disability and hospital, are in good financial shape and will realize surpluses in the next year. The old age and survivors insurance trust fund is the only one suffering a shortfall.

Many experts on social security agree that the way to resolve this problem, is to permit the three trust funds to borrow from one another. The administration, in fact, has incorporated this recommendation in its comprehensive social security package. By passing this amendment calling on the Finance Committee to report a bill out permitting interfund borrowing in order to insure sufficient funds in the OASI trust fund we will reassure the citizens of this country that they will be able to continue to rely on their monthly social security checks.

One reason for this shortfall is a higher rate of inflation and unemployment than was projected when the social security amendments were passed 4 years ago. For example, the bill assumed that inflation in 1980 would be 4.7 percent, when in fact it was 13.5 percent. What this means for the social security trust fund is that higher than expected annual benefit increases were paid out. In addition, a higher than assumed unemployment rate results in lost revenues for the social security trust fund. For every percentage point increase in unemployment the system loses $2 to $3 billion.

The administration has used one set of statistics to justify their economic program and budget which shows very low inflation—4.7 percent in 1985—and very low unemployment—6 percent in 1985—and another set to justify the need for their $88 billion in social security cuts.

Inflation and unemployment do drain money from the trust funds. However, if

the economy performs as the administration projects under their budget, the only adjustment needed to ensure solvency for social security is to permit interfund borrowing. In fact, if the administration uses the same assumptions they used in preparing their budget we would only have a short fall of $5 billion for the next 5-year period, 1982–86 in the Retirement and disability trust funds. In other words, what the administration is recommending is an $88 billion cut in social security benefits to take care of a $5-billion shortfall.

Even taking more realistic or pessimistic economic assumptions from the Congressional Budget Office, the shortfall for retirement and disability from 1982 to 1986 is only $38 billion. These figures seem to point out that the administration does not have faith in their projected figures of low inflation and low unemployment over the next few years, or they want to realize an incredible windfall of an $88-billion surplus.

In a recent letter supporting interfund borrowing from Wilbur J. Cohen, former Secretary of HEW and chairman of Save Our Security Coalition (SOS); Robert Ball, former Commissioner of Social Security and chairman of SOS coalition; and William J. Driver, former Commissioner of Social Security and executive vice chairman SOS coalition; they state:

There is a high level of anxiety about social security among our members. We believe it is important to provide for interfund borrowing now to reassure them and the country that social security checks will be paid on time and in full.

Mr. President, all this amendment does is call on the Finance Committee to report a bill by September 30, 1981, to the Senate to permit interfund borrowing. I urge my colleagues to support this amendment so that we can reassure all of the older citizens that Social Security will continue to pay their benefits on time and in full.

I ask unanimous consent that the letter from SOS be printed after my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SOS COALITION TO PROTECT
SOCIAL SECURITY,
Washington, D.C., July 23, 1981.

DEAR SENATOR: The Save Our Security Coalition is made up of about 100 organizations with a combined membership between 35 and 40 million adults about equally divided between current contributors to social security and current beneficiaries—retired persons, the disabled and surviving family members of workers. Enclosed is a list of member organizations.

We strongly support the Sasser, Moynihan, Sarbanes amendment to be offered during the Senate's consideration of the Economic Recovery Tax Act of 1981 stating, ". . . the sense of the Senate that the Senate Finance Committee report a bill before July 29, 1981, authorizing social security inter-trust fund borrowing."

According to the Congressional Budget Office's alternative set of economic assumptions (much more pessimistic than those being used for the budget and tax bills), interfund borrowing *even under present law* would solve social security financing problems through F.Y. 1985. With reduced expenditures even one-half as large as those proposed in either the Senate or House version of the reconciliation bill, interfund borrowing would be sufficient through FY 1986 or longer.

Interfund borrowing, therefore, would permit the Congress to address any remaining social security financing problems free from the pressure of near term shortages in a particular fund.

The principle of interfund borrowing is noncontroversial. Administration support was restated by Secretary Schweiker in testimony before the Subcommittee on Social Security of the Senate Finance Committee on July 8, 1981 and is also backed by the Democrats in the Senate. We believe it needs to become law just as quickly as possible.

There is a high level of anxiety about social security among our members. We believe it is important to provide for interfund borrowing *now* to reassure them and the country that social security checks will be paid on time and in full.

For this reason the SOS Coalition urges your support of the Sasser, Moynihan, Sarbanes amendment.

Sincerely yours,

WILBUR J. COHEN,
Former Secretary of HEW and Chairman, SOS Coalition.

WILLIAM J. DRIVER,
Former Commissioner of Social Security and Executive Vice-Chairman SOS Coalition.

ROBERT M. BALL,
Former Commissioner of Social Security and Chairman of SOS Advisory Committee.

Mr. LONG. Will the Senator yield?

Mr. DOLE. I yield.

Mr. LONG. Mr. President, the Senator has modified his amendment to give the Finance Committee broader options than we would have had under his original draft amendment. As modified, I am happy to support the amendment. I ask the Senator to include me as a cosponsor.

Mr. SASSER. Mr. President, I ask that the Senator from Louisiana (Mr. LONG) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. What he is asking us to do is something we definitely should do and ought to do within the time specified by the resolution. I am happy to support the amendment and I hope it will be agreed to.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

Mr. SASSER. Mr. President, last Saturday President Reagan asked for a prompt, constructive, and bipartisan action to put social security on a sound financial basis. I think this amendment meets all three criteria. It is prompt, it is constructive, and it seeks the bipartisan support offered by the President. This amendment endorses a concept that has uniform support from all the experts. The distinguished Senator from New York (Mr. MOYNIHAN) has taken the lead in advancing this concept on the Senate floor.

This amendment has the support of some more than 100 organizations having a membership of between 35 million and 40 million people equally divided between contributors and beneficiaries.

The Senate needs to demonstrate to the American people that it can respond to the real problem. The real problem now, and the immediate, pressing problem, is the short-term cash flow problem that confronts the old age and survivors trust fund beginning in the fall of 1982—that is the only problem dealt with by this amendment.

If agreed to, this amendment will, I hope, Mr. President, lower the political rhetoric. It will allow us to deal with this short-term cash flow problem using the device, essentially, of interfund borrowing, to remove fear, to restore trust. After we solve the immediate cash-flow problems, then we can begin an approach to solve the complicated and far more difficult problems that face the social security system after the turn of the century in a calm, in a deliberate, in a rational and objective fashion.

I am delighted that the chairman of the Senate Finance Committee, the distinguished Senator from Kansas (Mr. DOLE), has agreed to meet myself and others halfway on this measure to address only the OASI problem now—to begin a legislative partnership utilizing interfund borrowing and other techniques that the Finance Committee might deem acceptable in order to deal exclusively with the immediate problems that will confront social security during the next 8 years.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SASSER. Mr. President, I yield back the remainder of my time.

Mr. DOLE. I yield back any remaining time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Wisconsin (Mr. KASTEN), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. STENNIS) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that if present and voting, the Senator from New Jersey (Mr. WILLIAMS) would vote "yea."

The PRESIDING OFFICER (Mr. DANFORTH). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 89, nays 4, as follows:

[Rollcall Vote No. 218 Leg.]

YEAS—89

NOT VOTING—7

Garn	Kasten	Williams
Hayakawa	Stennis	
Heinz	Tower	

So the amendment (UP No. 281) was agreed to.

Mr. SASSER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, if I could have the attention of the Senate, could we have order in the Senate?

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, I shall not take very long, but if I could have the attention of the Senate, I think we can get a better view of where we are and where we are going today and next week on this joint resolution.

Mr. President, I report that as of this moment there are 75 amendments, according to my count, yet to be disposed of on the list of qualified amendments attached to the unanimous-consent request which was granted previously. We have done pretty well. That means that we have disposed of about 28, but it also means we have a long way to go.

It will not offend any Senator, I am sure, when I say that I have a strong feeling that a number of those 75 amendments probably will never see the light of day and that some of them are duplicates, some of them closely coincide with other amendments, some of them may be noncontroversial and some of them may be hedging of bets, and that is all right with me. That is good strategy, and it is good legislative technique, and I have even done a little of that myself from time to time.

I hope I did not shock the conscience of the Senator from New York who has reacted so energetically to this suggestion, but, Mr. President, we have reached the point where we simply must get a realistic view of where we are heading.

May I inquire, are there Senators here who can now tell the leadership that they do not intend to offer their amendments or that they are willing to substantially reduce the time that is allocated under the order or under the special provisions of the order for debate on their amendments?

There are 75 amendments remaining, and I would be most pleased to have any statements by Senators on either side of the aisle in respect to amendments that will not be offered so that we can take them off the list and plan for the remainder of this day and for the time remaining before we reach a third reading.

Mr. President, I would not presume to inquire of the minority Members. I would ask the minority leader instead if he would consider stating that inquiry for his side of the aisle and if indeed he will support the request that I have just made.

Mr. ROBERT C. BYRD. Mr. President, I do support the request, and I wish to see every Senator given an opportunity to adequately debate his amendment.

I think there is ample time remaining in which to do that, but I am also very desirous of seeing the conferences go forward on the reconciliation measure and on the tax bill and with respect to the latter as soon as possible after the House of Representatives passes the bill.

I also wish to see the August recess become a reality which is a matter of law. Senators have planned on it, and I hope we do not have any problems confronting us with respect to airline reservations in the early part of August.

I suggest, therefore, that we redouble our efforts to complete action on this measure as soon as possible. I wish to address my comments to my side of the aisle because we have most of the amendments over here.

Is there any objection on my side of the aisle to moving the third reading on this joint resolution forward by 1 day? In other words, instead of having a third reading at 3 p.m. on Wednesday, is there any objection to making that, say, 6 p.m. on Tuesday? This will give us the remainder of today, it will give us all day Monday, and all day Tuesday to get our amendments in place and have adequate

debate on them and vote on them. Then, it will give the conferees, the managers of the measure, and the staff an additional day within which to get ready for the conference.

I have discussed with the distinguished Senator from Louisiana this morning the length of time that he feels a conference would require, and I am constrained to believe that based on what he said and what Mr. DOLE has said that if they had an additional day we might think in terms of having our August recess begin if not Saturday of next week certainly by Monday the following week.

I hope that I will get a positive response on my side to that suggestion.

Mr. BIDEN. Mr. President, will the Senator yield for an inquiry?

Mr. ROBERT C. BYRD. I yield.

Mr. BIDEN. Mr. President, does that assume that we will stay late enough the other days, today and Monday, in order to get these amendments in, if in fact we wish to? In other words, I have no objection to moving up a day, but I do have an objection if that would mean that we have to end up at the end of the list and are precluded from offering our amendment or debate it on limited time when we are already held to an agreement on some of these amendments.

Mr. ROBERT C. BYRD. I was contemplating the same agreement that we entered into yesterday which, based on the suggestion by Mr. MATSUNAGA, would provide for at least 5 minutes equally divided time on any amendment that was reached at the hour, and in this instance I suggest 6 p.m. on Tuesday; at that hour Senators would at least have 5 minutes within which to explain the amendments so that no Senator would be shut off from offering his amendment.

The majority leader is providing for the Senate to convene on Monday at 10 a.m., with resumption of action on this joint resolution, which I think is a good idea. With 2 full days it seems to me that if we worked diligently and hard we could dispose of these amendments.

I understand several of them will not be brought up, others can be packaged together. I believe, may I say to the distinguished Senator from Delaware, that there is time within which to call up the amendments, debate them, and finish on Tuesday by 6 p.m.

Mr. BIDEN. Mr. President, I do not wish to quarrel with the Democratic leader. But I do not know how quick he can do this. The Democratic leader tells me he thinks we can get the amendments up. I yield to his judgment on it, but I must tell him it worries me a little bit.

Mr. GLENN. Mr. President, I feel much the same way as the Senator from Delaware about this. I have a couple of amendments which we have been trying to work out with the distinguished majority floor leader, Senator DOLE. He is trying to work out the two amendments I have. They are contingent on some of the things going on over in the House. We are trying to get a confirmation on those things.

We have an awful lot of amendments here, and I do not want to enter into any unanimous-consent agreement right now. I seems to me as if we might canvass both sides and find out how many really serious amendments are going to be presented, and try to block in the time.

It worries me that on tax legislation we always, on this most important legislation that we pass in this Congress, almost always, wind up considering these things at 3 or 4 o'clock in the morning, where nobody knows what we are voting on or we rush them through.

I think this tax legislation is some of the most important legislation that this Congress, in fact, many Congresses, may consider because we are changing the direction of the tax code and the budgeting procedure in this country. I would not want to see us rush these through, and I would not want to see my own amendments, which I feel very strongly about on research and development, get edged out.

The distinguished floor manager of the bill, Senator DOLE, is trying to work out these things, and I would not want to enter into a time agreement right now. I say this even though I would like to see us finish at 6 o'clock tonight.

Mr. ROBERT C. BYRD. I did not say tonight. I said Tuesday night.

Perhaps it would be better to say 9 o'clock Tuesday night. May I say I do not make this statement without having some idea of what we have up and without already having done considerable canvassing. But this is not just a shot in the dark. It is an effort to move us on, get the conference going, and be able to keep our scheduled appointments back home with the people. I merely throw out the suggestion. We will consider it more. I will be glad to further canvass the Senators, may I say to the distinguished Senator from Ohio, before we accede to such agreements.

Mr. MATSUNAGA. Mr. President, will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. I yield the floor.

Mr. MATSUNAGA. As I understand it, the majority leader is not seeking to amend the order now that no later than 3 o'clock Wednesday next we will have third reading; am I correct?

Mr. BAKER. Mr. President, I have not put such a request. But I must tell the Senator from Hawaii that I would, with any encouragement at all, do so. But I agree with the distinguished minority leader. I think we can finish on Tuesday instead of Wednesday, and both he and I mentioned that possibility last night in the closing moments of the session, that it should be possible to finish this bill on Tuesday instead of Wednesday, and that if we do not do that, we are going to end up with two big conference reports in our lap, maybe both on the same day.

Mr. MATSUNAGA. As I understand the majority leader correctly now, he is seeking to assess the situation by determining what Senators will or will not offer their amendments. May I suggest that instead of making the general appeal, such as the minority leader is now making, that he work through the whip system, that he make a list of the amendments, and have the whips approach each individual Senator, and I think he will get a much faster answer that way.

Mr. BAKER. Mr. President, I thank the Senator from Hawaii. Of course, I will do that. It does not appear that I am going to get a single response to my request about eliminating amendments, and I find that very disappointing. But I say to my friend from Hawaii we have worked this list over and over and over again, and I believe the minority leader has worked on his side as well. We will work again. But, Mr. President, we simply have to try to identify those amendments on this list, this remaining list of 75, that are not going to be offered so that we can do justice to those which are.

I understand the Senator from Minnesota has asked me to yield, and I do that.

Mr. BOSCHWITZ. Mr. President, I will indeed withdraw my amendment that I have proposed. This will be the fourth amendment I have withdrawn, and I hope others would do the same.

I was presiding yesterday for an hour, and a large portion of that time was given over to quorum calls because there were not Senators prepared to offer their amendments at that time. Some people I know are having trouble with the Treasury, and I hope the distinguished floor leader, Senator DOLE, will push the Treasury along so that some of the amendments that are being held up because of them will move along as well, and I hope other Senators will also bring down their amendments. I will withdraw my amendment on permit expensing in 1981.

Mr. BAKER. Mr. President, if the rules of the Senate permitted, I would ask for a round of applause for the distinguished Senator from Minnesota.

I yield now to the distinguished Senator from Nebraska.

Mr. EXON. I thank the majority and minority leaders.

In the spirit of trying to ease the difficult job the two leaders have, I would like to announce that I have only one amendment, and I am prepared to offer that amendment Monday morning, if that is agreeable with the majority and the minority leaders and the manager and ranking minority manager on this resolution. It has to do with the critical problem of interest rates.

We have scheduled at this time, as I understand it, 1 hour each, 2 hours equally divided. I think it is a rather important amendment. I think we can cut down the time, and in a spirit of trying to move things along, I would like to ask at this time that we amend that to an hour and a half equally divided, 45 minutes on each side.

Mr. BAKER. Mr. President, I yield to the distinguished chairman of the committee and I ask if it is satisfactory to him to reduce the time from 2 hours to 1½.

Mr. DOLE. I can reduce it to 1 hour. The Senator can have 45 minutes and we will take 15.

Mr. ROBERT C. BYRD. I want to reserve the right to object on decreasing the time on that matter. I want to discuss it with the Senator.

Mr. BAKER. I want to say that I appreciate the offer of the Senator from Nebraska and I will make every effort to schedule it on Monday. I am personally very grateful to him.

Mr. EXON. I will withdraw my request to reduce the time.

Mr. BAKER. I thank the Senator.

Mr. President, I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, if the majority leader will yield, it is not my intention to offer the timber evaluation use amendment which is on the list.

Mr. BAKER. Mr. President, I am very grateful to the Senator. Is that the first Symms amendment, the timber estate and gift tax?

Mr. SYMMS. Yes.

Mr. BAKER. Mr. President, I ask unanimous consent that that amendment be removed from the list.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator from Idaho.

Mr. President, I ask unanimous consent that on the Helms amendment dealing with the loss of motor carrier operating authority, if I could have the attention of the distinguished manager of the bill, that the time be reduced from 30 minutes on the Helms amendment on trucking authority down to 10 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the amendment to be offered by the distinguished Senator from Minnesota (Mr. BOSCHWITZ) be removed from the list of agreed amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I might just say to the majority and minority leaders that we have a number of amendments pending right now so we are ready to go.

Mr. BAKER. Mr. President, I guess that is as far as we can go. The dam did not break. We did not get a big flood of Members volunteering to take their amendments down, but I think we have made some progress. I hope both sides, Mr. President, will continue to canvass their Members and try to reduce this list in the course of the day.

I yield the floor, Mr. President.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, as I understand it, the Senator from Montana, the Senator from Ohio, and the Senator from Idaho will be offering amendments shortly; following that the Senator from Rhode Island (Mr. CHAFEE) has an amendment.

The PRESIDING OFFICER. The next amendment is the amendment of the Senator from Montana (Mr. BAUCUS).

Mr. BAUCUS. Mr. President, we have an amendment that is almost ready to go. It will take about 5 or 10 seconds.

Mr. DOLE. Mr. President, I ask unanimous consent that we take up the amendment of Senator CHAFEE, who is here, if that is all right with Senator BAUCUS.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 282

(Purpose: Repealing straight-line method for certain buildings replacing demolished historic structures)

Mr. CHAFEE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE) proposes an unprinted amendment numbered 282.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 74, beginning with line 18, strike out all through page 75, line 9.

On page 114, line 17, strike out "subsection (o)" and insert in lieu thereof "subsections (n) and (o)".

Mr. CHAFEE. Mr. President, this amendment deals with the repealing of the straight-line method for buildings replacing demolished historic structures.

Mr. President, might we have order?

The PRESIDING OFFICER. The request of the Senator from Rhode Island is well taken. The Senate will be in order. Senators wishing to converse will remove themselves from the floor. Staff that are conversing can remove themselves from the Chamber.

The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, the purpose of this amendment is to repeal section 167(n) of the Internal Revenue Code which requires that only the straight-line method can be used to depreciate buildings that replace certified historic structures that have been demolished.

The amendment has a negligible revenue cost—less than $10 million a year, according to the Joint Committee on Taxation—and it is not opposed by the Treasury. In fact, during the Finance Committee markup on this bill, the Treasury Department indicated it would prefer to do away with the straight-line penalty that exists.

Most importantly, Mr. President, my amendment has strong support from the most ardent proponents of historic preservation. Among them I cite the National Trust for Historic Preservation, Preservation Action, and from my own State the Historical Preservation Commission.

The need for this amendment, Mr. President, is quite simple, although it may not be apparent at first glance. When the straight-line penalty was originally put in the code in 1976 it was believed that it would act as a disincentive to tearing down historic buildings. It has been the experience, however, that the straight-line penalty has had a more damaging effect which thwarts the preservation movement. The prospect of having tax penalties imposed on them should their property ever be developed has actually made property-owners resist historic certification.

Mr. Eric Hertfelder, executive director of the Rhode Island Historical Preservation Commission, explained it to me this way:

The net result of the disincentives has been to subvert the National Register; to make it a list of properties that owners will consent to having listed rather than a comprehensive list of those important to our history.

Mr. President, I hope that the committee would accept this amendment without further delay.

Mr. DOLE. Mr. President, I have discussed this amendment with the Senator from Rhode Island. I also discussed it with the staff of the Joint Tax Committee. It does repeal section 167(n) of the Internal Revenue Code which, as indicated by the Senator from Rhode Island, requires that only straight-line depreciation can be used to depreciate buildings that replace demolished historic structures.

For the reasons stated, the Treasury has no objection to the amendment. The cost will be less than $10 million on an annual basis.

Did the Senator discuss this with the distinguished Senator from Louisiana?

Mr. CHAFEE. I did not. I apologize.

Mr. LONG. Will the Senator yield?

Mr DOLE. Yes, I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, it seems to me that, on this side of the aisle, we have been most cooperative in considering amendments. I want to cooperate with the distinguished manager of the bill, who I think is doing a very fine job, and with members of the Finance Committee and all Senators.

I would think, at a minimum, a Senator ought to come and show us an unprinted amendment before he calls it up so we may have an opportunity to take a look at it and to think about it for a few minutes before we are asked to agree to it.

The Senator made a good statement. But I would hope the Senator would lay this amendment aside long enough for us to take a look at it.

Mr. CHAFEE. I certainly will do that. I apologize. A mistake was made and I regret that. I will lay the amendment aside and I will discuss it with the manager of the bill on the minority side and any others who may be concerned.

The PRESIDING OFFICER. Without objection, the amendment is laid aside.

Mr. DOLE. Mr. President, I would ask that we lay aside temporarily the amendment.

The PRESIDING OFFICER. The Chair has already ruled that it is laid aside on the request of the Senator from Rhode Island.

Mr. DOLE. I am happy to yield the floor to the Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana is recognized.

UP AMENDMENT NO. 283

(Purpose: To raise the limit on the special use valuation reduction in valuation to $600,000)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Montana (Mr. BAUCUS), for himself, Mr. GRASSLEY, and Mr. SYMMS, proposes an unprinted amendment numbered 283.

At an appropriate place, insert the following:

Amend section 2032A(a)(2) of the Internal Revenue Code as follows:

Strike the figure "$500,000" and substitute "$600,000."

Mr. BAUCUS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. BAUCUS. Mr. President, it is the understanding of this Senator that this amendment may be considered only by unanimous consent, since it is not precisely the same amendment on the subject that this Senator did get agreement to offer an amendment on. Must this amendment be only considered by unanimous consent?

The PRESIDING OFFICER. The agreement allows an amendment on any one of four subject matters from the Senator from Montana. Is this one of those amendments?

Mr. BAUCUS. Yes, it is.

The PRESIDING OFFICER. Well, then, the amendment is in order.

Mr. BAUCUS. I thank the Chair.

Mr. SYMMS. Will the Senator from Montana yield?

Mr. BAUCUS. Yes.

Mr. SYMMS. Mr. President, I ask unanimous consent to have my name and the Senator from Iowa (Mr. GRASSLEY) added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I originally intended to offer an amendment which would index the cap on special use valuations which is presently part of the Internal Revenue Code as it applies to Federal estate tax.

This bill, as it is presently before the Senate, raises the Federal estate tax exemption from $175,000 to $600,000. The bill also does not touch the present $500,000 special use cap that is presently in the law.

I intended to offer an amendment which would index that $500,000 cap as it applied to ranch and farmlands, lands which under the code can now be valuated according its current use and not according to its best use in order to reduce the Federal estate taxes on those estates.

In discussion with the Treasury and after further discussion with other Members of this body, I soon realized that it would be very difficult, if not impossible, to get that amendment passed. We, therefore, in certain discussions, agreed to this present amendment which raises the $500,000 cap to $600,000.

It is our hope that when this body goes to conference with the other body that cap will be raised in conference even further.

The whole point here is to help farms and ranches meet inflation that they are going to incur in the next several years. We have generally taken care of estates in this bill by raising the Federal estate tax exclusions, exemptions, and other provisions as they apply to Federal estate tax. It is my intention by this amendment to make sure that we also take care of the inflation factor as it will apply to farms and ranches in future years. We are doing so by raising that cap from $500,000 to $600,000.

Mr. President, my amendment is modest in its goals and yet brings greater fairness to our tax structure. It also in a small way starts us on the road toward indexation of taxes which will ultimately bring complete fairness to our tax system.

Briefly stated, my amendment indexes the cap which currently exists on the land use valuation system used by the Internal Revenue Service. The IRS is currently required to evaluate land which is part of an estate according to its best use; however, in the case of farms and ranches and agricultural land, the IRS, after having figured the best use price of the land is then obligated to use the land use formula to determine its value as farmland. After it has completed its calculations, the estate may be reduced up to $500,000. This $500,000 cap was established several years ago and was a fair evaluation of land values at that time.

However, since 1975, land values have soared. For example, in Montana irrigated lands have gone from $485 an acre to $1,155 an acre. Yet the cap remains and estate values have diminished proportionately.

There is no real way to handle this problem other than to change the tax laws every year or to index the cap. Constantly changing the cap to suit the circumstances of time is laborious and obviously not an attainable objective; indexing is the best way to handle the problem.

Finally, let me make one more point: There have been some efforts to remove the cap entirely. I personally think that a cap should be there since total removal will serve the purpose of attracting nonfarm investment into farmland and will be a giveaway to the huge corporate agrifarms. The purpose of this estate tax measure is to protect the small farmer, rancher, and the family farm. It is not to provide tax shelters for huge businesses.

Indexing takes care of that problem.

It is my understanding that this amendment was agreed to by the committee chairman.

Mr. President, I reserve the remainder of my time.

Mr. DOLE. Mr. President, the Senator is correct. I assume the Senator has discussed this change with the distinguished Senator from Louisiana.

Mr. BAUCUS. Yes.

Mr. DOLE. Mr. President, I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, I thank the Senator very much for yielding.

I compliment my friend from Montana for bringing this amendment to the floor. As he stated, he originally chose to index the special use valuation cap, which I believe is an excellent concept and a concept I support. That concept should have been included in our bill. However, I am pleased that Senator BAUCUS, Senator GRASSLEY, the Department of Treasury, and I have reached an agreement. The Senator from Montana is to be commended for initiating this concept at this time. I support the amendment and would encourage my colleagues to vote for it.

Mr. GRASSLEY. Would the Senator from Montana yield?

Mr. BAUCUS. I am happy to yield.

Mr. GRASSLEY. I, too, join in the commendation of the Senator from Montana for offering this amendment. But, more importantly, I would like to compliment him for his willingness to come forth and work out a compromise on both sides. I think that the end goal of increasing the special use valuation is a most worthy objective. I like the concept of indexing to automatically adjust the cap to reflect appreciation so that the estate taxes, or any taxes, can be kept at a reasonable level.

While this amendment may not accomplish the ideal Senator BAUCUS and I were striving for, it still improves current law. I am going to support this amendment and cosponsor it. Adoption of this amendment will improve the situation from the current law which was enacted in 1976, since that time the farmland in Iowa has increased in valuation by 49 percent. This must be recognized. An average farm in Iowa of 300 acres was probably worth about $144,000 back in 1976; today it is worth $619,000. Insisting the cap be kept at $500,000 does not reflect these economic realities.

We need to update the tax code. There is probably no provision of the estate tax that is more beneficial in keeping farms within the family and maintaining the institution of the family farm than the special use valuation.

I rise in support of it and urge my colleagues to do likewise.

Mr. BAUCUS. Mr. President, I thank the Senator from Iowa and the Senator from Idaho for their able assistance on this amendment.

Mr. DOLE. Mr. President, I thank the Senator from Idaho and the Senator from Montana for their willingness to accommodate the concerns of Treasury and others of us concerned about the overall cost of this recordbreaking tax reduction proposal. I support the efforts of the Senators. I am certainly willing to accept the amendment. I understand the Senator from Louisiana is willing to accept the amendment.

Mr. LONG. I accept the amendment.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 283) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The pending amendment is the amendment of the Senator from Kansas.

Mr. DOLE. I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is temporarily laid aside.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I might say to the Senator from Massachusetts we have an amendment which has been agreed upon, I believe. Does the Senator want to follow on?

Mr. KENNEDY. That will be fine.

UP AMENDMENT NO. 284

(Purpose: To amend the Internal Revenue Code of 1954 to clarify the tax exemption for interest on obligations of volunteer fire departments)

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. LUGAR), for himself, Mr. RANDOLPH, Mr. PACKWOOD, Mr. PRESSLER, Mr. D'AMATO, Mr. QUAYLE, and Mr. BRADLEY, proposes an unprinted amendment numbered 284.

Mr. LUGAR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title II add a new section:

"OBLIGATIONS OF CERTAIN VOLUNTEER FIRE DEPARTMENTS"

That (a) section 103 of the Internal Revenue Code of 1954 (relating to interest on certain governmental obligations) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) OBLIGATIONS OF CERTAIN VOLUNTEER FIRE DEPARTMENTS.—

"(1) IN GENERAL.—An obligation of a volunteer fire department shall be treated as an obligation of a political subdivision of a State if—

"(A) such department is a qualified volunteer fire department with respect to an area within the jurisdiction of such political subdivision, and

"(B) such obligation is issued as part of an issue substantially all of the proceeds of which are to be used for the acquisition, construction, reconstruction, or improvement of qualified firefighting property.

"(2) QUALIFIED VOLUNTEER FIRE DEPARTMENT.—For purposes of this subsection, the term 'qualified volunteer fire department' means, with respect to a political subdivision of a State, any organization—

"(A) which is organized and operated to provide firefighting or emergency medical services for persons in an area (within the jurisdiction of such political subdivision) which is not provided with any other firefighting services,

"(B) which is required (by written agreement) by the political subdivision to furnish firefighting services in such area,

"(3) QUALIFIED FIREFIGHTING PROPERTY.—For purposes of this subsection, the term 'qualified firefighting property' means property—

"(A) which is of a character subject to the allowance for depreciation, and

"(B)(i) which is used in the training for the performance of, or the performance of, firefighting or ambulance services, or

"(ii) which is exclusively used to house the property described in clause (i).".

(b) The amendments made by subsection (a) shall apply to obligations issued after December 31, 1968.

Mr. LUGAR. Mr. President, let me say briefly that this amendment addresses the predicament faced by volunteer fire departments in our country who have entered into an agreement with other units of government to perform fire services. That responsibility has been expressly delegated to them through written contracts.

The ability of banks in this country to loan money to these volunteer fire departments and have tax-exempt status for those loans is the concern.

A paid fire department, operating on behalf of a municipality or a county government, or whoever has authority in a governmental sense for fire protection, borrows money to buy equipment. They enjoy tax-exempt status for those securities. My amendment would remove an inequitable situation by permitting volunteer fire departments—expressly charged to perform fire services—are treated similarly to paid fire departments.

Mr. President, clearly the protection of citizens and local businesses is a responsibility of local government. If the Internal Revenue Service succeeds in its present course of taxing the interest income from debt issued to volunteer fire departments however, many firefighting services across the country will face serious difficulties; the increased cost to these firefighting units will lead to either a substantial reduction in firefighting capability or the demise of our volunteer fire department system altogether.

The Senate Finance Subcommittee on Taxation and Debt Management recently held a hearing on S. 979 at which representatives from various volunteer fire departments testified. These spokesmen were, without exception, supportive of the bill.

A number of these representatives suggested that to best fulfill the intent of the bill, two qualifying criteria should be struck. Their comments confirmed a study supplied to me by the Congressional Research Service, stating that a very small percentage of departments would qualify under the original criteria. In response to these constructive criticisms, I have trimmed the amendment to allow legitimate volunteer firefighting organizations—to whom fire protection has clearly been delegated—the same tax exempt treatment currently enjoyed by municipally paid fire services.

Mr. President, I have also strengthened the amendment by requiring departments to operate under written contract, to assure that they are acting as an arm of the political subdivision. None of the fire organizations represented objected to this requirement although some indicated that many of their members did not now operate under such an agreement.

Mr. President, the chairman of the Senate Finance Subcommittee on Taxation and Debt Management (Mr. PACKWOOD) has said, and I fully agree, that volunteer fire departments represent one of this country's strongest example of volunteerism. I might add to this comment, that they offer the taxpayer something he can get nowhere else, expert firefighting services at very little cost.

To allow the IRS to pursue its present course would be to place at risk these praiseworthy and critically important firefighting services.

Finally, Mr. President, it plainly makes no sense for the IRS to impose an additional economic burden on communities already struggling to meet existing financial responsibilities.

Mr. President, this amendment is fully consistent with what the President has called on us to do today. If we accept this amendment, we will guard against an increased economic burden, a small step for this body but a welcome relief for the American people.

Mr. President, we have discussed this amendment with the majority and the minority managers—and believe we have their support for it.

The assumption by IRS has always been, prior to a few months ago, that that was the case. As a result, there is no tax loss, because the loans have been given tax-exempt status. That has now come under question. The purpose of the amendment is to clarify that issue. We have done so, I think, through the proper channels—that is, seeking hearings before the Committee on Finance. Senator PACKWOOD was kind enough to hold such a hearing. A number of witnesses were heard and the amendment that we are now offering with the distinguished cosponsors is a result of that hearing.

Mr. President, I reserve the remainder of my time.

Mr. BIDEN. Will the Senator yield for a moment for me to speak to this amendment?

Mr. LUGAR. Yes, I am happy to yield to the distinguished Senator from Delaware.

Mr. BIDEN. Mr. President, I compliment the distinguished Senator from Indiana on this amendment. I come from one of those States, Mr. President, where the overwhelming percentage of fire protection is provided by volunteer fire services. As a matter of fact, in Delaware, Mr. President, I think we probably have the single most comprehensive volunteer fire protection force that exists in the country in terms of the scope with which they cover the State.

Delaware's population is protected by 61 fire companies—60 of which are volunteer. The Fire Department of the City of Wilmington pays approximately 250 employees. The other 60 fire companies are staffed by close to 7,000 volunteer firefighters. None of these individuals get paid a cent for their hard and dangerous work.

Mr. President, it is a constant battle for these volunteer fire companies—who, I emphasize and reemphasize, as we all know in our own States—are volunteer. These folks do it for nothing. They would add to the budget in my State significantly. Delaware is a relatively small State. If the volunteer fire companies had to go on a paid status, the budgets of the communities serviced by the existing 60 volunteer fire companies would be increased by tens of millions of dollars. This, in turn, would force these communities to cut or even terminate many existing programs and services.

The point I would like to make and the point the Senator from Indiana so eloquently made is that we should be careful that we do all we can to see to it that we accommodate what is a public-spirited volunteer effort that I have yet to find abused anywhere in this country.

The cost benefit to the volunteer fire companies in the Senator's amendment is significant to some individual companies. It literally means a difference in some States and some localities whether or not they are able to provide the services they have. I think this is one of the purposes we should be dealing with.

Mr. President, if there is any tax exemption or tax break that exists anywhere within the tax code or in this tax bill that makes sense, the Senator from Indiana has pointed it out. I shall not delay the Senate any further by going on about the virtues of volunteer fire companies, so I shall simply mention the virtues of this amendment and how important it is to volunteer fire companies around the country. I thank the Senator from Indiana and ask that I may be made a cosponsor of the amendment.

Mr. LUGAR. Mr. President, I ask unanimous consent that the Senator be made a cosponsor.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I come before the Senate today as both a colleague and as a longtime member of the Island Park Volunteer Fire Department. We are 150 volunteers who protect the lives and homes of more than 10,000 residents of three Long Island communities—Island Park, Barbum Isle, and Harbor Isle. I know firsthand that each and every one of those residents believes that this protection is one of—if not the—most important public services provided them.

At least 30 percent of our Nation's population—the citizens of suburban and rural America—depend on more than 25,000 volunteer departments to do what they cannot do as individuals. Each time a rescue vehicle is dispatched; every time an emergency truck rushes to the scene of an accident; for every life saved by a volunteer's fast action, we are witnessing a significant expression of citizenship and community spirit. It is the essence of citizenship and community spirit. It is the essence of caring. It is true Americana.

Clearly, these volunteer departments protect their communities as capably as professional firefighters in urban municipalities. In some cases, unfortunately, they must battle more adverse conditions. One major adversity is financing.

Volunteer departments cannot issue tax-free obligations as professional departments may. This is because we have for too long ignored the fact that most volunteer companies are extensions of the local governments they serve. They have written contracts or agreements to protect those communities. Yet they do not enjoy the tax-free status that municipal departments enjoy. It is time we grant volunteers equity with their professional colleagues.

I am, therefore, cosponsoring this amendment which would allow volunteer departments, meeting four specified criteria, to borrow money at lower interest rates than they are now able to obtain—the same lower rates currently provided to municipal fire departments. Lenders would offer these lower rates, since the interest on such loans would be made tax exempt under this amendment.

Too many departments are struggling with outdated equipment. Replacing or restoring that equipment is just as great a struggle. By lowering the cost of borrowing money, we will not only be saving money for these departments and the taxpayers who help support them, we will also be saving lives.

A firefighting team, whether it is professional or volunteer, is only as good as its rescue equipment. Time saves lives. In those precious seconds after an automobile accident or during the life-threating minutes of a house fire, volunteers must gather from as far away as several miles, ready their equipment and speed to the scene of an accident. If they are slowed by an overworked engine or limited by a less mobile vehicle, lives can be lost—lives that can never be brought back.

Even when emergency teams reach an accident victim in time, they may lack the paramedic equipment needed to sustain life. A large number of volunteer companies purchased paramedic gear in the early 1960's and have used that equipment ever since. They have been unable to afford the high cost of new, lifesaving apparatus. Who knows how many lives might have been saved by such equipment? That is a question all of these selfless volunteers do not want to ask themselves. It is a question I do not want them to face ever again.

Gen. James Doolittle once said:

One trouble with us Americans is that we're fixers rather than preventers.

With the passage of this amendment, we can prove the general wrong. We can prevent needless suffering by making it possible for volunteer fire departments to equip themselves with the most modern lifesaving and firefighting equipment.

The amendment would apply to only those departments which are the sole organized firefighting service in an area, which provide their services vis-a-vis a contract or agreement with the local governments, which receive no less than 50 percent of their funding from a government or governments, and which offer their services without charge.

Earlier, I said the work of volunteer departments is the essence of caring. It is also the essence of unselfishness. Not only do volunteers risk their lives and sacrifice their time for training and emergencies, they do so free of charge. They expect nothing, either as individuals or as a department. Local governments and their taxpayers are happy to provide partial funding of these departments.

It is the same from Maine to California. Volunteer fire departments are too important—too basic—for us to ignore. Here is an amendment that will give these volunteers a badly needed shot in the arm.

Mr. President, this amendment will help our citizens to help themselves. It will support a community service vital to thousands of communities across the United States. I and my fellow volunteers of the Island Park Volunteer Fire Department, like volunteers across the country, have earned your support and deserve passage of this amendment.

● Mr. QUAYLE. Mr. President, as a cosponsor, with my distinguished colleague from Indiana, of S. 979, a bill to amend the Internal Revenue Code of 1954 as it relates to volunteer fire departments, I wish to comment on Senator LUGAR's proposed amendment to the Economic Recovery Act of 1981.

This amendment seeks to reverse a recent IRS ruling that eliminates a volunteer fire department's tax-exempt status in relation to interest paid on borrowed funds.

This Nation's volunteer fire departments perform an essential function in protecting lives and property in both rural and urban areas throughout the country. A volunteer fire department's effectiveness depends primarily upon its ability to acquire top quality equipment. This equipment is acquired through private loans at municipality rates. The consequences of the elimination of these departments' tax-exempt status would obviously be severe.

The Wayne Township Volunteer Fire Department in Indianapolis, Ind., provides an excellent illustration of the potentially detrimental impact of this ruling. The elimination of their tax-exempt status will mean an interest differential of close to $100,000 in the department's efforts to replace its 1949 fire truck. In light of the fact that this highly respected firefighting organization receives substantial funds by agreement with the township trustees and requires no compensation from the community-at-large for its services, the interest tax will impose a substantial burden.

In some communities, this situation could completely eliminate firefighting services. Thus, I urge my colleagues in the Senate to adopt this amendment. In

doing so, they will both promote and preserve the invaluable firefighting services that these men and women provide to this Nation.●

Mr. BRADLEY. I welcome the opportunity to join Senator LUGAR in recognizing the important role that volunteer fire departments play in our communities.

Many believe these outstanding volunteers serve only rural areas of the country. It might startle some of my colleagues to know that in the most densely populated State in the country, my own State of New Jersey, the vast majority of our citizens rely on volunteer firemen to protect their lives and homes.

In Bergen County, New Jersey's most populous county, 66 of the 70 communities are served by volunteer fire departments. In Passaic County, only 3 out of the 19 communities have paid fire departments.

The spirit of voluntarism is an intrinsic part of our Nation's history and development. While stories of individual sacrifice abound as citizens reach out to help others in community service programs, nowhere is it more compelling than in the volunteer fire departments. Here, individuals not only spend time to train, to be constantly available, they risk their very lives to help their neighbors.

It is appropriate that we recognize that sacrifice today, and I am pleased to join the Senator from Indiana as a cosponsor of his amendment.

Mr. LUGAR. Mr. President, I reserve the remainder of my time.

Mr. DOLE. Mr. President, this amendment, as I understand it, is in both House bills—the House bipartisan substitute bill and the Ways and Means Committee proposal. I understand also that there is a bipartisan interest in this proposal. I have no objection to the amendment.

Mr. LONG. Mr. President, I have no objection.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

Mr. D'AMATO. Mr. President, I commend my colleague from Indiana (Mr. LUGAR) who has worked at bringing forth this legislation which I deem to be very critical to a substantial portion of our community, those volunteers who do a yeoman service and who are so often neglected. This legislation will go a long way toward making it possible for them to carry out their very important functions in communities throughout this Nation and, indeed, it is in keeping with the spirit of voluntarism and giving to their fellow citizens. So I commend Senator LUGAR for his work in bringing this legislation to the point where we look forward to its being enacted into law.

Mr. LUGAR. Mr. President, I am especially indebted to Senator D'AMATO for his work in this field. He has been champion of the volunteer fire departments in his public service to local government and he continues to be that in the Senate.

Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 284) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 285

(Purpose: To increase the amount of the credit for the elderly)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. DOLE. Mr. President, will the Senator yield so I may temporarily lay aside my amendment?

Mr. KENNEDY. Yes.

Mr. DOLE. I ask unanimous consent for that purpose, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) for himself, Mr. MOYNIHAN, Mr. BUMPERS, Mr. PRYOR, Mr. SASSER, Mr. MATSUNAGA, Mr. CANNON, Mr. RANDOLPH, Mr. DIXON, Mr. DODD, and Mr. RIEGLE, proposes an unprinted amendment numbered 285.

Mr. KENNEDY. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I, add the following new subtitle:

Subtitle —Credit for the Elderly

SEC. . INCREASE IN THE AMOUNT OF THE CREDIT FOR THE ELDERLY.

(a) IN GENERAL.—

(1) SECTION 37 AMOUNT.—Paragraph (2) of section 37(b) (relating to initial amount) is amended—

(A) by striking out "$2,500" in subparagraphs (A) and (B) and inserting in lieu thereof "$3,000",

(B) by striking out "$3,750" in subparagraph (C) and inserting in lieu thereof "$4,500", and

(C) by striking out "$1,875" in subparagraph (D) and inserting in lieu thereof "$2,250".

(2) ADJUSTED GROSS INCOME LIMITATION.—Paragraph (1) of section 37(c) (relating to adjusted gross income limitation) is amended to read as follows:

"(1) ADJUSTED GROSS INCOME LIMITATION.—The section 37 amount shall be reduced by 50 percent of the excess of the adjusted gross income of the taxpayer over—

"(A) $15,000 in the case of a single taxpayer,

"(B) $17,500 in the case of a joint return, or

"(C) $8,750 in the case of a married individual filing a separate return.".

(3) ELECTION OF PRIOR LAW WITH RESPECT TO CERTAIN INCOME.—Subsection (e) of section 37 (relating to election of prior law with respect to public retirement system income) is amended—

(A) by striking out "$2,500" each place it appears and inserting in lieu thereof "$3,000";

(B) by striking out "$3,750" each place it appears in paragraph (6) and inserting in lieu thereof "$4,500", and

(C) by striking out "$1,875" in paragraph (7) and inserting in lieu thereof "$2,250".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

Mr. KENNEDY. Mr. President, I offer this amendment in behalf of myself, Mr. MOYNIHAN, Mr. BUMPERS, Mr. PRYOR, Mr. SASSER, Mr. MATSUNAGA, Mr. CANNON, Mr. RANDOLPH, Mr. DIXON, Mr. DODD, and Mr. RIEGLE.

Mr. President, under current law, income from social security benefits is exempt from Federal income tax. In order to provide comparable tax treatment for elderly persons whose retirement income from other sources is taxable, the Internal Revenue Code provides an elderly tax credit equal to 15 percent of retirement income up to $2,500 for single persons and $3,750 for couples, The credit is phased out beginning at $7,500 of income for single persons and $10,000 for couples.

Although social security benefits have been indexed each year for inflation, the tax credit for the elderly has not been increased since the Tax Reform Act of 1976. As a result of 5 years of high inflation, the comparability intended for beneficiaries of the elderly tax credit has not been maintained.

To reduce this unfair differential, our amendment would increase the base for the elderly tax credit to $3,000 for single persons and $4,500 for couples. It would also increase the beginning of the phaseout range to $15,000 for single persons and $17,500 for couples. The maximum credit would increase from $375 to $450 for single persons, and from $562 to $675 for couples.

These changes are identical to the measure approved by the Senate Finance Committee in 1978 and adopted by the full Senate, but later dropped by the conferees. The revenue cost was estimated then at $278 million a year, benefiting nearly 2 million elderly taxpayers. Virtually all of these taxpayers have income under $50,000 a year, and 94 percent have income under $20,000 a year.

I urge the Senate to support this amendment. Police officers, firefighters, teachers, and Federal, State, and local government retirees deserve the fair tax treatment that Congress intended when it enacted the elderly tax credit.

This important protection in the tax law for elderly persons was originally enacted in 1954. It was updated in 1962, and again in 1976—and it should be updated in 1981.

Mr. President, I ask unanimous consent that a letter from the American Association of Retired Persons and the National Retired Teachers Association, and a letter from the National Association of Retired Federal Employees in support of the amendment may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL RETIRED TEACHERS ASSOCIATION AND AMERICAN ASSOCIATION OF RETIRED PERSONS,

July 21, 1981.

DEAR SENATOR: The National Retired Teachers Association and the American Association of Retired Persons urge you to approve an amendment to the tax cut bill

(H.J. Res. 266) to update the tax credit for the elderly (TCE). This provision is designed to provide comparable tax relief for public pensioners—such as retired teachers, policemen, firemen and others—as is available for social security beneficiaries. The TCE, however, has not been updated since 1976. During that time, social security beneficiaries have received five cost-of-living increases aggregating almost 58 percent. Quite clearly, the tax credit for the elderly no longer provides comparable tax relief for government pensioners with little or no social security benefits.

We recommend that the maximum amounts for computing the 15-percent TCE be raised from $2,500 to $3,000 for older single persons and from $3,750 to $4,500 for elderly couples. This change alone could provide up to $75 in additional tax relief for aged individuals and $112.50 for older couples.

Second, we urge that the adjusted gross income phase-out provisions be raised to more realistic levels—from $7,500 to $15,000 for aged individuals and from $10,000 to $17,500 for elderly couples. Under this approach, single aged taxpayers would be potentially eligible for the TCE if their adjusted gross income is less than $21,000. The cut-off point for elderly couples would be $26,500.

Under present law, the maximum amount for computing the TCE is reduced by $1 for each $2 of income above $7,500 for aged single persons and $10,000 for elderly couples. The net impact is that the TCE is effectively phased out for individuals with adjusted gross income of $12,500 and for couples with adjusted gross income of $17,500. These phase-out levels are too low and deny many middle-income older taxpayers essential tax relief. Moreover, these restrictions contradict the credit's basic objective, which is to provide equal tax treatment for social security and non-social security retirees.

This proposal is virtually identical to a measure approved almost unanimously by the House and Senate in 1978. Strong support existed then to update the TCE. The case is even more compelling now because inflation is whittling away at the tax relief provided by the TCE.

Our Associations strongly believe that this proposal is a soundly conceived and legislatively feasible approach to provide needed tax relief to elderly persons whose pensions are subject to federal income tax. For these reasons, we reaffirm our support for this measure and urge you to adopt it.

Sincerely,

PETER W. HUGHES,
Legislative Counsel.

NATIONAL ASSOCIATION OF
RETIRED FEDERAL EMPLOYEES,
Washington, D.C., July 21, 1981.

DEAR SENATOR: On behalf of the 435,000 members of the National Association of Retired Federal Employees (NARFE), I respectfully request your support of an amendment which will be offered to the 1981 Tax Reform measure (H.J. Res. 266) to update the Tax Credit for the Elderly (TCE) and thus provide some degree of tax relief to older Americans with little or no tax free Social Security income. Since the majority of Federal retirees and survivors are in this category, the amendment to be offered is of considerable importance to our membership.

The Tax Credit for the Elderly was enacted into law in 1976, with the intent of providing tax relief to retirees with little or no Social Security income, but for many of the truly elderly, those over age 65, the new credit provided little relief because of the imposition of a credit phase-out based on the individual's adjusted gross income. In 1978 both the House and Senate overwhelmingly approved liberalization of the Tax Credit for the Elderly, but the provision was eliminated in a conference committee.

The TCE Amendment which will be offered in the Senate in the near future will update the income levels on which the credit is based from $2500 to $3000 for an individual ($3750 to $4500 for a married couple), and more importantly, will upwardly adjust income phase-out figures from $7500 to $15,000 for individuals ($10,000 to $17,500 for a couple).

Our Association has long urged the total elimination of the income phase-out restrictions under the TCE, but the phase-out figures set forth in this amendment would certainly provide long overdue relief and have our full support. Since the current TCE figures were established in 1976, both the Consumer Price Index and Social Security benefits have increased by more than 55 percent, yet the tax relief provided to Federal retirees and others with little or no tax free Social Security income has not been changed at all. We, therefore, urge your support of this amendment.

Sincerely,

MICHAEL C. NAVE,
President.

Mr. KENNEDY. Mr. President, the basic purpose of the tax credit for the elderly is to provide a comparable tax treatment between elderly persons who receive social security benefits and other elderly persons who receive the bulk of their retirement income in other forms, principally from private pension plans, civil service retirement, State and local government pension plans, and small earnings. Social security benefits are tax free. The tax credit for the elderly assures that the elderly with taxable income from other sources will get tax relief comparable to that provided by the tax exemption for social security benefits. The last time the tax credit for the elderly was increased was in 1976. Social security benefits have increased substantially since then to offset inflation, but the tax credit for the elderly has not been increased at all.

The primary beneficiaries of this amendments will be the retired police officers, firefighters, teachers, and other State and local retirees, and retired Federal employees. It is strongly supported by the American Association of Retired Persons, the National Retired Teachers Association, and the National Association of Retired Federal Employees.

What we are trying to do with this amendment is to restore the tax parity between social security retirees and other retirees. These are elderly Americans who are hard pressed by inflation. Under any standard of equity and fairness, they are entitled to this relief. If we fail to provide it, we are discriminating against these retirees. I believe that is unfair and unacceptable, and I hope the Senate will approve this amendment.

Mr. MATSUNAGA. Mr. President, will the distinguished Senator from Massachusetts yield?

Mr. KENNEDY. I yield to the Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, as a cosponsor of the amendment and as the introducer of a bill which would have accomplished the same thing that this amendment proposes to accomplish, I strongly support the amendment.

As the Senator from Massachusetts has ably stated, this would bring equity to those who are not under the social security program. I particularly have in mind Federal employees—that they would be paying taxes on their retirement on an unequal basis with the social security beneficiaries, who are exempt, to the extent of the social security benefits. The Federal employees do not have the benefit of such an exemption.

By the amendment which is now pending, equity will be brought to Federal and private employees who retire without the benefits that social security beneficiaries receive.

I commend the Senator from Massachusetts for taking the leadership in this matter.

Mr. KENNEDY. I thank the Senator for his helpful comments and for his strong support.

Mr. President, we can achieve this measure of equity for elderly people for approximately $300 million a year. It means increased tax relief of about $100 for each of several million elderly Americans who are suffering from inflation.

If we do not do this, we are really saying to the retired police officers, firefighters, teachers, Federal employees, and others, "You must bear an undue burden in the fight against inflation, while others are not asked to bear that burden."

We know that this tax bill does not provide fair tax relief to low- and middle-income families. Equity demands that we try to respond to the very special needs of our elderly citizens.

I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I am prepared to vote.

Mr. SYMMS. I yield myself such time as I may need.

Mr. President, I am aware of the concern the distinguished Senator from Massachusetts brings to this Chamber today, but it is important that we consider that no revenue is provided to pay for the expansion of this tax credit for the elderly.

How much would it cost the Treasury?

Mr. KENNEDY. About $300 million a year—only a small fraction of what was being asked 2 nights ago for the major oil companies, when the effort was made to cut back the windfall profit tax. That was a proposal to give billions of dollars to the major oil companies, but there was no argument raised at that time that the revenues were not there for them. We are trying now to take care of some elderly people who have retired.

[Applause in the galleries.]

The PRESIDING OFFICER. The galleries will be in order.

Mr. SYMMS. I thank the distinguished Senator from Massachusetts.

I believe the Senator will agree with me that those taxes that are levied against the major oil companies are ultimately paid by people, so that the oil companies are collectors of taxes, not payers of taxes. It is people who pay

those taxes, at any rate. So it becomes somewhat of an academic argument.

In this particular case, we should also consider that one purpose for the elderly credit is to provide those with a retirement income, a tax benefit comparable to the tax exemption for social security and railroad retirement beneficiaries. The question of retirement income and the role of Government in taxing or subsidizing such income is a broader one than can be dealt with by a single amendment to a tax bill.

I believe this whole area deserves more careful consideration and review. There is some risk here in addressing this matter in a piecemeal fashion, whether it costs $300 million, $3 million, or $300 billion. We probably should not try to address this particular issue in this bill because, after all, this is a tax measure that is aimed toward encouraging economic productivity and encouraging broader real growth in our economy.

Another reason for the elderly credit is to aid elderly taxpayers who continue to work. Again, the question of incentives and disincentives to working after retirement age is a broad question of social policy and should not be addressed in a haphazard fashion.

Although there may be some merit to it and the Finance Committee might come to the conclusion that this is a better approach, we will have to work on this matter in the Finance Committee.

We agreed to a resolution in this body by unanimous consent—I believe every Member of the Senate voted for it—to address the entire question of the social security problems, and incentives impacting on our senior citizens at a later date.

This motion is not in congruence with the rest of this legislation.

I think the major opposition I find to the amendment simply is that it does not comply with the intention of this tax measure.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. SYMMS. Mr. President, I simply encourage the Members of the Senate to vote down this proposal today and assure them that the Finance Committee is going to take a very careful look at this proposition. This should be discussed in the second tax bill.

I urge a no vote on this proposition.

Mr. KENNEDY. Mr. President, I yield myself such time as I may require.

This amendment has absolutely nothing to do with social security. It is designed to provide tax relief to retirees who are not receiving tax-exempt social security benefits. We are talking about a concept which has been accepted for nearly 30 years, since the time that this credit was first put into effect in 1954. It has gradually been increased since then. In 1978, this same amendment was accepted without dissent in the Senate.

Now I hear the Senator from Idaho questioning whether this is an appropriate measure. He asks, What is the incentive to the individual?

We are talking about retirees, men and women who served their country well and are retired now. We are talking about some of the neediest people in our society.

This bill contains billions of dollars for the major oil companies. I think it can afford a few hundred million dollars for the elderly.

This has absolutely nothing to do with social security. This is not a revolutionary or new concept. It has been in the tax laws since 1954.

What we are asking is for some degree of fairness and equity, that when we are lowering the taxes for the wealthiest individuals in this country, we should bring the retirees up to some degree of equity and fairness, and not say we are going to lower the taxes for the wealthiest individuals in our society but we are shutting the door on retirees.

It just seems this is a very modest program and a very measured one, one that has been accepted by this body before.

I think a no vote on this is saying to the retirees, "We are going to let you bear the brunt of the fight against inflation, not the wealthiest individuals, who are going to get the tax cuts, but you are the ones who are going to bear the brunt in the fight against inflation."

I think that is unfair and that is unjust, and I am prepared to let the Senate make its judgment. I am prepared, if the Senator from Kansas is, to yield back my time.

Mr. DOLE. Mr. President, I say to the Senator from Massachusetts, again, that this is a very attractive amendment. The Senator from Kansas has had some association with this amendment in earlier years. I appreciate his statement about our efforts here, and his concern that we have not been as successful as some might have wished with reference to newly discovered oil. But I also must indicate that this amendment, as the Senator properly stated, costs about $300 million a year. I just hope that this is an issue we might address on the second tax bill, and there will be a second tax proposal, I can say to the Senator from Massachusetts.

I am prepared to yield back my time.

Mr. KENNEDY. I yield back the remainder of my time.

Mr. PERCY. Mr. President, I regretfully must oppose the amendment offered by the Senator from Masachusetts (Mr. KENNEDY).

While I wholeheartedly agree with the intent of the amendment to increase the credit for the elderly, I do not think this is the appropriate time to address the issue.

Mr. President, the tax bill now before us is an integral part of the President's economic recovery plan. It provides tax reductions and incentives that are sorely needed to stimulate the economy, boost productivity, and provide strong and steady economic growth in the future. This amendment is not directly related to that purpose and should be addressed at a later time.

As a member of the Senate Special Committee on Aging, I am very sensitive to the income security of older persons in this country. They are the group that is hardest hit by inflation. It only makes sense that we take action to maintain equitable tax treatment of retirement income.

The credit for the elderly is designed to give persons with fully taxable retirement income the same tax advantages as persons receiving tax-free social security benefits. The credit has not increased since 1976 while social security benefits, which are automatically adjusted for inflation, have continued to rise.

The Kennedy amendment would recognize this by increasing the amount of income eligible for the credit and by raising the levels of income at which the credit phases out. It is identical to a provision passed by the Senate in 1978 as part of the Revenue Act. Unfortunately, it was deleted by the joint House-Senate conference commitee and did not become law.

I support this update of our tax laws and hope the administration will include such a provision in its second tax bill which I understand will be drafted and sent to the Congress in mid-October.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts. On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The result was announced—yeas 44, nays 50, as follows:

[Rollcall Vote No. 219 Leg.]

YEAS—44

Baucus	Hart	Nunn
Biden	Hawkins	Pell
Bradley	Hollings	Pressler

NOT VOTING—6

Cannon	Hayakawa	Tower
Garn	Heinz	Stennis

So Mr. KENNEDY's amendment (UP No. 285) was rejected.

Mr. DOLE. I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Kansas.

Mr. DOLE. I move to lay that aside temporarily.

I yield to the Senator from New York (Mr. D'AMATO).

The PRESIDING OFFICER. The Senate will be in order.

UP AMENDMENT NO. 286

(Purpose: To make permanent certain rules relating to travel expenses of State legislators)

Mr. D'AMATO. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO), for himself, Mrs. HAWKINS, and Mr. MURKOWSKI, proposes an unprinted amendment numbered 286.

Mr. D'AMATO. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SEC. TRAVEL EXPENSES OF STATE LEGISLATORS.

(a) IN GENERAL.—Section 162 (relating to trade or business expenses) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h) STATE LEGISLATORS' TRAVEL EXPENSES AWAY FROM HOME.—

"(1) IN GENERAL.—For purposes of subsection (a), in the case of any individual who is a State legislator at any time during the taxable year and who makes an election under this subsection for the taxable year—

"(A) the place of residence of such individual within the legislative district which he represented shall be considered his home,

"(B) he shall be deemed to have expended for living expenses (in connection with his trade or business as a legislator) an amount equal to the sum of the amounts determined by multiplying each legislative day of such individual during the taxable year by the greater of—

"(i) the amount generally allowable with respect to such day to employees of the State of which he is a legislator for per diem while away from home, to the extent such amount does not exceed 110 percent of the amount described in clause (ii) with respect to such day, or

"(ii) the amount generally allowable with respect to such day to employees of the executive branch of the Federal Government for per diem while away from home but serving in the United States, and

"(C) he shall be deemed to be away from home in the pursuit of a trade or business on each legislative day.

"(2) LEGISLATIVE DAYS.—For purposes of paragraph (1), a legislative day during any taxable year for any individual shall be any day during such year on which—

"(A) the legislature was in session (including any day in which the legislature was not in session for a period of 4 consecutive days or less), or

"(B) the legislature was not in session but the physical presence of the individual was formally recorded at a meeting of a committee of such legislature.

"(3) LEGISLATORS WHO RESIDE NEAR CAPITAL.—Paragraph (1) shall not apply to any legislator whose place of residence described in paragraph (1)(A) is 50 or fewer miles from the nearest point on the border of the city (or comparable political subdivision) in which the State capital is located.

"(4) ELECTION.—An election under this subsection for any taxable year shall be made at such time and in such manner as the Secretary shall by regulations prescribe.".

(b) EFFECTIVE DATE.—

(1) The amendment made by this section shall apply to taxable years beginning after December 31, 1980.

Mr. D'AMATO. Mr. President, I ask unanimous consent that Senator HAWKINS and Senator MURKOWSKI be added as cosponsors to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I am proposing an amendment to House Joint Resolution 266 with minimal revenue implication—less than $30 million over the next 6 years. This amendment would restore and make permanent expired provisions of the Internal Revenue Code relating to the travel expenses of State legislators.

Prior to 1981 State legislators were allowed to treat their residence in their legislative district as their tax home. Thus, they were entitled to take deductions for reasonable living expenses on legislative days when they were required to stay away from this home overnight on legislative business.

However, this reasonable and equitable provision has been inexplicably allowed to expire. The tax home for State legislators, consequently, is now defined as their principal place of business. For most of them this is the State capital. Thus, they receive no tax deductions to partially offset the necessary expense of maintaining two homes during the legislative session.

This situation results in unfair treatment of our fellow legislators. They should be allowed to deduct the additional travel and living expenses necessary to the proper performance of their legislative duties.

My amendment would allow a State legislator to use his or her legislative district as a tax home. A legislator making such an election would be treated as having expended an amount equal to the greater of his or her State per diem or the Federal per diem in that State capital on each legislative day. However, no matter how large the State per diem is, there is a safety valve which limits the maximum deduction to 110 percent of the Federal per diem. The bill would also deem an electing legislator to be away from home on legislative business on each legislative day.

My amendment is similar to the one adopted by the House Committee on Ways and Means as part of their tax package last week. There is one major difference. My amendment would make these provisions permanent parts of the IRS Code, instead of simply authorizing them for 2 more years. There is no reason for these legitimate deductions of State legislators to be less justified in the future than they are today. There is no reason for us to have to repeat this process next year. Thus, there is no reason not to make these deductions a permanent part of the Internal Revenue Code. The Ways and Means temporary extension was done to artificially keep their package within budget guidelines in the outvears. We should not play such games with our fellow legislators.

My amendment adopts the Ways and Means version in the restriction of these deductions to State legislators whose residences are more than 50 miles away from their State capital. This is consistent with other provisions of the Internal Revenue Code which make it clear that commuting expenses are not deductible costs for individuals in other professions. One hundred miles a day seems to be the maximum reasonable amount to require State legislators to commute. This new provision is retroactive only to January 1, 1981.

Mr. President, this amendment entails virtually no revenue loss. This amendment merely continues current law. This amendment is necessary to restore fair and just tax treatment to our fellow legislators. I urge its immediate adoption.

I might add I had the opportunity to speak to our distinguished colleague from Louisiana (Mr. LONG) who has indicated he has no objection to this proposal, and neither does the distinguished chairman, the Senator from Kansas (Mr. DOLE).

Mr. DOLE. I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, I would like to be added as a cosponsor to the Senator's amendment. I think it is a good proposal. It does meet a problem which confronts members of State legislatures. I think it is right and fair. I hope very much it will be agreed to. I hope the manager of the bill will accept the amendment. The State legislators have been treated unfairly for a number of years.

Mr. D'AMATO. Mr. President, I ask unanimous consent to add the Senator from Louisiana as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I am willing to accept the amendment. I think the official position of Treasury would be in opposition to the amendment. State legislators are probably treated more favorably now than any other taxpayers, certainly better than Members of Congress. We have taken the retroactive provision, which is better than the provision in the House bill.

I am aware that there are many of our friends in the State legislatures with a deep interest in this matter.

There is the so-called Chappie case

which was decided correctly, in the opinion of many.

Here we are doing this prospectively so that would be a plus. On that basis, I have no objection to the amendment. I thank the distinguished Senator from New York for bringing this matter to our attention. I am certain every Member of this body has heard from one or two of his personal friends in the State legislative bodies. I do not quarrel with that, but I would suggest it is not a bad deal we are providing.

I ask unanimous consent that a description of the amendment be inserted at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATE LEGISLATORS EXPENSES

PRESENT LAW

Under present law, a State legislator may elect to treat the legislative district represented as his or her tax home. If such an election is made, the State legislator is entitled to a deduction for living expenses equal to the sum of the amount determined by multiplying each legislative day of the individual by the amount of the Federal per diem for the location of the legislature. For this purpose, the term "legislative day" includes only days on which the legislator was away from home overnight on specified legislative business.

The provisions of present law apply to taxable years beginning before 1981.

AMENDMENT

The amendment would replace the provisions of present law with a permanent rule for the deductibility of expenses of State legislators. Generally, the new rule would be similar to that of present law. However, an electing legislator would be treated as having expended an amount equal to the sum determined by multiplying each of the legislator's legislative days by the greater of the Federal per diem or the State per diem (but not in excess of 110 percent of the Federal per diem). The amendment would overrule the away-from-home rule for State legislators.

EFFECTIVE DATE

The amendment would apply to taxable years beginning on or after December 31, 1980.

REVENUE EFFECT

It is estimated that this amendment would reduce budget receipts by $2 million in fiscal year 1981, $11 million in fiscal year 1982, $5 million in fiscal year 1983, by $6 million in fiscal years 1984 and 1985, and $7 million in fiscal year 1986.

Mr. D'AMATO. I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 286) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that the amendment be temporarily laid aside.

AMENDMENT NO. 282

Mr. CHAFEE. Mr. President, I ask unanimous consent that we might return to my amendment which we were previously considering.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, this amendment has been cleared with the minority and I have also discussed it with the distinguished senior Senator from New York, who is interested in this matter. He approves of the action which I am proposing.

Mr. President, at this time I move adoption of the amendment I have proposed.

Mr. DOLE. Mr. President, as the Senator from Rhode Island has indicated, he has discussed this amendment with Senator LONG. I know of no objection to the amendment. I am prepared to accept the amendment.

Mr. BOREN. Mr. President, as has been indicated, this amendment has been cleared with the ranking minority member, Senator LONG, and there is no objection on this side of the aisle.

Mr. CHAFEE. I move adoption of the amendment.

Mr. CHAFEE subsequently said: Mr. President, this morning when I discussed my amendment repealing the straight-line disincentive for the demolition of historic structures, I stated that the proposal was supported by many historic preservation organizations.

For the benefit of my colleagues, I ask unanimous consent that letters to this effect from the National Trust for Historic Preservation, Preservation Action and the National Conference of State Historic Preservation Officers be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL TRUST FOR
HISTORIC PRESERVATION,
Washington, D.C., July 24, 1981.

Hon. JOHN H. CHAFEE,
Dirksen Senate Office Building,
U.S. Senate, Washington, D.C.

DEAR SENATOR CHAFEE: The National Trust for Historic Preservation commends you on your initiative in sponsoring an amendment to the Economic Recovery Act of 1981 to repeal Section 167(n), the so-called straight-line disincentive.

The straight-line disincentive has been a major point of contention since enactment of the Tax Reform Act of 1976. There are some organizations that feel the demolition disincentives have stopped the destruction of some historic buildings. However, more often than not, these provisions have resulted in vocal opposition to National Register designation of historic commercial districts in our nation's older cities, including Providence, St. Louis, and my own city of Cincinnati.

Most importantly, the straight-line disincentive created a wide-spread misperception that National Register listing constituted an infringement on private property rights. I feel confident that your amendment, if enacted, will reverse this misperception and restore public confidence in the National Register as an invaluable objective inventory of those sites, buildings and objects significant in our nation's history and culture that merit preservation.

Sincerely,

MICHAEL L. AINSLIE,
President.

NATIONAL CONFERENCE OF STATE
HISTORIC PRESERVATION OFFICERS,
Washington, D.C., July 24, 1981.

Hon. JOHN H. CHAFEE,
U.S. Senate, Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR CHAFEE: We understand that you have offered several amendments which are designed to facilitate the tax provisions for historic preservation. We agree with and support your efforts to remove the disincentives which now exist. Although as preservationists we would like the opportunity to work with property owners prior to demolition, a goal of the disincentives, the administrative problems appear to overcome the potential benefits achieved through the disincentives. The issue of the disincentives was brought before our membership in April of 1979. At that time, we attempted to overcome the problems through regulatory change. The problems which grow from the disincentives have continued and therefore we support your efforts.

Sincerely,

J. RODNEY LITTLE,
President.

PRESERVATION ACTION,
Washington, D.C., July 24, 1981.

Senator JOHN H. CHAFEE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHAFEE: Preservation Action, the national citizen's lobby for historic preservation and neighborhood conservation, endorses your amendment to the Senate tax bill—H.J. Res. 266—that will eliminate the straight-line disincentive enacted as a part of the 1976 Tax Reform Act provisions affecting historic structures.

Our organization represents over 1,200 organizations and individuals in every State of our nation who are concerned with the revitalization of our cities, particularly the older cities. In the enactment of the 1976 Tax Reform Act, tax incentives for the certified rehabilitation of commercial historic buildings proved so attractive that over $1.1 billion of revitalization has already been accomplished. Within the same provisions, the disincentive controlling replacement structures on the site of a demolished historic building was originally viewed as a factor to enhance preservation efforts. However, after five years of experience and controversy, we now acknowledge that such a disincentive has helped little and has more often proven to be a detriment to historic designation and neighborhood improvement. In the worst cases, after the destruction of a historic structure, we have seen a proliferation of parking lots rather than compatible new structures.

Preservation Action applauds your amendment as a good addition to the Senate proposals for rehabilitation of older buildings and historic structures. We have lobbied extensively for a margin of tax credit that would make certified rehabilitation of historic buildings more attractive than their defacement, demolition, or replacement. We are satisfied that the proposals within H.J. Res. 266, as amended by Senator Dole this week, offer attractive options to developers, particularly for residential rental use. By virtue of the investment tax credit proposals, we believe that preservation will play an even more significant role than it has in the past as catalyst in the revitalization of towns and cities of all sizes. Certainly there are no more enthusiastic preservationists in the country than in your own State of Rhode Island, and we look to them to lead the way.

Thank you for your continuing interest and support of our cause.

Sincerely,

NELLIE L. LONGSWORTH,
President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 282) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Does the Senator from Rhode Island have any other amendment that he might wish to bring up?

Mr. CHAFEE. I will not bring up any other amendment.

Mr. DOLE. I ask unanimous consent that the other amendment to be proposed by Senator CHAFEE be removed from the list.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question recurs on the amendment of the Senator from Kansas.

Mr. DOLE. I wonder if I might pose a question to Senator D'AMATO. He has an amendment listed concerning savers credit. Is it the intention of the Senator to call up that amendment?

Mr. D'AMATO. If I might have an opportunity to consult with my staff concerning certain revisions, I will be better able to inform the Senator from Kansas as to whether or not I will bring up the amendment.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

UP AMENDMENT NO. 287

(Purpose: To allow an unlimited marital deduction for estate and gift tax purposes for the transfer of certain life estates to a spouse)

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator ask unanimous consent that the pending amendment be temporarily laid aside?

Mr. SYMMS. I ask unanimous consent, Mr. President, that the Dole amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS), for himself and Mr. BOREN, proposes an unprinted amendment numbered 287.

On page 231, between lines 7 and 8, insert the following new subsection:

(d) ELECTION TO HAVE CERTAIN LIFE INTERESTS QUALIFY FOR MARITAL DEDUCTION.—

(1) ESTATE TAX.—Subsection (b) of section 2056 is amended by adding at the end thereof the following new paragraphs:

"(7) ELECTION WITH RESPECT TO LIFE ESTATE WITH RESPECT TO SURVIVING SPOUSE.—

"(A) IN GENERAL.—In the case of qualified terminable interest property—

"(i) for purposes of subsection (a), such property shall be treated as passing to the surviving spouse, and

"(ii) for purposes of paragraph (1)(A), no part of such property shall be treated as passing to any person other than the surviving spouse.

"(B) QUALIFIED TERMINABLE INTEREST PROPERTY DEFINED.—For purposes of this paragraph—

"(i) IN GENERAL.—The term 'qualified terminable interest property' means property—

"(I) which passes from the decedent,

"(II) in which the surviving spouse has a qualifying income interest for life, and

"(III) to which an election under this paragraph applies.

"(ii) QUALIFYING INCOME INTEREST FOR LIFE.—The surviving spouse has a qualifying income interest for life if—

"(I) the surviving spouse is entitled to all the income from the property, payable annually or at more frequent intervals, and

"(II) no person has a power to appoint any part of the property to any person other than the surviving spouse.

Subclause (II) shall not apply to a testamentary power in the surviving spouse exercisable by the surviving spouse alone in all events.

"(iii) PROPERTY INCLUDES INTEREST THEREIN.—The term 'property' includes an interest in property.

"(iv) SPECIFIC PORTION TREATED AS SEPARATE PROPERTY.—A specific portion of property shall be treated as separate property.

"(v) ELECTION.—An election under this paragraph with respect to any property shall be made by the executor on the return of tax imposed by section 2001. Such an election, once made, shall be irrevocable.

(8) SPECIAL RULE FOR QUALIFIED CHARITABLE REMAINDER TRUSTS.—

"(A) IN GENERAL.—If the surviving spouse of the decedent is the only noncharitable beneficiary of a qualified charitable remainder trust, paragraph (1) shall not apply to any interest in such trust which passes or has passed from the decedent to such surviving spouse.

"(B) DEFINITIONS.—For purposes of subparagraph (A)—

"(i) NONCHARITABLE BENEFICIARY.—The term 'noncharitable beneficiary' means any beneficiary of the qualified charitable remainder trust other than an organization described in section 170(c).

"(ii) QUALIFIED CHARITABLE REMAINDER TRUST.—The term 'qualified charitable remainder trust' means a charitable remainder annuity trust or charitable remainder unitrust (described in section 664)."

(2) GIFT TAX.—Section 2523 is amended by adding at the end thereof the following new subsections:

"(f) ELECTION WITH RESPECT TO LIFE ESTATE FOR DONEE SPOUSE.—

"(1) IN GENERAL.—In the case of qualified terminable interest property—

"(A) for purposes of subsection (a), such property shall be treated as transferred to the donee spouse, and

"(B) for purposes of subsection (b)(1), no part of such property shall be considered as retained in the donor or transferred to any person other than the donee spouse.

"(2) QUALIFIED TERMINABLE INTEREST PROPERTY.—For purposes of this subsection, the term 'qualified terminable interest property' means any property—

"(A) which is transferred by the donor spouse,

"(B) in which the donee spouse has a qualified income interest for life, and

"(C) to which election under this subsection applies.

"(3) CERTAIN RULES MADE APPLICABLE.—For purposes of this section, the rules of clauses (ii), (iii), and (iv) of section 2056(b)(7)(B) shall apply.

"(4) ELECTION.—An election under this subsection with respect to any property shall be made on the return of the tax imposed by section 2501 for the calendar year in which the interest was transferred. Such an election, once made, shall be irrevocable.

"(g) SPECIAL RULE FOR CHARITABLE REMAINDER TRUSTS.—

"(1) IN GENERAL.—If, after the transfer, the donee spouse is the only noncharitable beneficiary of a qualified remainder trust, subsection (b) shall not apply to the interest in such trust which is transferred to the donee spouse.

"(2) DEFINITIONS.—For purposes of paragraph (1), the term 'noncharitable beneficiary' and 'qualified charitable remainder trust' have the meaning given to such terms by section 2056(b)(8)(B)."

(3) TREATMENT OF SPOUSE.—

(A) INCLUSION IN GROSS ESTATE.—Part III of subchapter A of chapter 11 is amended by redesignating sections 2044 and 2045 as sections 2045 and 2046, respectively, and by inserting after section 2043 the following new section:

"SEC. 2044. CERTAIN PROPERTY FOR WHICH MARITAL DEDUCTION WAS PREVIOUSLY ALLOWED.

"(a) GENERAL RULE.—The value of the gross estate shall include the value of any property to which this section applies in which the decedent had (at any time within 3 years before the decedent's death) a qualified income interest for life.

"(b) PROPERTY TO WHICH THIS SECTION APPLIES.—This section applies to any property if a deduction was allowed with respect to the transfer of such property to the decedent—

"(1) under section 2056 by reason of subsection (b)(7) thereof, or

"(2) under section 2523 by reason of subsection (f) thereof."

(B) GIFT TAX.—Subchapter B of chapter 11 (relating to transfers) is amended by adding at the end thereof the following new section:

"SEC. 2519. DISPOSITIONS OF CERTAIN LIFE ESTATES.

"(a) GENERAL RULE.—Any disposition of all or part of a qualified income interest for life in any property to which this section applies shall be treated as a transfer of such property.

"(b) PROPERTY TO WHICH THIS SECTION APPLIES.—This section applies to any property if a deduction was allowed with respect to the transfer of such property to the decedent—

"(1) under section 2056 by reason of subsection (b)(7) thereof, or

"(2) under section 2523 by reason of subsection (f) thereof."

(4) Subchapter C of chapter 11 is amended by inserting after section 2207 the following new section:

"SEC. 2207A. Right of Recovery Where Property is Includible in Spouse's Estate Under Section 2044.

"(a) RECOVERY WITH RESPECT TO ESTATE TAX.—

"(1) IN GENERAL.—If any part of the gross estate consists of property the value of which is includible in gross estate by reason of section 2044 (relating to certain property for which marital deduction was previously allowed), the decedent's estate shall be entitled to recover from the person receiving the property the amount by which—

"(A) the total tax under this chapter which has been paid, exceeds

"(B) the total tax under this chapter which would have been payable if the value of such property had not been included in the gross estate.

"(2) DECEDENT MAY OTHERWISE DIRECT BY WILL.—Paragraph (1) shall not apply if the decedent otherwise directs by will.

"(b) RECOVERY WITH RESPECT TO GIFT TAX.—If for any calendar year tax is paid under chapter 12 by any person with respect to property treated as transferred by such person under section 2519, such person shall be entitled to recover from the person receiving the property the amount by which—

"(1) the total tax for such year under chapter 12, exceeds

"(2) the total tax which would have been payable under such chapter for such year if the value of such property had not been taken into account for purposes of chapter 12.

"(c) MORE THAN ONE RECIPIENT OF PROPERTY.—For purposes of this section, if there is more than one person receiving the property, the right of recovery shall be against each such person.

"(d) TAXES AND INTEREST.—In the case of penalties and interest attributable to additional taxes described in subsections (a) and (b), rules similar to subsections (a), (b), and (c) shall apply."

On page 231, line 8, strike out "(d)" and insert in lieu thereof "(e)".

On page 231, line 14, strike out "and" and insert in lieu thereof a comma.

On page 231, line 15, after "subsection (c)(3)" insert the following: ", and paragraphs (2) and (3)(B) of subsection (d)".

Mr. SYMMS. Mr. President, the present amendment has been approved by Senator METZENBAUM and the minority ranking member, by Senator DOLE and by Treasury in the present tax bill. It is cosponsored by Senator BOREN, who is here on the floor.

Mr. President, the tax bill we are currently considering has incorporated some major estate tax reforms with which I am generally very pleased.

However, the enactment of an unlimited marital deduction without any change being made in the qualitative requirements for qualification would present an estate owner with a difficult choice in many cases. All estate taxes could be postponed, but only by giving the surviving spouse unrestricted control over the property, which current law requires in order to obtain a deduction. The owner may prefer not to give his or her spouse such control. The point becomes more significant as divorce and remarriage increase, which has occurred. The property owner would like to be sure that upon the death of his spouse his children by a prior marriage or marriages share in his property, including the marital deduction property.

Under current law, the objective is attainable, at least in part, through the disposition of that part of the estate which does not qualify for the deduction, including the property that is sheltered from tax by the amount of the unified credit. With an increased unified credit, the objective is attainable for a greater amount of property by placing the amount sheltered from the tax in trust for the spouse without giving the spouse a general power of appointment.

However, for the substantial property owner who must pay a tax if the marital deduction is not used the inability to satisfy each of two objectives—postponing payment of tax and being able to control the disposition of property—remains and the tax pull would be substantial to make maximum use of the deduction. A qualification test for marital deduction purposes which eliminates the general power of appointment requirement would permit satisfaction of both objectives and provide more flexibility in estate planning.

This is a technical, noncontroversial change that does not cost any money and a change that the Department of the Treasury did not object to in the House Ways and Means Committee markup.

If this change is not made at this time, Congress will then have to address the issue on the next tax bill. In the meantime, between tax bills, everyone will have written a new will in order to qualify for the unlimited marital deduction. Then, when the change is made on the next tax bill, everyone that had their will rewritten, will have to have another will drawn up. The only people that stand to gain by not making the change now are all of the attorneys who will be writing and rewriting all of those wills.

Furthermore, charities will be severely impacted if a change is not made now. Under the current bill, an unlimited marital deduction will be allowed. Present law allows for an unlimited charitable deduction. However, the bill does not allow such deduction for life interest in an estate if a remainder interest goes to charity. My amendment would allow a spouse's life interest in a charitable remainder unitrust, charitable remainder annuity trust, pooled life income fund or life interest in a personal residence or farm with a remainder to charity to qualify for the unlimited marital and the unlimited charitable deduction.

Not to do this would impose a penalty for generosity of a spouse who desires to assist a charity and provide for a surviving spouse. A penalty would also be imposed upon the surviving spouse who would receive less because of elimination of her life estate from tax benefit considerations of the estate or gift tax marital deduction plan.

Elimination of allowance for gift and estate tax marital deduction for such life interests in the above deferred plans will seriously impair charities' ability to receive the above types of gifts. Many times the values of such life interests are nominal because of the age of spouses who plan this way, but the principal of gift and estate tax marital deductions are of great importance to potential creators of such trusts or deferred gifts.

My amendment would basically allow a life estate trust to be established by the spouse and still receive an unlimited marital deduction. If the remainder of that estate is given to a charity, there will not be a tax because under current law there is an unlimited charitable deduction. However, if the remainder went to children, or someone other than a second spouse, that remainder would be taxed under current estate tax methods.

Mr. President, I understand the distinguished Senator from Louisiana approves this amendment. The distinguished Senator from Ohio (Mr. METZENBAUM) is also on the floor.

Mr. LONG. Mr. President, it is my understanding that this is basically the same provision that the House Ways and Means Committee has already approved.

Mr. SYMMS. That is correct, Mr. President.

Mr. LONG. So it has been considered and favorably acted upon on the other side by the committee, and I believe that Treasury supports the amendment.

Mr. SYMMS. Yes, Mr. President, Treasury supports the amendment.

Mr. LONG. The amendment has substantial merit, Mr. President, I am pleased to support it.

Mr. SYMMS. I yield back the remainder of my time, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 287) was agreed to.

Mr. SYMMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBTITLE C—EMPLOYEE STOCK OWNERSHIP PROVISIONS

Mr. LONG. I yield myself 1 minute on the bill.

Mr. President, we have in the bill deductions dealing with employee stock ownership: "Title III, Subtitle C—Employee Stock Ownership Provisions," sections 321 through 328.

I understand there is an amendment which Mr. DECONCINI would like to offer on this matter. I would like to suggest that the Senate have the opportunity to vote on this subtitle C, reserving the right of the Senator from Arizona (Mr. DECONCINI) to offer his amendment thereto, so that at a subsequent time he can offer the amendment, and the Senate can work its will with regard to that amendment.

What I have in mind is that, by all indications, this subtitle will be in conference between the Senate and the House. So far as I know, these provisions will not be in the House bill—perhaps one or two will be, but most of them will not—and I should like the Senate to take its position so that we see how the Senate feels about it.

Mr. SYMMS. Mr. President, reserving the right to object, as a matter of clarification, are there any other amendments the Senator from Louisiana is aware of that deal with this subject, other than the DeConcini amendment?

Mr. LONG. So far as I know, there is no other amendment pending to the employee stock ownership section.

Mr. SYMMS. I think we should include in the Senator's request that it would not prejudice any Senator's amendment that deals with this section of the bill.

Mr. LONG. I simply want the Senate to vote on subtitle C, which contains the provisions to which I have made reference. Obviously, when we pass the bill, that suggests that the Senate favors the particular subsection. But this will be in conference on its own right; that being the case, I should like the Senate to take a position on it.

Mr. SYMMS. This is employee stock ownership?

Mr. LONG. Yes.

Mr. SYMMS. This does not deal with stock options?

Mr. LONG. This does not deal with stock options at all. This is an entirely different matter. It is in title III of the bill, subtitle C, starting at page 205, through page 225.

Mr. President, I will broaden my unanimous-consent request to ask that, notwithstanding the vote of the Senate, the provisions of these sections remain subject to amendment, so that any Senator who might have an amendment pending that relates to this matter would not be prejudiced. I simply want the Senate to have its opportunity to take a position with regard to these provisions.

It starts on page 205, line 19, and continues through to page 225, line 18.

This language was agreed to unanimously by the Committee on Finance. There was no objection to it, and I do not anticipate much opposition to it by the Senate as a whole.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. It would take unanimous consent.

Mr. LONG. Mr. President, I ask unanimous consent that the Senate may vote on this language in the committee bill, starting at page 205, line 19, which is section 321, through page 225, line 18. I ask, further, that this be without prejudice to the right of any Senator to amend that particular section—or that portion of the bill.

The point is that I do not wish to prejudice any Senator from amending the language. I simply wish the Senate to take a position, by rollcall vote, in view of the fact that this language will be in conference.

Mr. SYMMS. Could the Senator withhold this vote until the chairman of the committee returns to the Chamber? I do not have any objection to the request, but I ask that we not have a vote until the chairman of the committee returns.

Mr. LONG. Mr. President, I ask unanimous consent that the vote be delayed until the chairman of the committee, Mr. DOLE, is present.

The PRESIDING OFFICER. Does the Senator from Louisiana desire now to withdraw his unanimous-consent request?

Mr. LONG. Mr. President, I ask unanimous consent that the Senate vote on the matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I now ask unanimous consent that the vote be deferred until such time as the managers of the joint resolution think it appropriate.

Mr. SYMMS. That is all right.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I wish to direct myself to the provisions of the law on which I have asked that a rollcall vote be held. These provisions deal with employee stock ownership.

Mr. President, expanded ownership is an issue that cuts across party lines in an attempt to bring out the best in our free enterprise system. As the 1980 Republican platform reminds us:

> The widespread distribution of private property ownership is the cornerstone of American liberty. Without it, neither our free enterprise system nor our Republican form of Government could long endure.

Mr. President, let me say that I think most Democrats will agree. I certainly agree with that suggestion of the Republican platform. The Republican platform pledges the Reagan administration "to help millions of Americans . . . to share in the ownership of the wealth of their Nation."

President Nixon included a similar pledge in his 1970 state of the Union address in which he suggested:

> We must adopt reforms which will expand the range of opportunities for all Americans . . . This means . . . new opportunities for expanded ownership, because in order to be secure in their human rights people need access to property rights.

In a similar vein, Senator Hubert Humphrey explained his support of expanded ownership in a letter to the editor of the Washington Post not long before his death:

> Throughout my career as a public servant, I have viewed full employment as a top priority goal for this country. And I continue to do so. But I recognize that capital, and the question of who owns it and therefore reaps the benefit of its productiveness, is an extremely important issue that is complementary to the issue of full employment.
>
> I see these as twin pillars of our economy: Full employment of our labor resources and widespread ownership of our capital resources. Such twin pillars would go a long way in providing a firm underlying support for future economic growth that would be equitably shared.

The benefits of Government-stimulated economic growth have traditionally trickled down through higher wages, expansion in the number of jobs, and the availability of increased tax revenues to fund expanded social programs.

That approach has produced strains on the economy as the benefits of such growth have resulted in the accumulation of massive amounts of productive capital by a relatively few households while the vast majority have been left with only a meager net worth.

For example, during our bicentennial year, the Joint Economic Committee studied capital ownership in the United States and found that 50 percent of the total value of outstanding stock held by individuals is owned by just five-tenth of 1 percent of the U.S. population. Two-thirds, according to a 1976 IRS report, is held by 5.2 percent of the population age 20 and over. Similarly, 1 percent of the population received 47 percent of all dividends.

At the other end of the ownership spectrum, the committee cited a 1972 study indicating that 55 percent of American households have a net worth of less than $10,000; and 12 percent, or 1 in every 8, have a net worth of $1,000 or less.

Perhaps the most disturbing analysis of the present state of our private property system, however, is provided by the National Bureau of Economic Research which reports that for the majority of American families their most important wealth is now their entitlements under our pay-as-you-go social security system.

Thus, for most Americans their most important asset is an assurance that someone else will be taxed on their behalf. Clearly that is a long way down the wrong road if we intend to have a private property economy to leave to subsequent generations of Americans. Incentives for economic growth need to be combined with incentives that will distribute the long-term benefits of such growth more widely.

CAPITAL OWNERSHIP OPPORTUNITIES

Most of us share President Reagan's concern for incentive economics, for supply-side measures designed to stimulate new capital investment. We are generally in agreement that this package of tax cuts will provide a strong private sector foundation for a revitalized economy.

With that in mind, we are considering legislation that will target an estimated $147.5 billion through 1986 for increased business writeoffs of equipment and facilities—all of which will be owned by someone. The financial press estimates that by the close of this century productive wealth in the United States will increase by $2 to $5 trillion. The bulk of that new wealth will be owned by private individuals.

Within a healthy and growing economy, there will be opportunities not only to work but also to own. The distribution of job opportunities as an outgrowth of Government-stimulated economic growth is a factor that will be evaluated in great detail. Unfortunately, we are unlikely to have an analysis of the distribution of ownership opportunities as well.

In large part, corporate finance will determine who will be owners of these badly needed new capital investments. Corporations finance their growth from three primary sources: Retained earnings, debt, and various tax benefits—primarily equipment writeoffs, such as those which form the bulk of the business tax relief in this bill.

New stock plays only a minor role in the financing of new capital. For example, Federal Reserve Board figures show that corporate equities accounted for only 0.89 percent of the total funds raised in the United States during 1979. For the entire 1970's, stock sales accounted for a mere 3.7 percent of new capital raised in the nonfinancial sector. Even during the rapid growth of the 1960's, new equity issues were the source of only 7 percent of total financing for nonfinancial companies.

Because of the way in which new investments are financed, capital ownership has historically been an opportunity reserved for a relative few. The ownership of new capital wealth is largely a function of existing capital wealth.

After studying the self-perpetuating wealth concentration that the most widely used financial technique imply, the Joint Economic Committee concluded in its 1976 annual report:

> To provide a realistic opportunity for more U.S. citizens to become owners of capital, and to provide an expanded source of equity financing for corporations, it should be made national policy to pursue the goal of broadened capital ownership.

For the most part, the American people cannot afford capital ownership. Daily economy survival, not savings and investment, is their main concern. And the less our technologically-advanced economy needs their labor, the less able they are to save their way to capital ownership. Inflation, of course, penalizes what little savings they are able to set aside.

After passage of this bill, the bulk of America's new productive capital will, I expect, continue to be financed as before—except that more accelerated write-offs will then be available with which to do that financing. It is my hope that the ESOP provisions of this bill will provide an incentive for at least some portion of this new capital to be financed in such a way that more Americans will begin to accumulate a capital estate.

A MODEL OF WORKABILITY

Free enterprise capitalism is losing ground all over the world. We need to be able to demonstrate to other nations how our increasing prosperity spreads out and reaches Americans in all walks of life.

Unless we offer such a model, other nations will continue to see the socialist model as a more attractive alternative. Secretary of State Haig was on target when he recently commented that our economic contradictions here at home make it more difficult for us to lead abroad.

As Ronald Reagan explained in 1975:

> Capitalism hasn't used the best tool of all in its struggle against socialism—and that's capitalism itself.

In a July 1974 speech to the Young Americans for Freedom, Governor Reagan explained the historical precedent for a policy of expanded ownership and endorsed the uniquely American opportunity that such a policy would represent:

> Over one hundred years ago, Abraham Lincoln signed the Homestead Act. There was a wide distribution of land and they didn't confiscate anyone's already owned land. They did not take from those who owned and give to others who did not own. It set the pattern for the American capitalist system. We need an Industrial Homestead Act . . . I know that plans have been suggested in the past and they all had one flaw.
>
> They were based on making present owners give up some of their ownership to the nonowners. Now this isn't true of the ideas that are being talked about today.
>
> Very simply, these business leaders have come to the realization that it is time to formulate a plan to accelerate economic growth and production and at the same time broaden the ownership of productive capital. The American dream has always been to have a piece of the action.

Thus spoke President Ronald Reagan.

The theme of the employee stockownership plan (ESOP) provisions of this bill is a theme of widespread participation—participation not only through jobs but through ownership as well. As the private sector expands and the economic pie begins to grow, these ESOP incentives will provide those who make that pie with an opportunity to own a piece of it. Instead of simply sharing in the pie by taking a larger slice, ESOP's will provide a chance for more working Americans to own a piece of the pie-making machinery.

Thirty-two Members of the Senate have joined me in cosponsoring the bipartisan measure which I introduced some months ago. About half of those provisions appear in this bill and they have been unanimously recommended by the Committee on Finance.

In addition, it is encouraging to see that just this past month the State of Delaware joined the States of Maryland, Michigan, Minnesota, and New Jersey in establishing as official State policy the encouragement of ESOP's as a means to broaden ownership. Similar legislation is pending in several other States.

TOWARD A POLICY OF ECONOMIC SELF-SUFFICIENCY

If we are to have a self-sustaining economic system, and one in which Government plays only a minor role—as the voting public seems to be telling us it should—then the private sector must itself be encouraged to play a greater role in the functioning of our private enterprise economy.

By producing the economic pie, we necessarily create the problem of how it is to be distributed. Wages and salaries are one way. Under our present system, however, pay tends to outpace productivity.

When an upward drift in income is not matched by a real growth in output, income gains are, of course, largely illusory. It would be shortsighted for us to continue to leave the vast majority of Americans with nothing other than their labor, as the "capital" with which they provide input into—and derive income from—our capital-intensive economy.

Redistributive taxation is another way to distribute income, although for this purpose it is strictly a hindsight, remedial approach. In addition, the fiscal strains created by this approach are increasing at an alarming rate. For example, over the past 20 years, direct Federal transfer payments to individuals have grown from 26.4 percent of total budget outlays to more than 50 percent; and $27 billion was paid out in 1960; by 1980 that had risen to $284 billion, including a growth of more than $200 billion just since 1970. And of course Government can never return as much as it takes, so its costs insure a net loss in the transfer.

We need to bring our outtake system more "in synch" with the realities of our input system. A market economy is based on the premise that each person's outtake from the economy is directly related to that person's productive input—whether that input be through a job or through the ownership of productive capital. Both can generate income.

Rather than break the relationship between effort and reward, the expanded ownership concept suggests that we recognize the increasingly dominant role that nonhuman capital now plays in the productive process, and begin to provide a way for more Americans to economically participate by means more consistent with the existing state of technology.

When capital owners are few, the private property conduits of a market economy reward those few. If there were many owners, the earnings of that productive capital could begin to broadly irrigate the economy with purchasing power.

How efficiently our free enterprise system works in solving our income distribution problem is partly a function of how well our structure of property laws matches the underlying technological and economic realities. If those realities change and our property arrangements fail to keep pace, a conflict is inevitable.

Of the seven leading industrial democracies—France, West Germany, Canada, Sweden, the United Kingdom, and Japan—the United States now ranks second only to France in its degree of income inequality. In addition, our poorest 20 percent have a lower share of total pretax income than any country, including France. A broader distribution of capital ownership would help to improve our poor ranking internationally.

In some nations, the private ownership of productive capital is forbidden—on the grounds that private property is at the heart of the problem. The solution, however, lies not in destroying the institution of private property, but in making it possible for all to become owners of some of it.

Expanded ownership could help reduce the role that Government plays in redirecting income. But to do that requires that we work to build economic self-sufficiency into the American population at large.

Over the long term, the best way to cut back Government programs is to cut back the need for such programs. If we are to have a self-sustaining economic system, however, we must first begin to share the ability to succeed. The encouragement of expanded ownership would be a step in that direction.

A NONINFLATIONARY BENEFIT

If we are to win in our battle against inflation, we need incentives for working Americans not only to save but also to moderate their wage demands. The current situation at Continental Airlines provides a good example of the potential that employee stockownership plans have for moderating wage-push inflation.

The Continental employees are proposing that they forgo a portion of future pay raises and, instead, apply those funds to invest in company stock (through an ESOP). This inflation-fighting approach to compensation should be encouraged.

According to pollster Louis Harris, the American public is generally receptive (that is, 63 percent) to the idea of having their salaries linked to higher productivity—at least if they are convinced that their sacrifices will provide funds for needed investment. Thus, the encouragement of employee stockownership plans may help restrain inflation by helping to channel wage demands into capital investment.

When combined with the labor productivity gains that generally accompany employee stockownership, widespread ESOP-type financing has the potential to significantly improve our economic situation. Just as the company with employee stockownership will have a productive advantage over a conventionally-owned competitor, so too should the U.S. economy enjoy a competitive edge with a tax policy supporting expanded ownership.

Employee stockownership could also serve as a new stabilizing element in labor-management relations—an element that may encourage these traditional foes to act more in the national interest by beginning to operate more in a spirit of cooperation and compromise. Unions must find new, noninflationary ways to deliver victories to their members, and management needs to find new ways to deal with union demands.

A recent Harris poll found that 53 percent of American employees and 61 percent of American business leaders feel that there is too little cooperation between business and labor. Employee stockownership provides a fruitful new area in which these traditional adversaries can resolve their differences.

INCENTIVE ECONOMICS

What would be the effect of transforming this troubled economy of ours into one in which working Americans have the interest and incentive of ownership? Even a modest stake in the system would bring with it a better understanding of how our free enterprise system works, and a greater awareness of the costs and the tradeoffs of Government programs.

Our tax code should encourage a broad distribution of productive input and a substantial payout of the earnings generated by that input. If we are to have a more equitable and a more workable income distribution—without Government redistribution—we must have incentives for the widespread ownership of productive capital.

Our tax system is a key to linking equity and efficiency. As presently structured, that system not only aggravates the bias toward concentrated ownership and governmental redistribution, in the process it also jams the market's pricing system and its ability to allocate resources in the most productive, market-responsive fashion.

We must begin to strike a better balance between the energy and efficiency of the market and the equity, compassion and equality of democracy. Expanded ownership would bring a democratic new dimension to the investment process, and open new possibilities for economic participation by more Americans.

DEMOCRATIC CAPITALISM

Since 1973, the Congress has approved, and three separate administrations have signed into law, 14 bills promoting the use of employee stock ownership plans (ESOP's) as a means to expand the ownership of productive capital. In addition, in the Tax Reduction Act of 1976, Congress made clear its policy of "* * * encouraging employee stock ownership plans (ESOP's) as a bold and innovative method of strengthening the free private enterprise system which will solve the dual problems of securing capital funds for necessary capital growth and of bringing about stock ownership by all corporate employees."

However, the provisions of current law—even when improved by the very modest ESOP-related provisions of this bill—will do very little to expand the base of capital ownership in the United States. Due to the nature of the most commonly used techniques of finance found in the private sector, the great bulk of the new productive capital created due to the investment incentives in this bill will likely flow to that same small group of Americans who are already quite wealthy.

That would show a failure of foresight on our part, and I hope that we will take steps to correct such a trend if we find that is the direction in which we are headed.

Both sides of the aisle are on record in support of expanded capital ownership. Both sides are also on record as equally steadfast in their opposition to a socialist approach to economic policy, such as is now being considered in France.

This is the richest and the most comprehensive capital formation bill ever considered by the U.S. Congress. By the end of this century we would be well advised to insure that a significant amount of this yet-to-be-created productive capital flows into the hands of a steadily expanding number of American households.

If there is to be an expansion of capital ownership in the United States, certainly these next two decades are an opportune time to make that bipartisan desire a reality. Tax policy alone may not be adequate if expanded ownership is to become a reality. Thus, we should also consider how monetary policy can operate in support of a national policy of expanded capital ownership.

Capitalism's market mechanisms of incentive and reward have brought more and better goods and services to more people here and throughout the world than any other system in history. Yet those mechanisms are not indestructible. If they are to be preserved, we need an institutional framework that operates in their support. That support lies in the direction of a more democratic form of private property capitalism—a type of capitalism that is true to its Democratic roots, and true to the American tradition of widespread participation.

The issues to be examined in this study go to the very heart of just what sort of economic system we mean to have in the United States, and just what sort of Nation we intend to leave for succeeding generations of Americans. The ESOP provisions of this bill offer us a blueprint—a guide for future legislation designed to include more Americans as partners in our economic progress.

CLARIFICATION OF ESOP AMENDMENTS

Mr. President, this bill makes a number of changes in the law relating to finance. It is also a tax-qualified plan (ESOP's). Many of these changes are highly technical in nature. Thus, it may prove useful to provide some additional clarification regarding several of the provisions.

An ESOP is a technique of corporate finance. It is also a tax-qualified plan under which employer stock is held for the benefit of employees. The stock, which is held by a tax-exempt trust under the plan, may be acquired through direct employer contributions or with the proceeds of a loan to the trust.

In order to qualify, a plan must, for example, satisfy rules prohibiting discrimination in favor of highly-paid employees, and it must meet standards relating to employee participation vesting, benefit and contribution levels, the form of the benefits, and the security of the benefits. If a plan meets these requirements, in addition to deferral of employee tax on employer contributions, the income earned on assets held under the plan is generally not taxed until it is distributed or made available. In addition, special 10-year income averaging rules or tax-free rollover treatment apply to distributions made in a lump sum. Also, the Internal Revenue Code provides for deferral of tax on the appreciated value of employer securities and for exclusions from estate and gift tax.

An employee stock ownership plan which borrows to acquire employer stock is referred to as a leveraged ESOP. A leveraged ESOP is a technique of corporate finance designed to build beneficial equity ownership of shares in an employer corporation into its employees.

Under such an ESOP, an employee stock ownership trust generally acquires stock of the employer with the proceeds of a loan made to it by a financial institution. Typically, the loan is guaranteed by the employer. Employer contributions to the trust are applied to retire the loan. Within limitations (based on a percentage of payroll), those contributions are deductible by the employer.

The provisions of this bill raise the deductibility limits for employer contributions applied to the repayment of the

principal of an ESOP loan. In addition, employer contributions to repay the interest expense of an ESOP loan will be deductible without regard to the deduction limitations otherwise applicable to contributions to tax-qualified employee benefit plans.

Subject to meeting a nondiscrimination test, a corresponding amendment provides that the limitation on annual additions to employee benefit plans will no longer apply to employer contributions applied by an ESOP to repay interest on an ESOP loan. In addition, those limitations would no longer apply to amounts forfeited under an ESOP loan.

Although the effective date of the act applying to these revised limitations is generally effective for years after 1981, it is intended that employer contributions applied to pay a loan incurred prior to 1982 will also qualify under the new provisions.

Many of the rules governing the new payroll-based tax credit ESOP are the same as those applicable to the current additional investment tax credit for ESOP contributions. As under present law, a payroll-based tax credit ESOP may be treated as a tax-qualified plan from its effective date even though the plan is not actually established until the date for filing the employer's tax return for its taxable year—including extensions.

As under present law, the allocation of employer contributions to a tax credit ESOP for a year must be made in proportion to the total compensation of all participants sharing in the allocation for the plan year, taking into account only the first $100,000 of compensation for an employee. In addition, integration with benefits provided under social security continues to be prohibited.

Limited amounts of administrative expenses for establishing a tax credit ESOP may be charged to the plan. The maximum amount which may be charged is 10 percent of the first $100,000 of the amount required to be transferred to the plan for the taxable year in which the plan is established, and 5 percent of any additional amount for such year. In addition, ongoing costs of administration—up to 10 percent of the first $100,000 of the trust's dividend income plus 5 percent of the remaining dividend income—may also be charged to the plan.

Because the entire tax credit is intended to benefit the employees participating in the plan, the payroll-based ESOP credit is not to be available to a company if a governmental regulatory agency requires a "flow through" of any part of the ESOP credit through to the consumer. If a regulatory commission requires a flow through, a regulated employer will be required, in effect, to pay out the ESOP tax credit twice—once to the ESOP and then again to the consumers. This requirement is the same as is presently applicable to the flow through of the additional investment tax credit for ESOP's.

If the payroll-based ESOP credit is determined by the Internal Revenue Service to be a smaller amount than claimed, the employer maintaining the plan may either first, reduce the amount required to be transferred to the plan for the current taxable year or any succeeding taxable year by an amount equal to the reduced amount, or second, to the extent such amount is not used to reduce contributions, deduct an amount equal to such reduction as of the date the credit is reduced—subject to the limitations of code section 404.

In determining whether there is sufficient affiliation between corporations to permit the filing of a consolidated return, employer securities held by a tax credit ESOP are disregarded. Stock of a parent corporation in a parent-subsidiary controlled group of corporations—determined by applying a 50-percent test—may be contributed to the plan as employer securities by another member of the group.

In a case where a parent corporation and a subsidiary corporation—including a second tier subsidiary—are members of an affiliated group of corporations, the subsidiary corporation will not recognize gain or loss on a contribution of stock in the parent corporation to a tax credit ESOP maintained by the subsidiary.

Where an employer claims a payroll-based ESOP credit, that claim will not result in the imposition of additional minimum tax on the employer—because the employer's tax savings are offset by the contribution to the plan. Thus, the base for computing the minimum tax is not increased for the tax credit attributable to the claiming of the ESOP tax credit.

This bill also introduces a new nondiscrimination test applicable to leveraged ESOP's and to tax credit ESOP's. The purpose of the test is to insure that rank and file employees are the primary beneficiaries of the additional incentives provided under this bill.

The nondiscrimination test places limitations on the amount of employer contributions that may be allocated to officers, 10 percent shareholders, and the highly compensated. For purposes of this requirement, the term "officers" includes only those persons, regardless of title, who perform substantive duties in the nature of top management. Highly compensated employees are those earning twice the annual addition limitation under section 415—$83,000 for 1981.

ESOPS GRANT FLEXIBILITY

Mr. President, the July 13 edition of Business Insurance carried a very thoughtful article on employee stock ownership plans and their role in providing companies with greater pension flexibility. I ask unanimous consent that the article be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ESOP's: STOCK OWNERSHIP PLANS GRANT COMPANIES PENSION FLEXIBILITY

(By John W. Milligan)

NEW YORK.—In the world of defined contribution plans, flexibility is spelled E-S-O-P.

Otherwise known as the Employee Stock Ownership Plan, the ESOP is a highly touted way of giving employees a piece of the action and increasing job incentive.

It is a flexible plan that can be used by small companies such as The Columbian newspaper in Vancouver, Wash., to multinationals like the Chrysler Corp.

The plans continue to grow in number, says the ESOP Assn. of America, which estimates that 4,000 to 5,000 such plans (including more complicated TRASOPs) are now offered by U.S. companies.

ESOPs have been around since 1953 and trace their heritage to more simplified stock ownership arrangements of the 1920s. The present-day structure was established by the Employee Retirement Income Security Act of 1974.

To understand an ESOP, one must first understand that they range in complexity from the very simple to the very sophisticated. They may replace a pension plan or live alongside one.

And from the employee's point of view, they may be good or bad, depending on the fortunes of the company involved.

With ESOPs, the exception is more often the rule.

At one end of the ESOP scale is a plan maintained by The Columbian, a 47,000-circulation daily newspaper.

The Columbian converted an older profit-sharing plan to an ESOP in 1976. The ESOP is provided in lieu of the defined benefit plan for some 200 employees.

This plan is also a non-leveraged type, which means the company contributes either cash or stock to an employee trust.

The Columbian contributes cash to the trust, said Mason Nolan, vice president of finance. The trust then purchases stock from the company or from individuals who wish to sell. The latter are mostly family members of this closely held company.

The most recent annual contribution to the trust was $385,000 for the 1980 plan year, Mr. Nolan said.

Members are fully vested after 15 years. The stock is issued after termination, retirement, total disability or death and employees or their survivors have 90 days to sell their stock back to the company if they wish to receive its present market value.

"We're very happy with it," Mr. Nolan said of the company's ESOP. "It has been well received by the employees and has created a limited market for the company's closely held stock."

Stock value has continued to rise with the growth of the company, he said, and the employees are "pleased" with owning a piece of The Columbian—now up to about 17 percent.

Start-up fees were approximately $2,000 to $3,000 and consisted mostly of legal services, Mr. Nolan said. The company now pays about $10,000 for annual maintenance, which includes independent stock appraisal, computer services and expenses of the independent trustee. The company handles stock transfers itself, he said.

Perhaps the most publicized ESOP in recent memory belongs to the Chrysler Corp., a direct result of the Chrysler Loan Guarantee Act of 1979.

Chrysler will contribute $162 million in common stock to an estimated 94,000 employees from June 1982 through 1984, a company spokesman said.

The plan technically went into effect July 1, 1980, and the company spent the next 12 months determining how many employees will actually qualify. That figure has been roughly set at 94,000 in the United States and Canada.

Eligibility determination was based on two factors:

An employee must have worked a minimum of 650 hours between July 1, 1980, and June 31, 1981.

An employee also must have started at his job at least nine months prior to July 1, 1980.

There is no employee contribution required, and the plan exists alongside Chrysler's regular pension plan. The stock will remain in trust until an employee terminates or retires, or dies, in which case it goes to a beneficiary.

Chrysler will make the stock contribution from shares that have been authorized but not issued, the spokesman said.

As of July of this year, the company had 120 million shares of authorized stock. Of this, 66 million are issued and outstanding. Chrysler will contribute the necessary stock from the remaining 54 million shares that are authorized but not issued, the spokesman said.

The company will allocate just under 6 million common shares for the 1982 plan year, or approximately 63 shares per qualified employee.

A medium-sized company with an ESOP is the Katz Agency in New York, a 700-employee advertising firm. Katz has maintained a "combined stock ownership plan" since 1971, said Gail Deindorfer, director of corporate benefits. Under the plan, 50 percent of its stock is owned by the ESOP and 50 percent by management. Unlike The Columbian, Katz provided the ESOP in addition to a regular pension plan.

Katz employees are 50 percent vested after four years and a day, and then vest an additional 10 percent each year until they are fully vested at nine years and a day. Employees may retire at the age of 55 with 25 years service, and Katz has requested an amendment from the Internal Revenue Service requiring employees to sell their stock back to the company after they leave.

Some "seven or eight" ESOP participants have retired recently, Ms. Deindorfer said, and one person received enough cash through a "stock rollover" to maintain his former salary level.

"We love it," she said of the ESOP program. The company's stock has done "as well or better" than the market in good years, and "better" than the market in bad years, she said.

The ESOP also seems to have more impact on employees than the previous profit-sharing plan, she added. "We all feel that we own a piece of the company."

A special kind of ESOP is the Tax Reduction Act Stock Ownership Plan (TRASOP), which provides an additional 1 percent to 1½ percent capital investment tax credit to participating companies (see related story). Since credit is based on capital expenditures, it is most attractive to large, money-intense companies.

Most ESOPs are maintained by small and medium-sized companies that are closely held, said Gary Redman, managing vp of consultants M&R Benfo Inc. in Seattle, Wash. Because of their special characteristics, TRASOPs are of little benefit to companies that are not "heavily capital intensive," he said.

For the closely held company, an ESOP provides a "value indication" for its stock that is not traded on the open market. The stock of such companies must be appraised each year by an independent party, Mr. Redman said, principally to protect the employee. Yet the appraisal also provides the stock with a dollar value that it otherwise would not have.

At most small companies, an ESOP is established to replace a profit-sharing or some other type of defined contribution plan. The ESOP may also replace a company's pension plan, where employees receive their stock in lieu of a pension upon retirement. The employee may then cash in his or her stock.

At a closely held company, however, the value of the ESOP can vary due to circumstances beyond an employee's control. Mr. Redman noted that if a "dynamic individual" such as the company's founder retires, the company may go "downhill" and the stock value may slide.

An ESOP can be used to raise capital. With a leveraged ESOP, a company sells stock to a trust rather than makes a contribution in cash or stock. The trust then borrows funds and pays the company an amount equal to the present value of the stock.

The company guarantees the loan and agrees to give the trust enough money to pay off the loan over a period of four to seven years.

This provides the employee with a stock and a sense of ownership in the company, and gives management an infusion of cash—borrowed and paid upfront by the trust for capital investment purposes.

While the deduction limits are presently the same for both leveraged and non-leveraged ESOPs, legislation now before the U.S. Senate would strengthen leveraged ESOPs even more.

Jeff Gates, tax counsel to the Senate Finance Committee, said a bill recently sent to the full Senate calls for an increase in deduction limits for leveraged ESOPs to 25 percent from their current level of 15 percent. When combined with additional changes in the bill, Mr. Gates said, this increase will make leveraged ESOPs an even stronger plan.

Mr. SYMMS. Mr. President, I would just like to say that I share the views of the distinguished Senator from Louisiana.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, the pending business before the Senate now is the vote on the employee stock ownership section of the bill. The yeas and nays have been ordered.

The PRESIDING OFFICER. The yeas and nays have not yet been ordered.

Mr. SYMMS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

SUBTITLE C, TITLE III, PAGE 205, LINE 19, THROUGH PAGE 225, LINE 18, AS AMENDED (EMPLOYEE STOCK OPTION PROVISIONS)

The PRESIDING OFFICER. The question is on division of the committee amendment specified earlier. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The PRESIDING OFFICER (Mr. WARNER). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 93, nays 1, as follows:

[Rollcall Vote No. 220 Leg.]

NOT VOTING—6

Cannon	Hayakawa	Stennis
Garn	Heinz	Tower

The PRESIDING OFFICER. Subtitle C of title III of the committee substitute is agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair recognizes the Senator from Massachusetts.

UP AMENDMENT NO. 288

(Purpose: To increase the amount of the deduction allowable to a corporation in any taxable year for charitable contributions)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes unprinted amendment numbered 288.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle F of title II, add the following new section:

SEC. . INCREASE IN DEDUCTION ALLOWABLE TO A CORPORATION IN ANY TAXABLE YEAR FOR CHARITABLE CONTRIBUTIONS.

(a) IN GENERAL.—Paragraph (2) of section 170(b) (relating to percentage limitations) is amended by striking out "5 percent" and inserting in lieu thereof "10 percent".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1981.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I yield myself such time as I might need.

Mr. DOLE. Mr. President, is this the charitable contributions amendment?

Mr. KENNEDY. The Senator is correct. Mr. President, the Senator from Kansas has stated correctly that this is a charitable contributions amendment.

Under current law, there is a limit on the corporate tax deduction for gifts to charity equal to 5 percent of the corporation's taxable income. The amendment that I have offered increases the limit to 10 percent.

At the present time, corporate contributions to charity average only about 1.2 percent of corporate income, so the revenue loss for the amendment is extremely small. The Joint Economic Committee has estimated it to be less than $50 million a year, perhaps much less than that.

But some corporations are at their limit, so it is appropriate to increase the limit now.

One of the administration's justifications for the current reductions in Federal spending is that in many areas involving social programs, it will be appropriate for the private sector and voluntary agencies to increase their own efforts to meet the need. In fact, corporations are now being deluged with requests for assistance from social agencies facing funding cutoffs.

It is clear that private agencies cannot make up the full loss of Federal aid. The Urban Institute estimates that over the period 1981–84, Federal funds for welfare, health, and environment, housing, food, and the arts will be cut by over $128 billion.

Voluntary agencies working in this area will suffer a direct loss of some $27 billion over the next 5 years, or about $5 billion a year.

Contributions to nonprofit groups by corporations and some 600 company-operated foundations totaled about $2.5 billion in 1980.

Thus private giving would have to double over the next 5 years to make up for the loss of Federal funds.

Experts at the conference board suggest that, far from private agencies being able to pick up the slack, many of the agencies will be unable to survive. As one expert has said, "There could be a Darwinian struggle for survival."

Less than 30 percent of the Nation's 2 million companies now make charitable contributions. The Business Roundtable, the Chamber of Commerce, and the National Association of Manufacturers have all called on the business community to increase their giving.

A major effort is being made to bring the corporations of this country into the process of meeting the needs of people of our society. This amendment will facilitate that effort, by raising the limit on corporation contributions to charity. It will encourage companies to respond to the variety of different needs of the people of our country.

Earlier this week, an amendment was adopted to this bill to permit individuals who take the standard deduction to deduct their gifts to charity. That amendment received the overwhelming support of the Senate, and it will encourage individuals to increase their contributions to charities. The amendment I have offered will provide a similar incentive to corporations.

If we are to respond to the challenge of the administration, and seek the support of the private sector in the effort to meet the basic needs of our society, then this is an appropriate amendment to encourage the private sector to do so.

Mr. President, I ask unanimous consent to have printed in the RECORD an excellent article from the New York Times of Monday, July 6, describing the current situation. I also ask unanimous consent that these tables adapted from the article may be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, July 6, 1981]

NONPROFIT GROUPS CALL ON INDUSTRY TO REPLACE U.S. AID

(By Kathleen Teltsch)

Large companies from coast to coast report a surge in appeals for grants from anti-poverty groups, universities, cultural agencies and other nonprofit organizations scrambling to replace money they fear they will lose as a result of Reagan Administration budget cuts.

The companies say there is no way they can come anywhere near offsetting the Federal grant money that is to be eliminated.

"We've been deluged with thousands of requests, a 100 percent increase in the first quarter of this year," said Mary Hall, vice president of corporate contributions at the Weyerhaeuser Company headquarters in Tacoma, Wash., which twice a day receives mail sacks crammed with appeals. Most corporate givers reported an increase of 25 to 35 percent in requests from the nation's 300,000 nonprofit organizations, which range from opera companies and private universities to groups that feed the poor.

"There's a certain element of panic about anticipated losses," Richard F. Neblett, contributions coordinator for Exxon, said at its Manhattan headquarters, where the increase in appeals is less dramatic than that at Weyerhaeuser.

VOLUNTEER AID ENCOURAGED

Throughout the budget-cutting process, senior White House officials have said that they expected private volunteer efforts to replace many curtailed Government programs. For example, a Task Force on the Arts and Humanities that President Reagan named in May is to report by the end of the summer on what Mr. Reagan called a plan "to make better use of existing Federal resources and to increase support for the arts and humanities by the private sector."

However, despite efforts in Congress and elsewhere to encourage private giving, corporate officers and other experts on charity say that business, foundations and individual givers combined will be unable to offset the Federal grant money being cut.

While final details of the budget cuts are not yet known, a study by the Urban Institute in Washington recently estimated that there would be reductions of $128.2 billion from 1981 to 1984 for social welfare, health, environment, the arts and Government-financed housing and food programs.

$27 BILLION LOSS IN 5 YEARS

Lester M. Salamon, the political economist who directed the institute's study, said that the anticipated cuts would mean a loss of $27 billion over the next five years for the nonprofit organizaions working in these fields, the groups now flooding corporations with their appeals for money.

Contributions to nonprofit groups by companies and some 600 company-operated foundations last year totaled only $2.53 billion, according to the American Association of Fund-Raising Counsel Inc.

The difference between the amount of funds to be lost and the total corporate contribution is of such dimensions that companies cannot possibly pick up the whole tab, said Anne Klepper, a senior research associate for the Conference Board, whose 4,000 members include the country's leading foundations, government agencies and educational institutions.

"There have been unrealistic expectations about who will do what for a long time," she said. "Now the situation is getting crunchier. Inevitably there will be a struggle to survive among the nonprofits. It could be a Darwinian scene."

Private giving from all private sources for nonreligious purposes would have to increase by 144 percent over the next five years to make up for reductions in Government assistance and keep up with inflation, Mr. Salamon estimated, growth four times faster than the average over the last five years.

TOO MUCH, TOO SOON

Corporate officials say the Administration's assumption that the private sector and especially business can fill the void is expecting too much, too soon.

"You cannot send a Mailgram from Washington to all corporations and say a funny thing happened, and expect they will be ready immediately to make up the shortfall—life is not like that," Edward M. Block, a vice president of the American Telephone and Telegraph Company, remarked in objecting to the proposed cutback in financing for the National Endowment for the Arts. Mr. Block is also president of the American Council for the Arts.

Even if business took the lead in support of the arts, a vast fund-raising campaign could not be started in time to avoid serious damage, Mr. Block contended. Business will also be under heavy pressures to help pay for a variety of human services. he observed, suggesting that these might be assisted at the expense of the arts.

A.T. & T. is the leading partner of the Bell System, whose $38.2 million budget for philanthropy made it the largest single donor in the business community in 1980. Exxon ranked second, with contributions of $38.1 million. Only six private foundations in the United States give away more money annually.

Many companies plan to increase giving, among them Exxon, International Business Machines, Levi Strauss and General Electric, but the widespread opinion is that the total for all would not offset the Government reductions.

DROP IN THE BUCKET

Contributions from corporations increased 15 percent in 1978 and 1979, dropping to •

percent because of low profits last year, but even if the former high level was reached, it would amount to only $380 million more a year, "a drop in the bucket," in the words of John J. Schwartz, president of the American Association of Fund-Raising Counsel.

"Dollar for dollar, there is no way for the private sector to make up for the cuts," agreed John H. Filer, chairman of the Aetna Life and Casualty Company, although he maintained that companies and nonprofit groups could have significant impact in critical areas, including training the hard to employ.

Less than 30 percent of the country's two million companies report to the Internal Revenue Service that they make philanthropic donations, the Conference Board said. Under Federal law, companies are permitted to deduct for charitable giving up to 5 percent of their taxable income. Only a few, mainly companies in the Minneapolis area that have joined a 5 Percent Club, reach the maximum; the average hovers around 1 percent.

Even before the Reagan Administration, there were efforts by organizations and individuals to persuade companies to step up giving and to reach the thousands that do not make any contributions.

The National Business Roundtable issued a policy statement in March endorsed by the Chamber of Commerce and the National Association of Manufacturers calling on the business community to increase giving. And Laurence A. Wien, a New York lawyer and real estate investor, is credited with having "shamed" dozens of prospering companies into increasing their contributions by presenting or threatening to push stockholder resolutions.

Raising the present level of company giving to 5 percent would increase corporate contributions to $10 billion to $12 billion, according to philanthropic experts. However, even doubling the present level to 2 percent is expected to take several years, these analysts said.

The Administration and public expectations that business can be "the thousand-fingered Dutch boy plugging the dikes" poses risks for business, which "will have to perform as never before," according to Donald H. Haider, professor of public management at Northwestern University.

Speaking at a Public Affairs Council meeting of corporate leaders in Chicago in March, Mr. Haider produced a stunned silence with his warning that a failure by industry to increase business activity, create jobs and also act as the "great gap-filler" could result in a backlash in which business could lose the freedom from regulations and other benefits it expects from the Reagan Administration.

Brian O'Connell, president of the Independent Sector, said it would be a mistake for the Administration to single out business and give the impression that the burden now rests with it to pick up the slack. The group, set up two years ago to stimulate private charitable giving, has been lobbying for new tax laws to encourage giving by individuals. Its 310 members include leading companies, foundations and nonprofit organizations.

"I believe business will do more and can do more, but it has to be done in a spirit of encouragement and cooperation and not by giving the impression that business must fulfill an obligation," Mr. O'Connor said.

Foundations	2.24
Total	41.08

Mr. KENNEDY. I yield to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. HARRY F. BYRD, JR. Mr. President, it seems to me that this amendment has a great deal of merit. As I understand it, there will be very little loss to the Treasury. I feel that the corporations of our Nation have an obligation to the less fortunate, have an obligation to the various charities of our country, and I have felt for some time that the 5-percent limitation was not a particularly reasonable one.

The Senator from Massachusetts has proposed an amendment to make it 10 percent. It seems to me that is reasonable and appropriate.

The Senator from Massachusetts, as he pointed out, stated that corporations, taken as a whole, are contributing less than 2 percent of their net income for charitable purposes. The Senator from Virginia thinks that is a low figure, and it should be higher. This will tend to encourage some corporations, at least, to increase their charitable contributions. So I, for one, am pleased to support the Senator's amendment.

Mr. KENNEDY. I thank the Senator from Virginia for his encouraging words and for his support. He has stated exactly what the amendment does, and he also underlines the importance of encouraging the corporate sector to respond to the needs in our society. This amendment will encourage that sector to do so, and I hope the Senate will accept it.

I withhold the remainder of my time.

Mr. DOLE. Mr. President, as I indicated to the distinguished Senator from Massachusetts earlier, I agree with the statement by the Senator from Virginia that this amendment has merit. But in my official capacity as manager of the bill I must say that the Treasury opposes this amendment. I do believe however that it reflects the attitude of this administration to encourage corporate giving which is particularly important when you are going to have less in Federal funds flowing into some of these areas. So I just suggest that we have a vote on it. Members can vote any way they wish. I intend to vote for the amendment.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. DOLE. I yield back my time.

Mr. KENNEDY. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Connecticut (Mr. DODD) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 88, nays 5, as follows:

[Rollcall Vote No. 221 Leg.]

Garn	Stennis	

So Mr. KENNEDY's amendment (UP No. 288) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 289

(Purpose: To provide for an investment tax credit for theatrical productions and game shows)

Mr. STEVENS. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for himself and Mr. MOYNIHAN, proposes an unprinted amendment numbered UP 289.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle B of Title II, insert the following:

SEC. . INVESTMENT TAX CREDIT FOR THEATRICAL PRODUCTIONS AND GAME SHOWS.

(a) THEATRICAL PRODUCTIONS TREATED AS SECTION 38 PROPERTY.—Section 48(a) (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(11) THEATRICAL PRODUCTIONS.—

"(A) IN GENERAL.—Subject to the provisions of subsection (q), the term 'section 38 property' includes theatrical productions.

"(B) THEATRICAL PRODUCTION DEFINED.—For purposes of this subpart, the term 'theatrical production' means a presentation of a dramatic work, including a play, musical, opera, or ballet performed in a theatre before a live audience, but does not include a presentation primarily for use on television, radio, or film, or in a night club.".

(b) SPECIAL RULES FOR THEATRICAL PRODUCTIONS.—Section 48 is amended by redesignating subsection (q) as subsection (r) and by inserting immediately after subsection (p) the following new subsection:

"(q) THEATRICAL PRODUCTIONS.—

"(1) ENTITLEMENT TO CREDIT.—

"(A) IN GENERAL.—A credit shall be allowed under section 38 to a taxpayer for the costs of a theatrical production, but only to the extent that the taxpayer has an ownership interest in such production.

"(B) OWNERSHIP INTEREST.—The ownership interest of a taxpayer shall be determined on the basis of his proportionate share of any loss that may be incurred with respect to the theatrical production.

"(2) PROPORTION OF INVESTMENT QUALIFYING FOR THE CREDIT.—

"(A) IN GENERAL.—In the case of a theatrical production, the term 'qualified investment' in section 46(a)(2) means, for each theatrical production placed in service by the taxpayer during the taxable year, an amount equal to 66⅔ percent of the qualified United States production costs.

"(B) PLACED IN SERVICE DEFINED.—A theatrical production shall be treated as placed in service by the taxpayer during the taxable year in which such production is first publicly presented, including a public presentation preceding an opening before the ultimate audience for which it was intended, but not including a presentation before a select audience, such as prospective contributors.

"(3) QUALIFIED UNITED STATES PRODUCTION COSTS.—

"(A) IN GENERAL.—For purposes of this subsection, the term 'qualified United States production costs' means costs incurred in producing a theatrical production for presentation in the United States, including costs incurred prior to the time such production opens before the ultimate audience for which it was intended.

"(B) PRODUCTION COSTS DEFINED.—The term 'production costs' includes—

"(i) costs directly associated with the theatrical production, including the cost of equipment and supplies, and compensation for services performed by actors, production personnel, directors and producers,

"(ii) a reasonable allocation of general overhead costs,

"(iii) the cost of the rights to present a theatrical production, but not ancillary rights such as rights for television, films, radio, or night club presentations,

"(iv) residuals payable under contracts with labor organizations, and

"(v) participations payable as compensation to actors, production personnel, directors and producers.

Participations in all theatrical productions produced by a taxpayer during a taxable year shall be taken into account under clause (v) only to the extent of the lesser of 25 percent of each such participation of 12½ percent of the aggregate qualified United States production costs (excluding costs described in clauses (iv) and (v) of this subparagraph) for such theatrical productions, but taking into account for both the 25 percent limit and the 12½ percent limit no more than $1,000,000 in participations for any one individual for any one theatrical production. For purposes of this paragraph (other than clauses (iv) and (v) of this subparagraph and the preceding sentence), costs shall be taken into account only if they are capitalized. Production costs do not include advertising and promotional expenses.

"(4) UNITED STATES.—For purposes of this subsection, the term 'United States' includes possessions of the United States.".

(c) GAME SHOWS.—Subparagraph (B) of section 48(k)(1) (defining qualified film) is amended to read as follows:

"(B) QUALIFIED FILM DEFINED.—For purposes of this subsection, the term 'qualified film' means any motion picture film or video tape created primarily for use as public entertainment or for educational purposes. Such term does not include any film or tape the market for which is primarily topical or is otherwise essentially transitory in nature. The market for what are commonly designated as television game shows shall not be treated as primarily topical or otherwise essentially transitory in nature.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to production costs incurred after December 31, 1981.

Mr. STEVENS. Mr. President, today I am pleased to join with Senator MOYNIHAN in proposing an amendment to amend the Internal Revenue Code of 1954 extending the investment tax credit to theatrical productions.

This measure is identical to S. 2500 that was introduced in the last Congress and was the subject of hearings before the Senate Subcommittee on Taxation and Debt Management on May 30, 1980.

The Theatrical Production Investment Tax Credit Act of 1981 which Senator MOYNIHAN and I introduced last year, extends the investment tax credit to live commercial theatrical production. Provisions of the measure closely parallel those which were included in the Tax Reform Act of 1976 that extended the investment tax credit to qualifying production costs in the motion picture industry. The Theatrical Production Investment Tax Credit Act of 1981 will provide tax credit to persons to invest in productions of the commercial theatre.

This credit will provide an effective incentive to the performing arts industry while minimizing direct Government funding in this area. Under the provisions of this measure the investment tax credit will be allowed with respect to production costs if such costs constitute new section 38 property. Each taxpayer's share of the credit will be limited to their ownership interest in the theatrical production.

The investment tax credit was designed to spur investment and create new employment opportunities.

The theatrical industry badly needs the stimulus of an investment tax credit. Fewer new plays are being produced each year in commercial theatres. To a great extent, the decline in theatrical productions over the last few years can be traced to skyrocketing production costs. The play must run for months, if not a year, if the investors are to recoup production costs; yet four out of five productions lose money. The investment tax credit will help abate the deterrent to invest in new productions.

The cost to the Treasury for this measure is extremely small. The Joint Tax Committee estimate for last year's bill determined that the Theatrical Production Investment Tax Credit Act will reduce budget receipts by less than $5 million annually. This is certainly a small price to pay for encouraging investors to participate in theatrical productions that will have such a significant effect on the American artistic community.

Mr. President, there is a final provision in this amendment that addresses the problem created by the regulations promulgated pursuant to the 1976 amendment to section 48k. This second provision brings television game shows within the same treatment as motion pictures and video dramatic series. Game shows require this section 48k credit because of the large up-front costs in the investments required for their production.

I have discussed this with almost everyone who is involved. I am happy to yield to my good friend from New York, the cosponsor of this amendment.

Mr. MOYNIHAN. Mr. President, I thank the distinguished senior Senator from Alaska for bringing this matter to the floor.

He has noted that there have been hearings before the Committee on Finance. The record is a clear one, which is that the number of legitimate theater productions in our country has been dropping by one-half for each of the last three decades.

The problems of the investor in these productions are real. We have established that four out of five new theater productions lose money—they did 2 years ago—and of the fifth that does not, the returns are often very small or marginal. Our amendment allows investors in the legitimate theater and game shows to be treated in the same manner as investors in moving pictures. There is hardly a distinction in the nature of enterprise and, meaning no denigration of the movies, the theater is surely the older enterprise. Typically it has been

the more creative. It ought not to be penalized. It ought to be given equal treatment. The legislation of this Senator and of the Senator from Alaska will do that at very small cost to the Treasury. I feel it will be of large benefit to the American public and to the arts, the producers, the writers, and the actors. I do very much hope that this can be accepted.

Mr. President, it is my understanding that our distinguished chairman and his colleague, the ranking member, are willing to accept the amendment.

Mr. DOLE. Mr. President, I have discussed this amendment with the distinguished Senator from Alaska and the Senator from New York. It is my understanding that it has been discussed with the distinguished Senator from Louisiana (Mr. LONG) and "Commissioner" METZENBAUM. I must say for the record, though, that Treasury does oppose the amendment, but on the basis that we have accepted a few other amendments opposed by the Treasury, I have no objection.

Mr. LONG. Mr. President, we do provide an investment tax credit for the movie industry. I have been told that has been a saving grace, that without that, the movie industry may have been in very bad shape—not to say it is in that great shape, anyway. But this did a great deal to save the movie industry of this country and to keep it from going overseas.

The question was asked, why cannot we have the same consideration for the legitimate stage and for the Broadway musicals? I am not speaking just about New York performances. We have good stage plays here in Washington, D.C., and there is a revival all over the whole country, including New Orleans, which I represent.

We were asked why we could not do something of this sort and give them a tax advantage similar to what motion pictures have, in view of the fact that we do as much for the movies. Treasury said, the reason is that they were opposed to doing it for the movies, too, so as far as they are concerned, they would solve the problem, I assume, by undoing what we did for the movies.

Mr. President, I think we were right in giving the consideration that we did for the movie industry. The same logic that said we will do this for the movie industry suggested we do it for the legitimate stage. I am pleased to support the amendment. I hope the Senator agrees to it.

I compliment the Senator from Alaska and the Senator from New York in bringing this before us.

Mr. STEVENS. Mr. President, I emphasize the fact that this applies to all theater. I represent a State with a small population. We have the Anchorage Repertory Theater. They are concerned about this. The Senator from New York represents the home of large Broadway shows. They are concerned about this. So this is not something for just his community nor for the small community. This is something across the board for performing arts theaters.

I think it is a small price to pay, Mr. President, for giving some encouragement to these creative arts.

Mr. MOYNIHAN. It seems to me the largest consequence of this measure will be in precisely the repertory companies we have all over the country, which would like to bring in fresh productions and new authors. This will give them just that extra bit of assistance that we hope will have real consequence.

Mr. METZENBAUM. Will the Senator from Alaska yield for a question?

Mr. STEVENS. I am happy to yield to my friend from Ohio.

Mr. METZENBAUM. Mr. President, I understand the investment tax credit now is applicable to what we call the serial shows on TV.

Mr. STEVENS. Yes.

Mr. METZENBAUM. And this amendment would extend that to the game shows as well; is that correct?

Mr. STEVENS. That is right, those that are pretaped and pre-prepared. This would extend to them the same treatment as motion pictures, which is the same treatment already given to the serials, as I understand it.

Mr. METZENBAUM. Mr. President, I do not oppose this amendment, but I do wish to make a few observations.

I am not sure I can find a distinction between the serial shows and the so-called game shows. If one gets the investment tax credit, I guess the other is entitled to it as well. But I think we have before us today a pretty good example of the kind of abuses of tax laws we get into when we start extending investment tax credits to certain areas that are really not particularly productive.

We started with ITC's on the basis that they would add to the economy, contribute something as far as productivity in our country is concerned. I think, instead of the direction we are moving to extend the benefit to game shows as well as the other shows, we ought to be going the other way. But since we are not doing that, I think I have to agree that there seems to be some kind of unfair discrimination in the law as it is at the moment. I have no amendment, but I wish we were going in the opposite direction.

Mr. STEVENS. Mr. President, I thank the Senator. I understand his position. Mine is based on equity also. As long as this one is there, it ought to be fairly administered and apply to game shows. Particularly it ought to apply to performing arts theaters.

Mr. President, I am prepared to have the amendment voted on voice vote.

Mr. DOLE. Mr. President, it is my understanding that these credits are only available if it has some long-term use. If it is just a topical, short-lived proposition, the tax credit would not be available.

Mr. METZENBAUM. Like the "Gong Show" or "Tic-Tac-Dough"?

Mr. DOLE. I have never been on the "Gong Show" until I arrived here.

Mr. STEVENS. Mr. President, I yield back any time remaining.

Mr. DOLE. I yield back my time.

Mr. MOYNIHAN. I yield back my time, Mr. President.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 289) was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, Senator BAUCUS and Senator ROTH are preparing an amendment. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I wonder whether the Senator from Florida (Mr. CHILES) is in a position to bring up his resolution on small business.

Mr. CHILES. No. I want to bring it up next week.

Mr. DOLE. Mr. President, for the benefit of those who may be wondering about the status of the amendments, I point out that there are three remaining amendments by the Senator from Montana (Mr. BAUCUS). Two of those are under discussion.

One of the amendments by Senator BENTSEN is under discussion.

I am not certain about the amendments of the distinguished Senator from Arkansas (Mr. BUMPERS). Perhaps he can come to the floor and offer his amendments.

The amendment by the distinguished minority leader is under discussion with the Treasury.

The Senator from California (Mr. CRANSTON) is not certain whether he wants to proceed with his amendment.

The same can be said of the Senator from Arizona (Mr. DECONCINI).

The amendment of the Senator from Illinois (Mr. DIXON) is under discussion.

The amendment by Mr. EXON and Mr. BRADLEY, dealing with the third-year tax cut, will be offered on Monday.

The distinguished Senator from Kentucky (Mr. FORD) has an amendment which I think would be acceptable. The amendment is to be offered by Senator FORD and Senator PACKWOOD.

The two amendments by Senator GLENN are under discussion with the Treasury.

I understand that the distinguished Senator from Colorado (Mr. HART) will be willing to bring up his amendment with respect to a tax on imported oil. He indicated to me earlier that he would do that this afternoon.

The distinguished Senator from Alabama (Mr. HEFLIN) has one amendment pending. We have disposed of one of his amendments. I also believe that the distinguished Senator from Kentucky (Mr. HUDDLESTON) is willing to bring up his

earned income tax credit amendment, and the cloakroom should notify him.

Mr. DOLE. I yield.

Mr. LONG. Mr. President, Senators should be here to offer their amendments. At the close of business yesterday, the distinguished manager of the bill was on this floor, urging Senators—pleading with them—to come in and offer their amendments.

About 12 o'clock today, some of us who were here were urging Senators to come to the floor and offer their amendments.

The Senator from Kansas, the chairman of the committee, is again pleading with Senators to offer their amendments.

If the time runs out and Senators have not had an opportunity to discuss adequately their amendments, it will be their fault; it will be 100 percent their own fault.

The manager of the bill now, for the second or third time, is pleading with Senators to offer their amendments. Those of us on this side of the aisle who have the responsibility to manage the bill for the minority are joining in this plea to Senators. If they want to offer their amendments, they should do so, and we will agree to a voice vote, a roll-call vote, whatever they want.

If the time runs out and Senators have not had their amendments considered at the last minute, they should keep in mind that it is their fault. We have been pleading with them to bring in their amendments.

Mr. DOLE. I appreciate that statement by the Senator from Louisiana. That is an accurate reflection of what is happening—except, of course, in those cases where we are trying to negotiate. I will be visiting with Secretary Regan later this afternoon on three or four of those amendments.

The Senator from Massachusetts (Mr. KENNEDY) has a number of amendments. Three of them have been disposed of. One is under discussion. The others may not be offered.

The Senator from Vermont (Mr. LEAHY) has one amendment.

The Senator from Michigan (Mr. LEVIN) has two amendments.

We have disposed of the amendment of the distinguished Senator from Louisiana.

The Senator from Hawaii (Mr. MATSUNAGA) has an amendment and that was under negotiation. We promised the Senator from Hawaii if we cannot resolve it it will be brought up on Monday. So he will have all the time he needs.

The Senator from Montana (Mr. MELCHER) has an amendment.

Again, I could go down the list, but I think the long and short of it is that not really that many amendments remain. There are probably six or eight that are being discussed with Treasury officials, and I am willing to bet that not many of the others are going to be proposed. There are just not that many that I know of that anyone is pressing very strongly.

So perhaps if the distinguished Senator from Kentucky (Mr. FORD) and the distinguished Senator from Oregon (Mr. PACKWOOD) will be in a position to offer their amendments, or the other Senator from Kentucky (Mr. HUDDLESTON) would offer the amendment on the earned income tax credit, that would help us.

While we are waiting for Senator ROTH and Senator BAUCUS, who I understand have an amendment, I might also add there are about six Senators involved in a discussion on certain proposed day care credits, including the Senator from Ohio. I will be discussing that amendment with the Secretary later this afternoon. So they are not holding up anything. They are trying to put something together.

Mr. MATSUNAGA. Mr. President, will the Senator yield to permit me at this time an opportunity to make a general statement in support of the joint resolution?

Mr. DOLE. I yield.

INDIVIDUAL RETIREMENT ACCOUNT EXPANSION

Mr. MATSUNAGA. Mr. President, certain provisions in the committee bill are laudable in that they encourage greater retirement security by increasing the amount which individuals may set aside in an individual retirement account known as an IRA, and extending the IRA tax benefits to voluntary employee contributions in employer-sponsored plan. I supported these measures in the Finance Committee and believe they are necessary incentives for individuals to provide for their own security upon retirement.

Laudable as these provisions are, they fall short in answering the problem fully, and, indeed, they create a pernicious distinction between employer-sponsored voluntary and mandatory contribution plans which undermines the stability of mandatory contribution plans.

Mandatory contribution plans include governmental plans and a number of private employer-sponsored plans. Under these plans, the employee must contribute toward his retirement fund to secure a matching contribution from the employer.

These mandatory plans usually provide the participating employee with incidental benefits such as life insurance, annuity options, and increased benefits from later plan amendments. Moreover, these mandatory plans offer systematic worker savings through payroll deduction; and new employers who cannot afford to fund their workers' retirement program alone have resorted to mandatory plans to share the cost with workers.

However, worker participation in these plans will be weakened, as employees opt out to establish a deductible IRA. As a consequence, these mandatory plans may be disqualified as more and more workers withdraw from them to set up their own IRA. The pending bill, by allowing a tax deduction for employee contribution to a voluntary plan but not to a mandatory plan, endangers the continued operation and establishment of mandatory plans.

The Treasury Department has acknowledged the erosive effect the present bill will have on mandatory plans. During one of the Finance Committee executive sessions on expanded IRA's, Assistant Secretary Chapoton expressed concern over the potential erosion of mandatory plans, but opposed the inclusion of mandatory plans in the tax benefit provisions, because of the projected heavy revenue loss.

I believe the bill's failure to allow a tax deduction for mandatory-plan contributions is a mistake, which I hope will be rectified as soon as revenue constraints permit. I had intended to offer an amendment to correct the situation, but decided against it on assurance given me by the distinguished chairman of the Finance Committee that there will be a second tax bill considered by the committee, at which time my proposal could be raised.

I thank the Senator for yielding, and I suggest the absence of a quorum.

The PRESIDING OFFICER. Which Senator yields for that purpose?

Mr. MATSUNAGA. The Senator on the majority, Senator DOLE had yielded.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

UP AMENDMENT NO. 290

(Purpose: Relating to the taxable income of a "principal campaign committee" of a candidate for election to Congress)

Mr. FORD. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. FORD), for himself and Mr. PACKWOOD, proposes an unprinted amendment numbered 290.

Mr. FORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the following:

SEC. . TAX RATES FOR THE PRINCIPAL CAMPAIGN COMMITTEE OF A CONGRESSIONAL CANDIDATE.

(a) Paragraph (1) of subsection (b) of section 527 of the Internal Revenue Code (relating to tax rates applicable to political organization taxable income) is amended by striking the word "Such" and by inserting in lieu thereof the following: "Except as provided in subparagraph (A),".

(b) Paragraph (1) of subsection (b) of section 527 of the Internal Revenue Code (relating to tax rates applicable to political organization taxable income) is amended by adding thereto the following new subparagraph:

"(A) SPECIAL RULE.—In the case of political organization taxable income of a "principal campaign committee" of a candidate for election to Congress, the tax referred to in paragraph (1) shall be computed by multiplying the political organization taxable income by the appropriate rates of tax specified in section 11(b).

(i) DEFINITION.—For purposes of subsection (b), the term "principal campaign committee" means the committee designated, pursuant to 2 U.S.C. section 432(e), as in effect on July 18, 1981, by a candidate for election to Congress in accordance with regulation prescribed by the Secretary. A designation, once made, shall be revoked only with the consent of the Secretary.

(ii) ONE DESIGNATION.—A candidate for election to Congress shall have only one designation in effect.".

(c) EFFECTIVE DATE.—The amendments made by this section shall be effective for taxable years beginning after December 31, 1981.

Mr. FORD. Mr. President, this is an amendment to impose the normal corporate tax on a narrow group of political campaign committees. I have discussed this with both sides. I doubt seriously there is any objection to imposing a tax here. I think it is the proper thing to do.

Mr. DOLE. Mr. President, I would say to the distinguished Senator from Kentucky that this would, indeed, impose normal corporate taxes upon a narrow class not now subject to such tax. This amendment has been discussed with the manager of the bill; with the distinguished Senator from Louisiana, Senator LONG, and also with Senator PACKWOOD, who joins Senator FORD in this amendment, and others.

I have no objection to the amendment. It has also been discussed, I understand, with Senator METZENBAUM.

I ask that we withhold for a second while staff is checking with Senator LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I say to the distinguished Senator from Louisiana that I have indicated that the amendment had been discussed and that he had had not objection. Is that correct?

Mr. LONG. I have no objection, Mr. President.

Mr. DOLE. I yield back my remaining time.

Mr. FORD. I yield back my remaining time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Kentucky (Mr. FORD).

The amendment (UP No. 290) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. FORD. I thank the distinguished Senator.

Mr. DOLE. I thank the distinguished Senator from Kentucky.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 291

(Purpose: To amend the Internal Revenue Code of 1954 to redefine individuals eligible for the earned income credit, and for other purposes)

Mr. HUDDLESTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON), for himself and Mr. ROTH, proposes an unprinted amendment numbered 291.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SEC. 1. Subparagraph (A) of section 43(c)(1) of the Internal Revenue Code of 1954 (defining individuals eligible for the earned income credit) is amended—

(1) by striking out "or" at the end of clause (ii);

(2) by striking out the period at the end of clause (iii) and inserting in lieu thereof ", or"; and

(3) By adding at the end thereof the following new clause: "(iv) is, on the last day of such taxable year, a citizen of the United States or an alien individual who has been admitted to the United States as a permanent resident.".

Mr. HUDDLESTON. Mr. President, the amendment that I have presented is designed to close a loophole that is being used by a substantial number of illegal aliens in the country to receive a payment from the Federal Government under the earned income tax credit provisions of our income tax law.

A study has been made that would suggest that as much as $120 million a year is being paid from the Treasury to persons who are illegally in this country and are filing tax returns for the purpose of receiving the "refund." I put that in quotations because it is not a refund but it is a tax payment, a monetary payment, to the taxpayers of the country.

The amendment would simply make this provision available to all American citizens and all legal residents who are in the country, and would just preclude those who are not in the country legally.

Mr. President, on April 15, millions of Americans completed their tax returns for 1980 and in the process paid an unprecedented amount of taxes. Hundreds of billions of dollars in income taxes have been paid into a tax system which is the largest in the world and which functions primarily upon the voluntary compliance of the American taxpayer.

Unknown to most taxpayers, large numbers of illegal aliens also rushed to get their income tax returns filed. However, a substantial number of illegal aliens who file income tax returns are using the earned income tax credit to either reduce their taxes or to receive a refund on taxes that were never paid.

In 1975, Congress passed a tax bill which created a new concept in tax law: The earned income tax credit. This credit was intended to provide some tax relief for low-income workers who have dependent children. The underlying rationale for the credit was that it would offset the impact of social security taxes and encourage individuals to find employment.

Under this law, the worker is entitled to a 10-percent tax credit for the first $5,000 in earned income; the credit is phased out when adjusted gross income reaches $10,000. The most expensive feature of this law is its refundable aspect. If the worker owes taxes which are less than the credit, the excess of the credit will be paid to him or her by the Government as an overpayment. In 1979 about 9 million individuals qualified for the earned income tax credit, which cost the Federal Treasury approximately $2.1 billion. Of this amount, $1.4 billion was attributable to the refundable aspect of the law.

There is compelling new evidence that illegal aliens are using the earned income tax credit in order to reduce taxes or to secure refunds from the Government even though they do not pay any taxes. A new study just released by David North, director of the Center for Labor and Migration Studies at the New TransCentury Foundation, concluded that "nearly a third of those with refunds secured EITC payments." Furthermore, they "had larger average EITC payments and larger refunds than Americans generally."

The study states that part of the study group of 517 individuals received EITC payments totaling $19,637 and that this resulted in a mean payment of $302. If we assume a very conservative number of 3 million illegal alien workers in the United States, this would result in EITC payments of about $120 million. The 3 million assumption is conservative, because even the U.S. Bureau of the Census admits that there could be as many as 6 million illegal aliens in the country and other reliable sources believe there could be as many as 12 million.

According to a letter from the Acting Commissioner of IRS, illegal aliens can qualify under the law for the EITC and they use the earned income tax credit. In order to prevent this continued misuse of the EITC, I am offering this amendment which limits eligibility for the EITC to a citizen of the United States or an alien individual who has been ad-

mitted to the United States as a permanent resident.

It is ironic that an earned income tax credit primarily meant to encourage low-income individuals to work instead serves to limit employment opportunities for them. Even though we have about 8 million unemployed people in the country today, this provision is an added incentive to enter the United States to take jobs from American citizens. In effect, the Federal Government is paying illegal aliens to take American jobs at a time when the administration is reducing unemployment benefits and jobs programs.

To believe that this is not a widespread problem would be to ignore what we have learned in the past about the speed with which illegal aliens catch on to the loopholes in our tax laws. The IRS has established through experience that illegal aliens learn very quickly how to beat the tax collector. Between 1976 and 1978 the IRS conducted a pilot program in which it interviewed apprehended illegal aliens to determine whether they had outstanding tax liabilities. This program was dropped because the illegal aliens quickly learned how to get around it. In a letter to me dated January 4, 1980, the Director of the Collection Division at the IRS stated:

> An awareness of the program developed within the Mexican illegal alien community which comprised the majority of apprehended illegals. The Mexican press publicized the fact that illegals caught with money were subject to being interviewed by IRS, and the word evidently spread. Consequently, when Mexican illegals were picked up, they had little or no money, but numerous postal money order stubs from payments they had apparently sent back to their families in Mexico.

In essence the Director admitted that even though the IRS found that many of the apprehended illegal aliens did in fact owe Federal income taxes, there was no way to collect, since the illegals learned very quickly to send most of their money out of the country as soon as possible.

There is further evidence that illegal aliens learned quickly of other methods of avoiding Federal income taxes. The IRS published a manual which was used by its own agents for the tax collection program aimed at illegal aliens. In this manual was a section entitled "Practices to Avoid Taxes" which stated:

> (1) Assigned personnel should be aware of practices utilized by some illegal aliens and their employers to avoid their Federal tax obligations.
>
> Many aliens also claim excessive exemptions, since they are aware that by doing so they will receive larger take-home amounts.

This manual states conclusively that many illegal aliens are deliberately falsifying their tax returns and W–4 forms. The result is that if an illegal alien does not bother filing a tax return before he returns home, he in effect takes the uncollected, nonwithheld taxes with him. If he does file a return, he pays little or no taxes because of the excessive number of exemptions. Under the latter method he also increases the amount of the refundable earned income tax credit.

Although the amounts involved in each individual case may be relatively small, they are very substantial if several million illegal aliens are in fact manipulating the tax system. The earned income tax credit alone cost the Federal Government over $2 billion in 1979. Further, we should not forget that the Congressional Budget Office has determined that each 1 percentage point increase in unemployment costs the Federal Treasury $29 billion every year. Any program which encourages illegal aliens to take jobs in this country will result in a substantial indirect cost by increasing our unemployment rate.

Mr. President, at the present time most Americans are paying more in taxes but are being told they will receive less in benefits for those taxes. In the near future we may be able to reduce this inequity for many taxpayers by passing a substantial tax reduction bill. I think that it would be very appropriate to pass along hundreds of thousands of dollars of savings now by denying the use of the EITC to illegal aliens. The EITC was intended to encourage Americans to find jobs, not to recruit illegal aliens.

This has been cleared, I believe, on both sides of the aisle. I will defer to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, as I understand, the present law is that individuals who are eligible for the earned income credit are married individuals who are entitled to a dependency exemption for a child, surviving spouses, and heads of households who maintain a household for a child. In each case, the child must reside with the taxpayer in the United States.

The amendment offered by the distinguished Senator from Kentucky would prohibit illegal aliens from claiming the benefits of the earned income credit.

There are some administrative problems, Mr. President.

The provision adds administrative complexity to the credit, because the IRS will have to distinguish between legal and illegal aliens.

The IRS indicates it will be very difficult for the IRS to enforce the provision, and its attempt to enforce it could strain already heavily "taxed" IRS resources.

It is not clear that the problem the amendment attempts to address is a major problem.

They also feel the problem of illegal aliens should be dealt with outside the Internal Revenue Code.

But the IRS are not the ones who are overtaxed, Mr. President; the American people are the ones who are overtaxed. I just want to suggest that this amendment has merit as far as this Senator is concerned. There may be some objection, but I am not aware of any other than the ones I have expressed. No overwhelming problems have been called to my attention by the Department of the Treasury. While the official position of the Treasury and the IRS would be in opposition to the amendment, I am willing to accept the amendment.

Mr. HUDDLESTON. I thank the Senator from Kansas.

Mr. President, the IRS, of course, claims difficult enforcing a great many provisions of the tax code, but this is a matter of fundamental equity, in my judgment. We should not have a provision of our tax law that is designed to help the American citizens being used in an illegal way. This amendment closes that loophole.

Mr. DOLE. Does the Senator from Louisiana have any objection to the amendment?

Mr. LONG. I have no objection to the amendment.

Mr. DOLE. I yield back my time on the amendment, Mr. President.

Mr. HUDDLESTON. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 291) was agreed to.

Mr. HUDDLESTON. I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT 292

(Purpose: Providing different methods of computing deductions for motor carrier operating)

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from North Carolina.

The assistant legislative clerk read as follows:

> The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 292.

Mr. HELMS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 169, strike out lines 11 through 22, and insert in lieu thereof the following:

(a) ALLOWANCE OF DEDUCTION.—

(1) IN GENERAL.—For purposes of chapter 1 of the Internal Revenue Code of 1954, in computing the taxable income of a taxpayer who, on July 1, 1980, held one or more motor carrier operating authorities, an amount equal to the greater of—

(A) the sum of—

(i) 10 percent of so much of the qualified income as does not exceed $25,000,000;

(ii) 8 percent of so much qualified income as exceeds $25,000,000 but does not exceed $50,000,000;

(iii) 6 percent of so much qualified income as exceeds $50,000,000 but does not exceed $75,000,000;

(iv) 4 percent of so much qualified income as exceeds $75,000,000 but does not exceed $100,000,000; and

(v) 2 percent of so much qualified income as exceeds $100,000,000, or

(B) the aggregate adjusted bases of all motor carrier operating authorities held by the taxpayer on July 1, 1980, or acquired

subsequent thereto pursuant to a binding contract in effect on July 1980,

shall be allowed as a deduction ratably over a period of 60 months. The 60-month period shall begin with the month of July 1980 or, at the election of the taxpayer, the first month of the taxpayer's first taxable year beginning after July 1, 1980.

(2) QUALIFIED INCOME DEFINED.—For purposes of this subsection, the term "qualified income" means the average gross income of the taxpayer for the taxable years of the taxpayer ending in 1978, 1979, or 1980 which is allocable to interstate motor transportation conducted pursuant to a certificate or permit issued pursuant to subchapter II of chapter 109 of title 49, United States Code.

Mr. HELMS. Mr. President, House Joint Resolution 266, as reported by the Senate Finance Committee, would permit a motor carrier to take an ordinary tax deduction, over a 5-year period, for the value of operating authority lost as a result of enactment of the Motor Carrier Reform Act of 1980. The committee bill would allow a deduction equal to the adjusted bases of operating rights held by the motor carrier on July 1, 1980.

The pending amendment, Mr. President, is the result of a complaint registered with me by a constituent in North Carolina. I assured him that I would do my best to make certain that the Senate gave consideration to his problem, which is peculiar, perhaps, to many and some other trucking companies in this country.

The pending amendment would allow a motor carrier the option of taking a deduction based on a percentage of his average gross revenues from interstate trucking operations from the years 1978, 1979, and 1980.

The deduction would be the sum of: 10 percent of so much of the qualified income as does not exceed $25,000,000; 8 percent of so much qualified income as exceeds $25,000,000 but does not exceed $50,000,000; 6 percent of so much qualified income as exceeds $50,000,000 but does not exceed $75,000,000; 4 percent of so much qualified income as exceeds $75,000,000 but does not exceed $100,000,000, and 2 percent of so much qualified income as exceeds $100,000,000.

Mr. President, there seems to be little disagreement with the proposition that Congress ought to create a special tax deduction to compensate motor carriers for the value of operating authority lost as a result of the Motor Carrier Reform Act of 1980. The House report on the Motor Carrier Reform Act of 1980 states the following:

Should it become apparent that the effect of this legislation has been to substantially erode the value of operating rights, then appropriate relief for such results should be considered as early as possible.

No one would argue today that a motor carrier's operating authority is worth as much now as it was last year before enactment of the Motor Carrier Reform Act. Indeed, as justification for this change, the Senate Finance Committee report on House Joint Resolution 266 states the following:

The deregulation of the interstate motor carrier industry has significantly reduced the value of motor carrier operating rights acquired before deregulation. In many cases, these rights represented a substantial part of a taxpayer's equity in his business and often were collateralized to raise capital. The legislative history of the Motor Carrier Act of 1980 recognized that deregulation might require future consideration of relief for the diminution of the value of these rights.

The committee concluded that the unique circumstances of the deregulation of the interstate motor carrier industry requires some form of relief that is not available under the present tax laws.

Mr. President, I agree with the conclusion of the Senate Finance Committee that Congress should provide some unique form of relief for motor carriers who have lost valuable operating authority as a result of action taken by Congress last year. I understand that the House Ways and Means Committee also agrees with this sentiment; similar language is included in the committee's version of the tax bill.

It has come to my attention, however, that the method settled upon by the Senate Finance Committee for determining the value of operating authority is unfair and discriminatory. Because of the way that operating rights were necessarily acquired over the years, some companies are due to gain more than others if the committee language is adopted.

Indeed, many motor carriers with valuable operating rights will be left out in the cold with no deduction at all. The main beneficiaries of the committee bill will be those large motor carriers who have trafficked in operating authority over the years.

The Finance Committee has decided that the tax deduction should equal the adjusted basis of the operating authority as shown on the motor carrier's books. But the problem here is that many motor carriers—and I wish I could tell you how many but I cannot—but many motor carriers operating authority has an adjusted basis of zero, or nearly zero. This is because the operating rights were grandfathered under part II of the Interstate Commerce Act of 1935, or were acquired years ago when they were far less valuable than they have become in recent years.

The operating authorities of these companies were no less valuable to them before trucking deregulation than were the values of operating authorities purchased in recent years for large sums of money.

The Senate Finance Committee's report on the tax bill indicates their understanding of just how valuable operating rights are. The report states:

The value of the operating authorities provided owners with an asset that constituted a substantial part of a carrier's asset structure and a source of loan collateral.

I might add, Mr. President, that these operating rights had considerable value no matter how they were acquired.

If Congress adopts the approach favored by the Finance Committee, there are liable to be two motor carriers of about the same size, with about the same revenues, in competition with each other, one of whom will enjoy a substantial tax reduction because he bought his operating authority recently, and one of whom will get no tax deduction because his operating rights were grandfathered. The question is, of course, Is this the way for Congress to promote fair competition?

Mr. President, I imagine someone is going to object to this amendment because of its revenue consequences. I cannot argue with that because I have not yet been able to get the revenue figures from the Finance Committee staff. But assuming for the sake of argument, Mr. President, that revenue losses under my proposal will be substantially greater than under the committee proposal, does that make the committee's version fair and equitable?

I also expect someone will object to my amendment on the grounds that, as a general rule, adjusted basis is the measure of value for determining tax deductions for property loss. I agree, of course, that, as a general rule, adjusted basis is the proper measure of a tax deduction for property loss. But, Mr. President, by the very enactment of this amendment, we are creating an exception to the normal tax rules regarding deductions for loss of property.

The Senate Finance Committee's report is particularly enlightening on this point. It states the following:

The courts, in several decisions, have denied a loss deduction when the value of an operating permit or license decreased as a result of legislation expanding the number of licenses or permits that could be issued. These decisions held that the diminution in the value of a license or permit did not constitute an event giving rise to a loss deduction under section 165 if the license or permit continued to have value as a right to carry on a business.

In the Consolidated Freight Lines case, the Ninth Circuit denied deductions for lost "monopoly rights" when the State of Washington deregulated the intrastate motor carrier industry by eliminating restrictions on entry. The court reasoned that the taxpayer had not lost any rights conferred by the certificate of operating authority because the taxpayer still was permitted to do business and the operating authority had not given any further rights.

Any "monopoly rights," the court stated, resulted from legislation and State administration restricting the availability of operating authorities. Since the taxpayer could not own (or purchase) property rights in legislation or regulations, repeal or modification of legislation or regulations did not give rise to a deductible loss, even if such action had the result of making the taxpayer's business property less valuable.

Even with the committee bill, Mr. President, we are creating a special tax deduction, apart from the normal tax laws. I reiterate my support for giving equitable consideration to the motor carrier industry. The substantial loss of value in their operating authority has been clearly demonstrated. But if Congress is going to create a special exemption, why not make it a fair and equitable exemption?

In trying to establish an alternate means of determining the value of lost motor carrier operating authority I do not seek to change principles of tax law—Congress is already doing that by enacting this special tax deduction. I am merely trying to insure that if this write-off is allowed, it will be applied fairly.

Mr. President, I am aware that the American Trucking Association is officially opposed to this amendment. I have many good friends in that organization, including its President, Mr. Bennett Whitlock. I understand the concerns of the ATA regarding the possible consequences of my amendment. Much is at stake. Therefore, I feel that my amendment should be considered. I can see both sides.

Mr. President, let me reiterate one point: The intent of Congress, as evidenced by the House report on the Motor Carrier Reform Act of 1980 and the Senate Finance Committee's report on House Joint Resolution 266, is to give motor carriers a tax deduction for the value of operating authority lost as a result of the Motor Carrier Reform Act of 1980. The committee bill would give tax deductions to some motor carriers, my amendment would give tax deductions to all motor carriers, regardless of whether the operating authority was recently purchased, purchased years ago, or grandfathered.

Mr. President, I urge the adoption of the amendment.

Mr. DOLE. Mr. President, I have discussed this amendment with the distinguished Senator from North Carolina. While we are not in a position to accept the amendment, I have assured the Senator from North Carolina that, if this Senator has anything to say about it, there will be a second tax bill, at least there will be one considered by the Senate Finance Committee this year. I have asked the distinguished Senator from North Carolina if he would accommodate us and let us take a look at this proposal in more detail at a later time.

I have discussed it briefly with members of the staff of the Joint Committee on Taxation and our own staff. It does raise another question. We will try to deal with the general question in the Senate Finance Committee.

I can assure the Senator from North Carolina that if that will be satisfactory, we can proceed in that fashion.

Mr. HELMS. I thank the Senator. Mr. President, I fully agree that that is the way to proceed. I say to him further that I have not as yet been able to ascertain the budget impact of this amendment, which, of course, needs more consideration. I thank the Senator for his courtesy and I withdraw the amendment.

The amendment (UP No. 292) was withdrawn.

Mr. DOLE. Mr. President, I thank the distinguished Senator from North Carolina.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

THE WASHINGTON STAR, AN INSTITUTION LOST

Mr. MATHIAS. Madam President, the Washington Evening Star has met the fate that every American family fears. When costs exceeded income by too much, it simply collapsed. It leaves a gaping news, opinion and commentary hole where a democracy can afford it least—in its national capital.

News objectivity and spirited, well-reasoned editorial commentary and opinion made for a lively exchange of views and marked the Star as something very special in Washington journalism. For nearly a century and a half the Star has been the hometown newspaper of Presidents and ordinary citizens. But even more than that, it was a community institution which took pride not only in chronicling its daily comings and goings, but assisted its charities and enterprises and took a leading part in regulating its pulse and pace. Now it appears that we will lose its enormous value and influence as a community and national force.

My hope is that in some imaginative and creative way—a way which American journalism always seems to find—our Nation's Capital and the people of the Washington region will continue to have the essential "other voice" of news, commentary and opinion we vitally need to inform the decisions which are shaping our own lives and those of our fellow citizens.

TELEVISION IN THE SENATE

Mr. MATHIAS. Madam President, last week the Committee on Rules and Administration, which I chair, reported Senate Resolution 20 which calls for television and radio coverage of proceedings in the Senate Chamber. The resolution was sponsored by the distinguished majority leader, Senator BAKER, who led the fight in committee for its passage. I believe that action and Senator BAKER's tireless pursuit of this issue constitute a momentous step in the history of this Chamber.

I ask unanimous consent that an editorial from the Los Angeles Times supporting the committee's action, recognizing the majority leader's contribution, and urging the full Senate to adopt the resolution be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CAN'T THE SENATE BEHAVE?

The House of Representatives has been televising its daily proceedings for more than two years, and now the GOP leadership of the Senate thinks it should also venture into the electronic age.

The prime mover is Majority Leader Howard H. Baker Jr. (R-Tenn.), himself an adept TV performer. Although Baker has been able to persuade the Rules Committee to send the issue to the floor, many senators are still dead set against permitting cameras in the chamber.

There is a suspicion that lights and cameras would create a theatrical atmosphere, and that grandstanding members might try to steal the show. There is also a concern that senators might be caught off guard, either snoozing at their desks or engaging in unsenatorial pranks. Such fears are nonsense. The same objections were heard when the House was considering its continuing daytime serial, but all has run smoothly.

We would be the last to suggest that gavel-to-gavel coverage of the Senate would pose much of a ratings threat to "MASH." The stuff of high drama of low comedy just isn't there most of the time. But the House telecasts, seen mostly on public and cable TV, have had a constant if modest audience, and have given millions of Americans, including schoolchildren, their first opportunity to view one branch of the national legislature in action.

The Senate should follow suit. The only reason we can think of for the members to vote against television is that they don't trust themselves to behave as well as their colleagues in the House.

Mr. FORD. Madam President, does the Senator yield or is the Senator through?

Mr. MATHIAS. I am happy to yield to the Senator from Kentucky.

Mr. FORD. Madam President, I serve and am the ranking minority member on the Rules and Administration Committee. I do not oppose the resolution as such that the distinguished Senator from Maryland has just extolled. I do, however, have some problem as it relates to the costs. Somewhere between $4 million and $5 million will be the cost to install the necessary equipment in the Senate Chamber in order to televise the Senate proceedings and debates.

We were instructed by the Rules Committee by a resolution that the distinguished majority leader was a cosponsor or a primary sponsor of asking us to reduce the overall expense of the Senate, the committees, and its employees by 10 percent.

The distinguished minority leader of the Senate was a prime mover of that effort to let the Senate lead in reducing the expenditures.

The distinguished Senator from Maryland and I had the responsibility and not one that we cherished, at least I did not, of looking at our colleagues and saying, "You must reduce your budgets, you must reduce your expenses." I might say that each of the chairmen of the committees, the Secretary of the Senate, the Sergeant at Arms, all were very cooperative in making the effort to reduce those expenditures. We saved almost $5 million in that reduction.

Now we are being asked to take that money we saved and put in television equipment, and the distinguished majority leader has said the rules of the Senate must be changed in order to accommodate the imposition of television cameras into the Senate Chamber.

I proposed at that time that the Senate go to radio and could go immediately. The experience we had as related to the debate on the Panama Canal treaties I think was evidence that people listened to the debate of the Senate when there was something here that they wanted to listen to.

Also we are told that one body or the other if it is televised or we have television in the Senate will be video and one will be live and the other will be

video tape because there is only one channel that can be used on cable network.

Second, television cable goes into approximately 25 percent of the homes in the country and if we go to radio it would go into almost every home, every car, every truck, every business in this country and would cost only somewhere between $22,000 and $25,000.

With the mood I find in this Senate today as it relates to tax cuts, reduction of expenditures and that sort of thing, I am somewhat appalled that those who are leading the tax cuts on expenditures want to now turn around and take that money which we have saved and spend it not knowing basically what the rules change will be, the decisions that will have to be made, the changing of an institution that all of us cherish so much, and the ways that it will do business.

So, I take this opportunity to say to the Senate as a matter of record that at some point when this resolution is brought to the Senate for consideration Senators will have an opportunity to make a choice, whether they want to spend approximately $5 million, and those who gave that statement said it was only a guess, and we will hear that it will be a lot less, but I have not been around here very long, but I have never seen an estimate yet where we got a bid on it and it came in underestimate, so I am going to give my colleagues an opportunity to vote on whether they spend $5 million or $25,000.

I thank the distinguished Senator from Maryland who has been very courteous to me and very cooperative and I say he is an excellent chairman of the Rules Committee.

Mr. MATHIAS. I thank the Senator from Kentucky for his charitable words. I think he has expressed quite a view here that he expressed with great eloquence and great force in the committee debate on this subject, and I am sure that we will hear further from him when the resolution is called up for consideration of the full Senate.

I however, point out to the Senator from Kentucky that there is not a fixed price tag. There is a range of figures and I think that $5 million is the high side of all the figures, and it may well be that if our friends in the press exhibit an interest in the subject the networks themselves will be paying some part of the price. But those are all the elements of the program that need further discussion, and I think that the Senator from Kentucky performs a very useful service to the Senate in laying out the options, giving us the alternatives.

I must say the interest of the public in the proceedings of the Senate is a very healthy sign for our democracy, for the Republic itself, the fact that so many visitors attend the sessions of the Senate, and it seems to me it would be important if we could do so to enlarge the number of people who can participate in the proceedings of the Senate in this way.

The galleries are small, the number of people who can visit them is necessarily very small. But if through the magic of television we can extend the galleries of the Senate to include all 220 million Americans on great occasions, on the occasions of historic debates, of momentous decisions, it seems to me we will have brought a new dimension to our democracy. We will have taken that small spot in Athens, where democracy is traditionally believed to have been born, and extended it across the whole continent of North America.

That really is the effort we are trying to make. I think we have to acknowledge it is going to cost something. Whether it is going to cost by way of appropriation or whether it is going to be charged to the broadcast industry or however, it will have to be paid for. But when you consider the effect of the broadening knowledge of government, broadening knowledge of issues, broadening knowledge of personalities in Congress throughout our whole population, the cost per person will be very small as measured against the potential benefit.

Mr. FORD. Madam President, if the Senator from Maryland would yield me a moment while we have a colloquy here——

Mr. MATHIAS. I am happy to yield.

Mr. FORD. One of the problems we face, one of the arguments in favor, if we go to television, is what will come afterward. What will happen if the networks pay a portion of this? If they pay a portion of this who then has control? If they are going to pay for it and they have no control over it I doubt seriously whether they will pay for it.

Therefore, the question of who controls the cameras, who controls the payroll, who controls the archives, these sorts of things are going to be questions that I think ought to be solved before we make the decision, because that may create some problem as it relates to those in this body as to how they vote.

I do not want to correct my distinguished friend, but when he says that we will allow all 220 million or so Americans to view the operation of the Senate floor, we have gotten off one channel awfully fast as it relates to cable and gotten——

Mr. MATHIAS. But the communications industry is moving awfully fast.

Mr. FORD. I understand that. But as of today and what we have in front of us is only C-span, and that is the cable, and there is only one channel available, and this only in 25 percent of the homes, and 25 percent is not the American homes of quite 220 million-some-odd.

I just want to be sure when we are discussing what the eventuality might be that we have to look at the real world today and what will happen tomorrow.

Mr. MATHIAS. Well, I like to look at the world of tomorrow, and I believe the world of tomorrow does offer the possibility that the whole American people may someday be visitors to the Senate through the miracle of television.

Mr. FORD. As the Senator well knows, I am not opposed to televising the operation of the Senate. What I am opposed to, at a time when we are trying to cut the budget, is to spend $5 million approximately, give or take, and I think it could well be more as well as it could be less, whether you do it right or whether you do it piecemeal, and you can always do something halfway and it will cost you half of the estimate. But eventually it will cost you more as against the radio where we could be heard at the same time.

There is some thought, Senator, that if you listen to the words it is more important than just seeing how you look, and so if we can listen to what you say we may learn more about the debate than the colorful dress which you have and the way that you are flamboyant and carry on. It is somewhat different. They may pay more attention to that than the eloquence of your speech.

Mr. MATHIAS. I think the orator, whether in ancient Greece or on the frontiers of American civilization, has delivered a whole message by word and gesture and expression and by a penerating glance, by all of the methods by which human beings communicate with each other. It is not always through verbal communication. Of course, through television most of that communication can be carried on as if the parties were in each other's presence.

So I think it is a superior medium. But that is a decision we will make, and I want to work with the Senator from Kentucky. I want to particularly work with him to see that whatever is done is done in the most efficient and economical way that it can be, and that no money is wasted, and that whatever money is spent, if any, is spent well, and that the American people will consider it an investment well spent.

Mr. FORD. I agree with the Senator that whatever the decision of the Senate will be we will do our utmost to see that the taxpayer receives the most for his dollar. I just hope we will be very careful when we make the expenditure or the decision on the expenditure, and that we will make it in the best interest of the taxpayer.

I am still concerned about spending that kind of money at a time when we are trying to reduce the budget.

I appreciate the Senator's allowing me an opportunity to express my feelings, and to let the Senate be on notice that I will have that amendment at the time the resolution comes up, and if it continues in the vein in which it was voted on in committee, I have no doubt as to what will transpire, but I hope we can at least have a good debate as it relates to the expenditure of the funds.

I do not think anyone faults trying to expand the balcony to every American.

Mr. MATHIAS. I think the Senator from Kentucky will guarantee us a good debate.

Mr. President, I make a point of order that a quorum is not present.

The PRESIDING OFFICER (Mr. SYMMS). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SOCIAL SECURITY TRUST FUND—TWO PROBLEMS, TWO SOLUTIONS

Mr. PELL. Mr. President, I take this opportunity to comment upon the nature of the short-term imbalance in the social security trust fund and to suggest a possible solution that would make up the expected shortfall in the system between now and 1986.

In reviewing the financial analyses of the social security system, it is clear that we face two problems. If current economic trends continue, benefits for retirees would exceed available funds in 1982. However, the administration's own calculations indicate that this will be a temporary deficit and that revenue will again exceed benefits in 1986. From that point on, the trust funds are expected to remain healthy until the next century. At that time, the social security system will experience a more serious, long-term funding problem as a result of an increase in the number of individuals reaching retirement age.

Contrary to the persistent rumor, therefore, the deficit that is expected to occur in the system next year is not a result of the so-called greying of America. Nor is it a phenomenon that will bankrupt the country or the social security trust fund. Between now and 1986 there is projected to be a cumulative $13 billion deficit in the old age social security trust fund. Certainly, this is a great deal of money. However, when we compare it to projected Federal revenues during this period, it amounts to only three-tenths of 1 percent.

This is a temporary, manageable problem that should not be solved by permanently cutting benefits to retirees. Retirees are the victims, and not the source of the social security funding problem. The projected temporary imbalance in the trust fund is a direct result of the dramatic increase in prices and the high rates of unemployment during the past few years.

The rate of increase in consumer prices has forced the annual percentage increase in social security benefits up to double-digit levels that have outstripped increases in wages. The high rate of unemployment has resulted in a decline in the number of working people who contribute to the system, reducing the amount of income going into the system. Economic forecasts indicate that lower inflation rates and improved employment and wage rates will resolve this problem by 1986. From that point on, the system is expected to remain healthy until after the beginning of the next century, when the number of social security beneficiaries will rise from the current 31 beneficiaries per 100 workers to between 40 and 70 per worker.

It is clear, Mr. President, that there are two distinct problems before us that call for entirely different solutions. It will take a great deal of study to address the long-term problem that the system will confront in the next century. In the meantime, Congress must quickly act to be sure that benefit payments to retirees are not interrupted next year. The task before us is an urgent one. But the seriousness of it does not give us a mandate to act irresponsibly.

The administration has suggested tightening eligibility for disability and reducing benefits for early retirees. Others have recommended increasing the retirement age to 68. In my view, these are unacceptable solutions to the temporary deficit. They would cause unnecessary hardship.

The solution that is adopted by Congress should not be greater than the problem itself. We should not take a sledge hammer to a problem that needs a bandage. I would recommend that we consider approving a temporary loan to the old age trust fund from general revenues. In my view, this is an equitable solution to a difficult problem that has occurred as a result of our country's poor economic performance in recent years. There are a number of precedents for this approach to solving a temporary financing problem in a program by establishing a transfer mechanism from general revenues. This authority to approve loans from general revenues is exercised for programs under the jurisdiction of the Economic Development Administration, the Maritime Administration, and the Commodity Credit Corporation, to name a few.

I would suggest that the loan of funds from general revenues to the social security trust fund be repaid, automatically and with interest, as soon as the trust fund again shows a surplus, beginning in 1986. I am not talking about a huge infusion of general revenue funds to meet this temporary social security deficit. The total amount of the loan, during the 3 to 4 years of the deficit, would only be one-half of the increase the administration has proposed for next year alone for defense spending.

By authorizing a loan of funds from general revenues to the social security trust fund, Congress would solve the immediate funding problem in a responsible way, without a needless immediate reduction in benefits.

Then Congress, without haste or panic, could proceed to a careful consideration of solutions to the long-term social security funding problem, and develop a solution that does not needlessly sacrifice the economic security of current or future retirees.

I yield the floor, Mr. President, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

ECONOMIC RECOVERY TAX ACT OF 1981

The Senate continued with the consideration of the joint resolution.

Mr. PACKWOOD. Mr. President, after 2 days of assiduous negotiations. great credit goes to Senator HAWKINS, Senator METZENBAUM, and Senator DURENBERGER. With the help of Senator DOLE and the acquiescence of the administration, agreement has been reached on two day care amendments. There is already a standing order for Senator METZENBAUM to be able to introduce a day care amendment. I have a standing order to introduce one. I ask unanimous consent that the standing order allowing me to introduce one be transferred to Senator DURENBERGER.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, it is our intention not to ask for a rollcall on these amendments. The two amendments will be offered tonight and we would like to pass them tonight. We have assured everyone we have no intention of asking for a rollcall on either amendment.

With that, I yield the floor.

Mr. LONG. Mr. President, some of us may want to vote for the amendment. I might want to vote for it. If I do, I might like to have it as a record vote.

Mr. PACKWOOD. Mr. President, enough assurances have been given that if we were going to have a rollcall vote on it, we would have to put it over. I understand the Senator from Ohio will not be here on Monday.

Is that right?

Mr. METZENBAUM. That is correct, Mr. President.

Mr. PACKWOOD. Mr. President, we would have to put it over. I do not think there would be any objection to putting it over. Am I correct?

Mr. LONG. Mr. President, my thought is that this is a significant amendment. I think that a lot of Senators might like to vote for it and be on record. I am inclined to feel that there ought to be a rollcall and we ought to vote. By the time we go to conference with this amendment, it will be a very significant amendment, and I think if we are able to muster enough strength on the rollcall on the floor, that would be a help in conference.

I do not want to prevent the amendment from being agreed to, but I honestly think we ought to have a rollcall vote on it. It would be all right to agree to it if the condition is that we could reconsider and vote on it on Monday.

Mr. METZENBAUM. It is perfectly agreeable to the Senator from Ohio that we introduce the amendment, debate the amendment and, if no one has any objection to it, vote at some future time.

Mr. DOLE. Will the Senator be back Monday evening

Mr. METZENBAUM. It will be pretty late Monday evening, not before 9:30 or 10 o'clock.

Mr. LONG. Mr. President, it seems to me that I hardly think the Senator would want to insist on being here to vote for the amendment if we can all understand that it is going to be agreed to. As far as I know, there is not going to be any problem agreeing to it. I think this is a sufficiently significant amendment that it ought to have the dignity of a rollcall vote, because I think when we go to conference with this amend-

ment, we ought to be in a position to report to the House how the Senate voted on it.

Mr. DOLE. What happens if we go ahead and agree to it and then leave the matter open? We have enough agreement to do it.

Mr. LONG. I would be willing to agree to the amendment without a rollcall vote provided that we agree that it will be reconsidered and that we will vote on the matter, let us say, on Monday so we can have a rollcall. I would like to have a rollcall vote on it one way or the other just to show how the Senate feels about it.

Mr. METZENBAUM. Mr. President, may I suggest a possible alternative? That is that the vote on the amendment be set as a voice vote, that the motion to reconsider be set for Tuesday at a time certain, without further debate. The Senator from Ohio is prepared to advise both the majority and minority leaders that, should the situation develop, we conclude the measure with respect to all other amendments by Monday, in those circumstances, I would have no objection to the Senate's bringing this matter to a vote on Monday as well. I would not want to hold up the Senate.

Absent that, I see no difference between our voting on Monday or Tuesday.

Mr. DOLE. That is satisfactory to the Senator from Kansas, Mr. President. We shall be here all day Monday, I am sure.

Mr. LONG. This would be my suggestion, Mr. President. It is all right with me to agree to this by voice vote provided that the matter be reconsidered and that it be scheduled for a vote on Monday on the merits of the proposal.

If, by some chance, the matter should not be agreed to on Monday, it is perfectly all right with me to give consent now that the matter could be reconsidered when the Senate gets back in here. I do not anticipate that it will be defeated, but I would like to have a rollcall vote on this amendment.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, it is my expectation that we will resume consideration of the tax bill after the period for morning business, which I am about to ask permission to create. I do not believe we will be in session for a long time after that, but I caution Senators that a final decision has not been made on the disposition of the amendment.

While we are waiting for the decision to be reached, I ask unanimous consent that there now be a period for the transaction of routine morning business, to extend not more than 15 minutes, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a number of matters that can be dealt with by unanimous consent.

First, I inquire of the Chair: Is there an order for the convening of the Senate on Monday next?

The PRESIDING OFFICER. The order now reads that the Senate will convene at 10 a.m. on Monday.

ORDER FOR RECOGNITION OF SENATOR THURMOND ON MONDAY

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order on Monday next, the distinguished Senator from South Carolina (Mr. THURMOND), the President pro tempore, be recognized on a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 266 ON MONDAY NEXT

Mr. BAKER. Mr. President, I ask unanimous consent that on Monday next, the Senate resume the consideration of House Joint Resolution 266 not later than 10:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I inquire of the distinguished minority leader if he is in a position to consider certain items on the Executive Calendar which have been cleared on this side, and I will identify them at this time, if I may.

Edward L. Rowny, U.S. Arms Control and Disarmament Agency.

Michael J. Fenello, Department of Transportation.

James R. Harris, Department of the Interior.

James G. Stearns, Department of Energy.

William Bradford Reynolds, Department of Justice.

George A. Keyworth II, Executive Office of the President.

All nominations under Department of State.

Richard T. Kennedy, International Atomic Energy Agency.

Gilbert A. Robinson, International Communication Agency.

Everett Alvarez, Jr., ACTION Agency.

Robert W. Karpe, Department of Housing and Urban Development.

Nora Walsh Hussey and Clifford M. Barber, Department of the Treasury.

I inquire of the minority leader if those names are cleared for consideration on his calendar.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed with nominations on page 2, beginning with Department of Transportation, but not including the first nomination under Department of Energy; all the nominations on page 3; all the nominations on page 4.

Mr. BAKER. I thank the minority leader. That corresponds with the list I have cleared on this side, with the exception of Edward L. Rowny, U.S. Arms Control and Disarmament Agency.

Mr. President, in light of the statement made by the distinguished minority leader, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc.

The nominations considered and confirmed en bloc are as follow:

DEPARTMENT OF TRANSPORTATION

Michael J. Fenello, of Florida, to be Deputy Administrator of the Federal Aviation Administration.

DEPARTMENT OF THE INTERIOR

James R. Harris, of Indiana, to be Director of the Office of Surface Mining Reclamation and Enforcement.

DEPARTMENT OF ENERGY

James G. Stearns, of Nevada, to be Director of the Office of Alcohol Fuels (new position).

DEPARTMENT OF JUSTICE

William Bradford Reynolds, of Maryland, to be an Assistant Attorney General.

EXECUTIVE OFFICE OF THE PRESIDENT

George A. Keyworth II, of New Mexico, to be Director of the Office of Science and Technology Policy.

DEPARTMENT OF STATE

Dean E. Fischer, of Virginia, to be an Assistant Secretary of State.

Davis Rowland Robinson, of the District of Columbia, to be Legal Adviser of the Department of State.

Joan M. Clark, of New York, a career member of the Senior Foreign Service, to be Director General of the Foreign Service (new position).

Robert Strausz-Hupe, of Pennsylvania, to be Ambassador and Plenipotentiary of the United States of America to the Republic of Turkey.

Monteagle Stearns, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

John R. Countryman, of the District of Columbia, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Sultanate of Oman.

David Anderson, of New York, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Socialist Federal Republic of Yugoslavia.

Marshall Brement, of Arizona, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Iceland.

Richard Noyes Viets, of Vermont, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Hashemite Kingdom of Jordan.

INTERNATIONAL ATOMIC ENERGY AGENCY

Richard T. Kennedy, of the District of Columbia, to be the representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

INTERNATIONAL COMMUNICATIONS AGENCY

Gilbert A. Robinson, of New York, to be Deputy Director of the International Communications Agency.

ACTION AGENCY

Everett Alvarez, Jr., of Maryland, to be Deputy Director of the Peace Corps.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Robert W. Karpe, of California, to be President, Government National Mortgage Association.

DEPARTMENT OF THE TREASURY

Nora Walsh Hussey, of South Dakota, to be Superintendent of the Mint of the United States at Denver.

Clifford M. Barber, of New York, to be Superintendent of the U.S. Assay Office at New York, N.Y.

Mr. BAKER. Mr. President, I move en bloc to reconsider the vote by which the nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF JAMES R. HARRIS—DEPARTMENT OF THE INTERIOR

Mr. McCLURE. Mr. President, I strongly support the nomination of James R. Harris to be the Director of the Office of Surface Mining Reclamation and Enforcement within the Department of the Interior. After a thorough investigation of Mr. Harris' background and credentials, the Senate Energy and Natural Resources Committee voted 17 to 0 in favor of recommending approval of his nomination by the full Senate.

Mr. Harris brings to the directorship an impressive set of credentials and experience in both public and private life. He is a certified geologist, experienced in the areas of petroleum exploration and development and coal. From 1973 to 1974 he served as a member of the Indiana House of Representatives, and since 1976 has served as an Indiana State senator. As chairman of the Indiana Senate Committee on Natural Resources, Environment and Agriculture, it became Dick Harris' responsibility to formulate, introduce, and pass implementing legislation in accordance with the Surface Mining Reclamation and Control Act of 1977. Those of my colleagues familiar with the legislative history of that act, know the magnitude of difficulty of Senator Harris' task. Yet he accomplished the goal with high praise from both industry and the environmental community alike, by showing a willingness to listen and a sensitivity to the problems.

Against this background of outstanding service, allegations were raised in articles originally printed in the Wall Street Journal regarding certain land transactions by Mr. Harris with Peabody Coal Co. and AMAX Coal Co. I ask unanimous consent to have the articles printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

REAGAN MINE CHOICE HAD PROFITABLE DEALS WITH COAL OPERATORS

(By Andy Pasztor)

WARRICK COUNTY, IND.—State Sen. James R. Harris, who represents part of this poor coal region where moon-like craters and scarred, gr-- hillsides attest to decades of surface mining, recently was picked by President Reagan to be the government's chief enforcer of strip-mining laws.

If the U.S. Senate confirms Mr. Harris as director of the Interior Department's Office of Surface Mining, the companies under his jurisdiction will include two big coal producers that in recent years granted him land deals here potentially worth millions of dollars. Moreover, state and local records show that the Evansville, Ind., legislator struck these private deals while he was chairman of committees responsible for strip-mining legislation and enforcement of strip-mining laws.

Since October 1978, county records show, a partnership formed by Mr. Harris acquired at bargain prices nearly 1,500 acres of reclaimed strip-mined land from Peabody Coal Co. and Amax Inc., two of the nation's largest coal producers. The partnership last December paid an Amax unit $250 an acre for most of the land, according to the official state tax stamp on the deed. That was substantially less than one-quarter of what comparable acreage in this rugged southwest corner of Indiana was selling for at the time, based on the county recorder's records and interviews with dozens of local land owners, bankers and real-estate experts.

TURNING A PROFIT

Within two weeks of the December purchases, Mr. Harris and his partner, Evansville developer W. C. Bussing Jr., began turning a handsome profit by selling portions of their newly acquired holdings, frequently for five or six times what they paid for them. So far, the partners have subdivided and sold at least 232 acres with extensive road frontage; a number of buyers confirm they paid $1,500 an acre and higher for the undeveloped home sites.

Mr. Harris acknowledges that the transactions "could give the public the impression that something was wrong," but he maintains that he paid fair market value for land that "anybody else could have bought" for the same price. "There is no possible impropriety," he says.

In Indianapolis, a spokesman for Amax says the company realized there was "a potential conflict" when it decided to sell the land to Mr. Harris. But he adds that the company "went to great lengths," including getting an outside appraisal for the property, before it signed the deal. Amax asserts it put the property "on the open market" several months prior to the December sale but didn't receive another offer at that price.

In St. Louis, Peabody officials say they sold the property to Mr. Harris and Mr. Bussing for about $70 more per acre than the price established by an outside appraisal in July 1978. Peabody didn't have any immediate comment on the negotiations leading up to the sale or whether company officials in Indiana expressed any doubts about the transaction.

Mr. Harris's land transactions raise questions about the propriety of a lawmaker's doing business with major strip-mining concerns whose operations are directly affected by his official activities. Last year Mr. Harris was chairman of the state senate's committee on natural resources, environment and agriculture, which has jurisdiction over major legislation involving Indiana's 90-odd strip mines. In 1978 and 1979, the 51-year-old legislator headed the state's Natural Resources Advisory Committee, which was created to oversee the Indiana agency that enforces strip-mining laws.

Contrary to Indian law, Mr. Harris in 1979 failed to disclose his involvement in the land-buying partnership when he filed his annual financial-disclosure form required by the state legislature. For 1980, Mr. Harris's Senate financial-disclosure form did list the partnership and described its main area of business as "investments."

In October 1978, land records show, Peabody Coal deeded over to Mr. Harris and his partner approximately 450 acres for a total purchase price of $175,000, or slightly under $390 an acre. About two years later, courthouse records show, the two men purchased another 1,030 acres from Amax's Meadowlark Farms, Inc. unit is the same general part of the County.

The average price of $250 an acre for the second purchase "was ridiculously low," contends one real-estate man who has studied the Amax property. He asserts that similar land, but with nowhere near the road frontage they bought, was selling for anywhere from $1,000 to $3,000 per acre."

Large portions of both tracts listed in the deeds are reclaimed strip-mined land, marred by the steep, furrowed hills and scraggly vegetation characteristic of so much land around here. But other areas apparently haven't been stripped at all, and a good part of the property is suitable for immediate construction of homes.

Indeed, the low prices paid by the Harris partnership for such land haven't escaped the notice of some local business people. One local banker fumes that "$250 an acre is a very, very low price. It's almost unheard of these days."

Another businessman, who has received $15,000 for three-acre lots not far from the land Mr. Harris is selling, says only reclaimed land that is entirely unsuitable for building sells for under $750 or $1,000 an acre anywhere in Warrick County. "I made an offer to buy some of the land at that low price, but Amax didn't want to discuss it further," he recalls. (Much of the partnership's land is assessed at $63 an acre or less, according to county records, but local real estate people say the assessed value of such land has little relation to market value.)

DISPUTE OVER BLASTING

The sales price by Meadowlark Farms to the partnership contrasts with the Amax unit's purchase last summer of more than 600 acres of reclaimed and unmined land in the county from Aluminum Corp. of America. The average price for that transaction, according to state tax records, amounted to approximately $2,200 an acre.

Mr. Harris says he made a "fair" profit for selling some of the land that he purchased from Amax, considering that he and his partner didn't put in sewers, roads or other costly improvements before they sold it. He asserts that hundreds of additional acres held by Amax are still on the market in the area for the same $250 per acre.

In addition, the legislator says he "fully informed the White House" and congressional staffers about the transactions two months before his prospective selection was announced. "I have acted in good faith," he says. Mr. Harris adds that he didn't disclose his involvement in the partnership in 1979 because he understood it wasn't required.

A White House spokesman confirms that Mr. Harris "raised the subject" of his private land purchases before his name was announced. But the administration is still waiting to receive his completed federal financial-disclosure forms.

Ray Rankin, the local real-estate man who

sold some of the property for Mr. Harris, says the partners originally "paid a fair price for it as a large parcel" because very few people in the area could come up with the hundreds of thousands of dollars necessary to buy such a large tract. Mr. Rankin says the partners are providing private financing for the families who purchase individual home sites from them, which he says is a big reason they can charge the prices they have been getting.

Both Amax and Peabody have been involved in disputes from time to time that resulted in state actions. But there isn't any evidence that the companies have received political favors from Mr. Harris.

If Mr. Harris gets the federal post, he would run an agency with more than 750 employes and a yearly budget of $180 million. More important, he would be the federal official with the greatest influence over the way companies are permitted to strip land for coal; what they must do to restore the land for other uses; and how much it will cost such concerns as Amax and Peabody to comply with federal and state environmental constraints.

SUPPORT FROM SENATOR LUGAR

Mr. Harris' nomination capped years of efforts to build a solid political base in this area, according to both friends and foes. After a stint on the local school board, the trim, gregarious geologist served two years in the Indiana house of representatives before winning a state-senate seat in 1975. His colleagues in 1977 named him one of the five outstanding freshman senators. Last year, Mr. Harris was reelected to the senate as the only Republican member from the predominantly Democratic coal-mining area of southern Indiana.

Mr. Harris, who runs his own geological-consulting firm, received strong support for the federal strip-mining job from Republican U.S. Sen. Richard Lugar of Indiana and at least one coal-industry group that applauded his "wealth of coal-related experience." Mr. Harris almost certainly will keep his state senate seat until the U.S. Senate votes on his nomination in the next few weeks.

When the White House announced Mr. Harris' nomination earlier this month, Interior Secretary James Watt praised the Indiana legislator's "commitment to environmental responsibility" and his years of work "in conjunction with" the federal surface-mining office to bring Indiana's law in line with the 1977 Surface Mining Act.

DENOUNCING THE FEDS

In his home state, Mr. Harris is widely regarded as one of the most outspoken opponents of current federal strip-mining enforcement programs. Mr. Harris, among other things, played a major role in persuading state officials to spend the past few years in court attacking the constitutionality of some federal mining regulations. Two months ago, in the latest round of legal skirmishes, the state filed still another action in a federal court in Indianapolis against the Interior Department and the surface-mining office. Two Amax units and Peabody Coal filed a companion suit at the same time also attacking the validity of the federal rules.

As chairman of the natural-resources committee, Mr. Harris shepherded through the Indiana legislature a 1980 strip-mining bill that denounced federal strip-mining initiatives as "an intrusion into the land-use and planning control" that should rest with the state. The legislature's "overriding consideration," the bill said, should be to "prevent further federal encroachment" in this area.

Such a stance is consistent with Interior Secretary Watt's publicly announced intention to "reorient" the mining agency's operations by quickly putting in a host of new faces; loosening some reclamation regulations that have prompted bitter complaints from state and industry officials over the years; and sharply reducing the federal government's role as a watchdog of companies that illegally damage the environment.

REAGAN'S PICK FOR STRIP-MINE WATCHDOG HOLDS OPTION TO BUY MORE COAL PROPERTY

(By Andy Pasztor)

WASHINGTON.—President Reagan's choice to be chief enforcer of strip-mining laws holds an option to buy an additional 1,030 acres of reclaimed land from Amax Inc., the coal producer that sold him a similar chunk of property last December at bargain prices.

In an interview, James Harris confirmed that a partnership he formed was granted the option when it bought more than 1,000 acres of reclaimed strip-mined land in southwestern Indiana. The Indiana State Senator said a roughly $400-an-acre maximum price was set on the land under option but that the partnership hasn't acquired any of the property.

Moreover, Mr. Harris conceded that the contract with the coal company was structured so that profit from the first sale could be used to exercise the option on the second tract.

Meanwhile, a former Amax official, who negotiated the 1980 transactions, yesterday asserted that the company never had placed any of the property on the open market. He said Amax had decided "nearly three years earlier that Dick Harris could have all of the land" if he met what the company considered a fair price.

Gibson Martin, who was Amax's chief real estate official in southern Indiana, said in an interview that the coal company therefore never actively sought out nor considered offers for the land. Mr. Martin left the company around the beginning of this year.

As previously reported, land records and interviews with local real estate agents and residents show that comparable land in Warrick County is selling for at least $1,500 an acre.

In Indianapolis, Amax hadn't any immediate comment.

As reported earlier, the partnership paid Amax $250 an acre for the first tract. Within two weeks, the partners started selling lots for homes at five or six times that price.

Mr. Martin said Amax's attorneys and its top management never informed him of any potential conflicts from doing business with a state legislator. When Mr. Harris negotiated the sale, he was chairman of two legislative committees responsible for drafting new strip-mining laws and monitoring strip-mining throughout Indiana.

In response to questions about Amax's decision to do business with the lawmaker, Mr. Martin said the company recognized that Mr. Harris "wasn't an enemy of the coal industry. Why shouldn't you do business with your friends," he asked, so long as "anybody else would be charged the same price?"

The former Amax official, however, reiterated the mining company's contention that it sold the property for more than its fair market value as determined by an independent appraiser. Mr. Martin recalled that he told Mr. Harris three years ago: "I will let you have the first shot at buying the land—but only at my price."

Mr. Harris, however, denied that version of the transaction. He asserted that he didn't receive a commitment from Amax to sell the property to the partnership until last summer and that he understood the company had made efforts to solicit other buyers for the land.

The partnership's profit from the transactions "probably won't approach a million dollars," Mr. Harris said. He indicated that he and his partner hope to exercise the option despite his expected nomination to head the Interior Department's Office of Surface Mining.

The legislator said he told White House officials about the private business deals before news of them surfaced in the press this week.

Mr. Harris reiterated that he didn't see any impropriety in buying land from a company whose operations could be affected by his official activities in the legislature. "If you're going to live in Warrick County . . . and if you do buy and sell land . . . you're going to do business with the coal companies," Mr. Harris told an impromptu news conference at the statehouse, according to the Associated Press.

In a telephone interview, Mr. Harris repeated his assertion that some of the land acquired from the company will sell at very low prices and "some of it is possibly unsalable."

Mr. McCLURE. Mr. President, the committee, despite Mr. Harris' past record, took those allegations very seriously. Prior to the committee hearing, an extensive review of the allegations was made by the administration, including a specific full-field investigation by the FBI. At my direction, in cooperation with Senator JACKSON, the committee staff conducted an independent inquiry which included interviews with the key persons involved in the transactions. The committee then held a hearing on Mr. Harris' nomination which included sworn testimony from the following individuals involved in the land transactions:

James R. Harris.

W. C. Bussing, Harris' business partner.

William V. Hartman, executive vice president, Peabody Coal Co.

John M. Bagby, administrative director—land, Peabody Coal Co.

Lee Nickerson, controller, AMAX Coal Co.

Don McCollum, land use economist and real estate representative, AMAX Coal Co.

J. Nat Noland, manager—State and media affairs, Indiana, AMAX Coal Co.

Gibson Martin, Sunmark Exploration Co. (formally director of real estate, AMAX Coal Co.).

George J. Davidson, MAI, Appraisal Associates.

The purpose of the hearing was stated succinctly by Senator JACKSON as follows:

And the purpose, of course, is to make certain that there is a proper ventilation of all of the allegations that appeared, especially in the Wall Street Journal. By responses given by the people referred to in the articles and other leads that we have run down, the fact that all of those individuals will be testifying here under oath should lay to rest one way or the other previous allegations made.

I feel very strongly, as I know the Chairman does, that when allegations of this seriousness have been made that the public has the right to know the answers. Mr. Harris also has the right to have the responses given to those allegations under oath. Fair to him as well as to the public. So I commend the Chairman for the thorough investigation that has been made, and I look forward to the testimony." (Hearing Transcript, p. 6)

The full printed hearing record of this proceeding is not yet available to the Members, so I will set out in pertinent part the relevant testimony and responses to questions so they might be a matter of record at this point.

I would note at the outset that Mr. Harris was presented to the committee by the following distinguished members:

Senator RICHARD G. LUGAR, Senator DAN QUAYLE, Congressman H. JOEL DECKARD, and Congressman JOHN T. MYERS.

In particular I commend to my colleagues the statement of the senior Senator from Indiana, which I submit for the RECORD.

Mr. Harris then gave sworn testimony in which he responded fully and forthrightly to all allegations raised against him including details of his legislative activities during the period, steps taken to avoid conflicts of interest, his business relationship with Mr. Bussing, and his role in the Indiana State lawsuit challenging the 1977 Surface M ning Act. He categorically denies any legislative favoritism as a result of the land transactions. Both the Peabody and AMAX deals were at arm's length with final terms above the fair market value established by independent appraisers.

I ask unanimous consent to have the testimony printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF JAMES R. HARRIS

Mr. Chairman and distinguished members of the committee. I am Dick Harris of Evansville, Indiana, President Reagan's nominee for Director of the Office of Surface Mining Reclamation and Enforcement in the Department of Interior. I am here to provide for you, and this committee whatever information you may find helpful in the confirmation process.

I would like to express my appreciation to Senator Lugar, Senator Quayle and Representatives Deckard and Myers, along with the many people in State government, the coal industry—including management and labor—and environmental and conservation groups who offered their support during the nominating process.

My background has been a mixture of professional and business pursuits along with many years of public service. Educated and trained as a geologist, and having been certified as a professional in that area, I have been involved, a good portion of my life, in the exploration for and production of fossil fuels, principally petroleum, and to a lesser degree, coal.

I grew up in Southwestern Indiana's coal producing area and am the product of a number of generations of coal miners, both underground and surface.

During my seven years of service in the Indiana General Assembly, I served two years on the House Natural Resources Committee and five years on the Senate Natural Resources, Environment and Agriculture Committee, three of those years as its chairman.

The passage of the 1977 Surface Mining Act came about during my tenure in the Indiana Senate. It was a source of a great deal of concern to State government, and mine operators alike, that a State that had previously been in the forefront of surface mining reclamation—Indiana having been the second State to adopt such legislation (1941) and having had on its books since 1967, surface mining legislation that had been used as a model in several other States—was now to have a Federal program imposed upon it.

It was the position of Indiana's administration, at that time, that this was another Federal intrusion into an area, properly the responsibility of the States, and that they wanted no part in its enforcement. To the best of my knowledge, no effort was anticipated, by the administration, to bring about a State program in Indiana.

As the only majority member of the Indiana Senate, from the coal producing area of the State, and as Chairman of its Natural Resources, Environment and Agriculture Committee, I felt that it was necessary that I study the Act, meet with interested groups and representatives of the Office of Surface Mining (OSM) to make a personal determination of what my legislative position should be on the matter.

Having done this, I introduced, and successfully worked for the passage of, a resolution providing for the establishment of a joint House-Senate study committee to prepare legislation to bring Indiana's surface mining and reclamation laws into compliance with the Federal Act. The legislative leadership named me to chair the committee and to author any resulting legislation. The work effort of that committee resulted in a bill which I introduced in 1980 and successfully managed to final passage.

Submission of the bill to OSM resulted in some 80 pages of comment rather than approval. Another bill generated by that committee, and authored by me, passed the 1931 session. It is my understanding that some three-fifths of Indiana's program has now been approved and final approval should come before the end of the year.

I have a working knowledge of the Act, and I think it is a workable law. When Secretary Watt first interviewed me for this position. I told him that I had no serious problems with what was required in the Act itself, but that I did have, and continue to have serious reservation about some of the regulations and the manner in which they have been applied.

There is no reason to write regulations in such a manner that a person must be decreed in both law and engineering to understand how to mine coal and reclaim land. It is counterproductive to write regulations that may well preclude development and application of better methods.

I feel strongly that we can remove the excessive and unduly burdensome requirements of the regulations without weakening the environmental standards mandated by the Act. If confirmed, I assure you that coal will be mined in an environmentally sound manner and the mined land will be properly reclaimed, as the Congress intended by the passage of the Act.

I am personally committed to that goal, but for the program to succeed to its fullest, it will have to be done in a manner in which the States, OSM, the mine operators and particularly, the citizens living in our mining communities—whose health, safety and quality of life are affected by surface mining—regain some semblance of mutual trust and cooperation. No such program can be successful or productive in an atmosphere of distrust, constant litigation and adversarial posturing.

One of the mistakes of the previous administration was that of not taking all of the interested parties into its decision making process when establishing its program, policies and rules. As a result, OSM is held in low esteem by most who are interested in its activities, particularly the States.

This program can succeed only if the agency is operated with an "open door" policy, seeking and taking advise and counsel from all interested parties, the States, the industry, citizen groups and you gentlemen sitting here. That has always been my method of operation in government and if confirmed, I plan to meet regularly with the interested parties and with members of Congress, to attempt to keep them fully informed and to allow them full access to the regulatory process.

Since my name first surfaced as a possible nominee for the position as Director of OSM, many people, including Secretary Watt have asked of me, why I would accept that position, given the unpopularity of the agency with almost everybody, the emotional nature of its regulatory mission and its past history of continuous controversy. My answer to that question has been, and continues to be, that I believe that if this Nation is to rebuild its economic and industrial base, one of the most important things, essential to that effort, is that we be able to produce, market and utilize coal, at the lowest practicable cost, in keeping with sound environmental practices—and that I believe that I can make a contribution to that end.

I received early warning that whoever was chosen for the position of Director of OSM, the appointee would immediately become controversial and that the confirmation process would not be an easy one. I accepted that fact, but certainly did not anticipate the events that followed.

In spite of a sound environmental record, compiled over seven sessions of the Indiana General Assembly, I was immediately referred to as a "fox guarding the hen house," by many who knew nothing of my previous record in the environmental area.

I have been in public life over a lot of years, as have most of you gentlemen. I have taken my lumps from the press over those years—as I am sure you have. I have had my judgement, my political philosophy and my stances on certain issues questioned and I seldom flinched. All that is within the legitimate, professional mission of the press.

When, on March 18, the Wall Street Journal ran the first of two damaging articles about me on page one, I was in a state of disbelief. No journalist had previously attacked my integrity, through the 19 years since my name first appeared on a ballot.

My friends and colleagues and the people who know me and my record, and those who had any knowledge of sale prices of mined lands, were equally amazed.

Thus the issue was raised, and I am extremely grateful for this opportunity to lay out all of the facts and lay those questions to rest, once and for all.

Actually three allegations were made: (1) that I had purchased mined lands at "bargain" prices from Peabody Coal Co. The truth of the matter came out at another point in the article which indicated that the price paid was 22 percent over an appraisal set by an independent appraiser. Another fact not mentioned was that those properties were advertised in newspapers of wide circulation over an extensive period and were available to any qualified buyer; (2) that I had purchased lands from a subsidiary of Amax Coal for less than "one quarter of what comparable acreage" was selling for in the area. I have provided this committee the appraisal report upon which this appraisal was based.

The Wall Street Journal article attempted. in one case, to compare sales prices of some of the prime farmland in Warrick County with the stripped areas that were purchased. In addition, the availability of Amax properties had had an extensive exposure to many real estate investors and brokers prior to my being aware that Amax had decided to dispose of it; (3) that "contrary to Indiana law" I had failed to disclose my involvement in the land buying "partnership" when I filed my annual financial disclosure form in 1979. The association of Harris and Bussing is one of two people owning land as tenants in common, just as I have owned land with my brother, a former associate in the telephone business and other people. This association took on no partnership status at all until, in the tax filing process for 1979 taxes, payable in 1980, Mr. Bussing's accountant determined that the simplest method of figuring and reporting would be to make up a partnership return, and supply each of us a copy to be submitted with our personal returns. On April 15, 1980, a federal identi-

fication number was requested for "Harris-Bussing-joint venture." My disclosure statement, required of legislators had been filed in January 1980. This association was duly reported in January 1981.

The questionable handling of information found throughout the Wall Street Journal articles is typified by the opening paragraph which speaks of Warrick County as "this poor coal region" when in fact its growth rate from 1970–1980 was 48.3 percent making it the second fastest growing county in Indiana.

In 1979, the latest year's figures available to me, the annual average weekly income of all reporting employment in Warrick County was the highest for any county in the State. Its assessed evaluation per student is among the highest in the State. By most indicators, it is far from being a poor county.

At the request of the committee, I have prepared some 18 pages of comment on the Wall Street Journal articles, and have attached a copy as a part of this statement.

The first information that I had concerning the availability of the Peabody property came when Mr. Bussing brought to my attention an ad that he had clipped from the Evansville Sunday Courier and Press, and a brochure that he had gotten when he replied to the ad. We decided we should take a look at the "Victoria Property" and I called Tom Barclay in the Evansville office of Peabody to request further information. I called Mr. Barclay rather than the person named in the ad since I have known Tom since I first started working at Sunlight Coal Company, when I was 16 years old, and where he was employed at that time.

After somewhat protracted negotiations, including several types of offers on our part, which were rejected, we finally arrived at a cash price of $175,000, which was agreed to by Peabody's people and Bussing and I.

I was not aware of who in the Peabody organization had the final authority to approve the sale, but it wasn't anyone that I was acquainted with. I was not aware, until the Wall Street Journal article, that we had paid a price well in excess of the value set by an appraiser.

In the case of the Amax property, it was again Mr. Bussing who brought to my attention that Amax had decided to offer for sale, the property which we purchased. He had been contacted by one or more people asking him to become a part of a group to be set up to purchase the properties.

During the period from about May 30, 1980, to about mid-July 1980, I had been incapacitated due to a ruptured appendix and a long period of convalescence. It was about that mid-July time that Mr. Bussing suggested that we contact Amax to obtain whatever information they had available on the property. I called Nat Noland, a member of the Amax Legislative and Public Relations Department, who put me back in touch with Mr. Gib Martin of their land department. I expressed a continuing interest in the property to Mr. Martin. He furnished me with a large aerial photograph showing the boundaries of some 2,700 acres that Amax proposed to sell in one tract.

Mr. Bussing and I studied the map, realized that we could not handle it in one purchase, and decided to make an offer based upon a three step purchase of about 900 acres per purchase with options to acquire the entire 2,700 acres over time.

When we met in mid-August with Mr. Don McCollum of Amax, and at that time determined that they had sold and traded off about 700 acres of the more accessable acreage, leaving a balance of 2,060 acres. Mr. Bussing and I then made an offer on a two step purchase that would have allowed us to buy half of the acreage and be granted an option on the second half.

Mr. McCollum indicated that our proposal would be unacceptable to his management people, but suggested that they might act favorably on a proposal that would include a considerable cash consideration for the option on the second parcel and an advanced price on the second parcel.

After considerable negotiations, we agreed upon the terms under which we finally executed the agreement. I had no knowledge of who in the Amax operation had final approval over such matters, but it was nobody that I had any dealings with or knowledge of.

Now, I want to make a few points as clearly and as forcefully as I can: I made no clandestine deals with any coal company and have no reason to believe that I have been given any special consideration by them. The transactions were above board, were carried cut in a competitive market, the prices paid were equal to or in excess of independent professional appraisals, the properties were available to a wide range of qualified buyers and notices of the conveyances were published in several newspapers.

The idea has recently been advanced, from one sector, that somehow, if I am confirmed, I will not be the policy maker at OSM, but that policy would be set by others in the office. This seems to me to be a situation in which these people find nothing to attack in my record and have taken it upon themselves to attempt to predict my future.

In the past there have been two things that even my detractors have not questioned, one is my leadership ability and the other that I have always been my own man.

On first meeting with Secretary Watt, I told him that I did not need the job and that one of my requirements, if I was to make myself available for the position, was that I would have autonomy in setting policy in the office. He readily agreed to that and I have no reason to believe that his commitment to me has changed. I will set the policy at OSM in keeping with the general policies of the Secretary and the administration.

Gentlemen, I will bring to this job a critically needed understanding of State government and an appreciation for and sensitivity to the State's point of view. This understanding is vital as we move rapidly toward the State's taking primary responsibility for enforcing the Act, as the Congress intended. I would seek to eliminate the devisive, adversarial relationships that have built up and bring the States into a full partnership in the administration of the program.

I reject, categorically, any suggestion that the States cannot do the job, or somehow cannot be trusted to do the job. I have met with many of the State leaders, and I assure you that they have the resources and the ability—and stand ready to assume their share of the responsibility.

I stand ready to work to the limits of my abilities in directing the administration and enforcement of Public Law 95–87 and the Secretary's regulations. I ask the support of this committee in the confirmation process.

STATEMENT ON THE MAKEUP AND ROLE OF INDIANA'S CITIZEN LEGISLATURE, STATE'S COMMITTEES, ETC.

The Indiana General Assembly is a part-time citizen legislature which is limited to meeting 31 working days in even numbered years and 61 working days in odd numbered years. This type of legislature is favored by an overwhelming percentage of the people of Indiana.

The very nature of the makeup of this type of legislature leaves its membership open to endless accusations of conflict of interest from some quarters. The fact that it is the practice in Indiana to utilize the background and abilities of its members to the fullest extent leads to many of its members functioning legislatively in the same areas in which they earn their livelihood. As a result of this practice, I have been a member of the committees on Natural Resources in both Houses of the Indiana General Assembly and chairman for three years in the Senate.

The following examples are cited as to the situation on other standing committees in the Indiana Senate:

1. Elementary and Secondary Education Chairman, Sen. John Sinks—High School Counselor.

2. Public Health and Human Services Chairman, V. Richard Miller, President of a family corporation, one of the larger nursing home operators in the state.

3. Insurance and Financial Institutions Chairman, Sen. Richard Worman, Manager of a large insurance agency.

4. Judiciary Chairman, Sen. Leslie Duvall, a practicing attorney.

5. Labor and Pensions Chairman, Sen. Joseph Harrison, an industrialist, also serves as majority floor leader.

6. Higher Education Sen. Roger Jessup, an educator.

7. Roads and Transportation Ranking Majority Member and Acting Chairman, Sen. Elmer Mc Donald, owner of a ready mix concrete company.

8. Our President pro tempore, Sen. Robert Garten, earns his livelihood as a management consultant and convention speaker, and recently was accused of conflicts for doing business with and receiving payment for speeches before groups having business with the General Assembly.

During the last session of the Indiana General Assembly, one of the Indianapolis newspapers charged several legislators with either conflicts or apparent conflicts of interest. I see no possible way, nor do I know anyone who can suggest a way to operate a citizen legislature without possible apparent conflicts. That fact may very well force Indiana into adopting a full time legislature at some time in the near future, regardless of the wishes of the legislature or the citizenry.

Qualified candidates for the General Assembly are becoming more and more difficult to find, because of the hardships of serving and the accusations and abuse directed at its membership.

A SHORT SUMMARY OF THE LENGTHS TO WHICH I HAVE GONE TO AVOID THE POSSIBILITY OF CONFLICTS OF INTEREST OR THE POSSIBLE APPEARANCE OF CONFLICTS OF INTEREST

1. A review of the information submitted will indicate that I belong to no business or professional organizations that might be in a position to be lobbying programs before the General Assembly, even including the Evansville Chamber of Commerce. Many legislators are "joiners" who belong to long lists of such organizations. I chose not to establish such relationships because the possible appearance of conflict did exist.

2. Since I was well known to both mine operators and large coal users in Indiana, I was approached on a number of occasions to intercede either on behalf of an operator or a coal broker with some large uses in an attempt to gain business for the producer or broker. I have been approached to act as an agent or become a broker. I chose not to do this and never so much as placed one call to purchases.

3. Being a working geologist and having been familiar with the provisions of P.L. 95–87 and the regulations published pursuant thereto, I was in an ideal position to assem-

ble a staff representing the various disciplines required to provide a complete consulting service to the industry to handle permitting and contract work under the Act. I was approached by the Indiana Coal Association, at one point, to assemble such an organization to supply those needed services to its membership. Single small operators also made such a suggestion. I was contacted by a consulting laboratory in Evansville, doing various analyses to associate myself with their operation.

I pursued this idea to the point of talking with the association's staff and with the Office of Surface Mining's Region III people, all of whom offered encouragement. My choice not to form such an organization was based upon the fact that this might be perceived by some as a possible conflict of interest.

4. I have, over the years, traded some common stocks, not in large blocks, but in numbers significant to me. I sold the last mining stock that I held in July of 1975 and although I might well have been able to anticipate that market to some degree, I have not been in ownership of any mining stocks since that time.

COMMENTS

During my period of service in the Indiana General Assembly, I have prided myself in being as clear of possible conflicts of interest or appearances of possible conflict as any legislator there.

I have been happy not to have been in the position of some attorney—legislators who must vote on issues of importance to some of their clients or the legislator who is the employee of a company being affected by legislation upon which he or she must vote.

I believed that I was showing equally sound judgment and sensitivity to possible conflicts of interest or appearances of conflicts of interest in my dealings with Peabody and Amax in the land purchases in question.

1. We entered into negotiations in a competitive market, after the availability of the properties was known to many people. In neither case were we informed by the company of that availability, but learned of it either through advertising or secondhand knowledge from other people who knew of its availability.

2. In no case did we ask for or receive special treatment. In the case of the Peabody purchase, paying 22% over the appraisal is not special treatment. In the case of the Amax property, the advancement of the price with each increment of the option and the sizable, forfeitable cash outlay for the option and a possible extension on the option were not special treatment.

3. At no time were we in direct contact with the person or persons who made the decisions as to whether or not to accept our offer. Those decisions were made by someone at corporate headquarters, well up the line from anyone we were talking to.

BACKGROUND AND BASIS OF LONG-TERM BUSSING-HARRIS RELATIONSHIP

I have known W. C. Bussing, Jr. for a period of about 20 years. My first meeting with him occurred when a now deceased former partner of mine, Lloyd Norrick, a geologist, purchased a new home from Bussing Construction Co. Norrick and Bussing became friends and I became acquainted through Mr. Bussing.

Subsequent to that, Mr. Bussing participated with Norrick and I in some exploration projects and purchases of producing oil properties.

After I was defeated in the 1974 election and had sold my telephone interests, I was looking over some real estate investments. Having been away from that type of investment for some time, I contacted Bussing and we discussed the possibility of entering into some joint ventures.

We were two of four shareholders in Temp-Tek Corporation, an insulation manufacturing business, which we closed out. During that period or shortly after, we purchased a tract of speculative river front property on Green River, in Henderson County, Kentucky, which we disposed of in 1980. We acquired the Peabody Properties and then the Amax Properties.

Our association in the ownership of these properties has been on a 50/50 basis, with each of us contributing equal moneys toward the purchases, accepting equal responsibilities for any moneys borrowed and will share equally in any resulting profits.

Mr. Bussing's business interests are confined mainly to real estate investments, real estate development and as a shareholder in a heating and air conditioning company and a sewer contracting company.

Our relationship is both business and social.

FUNCTIONS AND JURISDICTION OF THE NATURAL RESOURCES ADVISORY COMMITTEE

The Natural Resources Advisory Committee of the Indiana General Assembly functions in an "oversight" capacity only to the extent it reviews proposed legislation in the natural resources area, generated either by the department or interested individuals, groups or legislators and, to some degree, keeps abreast of, and reports back to the legislature, concerning various functions of the department. It has no direct role in the day to day operations of the department, it being an arm of a very strong executive department.

FUNCTIONS AND JURISDICTION OF THE NATURAL RESOURCES, ENVIRONMENT AND AGRICULTURE COMMITTEE

This committee is a standing committee of the Indiana Senate, which reviews the bills assigned to it by the President Pro-Tempore of the Senate. The committee holds public hearings, has the ability to offer and adopt or reject proposed amendments and may choose to retain the bill in committee or report it out with either no recommendation or a "do pass" recommendation.

FUNCTIONS AND JURISDICTION OF THE SURFACE MINING STUDY COMMITTEE

This was a joint House-Senate study committee, appointed by the Legislative Council pursuant to the passage of a Senate Concurrent Resolution providing for the appointment of such a committee to study P.L. 95-87 and to prepare legislation to bring Indiana's surface mining laws into compliance with the Federal act. I had sponsored the resolution and was appointed to chair the committee.

The committee was made up of legislators from the coal producing area of Indiana, where possible, and included other legislators, including three attorneys. The legal counsel assigned to the committee was the Governor's son.

A task force made up of committee members, concerned citizens, operator representatives and Department of Natural Resources personnel put together draft legislation for the committee. This was studied and discussed by the committee. Two public hearings were held, one in Terre Haute and one in Evansville. A final draft was approved by the committee for introduction in the 1980 session.

After passage of the bill, it was submitted to the Office of Surface Mining for comment. The committee, during the 1980-81 interim managed the preparation of amendments to satisfy the Office of Surface Mining's comments. Those amendments passed in the 1981 session.

If the U.S. Senate confirms Mr. Harris as director of the Interior Department's Office of Surface Mining, the companies under his jurisdiction will include two big coal producers that in recent years granted him land deals here potentially worth millions of dollars. Moreover, state and local records show that the Evansville, Ind., legislator struck these private deals while he was chairman of committees responsible for strip-mining legislation and enforcement of strip-mining laws.

The statement that the subject land transactions were "potentially worth millions of dollars" is a gross exaggeration, measured by any yardstick and particularly when independent professional appraisals, the recognized method of factual property evaluation are even considered.

Rather than "private deals", all available evidence indicates the Peabody properties were widely advertised for some period before Bussing and Harris even inquired about the properties. Thus their availability was widely known. The article indicates that the price paid was 22 percent over the appraisal.

In the case of the Amax properties, third parties known to and unknown to me have attested to the fact that the property was available to others as much as six months prior to our first meeting with the company's representative after they had decided to dispose of the property.

None of the legislative committees on which I served were in any way responsible for enforcement of strip mining laws.

Since October 1978, county records show, a partnership formed by Mr. Harris acquired at bargain prices nearly 1,500 acres of reclaimed strip-mined land from Peabody Coal Co. and Amax Inc., two of the nation's largest coal producers. The partnership last December paid an Amax unit $250 an acre for most of the land, according to the official state tax stamp on the deed. That was substantially less than one-quarter of what comparable acreage in this rugged southwest corner of Indiana was selling for at the time, based on the county recorder's records and interviews with dozens of local land owners, bankers and real-estate experts.

Comparable acreage sale prices were the basis of both of the independent appraisals and showed that, in acreage blocks of the size acquired, the price paid by the partnership was well in excess of any of the bids received at public auction by Peabody in their attempt to sell very comparable acreage.

Turning a profit

Within two weeks of the December purchases, Mr. Harris and his partner, Evansville developer W. C. Bussing Jr., began turning a handsome profit by selling portions of their newly acquired holdings, frequently for five or six times what they paid for them. So far, the partners have subdivided and sold at least 232 acres with extensive road frontage; a number of buyers confirm they paid $1,500 an acre and higher for the undeveloped homesites.

Profit can only be established when all of the property has been disposed of. Certainly, selected tracts with good road access will move first, but profitability remains a question until the bulk of the property, much of which lacks road frontage and access, is marketed.

In St. Louis, Peabody officials say they sold the property to Mr. Harris and Mr. Bussing for about $70 more per acre than the price established by an outside appraisal in July 1978. Peabody didn't have any immediate comment on the negotiations leading up to the sale or whether company officials in Indiana expressed any doubts about the transaction.

The price paid to Peabody was some 22% above the appraisal set by an independent appraiser and my first contact with them concerning the property came after it had been advertised widely in newspapers of wide circulation. At a public auction held

somewhat later in an effort to sell similar land, none of the bids equalled the appraised price and all bids were rejected.

Mr. Harris's land transactions raise questions about the propriety of a lawmaker's doing business with major strip-mining concerns whose operations are directly affected by his official activities. Last year Mr. Harris was chairman of the state senate's committee on natural resources, environment and agriculture, which has jurisdiction over major legislation involving Indiana's 90-odd strip mines. In 1978 and 1979, the 51-year-old legislator handled the state's Natural Resources Advisory Committee, which was created to oversee the Indiana agency that enforces strip-mining laws.

The legislation drafted by the committee that I chaired attempted to mirror in Indiana law, the 1977 federal Act, and was subject to approval by the Office of Surface Mining, certainly not a situation in which I could have tailored its construction to favor any particular mining interests or the industry in general.

The Natural Resources Advisory Committee of the Indiana General Assembly functions in an "oversight" capacity only to the extent it reviews proposed legislation in the natural resources area, generated either by the department or interested individuals, groups or legislators and, to some degree, keeps abreast of, and reports back to the legislature, concerning various functions of the department. It has no direct role in the day to day operations of the department, it being an arm of a very strong executive department.

Contrary to Indiana law, Mr. Harris in 1979 failed to disclose his involvement in the land-buying partnership when he filed his annual financial-disclosure form required by the state legislature. For 1980, Mr. Harris' Senate financial-disclosure form did list the partnership and described its main area of business as "investments."

The association of Harris and Bussing is one of two people owning land as tennants in common, just as I have owned land with my brother, a former associate of mine in the telephone business and other people. It took on no partnership status at all until in the tax filing process for 1979 taxes, payable in 1980. Mr. Bussing's accountant determined that the simplest method of figuring and reporting would be to make up a partnership return, and supply each of us with a copy to be submitted with our personal returns. At that point, April 15, 1980, a federal identification number was requested for "Harris-Bussing—joint venture." My disclosure statement, required of legislators in Indiana, had been filed earlier in the year, during the session, either in January or February.

This association continues to have no partnership identity other than the I.D. number and a joint bank account.

The average price of $250 an acre for the second purchase "was ridiculously low," contends one real-estate man who has studied the Amax property. He asserts that similar land, "but with no where near the road frontage they bought, was selling for anywhere from $1,000 to $3,000 per acre."

The price paid was the price set by an independent professional appraiser, carrying an MAI designation, the highest professional designation recognized in that profession, based upon as are almost all appraisals on nonincome producing properties, recent sales of comparable properties. The records indicate that subsequent to the submission of that report 240 acres, a much more manageable size tract, adjacent to some of the more desirable land included in that covered by the option, and a portion of which was leveled under Indiana's 1968 Surface Mining Act, was purchased from private ownership by a Mr. Mark Warren for $50,000 or $208.00 per acre.

Much of the comparable land in the county, offered for sale by Peabody, in similar sized tracts, remains unsold after being widely advertised and offered for sale both at private treaty and at auction, for the reason that the prices offered have not met appraisals.

Large portions of both tracts listed in the deeds are reclaimed strip-mined land, marred by the steep, furrowed hills and scraggly vegetation characteristic of so much land around here. But other areas apparently haven't been stripped at all, and a good part of the property is suitable for immediate construction of homes.

All of the "reclamation" referred to that has been accomplished on the first 1030 acre purchase was done in accordance with Indiana's 1941 Reclamation Act, which required only the planting of evergreens on spoil banks. True, some of the land, probably about 15 percent is undisturbed and occurs in small, irregular tracts. Contrary to what the article says, very few lots and certainly not "a good part of the property is suitable for immediate construction of homes." (Reference aerial photograph submitted to committee staff.) This statement would lead to a serious question as to whether or not Mr. Pasztor, indeed, ever saw the property, a good portion of which is inaccessible, even to a four wheel drive vehicle.

Indeed, the low prices paid by the Harris partnership for such land haven't escaped the notice of some local business people. One local banker fumes that "$250 an acre is a very, very low price. It's almost unheard of these days."

If the local banker quoted has any knowledge of land transactions in his county, he should know of the land transactions cited and the unsold, comparable properties in his county available to any qualified buyer.

Another businessman, who has received $15,000 for three-acre lots not far from the land Mr. Harris is selling, says only reclaimed land that is entirely unsuitable for building sells for under $750 or $1,000 an acre anywhere in Warrick County. "I made an offer to buy some of the land at that low price, but Amax didn't want to discuss it further," he recalls. (Much of the partnership's land is assessed at $63 an acre or less, according to county records, but local real-estate people say the assessed value of such land has little relation to market value.)

The man quoted speaks of buying "some of the land at that low price." It is obviously the marketing technique of both Amax and Peabody to move the property in large tracts. But even in smaller tracts, land better located and with a larger proportion of road frontage was sold by Amax to Dr. Thomas Hamilton for $350.00 per acre, in December 1980.

The sales price by Meadowlark Farms to the partnership contrasts with the Amax unit's purchase last summer of more than 600 acres of reclaimed and unmined land in the county from Aluminum Corp. of America. The average price for that transaction, according to state tax records, amounted to approximately $2,200 an acre.

My conversation with Alcoa officials indicate that the property conveyed from Alcoa to Amax was undisturbed land, in fact, some of the premium agricultural land in the county, certainly is in no way comparable to the subject land.

Mr. Harris says he made a "fair" profit for selling some of the land that he purchased from Amax, considering that he and his partner didn't put in sewers, roads or other costly improvements before they sold it. He asserts that hundreds of additional acres held by Amax are still on the market in the area for the same $250 per acre.

My statement to Mr. Pasztor was that Peabody, not Amax had several hundred acres of land available for purchase in the same price range as the subject properties.

In addition, the legislator says he "fully informed the White House" and congressional staffers about the transactions two months before his prospective selection was announced. "I have acted in good faith," he says. Mr. Harris adds that he didn't disclose his involvement in the partnership in 1979 because he understood it wasn't required

I attempted to explain the non-existence of the partnership, until April 15, 1980, to Mr. Pasztor along with attempting to give him factual information or sources of factual information concerning several of his allegations, but it became obvious to me that he had his column written and was not interested in the facts in the case, but apparently interested only in contacting me to get a couple of answers to "when did you stop beating your wife" types of questions.

Both Amax and Peabody have been involved in disputes from time to time that resulted in state actions. But there isn't any evidence that the companies have received political favors from Mr. Harris.

The journalist waits until near the end of the story, on an inside page to note that although both Peabody and Amax were involved in actions at the state level, "there isn't any evidence that the companies have received political favors from Mr. Harris.'"

Mr. Harris's nomination capped years of efforts to build a solid political base in this area, according to both friends and foes. After a stint on the local school board, the trim, gregarious geologist served two years in the Indiana house of representatives before winning a state-senate seat in 1975. His colleagues in 1977 named him one of the five outstanding freshman senators. Last year, Mr. Harris was reelected to the senate as the only Republican member from the Democratic predominantly Democratic coal-mining area of southern Indiana.

In 1977, a vote of the Senate was taken for the award of "Outstanding Freshman Senator" from each party. A tie vote occurred between me and Senator John Guy, who had previously served as Majority Floor Leader in the Indiana House and has since served as Majority Floor Leader in the Senate. One award was given to the person chosen as the outstanding Democrat. Thus, three awards were given, not five as stated in the article. Prior to the last election Harris was the only Republican Senator from Indiana's coal mining area, there are now three.

In his home state, Mr. Harris is widely regarded as one of the most outspoken opponents of current federal strip-mining enforcement programs. Mr. Harris, among other things, played a major role in persuading state officials to spend the past few years in court attacking the constitutionality of some federal mining regulations. Two months ago, in the latest round of legal skirmishes, the state filed still another action in a federal court in Indianapolis against the Interior Department and the surface-mining office. Two Amax units and Peabody Coal filed a companion suit at the same time also attacking the validity of the federal rules.

My role in Indiana's suit was that of introducing a committee resolution memorializing the Governor and the Attorney General to consider testing the land use planning authority taken by the Federal government by the passage of Public Law 95–87, i.e. the provisions for declaring lands unsuitable and the prime farmlands provisions. I was never a party to any court action taken by the state. The action which I suggested was not against the regulations, but against the Act.

As chairman of the natural-resources committee, Mr. Harris shepherded through the Indiana legislature a 1980 strip-mining bill that denounced federal strip-mining initia-

tives as "an intrusion into the land-use and planning control" that should rest with the state. The legislature's "overriding consideration," the bill said, should be to "prevent further federal encroachment" in this area.

The language referred to here that was made a part of both surface mining bills which I authored (1980 and 1981), was supplied by Ice, Miller, Dinadio and Ryan, an Indianapolis law firm and the Attorney General, and it was made clear to me that the language had to be included as a preamble to any legislation introduced to comply with P.L. 95-87. The language was tailored in such a manner as to prevent any legislation passed subject to the filing of the federal suit from interfering with that suit. Had that language not been included, a veto by the Governor would have been a certainty. Without those two bills Indiana would now be two years behind in its progress toward adopting the program.

March 19, 1981 Wall Street Journal article:

"WASHINGTON—President Reagan's choice to be chief enforcer of strip-mining laws holds an option to buy an additional 1,030 acres of reclaimed land from Amax Inc., the coal producer that sold him a similar chunk of property last December at bargain prices."

Mr. Pasztor continues to use subjective terms such as "bargain prices." The reader's perception of "bargain prices" is probably that of the prices being something less than the established prices for something of equal value, when in fact the Peabody purchase was negotiated at a figure that, according to the first Wall Street Journal article, was "about $70 more per acre than the price established by an outside appraiser in July 1978." At $390 per acre that calculates out to be about 22% over the appraisal. The Amax purchase was negotiated at the appraised price for the first tract and graduated upward to $275.00 per acre if the option is exercised within twelve months and $290.00 per acre if the term of the option is extended to 18 months. A cash payment of $25,000 was required to secure the first option and another $25,000 is required if the option is to be extended to 18 months. Both of these sums are subject to forfeit, if the option is not exercised.

In an interview, James Harris confirmed that a partnership he formed was granted the option when it bought more than 1,000 acres of reclaimed strip-mined land in southwestern Indiana. The Indiana State Senator said a roughly $400-an-acre maximum price was set on the land under option but that the partnership hasn't acquired any of the property.

The "interview" referred to in the case of both calls that I received from Mr. Pasztor consisted of a short series of assertions and questions which I attempted to reply to as accurately as I possibly could, not having been given any chance to check documents, or, even in some cases, to finish my statements before he either countered them with hearsay or cut me off completely.

I believe the approximate figure I gave him as a maximum was $300 rather than the $400 stated, reflecting the $290 figure that is arrived at with the maximum of the option.

Moreover, Mr. Harris conceded that the contract with the coal company was structured so that profit from the first sale could be used to exercise the option on the second tract.

The writer chose the word conceded, which is commonly used to mean made a concession or acknowledged grudging or hesitantly. My memory of the conversation is that I attempted to explain the purchase plus option arrangement, which is a common real estate practice. I certainly made no statement indicating that "profit" from the first sale would be adequate to exercise the option on the second tract.

Meanwhile, a former Amax official, who negotiated the 1980 transactions, yesterday asserted that the company never had placed any of the property on the open market. He said Amax had decided "nearly three years earlier that Dick Harris could have all of the land" if he met what the company considered a fair price.

Gibson Martin, who was Amax's chief real estate official in southern Indiana, said in an interview that the coal industry therefore never actively sought out nor considered offers for the land. Mr. Martin left the company around the beginning of this year.

Private communication from Mr. Martin to me, which I will attempt to furnish to the committee staff, indicates that what Mr. Martin said to Mr. Pasztor or intended to imply to him was not entirely as reported. His "interview" was apparently similar to the "interviews" Mr. Pasztor conducted with me.

Certainly, the records of Amax and the communications from third parties having knowledge of the company's efforts to market the properties do not support the content of these claims.

As previously reported, land records and interviews with local real estate agents and residents show that comparable land in Warrick County is selling for at least $1,500 an acre.

Any serious review of this paragraph against facts about actual sales of comparable land will prove the claim to be completely erroneous.

As reported earlier, the partnership paid Amax $250 an acre for the first tract. Within two weeks, the partners started selling lots for homes at five or six times that price.

The best of the property began to sell first, as could be expected and a few lots moved at the multiples stated.

Mr. Martin said Amax's attorneys and its top management never informed him of any potential conflicts from doing business with a state legislator. When Mr. Harris negotiated the sale, he was chairman of two legislative committees responsible for drafting new strip-mining laws and monitoring strip-mining throughout Indiana.

One of the committees was charged with drafting the legislation, the other is a standing committee which held hearings on the bill before it was reported out to the Senate floor. Of course the bill had to pass the Senate, the House and be signed by the Governor before becoming law. Neither of these committees have any authority in monitoring surface mining throughout the state, as claimed in the Wall Street Journal article. That is purely a function of the mining and reclamation division of the Department of Natural Resources, an executive function.

The former Amax official, however, reiterated the mining company's contentions that it sold the property for more than its fair market value as determined by an independent appraiser. Mr. Martin recalled that he told Mr. Harris three years ago: "I will let you have the first shot at buying the land—but only at my price."

I do not remember a commitment for a "first shot," but I would not see that as out of the ordinary, if I were the first person to approach them on the property, and "their price" is what we paid, both to Amax and Peabody.

Mr. Harris, however, denied that version of the transaction. He asserted that he didn't receive a commitment from Amax to sell the property to the partnership until last summer and that he understood the company had made efforts to solicit other buyers for the land.

I do not remember having denied, outright, anything that Mr. Martin said, but I did state that I did not remember any commitment to sell the property to me, because there was none and Mr. Martin did not say that there was one. The records indicate that a great deal of effort was expended to find a buyer before I learned that the property was, in fact, available for sale.

The partnership's profit from the transactions "probably won't approach a million dollars," Mr. Harris said. He indicated that he and his partner hope to exercise the option despite his expected nomination to head the Interior Department's Office of Surface Mining.

When Mr. Pasztor called the day after his first article appeared, I protested the obvious inaccuracies of his previous article. When he asked for examples of the inaccuracies, I said something to the fact that there was no way that our profits could approach the millions of dollars of potential that he had stated. He obviously went from that to "won't approach a million dollars," which of course is a shading of the conversation that it could still be some very large figure.

Mr. McCLURE. Mr. President, Mr. Harris then responded to specific questions by Senator JACKSON and myself in which he denied, again under oath, any wrongdoing. I ask unanimous consent to have the testimony printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

* * * * *

Senator McCLURE. You've given your personal explanation of the allegation regarding purchases of property from Peabody Coal Company and Amax Coal Company. At this point I'd like to ask you to state on the record under oath the answers to the following questions.

Did you at any time during your service as a legislator in the State of Indiana receive any favorable treatment with regard to the purchase of property from either Peabody Coal Company or Amax Coal Company due to your position in the legislature?

Mr. HARRIS. No, Mr. Chairman.

Senator McCLURE. Did you ever ask for or imply that you expected favorable treatment from any employee from either Peabody Coal Company or Amax Coal Company or any other person regarding the respective land transactions in exchange for services you might provide as a legislator?

Mr. HARRIS. No, Mr. Chairman. In fact I would say that with the relationship I've had with these companies, they would not ask me for anything in addition to my representation in my district and I would certainly not ask them for any favors.

Senator McCLURE. Did any employee of either Peabody Coal Company or Amax Coal Company or any other person ever offer or imply that you could obtain land that was for sale by the respective companies for a price less than what would result from arms length negotiation in exchange for services you might provide as a State legislator?

Mr. HARRIS. No.

Senator McCLURE. Did the purchase of land by yourself and Mr. Bussing from Peabody Coal Company in 1978 and from Amax Coal Company in 1980 have any influence whatsoever on your duties as an Indiana State Senator?

Mr. HARRIS. No, Mr. Chairman.

Senator McCLURE. Thank you very much, Mr. Harris.

Senator Jackson?

Senator JACKSON. Thank you, Mr. Chairman.

In the past, I think you were a party to the suit in attempt to declare the Surface Mining Act unconstitutional. In view of that participation, do you feel that you can nevertheless vigorously enforce the Federal laws?

Mr. HARRIS. Senator Jackson, I'd like to explain——

Senator JACKSON. I beg your pardon. I guess you were not a party, but you supported the legal effort to have it declared unconstitutional.

Mr. HARRIS. My part in that was as an author of a committee resolution memorializing the Governor and Attorney General to file suit in federal court questioning the constitutionality of two sections of the Act. One having to do with lands unsuitable and the other having to do with prime farmland. I as a State legislator and many of my fellow State Legislators felt that this was a federal intrusion into an area that had previously been under the purview of the States. Namely that of land use planning. And I think that I certainly was not the only one who held that sort or a view. Similar actions were filed in Virginia; other States joined these States in the suit. And I think we as State legislators are somewhat jealous of what we feel up to this time had been the rights of the States. That was my role.

The Supreme Court made a decision recently that those portions of the Act are constitutional, and so far as I am concerned that is now the law of the land and I can go ahead and enforce that law.

Senator JACKSON. And conscientiously support it in view of the Court's decision?

Mr. HARRIS. Yes, sir.

* * * * *

Senator JACKSON. I want to say that the nominee in my view, reviewing the record, has responded quite effectively to the allegations made against him. And I think he is to be commended at this point for giving those responses under oath. The witnesses that will follow will shed further light on that.

I really want to say that's why I'm not asking him any questions about the articles in the Wall Street Journal, because the questions have been put to him and he has responded, in my judgement, in a very forthright and commendable way.

Senator MCCLURE. Thank you, Senator Jackson.

* * * * *

Senator JACKSON. I just have one question, Mr. Harris.

What will the Bussing-Harris joint venture do in the future?

Mr. HARRIS. I have written a letter to Mr. Bussing some time ago saying that it will be signatory only. I have submitted a recusal statement that says I will not handle any decisions directly affecting Amax Coal Company until such time as the existing option on the additional Amax lands has either expired or is exercised, and there will be no additional purchases during my tenure here from any coal company regardless of the situation.

Senator JACKSON. Other than the existing option to purchase I think 1,000 acres from Amax, that is still pending?

Mr. HARRIS. Yes.

Senator JACKSON. But that is a part of the original transaction?

Mr. HARRIS. Yes.

Senator JACKSON. Which you entered into prior to your nomination.

Mr. HARRIS. Yes sir.

Senator JACKSON. You're not going to do any more such arrangements with Bussing as it relates to any of the activities of your office?

Mr. HARRIS. No sir. After my experience over the past four months, you can be assured I won't.

Senator JACKSON. You've been a good witness.

Senator MCCLURE. Thank you very much, Mr. Harris. We appreciate your attention to details and the cooperation that we have received over the last several weeks in preparing for this hearing. (Hearing transcript pp. 33–35, 39, 80–81.)

Mr. MCCLURE. Mr. President, Mr. W. C. Bussing, Mr. Harris' business partner in the land transactions, was called to describe the nature of their relationship and to discuss the events leading up to the property purchases. Following is his statement and his responses to committee questions, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF W. C. BUSSING, JR.

In the early 1960's I became acquainted with Mr. Harris. At that time he was a practicing geologist with Norrick and Harris. I had built a house for Mr. Norrick in Evansville. Subsequently, I entered into several oil deals with the Norrick and Harris Company. Later Mr. Harris left the oil business to pursue other interests, and we remained friends through the years. I continued to develop land and buy and sell real estate.

In 1972 I purchased 120 acres of strip mine ground from an individual for $20,000.00. By coincidence this ground adjoined one of the three parcels or real estate that was later purchased in 1978 by Bussing and Harris from Peabody Coal. I sold off the 120 acres from 1972 to 1978 in smaller parcels and realized approximately $95,000.00. I often discussed with Mr. Harris the potential profit in subdividing strip mine ground, and we both looked for any available.

In the summer of 1977 Mr. Harris and I, along with two partners, started a cellulose insulation manufacturing company. We later closed the company in 1980. At this point in time we were actively working together, running a business and looking for owner ventures. On September 9, 1977, Mr. Harris and I purchased ten acres of ground on the Green River in Spottsville, Kentucky, for $25,000.00. On August 26, 1980, we sold it for $125,000.00.

During the summer of 1978 Peabody Coal Company advertised in the local newspapers that they had 441 acres in three parcels for sale. Since I had previously owned 120 acres which adjoined one of the parcels, I was very familiar with the potential. We contacted Peabody Coal and started negotiations. On September 19, 1978, we signed a contract to purchase the 411 acres for $175,000.00. We immediately started subdividing the ground, and selling in small parcels. Mr. Harris and I each invested $25,000.00 and borrowed $125,000.00 on a first mortgage. On August 27, 1980, the mortgage was paid off from proceeds from the sale of the ground.

During the time we were selling the Peabody ground, I was contacted by various people regarding the 2600 acres Amax had for sale. Some of the people who contacted me were looking for partners to joint venture the Amax purchase. Mr. Harris and I discussed the Amax ground but decided we were not interested until we could retire our mortgage on the Peabody ground and generate some cash.

On August 1, 1980, we received a $5,000.00 deposit on the purchase of our Spottsville ground, which was to be sold for $125,000.00 within 30 days. At the same time we had enough commitment for sales on our Peabody ground to pay off the $125,000.00 mortgage. It was paid off August 27, 1980.

Immediately after receiving the $5,000.00 Spottsville deposit and knowing we were going to be able to pay off the Peabody mortgage, we then decided to explore the Amax ground. On August 14, 1980, we met with Don McCullum of Amax Coal Company. At this meeting we made an offer which was later accepted. On September 12, 1980, we made a $5,000.00 deposit and signed an agreement. The ground was deeded on December 4, 1980.

Our next witness is Mr. W. C. Bussing, Jr., of Evansville, Indiana.

Mr. Bussing, would you please raise your right hand.

Do you solemnly swear that the testimony you are about to give before the Energy and Natural Resources Committee of the Senate will be the truth, the whole truth and nothing but the truth so help you God?

Mr. BUSSING. I do.

* * * * *

Mr. Bussing, did you have any prior knowledge of the availability of the land offered for sale by Peabody Coal Company in 1978 that you and Mr. Harris purchased prior to the advertisements of the local newspapers?

Mr. BUSSING. That was the first time I knew about it.

Senator MCCLURE. Did Mr. Harris have any prior knowledge of the availability of the land before the advertisements?

Mr. BUSSING. No.

Senator MCCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris or you which could be construed as an expression or implied promise or request to give Mr. Harris or you preferential treatment on land for sale by Peabody in exchange for or in expectation of special consideration by Mr. Harris in the course of his legislative duties in the Indiana State Legislature?

Mr. BUSSING. No, sir.

Senator MCCLURE. When and how did you first become aware of the availability for potential purchase of the Amax property?

Mr. BUSSING. My first recollection that I knew about it was when I was in the Warwick County Planning Commission and the Plan Director told me about it, and I think that was back in about the last part of 1978.

Senator MCCLURE. The name of that Planning Director?

Mr. BUSSING. Phillip Barnhill.

Senator MCCLURE. Did you relate that information to Dick Harris?

Mr. BUSSING. Senator, it's been so long ago I don't know. I probably did discuss it with him but I can't remember a specific time.

Senator MCCLURE. That would have come from the information that you got from the discussion with Phillip Barnhill?

Mr. BUSSING. Yes, that was my first knowledge of it.

Senator MCCLURE. Did you personally have any communication with Amax regarding the purchase of land between late 1978 and the time you entered into negotiations in August of 1980?

Mr. BUSSING. No.

Senator MCCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris or you which could be construed as an express or implied promise or request to give Mr. Harris or you preferential treatment on land for sale by Amax?

Mr. BUSSING. No, sir.

Senator MCCLURE. Is there any written partnership between yourself and Mr. Harris?

Mr. BUSSING. No Sir.

Senator MCCLURE. Which of you is responsible for keeping the financial records of your business transaction?

Mr. BUSSING. We keep those at my office.

Senator MCCLURE. Do you have an accountant?

Mr. BUSSING. Yes.

Senator MCCLURE. The name?

Mr. BUSSING. George S. Olive Company.

Senator MCCLURE. Did they advise you to

file a partnership return for 1979 with respect to these lands?

Mr. BUSSING. I didn't bring those records with me but they have always taken care of the books and I do whatever they say. It was either in '79 or '80 they said to get a partnership agreement.

Senator MCCLURE. Other than that partnership filing——

Mr. BUSSING. I'm sorry. Not a partnership agreement. To get a tax number. I'm sorry.

Senator MCCLURE. Other than that tax purpose, that filing of the tax return, you and Mr. Harris have no formal identification as a partnership?

Mr. BUSSING. No.

Senator MCCLURE. Thank you very much, Mr. Bussing. I appreciate your testimony, and the written statement that is in the record.

Thank you very much.

Senator DOMENICI. I have no questions.

Senator JACKSON. I have no questions.

Senator MCCLURE. Thank you. (Hearing Transcript pp. 81, 83–86)

Mr. McCLURE. Mr. President, William V. Hartman and John M. Bagby, both of Peabody Coal Co., were then called to provide the committee with a synopsis of the events involved in the sale of approximately 441 acres to Mr. Harris in 1978. The Peabody statement follows, along with Mr. Hartman's answers to any questions, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY WILLIAM V. HARTMAN

Mr. Chairman, Members of the Committee: My name is William V. Hartman. I am an Executive Vice President of Peabody Coal Company with responsibility for land acquisitions and dispositions, along with other responsibilities. With me today is Mr. John M. Bagby, Administrative Director—Land, for Peabody Coal Company. We appear today to provide the Committee with a full chronology of events involved in the sale by Peabody of certain properties in Warrick County, Indiana, known as the Victoria properties. In a sale concluded in October of 1978, these properties were conveyed to a partnership consisting of Mr. W. C. Bussing, Jr., and Mr. James R. Harris, whose nomination for the position of Director of the Office of Surface Mining is pending before this Committee.

The following series of events led to the sale of these lands to Mr. Harris and Mr. Bussing:

In January 1978, the President of Peabody appointed a Task Force to evaluate both mined-out lands and mineral properties which were surplus to the needs of the Company and to recommend which properties should be sold and to establish procedures for such sales. After careful study by the Task Force, certain parcels of lands were recommended for sale by management to the Board of Directors at a meeting held on April 24, 1978. At this meeting, the Board authorized the sale of 18 different groups of properties in 8 states, some of which included coal reserves, at not less than fair market value. The Victoria lands were not included among these properties.

As a result of further work by the Task Force, management recommended to the Board of Directors at a meeting held on June 21, 1978, that an additional 19 areas in 9 states be approved for disposition, which recommendation was approved by the Board of Directors. Included were 441 acres in 3 separate parcels at Peabody's old Victoria Mine in Warrick County, Indiana, which were estimated to have a fair market value of $150,000.

In accordance with its usual practice, Peabody engaged an independent appraisal company on May 8, 1978 to appraise the Victoria lands. In a report dated July 10, 1978, the John M. Smith Appraisal Company of Paducah, Kentucky, submitted a detailed report showing the fair market value of the three tracts of Victoria lands to be $144,100. These three tracts are not contiguous, and included a total of 145 acres of mined lands, 274 acres of wooded lands, 17 acres of lakes and 5 acres of crop lands. A copy of this appraisal report has been previously provided to the Committee.

Again, according to established procedures, Peabody placed an advertisement in the local newspaper, The Evansville Sunday Courier and Press, on July 23, 1978. The advertisement included both the Victoria properties and the Tecumseh properties (also located in Warrick and consisting of 2,784 acres). The advertisement did not include an asking price and did not identify Peabody as the owner.

As a result of the advertisement, about 25 persons called Mr. Berger about the two properties. Most persons wanted much smaller tracks, or lost interest when the asking price was given. To those 8 persons expressing an interest in the Victoria properties, a four-page brochure was provided which included the asking price of $200,000. We have previously furnished the Committee with a copy of this brochure as well as a copy of the advertisement.

On or about July 31, 1978, Mr. Galen Barclay, Peabody's Director of Land and Reserve Development of our Indiana Division located in Evansville, Indiana, received a telephone call from Mr. James R. Harris. Mr. Harris stated that he had seen the advertisement in the Evansville newspaper, and he requested more information on the Victoria property. Mr. Harris and Mr. Barclay have been acquainted for a long period of time, and this probably explains why Mr. Harris called Mr. Barclay rather than Mr. Berger. Mr. Harris would have known that Peabody was the owner of the lands because he would have recognized the names Tecumseh and Victoria as well as Mr. Berger's name.

On the same day, July 31, 1978, Mr. Harris and Mr. Bussing came to Peabody's Indiana Division office in Evansville and met with Mr. Barclay. At that time, Mr. Barclay gave them a copy of the four-page brochure relating to the Victoria properties, along with a copy of Peabody's form entitled "Offer to Buy Real Estate". Nearly a month later on August 26, 1978, Mr. Barclay received by mail the "Offer to Buy Real Estate" form signed by James R. Harris offering $135,000 in cash for the Victoria properties.

Following receipt of this offer, Mr. Barclay consulted Mr. James E. Schoenberger in the St. Louis office who was acting as project manager for the Task Force. Mr. Schoenberger worked under my supervision at that time. After consulting with me, Mr. Schoenberger instructed Mr. Barclay to reject the offer for $135,000 and to endeavor to obtain at least $175,000. Following receipt of this advice, Mr. Barclay telephoned both Mr. Harris and Mr. Bussing and informed them that the offer of $135,000 had been rejected and reiterated his view that the property was worth $200,000. Mr. Harris and Mr. Bussing each told Mr. Barclay in separate telephone conversations that they would be willing to pay $150,000. This offer was not accepted by Mr. Barclay.

On about September 5, 1978, Mr. Barclay met again with Mr. Harris and Mr. Bussing, and after a lengthy discussion, Mr. Barclay offered to split the difference between $150,000 and $200,000, or $175,000 in cash. Mr. Harris and Mr. Bussing made a counter offer of $135,000 in cash and a note for $40,000. Mr. Barclay rejected this counter offer. On September 19, 1978, Mr. Barclay again met with Mr. Harris and Mr. Bussing, and at this time Peabody's standard form of "Contract for Sale of Real Estate" was signed by Mr. Harris and Mr. Bussing providing for a cash purchase price of $175,000, payable in the form of earnest money of $17,500 with the contract and the balance of $157,500 payable on the closing date. This contract was accepted in St. Louis by Peabody on September 25, 1978 and was executed by James F. Hobbs, a Vice President of Peabody, who works under my supervision.

The contract was prepared by J. M. Touhill, an attorney in Peabody's Legal Department in St. Louis and a member of the Task Force. Along with the executed Contract for Sale of Real Estate, Mr. Bussing and Mr. Harris each submitted checks in the amount of $8,750 payable to Peabody Coal Company which were sent to Peabody's Treasury Department on September 21, 1978. Mr. Barclay delivered abstracts of title to the Victoria properties to Mr. Bussing on September 20, 1978, and on September 30, 1978, Mr. Barclay mailed a fully executed copy of the Contract for Sale of Real Estate to Mr. Harris and Mr. Bussing.

The sale of these three tracts of land was closed at Old National Bank in Evansville on October 23, 1978. At that time, Mr. Barclay delivered Peabody's Corporate Special Warranty Deed, which had been prepared by J. M. Touhill, to Messrs. Harris and Bussing, at which time Mr. Barclay received a cashier's check from Old National Bank payable to Peabody Coal Company in the amount of $157,500. On November 2, 1978, Mr. Barclay mailed a Peabody check payable to Mr. Harris and Mr. Bussing for $817.02 to reimburse Messrs. Harris and Bussing for Peabody's share of the 1978 real estate taxes which would be paid by Messrs. Harris and Bussing in 1979.

Peabody received no other offers for the Victoria properties.

Mr. Chairman and Members of the Committee, I wish to emphasize that the disposition of those properties to Mr. Harris and Mr. Bussing was made in the usual course of business as a part of an overall property disposal program during which Peabody disposed of many parcels of both mined-out lands and coal reserve properties. This program, which has now been substantially completed, resulted in the sale of surplus properties in nearly every state in which Peabody transacts business and produced millions of dollars of revenue to Peabody.

The circumstances of the sale to Mr. Harris and Mr. Bussing were typical of those involved in many other sales conducted during the last several years. Peabody had formulated a well-defined program to identify surplus properties and had adopted elaborate procedures which involved persons from various departments throughout the Company to make certain that the prices received were the highest attainable.

It was standard procedure for Peabody to obtain an independent appraisal for all property sales of this type. This was done for a number of reasons, including compliance with Peabody's loan agreements. The properties sold to Mr. Harris and Mr. Bussing were sold for a price that exceeded the appraised value by some 21 percent. The sale price of $175,000 exceeded not only the appraised value of the property—$144,100—but also the minimum acceptable price of $150,000 established by the Board of Directors. This transaction was completed by Peabody as a routine transaction. The persons making the decisions on this matter in St. Louis were not acquainted with either Mr. Harris or Mr. Bussing.

As has been previously mentioned, the Committee has previously been provided with

copies of the independent appraisal, the advertisement, the property description, and the brochure concerning the sale of the Victoria properties. We will be glad to provide the Committee with copies of the various other documents referred to above. Mr. Bagby and I would be happy to try to answer any questions you may have concerning this transaction.

• • • • •

Senator McCLURE. Mr. Hartman, you are the Peabody official that had final approval authority over the terms of the sale of the land sold to Mr. Harris and Mr. Bussing?

Mr. HARTMAN. Yes. When you say terms, that is the price.

Senator McCLURE. Were you responsible for rejecting the initial offer by Harris and Bussing of $135,000?

Mr. HARTMAN. Yes, sir, because that was less than the appraised value and less than the value approved by the Board of Directors of our company which authorized me to sell the property.

Senator McCLURE. At either the time you rejected the initial offer or at the time the final terms of sale were approved, did you have any knowledge that Mr. Harris was an Indiana State Senator?

Mr. HARTMAN. In the proposal he sent in as a response to the newspaper ad, the letter that was sent in to me and the communique from the division, from the people responsible which included his bid on the property, indicated that he was a Senator.

Senator McCLURE. Did you have any knowledge of his area of responsibility within the State Senate?

Mr. HARTMAN. No, sir.

Senator McCLURE. Did the fact that he was a State Senator have anything to do with your acceptance or rejection of the bid or of the terms and conditions of the sale?

Mr. HARTMAN. No, sir.

Senator McCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris which could be construed as an express or promise or request to give Mr. Harris preferential treatment on land for sale by Peabody?

Mr. HARTMAN. No, sir.

Senator JACKSON. No questions.

Mr. McCLURE. Mr. President, a panel was then called to describe Mr. Harris' dealings with AMAX Coal Co. Included from AMAX were Lee Nickerson, Don McCollum, and J. Nat Noland. Also participating were Gibson Martin, a former AMAX official ostensibly quoted in the Journal articles, and George Davidson, the appraiser retained by the coal company to assess the land subsequently purchased by Mr. Harris and Mr. Bussing A copy of the AMAX statement follows as well as the testimony of Mr Martin and answers to committee questions.

I ask unanimous consent to have this material printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMAX COAL CO.'S SUMMARY STATEMENT OF FACTS PERTAINING TO SALE OF WARRICK COUNTY, INDIANA, LANDS TO MESSRS. JAMES R. HARRIS AND W. C. BUSSING

1. The AMAX Coal Company's policies and procedures governing the sale of exhausted lands.—The basic policy governing the disposal of a company asset for AMAX Inc. is standard procedure No. V, effective July 1, 1978, entitled "Asset Disposal Approval Requests (ADARS)." A summary of the procedure follows:

(1) Definition—An ADAR is a proposal, submitted in prescribed form to the appropriate level of management, for approval to transfer, sell or scrap a capital asset.

Authorization by the appropriate level of management (see below) signifies acceptance and approval of the recommendation and constitutes the authority to dispose of the asset as proposed.

(2) Scope—This procedure applies to all capital assets of the company.

An ADAR must be prepared for all assets to be transferred or otherwise disposed of with a net book value in excess of $10,000.

(3) Authority to Approve Requests—Net asset value, approval required.

Under $150,000—Division procedures except that assets over $25,000 approved by Division President and Group Executive.

$150,000–$499,999—Above, plus AMAX Inc. Controller, Chief Financial Officer and one member of Executive office.

Over $500,000—Above, plus Executive Committee or the Board.

The Warrick County lands were sold pursuant to the foregoing procedure.

2. The events preceding the sale of the Warrick County Lands.—The company's Real Estate Department initiated a study in September 1978 to determine whether the Warrick County lands should be retained or disposed of as exhausted mining lands. In the course of the study Mr. Don McCollum of our Real Estate Department contacted in-house personnel and outside individuals, including the Executive Director of the Warrick County Area Planning Commission to discuss present and future plans for Warrick County which might be pertinent to the purposes of the study.

The Executive Director was informed that the company was contemplating the possible disposition of the Warrick County exhausted lands, and asked to inform the company of the names of persons who might be interested if the lands were put on the market.

In the Fall of 1978, Mr. Harris spoke with J. Nat Noland, the company's State Relations counsel for Indiana. Mr. Harris expressed an interest in purchasing company real estate rumored to be for sale in Warrick County. Mr. Noland advised Mr. Harris that the purchasing of real estate is handled by the Real Estate Department.

Noland advised Mr. Martin of the Real Estate Department of his conversation with Mr. Harris, and asked that Mr. Martin meet with Mr. Harris. In November 1978 Mr. Martin, pursuant to Mr. Harris' request, mailed him a plat map of the Warrick County lands which the Real Estate Department was investigating for possible disposition.

In December 1978 the Real Estate Department study of the Warrick County lands was completed. The study recommended sale of the Warrick County lands at not less than $330 an acre. An ADAR was prepared on that basis. But the recommendation was not accepted because the company's Vice President of Engineering questioned the $330 per acre price as being too low.

As a result of that question, the company in April 1979 retained an independent appraiser, George Davidson, to evaluate the fair market value of the Warrick County lands. Mr. Davidson is a widely known reputable real estate appraiser, and a Member of the American Institute of Appraisers, the highest designation an appraiser can receive. He reported in August 1979 his opinion that the market value of the Warrick County lands, sold as a block, was $250 per acre.

The company desired to dispose of the Warrick County lands as one block, and on a cash basis, if possible. That method of sale would: (1) avoid the company's being left with unsellable lands after sale of choicer parcels; (2) avoid imposing the burden of parcel sales on the company's real estate personnel already engaged in matters more important to the company's main operations; (3) keep the company out of land development operations which are not its business; (4) avoid the company's becoming engaged in the long term financing of real estate; and (5) avoid prejudice to the company's community relations.

Pursuant to the appraisal by George Davidson, an ADAR (No. 79–64) was prepared. The ADAR requested approval to sell the Warrick County lands for not less than an average of $250 per acre. The ADAR was approved by the company's Vice President and Controller, the Senior Vice President for Operations, the Executive Vice President, and by the Corporate Vice President, the Corporate Controller, the Corporate Senior Vice President, and the Corporate President.

Starting in November of 1979 and continuing until the sale of the Warrick County lands to Messrs. Harris and Bussing in September 1980, the company's Real Estate Department actively sought to sell the Warrick County lands at not less than $250 an acre.

Its first effort was to sell the lands to a select group of prospects, mainly investment and brokerage firms. Several dozen promotional flyers were sent to such firms, local and national. No response was received. The Real Estate Department then sought to sell the lands as having a potential for a major industrial development.

A second flyer was sent out to dozens of companies who might be interested in utilizing the land for industrial development, and the Indiana State Department of Commerce was advised of the availability of the Warrick County lands. As a result of these efforts, one inquiry was received. Mr. Pfister, owner of Pfister Company, Inc., verbally requested an aerial photo. This was forwarded to him, and nothing further was heard from him.

The Real Estate Department then turned to an effort to sell the land to national and local persons and companies engaged in speculation and dealing in large blocks of land. A third flyer was sent to such persons. Several real estate brokers were contacted, who in turn sought out potential buyers of the Warrick County lands.

In July 1980 Mr. McCollum upon the instruction of Mr. Martin, the Director of the company's Real Estate Department, called Mr. Harris to see if Mr. Harris might want to buy the Warrick County lands on a cash basis. Mr. McCo'lum met with Mr. Harris on July 30, 1980. The possibility of Mr. Harris's acquiring the Warrick County lands was discussed; but no agreement could be reached on price or terms because Mr. Harris's proposals as to purchase fell short of the authority granted under ADAR 79–64. Mr. Harris's highest price proposal was $225 per acre on a parcel by parcel basis.

As a result of the effort to sell to a dealer or speculator in land, an offer was received from Mr. Ray Rankin, a real estate broker who was making the offer in behalf of a client. The offer was $215 per acre with $200,000 down and the balance payable over five years at ten percent interest. Mr. Rankin was informed that the price was too low, and that the terms were unacceptable. Mr. Rankin declined to make any further offer.

3. The sale of the Warrick County lands to Messrs. Harris and Bussing.—Later in August Mr. McCollum received a request from Mr. Harris to meet with him and Mr. Bussing for the purpose of discussing their possible purchase of the Warrick County lands. The request resulted in a meeting and many telephone conversations over several days, during which agreement was finally reached.

Messrs. Harris and Bussing started by offering $225 per acre on a three parcel basis to be acquired by right over a term of two or three years without payment of any option consideration. Mr. McCollum started by offering $275 an acre on a one block cash

basis. The negotiations resulted in agreement on an immediate cash basis sale of one-half the lands for $250 an acre, with a paid for option to acquire the remaining one-half of the lands at $275 per acre if option exercised within a year, or at $290 per acre if option exercised after a year and before a year and and a half.

Messrs. Harris and Bussing paid $25,000 for a one year option, and would pay an additional $25,000 for the extension of the option to a year and a half. In the event the option is exercised, the price of the option will be credited to the purchase price.

After necessary paper work and title work were completed, the sale of the Warrick County lands to Messrs. Harris and Bussing were completed in December 1980.

The sale of the Warrick County lands to Messrs. Harris and Bussing as agreed upon was the only proposal to purchase received from anyone that met or exceeded the authority to sell approved by ADAR No. 79–64.

STATEMENT OF GIBSON MARTIN

Gentlemen, my name is Gibson Martin. I am presently employed by Sunmark Exploration Company, a Division of Sun Oil Company (Delaware). From February 1977 through February 1981, I was employed by the AMAX Coal Company Division of AMAX, Inc. in the Indianapolis, Indiana office, initially as Director-Real Estate and later as assistant to the Vice President-Real Estate.

HISTORY OF SALE OF 2,500 ACRES TO DICK HARRIS IN WARRICK CO., INDIANA

Prior to 1977, it was an unwritten company policy that AMAX Coal Company, would not sell surplus lands. These lands could be used as "trade properties" in the acquisition of lands needed for mining, but other than that, they were kept in inventory and administered by Meadowlark Farms, Inc., a wholly owned subsidiary of AMAX, Inc., About the only exception to the policy was the sale of a portion of the abandoned Harmatan Mine, located just west of Danville, Illinois to a local real estate developer.

During 1977, AMAX Coal, as part of a capital budget reduction, proposed to the new top management of AMAX, Inc. that a program for the disposal of surplus lands be set-up with the goal of selling $1,000,000 worth of surplus lands a year for at least the next five years. When the proposal was accepted by AMAX, Inc., responsibility for administering the program was assigned to the Real Estate Department of the Coal Division. The program consisted of identifying which lands were surplus, appraising these lands as to their fair market value (FMV), obtaining management approval to dispose of a particular tract of surplus land at the FMV, and then actually finding a buyer and negotiating and closing the sale within the financial limits as previously approved by management.

Because of its proximity to the Evansville, Indiana metropolitan area, the mined-out, "pre-law" reclamation lands at the AMAX Booneville Pit in Warrick County, Indiana had always been of great interest to both the employees of AMAX and the general public. When AMAX ceased mining in that pit, it was determined that some 2,500 acres were surplus and could be sold or otherwise disposed of. An in-house appraisal by the Services Section of the Real Estate Department reflected a value of the land as a package to be in the $200 to $300 per acre range with the basis being recent sales by Peabody Coal Company of similar lands in the general area. The appraisal considered the highest and best use of the land to be for recreation purposes.

It was during this period of time that I met with Mr. Harris. He gave me the details of a prior purchase of mined-out land he had made from Peabody Coal and said he would like to work out a similar deal with AMAX. Mr. Harris wanted to purchase whatever lands AMAX had for sale at the Booneville Pit for a price between $200 and $300 per acre (being the same price he had paid Peabody). He also wanted to split the land package into $200,000 increments so that he could sell-off most of one increment before he paid for an additional increment. I told him that we had not yet cleared a particular tract for sale, that we had not set a price for the land and that I would prefer to sell the land as one package rather than splitting it into increments. I advised him that when he knew in AMAX exactly what we wanted to do, I would get back to him. I personally did not discuss the Warrick County lands with Mr. Harris again.

The initial appraisal was the basis for Real Estate's presentation to the Capital Projects Screening and Review Committee of AMAX Coal to recommend that the 2,500 acres should be sold in one package for somewhere in the $600,000 to $700,000 range. Certain members of the Committee questioned the appraised value feeling it was too low. Also, there were those in the coal Divisions' Maangement who wanted us to subdivide the land into small parcels and to make it available at FMV to employees of AMAX Coal, before offering it to the general public. To verify the value, we hired George Davidson of Appraisal Associates, Indianapolis, to appraise the 2,500 acre. As I recall, he valued the land in the $200 to $300 per acre range if we sold it as a package to one buyer, or with a slightly higher value if we would break it into small parcels and sell-off the individual parcels over a period of years.

After much discussion within AMAX Coal, we decided not to make a special effort to sell to company employees and I took the position that we did not have the time or expertise to subdivide the land and sell small parcels. Our staff in Real Estate had been reduced by almost 35 percent subsequent to early 1977 and we did not have enough people to accomplish our primary objectives, which was to acquire lands for mining, much less to devote that much time to selling the land in small parcels. My position was to sell it as a package for what we consider to be its FMV, and let the buyer make his profit from the resale of small parcels. Also, getting the purchase price on the front would give us the use of the money longer than waiting on the sale of individual small tracts.

My memory is unclear as to the exact sequence of events that followed next. However, the following then took place:

1. Don McCollum of the AMAX Real Estate Department attempted to develop a market for the land as an industrial site. This was unsuccessful, as there is no water and sewer facilities on or near the land, and a large industrial development was taking place north of Evansville along U.S. Highway No. 41 where water and sewer service had been installed. We could not compete with this development.

2. The Capital Projects Screening and Review Committee of AMAX Coal recommended to the Coal Division that the land be sold or otherwise disposed of for a price of between $200 and $300 per acre for the package, and management approved the sale on this basis.

3. Don McCollum talked to knowledgeable people in the Evansville area about the value and marketability of the land in an effort to develop the best market possible for the land.

4. I held fast in my position that because of unlimited resources and personnel, we should sell the land as a package. I advised Don of my prior conversation with Dick Harris and asked Don to give Mr. Harris a chance to purchase the land at a price AMAX had established.

5. A portion of the 2,500 acres, about 100 acres, was donated to Warrick County as a land fill site as settlement of disputed ownership of coal rights under a county road across the AMAX Ayrshire Mine in Warrick County.

6. Don McCollum negotiated the sale of approximately 2,000 acres to Dick Harris for a price in the $200 to $300 per acre range. Mr. Harris was to pay for and receive 1,000 acres at one price and to have an option for a set period of time to purchase the remaining 1,000 acres at a higher price, with the higher price being a figure calculated to represent the present value of the price of the second 1,000 acres, had AMAX been paid for the entire 2,000 acres at one time at the initial price per acre. This agreement was entered into between AMAX and Dick Harris in late 1980. My initial conversation between Dick Harris took place sometime in 1978.

Senator MCCLURE. Mr. Nickerson, in the normal process used by Amax, has there always been an appraisal used?

Mr. NICKERSON. Not always.

Senator MCCLURE. Was it used in this case?

Mr. NICKERSON. Yes.

Senator MCCLURE. In your opinion, did the process by ADAR7905 and ADAR7964 become approved follow the normal procedure?

Mr. NICKERSON. Yes Sir, they did.

Senator MCCLURE. Are you familiar with the purchase by Amax through a subsidiary Meadowlark Farms in the summer of 1980 from Alcoa of approximately 600 acres of land for $2200 per acre?

Mr. NICKERSON. Yes Sir.

Senator MCCLURE. Was that land equivalent to the land sold to Mr. Harris and Mr. Bussing?

Mr. NICKERSON. Mr. McCollum, would you answer that?

Mr. MCCOLLUM. That land was purchased in order to be traded to a land owner who wanted it in partial consideration for the sale of his land to Amax Coal Company. The land owner's land was located in a mining area. Approximately 90 percent of that acreage was tillable.

Senator MCCLURE. How much land sold to Mr. Harris and Mr. Bussing was tillable?

Mr. MCCOLLUM. About 75 acres out of 2,060.

Senator MCCLURE. There is no way to compare the land that you bought from Alcoa in character directly comparable to that which was sold by you to Harris and Bussing?

Mr. MCCOLLUM. No way at all.

Senator MCCLURE. Did you or any of the Amax officials, any time, make or become aware of any form of communication to or from Mr. Harris which could be construed as an express or implied promise or a request to give Mr. Harris preferential treatment on any land or sale by Amax?

Mr. NICKERSON. No Sir.

Senator MCCLURE. Mr. McCollum, were you responsible for preparing a memorandum dated March 24, 1981, to George Womack describing the chronological sequence of the disposition of some 2500 acres of land by Amax from 1978 through 1980?

Mr. MCCOLLUM. Yes Sir.

Senator MCCLURE. Would you explain to the committee why and how this document was developed?

Mr. MCCOLLUM. At the request of coal management it was developed because of the articles in the Wall Street Journal put out on the transaction.

Senator MCCLURE. Did I understand you to say that that was in response to management request?

Mr. MCCOLLUM. Yes Sir.

Senator MCCLURE. When you say management you mean the management of Amax?

Mr. MCCOLLUM. The real estate management.

Senator McCLURE. Were you responsible for preparing the asset management and analysis on the subject property?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. That's an exhibit attached to the testimony?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. Why was the original ADAR that you drafted in January of 1979 rescinded?

Mr. McCOLLUM. Because the Vice-President of Engineering suggested that the price was too low, the appraised price.

Senator McCLURE. Why did you advise Gibson and Martin in April and May of 1980 that you desired permission to sell the remaining 2400 acres in four separate blocks?

Mr. McCOLLUM. Excuse me. Please repeat that.

Senator McCLURE. Why did you advise Gibson and Martin in April or May of 1980 that you desired permission to sell the remaining 2400 acres in four separate blocks?

Mr. McCOLLUM We decided that since there was a donation of 100 acres to the Warrick County Planning Commission for land fill purposes that some of this acreage was no longer contiguous acreage and it would probably be in our best interest and would not hurt a large parcel sale if we disposed of a 142 acre tract, a 186 acre tract, and a 42 acre tract.

Senator McCLURE. Why did you believe that was better? Simply because it was noncontiguous or you could get a higher price if you could sell them in smaller tracts?

Mr. McCOLLUM. We knew we could get a higher price, but it was basically that we felt it would not hurt. It would probably be beneficial to sell the 2100 acre tract.

Senator McCLURE. Is it harder to sell the larger tract?

Mr. McCOLLUM. Yes.

Senator McCLURE. Does that affect the price per acre of the tract this large?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. Why did you decide to send a promotional flyer through Dick Harris to Nat Noland in June of 1980?

Mr. McCOLLUM. At Dick Martin's request, sir.

Senator McCLURE. What were the terms offered to you by Dick Harris in your telephone conversation of July 30, 1980?

Mr. McCOLLUM. I think that was at a meeting. I don't believe it was a conversation, telephone conversation. It was terms that he wanted to acquire the acreage for $225 in three or four separate parcels at the maximum price of $225 an acre.

Senator McCLURE. Why was this offer rejected?

Mr. McCOLLUM. It did not meet the authority of the ADAR.

Senator McCLURE. What was the authority of the ADAR?

Mr. McCOLLUM. None of the property could be sold for less than $250 per acre.

Senator McCLURE. Did the final deal you negotiated with Mr. Harris and Mr. Bussing meet or exceed the independent fair market value specifications of ADAR7964?

Mr. McCOLLUM. Yes sir.

Senator McCLURE. Did it just meet it or did it exceed the amount?

Mr. McCOLLUM. It exceeded the amount due to the sale of these three additional, or three separate parcels.

Senator McCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris which could be construed as express or implied promise or request to give Mr. Harris preferential treatment on land for sale by Amax?

Mr. McCOLLUM. No sir.

Senator McCLURE. Mr. Noland. In 1978 you were the manager of State Media Affairs for Amax Coal in Indiana, is that correct?

Mr. NOLAND. Yes sir.

Senator McCLURE. Explain the nature of your duties.

Mr. NOLAND. It was primarily relationship with the Indiana legislature, the local community including local governmental bodies within the community, and some media responsibilities.

Senator McCLURE. Did you ever lobby Senator Harris on any subjects affecting Amax or the coal industry in general?

Mr. NOLAND. I had several discussions with Mr. Harris concerning surface mining legislation as my job pertained to the legislation relations.

Senator McCLURE. Did you lobby strictly on the strip mining bills pending before the Indiana legislature during 1978 through 1980?

Mr. NOLAND. Yes sir.

Senator McCLURE. Did Dick Harris contact you in October of 1978 or thereabouts concerning his interest in purchasing real estate rumored to be for sale by Amax in Warrick County?

Mr. NOLAND. He did contact me sometime during the fall of 1978.

Senator McCLURE. Did you advise Mr. Martin of this discussion with Mr. Harris?

Mr. NOLAND. Yes sir, I did, and I asked Mr. Martin if he would please return the phone call or get in touch with Senator Harris to answer his inquiry.

Senator McCLURE. Was there anything abnormal or unusual about that contact?

Mr. NOLAND. No sir, it was a customary contact. I had other inquiries from public officials. It was a practice within the company. I would refer those inquiries to other relevant people in the other departments for answering.

Senator McCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris which could be construed as an express or implied promise or request to give Mr. Harris preferential treatment on land sale by Amax?

Mr. NOLAND. No sir.

Senator McCLURE. Mr. Davidson, how long have you been a professional appraiser?

Mr. DAVIDSON. 20 years.

Senator McCLURE. Do you hold certification?

Mr. DAVIDSON. I am a member of the Appraisal Institute.

Senator McCLURE. In your profession, is that the highest certificate that can be obtained?

Mr. DAVIDSON. Yes, sir.

Senator McCLURE. How were you chosen to be appraiser for Amax property which was the subject of your report dated August 1, 1979?

Mr. DAVIDSON. I'd been doing appraisal consulting work for Amax for many years and this was just another routine appraisal assignment as far as I was concerned.

Senator McCLURE. Do you recall who with Amax contacted you to do this appraisal?

Mr. DAVIDSON. A Mr. Perine. Jack Perine managed that. I mean he was my contact with Amax.

Senator McCLURE. Have you done appraisal and other work for Amax in the past?

Mr. DAVIDSON. Yes.

Senator McCLURE. Do you know how many times?

Mr. DAVIDSON. Many times in the last 10 years. At least 20 appraisal situations of one sort or another.

Senator McCLURE. Did Amax apprise you, or did Mr. Perine advise you what the parameters of terms of sale were upon which you were requested to base your appraisal report?

Mr. DAVIDSON. Yes sir, he did.

Senator McCLURE. In your professional experience, were those instructions unusual?

Mr. DAVIDSON. Not unusual.

Senator McCLURE. What were the instructions?

What was the sale to be upon which you were to base your appraisal?

Mr. DAVIDSON. The value was to be based on the kind of parcel being sold, the entire parcel being sold as one tract to one buyer for cash.

Senator McCLURE. In your opinion, is that the way to obtain the highest price per acre?

Mr. DAVIDSON. No.

Senator McCLURE. Did you so advise them?

Mr. DAVIDSON. Yes.

Senator McCLURE. Is it unusual for corporations to sell land in that manner?

Mr. DAVIDSON. No, it isn't.

Senator McCLURE. Would it be more usual for a corporation like Amax to be the subdivider of the property themselves?

Mr. DAVIDSON. The corporations seldom do the subdividing themselves.

Senator McCLURE. Even though they could get more money out of it by doing so?

Mr. DAVIDSON. Right.

Senator McCLURE. Do you know why?

Mr. DAVIDSON. I have no answer.

Senator McCLURE. Why would the corporation determine to sell that in one transaction rather than being subdivided?

Mr. McCOLLUM. The primary goal of Amax is to acquire land for mining purposes. We did not have the time or the personnel to dispose of land.

Senator McCLURE. You were advised by——

Mr. McCOLLUM. By Mr. Martin.

Senator McCLURE. Mr. Davidson, who did the appraisal, did he advise you that you would probably get more money if you were to subdivide it?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. Was that discussed by you and other company officials?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. And you did not sell it on that basis?

Mr. McCOLLUM. That's right.

Senator McCLURE. And it was done because you didn't have the time or the personnel to do the subdivision?

Mr. McCOLLUM. Yes, sir. That was a primary concern.

Senator McCLURE. Is that the usual practice of Amax?

Mr. McCOLLUM. Yes, sir.

Senator McCLURE. Have you in other instances subdivided the property?

Mr. McCOLLUM. We usually try to sell the total. We subdivide, well not subdivide, but add it to a larger——

Senator McCLURE. Was it the conclusion of your appraisal, Mr. Davidson, that the fair market value of the property being sold by Amax based on the assumption that it would be sold as a block, was $250 per acre?

Mr. DAVIDSON. That is right.

Senator McCLURE. If it had been divided into smaller parsels, what would have been the value?

Mr. DAVIDSON. I can't answer that. I'd have to determine how small of parcels.

Senator McCLURE. If they had divided it into smaller parcels, is it your opinion that they could have sold some of it for higher value?

Mr. DAVIDSON. Yes, no doubt.

Senator McCLURE. But the average value for the whole tract would be $250 if sold as one parcel?

Mr. DAVIDSON. Yes, sir.

Senator McCLURE. After completing your appraisal, did you tell anyone that the Amax tract was available?

Mr. DAVIDSON. Some months after the appraisal was completed I had word from Amax that it had been approved for sale. Yes, I did tell people.

Senator McCLURE. Did you tell anyone yourself that this property was available?

Mr. DAVIDSON. Yes.

Senator McCLURE. To whom did you communicate that?

Mr. DAVIDSON. Various people, various investors. I couldn't say just how many.

Senator McCLURE. Did you at any time make or become aware of any form of communication to or from Mr. Harris which

could be construed as an express or implied promise or a request to give Mr. Harris preferential treatment on land for sale by Amax?

Mr. DAVIDSON. No. Sir.

Senator MCCLURE. Mr. Martin, on page two of your testimony you refer to a meeting with Mr. Harris. How did that meeting come about?

Mr. MARTIN. That was the meeting that Nat Noland referred to when he said that Dick Harris would like to get together with me to discuss the possibility of buying the land.

Senator MCCLURE. Was any comment made to you at that time that Mr. Harris should be given a special consideration due to his position as State legislator?

Mr. MARTIN. No sir.

Senator MCCLURE. Or for any other reason?

Mr. MARTIN. No sir.

Senator MCCLURE. Did you know what his position was?

Mr. MARTIN. I knew he was a State Senator.

Senator MCCLURE. Did you know what his responsibility was?

Mr. MARTIN. No Sir.

Senator MCCLURE. Did you in this meeting or any other meeting make a statement to Dick Harris as quoted in the Wall Street Journal, "I will let you have first shot at buying the land but only at my price."

Mr. MARTIN. I don't know that I made it in those exact terms. I think what I was saying to Dick was, I can't accept your offer that you have made me. I do not have authority to sell the land. I do not know what price it will be sold at. When we know within Amax what we want to do with the land I'll get back to you, and you can discuss it with me on those terms.

Senator MCCLURE. Did you have any other discussions or contacts with Mr. Harris or Mr. Bussing after this initial meeting?

Mr. MARTIN. No, sir. Not on this property.

Senator MCCLURE. If you didn't have contact with either Harris or Bussing, what prompted your memo of July 25, 1980, to Don McCollum that before you commit to anyone else on the balance of the remaining acreage, Dick Harris should be contacted?

Mr. MARTIN. Just what I told you before. I had told Mr. Harris that we would get back to him and give him a chance to buy the land at our price, and that was just honoring that statement that I had made.

Senator MCCLURE. That memo is a part of your testimony attached?

Mr. MARTIN. Not as a part of mine, no.

Senator MCCLURE. As the Amax testimony?

Mr. NICKERSON. Yes, sir.

Senator MCCLURE. Did you instruct Don McCollum in August, 1980, to work out a deal with Harris and Bussing that was mutually agreeable?

Mr. MARTIN. My memory of that is what you have there, that I reminded Don that I had told Dick Harris that I would get back to him. From that point on, Don handled the transaction, and as I recall most of the information came to me from Don that yes, I have set up the meeting and we're working on it. But I don't recall instructing Don anything other than what the terms of the ADAR were.

Senator MCCLURE. How long had the company been trying to sell this particular property?

Mr. MARTIN. I can't remember exactly when it was approved. After we did get the initial approval I knew there was an attempt to negotiate the sale of the land for something other than what I would call recreational land, and we attempted to see if there was a market for this land that would be more commercial. We were not able to develop a commercial market for the property, which put us back to the type of land that Dick Harris wanted to buy.

Senator MCCLURE. Over what period of time did that take place?

Mr. MARTIN. It was a matter of months. I can't say how long. I don't remember from start to finish, but it was a matter of months.

Senator MCCLURE. Two or three months?

Mr. MARTIN. It was probably six months to a year.

Senator MCCLURE. Had you had any real prospects on the purchase of that land?

Mr. MARTIN. Not to my knowledge.

Senator MCCLURE. Mr. McCollum, had you attempted to get other people interested in the purchase of this land?

Mr. MCCOLLUM. Yes.

Senator MCCLURE. Had you had any other prospects?

Mr. MCCOLLUM. One other prospect. The price and terms did not meet our authorization.

Senator MCCLURE. How long had that land been for sale?

Mr. MCCOLLUM. Approximately 15 months.

Senator MCCLURE. You made various efforts during that time to sell them?

Mr. MCCOLLUM. Many efforts, Sir.

Senator MCCLURE. In spite of those efforts, or as a result of those efforts, you had two prospects?

Mr. MCCOLLUM. Yes Sir.

Senator MCCLURE. Had you attempted to get brokers interested in listing it and moving it?

Mr. MCCOLLUM. Yes Sir.

Senator MCCLURE. Had you had any success in doing that?

Mr. MCCOLLUM. We had one request for additional information, Sir.

Senator MCCLURE. In the Wall Street article of March 19, 1981, you are reported, Mr. Martin, as having said that Amax never had placed any other property on the open market or actively sought out offers for the land. Is that a true statement?

Mr. MARTIN. It was not a true statement. I was not aware of what had gone on within the department at that time.

Senator MCCLURE. Did you make that statement?

Mr. MARTIN. I don't know that I made it in those exact words, but I led them to believe that as far as I knew we had not officially put the property on the open market.

Senator MCCLURE. Were you aware of Mr. McCollum's activites?

Mr. MARTIN. I was aware that he was trying to develop a market for the property, but I was not specifically aware of what he was doing on a day to day basis.

Senator MCCLURE. Did you know at the time you had the conversation with Mr. Pastor of the activities of Mr. McCollum that he had been engaged in in regard to this property?

Mr. MARTIN. No Sir, not all of them.

Senator MCCLURE. Is it true as reported in the same article that you were never advised by Amax officials of any potential conflicts in doing business with Mr. Harris?

Mr. MARTIN. It was never discussed.

Senator MCCLURE. Did you personally believe there were?

Mr. MARTIN. No Sir.

Senator MCCLURE. Did you at any time make or become aware of any form of communications to or from Mr. Harris which could be construed as an express or implied promise or request to give Mr. Harris preferential treatment on land for sale by Amax?

Mr. MARTIN. No Sir, only my statement that I would get back to him.

Senator MCCLURE. Did you have any reason to believe that the transaction with Harris was in any way unusual?

Mr. MARTIN. No sir.

Senator MCCLURE. Was it handled, so far as you were concerned, in exactly the same way as any other land sale or any other negotiation?

Mr. MARTIN. It was an arm's length transaction as far as I was concerned.

Senator MCCLURE. Mr. Harvey, did you have some questions?

Mr. HARVEY. Yes, I have some on behalf of Senator Jackson. They all deal with the March 19th Wall Street Journal article.

The article states that you said, "Amax had decided nearly three years earlier that Dick Harris could have all of the land if he met what the company considered a fair price."

Did you say that?

Mr. MARTIN. No sir, I did not say it in those words. What I said was in my mind I had decided that if it went to that kind of a market and Dick Harris met our price, since he was the first one to ask for it. That is not Amax's statement, that was my personal statement.

Mr. HARVEY. Who at Amax made the decision to sell to Mr. Harris? The question is, who had made a decision to sell to Mr. Harris?

Mr. MARTIN. Initially I made the decision that I would get back to him and give him a chance to negotiate for it, but when the final say came that was an approval of the contract.

Mr. HARVEY. Did you have the authority to approve an actual sale?

Mr. MARTIN. No sir.

Mr. HARVEY. If it was your view that the land should be sold to Mr. Harris, why didn't you contact him as soon as the proposal offer of the land, that is ADAR79–64, was approved by the company in November 1979?

Mr. MARTIN. Mr. Harris wanted to buy the land for what I call recreational type purchase for developing it for cabin sites or home sites. We always attempted, even though we had a floor to sell our property at, we would always attempt to develop a higher market that would bring the company more money. And while we were looking for what I would call the commercial market, I didn't feel that the statement that I'll get back to Dick applied because we were looking for something far in excess of the type of money that he was talking about paying.

But as Mr. McCollum told you, we were not able to develop that kind of a market.

Mr. HARVEY. The article states, "Mr. Martin said Amax attorneys"—I'm sorry. Excuse me. Oh, Senator McClure covered that.

The article states that in response to questions about Amax's decisions to do business with the lawmaker, Mr. Martin said that the company recognized that Mr. Harris, "wasn't an enemy of the coal industry. Why shouldn't you do business with your friends?" P.S., so long as "anybody else could be charged the same price."

Did you say that?

Mr. MARTIN. I don't know that I said it in those exact words. What I was trying to say was that Mr. Harris was a person that is from an area of Indiana where coal was mined. He was sympathetic with the needs and problems of the industry and that the coal industry is one of the larger employers in his area. And as such, he has represented an area that is a coal mining area. And in my business career, when I say it's easier to do business with your friends, it's always easier to make a deal with someone that you know and had past relationships with rather than someone that you don't know or don't get along well with.

Mr. HARVEY. But no one at Amax had suggested to you that you do business with Mr. Harris?

Mr. MARTIN. No one ever suggested that.

Mr. HARVEY. You recognize when you refer to the company, recognize you were referring to yourself?

Mr. MARTIN. My personal.

Mr. HARVEY. Within Amax there is no "friends" list or no "enemies" list?

Mr. MARTIN. No. If there is I've never seen it.

Mr. NICKERSON. No, sir, there is not.

Senator MCCLURE. Thank you very much, gentlemen. I appreciate your testimony. We have no further questions at this time.

(Hearing Transcript, pp. 91–110.)

Mr. MCCLURE. Mr. President, in investigating the land transactions between the coal companies and Messrs. Harris and Bussing, the committee requested, and was provided with, all company documents relevant to the property transfers. The AMAX and Peabody witnesses attested to this fact under oath at the hearing. The documents were then reviewed thoroughly by committee staff and are now available for public inspection in the committee office. The file includes:

AMAX COAL COMPANY

1. Amax Chronology with cover letter from John Paul to Mr. Gabriele Paone, Department of Interior.

2. Memo from H. Elkins Payne to John Paul regarding real estate information relative to the property sale to Harris/Bussing.

3. Letter from Phyllis Barnhill, Executive Director of the Warrick County Plan Commission describing her participation in the Amax land transfer.

4. Letter from real estate brokers to President Reagan defending the price Harris paid for the property.

5. Memo to John Towers from John Paul describing his efforts to obtain the facts surrounding the property sale to Harris and describing the chronology.

6. Cover letter from Gib Martin to Dick Harris transmitting a plat of the area, bcc to Jack Perrine indicating Harris had made offer.

7. Asset Management Analysis.

8. ADAR No. 79–06 (Management Directive relative to land sales).

9. Davidson's appraisal—highlights.

10. ADAR No. 79–64 (Management Directive relative to land sales).

11. Promotional flyers and list of investment and brokerage firms "like" those sent flyers.

12. Memo from Gib Martin to Don McCollum indicating that McCollum should let Harris know that Amax would prefer to sell the property as a block and that if Harris wants to buy it all on a cash to deed basis that Martin would have no objection.

13. Contract drawn up for Ray Meinert for purchase of property.

14. Letter from Don McCollum to Rankin Realty turning down offer.

15. Offer to sell real estate—agreement letter (9/11/80) from Meadowlark Farms, Inc. to Harris/Bussing.

16. Memo from Gib Martin to Tom Biangiardo informing him of disposition to date and planned for the 2,500 acres.

17. Xerox copy of Harris/Bussing check to Meadowlark for $5,000.

18. Special Corporate Warranty—describes property boundaries.

19. Xerox of Harris/Bussing check to Meadowlark Farms for $2,500.

20. Option with Contract to Purchase Real Estate.

21. Letter from Nat Noland to Mr. Harris indicating that AMAX wanted to sell the land in one parcel and if Mr. Harris was still interested he should contact Noland as soon as possible. (6/17/80).

22. Cover letter from Alan M. Hux, AMAX attorney, to Don McCollum transmitting two originals and one approval copy of the Offer to Sell Real Estate. (9/10/80).

23. Memo from Don McCollum to George Womack requesting that a Special Corporate Warranty Deed and a Quitclaim Deed be prepared. (10/28/80).

24. Cover memo from Alan M. Hux to Don McCollum transmitting the Special Corporate Warranty Deed and Quitclaim and a proposed Option for Tract B. (11/26/80).

25. Cover letter from Don McCollum to Harris/Bussing enclosing for signature Option with Contract to Purchase Real Estate. (12/5/80).

26. Appraisal Report prepared by Terry L. Hart, Real Estate Services (10/31/78).

27. Appraisal Report prepared by George J. Davidson (8/1/79).

PEABODY COAL COMPANY

1. Synopsis of events leading to the sale of Victoria Properties to Harris/Bussing.

2. Newspaper advertisement offering the Victoria Properties for sale.

3. Appraisal of the Victoria Properties.

4. Offer to Buy Real Estate.

5. Corporate Special Warranty Deed.

6. Memo from James Schoenberger to J. M. Touhill indicating that Bill Hartman had accepted the offer and a contract would be sent the week of September 11 (9/6/78).

7. Memo from James E. Schoenberger to W. V. Hartman summarizing Galen Barclay's negotiations and recommending the acceptance of an offer. (9/6/78).

8. Memo from James E. Schoenberg to W. V. Hartman indicating that Mr. Harris had made an offer much lower than expected and asking for advice on a counter offer. (8/28/78).

9. Contract for Sale of Real Estate (9/19/78).

10. Corporation Special Warranty Deed.

11. Description of boundaries of the property.

12. Cover memo from M. G. Barclay to J. H. Bagby enclosing the Closing Statement and a cashiers check from Harris and Bussing in the amount of $157,500.00.

Unfortunately, after the confirmation hearing the Wall Street Journal printed another article which alleged discrepancies in the hearing record, and I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 10, 1981]

NOMINEE TO ENFORCE STRIP-MINING LAWS DEFENDS TRANSACTION WITH COAL FIRMS

(By Andy Pasztor)

WASHINGTON.—President Reagan's choice to enforce federal strip-mining laws denied he ever sought or received "preferential treatment" when he stuck lucrative land transactions with a pair of major coal companies.

James R. Harris, an Indiana state lawmaker, at the time was chairman of two legislative committees responsible for drafting and overseeing strip-mining laws in Indiana. He repeatedly told the Senate Energy Committee that his controversial business transactions with Peabody Coal Co. and Amax Inc. wouldn't pose any conflict-of-interest problems in his potential new job.

Mr. Harris forcefully defended himself as a shrewd businessman who paid the concerns the going price for the property after "arms-length" negotiations and who stands to make hundreds of thousands of dollars in profit.

Both Republican and Democratic members of the committee gave Mr. Harris a sympathetic hearing yesterday, and his nomination isn't expected to have trouble getting through the Senate.

Nevertheless, testimony by some of the company executives who dealt with Mr. Harris raised some new questions about exactly how the transactions were negotiated. And the hearing left unanswered the larger question of the propriety of a state lawmaker doing business with major strip-mining concerns whose operations are directly affected by his official activities.

The Evansville, Ind., lawmaker insisted the transactions were entirely proper because "I have made no clandestine deals with any coal company and have no reason to believe that I have been given any special consideration by them." As previously reported, Mr. Harris and a partner purchased options for, or acquired outright, approximately 2,500 acres of reclaimed strip-mined land in southern Indiana from the two coal producers between 1978 and the end of 1980. Some of the land was quickly subdivided and sold off by the partnership at prices five or six times what it originally paid for it.

Mr. Harris was nominated by Mr. Reagan to run the government's Office of Surface Mining.

A troop of current and former officials of the two companies also testified before the committee and denied that the sale of property to Mr. Harris' partnership had anything to do with his legislative duties. The companies presented internal memos and documents to support their contention that they agreed to the transactions with the partnership only after other customers failed to materialize and that the sales price was reviewed by an independent appraiser. The committee also received but didn't make public a report by the Federal Bureau of Investigation on Mr. Harris' business dealings.

Based on these investigations, Sen. James McClure (R., Idaho), the committee's chairman, said he is convinced "that Dick Harris has done nothing improper and is very well qualified" to be director of the surface mining office.

The office of Personnel Management, however, the agency responsible for resolving potential conflict-of-interest problems faced by federal officials, has warned that Mr. Harris, if he is confirmed, can't participate in any "particular matter involving Amax" before the end of the year. By that time, the partnership either will have exercised the option it holds to purchase 1,030 additional acres from Amax, or the option will have expired.

In addition, attorneys at the Interior Department decided in April that "to avoid any appearance of conflict," Mr. Harris must "limit his participation in the partnership to an inactive status" if he gets the new job.

Despite the lengthy and detailed testimony presented at the hearing, several discrepancies cropped up concerning the negotiations leading to the Amax sale. Several Amax officials, for example, told the committee they spent more than a year trying to find other buyers for a 2,500-acre parcel of land before signing to sell most of it to the Harris partnership in December 1980.

But Gibson Martin, Amax's chief real estate official in southern Indiana at the time and the official who did much of the negotiating with Mr. Harris, told reporters a few months ago that the company never actively sought or considered other offers for the land after Mr. Harris expressed an interest in it in 1978. In response to questions, Mr. Martin yesterday said his earlier statements were based on incorrect information.

In his testimony, Mr. Harris contradicted Mr. Martin and other Amax officials by claiming that his first contact with the company about the property took place in July or August 1980. The testimony submitted by Amax indicates that Mr. Harris communicated with Mr. Martin two years earlier to discuss a possible purchase.

In response to questions, Mr. Harris acknowledged that he failed to disclose his involvement in the partnership in 1979 when he filed his annual financial-disclosure form with the state legislature. He said, however,

that he didn't think he was required to do so because the partnership hadn't yet filed a federal income tax return for 1980. Mr. Harris' financial-disclosure form did list the partnership and described its main area of business as investments.

Mr. McCLURE. Mr. President, the Journal states that discrepancies exist between the testimony of the AMAX officials and that of Gibson Martin with regard to the marketing of the AMAX property. The following excerpt from the hearing transcript clarifies Mr. Martin's statement to the Wall Street Journal reporter:

Mr. HARVEY (minority counsel). The article states that you said, "Amax had decided nearly three years earlier that Dick Harris could have all of the land if he met what the company considered a fair price."

Did you say that?

Mr. MARTIN. No, sir, I did not say it in those words. What I said was in my mind I had decided that if it went to that kind of a market and Dick Harris met our price, since he was the first one to ask for it. That is not Amax's statement, that was my personal statement.—(Hearing transcript, p. 107.)

The July 10 article in the Journal goes on to allege that Mr. Harris contradicted Mr. Martin and other AMAX officials by claiming his first contact with the company about the property took place in July or August 1980. Mr. Harris has consistently stated, both in his prepared statements and in his interviews with committee staff, that he had expressed interest in purchasing the land from AMAX in 1978. He refers to his discussion with Gibson Martin in October 1978 on the possible sale of the AMAX property in his prepared statement, as follows:

I do not remember a commitment for a "first shot," but I would not see that as out of the ordinary, if I were the first person to approach them on the property, and "their price" is what we paid, both to Amax and Peabody.

At that time, AMAX had not decided how to dispose of the property. Mr. Harris asked that he be contacted should the land become available for purchase. After being informed by Mr. Bussing that the property was for sale, Mr. Harris recontacted AMAX as he indicated in his testimony.

Taken together, I believe the combined testimony, documents and answers of the witnesses unequivocably support the following conclusions:

Messrs. Harris and Bussing did not pay "bargain" prices for the lands they purchased from AMAX and Peabody Coal Companies. In fact, as Mr. Harris indicated in his prepared statements, the two actually met or exceeded the fair market values of the properties as set by independent appraisers. In the case of Peabody, they topped the fair market value by 22 percent. This has been confirmed by the appraisal, as well as company officials. In terms of the AMAX transaction, the appraiser indicated that the property would bring more revenue if broken into smaller parcels; however, the company chose to sell the land in one tract rather than expend the time and manpower to dispose of it to a number of buyers.

Mr. Davidson, the appraiser, stated that AMAX's decision to sell the property as one plot is normal practice. Further, the Journal's comparison of the AMAX property purchased by Harris-Bussing to that which was sold by Alcoa in 1980 is inappropriate because of the dramatic difference between the two properties involved. According to the AMAX officials, approximately 90 percent of the acreage involved in the Alcoa transaction was tillable. The tract of land Messrs. Harris and Bussing purchased included only about 75 tillable acres out of 2,060.

It is apparent from all evidence examined that both the AMAX and Peabody properties were placed for sale on the open market. In the case of AMAX, copies of flyers advertising the property, the company's chronology, and letters submitted by persons who had been approached about the land, make it quite clear that the company's real estate department had been attempting to sell the parcel for approximately 1 year prior to its purchase by Harris-Bussing. Mr. Harris' request in 1978 that he be contacted when AMAX decided to sell the property should not be construed as a company promise to sell him the land. The testimony of Mr. Harris, as well as the AMAX officials, indicates that the transaction was at arms length and that no special consideration was given the partners. In fact, AMAX even neglected to contact Mr. Harris when the decision was made to dispose of the property.

The Journal reported that Gibson Martin stated that AMAX never sought out any other buyers. During questioning at the hearing, Martin himself indicated that his statement was not accurate. He said he "was not aware of what had gone on within the department at that time."

There is no evidence that Mr. Harris granted legislative favors to either AMAX or Peabody Coal Co. Though this point was conceded in the Journal's first article of March 18, I would like to clarify this matter for the record. Mr. Harris has gone to great lengths to avoid even the appearance of a conflict of interest in his career as an Indiana State legislator. His efforts are described in his prepared statement. Mr. Harris has indicated that his involvement with the 1977 Surface Mining Act could never have allowed him to tailor "its construction to favor any particular mining interests or the industry in general," as implied by the Journal.

Any opposition that Mr. Harris has waged against the act stems from his view that the Federal Government should share more control over strip mining regulation with the States. To further substantiate Mr. Harris' claim that his dealings with the coal companies were not in exchange for political favors, Mr. Hartman of Peabody testified under oath that when he approved the sale, he did not even know what Harris' responsibilities were in the State senate. All coal company witnesses denied under oath making or becoming aware of any "form of communication to or from Mr. Harris which could be construed as an express promise or request to give Mr. Harris preferential treatment," on any of the land purchased by Harris-Bussing.

Mr. Harris did not violate the code of ethics or the laws governing financial disclosure of the Indiana State Senate as a result of his dealings with the coal companies. As Senator LUGAR noted in his statement, the president pro tempore of the Indiana Senate has given Mr. Harris a full certification in terms of his compliance with the ethics code of that body. In his letter of March 23, 1981, Mr. Garton went on to state that to his knowledge Mr. Harris did not "violate Indiana's laws concerning financial disclosure required of State legislators," as the Journal alleges. According to both Mr. Harris and Mr. Bussing, their association took no partnership status until they began, on the advice of Mr. Bussing's accountant, their tax filing process for 1979 (early 1980).

On April 15, 1980, a Federal identification number was requested for the two at the suggestion of Mr. Bussing's accountant to simplify reporting by filing a partnership return. Therefore, Mr. Harris did not list his association with Mr. Bussing on his 1979 financial statement as it was filed before their partnership status (purely for Federal income tax purposes) was established. His 1980 disclosure lists his joint venture with Mr. Bussing as the Journal accurately reported.

The partnership of Harris and Bussing will not stand to earn five to six times the amount they paid AMAX for the property once all lots are sold. Mr. Harris explained in his prepared statement that the best pieces of the property began to sell first, and that a few were sold at the rate quoted by the Journal. However, the vast majority of the lots are unsuitable for immediate construction of homes and many are inaccessible to even a four-wheel-drive vehicle. Therefore, though the immediate profit from the prime lots already sold appears high, this price will not carry over to the bulk of the property. This explanation appears consistent with the appraisal report prepared by Mr. Davidson.

Along these same lines, Mr. Harris has been quoted as having said that the option contract with AMAX was structured so that the partners could exercise the option on the second tract with the profits from their first purchase. In his prepared statement, Mr. Harris denied ever making a statement to the effect that profit from the first sale would be adequate to exercise the option and explained that the option contract is a common real estate practice.

Mr. President, this detailed exposition of the findings of fact and applicable law relating to the allegations surrounding Mr. Harris and the land trasactions with AMAX and Peabody establish conclusively the innocence of Dick Harris of all such allegations. There is no evidence, no information, no document, and no testimony available to the committee, other than the cited articles themselves, to suggest any impropriety of any kind on the past of Mr. Harris or the officials of the two companies. On the contrary, all of the evidence, information, docu-

ments, and testimony support the conclusion that these transactions and the relationships of the parties were totally proper under the applicable laws and ethics rules, and accepted practices thereunder, governing Mr. Harris' conduct as an Indiana State senator and the two coal companies' relations with him.

Additionally, the evidence and testimony document Mr. Harris' continued efforts throughout his legislative career to avoid affirmatively any professional or private situations which might constitute an appearance of a conflict of interest with his legislative responsibilities, even where applicable ethics rules would allow such situations. I commend him especially for that record and believe it provides additional assurance and confidence that he will comply fully with all applicable requirements in his new Federal position.

Mr. Harris has done nothing more than legally, properly, and responsibly support his family in his chosen field.

In conclusion, I express my regret to Mr. Harris for the lengthy delays and personal sacrifices he has endured during the confirmation process as a result of articles based on scant knowledge of the facts. However, it was my responsibility as chairman and Senator JACKSON'S as ranking minority member, and the responsibility of the Energy and Natural Resources Committee, to thoroughly investigate Mr. Harris' qualifications for the position to which he was nominated.

I can say now that this has been done and the committee, without dissenting vote, has found that he meets the test. Mr. Harris is a man of integrity, who possesses the knowledge, background, and skills to be an effective Director of the Office of Surface Mining. I commend him for his patience and forthrightness during this process and recommend he be confirmed unanimously by the full Senate.

TESTIMONY ON BEHALF OF SENATOR DICK HARRIS—JULY 9, 1981

● Mr. LUGAR. It gives me a great deal of pleasure to introduce to you my good friend and fellow Hoosier, State Senator James Richard Harris, and to come before you today to speak on his behalf and to urge your speedy confirmation of his nomination as Director of the Office of Surface Mining.

Dick Harris is uniquely qualified for this assignment. A certified professional geologist and former surface mine superintendent, Senator Harris served as Indiana's legislative representative to a 10-State interstate task force on more successful utilization of high-sulfur coal. For the 4 years prior to the 1980 election, Senator Harris was the only Republican Senator from Indiana's coal-mining area.

He chaired the Senate Standing Committee on Natural Resources, and orchestrated a 2-year study committee charged with the task of guiding Indiana's compliance with the 1977 Federal Surface Mining Act. In this capacity he had extensive dealings with the U.S. Office of Surface Mining and is quite familiar with its operations.

A graduate of Indiana University in 1951, Dick Harris is a consulting geologist working in the area of petroleum and coal exploration and evaluation. Senator Harris demonstrated a thorough understanding of government's environmental responsibilities, resulting in a perfect rating given him by the Isaac Walton League during the 1980 session of the Indiana General Assembly.

In fact, Senator Harris has received enthusiastic endorsement from a remarkably diverse group of organizations and individuals. According to Sierra Club spokesman John Embry, Senator Harris is—

Someone who has shown he can be flexible and who we can at least sit down and talk to.

The Mining and Reclamation Council endorsed Senator Harris, saying:

We feel he is extremely well-qualified and has demonstrated a responsible approach to surface mining issues.

In a letter to Secretary Watt, Sam Church, Jr., president of the United Mine Workers of America, states:

In meeting with Senator Harris, he has displayed a clear understanding of the Surface Mining Control and Reclamation Act of 1977, which will enable him to strike a clear balance between the protection of the environment and the need to mine coal in a responsible manner.

The American Mining Congress, the National Coal Association, the Governor of Indiana, and the Indiana Congressional Delegation have unanimously endorsed Senator Harris as the best qualified person for this position. I am pleased to submit for the record some of the letters I have received attesting to Senator Harris' moral character and his fitness for the position of Director of the Office of Surface Mining.

On Wednesday, March 18, 1981, the Wall Street Journal ran an article on page 1 which questioned Senator Harris' dealings with two coal producers in Indiana, asserting that Harris had violated an Indiana disclosure law and had received preferential treatment because of his position on the Natural Resources Committee. Senator Harris has responded to these charges with dignity and clarity, providing comprehensive documentation that the land was purchased at a fair market value and that he received no special consideration, and has indicated his willingness to share this information with the members of this committee for the record.

In a letter to me, the Honorable Robert D. Garton, president pro tempore of the Indiana State Senate, stated:

To the best of my knowledge and belief, Senator James R. Harris did not, in fact, either violate Indiana's laws concerning financial disclosure required of state legislators, or breach the ethics code of the Indiana Senate as a principal in land purchase from Peabody Coal Company or Meadowlark Farms (a subsidiary of Amax Coal.)

In a similar vein, the Honorable Michael K. Phillips, Democratic leader of the Indiana House of Representatives, wrote:

I think it important to point out that the Amax property was for sale on the open market through Ray Rankin Realty prior to the purchase by Dick Harris. Mr. Rankin personally contacted me last year concerning the availability of the Amax property. To suggest that a deal was made specifically for Mr. Harris to the exclusion of the public is inaccurate.

A major newspaper from Senator Harris' home district, the Evansville Press, investigated the allegations presented in the Wall Street Journal article. Their conclusions were published in an editorial on March 24, 1981, which stated:

Senator Harris and his partner, W. C. "Bud" Bussing, may have struck a good bargain in a relatively open land market. But evidence of a sweetheart deal could not be found.

The Press strongly endorsed Harris' nomination, and reiterated their findings in an article published last Sunday, July 5. Both articles are submitted for your further examination.

Dick Harris is not merely an honest and conscientious public servant. He is viewed in our State as an epitome of the qualities of integrity, and independence of judgment in public life. He will bring to the Office of Surface Mining a unique blend of technical expertise and legislative skills. I urge you to join me in enthusiastically endorsing his appointment.

Thank you for giving me this opportunity to share my thoughts with you.

I ask unanimous consent that the letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UNITED MINE WORKERS OF AMERICA,
Washington, D.C., January 19, 1981.

Mr. JAMES WATT,
Secretary of the Interior,
Main Interior Building,
Washington, D.C.

DEAR MR. SECRETARY: I am recommending that Indiana State Senator Richard Harris be appointed Director of Office of Surface Mining.

In meeting with Senator Harris, he has displayed a clear understanding of the Surface Mining Control & Reclamation Act of 1977, which will enable him to strike a clear balance between the protection of the environment and the need to mine coal in a responsible manner.

Senator Harris is unusually qualified for this position, since he is a geologist and a Senator from a state dominated by surface mining. Senator Harris wrote the original surface mining regulations for the State of Indiana, which were considered the best in the country at that time.

Hopefully Senator Harris will meet with your approval and be appointed to the Director of the Office of Surface Mining.

Sincerely,

SAM CHURCH, Jr.

UNITED MINE WORKERS OF AMERICA,
Terre Haute, Ind., January 28, 1981.

Senator RICHARD LUGAR,
Dirksen Building,
Washington, D.C.

DEAR SENATOR LUGAR: President Reagan will, in the next few days, appoint a new Director for the office of Surface Mining. We have been informed State Senator Richard Harris is being considered for this important position.

The United Mine Workers of America, along with the major coal producers in Indiana, would very much like to see a person

with Senator Harris' qualifications and knowledge of the mining industry receive this appointment.

Enclosed are copies of letters of our support for Senator Harris from Sam Church, Jr., President of the United Mine Workers of America, myself, the International Executive Board Member from Indiana and the State COMPAC (Coal Miners Political Action Committee) Council Chairman, Russell Stilwell.

The United Mine Workers of America and the Coal Operators here would very much appreciate any influence or assistance you might give on the behalf of State Senator Richard Harris towards this appointment.

Sincerely,

RANDALL CARTER,
I.E.B. Member.

UNITED MINE WORKERS OF AMERICA,
Terre Haute, Ind., January 9, 1981.

To Sam Church, President, United Mine Workers of America.

From Randall Carter, I.E.B. Member, Dist. 11.

DEAR SIRS AND BROTHERS: In a recent discussion with Russell Stilwell (Indiana COMPAC), it was brought to my attention that Richard Harris, Rep. State Senator from Indiana is being considered for an appointment as director of the office of Surface Mining under the Reagan Administration.

Senator Harris has been endorsed by Indiana COMPAC in each election year since 1970. Senator Harris is considered the most knowledgeable member of the Indiana Senate on mining. He represents a large portion of the United Mine Workers members in southern Indiana. He is a geologist by profession. He wrote the Indiana Strip Mining Bill prior to the Federal regulations being passed. It was considered as sound as the Federal regulations.

I think it appropriate, the United Mine Workers of America, highly recommend Sen. Richard Harris for the appointment to director of office of Surface Mining.

Sincerely and Fraternally,

RANDALL CARTER.

COAL MINERS POLITICAL
ACTION COMMITTEE,
January 9, 1981.

TOM TWOMEY,
Washington, D.C.

DEAR TOM: I would like to recommend to your department that you recommend Indiana State Senator Dick Harris by our organization for appointment of the director of the office of Surface Mining. As you know, Sen. Harris and a few other people are the top candidates for the job as considered by the Reagan Transition team.

Although too numerous to mention are the qualities of Harris, I would like to point out a few reasons why I feel it would be in our best interests to support Sen. Harris for the above position.

1. 1970–72, Republican Elected State Representative.

2. 1974, Lost reelection, endorsed by COMPAC.

3. 1976–80, Elected State Senator, endorsed by COMPAC.

4. 1980, Reelected State Senator, endorsed by COMPAC.

5. Geologist by profession.

6. Wrote the original strip mining regulations for Indiana. It was considered one of the best in the country.

7. Wrote and sponsored legislation for the largest single increase in workman's compensation in Indiana history.

8. Harris is from a mining family and mining community. The son and family of Harris are active UMWA members and former members.

9. The office and facilities of Dick Harris have always been open to the coal miners and the UMWA officials.

I sincerely hope you will consider my recommendation and that you can support the consideration of Sen. Harris for appointment to director of office of surface mining. I think it is in the best interest of our organization to publically support Dick Harris in this matter.

Thank you for your interest in this matter.

Sincerely,

RUSSELL STILWELL,
State Chairman.

MULZER CRUSHED STONE CO.,
Tell City, Ind., December 11, 1980.

Senator RICHARD LUGAR,
Russell Senate Office Building,
Washington, D.C.

DEAR DICK: We have learned that State Senator Richard Harris is under consideration by the Reagan administration for appointment to the post of Assistant Secretary of the Interior for Surface Mining.

Not only is Mr. Harris professionally qualified as a practicing graduate geologist with long field experience to understand and deal with critical technical areas covered by the Mining Enforcement and Reclamation Act administered by the Office of Surface Mining, but he is an experienced and effective legislator who understands legislative and administrative processes. He is a strong advocate of state's rights and an ardent supporter of the free enterprise system as well as the need to preserve and enhance environmental values.

We have worked closely with Mr. Harris for many years and are confident that, if anyone can, he would bring reasonable order and rational thinking to replace the chaos that is now O.S.M.

We heartily endorse him and urge you to actively support his nomination.

Please feel free to call on us for any help you may need.

Sincerely,

ARNOLD MULZER,
Partner.

MT. VERNON CHAMBER OF COMMERCE,
Mt. Vernon, Ind., April 21, 1981.

Hon. RICHARD G. LUGAR,
U.S. Senate,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR LUGAR: The Board of Directors of the Mt. Vernon Chamber of Commerce wishes to be on record as supporting State Senator James R. Harris for the position of Director of the Office of Surface Mining.

As constituents of Senator Harris, we feel compelled to relay to you our belief that Senator Harris is a man of integrity and honesty.

We look forward to Senator Harris's confirmation by the U.S. Senate, and we appreciate your efforts to that end.

Sincerely,

WAYNE R. STOVALL,
President.

LEESBURG, IND.,
March 19, 1981.

Hon. HOWARD BAKER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BAKER: Recent articles in the Lafayette Courier-Journal newspaper have carried articles about James R. Harris, President Reagan's choice for Director of the Office of Surface Mining, and possible conflicts of interest between Senator Harris and various coal mining companies. My purpose in writing is to tell you something of the association I have had with the Senator while dealing with the Indiana legislature during the time of my previous employment.

I am no longer associated with my previous employer, but during the past four years I had the pleasure of lobbying for conservation legislation and working with Senator Harris on this legislation. Sometimes the Senator and I were on opposite sides of the fence on certain issues and at other times we were in agreement. At all times I found the Senator to be open minded, fair, well prepared, and honest. I also found the Senator to have a well developed conservation ethic balanced with the realities of today's society. Although I may be ill-at-ease with some of the President's appointments, I believe the Senator to be an excellent choice for the job at OSM. I do not believe the Senator would allow himself to be unduly influenced on any matters over which he would have authority no matter where that source of influence should come from. This is based on my observations while working with the Senator and during several personal conversations I have enjoyed over the years.

Senator Harris possesses excellent credentials for this appointment. His educational background and his career experiences have prepared him well. His legislative experience should also stand him in good stead. If you could have observed, as I did, his masterful guidance of Indiana's strip mine law through the complex maze of the Indiana legislature I am sure you would agree.

I would appreciate it if you would make the chairman of the appropriate committee considering the Senator's appointment aware of my feelings in this matter. If I can be of any service to you please do not hesitate to call on me.

Sincerely,

JAMES E. RICE.

STATE OF INDIANA,
SENATE,
Indianapolis, Ind., March 23, 1981.

Hon. RICHARD G. LUGAR,
U.S. Senator,
Dirksen Office Building,
Washington, D.C.

DEAR SENATOR LUGAR: To the best of my knowledge and belief, Senator James R. Harris did not, in fact, either violate Indiana's laws concerning financial disclosure required of state legislators, or breach the ethics code of the Indiana Senate as a principal in land purchase from Peabody Coal Company or Meadowlark Farms (a subsidiary of Amax Coal).

Yours very truly,

ROBERT D. GARTON,
President pro tempore.

STATE OF INDIANA,
HOUSE OF REPRESENTATIVES,
Indianapolis, Ind., March 23, 1981.

Hon. RICHARD LUGAR,
Russell Building,
Washington, D.C.

DEAR SENATOR LUGAR: Much has been made recently in the local news media about the land acquisition by Dick Harris from Amax and Peabody Coal Companies. I think it important to point out that the Amax property was for sale on the open market through Ray Rankin Realty prior to the purchase by Dick Harris.

Mr. Rankin personally contacted me last year concerning the availability of the Amax property. To suggest that a deal was made specifically for Mr. Harris to the exclusion of the public is inaccurate.

I would be happy to discuss this matter further with you or any of your colleagues who might deem this issue to be relevant to the confirmation of Dick's appointment by the Senate.

Respectfully,

MICHAEL K. PHILLIPS,
Democratic House Leader.●

NOMINATION OF JAMES G. STEARNS— DEPARTMENT OF ENERGY

Mr. McCLURE. Mr. President, on July 21, the Committee on Energy and Natural Resources favorably reported the nomination of James G. Stearns to be Director of the Office of Alcohol Fuels in the Department of Energy. The vote

was 17 to 0. The committee's vote followed a nomination hearing held on July 9, 1981.

Mr. Stearns has served in various management and executive capacities at the State and county level in the State of California. In 1972, he was appointed secretary of the agriculture and services Agency and a member of the Governor's Cabinet by Governor Ronald Reagan. Prior to his appointment as a cabinet officer, Mr. Stearns served as director of the State Department of Conservation. From 1951 to 1967, he held the post of county supervisor for Modoc County. In 1965, he served as president of the Supervisors Association of California following terms as president of the Northern California County Supervisors Association and the Western Regional District of the National Association of Counties. Mr. Stearns also served as member and vice chairman of the California Klamath River Compact Commission.

Mr. Stearns has combined a career in farming and ranching with extensive experience as an agency administrator at the State level. He is well suited to assume responsibility for the Department of Energy's program to encourage the production and consumption of alcohol fuels.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I am pleased to recommend Senate approval of Mr. Stearns' nomination.

Mr. LAXALT. Mr. President, I strongly support the nomination of James G. Stearns for the position of Director of the Office of Alcohol Fuels in the Department of Energy. Jim has the unique combination of experience both in agriculture and government that will serve him well in this position. I am confident that he will make a vital contribution in the effort to develop a strong alcohol fuels industry.

No one can exaggerate the importance to our Nation's defense and economic security of finding cost-effective alternatives to imported oil. Alcohol fuels have demonstrated great potential as an alternative to petroleum. With intelligent cooperation between industry and Government, I am confident we will make great strides in this area.

Jim Stearns is the man to lead this effort. He has indicated his awareness of the need for a leading role of the private sector in developing alcohol fuels. As a farmer and rancher, he is particularly sensitive of the energy needs of American agriculture. As a member of the Reagan team, he is dedicated to implementing and enforcing the President's energy program.

Jim has served in many management capacities at the State and county level in California. From 1972 to 1975, Jim served as the secretary of Agriculture and services in California, under Governor Reagan. This office had jurisdiction over the State agencies handling agriculture, consumer affairs, industrial relations, general services and veterans affairs, and State personnel administrative functions. Over 13,000 State employees worked under his supervision.

From 1967 until 1972, Jim was the director of the California State Department of Conservation, again appointed by Governor Reagan. In this capacity he was responsible for the Divisions of Forestry, Mines and Geology, Oil and Gas, and Soil Conservation. By law, as director of the Department of Conservation, he also served on the California Air Resources Board, chaired the California Geothermal Resources Board, and was an ex-officio member of the Boards of Forestry, Soil Conservation, and Mines and Geology.

Clearly, this background will serve him well in his new capacity. More importantly, it will serve the country well James Stearns will make an excellent addition to the Department of Energy. I totally support the appointment.

NOMINATION OF WILLIAM BRADFORD REYNOLDS—DEPARTMENT OF JUSTICE

Mr. THURMOND. Mr. President, I rise today to state my support for Mr. William Bradford Reynolds to be Assistant Attorney General, Civil Rights Division, Department of Justice.

Mr. Reynolds graduated from Yale University in 1964 and earned his law degree at Vanderbilt University in 1967. Mr. Reynolds skillfully served as the assistant to the Solicitor General of the United States from 1970 to 1973. Presently, he is a litigation partner with the Washington, D.C., law firm of Shaw, Pittman, Potts and Trowbridge.

The Civil Rights Division is responsible for enforcing Federal civil rights laws which prohibit discrimination on the basis of race, national origin, religion, sex, age and physical disability. The major areas of concern are voting, education, employment, housing, credit, the use of public facilities, public accommodations, and in the administration of federally assisted programs.

The burdens upon Mr. Reynolds as head of the Civil Rights Division will be heavy. It will be incumbent upon him to be fair and just to all citizens. I am confident that if he is confirmed, he will act in an impartial manner and reflect great credit not only on himself, but on the Government which he serves. I urge my colleagues to support President Reagan's choice for Assistant Attorney General for the Civil Rights Division, Mr. William Bradford Reynolds.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate may return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, if I could ask for the cooperation of the minority leader again for a moment, there are certain items cleared on the Calendar of General Orders of legislative business on this side which we are prepared to proceed to for routine and consent passage.

Mr. President, they are Calender Order No. 178, S. 736, the Lacey Act Amendments of 1981; Calendar Order No. 200, S. 917, the veterans' compensation bill; and the following Calendar Order Nos. 210, 211, 212, 213, 214, 215, 222, and 223.

Mr. President, in addition to that I am prepared to ask unanimous consent, I advise the minority leader, that the Judiciary Committee be discharged from further consideration of House Joint Resolution 84 and ask for its immediate consideration and to indefinitely postpone Calendar Order No. 221.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed on the measures enumerated by the distinguished majority leader. The minority is ready to proceed.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask that the Chair lay before the Senate the items identified in the order suggested.

LACEY ACT AMENDMENTS OF 1981

The PRESIDING OFFICER. The first bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 736) to provide for the control of illegally taken fish and wildlife.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Environment and Public Works, with amendments, as follows:

On page 2, line 13, strike "(c)" and insert "(b)";

On page 2, line 18, strike "(d)", and insert "(c)";

On page 2, line 23, strike "(b)", and insert "(d)";

On page 2, line 23, strike "term 'foreign law' means", and insert the following: "terms 'law', 'treaty' and 'regulation' mean";

On page 2, line 24, after "laws,", insert "treaties";

On page 2, line 25, strike "of a foreign country"

On page 3, line 2, after "wildlife", insert the following: "or plants";

On page 5, line 11, after "exported,", insert "transported,";

On page 5, line 13, strike "shipped,";

On page 5, line 14, strike "or carried";

On page 6, line 5, after "who", insert the following: "engages in conduct prohibited by any provision of this Act (other than subsection 3(b) and";

On page 6, strike line 8, through "3(b)," on line 9, and insert the following: "the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty, or regulation,".

On page 7, line 12, after "offense", insert the following: "and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which a person may have taken or been in possession of the said fish or wildlife or plants.".

On page 9, strike line 14, through and including line 6 on page 10, and insert the following:

"(d) CRIMINAL PENALTIES.—

"(1) Any person who—

"(A) knowingly imports or exports any fish or wildlife or plants in violation of any provision of this Act (other than subsection 3(b)), or

"(B) violates any provision of this Act (other than subsection 3(b)) by knowingly engaging in conduct that involves the sale or purchase of, the offer of sale or purchase of, or the intent to sell or purchase, fish or

wildlife or plants with a market value in excess of $350,

knowing that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation, shall be fined not more than $20,000, or imprisoned for not more than five years, or both. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

"(2) Any person who knowingly engages in conduct prohibited by any provision of this Act (other than subsection 3(b)) and in the exercise of due care should know that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation shall be fined not more than $10,000, or imprisoned for not more than one year, or both, for the first offense and shall be fined not more than $20,000, or imprisoned for not more than five years, or both, for each offense committed after the initial conviction. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.".

On page 12, line 25, strike "or master";

On page 12, line 25, after "vessel,", insert "vehicle, aircraft,";

On page 12, line 25, strike "the", through and including "or" on page 13, line 2:

On page 13, line 3, after "thereto", insert the following "or in the exercise of due care should have known that such vessel, vehicle, aircraft, or equipment would be used in a criminal violation of this Act,".

On page 14, line 18, after "committed", insert the following: "or is committing";

On page 14, line 18, after "violation", insert the following: *Provided*, That an arrest for a felony violation of this Act that is not committed in the presence or view of any such person and that involves only the transportation, acquisition, receipt, purchase, or sale of fish or wildlife or plants taken or possessed in violation of any law or regulation of any State shall require a warrant; may make an arrest without a war."

On page 16, line 15, strike "1982,", and insert "1983,";

On page 16, line 17, strike "a penalty, fine," and insert the following: "penalties, fines";

On page 16, line 17, strike "forfeiture", and insert "forfeitures";

On page 16, line 20, after "to", insert "an arrest";

On page 16, line 25, strike "but", through and including the period on page 17, line 2;

On page 17, line 11, after "of", insert the following: "subsections 4(b) and 4(e) and";

On page 18, line 4, strike "subsection (a) (1) of section 3", and insert the following: "paragraph (1) of subsection 3(a)";

On page 18, line 23, strike "subsection (a) (2) of section 3", and insert the following: "paragraph (2) of subsection 3(a)";

On page 20, line 10, strike "Amendment", and insert "Amendments";

On page 20, line 15, strike "a penalty, fine,", and insert the following: "penalties, fines";

On page 20, line 15, strike "forfeiture", and insert "forfeitures";

On page 20, line 23, strike "But", through and including the period on line 25; and

On page 21, line 6, strike "1982", and insert "1983".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Lacey Act Amendments of 1981.".

SEC. 2. DEFINITIONS.

For the purposes of this Act:

(a) The term "fish or wildlife" means any wild animal, whether alive or dead, including without limitation any wild mammal, bird, reptile, amphibian, fish, mollusk, crustacean, arthopod, coelenterate or other invertebrate whether or not bred, hatched, or born in captivity, and includes any part, product, egg, or offspring thereof.

(b) The term "import" means to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(c) The term "Indian tribal law" means any regulation of, or other rule of conduct enforceable by, any Indian tribe, band, or group but only to the extent that the regulation or rule applies within Indian country as defined in section 1151 of title 18, United States Code.

(d) The terms "law," "treaty," and "regulation," means laws, treaties, or regulations which regulate the taking, possession, importation, exportation, transportation, or sale of fish or wildlife or plants.

(e) The term "person" includes any individual, partnership, association, corporation, trust, or any officer, employee, agent, department, or instrumentality of the Federal Government or of any State or political subdivision thereof, or any other entity subject to the jurisdiction of the United States.

(f) The terms "plant" and "plants" mean any wild member of the plant kingdom, including roots, seeds, and other part thereof (but excluding common food crops and cultivars) which is indigenous to any State and which is either (A) listed on an appendix to the Convention on International Trade in Endangered Species of Wild Fauna and Flora, or (B) listed pursuant to any State law that provides for the conservation of species threatened with extinction.

(g) The term "Secretary" means, except as otherwise provided in the Act, the Secretary of the Interior or the Secretary of Commerce, as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970 (84 Stat. 2090); except that with respect to the provisions of this Act which pertain to the importation or exportation of plants the term means the Secretary of Agriculture.

(h) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Northern Mariana Islands, American Samoa, and any other territory, commonwealth, or possession of the United States.

(i) The term "taken" means captured, killed, or collected.

(j) The term "transport" means to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

SEC. 3. PROHIBITED ACTS.

(a) OFFENSES OTHER THAN MARKING OFFENSES.—It is unlawful for any person—

(1) to import, export, transport, sell, receive, acquire, or purchase any fish or wildlife or plant taken or possessed in violation of any law, treaty, or regulation of the United States or in violation of any Indian tribal law;

(2) to import, export, transport, sell, receive, acquire, or purchase in interstate or foreign commerce—

(A) any fish or wildlife taken, possessed, transported, or sold in violation of any law or regulation of any State or in violation of any foreign law, or

(B) any plant taken, possessed, transported, or sold in violation of any law or regulation of any State;

(3) within the special maritime and territorial jurisdiction of the United States (as defined in section 7 of title 18, United States Code)—

(A) to possess any fish or wildlife taken, possessed, transported, or sold in violation of any law or regulation of any State or in violation of any foreign law or Indian tribal law, or

(B) to possess any plant taken, possessed, transported, or sold in violation of any law or regulation of any State;

(4) having imported, exported, transported, sold, purchased, or received any fish or wildlife or plant imported from any foreign country or transported in interstate or foreign commerce, to make or submit any false record, account, label, or identification thereof; or

(5) to attempt to commit or solicit another to commit any act described in paragraph (1) through (4).

(b) MARKING OFFENSES.—It is unlawful for any person to import, export, or transport in interstate or foreign commerce any container or package containing any fish or wildlife unless the container or package has previously been plainly marked, labeled, or tagged in accordance with the regulations issued pursuant to paragraph (2) of subsection 7(a) of this Act.

SEC. 4. PENALTIES AND SANCTIONS

(a) CIVIL PENALTIES.

(1) Any person who engages in conduct prohibited by any provision of this Act (other than subsection 3(b)) and in the exercise of due care should know that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty, or regulation, may be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation: *Provided*, That when the violation involves fish or wildlife or plants with a market value of less than $350, and involves only the transportation, acquisition, or receipt of fish or wildlife or plants taken or possessed in violation of any law, treaty, or regulation of the United States, any Indian tribal law, any foreign law, or any law or regulation of any State, the penalty assessed shall not exceed the maximum provided for violation of said law, treaty or regulation, or $10,000, whichever is less.

(2) Any person who violates subsection 3(b) may be assessed a civil penalty by the Secretary of not more than $250.

(3) For purposes of paragraphs (1) and (2), any reference to a provision of this Act or to a section of this Act shall be treated as including any regulation issued to carry out any such provision or section.

(4) No civil penalty may be assessed under this subsection unless the person accused of the violation is given notice and opportunity for a hearing with respect to the violation. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which a person may have taken or been in possession of the said fish or wildlife or plants.

(5) Any civil penalty assessed under this subsection may be remitted or mitigated by the Secretary.

(6) In determining the amount of any penalty assessed pursuant to paragraphs (1) and (2), the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited act committed, and with respect to the violator, the degree of culpability, ability to pay, and such other matters as justice may require.

(b) HEARINGS.—Hearings held during proceedings for the assessment of civil penalties shall be conducted in accordance with section 554 of title 5, United States Code. The

administrative law judge may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, or documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena issued pursuant to this paragraph and served upon any person, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the administrative law judge or to appear and produce documents before the administrative law judge, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(c) REVIEW.—Any person against whom a civil penalty is assessed under this section may obtain review thereof in the appropriate district court of the United States by filing a notice of appeal in such court within thirty days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28, United States Code. If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary may request the Attorney General of the United States to institute a civil action in an appropriate district court of the United States to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

(d) CRIMINAL PENALTIES.—

(1) Any person who—

(A) knowingly imports or exports any fish or wildlife or plants in violation of any provision of this Act (other than subsection 3(b)), or

(B) violates any provision of this Act (other than subsection 3(b)) by knowingly engaging in conduct that involves the sale or purchase of, the offer of sale or purchase of, or the intent to sell or purchase, fish or wildlife or plants with a market value in excess of $350.

knowing that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation, shall be fined not more than $20,000, or imprisoned for not more than five years, or both. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

(2) Any person who knowingly engages in conduct prohibited by any provision of this Act (other than subsection 3(b)) and in the exercise of due care should know that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation shall be fined not more than $10,000, or imprisoned for not more than one year, or both, for the first offense and shall be fined not more than $20,000, or imprisoned for not more than five years, or both, for each offense committed after the initial conviction. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

(e) PERMIT SANCTIONS.—The Secretary may also suspend, modify, or cancel any Federal hunting or fishing license, permit, or stamp, or any license or permit authorizing a person to import or export fish or wildlife or plants (other than a permit or license issued pursuant to the Fishery Conservation and Management Act of 1976), or to operate a quarantine station or rescue center for imported wildlife or plants, issued to any person who is convicted of a criminal violation of any provision of this Act or any regulation issued hereunder. The Secretary shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension, or revocation of any licenses, permits, stamps, or other agreements pursuant to this section.

SEC. 5. FORFEITURE.

(a) IN GENERAL.—

(1) All fish or wildlife or plants imported, exported, transported, sold, received, acquired, or purchased contrary to the provisions of section 3 of this Act (other than subsection 3(b)), or any regulation issued pursuant thereto, shall be subject to forfeiture to the United States notwithstanding any culpability requirements for civil penalty assessment or criminal prosecution included in section 4 of this Act.

(2) All vessels, vehicles, aircraft, and other equipment used to aid in the importing, exporting, transporting, selling, receiving, acquiring, or purchasing of fish or wildlife or plants in a criminal violation of this Act for which a felony conviction is obtained shall be subject to forfeiture to the United States if (A) the owner of such vessel, vehicle, aircraft, or equipment was at the time of the alleged illegal act a consenting party or privy thereto or in the exercise of due care should have known that such vessel, vehicle, aircraft, or equipment would be used in a criminal violation of this Act, and (B) the violation involved the sale or purchase of, the offer of sale or purchase of, or the intent to sell or purchase, fish or wildlife or plants.

(b) APPLICATION OF CUSTOMS LAWS.—All provisions of law relating to the seizure, forfeiture, and condemnation of property for violation of the customs laws, the disposition of such property or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department may, for the purposes of this Act, also be exercised or performed by the Secretary or by such persons as he may designate, *Provided*, That any warrant for search or seizure shall be issued in accordance with rule 41 of the Federal Rules of Criminal Procedure.

(c) STORAGE COST.—Any person convicted of an offense, or assessed a civil penalty, under section 4 shall be liable for the costs incurred in the storage, care, and maintenance of any fish or wildlife or plant seized in connection with the violation concerned.

SEC. 6. ENFORCEMENT.

(a) IN GENERAL.—The provisions of this Act and any regulations issued pursuant thereto shall be enforced by the Secretary, the Secretary of Transportation, or the Secretary of the Treasury. Such Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency or Indian tribe for purposes of enforcing this Act.

(b) POWERS.—Any person authorized under subsection (a) to enforce this Act may carry firearms; may make an arrest without a warrant for any felony violation of this Act if he has reasonable grounds to believe that the person to be arrested has committed or is committing such violation, *Provided*, That an arrest for a felony violation of this Act that is not committed in the presence or view of any such person and that involves only the transportation, acquisition, receipt, purchase, or sale of fish or wildlife or plants taken or possessed in violation of any law or regulation of any State shall require a warrant; may make an arrest without a warrant for a misdemeanor violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing a violation in his presence or view; and may execute and serve any subpena, arrest warrant, search warrant issued in accordance with rule 41 of the Federal Rules of Criminal Procedure, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Any person so authorized, in coordination with the Secretary of the Treasury, may detain for inspection and inspect any vessel, vehicle, aircraft, or other conveyance or any package, crate, or other container, including its contents, upon the arrival of such conveyance or container in the United States or the customs waters of the United States from any point outside the United States or such customs waters, or, if such conveyance or container is being used for exportation purposes, prior to departure from the United States or the customs waters of the United States. Such person may also inspect and demand the production of any documents and permits required by the country of natal origin, birth, or reexport of the fish or wildlife. Any fish, wildlife, plant, property, or item seized shall be held by any person authorized by the Secretary pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, plants, property, or item pursuant to section 5 of this Act; except that the Secretary may, in lieu of holding such fish, wildlife, plant, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(c) DISTRICT COURT JURISDICTION.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. The venue provisions of title 18 and title 28 of the United States Code shall apply to any actions arising under this Act. The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulations issued thereunder.

(d) REWARDS.—Beginning in fiscal year 1983, the Secretary or the Secretary of the Treasury shall pay a reward from sums received as penalties, fines, or forfeitures of property for any violation of this Act or any regulation issued hereunder to any person who furnishes information which leads to an arrest, a criminal conviction, civil penalty assessment, or forfeiture of property for any violation of this Act or any regulation issued hereunder. The amount of the reward, if any, is to be designated by the Secretary or the Secretary of the Treasury, as appropriate. Any officer or employee of the United States or any State or local government who furnishes information or renders service in the performance of his official duties is ineligible for payment under this subsection.

SEC. 7. ADMINISTRATION.

(a) REGULATIONS.—

(1) The Secretary, after consultation with the Secretary of the Treasury, is authorized to issue such regulations, except as provided in paragraph (2), as may be necessary to carry out the provisions of subsections 4(b) and 4(e) and section 5 of this Act.

(2) The Secretaries of the Interior and Commerce shall jointly promulgate specific regulations to implement the provisions of subsection 3(b) of this Act for the marking and labeling of containers or packages containing fish or wildlife in interstate or foreign commerce. These regulations shall be in accordance with existing commercial practices.

(b) CONTRACT AUTHORITY.—To the extent and in the amounts provided in advance in appropriations Acts, the Secretary may enter into such contracts, leases, cooperative agreements, or other transactions with any Federal or State agency, Indian tribe, public or private institution, or other person, as may be necessary to carry out the purposes of this Act.

SEC. 8. EXCEPTIONS.

(a) The provisions of paragraph (1) of subsection 3(a) of this Act shall not apply to any activity regulated by a fishery management plan in effect under the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.);

(b) The provisions of paragraphs (1), (2)(A), and (3)(A) of subsection 3(a) of this Act shall not apply to—

(1) any activity regulated by the Tuna Conventions Act of 1950 (16 U.S.C. 951–961) or the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971–971(h)); or

(2) any activity involving the harvesting of highly migratory species (as defined in paragraph (14) of Section 3 of the Fishery Conservation and Management Act of 1976) taken on the high seas (as defined in paragraph (13) of such section 3) if such species are taken in violation of the laws of a foreign nation and the United States does not recognize the jurisdiction of the foreign nation over such species;

(c) The provisions of paragraph (2) of subsection 3(a) of this Act shall not apply to the interstate shipment or transshipment through a State of any fish or wildlife or plant legally taken if the shipment is enroute to a State in which the fish or wildlife or plant may be legally possessed.

SEC. 9. MISCELLANEOUS PROVISIONS.

(a) EFFECT ON POWERS OF STATES.—Nothing in this Act shall be construed to prevent the several States or Indian tribes from making or enforcing laws or regulations not inconsistent with the provisions of this Act.

(b) REPEALS.—The following provisions of law are repealed:

(1) The Act of May 20, 1926 (commonly known as the Black Bass Act; 16 U.S.C. 851–856).

(2) Section 5 of the Act of May 25, 1900 (16 U.S.C. 667e), and sections 43 and 44 of title 18, United States Code (commonly known as provisions of the Lacey Act).

(3) Sections 3054 and 3112 of title 18, United States Code.

(c) DISCLAIMERS.—Nothing in this Act shall be construed as—

(1) repealing, superseding, or modifying any provision of Federal law other than those specified in subsection (b);

(2) repealing, superseding, or modifying any right, privilege, or immunity granted, reserved, or established pursuant to treaty, statute, or executive order pertaining to any Indian tribe, band, or community; or

(3) enlarging or diminishing the authority of any State or Indian tribe to regulate the activities of persons within Indian reservations.

(d) HUMANE SHIPMENT.—Subsection 42(c) of title 18, United States Code, is amended by striking "Secretary of the Treasury" and inserting in lieu thereof "Secretary of the Interior within one hundred and eighty days of the enactment of the Lacey Act Amendments of 1981".

(e) REWARD.—Subsection 11(d) of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended to read as follows:

"(d) REWARD.—The Secretary or the Secretary of the Treasury shall pay a reward from sums received as penalties, fines, or forfeitures of property for any violation of this Act or any regulation issued hereunder to any person who furnishes information which leads to an arrest, a criminal conviction, civil penalty assessment, or forfeiture of property for any violation of this Act or any regulation issued hereunder. The amount of the reward, if any, is to be designated by the Secretary or the Secretary of the Treasury, as appropriate. Any officer or employee of the United States or any State or local government who furnishes information or renders service in the performance of his official duties is ineligible for payment under this subsection.".

(f) The amendment specified in subsection (9)(e) of this Act shall take effect beginning in fiscal year 1983.

(g) The Secretary of the Interior is authorized to pay from agency appropriations the travel expense of newly appointed special agents of the United States Fish and Wildlife Service and the transportation expense of household goods and personal effects from place of residence at time of selection to first duty station to the extent authorized by section 5724 of title 5 for all such special agents appointed after January 1, 1977.

SEC. 10.

The Secretary shall identify the funds utilized to enforce this Act and any regulations thereto as a specific appropriations item in the Department of the Interior appropriations budget proposal to the Congress.

Mr. BAKER. Mr. President, I ask unanimous consent that all the committee amendments be agreed to en bloc and treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 109

(Purpose: To eliminate a mandatory second offender felony provision and for other purposes)

Mr. BAKER. Mr. President, there is an amendment No. 109 at the desk introduced by the distinguished Senator from Rhode Island (Mr. CHAFEE), the Senator from Idaho (Mr. MCCLURE), and the Senator from Tennessee. I call up that amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) on behalf of Mr. CHAFEE (for himself, Mr. CHAFEE and Mr. MCCLURE), proposes an amendment numbered 109.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 21, strike out "or foreign".

On page 11, beginning with line 11 down through line 14, strike out ", for the first offense and shall be fined not more than $20,000, or imprisoned for not more than five years, or both, for each offense committed after the initial conviction".

On page 17, beginning with line 11 down through line 12, strike out "subsections 4(b) and 4(e)" and insert in lieu thereof "section 4".

On page 17, line 17, strike out "in interstate or foreign commerce".

On page 18, line 25, insert "Indian country as defined in section 1151 of title 18, United States Code, or" before "a State".

On page 17, line 20, strike out "To" and insert in lieu thereof "Beginning in fiscal year 1983, to".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (No. 109) was agreed to.

UP AMENDMENT NO. 293

(Purpose: Technical amendments)

Mr. BAKER. Mr. President, there is a technical amendment that I send to the desk for myself and on behalf of the Senator from Rhode Island (Mr. CHAFEE) and the Senator from South Carolina (Mr. THURMOND), and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for himself, and Mr. CHAFEE, and Mr. THURMOND, proposes an unprinted amendment numbered 293.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 24, strike out "and "regulation" " and insert in lieu thereof " "regulation," and "Indian tribal law" ".

On page 2, line 24, strike out "or" and on line 25, insert "or Indian tribal laws" before "which".

On page 5, lines 17–18, strike out "or solicit another to commit".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 293) was agreed to.

● Mr. CHAFEE. Mr. President, today we are considering S. 736, a bill to provide for the control of illegally taken fish and wildlife. Known as the Lacey Act Amendments of 1981, this legislation represents a major effort to provide for the effective enforcement of existing fish and wildlife conservation laws.

The need for such a bill was well-documented in hearings held before the Committee on Environment and Public Works on April 1 of this year, as well as during the 96th Congress. We heard from every group that sought to testify on this legislation and the support for a bill that will provide the tools needed to effectively control the massive illegal trade in fish, wildlife and plants was unanimous. The committee accepted many recommendations of the witnesses and made a number of changes in the bill in response to the testimony received during the course of our hearings.

As amended and reported by the Com-

mittee on Environment and Public Works, the bill has the strong support of numerous groups such as the International Association of Fish and Game Agencies, the Wildlife Management Institute, the National Wildlife Federation, the National Rifle Association, and a host of environmental groups. The appeal of this bill transcends traditional ideological barriers and there is no significant opposition to it. Cosponsors of the bill include Senators BAKER, MCCLURE, STAFFORD, RANDOLPH, DECONCINI, GORTON, MOYNIHAN, TSONGAS, WALLOP, PELL, CRANSTON, MATHIAS, MELCHER, and HAYAKAWA. The bill addresses a very real problem—the rising tide of illegal trade in fish, wildlife, and plants—and does so in a manner that provides safeguards against indiscriminate enforcement efforts.

As I noted on March 19, 1981, when S. 736 was introduced, this legislation will correct present insufficiencies in both the Lacey and Black Bass Acts and combine them into one statute to promote public understanding and simplify administration and enforcement.

First, it will raise both the civil and criminal penalties of the current laws and target commercial violators and international traffickers.

Second, the current Black Bass Act does not prohibit interstate transportation of fish into a State that prohibits their entry. As an example, California strongly objects to shipments of live white amur carp into that State. California has no remedy against the shipper in another State, and the Federal Government cannot intervene in California's behalf under the present law. This problem is solved by S. 736.

Third, the bill will extend coverage to the full range of species protected by State, foreign, and Federal law. For example, it will extend the protection of the Lacey Act to plants for the first time. The State of Arizona harvests $1.8 million worth of plants each year under a permit system. Arizona estimates another one-third to one-half of that volume is taken illegally. With only six investigators to control the traffic, their task is nearly impossible. Interstate traffic is increasing because major markets outside the State offer double, and sometimes triple or quadruple the price offered within the State. The assistance of the Federal Government is needed to control this traffic.

S. 736 also corrects statutory provisions to allow for the rewards from the proceeds of fines collected. Although this was intended by the Congress in the past, the statutory language that was used prevented the payment of such rewards from fine moneys by the Federal agencies charged with enforcement of fish and wildlife laws.

Finally, S. 736 will permit relaxation of the previous rigid provisions for the marking of containers in which fish or wildlife are shipped. Under this bill the Secretaries of Interior and Commerce shall promulgate joint regulations regarding marking which are consonant with the practices of industry and which satisfy the needs of enforcement officers.

Mr. President, the most significant change made by the Committee on Environment and Public Works following hearings on this bill concerns the criminal penalty provision. To distinguish criminal violations of the act that warrant a felony punishment scheme from those that do not, the original version of S. 736 provided for felony punishment in all import or export cases and in all other cases that involved fish or wildlife or plants with a value in excess of $350. A misdemeanor penalty scheme was established for the remaining cases. Testimony received at the April 1, 1981, hearing on S. 736, however, noted that the use of a valuation test to distinguish felonies from misdemeanors has several shortcomings.

In a successful attempt to address the concerns that were expressed at the hearing, the committee rewrote the criminal penalty section of the bill to target the most serious offenses such as commercial violations and violations which involve international trafficking. In addition to the nature of the activity involved, the culpability standard is used to distinguish felonies from misdemeanors. The bill now provides for felony punishment in all cases involving specific intent—knowledge of the underlying law—and first, import or export; or second, commercial activities. General intent violations are misdemeanors unless it is the defendant's second offense.

The inclusion of a second-offender felony provision was based upon the premise that repeat offenders should be dealt with more harshly for unlawful acts committed after an initial conviction. Such offenders cannot deny knowledge of the serious nature of their offense. Nevertheless, upon further consideration of the issue, it appears that felony punishment may not be warranted for all second offenders. A person who exceeds his bag limit by one bird on two occasions probably does not deserve felony punishment. For this reason, Senators BAKER, MCCLURE, and I offer an amendment to S. 736 that will delete that provision.

Deletion of the second-offender felony provision should not be interpreted to suggest that second offenders are not to be dealt with harshly. Sentencing of repeat offenders should reflect the congressional judgment that such offenses are extremely serious and must be deterred. The sentencing should also deprive the offenders of their ill-gotten gains. Although felony punishment may not be warranted for all second offenses, the premise that repeat offenders should be dealt with more harshly for unlawful conduct committed after an initial conviction is still valid and is mean to be incorporated into this legislation.

The balance of amendment No. 109 is in the nature of a technical and clarifying amendment. First, the Department of State has recommended that sections 3(b) and 7(a)(2) be amended to clarify that the "marking offenses" provision of the bill and the regulations that will be promulgated to govern the marking of containers and packages will not be applicable to containers and packages which do not enter the United States. As currently drafted, persons could engage in conduct which is completely legal under the laws of a foreign country or countries exclusively involved and yet is illegal by virtue of the marking regulations promulgated in this country. This would not be appropriate and the amendment corrects this.

Second, the Office of Management and Budget has noted that the section 7 grant of authority to promulgate regulations must include the authority to issue regulations concerning the penalty assessment process and not just the hearings and permit sanctions processes. The amendment corrects this problem as well.

Third, the amendment clarifies that the section 8 exception for interstate transhipments of legally taken wildlife applies to transhipments through Indian country as well as through States. The intent of subsection 8(c), as set forth in the report (97–123), is not altered by this amendment.

The unprinted amendment that Senators BAKER, THURMOND, and I are offering today makes technical corrections to two sections of the bill. On May 21, this bill was referred to the Committee on the Judiciary, of which our learned colleague, Senator THURMOND, is chairman. Although that committee took no formal action, the amendments offered today are offered on the able advice of Senator THURMOND.

The amendment to subsection 2(d) clarifies that the term "law," as used in this bill, has the same meaning whether we are referring to a law of the United States, a law of a State, a foreign law, or an Indian tribal law.

The amendment to paragraph 5 of subsection 3(a) deletes specific reference to the offense of "solicitation." It is a serious offense to solicit another to commit a violation of the law and people who do so deserve to be severely punished. Nevertheless, separate reference to the offense of "solicitation" in this bill is unnecessary and duplicative of 18 U.S.C. 2(a). That subsection provides, inter alia, that whoever induces or procures the commission of an offense against the United States is punishable as a principal. As such, anyone who solicits another to commit an act that violates this act shall be subject to the full range of penalties provided for in the act.

In summation, Mr. President, I believe that the legislation before us today is a welcome and needed addition to existing wildlife law. It will undoubtedly help the States in their efforts to protect, conserve, and manage wildlife. It will provide the needed enforcement tools to the Federal agencies that have responsibility for wildlife law enforcement, including the Fish and Wildlife, the National Marine Fisheries, the Animal Plant Health Inspection Services and, when international trade is involved, prior to actual entry, at the time of entry into this country and afterward, the Customs Service. Each of these agencies, as well as the Department of Justice, is expected to aggressively pursue and prosecute violations of this act.

We cannot expect the illegal trade in wildlife to go away by itself. The profits are too high and the threat of punish-

ment is too low. Only when Congress and the Executive work together, Congress by enacting this legislation and the Executive by vigorously enforcing it, can we expect to effectively attack and control the massive, illegal trade in wildlife. For these reasons, I urge my colleagues to support this legislation.●

Mr. THURMOND. Mr. President, the Senate considers today a measure, S. 736, which is a bill to amend the Lacey Act. It has been reported by the Committee on Environment and Public Works and was referred to the Committee on the Judiciary for 30 calendar days.

This bill is an effort to put teeth into the Lacey Act, which is the Federal law covering illegally taken fish and wildlife. S. 736 expands the coverage of the Lacey Act and combines several Federal laws in this area that are currently on the books. More importantly, however, S. 736 raises the penalties for certain Lacey Act violations from misdemeanors to felonies.

Mr. President, I want the record to show that I am firmly behind the underlying purpose of this legislation which is to give the Federal Government stronger enforcement tools to stop the large-scale importation and taking of fish and game either considered by the United States as an endangered species or which enjoy protection under other foreign, State, or local laws.

The Lacey Act is an important law, especially to the U.S. Fish and Wildlife Service, which is charged with the difficult responsibility of enforcing Lacey Act violations. The amendments being considered by the Senate today are intended to give that agency greater authority to carry out these enforcement activities.

Now, as I was at the close of the session of Congress last year, I am again concerned that in our zeal to strengthen the Lacey Act, we not go too far in subjecting innocent individuals, who have no requisite intent to violate the law, to Federal felony liability. Congress must proceed carefully whenever it proposes to use violations of underlying State, foreign, and tribal laws to obtain Federal Lacey Act jurisdiction, and thus subjecting a defendant to felony-level penalties for such violations.

The Senate Committee on the Judiciary has had under consideration in past years, and is again considering, the reform of the Federal criminal laws. We have looked at this problem of so-called piggy-back jurisdiction in the context of that legislation. Repeatedly, we have been told by witnesses, especially from the civil liberties community, that it is dangerous to use violations of State and local laws to trigger Federal jurisdiction. Thus, we have been careful in the Judiciary Committee to consider carefully the necessity to invoke the interest of the Federal Government in areas where perhaps the States have had, and should continue to have, jurisdiction.

The committee has concluded, of course, that there are areas, such as drug trafficking, labor violence, organized crime activities, pornography, and certain white-collar crimes, where Federal jurisdiction should be asserted. I am sure that the Congress is correct in determining that the Lacey Act is an area where the Federal Government ought to have increased enforcement powers. This power should be granted, however, with adequate safeguards for individuals who may not be aware of the Federal liability they are exposed to under the Lacey Act.

Mr. President, it was this concern that caused me to hold up this legislation last year and to request referral to the Committee on the Judiciary this year. I acknowledge that a number of amendments were offered in the Committee on Environment and Public Works that addressed some of my concerns. Several additional amendments have been agreed to by the managers of the bill, the distinguished Senator from Rhode Island (Mr. CHAFEE) and the able majority leader (Mr. BAKER), which further correct problems I found with S. 736 as introduced. I refer particularly to the exclusion of solicitation as a separate violation of the Lacey Act. I think it goes too far to prosecute someone for soliciting another to violate an Indian tribal custom or rule.

Mr. President, I do not object to the consideration of this legislation. I understand there is some concern about provisions on the importation and exportation of wildlife and fish in and out of Alaska by the Senators from that State. I share their concerns that Americans who go to that great outdoors State for legal hunting and fishing should not be harassed needlessly by the Fish and Wildlife Service where there is no specific intent to violate the Lacey Act.

Mr. President, I appreciate the understanding and cooperation of the managers of this legislation in accommodating some of my concerns about this bill.

Mr. BAKER. Mr. President, this bill will amend and improve two of the Nation's most important wildlife protection laws, the Lacey Act and the Black Bass Act. The Lacey Act was one of the first Federal wildlife laws. Passed in 1900, it outlawed interstate traffic in birds and other animals illegally killed in their State of origin. It was aimed at so-called pothunters—people who killed large amounts of wildlife for sale, and was viewed not as increasing the Federal role in managing wildlife but as a Federal tool to aid States in enforcing their own laws concerning wildlife. With several amendments, its coverage expanded to include wildlife taken in violation of foreign laws as well as State law. The Black Bass Act of 1926 was based on the same philosophy as the Lacey Act. It provided Federal actions against interstate transportation of black bass taken, purchased, sold, or possessed in violation of State laws. It was also subsequently expanded to cover all fishes and was amended in 1969 to encompass foreign commerce and fish taken, bought, sold, or possessed in violation of foreign law.

Although both the Lacey Act and the Black Bass Act have been amended in the past, a number of problems have developed that have limited their effectiveness as wildlife law enforcement tools. In addition, having two statutes with differing enforcement and penalty provisions makes little sense when the problems encountered in the control of illegal commerce in fish are nearly identical to those encountered in the control of illegal commerce in wildlife.

The legislation which is being considered today is, in addition, aimed at stemming the rising tide of illegal traffic in fish, wildlife, and plants. It will provide the tools which are needed to combat and control the massive illegal trade in fish, wildlife, and plants, that threatens the survival of numerous species, threatens the welfare of our agricultural and pet industries, and imposes untold costs on the American taxpayer. The criminal element involved and the financial incentives provided by this trade can only be countered by strong disincentives. The proposed Lacey Act Amendments of 1981 are an extremely important step in this direction.

It is reliably estimated that the illegal trade in wildlife alone amounts to as much as $100 million a year. Much of this trade is accomplished by false and fraudulent documents which must accompany wildlife imports. However, a substantial percentage is accomplished through outright smuggling. In Texas, for example, it was estimated that 25,000 to 50,000 parrots were smuggled across the Mexican border in 1979. Profits on illegal shipments of wildlife are staggering. At a recent trial it was revealed that one species of reptile purchased for $10 a pair were sold for $550 a pair. The volume of the trade is equally staggering. One recent investigation indicates that the illegal trade in a single species of bird during a 6-month period in southern California totaled $2 to $5 million.

The economic consequences of this illegal trade are also severe. It directly threatens America's agriculture and pet industries and indirectly burdens individual taxpayers. Imported wildlife carry diseases that can affect poultry, livestock, fish, and pets. An outbreak of Newcastle disease, carried by exotic birds and fatal to domestic poultry, in California in 1971 cost the Federal taxpayer $56 million. In 1979, 14,000 pet birds exposed to the disease had to be killed at a cost of $2 million to the Federal Government. In mid-September 1980, a particularly deadly strain of exotic Newcastle disease was diagnosed at a wholesale pet bird establishment in Miami, Fla.

Shipments of approximately 20,000 birds from the Miami wholesaler were traced by the Federal Government to 45 States, the District of Columbia, the U.S. Virgin Islands, Canada, and the Bahamas. The cost of that outbreak is expected to run into the millions of dollars. Department of Agriculture officials have estimated that if the disease becomes established in the United States, the yearly losses would amount to $230 million or more in 1975 dollars. Furthermore, the spread of the disease to domestic wildlife could be catastrophic.

Illegal trade is not restricted to wildlife. Similar heavy profits are being made in illegal fish which move in the channels of commerce. Those of you who have purchased fresh salmon recently must realize the potential profits to those who unlawfully net our Western rivers. A pickup truck with overload

springs can quickly move $10,000 worth of illegal salmon across State lines to rendezvous with a buyer of illegal fish. Hundreds of tons of illegal salmon move from Western rivers to cities clear across the country and to Japan. Thousands of tons of illegal fish flow from the Midwest and the Great Lakes to markets in Midwestern and Eastern cities. A $200 penalty as provided in the present Black Bass Act is not providing a deterrent to those violators who can net many thousands of dollars by trafficking in illegal fish.

The Lacey and Black Bass Acts are in many ways our most important wildlife laws, since they control trade in thousands of species protected by State and foreign laws. Congressman Lacey had a great idea and he gave this Nation a means of preserving the precious heritage of fish and wildlife which enriches life for us all. But times change and improvements are needed. World commerce in wildlife has become an enormous business and we must adapt Congressman Lacey's great law to the age in which we live.

S. 736 will correct the present insufficiencies in both the Lacey and Black Bass Acts and combine them into one statute to simplify administration and enforcement and promote public understanding. As Senator CHAFEE notes, the Federal agencies that have responsibility for wildlife law enforcement, including the customs service, are expected to aggressively pursue and prosecute violations of wildlife laws. We must see to it that Federal wildlife laws keep pace with the times and can be effectively enforced. For these reasons, I urge my colleagues to support this legislation.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 736), as amended, was passed.

S. 736

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Lacey Act Amendments of 1981".

SEC. 2. DEFINITIONS.

For the purposes of this Act:

(a) The term "fish or wildlife" means any wild animal, whether alive or dead, including without limitation any wild mammal, bird, reptile, amphibian, fish, mollusk, crustacean, arthropod, coelenterate, or other invertebrate, whether or not bred, hatched, or born in captivity, and includes any part, product, egg, or offspring thereof.

(b) The term "import" means to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(c) The term "Indian tribal law" means any regulation of, or other rule of conduct enforceable by, any Indian tribe, band, or group but only to the extent that the regulation or rule applies within Indian country as defined in section 1151 of title 18, United States Code.

(d) The terms "law," "treaty," "regulation," and "Indian tribal law" mean laws, treaties, regulations or Indian tribal laws which regulate the taking, possession, importation, exportation, transportation, or sale of fish or wildlife or plants.

(e) The term "person" includes any individual, partnership, association, corporation, trust, or any officer, employee, agent, department, or instrumentality of the Federal Government or of any State or political subdivision thereof, or any other entity subject to the jurisdiction of the United States.

(f) The terms "plant" and "plants" mean any wild member of the plant kingdom, including roots, seeds, and other parts thereof (but excluding common food crops and cultivars) which is indigenous to any State and which is either (A) listed on an appendix to the Convention on International Trade in Endangered Species of Wild Fauna and Flora, or (B) listed pursuant to any State law that provides for the conservation of species threatened with extinction.

(g) The term "Secretary" means, except as otherwise provided in the Act, the Secretary of the Interior or the Secretary of Commerce, as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970 (84 Stat. 2090); except that with respect to the provisions of this Act which pertain to the importation or exportation of plants the term means the Secretary of Agriculture.

(h) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Northern Mariana Islands, American Samoa, and any other territory, commonwealth, or possession of the United States.

(i) The term "taken" means captured, killed, or collected.

(j) The term "transport" means to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

SEC. 3. PROHIBITED ACTS.

(a) OFFENSES OTHER THAN MARKING OFFENSES.—It is unlawful for any person—

(1) to import, export, transport, sell, receive, acquire, or purchase any fish or wildlife or plant taken or possessed in violation of any law, treaty, or regulation of the United States or in violation of any Indian tribal law;

(2) to import, export, transport, sell, receive, acquire, or purchase in interstate or foreign commerce—

(A) any fish or wildlife taken, possessed, transported, or sold in violation of any law or regulation of any State or in violation of any foreign law, or

(B) any plant taken, possessed, transported, or sold in violation of any law or regulation of any State;

(3) within the special maritime and territorial jurisdiction of the United States (as defined in section 7 of title 18, United States Code)—

(A) to possess any fish or wildlife taken, possessed, transported, or sold in violation of any law or regulation of any State or in violation of any foreign law or Indian tribal law, or

(B) to possess any plant taken, possessed, transported, or sold in violation of any law or regulation of any State;

(4) having imported, exported, transported, sold, purchased, or received any fish or wildlife or plant imported from any foreign country or transported in interstate or foreign commerce, to make or submit any false record, account, label, or identification thereof; or

(5) to attempt to commit any act described in paragraphs (1) through (4).

(b) MARKING OFFENSES.—It is unlawful for any person to import, export, or transport in interstate commerce any container or package containing any fish or wildlife unless the container or package has previously been plainly marked, labeled, or tagged in accordance with the regulations issued pursuant to paragraph (2) of subsection 7(a) of this Act.

SEC. 4. PENALTIES AND SANCTIONS.

(a) CIVIL PENALTIES.—

(1) Any person who engages in conduct prohibited by any provision of this Act (other than subsection 3(b)) and in the exercise of due care should know that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty, or regulation, may be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation: *Provided,* That when the violation involves fish or wildlife or plants with a market value of less than $350, and involves only the transportation, acquisition, or receipt of fish or wildlife or plants taken or possessed in violation of any law, treaty, or regulation of the United States, any Indian tribal law, any foreign law, or any law or regulation of any State, the penalty assessed shall not exceed the maximum provided for violation of said law, treaty, or regulation, or $10,000, whichever is less.

(2) Any person who violates subsection 3(b) may be assessed a civil penalty by the Secretary of not more than $250.

(3) For purposes of paragraphs (1) and (2), any reference to a provision of this Act or to a section of this Act shall be treated as including any regulation issued to carry out any such provision or section.

(4) No civil penalty may be assessed under this subsection unless the person accused of the violation is given notice and opportunity for a hearing with respect to the violation. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which a person may have taken or been in possession of the said fish or wildlife or plants.

(5) Any civil penalty assessed under this subsection may be remitted or mitigated by the Secretary.

(6) In determining the amount of any penalty assessed pursuant to paragraphs (1) and (2), the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited act committed, and with respect to the violator, the degree of culpability, ability to pay, and such other matters as justice may require.

(b) HEARINGS.—Hearings held during proceedings for the assessment of civil penalties shall be conducted in accordance with section 554 of title 5, United States Code. The administrative law judge may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, or documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena issued pursuant to this paragraph and served upon any person, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the administrative law judge or to appear and produce documents before the

administrative law judge, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(c) REVIEW.—Any person against whom a civil penalty is assessed under this section may obtain review thereof in the appropriate district court of the United States by filing a notice of appeal in such court within thirty days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28, United States Code. If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary may request the Attorney General of the United States to institute a civil action in an appropriate district court of the United States to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

(d) CRIMINAL PENALTIES.—

(1) Any person who—

(A) knowingly imports or exports any fish or wildlife or plants in violation of any provision of this Act (other than subsection 3(b)), or

(B) violates any provision of this Act (other than subsection 3(b)) by knowingly engaging in conduct that involves the sale or purchase of, the offer of sale or purchase of, or the intent to sell or purchase, fish or wildlife or plants with a market value in excess of $350,

knowing that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation, shall be fined not more than $20,000, or imprisoned for not more than five years, or both. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

(2) Any person who knowingly engages in conduct prohibited by any provision of this Act (other than subsection 3(b)) and in the exercise of due care should know that the fish or wildlife or plants were taken, possessed, transported, or sold in violation of, or in a manner unlawful under, any underlying law, treaty or regulation shall be fined not more than $10,000, or imprisoned for not more than one year, or both. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

(e) PERMIT SANCTIONS.—The Secretary may also suspend, modify, or cancel any Federal hunting or fishing license, permit, or stamp, or any license or permit authorizing a person to import or export fish or wildlife or plants (other than a permit or license issued pursuant to the Fishery Conservation and Management Act of 1976), or to operate a quarantine station or rescue center for imported wildlife or plants, issued to any person who is convicted of a criminal violation of any provision of this Act or any regulation issued hereunder. The Secretary shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension, or revocation of any licenses, permits, stamps, or other agreements pursuant to this section.

SEC. 5. FORFITURE.

(a) IN GENERAL.—

(1) All fish or wildlife or plants imported, exported, transported, sold, received, acquired, or purchased contrary to the provisions of section 3 of this Act (other than subsection 3(b), or any regulation issued pursuant thereto, shall be subject to forfeiture to the United States notwithstanding any culpability requirements for civil penalty assessment or criminal prosecution included in section 4 of this Act.

(2) All vessels, vehicles, aircraft, and other equipment used to aid in the importing, exporting, transporting, selling, receiving, acquiring, or purchasing of fish or wildlife or plants in a criminal violation of this Act for which a felony conviction is obtained shall be subject to forfeiture to the United States if (A) the owner of such vessel, vehicle, aircraft, or equipment was at the time of the alleged illegal act a consenting party or privy thereto or in the exercise of due care should have known that such vessel, vehicle, aircraft, or equipment would be used in a criminal violation of this Act, and (B) the violation involved the sale or purchase of, the offer of sale or purchase of, or the intent to sell or purchase, fish or wildlife or plants.

(b) APPLICATION OF CUSTOMS LAWS.—All provisions of law relating to the seizure, forfeiture, and condemnation of property for violation of the customs laws, the disposition of such property or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department may, for the purposes of this Act, also be exercised or performed by the Secretary or by such persons as he may designate: *Provided*, That any warrant for search or seizure shall be issued in accordance with rule 41 of the Federal Rules of Criminal Procedure.

(c) STORAGE COST.—Any person convicted of an offense, or assessed a civil penalty, under section 4 shall be liable for the costs incurred in the storage, care, and maintenance of any fish or wildlife or plant seized in connection with the violation concerned.

SEC. 6. ENFORCEMENT.

(a) IN GENERAL.—The provision of this Act and any regulations issued pursuant thereto shall be enforced by the Secretary, the Secretary of Transportation, or the Secretary of the Treasury. Such Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency or Indian tribe for purposes of enforcing this Act.

(b) POWERS.—Any person authorized under subsection (a) to enforce this Act may carry firearms; may make an arrest without a warrant for any felony violation of this Act if he has reasonable grounds to believe that the person to be arrested has committed or is committing such violation: *Provided*, That an arrest for a felony violation of this Act that is not committed in the presence or view of any such person and that involves only the transportation, acquisition, receipt, purchase, or sale of fish or wildlife or plants taken or possessed in violation of any law or regulation of any State shall require a warrant; may make an arrest without a warrant for a misdemeanor violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing a violation in his presence or view; and may execute and serve any subpena, arrest warrant, search warrant issued in accordance with rule 41 of the Federal Rules of Criminal Procedure, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Any person so authorized, in coordination with the Secretary of the Treasury, may detain for inspection and inspect any vessel, vehicle, aircraft, or other conveyance or any package, crate, or other container, including its contents, upon the arrival of such conveyance or container in the United States or the customs waters of the United States from any point outside the United States or such customs waters, or, if such conveyance or container is being used for exportation purposes, prior to departure from the United States or the customs waters of the United States. Such person may also inspect and demand the production of any documents and permits required by the country of natal origin, birth, or reexport of the fish or wildlife. Any fish, wildlife, plant, property, or item seized shall be held by any person authorized by the Secretary pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, plants, property, or item pursuant to section 5 of this Act; except that the Secretary may, in lieu of holding such fish, wildlife, plant, property, or item permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(c) DISTRICT COURT JURISDICTION.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. The venue provisions of title 18 and title 28 of the United States Code shall apply to any actions arising under this Act. The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulations issued thereunder.

(d) REWARDS.—Beginning in fiscal year 1983, the Secretary or the Secretary of the Treasury shall pay a reward for sums received as penalties, fines, or forfeitures of property for any violation of this Act or any regulation issued hereunder to any person who furnishes information which leads to an arrest, a criminal conviction, civil penalty assessment, or forfeiture of property for any violation of this Act or any regulation issued hereunder. The amount of the reward, if any, is to be designated by the Secretary or the Secretary of the Treasury, as appropriate. Any officer or employee of the United States or any State or local government who furnishes information or renders service in the performance of his official duties is ineligible for payment under this subsection.

SEC. 7. ADMINISTRATION.

(a) REGULATIONS.—

(1) The Secretary, after consultation with the Secretary of the Treasury, is authorized to issue such regulations, except as provided in paragraph (2), as may be necessary to carry out the provisions of section 4 and section 5 of this Act.

(2) The Secretaries of the Interior and Commerce shall jointly promulgate specific regulations to implement the provisions of subsection 3(b) of this Act for the marking and labeling of containers or packages containing fish or wildlife. These regulations shall be in accordance with existing commercial practices.

(b) CONTRACT AUTHORITY.—Beginning in fiscal year 1983, to the extent and in the amounts provided in advance in appropriations Acts, the Secretary may enter into such contracts, leases, cooperative agreements, or other transactions with any Federal or State agency, Indian tribe, public or private institution, or other person, as may be necessary to carry out the purposes of this Act.

SEC. 8. EXCEPTIONS.

(a) The provisions of paragraph (1) of subsection 3(a) of this Act shall not apply to any activity regulated by a fishery management plan in effect under the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.);

(b) The provisions of paragraphs (1), (2)(A), and (3)(A) of subsection 3(a) of this Act shall not apply to—

(1) any activity regulated by the Tuna Conventions Act of 1950 (16 U.S.C. 951–961) or the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971–971(h)); or

(2) any activity involving the harvesting of highly migratory species (as defined in paragraph (14) of Section 3 of the Fishery Conservation and Management Act of 1976) taken on the high seas (as defined in paragraph (13) of such section 3) if such species are taken in violation of the laws of a foreign nation and the United States does not recognize the jurisdiction of the foreign nation over such species;

(c) The provisions of paragraph (2) of subsection 3(a) of this Act shall not apply to the interstate shipment or transshipment through Indian country as defined in section 1151 of title 18, United States Code, or a State of any fish or wildlife or plant legally taken if the shipment is enroute to a State in which the fish or wildlife or plant may be legally possessed.

SEC. 9. MISCELLANEOUS PROVISIONS.

(a) EFFECT ON POWERS OF STATES.—Nothing in this Act shall be construed to prevent the several States or Indian tribes from making or enforcing laws or regulations not inconsistent with the provisions of this Act.

(b) REPEALS.—The following provisions of law are repealed:

(1) The Act of May 20, 1926 (commonly known as the Black Bass Act; 16 U.S.C. 851–856).

(2) Section 5 of the Act of May 25, 1900 (16 U.S.C. 667e), and sections 43 and 44 of title 18, United States Code (commonly known as provisions of the Lacey Act).

(3) Sections 3054 and 3112 of title 18, United States Code.

(c) DISCLAIMERS.—Nothing in this Act shall be construed as—

(1) repealing, superseding, or modifying any provision of Federal law other than those specified in subsection (b);

(2) repealing, superseding, or modifying any right, privilege, or immunity granted, reserved, or established pursuant to treaty, statute, or executive order pertaining to any Indian tribe, band, or community; or

(3) enlarging or diminishing the authority of any State or Indian tribe to regulate the activities of persons within Indian reservations.

(d) HUMANE SHIPMENT.—Subsection 42(c) of title 18, United States Code, is amended by striking "Secretary of the Treasury" and inserting in lieu thereof "Secretary of the Interior within one hundred and eighty days of the enactment of the Lacey Act Amendments of 1981".

(e) REWARD.—Subsection 11(d) of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended to read as follows:

"(d) REWARD.—The Secretary or the Secretary of the Treasury shall pay a reward from sums received as penalties, fines, or forfeitures of property for any violation of this Act or any regulation issued hereunder to any person who furnishes information which leads to an arrest, a criminal conviction, civil penalty assessment, or forfeiture of property for any violation of this Act or any regulation issued hereunder. The amount of the reward, if any, is to be designated by the Secretary or the Secretary of the Treasury, as appropriate. Any officer or employee of the United States or any State or local government who furnishes information or renders service in the performance of his official duties is ineligible for payment under this subsection.".

(f) The amendment specified in subsection (9)(e) of this Act shall take effect beginning in fiscal year 1983.

(g) The Secretary of the Interior is authorized to pay from agency appropriations the travel expense of newly appointed special agents of the United States Fish and Wildlife Service and the transportation expense of household goods and personal effects from place of residence at time of selection to first duty station to the extent authorized by section 5721 of title 5 for all such special agents appointed after January 1, 1977.

(h) The Secretary shall identify the funds utilized to enforce this Act and any regulations thereto as a specific appropriations item in the Department of the Interior appropriations budget proposal to the Congress.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VETERANS' DISABILITY COMPENSATION, HOUSING AND MEMORIAL BENEFITS AMENDMENTS OF 1981

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar No. 200, S. 917.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

Calendar No. 200, a bill (S. 917) to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Veterans' Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That (a) this Act may be cited as the "Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—VETERANS' DISABILITY COMPENSATION BENEFITS

RATES OF DISABILITY COMPENSATION

SEC. 101. (a) Section 314 is amended—

(1) by striking out "$54" in subsection (a) and inserting in lieu thereof "$60";

(2) by striking out "$99" in subsection (b) and inserting in lieu thereof "$110";

(3) by striking out "$150" in subsection (c) and inserting in lieu thereof "$167";

(4) by striking out "$206" in subsection (d) and inserting in lieu thereof "$229";

(5) by striking out "$291" in subsection (e) and inserting in lieu thereof "$324";

(6) by striking out "$367" in subsection (f) and inserting in lieu thereof "$408";

(7) by striking out "$434" in subsection (g) and inserting in lieu thereof "$483";

(8) by striking out "$503" in subsection (h) and inserting in lieu thereof "$559";

(9) by striking out "$566" in subsection (i) and inserting in lieu thereof "$629";

(10) by striking out "$1,016" in subsection (j) and inserting in lieu thereof "$1,130";

(11) by striking out "$1,262" and "$1,768" in subsection (k) and inserting in lieu thereof "$1,403" and "$1,966", respectively;

(12) by striking out "$1,262" in subsection (l) and inserting in lieu thereof "$1,403";

(13) by striking out "$1,391" in subsection (m) and inserting in lieu thereof "$1,547";

(14) by striking out "$1,581" in subsection (n) and inserting in lieu thereof "$1,758";

(15) by striking out "$1,768" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$1,966";

(16) by striking out "$759" and "$1,130" in subsection (r) and inserting in lieu thereof "$844" and "$1,257", respectively;

(17) by striking out "$1,137" in subsection (s) and inserting in lieu thereof "$1,264"; and

(18) by striking out "$219" in subsection (t) and inserting in lieu thereof "$244".

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85–857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

RATES OF ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 102. Section 315(1) is amended—

(1) by striking out "$62" in clause (A) and inserting in lieu thereof "$69";

(2) by striking out "$104" in clause (B) and inserting in lieu thereof "$116";

(3) by striking out "$138" in clause (C) and inserting in lieu thereof "$153";

(4) by striking out "$173" and "$34" in clause (D) and inserting in lieu thereof "$192" and "$38", respectively;

(5) by striking out "$42" in clause (E) and inserting in lieu thereof "$47";

(6) by striking out "$77" in clause (F) and inserting in lieu thereof "$86";

(7) by striking out "$111" and "$34" in clause (G) and inserting in lieu thereof "$123" and "$38", respectively;

(8) by striking out "$50" in clause (H) and inserting in lieu thereof "$56";

(9) by striking out "$112" in clause (I) and inserting in lieu thereof "$125"; and

(10) by striking out "$94" in clause (J) and inserting in lieu thereof "$105".

CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 103. Section 362 is amended by striking out "$274" and inserting in lieu thereof "$305".

INCREASE COMPENSATION PAYABLE TO CERTAIN SEVERELY DISABLED VETERANS

SEC. 104. Section 314 is amended—

(1) by striking out "both hands, or" in subsection (l);

(2) by amending subsection (m) by inserting "of both hands, or has suffered the anatomical loss or loss of use" after "use";

(3) by amending subsection (n)—

(A) by inserting "or loss of use of both arms at a level, or with complications, preventing natural elbow action with prosthesis in place, or has suffered the anatomical loss" after "loss" the first place it appears; and

(B) by inserting a comma after "appliance"; and

(4) by inserting after the comma following "less" in subsection (o) "or if the veteran has suffered the anatomical loss of both arms so near the shoulder as to prevent the use of a prosthetic appliance,".

TITLE II—SURVIVORS' DEPENDENCY AND INDEMNITY COMPENSAT_ON BENEFITS

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC. 201. (a) Subsection (a) of section 411 is amended to read as follows:

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

"Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	$415	W-4	$595
E-2	$428	O-1	$525
E-3	$438	O-2	$542
E-4	$466	O-3	$580
E-5	$479	O-4	$613
E-6	$490	O-5	$676
E-7	$514	O-6	$761
E-8	$542	O-7	$824
E-9	[1] $567	O-8	$903
W-1	$525	O-9	$970
W-2	$546	O-10	[2] $1,061
W-3	$562		

"[1] If the veteran served as sergeant major of the Army, senior enlisted adviser of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $610.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by section 402 of this title, the surviving spouse's rule shall be $1,138.".

(b) Subsection (b) of such section is amended by striking out "$43" and inserting in lieu thereof "$48".

(c) Subsection (c) of such section is amended by striking out "$112" and inserting in lieu thereof "$125".

(d) Subsection (d) of such section is amended by striking out "$56" and inserting in lieu thereof "$62".

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 202. Section 413 is amended—

(1) by striking out "$189" in clause (1) and inserting in lieu thereof "$210";

(2) by striking out "$271" in clause (2) and inserting in lieu thereof "$301";

(3) by striking out "$350" in clause (3) and inserting in lieu thereof "$389"; and

(4) by striking out "$350" and "$71" in clause (4) and inserting in lieu thereof "$389" and "$79", respectively.

RATES OF SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 203. Section 414 is amended—

(1) by striking out "$112" in subsection (a) and inserting in lieu thereof "$125";

(2) by striking out "$189" in subsection (b) and inserting in lieu thereof "$210"; and

(3) by striking out "$96" in subsection (c) and inserting in lieu thereof "$107".

TITLE III—AUTOMOBILE ASSISTANCE AND ADAPTIVE EQUIPMENT AMENDMENTS

SEC. 301. Section 1902 is amended—

(1) by striking out "he" each place it appears and inserting in lieu thereof "the Administrator";

(2) by striking out "$3,800" in subsection (a) and inserting in lieu thereof "$5,000"; and

(3) by amending subsection (b)—

(A) by inserting "(1)" before "The";

(B) by striking out "his" and inserting in lieu thereof "such person's"; and

(C) by adding at the end the following new paragraph:

"(2) In the case of any veteran (other than an eligible person) who is entitled to compensation under chapter 11 of this title for ankylosis of one or both knees, or one or both hips, the Administrator, under the terms and conditions set forth in section 1903(a), (c), and (d) of this title and under regulations which the Administrator shall prescribe, shall provide such adaptive equipment to overcome the disability resulting from such ankylosis as is (A) necessary to meet the applicable standards of licensure established by the State of such veteran's residency or other proper licensing authority for the operation of such veteran's automobile or other conveyance by such veteran, or (B) determined to be necessary by the Chief Medical Director for the safe operation of such automobile or other conveyance by such veteran.".

SEC. 302. Section 1903(b) is amended by striking out "he" and inserting in lieu thereof "the Administrator" and striking out "his" both places it appears and inserting in lieu thereof "such person's".

TITLE IV—VETERANS' ADMINISTRATION HOUSING BENEFITS AMENDMENTS

ESTABLISHMENT OF GRADUATED-PAYMENT PLANS IN VETERANS' ADMINISTRATION LOAN GUARANTY PROGRAM

SEC. 401. Section 1803(d)(2) is amended—

(1) by inserting "(A)" after "(2)"; and

(2) by adding at the end the following new subparagraphs:

"(B) The Administrator may guarantee loans with provisions for various rates of amortization corresponding to anticipated variations in family income. With respect to any loan guaranteed under this subparagraph—

"(i) the initial principal amount of the loan may not exceed the reasonable value of the property as of the time the loan is made; and

"(ii) the principal amount of the loan thereafter (including the amount of all interest to be deferred and added to principal) may not at any time be scheduled to exceed the projected value of the property.

"(C) For the purposes of subparagraph (B) of this paragraph, the projected value of the property shall be calculated by the Administrator by increasing the reasonable value of the property as of the time the loan is made at a rate not in excess of 2.5 per centum per year, but in no event may the projected value of the property for the purposes of such subparagraph exceed 115 per centum of such reasonable value. A loan made for a purpose other than the acquisition of a single-family dwelling unit may not be guaranteed under such subparagraph.".

SEC. 402. Section 1828 is amended—

(1) by inserting "(1)" after "constitution or law"; and

(2) by inserting "(2) restricting the manner of calculating such interest (including prohibition of the charging of interest on interest), or (3) requiring a minimum amortization of principal," after "lenders,".

INCREASE IN MAXIMUM AMOUNTS OF VETERANS' SPECIALLY ADAPTED HOUSING ASSISTANCE

SEC. 403. Section 802 is amended—

(1) by amending subsection (a)—

(A) by striking out "$30,000" and inserting in lieu thereof "$35,000";

(B) by striking out "him" each place it appears and inserting in lieu thereof "such veteran"; and

(C) by striking out "his" in clause (3) and inserting in lieu thereof "such veteran's"; and

(2) by striking out "(2)" in subsection (b).

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 404. Section 1826 is amended—

(1) by striking out subsection (a) in its entirety; and

(2) by striking out "(b)" in subsection (b).

TITLE V—MISCELLANEOUS PROVISIONS

CONTINUED PAYMENT OF PENSION TO CERTAIN HOSPITALIZED VETERANS WHO ARE UNDERGOING A PRESCRIBED PROGRAM OF REHABILITATION

SEC. 501. Paragraph (1) of section 3203(a) is amended by adding at the end the following subparagraph:

"(D) For the purposes of subparagraphs (B) and (C) of this paragraph, no period of time that does not exceed one hundred and eighty days within any twelve-month period shall be counted as time during which a veteran is being furnished hospital or nursing home care if the Administrator determines that the primary purpose for the furnishing of such care during such period of time is for the Veterans' Administration to provide such veteran with a prescribed program of rehabilitation services, under chapter 17 or 31 of this title, designed to restore such veteran's ability to function within such veteran's family and community.".

HEADSTONES AND MARKERS IN CERTAIN CASES

SEC. 502. Subsection (b) of section 906 is amended to read as follows:

"(b) The Administrator shall furnish, when requested, an appropriate memorial headstone or marker to commemorate any veteran—

"(1) whose remains have not been recovered or identified;

"(2) whose remains were buried at sea, whether by the veteran's own choice or otherwise;

"(3) whose remains were donated to science; or

"(4) whose remains were cremated and the ashes scattered without interment of any portion of the ashes,

for placement by the applicant in a national cemetery area reserved for such purposes under the provisions of section 1003 of this title, or in any private or local or State cemetery.".

SEC. 503. Subsection (a) of section 1003 is amended to read as follows:

"(a) The Administrator shall set aside, when available, suitable areas in national cemeteries to honor the memory of veterans—

"(1) who are missing in action;

"(2) whose remains have not been recovered or identified;

"(3) whose remains were buried at sea, whether by the member's own choice or otherwise;

"(4) whose remains were donated to science; or

"(5) whose remains were cremated and the ashes scattered without interment of any portion of the ashes.".

RADIATION LITERATURE REVIEW

SEC. 504. (a)(1) The Administrator of Veterans' Affairs shall conduct a comprehensive review and scientific analysis of the literature covering studies already conducted or underway relating to the long-term adverse health (including genetic and psychological) effects in humans of exposures to radiation, including nuclear device, medical, and occupational exposures.

(2) The Administrator may, in carrying out the review and analysis of the literature provided for in paragraph (1), enter into such contracts or agreements with private or public agencies or persons for such necessary services, including the conduct of, in whole or in part, such review and analysis, as the Administrator considers appropriate.

(b) In conducting the review and analysis of the literature provided for in subsection (a), the Administrator shall provide for all appropriate coordination and consultation with other departments, agencies, and instrumentalities of the Federal Government that are conducting or have conducted scientific studies relating to the adverse health effects in humans of exposure to radiation.

(c)(1) Not later than ninety days after the date of the enactment of this Act, the Administrator shall submit to the appropriate committees of the Congress a report containing a description of the steps taken and plans made to assure the coordination and consultation required under subsection (b).

(2)(A) Not later than eighteen months after the date of the enactment of this Act, the Administrator shall submit to the appro-

priate committees of the Congress a report on the literature review and analysis conducted under subsection (a), together with such comments and recommendations for administrative or legislative action, or both, as the Administrator considers appropriate, including recommendations regarding the need for the Administrator to carry out additional research in any areas in which the Administrator determines that the report indicates such research is necessary for the resolution of questions as to whether certain significant adverse long-term health effects result from exposure to radiation.

(B) The Administrator shall submit copies of such report to the departments, agencies, and instrumentalities described in subsection (b) and shall recommend to the appropriate such departments, agencies, and instrumentalities that they carry out any such additional research.

(3)(A)(i) Not later than ninety days after the submission of the report required by paragraph (2), the Administrator shall, based on the information described in such report, develop and publish in the Federal Register, for public review and comment, proposed regulations containing proposed guidelines, standards, and other criteria (together with an explanation of the bases for such proposed guidelines, standards, and criteria) for resolving claims for benefits administered by the Veterans' Administration based on exposure during service in the Armed Forces of the United States to radiation from nuclear devices.

(ii) Proposed regulations developed and published pursuant to division (i) of this subparagraph shall include specification of any presumptions (including any presumptions regarding service and exposure) to be applied to the resolution of the claims to which such proposed guidelines, standards, and criteria in such proposed regulations apply.

(B)(i) Not later than ninety days after the completion of the public review and comment process provided for in subparagraph (A)(i), the Administrator shall publish in the Federal Register final regulations containing the guidelines, standards, and other criteria (together with an explanation of the bases for such guidelines, standards, and criteria) for resolving the claims involved.

(ii) On the same day as final regulations are published as required by division (i) of this subparagraph, the Administrator shall submit to the appropriate committees of the Congress any recommendations for legislative action that the Administrator considers appropriate in light of the guidelines, standards, and criteria contained in such regulations, the report submitted pursuant to paragraph (2) of this subsection, and any other available pertinent information.

(C) Nothing in subparagraph (A) shall be considered to limit in any way the discretion and authority of the Administrator to promulgate or prescribe regulations, guidelines, standards, or other criteria for resolving any claims described in subparagraph (A)(i) at any time earlier than the time prescribed in subparagraph (A) for the publication of the proposed regulations described in such subparagraph.

MINIMUM ACTIVE-DUTY SERVICE REQUIREMENT

SEC. 505. (a) Chapter 53 is amended by inserting after section 3103 the following new section:

"§ 3103A. Minimum active-duty service requirement

"(a) Notwithstanding any other provision of law, the requirements for eligibility for or entitlement to any benefit under this title or other laws administered by the Veterans' Administration based on the duration of the active duty in one of the Armed Forces of a person who initially enters such active duty after September 7, 1980, shall be exclusively as prescribed in this title.

"(b)(1) Except as provided in paragraph (2) of this subsection, a person who initially enters active duty in one of the Armed Forces after September 7, 1980, shall not, by reason of such active duty, be provided with any benefit under this title or other laws administered by the Veterans' Administration—

"(A) if such person's initial period of enlistment or other initial period of obligated service is for twenty-four or more months of active duty and such person is discharged or released from active duty before completing at least twenty-four months of such person's obligated period of active duty; or

"(B) if such person's initial period of enlistment or other initial period of obligated service is for less than twenty-four months of active duty and such person is discharged or released from active duty before completing the full period of such enlistment or other obligated service.

"(2) Paragraph (1) of this subsection shall not apply to—

"(A) any person who is discharged or released from active duty (i) under section 1171 or 1173 of title 10, or (ii) because of a service-connected disability;

"(B) any person who has a disability that the Administrator has determined to be compensable under chapter 11 of this title;

"(C) a commissioned or warrant officer who initially enters a period of active duty prior to October 1, 1981;

"(D) the provision of any benefit for or on account of any service-connected disability or condition;

"(E)(i) the continuation of insurance pursuant to section 768(a)(1)(A) of this title; or

"(ii) the right to designate or change the designation of a beneficiary or beneficiaries pursuant to section 770(a) of this title; or

"(F) any benefit provided under applicable law prior to October 1, 1981.

"(c)(1) Except as provided in subsection (b)(2) of this section and paragraph (2) of this subsection, no dependent or survivor of a person as to whom paragraph (1) of subsection (b) of this section requires the denial of benefits shall, by reason of such person's period of active duty, be provided with any benefit under this title or other laws administered by the Veterans' Administration.

"(2) Paragraph (1) of this subsection shall not apply to—

"(A) the survivors or dependents of a person to whom paragraph (1) of subsection (b) of this section is made inapplicable by paragraph (2) (A), (B), or (C) of such subsection;

"(B) benefits under chapters 13, 17, 35, and 37 and sections 907 and 908 of this title; or

"(C) the payment of insurance pursuant to section 768(a)(1)(A) of this title.

"(d) For the purposes of this section, the term 'benefit' includes a right or privilege but does not include a refund or payment, pursuant to section 1623, 1624, or 1625 of this title, of a participant's contributions to the educational benefits program provided by chapter 32 of this title.".

(b) No provisions of the amendment made by subsection (a) of this section shall be construed as requiring (or as authorizing any official or employee of the Federal Government to request) any person to repay the United States Government for a benefit, right, or privilege which was provided prior to October 1, 1981.

(c) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 3103 the following:

"3103A. Minimum active-duty service requirement.".

TITLE VI—EFFECTIVE DATES

SEC. 601. (a) Except as provided in subsections (b) and (c) of this section, the amendments made by this Act shall take effect on the date of enactment of this Act.

(b) The provisions of titles I and II and sections 301, 401, 402, and 403 shall take effect on October 1, 1981.

(c) The amendments made by sections 502 and 503 shall take effect on October 1, 1981, and shall apply with respect to veterans dying before, on, or after such date.

Mr. SIMPSON. Mr. President, I rise in support of S. 917 as reported, the proposed "Veterans' Disability Compensation and Housing Benefits Amendments Act of 1981." S. 917 provides for an 11.2-percent increase in compensation benefits to service-connected disabled veterans, the same cost-of-living increase granted to those receiving social security and VA pension benefits earlier this year. Such an increase reflects the strong feeling that compensation and DIC benefits are of the highest priority for those Senators on both sides of the aisle. This bill addresses the pressing needs of our most deserving veterans and demonstrates the Senate's * * * and this committee's * * * continuing commitment to make VA programs more responsive to the legitimate needs and concerns of all veterans.

Mr. President, I would wish to take this opportunity to briefly describe the provisions of S. 917.

The major portion of this bill addresses the needs of those veterans who are the primary concern of the Senate Veterans' Affairs Committee and of the Veterans' Administration; namely, those veterans with service-connected disabilities. These are the veterans who incurred a disability while serving our country, and I think everyone would agree, that they merit an appropriate adjustment in compensation and dependency and indemnity compensation (DIC) benefits to keep pace with inflation. Therefore, S. 917 provides for a cost-of-living increase for the basic service-connected compensation rates, DIC, and the annual clothing allowance for those veterans whose clothing is damaged by continued use of prosthetic or orthopedic appliances. The increase this year is 11.2 percent. This is the same cost-of-living increase received by recipients of social security and VA pension benefits. In addition to the cost-of-living increase, the bill would address certain inequities in present law by increasing the base rate of compensation for those severely disabled service-connected veterans who have suffered a bilateral loss or use of their upper extremities.

Another VA program for the service-connected veteran is the automobile and adaptive equipment assistance program which provides funds to aid in the purchase of automobile and adaptive equipment, and to assist eligible veterans in learning how to operate that equipment. The committee bill recognizes the increasing cost of automobiles and necessary adaptive equipment, by raising the amount which the VA is authorized to pay toward purchase of such a vehicle. In addition, the committee would extend eligibility for this program to those veterans suffering ankylosis. This is a condition in which the hips or knees are frozen in one position, which condition then usually requires a special automobile adaptor in order to be able to operate a vehicle safely. The committee believes

these veterans have been excluded from the program for too long a time.

Another VA program for the service-connected veteran is the specially adapted housing program which assists severly disabled veterans by providing financial assistance and counsel to aid in the purchase and/or, modification of such veterans' homes.

Veterans who are blind, quadriplegic, paraplegic, or amputees, and those who use wheelchairs, braces or crutches, often require extra railings, special bathroom equipment, extra large rooms and hallways, and other adaptations. The committee bill would increase the amount available to such veterans from $30,000 to $35,000, an increase necessary in view of the continually skyrocketing price of the construction of homes.

In addition to these provisions affecting the service-connected disabled veteran, Mr. President, the bill before the Senate today contains five other sections.

First, the bill would authorize a graduated-payment plan within the VA loan-guaranty program. The committee believes that the time has come to initiate such a plan which would allow the younger veteran earning less money to participate in the VA's loan-guaranty program in these times of spiraling interest rates and costs. This is a plan which has been successfully adopted by HUD. In addition, as a technical amendment, the bill authorizes the Administrator to offset other VA benefits against delinquent VA-guaranteed loans.

Second, the committee's commitment to rehabilitation prompted a change in title 38 which presently reduces pension benefits after 3 months of hospitalization in a VA facility. S. 917 would maintain pension benefits up to 180 days out of any 12-month period if the veteran is hospitalized and in a prescribed program of rehabilitation. The purpose of this change is to encourage such veterans to reach out for greater self-sufficiency, by reducing the disincentive to participate in a rehabilitation program.

Third, the committee has undertaken another step which will remedy an inequity in the present law. We are authorizing memorials for those veterans whose remains are not interred because the remains were not recovered or because the veteran chose to donate his or her body to science, or chose to be cremated. Such veterans should not be denied memorialization.

Fourth, the committee bill takes an important course by directing the VA to undertake a report of the known adverse effects of radiation exposure, and to promulgate regulations for resolving claims for benefits administered by the Veterans' Administration based on exposure to radiation. These actions follow the important work already begun by the VA on agent orange, and we trust that both studies will provide valuable information relevant to the efforts of this committee and the VA in order that we be fully responsive to the needs of veterans who were exposed to radiation.

Mr. President, I wish to emphasize that any contract for the radiation literature review would be entered into only subject to the availability of appropriations, as is the case, of course, with the VA's standard contract authority in section 213 of title 38, United States Code, and that the contract authority in section 504(a)(2) does not constitute a new authorization for appropriations, since there is already an implicit open-ended authorization of appropriations for VA medical research.

Finally, S. 917 would provide a minimum service requirement for veterans to establish eligibility for VA benefits. Generally, the minimum service requirement is 24 months, or the full obligated period if it should be less than 24 months. This provision would serve as a cost-savings measure but certainly it is an important step in equalizing eligibility requirements and promoting a sense of responsibility with respect to an enlistment.

Mr. President, S. 917 contains a committee amendment. The amendment is in three parts. The first part would extend the various maximum lengths of maturity of VA loans for purchase of mobile homes and mobile home lots. This change would conform the maximum terms of such loans to the new maximum terms for FHA loans and would facilitate the pooling of VA loans with other Federal loans.

The second part would correct and clarify current law relating to veterans' spouse's educational delimiting periods. And, the third part would vest additional discretionary authority in the Administrator to determine whether an educational institution should be approved for purposes of GI bill benefits.

Mr. President, in concluding I should wish to sincerely thank the distinguished ranking minority member from California, Senator CRANSTON, for his invaluable help and cooperation on this bill, the remarkable Senator from South Carolina, Senator THURMOND, for his contributions and each of the other committee members and colleagues, all of whom are cosponsors of this measure.

In addition, I should like to recognize and to thank the very able members of the majority staff for their efforts—Ken Bergquist, Julie Susman, John Pressley, Lois Ann Harper, Rhonda Gazda, and our editorial director, Harold Carter, as well as members of the capable minority staff—Jonathan Steinberg, Babette Polzer, Ed Scott, and Molly Milligan.

Mr. President, I believe the committee has reported out a bill which is well-balanced, and one that meets the needs of our most deserving veterans in the areas of compensation, housing, and memorial affairs. On behalf of the entire committee, I urge the Senate's favorable consideration of this bill. Thank you, Mr. President.

Mr. President, at this time I ask unanimous consent that excerpts of the committee's report on S. 917 be inserted in the RECORD to more fully explain and clarify the details of the committee's bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 917 AS REPORTED

S. 917 as reported (hereinafter referred to as the "Committee bill") has six titles: Veterans' disability compensation benefits; Survivors' dependency and indemnity compensation benefits; Automobile assistance and adaptive equipment amendments; Veterans' Administration housing benefits amendments; Miscellaneous provisions; and Effective dates, as follows:

Title I: Veterans disability compensation benefit.—This title includes amendments to chapter 11 of title 38, United States Code, which would provide, effective October 1, 1981, an 11.2-percent increase (the same increase provided to social security and VA pension beneficiaries effective June 1, 1981) in—

(1) basic compensation rates for service-connected disabled veterans and generally, in the rates payable for certain severe disabilities;

(2) the allowances for spouses, children, and dependent parents, paid to service-connected disabled veterans rated 30-percent or more disabled; and

(3) the annual clothing allowance paid to veterans whose compensable disability requires the use of a prosthetic or orthopedic appliance (including a wheelchair) that tends to tear or wear out their clothing.

In addition, the Committee bill would adjust upward the base rate of compensation payable to service-connected disabled veterans who lost or have lost the use of both arms.

Title II: Survivors dependency and indemnity compensation benefits.—This title includes amendments to chapter 13 of title 38, United States Code, which would provide, effective October 1, 1981, an 11.2-percent increase (again, the same increase provided to social security and VA pension beneficiaries effective June 1, 1981) in—

(1) dependency and indemnity compensation (DIC) benefits payable to surviving spouses of veterans whose deaths were service connected;

(2) the additional allowances paid to surviving spouses for dependent children and in the additional allowances payable to surviving spouses who are so disabled as to be in need of regular aid and attendance or to be permanently housebound; and

(3) DIC benefits for the children of veterans whose deaths were service connected where no surviving spouse is entitled to DIC, the child is age 18 through 22 and attending an approved educational institution, or the child is age 18 or over and became permanently incapable of self-support prior to reaching age 18.

Title III: Automobile assistance and adaptive equipment amendments.—This title includes amendments to chapter 39 of title 38, United States Code, which would:

(1) Increase to $5,000 the amount which the Administrator is authorized to pay towards the purchase price of an automobile for those veterans eligible for assistance in purchasing automobiles and adaptive equipment.

(2) Extend eligibility for automobile adaptive equipment assistance to veterans with ankylosis of one or both knees, or one or both hips, if such disability is service connected.

Title IV: Veterans' Administration housing benefits amendments.—This title includes amendments to chapter 37 and chapter 21, respectively, of title 38, United States Code, which would:

(1) Authorize the Administrator to establish a graduated payment plan program, within the Veterans' Administration loan guaranty program, to guaranty home loans with provisions for various rates of amortization corresponding to anticipated variations in family income.

(2) Increase to $35,000 the amount which the Administrator is authorized to pay to eligible service-connected disabled veterans for specially adapted housing.

Title V: Miscellaneous amendments.—This title includes provisions which would:

(1) Amend chapter 55 of title 38, United States Code, to provide that any veteran who

is hospitalized and in a prescribed program of rehabilitation, designed to restore the veteran's ability to function within such veteran's family and community, if such period of hospitalization does not exceed 180 days within any 12 month period, will not suffer a reduced pension.

(2) Amend chapter 23 of title 38, United States Code, to authorize the Administrator to furnish a memorial headstone or marker to commemorate any veteran whose remains have not been recovered or identified, whose remains were buried at sea, donated to science or cremated and the ashes scattered without interment, for placement in a national, private, local, or State cemetery, and further authorizes the Administrator to set aside suitable areas in national cemeteries to honor the memory of such veterans.

(3) Direct the Administrator to conduct a review and analysis of studies, already conducted or underway, relating to the long-term adverse health effects on humans of exposure to radiation, including nuclear device, medical, and occupational exposures; and require the Administrator to submit a preliminary report within 90 days and a final report within 18 months after the date of enactment of the Act, to be followed within 90 days thereafter by publication of proposed regulations for resolving claims for benefits administered by the Veterans' Administration based on exposure during service in the Armed Forces to radiation from nuclear devices, and, finally, publication 90 days thereafter of final regulations for resolution of such claims.

(4) Incorporate in title 38, with certain modifications, the two-year minimum service requirement for benefits eligibility in section 977 of title 10.

DISCUSSION

TITLES I AND II: VETERANS' COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION BENEFITS

Background

Disability Compensation

The service-connected disability compensation program provides monthly cash benefits to veterans who have suffered disabilities during, or as a result of, their service in our Nation's Armed Forces. This program ranks as the highest program priority of the Veterans' Affairs Committee.

The amount paid in individual instances is contingent upon the nature of the veterans' disability or combination of disabilities and the extent to which earning capacity is considered to have been impaired. Compensable disabilities are rated according to the VA's Schedule of Rating Disabilities on a graduated scale ranging from 10 to 100 percent. A totally disabled veteran is thus compensated at not less than the 100-percent rate. Higher monthly rates are payable to totally disabled veterans with certain specific, very severe disabilities and combinations of disabilities.

The Veterans' Administration disability compensation program currently provides benefits for 2,276,542 veterans who have service-connected disabilities. This number is composed of disabled veterans with the following periods of service: 26,739 World War I veterans; 1,176,495 World War II veterans; 234,420 Korean-conflict veterans; and 562,849 Vietnam-era veterans.

The following table shows average costs and caseloads for veterans and survivors:

The Committee periodically reviews the service-connected disability compensation program with a view toward assuring that the benefits authorized provide reasonable and adequate compensation for disabled veterans and their families. Congress has traditionally acted periodically to provide cost-of-living increases in compensation benefits, in order to assure that those benefits kept pace with inflation. The following table shows statutory increases in the rates of disability compensation since 1957:

Dependency and Indemnity Compensation (DIC)

The dependency and indemnity compensation (DIC) program, which supplanted the earlier death compensation program, was established in 1956 with the enactment of the Servicemen's and Veterans' Survivors Benefits Act (Public Law 84-881).

DIC is paid to the survivors—surviving spouses, unmarried children under the age of 18, as well as certain helpless children age 18 or over, children between the ages of 18 and 23 who are enrolled in school, and certain needy parents—of servicemen or veterans who died on or after January 1, 1957, from: (1) a disease or injury incurred or aggravated in line of duty while on active duty or active duty training; or (2) an injury incurred or aggravated in line of duty while on inactive duty training; or (3) a disability compensable under laws administered by the VA.

Surviving spouses, children, and parents who are receiving death compensation by reason of a veteran's death occurring before January 1, 1957, may elect to receive DIC benefits in lieu of death compensation. Once they so elect, however, they cannot thereafter receive death compensation.

DIC is paid to surviving spouses at rates determined by the pay grade—service rank—of the deceased veteran. A higher rate is payable if the surviving spouse is so disabled as to be housebound or in need of regular aid-and-attendance, and additional amounts are payable for the veteran's surviving children. Children become entitled to DIC where there is no surviving spouse, or where the child age 18 or over has become permanently incapable of self support before reaching the age of 18 or the child is age 18 to 23 and pursuing an approved course of education.

DIC benefits are currently paid to or for 324,370 surviving spouses and children.

In addition, DIC is paid to the needy surviving parents of a veteran whose death was service connected. Under Public Law 95-588, the provisions of chapter 13 of title 38, United States Code, governing the parents' DIC rates, were amended to provide for automatic annual adjustments at the same time and by the same percentage as social security benefits.

Under section 410(b) of title 38, benefits are also paid at DIC rates to the surviving spouses and children of veterans whose deaths are not determined to be service connected where the veteran received compensation at the 100-percent rate over an extended period of time immediately prior to his or her death.

Committee bill provisions

The Committee bill provides for a 11.2 percent cost-of-living increase, effective October 1, 1981, in the service-connected disability compensation and dependency and indemnity compensation benefit rates. This percentage increase is the same percentage increase provided to social security beneficiaries and VA pensioners eligible for benefits under the new pension program established by Public Law 95-588.

The Committee's rationale for establishing these rate increases at this level is set forth at pages 12 through 13 of the Committee's budget views and estimates report for fiscal year 1982, which was submitted to the Senate Budget Committee on March 15, 1981 (Committee Print No. 5).

Disability compensation increases

The 11.2 percent increase provided for by the Committee bill would apply to the monthly rates for disability compensation under section 314 of title 38, United States Code, except for the monthly rates specified in subsection (k) of section 314. The maximum monthly amounts specified in subsections (k) and (p) of section 314 would also be increased. Those are specific dollar amounts that may not be exceeded in the event that a veteran would otherwise be entitled to a higher amount by reason of entitlement to two or more monthly rates.

The following table shows the current rates of disability compensation and those proposed by the Committee bill, together with the number of veterans receiving compensation in each category:

TABLE 3.—COMPARISON OF COMPENSATION RATES UNDER PRESENT LAW AND UNDER S. 917 AS REPORTED

Applicable subsection of sec. 314, United States Code	Percentage of disability	Increase in monthly rate		Number of veterans	Applicable subsection of sec. 314, United States Code	Percentage of disability	Increase in monthly rate		Number of veterans
		From—	To—				From—	To—	
(a)	(10)	$54	$60	884,994	(f)	(60)	$367	$408	123,986
(b)	(20)	99	110	356,819	(g)	(70)	434	483	80,322
(c)	(30)	150	167	317,120	(h)	(80)	503	559	39,199
(d)	(40)	206	229	186,074	(i)	(90)	566	629	14,076
(e)	(50)	291	324	114,372	(j)	(100)	1,016	1,130	130,639

HIGHER STATUTORY AWARDS FOR CERTAIN MULTIPLE DISABILITIES

Applicable subsection of sec. 314, United States Code	Percentage of disability	Increase in monthly rate From—	To—	Number of veterans
(k)(1)	Anatomical loss or loss of use of 1 or more creative organs, 1 foot, 1 hand, or both buttocks, or blindness of 1 eye, or complete organic aphonia, or deafness of both ears—for each loss.	$62	$62	85,602
(2)	Maximum limit for veterans receiving payments under (a) to (j), above.	1,262	1,403	
(3)	Maximum limit for veterans receiving payments under (l) to (n), below.	1,768	1,966	
(l)	Anatomical loss or loss of use of both hands, both feet, 1 foot and 1 hand, blindness in both eyes, permanently bedridden or so helpless as to require regular aid and attendance.	1,262	1,403	9,025
(m)	Anatomical loss or loss of use of 2 extremities so as to prevent natural elbow or knee action with prosthesis in place, or blind in both eyes, either with light perception only or rendering veteran so helpless as to require regular aid and attendance.	1,391	1,547	4,991
(n)	Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthesis or anatomical loss of both eyes.	1,581	1,758	691
(o)	Disability under conditions entitling veteran to 2 or more of the rates provided in (l) through (n), above, no condition being considered twice in the determination, or deafness rated at 60 percent or more in combination with total blindness.	1,768	1,966	71
(p)(1)	For blindness of both eyes together with bilateral deafness rated at 40 percent or more disabling or total deafness of 1 ear, next higher rate or intermediate rate, respectively, is payable—but compensation may not exceed.	1,768	1,966	1,883
(2)	Anatomical loss or loss of use of three extremities, next higher rate or intermediate rate is payable—but compensation may not exceed.	1,768	1,966	
(q)	[This subsection repealed by Public Law 90-493]			
(r)(1)	If veteran entitled to compensation at the rate provided for under (o), above, or at the maximum rate under (p), above, is in need of regular aid and attendance, in addition to such rate.	759	844	8,792
(2)	If veteran described in (r)(1), above, is in need of a higher level of care by a licensed health-care professional or a person under the regular supervision of such a professional, in addition to the rate payable under (o) or (p)	1,130	1,257	
(s)	If veteran has a disability rated as total, plus additional disability independently ratable at 60 percent or over, or is permanently housebound.	1,137	1,264	6,864
(t)	If veteran entitled to compensation under (a) through (i), above, has suffered the service-connected loss or loss of use of an extremity ratable at 40 percent or more and the non-service-connected loss or loss of use of paired extremity, and the latter loss would be rated at 40 percent or more if service connected, in addition to the rate payable under (a) through (i), above.	219	244	56

Veterans whose disabilities are rated at 30 percent or more may receive additional compensation for the veteran's spouse, children, and dependent parents. Under the Committee bill, those dependents' allowances would also be increased by 11.2 percent. Such dependents' allowances are prorated according to the percentage of disability. In 1980, the number of dependents for whom veterans received additional compensation exceeded 1 million.

The following table shows the current rates of additional compensation for dependents and those that would be provided for under the Committee bill:

TABLE 4.—ADDITIONAL COMPENSATION FOR DEPENDENTS

	Monthly rate From—	To—
Spouse	$62	$69
Spouse and child	104	116
No spouse, 1 child	42	47
Each additional child	34	38
Each dependent parent	50	56
Each child age 18 to 22 attending school	94	105
Spouse in nursing home or severely disabled	112	125

Source: Sec. 315 of title 38, United States Code, July 1981.

Finally, the Committee bill would increase by 11.2 percent, from $274 to $305, the clothing allowance paid to those veterans who, because of a disability for which such veteran is eligible for compensation, wear or use prosthetic or orthopedic appliances which wear out or tear the veteran's clothing.

Dependency and indemnity compensation increases

The Committee bill would also provide (in title II) for a cost-of-living increase of 11.2 percent in DIC rates for surviving spouses and children, the same rate of increase provided service-connected disability veterans under title I of the Committee bill. Additional allowances for surviving spouses in need of aid and attendance or housebound, helpless children age 18 or over, and children between the ages of 17 and 23 attending school would also be increased by 11.2 percent.

The following table shows a comparison of those rates under current law with the rates provided for under the Committee bill:

TABLE 5.—COMPARISON OF MONTHLY DIC RATES UNDER PRESENT LAW AND S. 917 AS REPORTED

Base monthly rates to surviving spouses	From—	To—
Veteran's pay grade:		
E-1	$373	$415
E-2	385	428
E-3	394	438
E-4	419	466
E-5	431	479
E-6	441	490

TABLE 6.—ADDITIONAL PAYMENTS

	From—	To—
Surviving spouse, addition for each child	$43	$48
Addition if surviving spouse in need of regular aid and attendance.	112	125
Surviving child (where no surviving spouse is entitled).	189	210
2 such children[1]	271	301
3 such children	350	389
More than 3 children, addition for each additional child.	71	79
Addition if such child is helpless.	112	125
Helpless child, where surviving spouse is also entitled.	189	210
Child attending school, where surviving spouse is also entitled.	96	107

[1] If there is more than 1 surviving child, an equal share of the total amount is paid to each child.

Source: Secs. 411, 413, 414 of title 38, United States Code, July 1981.

The 11.2-percent increase would also be applicable to benefits paid at DIC rates under section 410(b) of title 38, United States Code, to the surviving spouses and children

of certain totally disabled service-connected disabled veterans whose deaths were not service connected.

Increased compensation to certain severely disabled veterans

The Committee bill would increase the base rate of compensation payable to service-connected disabled veterans who have suffered the loss or loss of use of both upper extremities.

Background

Through a very complex compensation rating schedule the Veterans' Administration attempts to adequately compensate service-connected veterans for their disabilities. Section 314 of title 38, provides the rate of disability compensation based on the degree to which a veteran is disabled and awards additional monthly payments for the anatomical loss of or loss of use of one or more creative organs and certain other severe disabilities.

The Veterans' Administration reports that 125 veterans have suffered service-connected anatomical loss of both upper extremities and 357 veterans who have lost the use of both upper extremities as a result of service-connected injuries. The latter figure includes anatomical loss of one upper extremity and loss of use of the remaining upper extremity.

Under current law any veteran who, as the result of service-connected disability, who has suffered the anatomical loss or loss of use of both hands or both arms to the degree that natural elbow action and a prosthesis in place is prevented, receives compensation under subsections (l) and (m) of section 314, of title 38, respectively. A veteran who has lost or lost use of both feet or both legs receives compensation based on eligibility under subsections (l) and (m), respectively, also.

Clearly, these veterans suffer severe disabilities. In the best of cases, these veterans are able to use a prosthesis or prosthetic devices. However, without the use of the elbow joint and the second extremity, such veterans have little ability to care for themselves. Gripping and carrying capabilities are minimal and only limited function is restored. The veteran is often unable to dress, shave, feed or care for personal hygiene needs without assistance, including putting on, adjusting or removing a prosthesis. Those veterans who have lost or lost the use of their lower extremities are, by contrast, in the absence of additional disability, often able to function without the aid of others attending to their personal needs and are capable of greater independence in travel and employment.

The distinction between the loss or loss of use of extremities based on the consequent comparable loss of function is recognized in the present law with regard to loss of a single upper extremity and a single lower extremity. A veteran who has lost or lost the use of a single upper extremity on his/her major side—that is, loss on the right side to a right-handed person and loss on the left side to a left-handed person—is entitled to a higher rate of compensation than if the loss had been on the minor side or if either lower extremity was lost. The disparity between compensation for major and minor extremity losses is not reflected in single lower extremity losses as there is no comparable dexterity function involved between the lower left and right extremity.

However, current law does not recognize the different degrees of loss of function when considering compensation rates for bilateral upper and lower extremity losses. The Committee believes that this disparity should be rectified by increasing the compensation rates for those veterans with bilateral upper extremity losses to reflect the greater degree of functional impairment.

Committee bill provisions

The Committee bill would increase the compensation rate for the loss or loss of use of both hands from that awarded under subsection (l) of section 314, the same subsection which authorizes compensation for the anatomical loss or loss of use of both feet, or of one hand and one foot, and places it within the purview of subsection (m), which subsection also includes compensation for the anatomical loss or loss of use of two legs or an arm and a leg. The bill would also increase the rate of compensation awarded to those veterans who have suffered the anatomical loss or loss of use of both arms at a level, or with complications, preventing natural elbow action with a prosthesis in place from that awarded under subsection (m) to subsection (n) which also includes the anatomical loss of two extremities so near the shoulder or hip as to prevent the use of a prosthetic appliance—that is, two lower extremities or one upper extremity and one lower extremity. Finally, the bill would increase the compensation rate for a veteran who has suffered the anatomical loss of both arms so near the shoulder as to prevent the use of a prosthetic appliance from that awarded in subsection (n) to that awarded in subsection (o), the only disability relating to extremities contained within that subsection.

The Committee anticipates that this legislation will rectify the disparity between compensation rates for loss of function between those who have suffered the anatomical loss or loss of use of both upper extremities and those who have suffered a loss of the lower extremities.

TITLE III: AUTOMOBILE ASSISTANCE AND ADAPTIVE EQUIPMENT AMENDMENTS

Title III of the Committee bill would increase the amount of the automobile assistance allowance provided by the Veterans's Administration to veterans with certain severe, service-connected disabilities and would extend eligibility for the provision of automobile adaptive equipment to certain other service-connected disabled veterans.

Automobile Assistance Allowance Increase

The program of automobile assistance—now codified in chapter 29 of title 38, United States Code—was established by the Congress in Public Law 79–663, enacted in 1946. Under this program, veterans who have suffered the service-connected loss or loss of use of one or both feet or hands or service-connected blindness are entitled to a one-time VA grant to assist them in purchasing an automobile.

Public Law 91–666, enacted in 1970, increased, effective January 11, 1971, the maximum amount of the allowance payable toward the purchase of an automobile or other conveyance from the original allowance of $1,600 to $2,800. According to the Senate report accompanying the Senate version of H.R. 370 (Senate Report No. 91–1232, page 14), this increase was enacted in order "to reestablish, to an effective degree, the comparability which originally existed between the cost of an automobile or other conveyance and the monetary assistance provided for its purchase." In 1974, Public Law 93–548 increased the amount of the allowance to $3,300, effective February 1, 1975. An increase to the current level of $3,800 was provided for by enactment of Public Law 95–479, effective October 1, 1978.

Since the effective date of the last increase, the Bureau of Labor Statistics' Consumer Price Index component for new automobiles had increased 21.6 percent as of May. It is expected that this component will continue to increase through October.

Section 301(2) of the Committee bill would increase the automobile assistance allowance to $5,000, effective October 1, 1981, so as to help insure that the value of this benefit keeps pace with inflation.

Extension of Eligibility for Adaptive Equipment

In 1970, Public Law 91–666 also provided for the VA to furnish—in addition to the automobile assistance allowance—necessary adaptive equipment and installation, maintenance, and replacement for those eligible for the allowance. Pursuant to DVB circular 20–76–105 and DM&S Circular 10–75–137, payment for the adaptive equipment is generally made by reimbursement to the veteran of the appropriate cost of the equipment.

Service-connected disabled veterans who have not actually suffered an amputation, but who have incurred serious injury resulting in the loss of use of an extremity are eligible for this payment. However, there are veterans who have incurred certain disabilities which can preclude them from safely operating a motor vehicle that has not been adapted but who are not so eligible under current law.

Specifically, service-connected disabled veterans who suffer from ankylosis—the stiffening of a joint as the result of abnormal bone fusion—of the knees or hips at so-called favorable angles do not meet the VA's criterion for the requisite determination that the veteran has suffered the "loss of use" of a lower extremity. VA data indicate that 2,512 veterans are in receipt of service-connected compensation for such a disability.

Although veterans who suffer from ankylosis of the knees or hips at an unfavorable angle meet the VA's "loss of use" criterion and are therefore eligible for adaptive equipment assistance, veterans who suffer from ankylosis at favorable angles do not qualify for either the automobile award or the adaptive equipment assistance. However, in some cases, these veterans may need special adaptive equipment—such as left-foot accelerators, power brakes, hand-held parking brakes, or automatic transmissions—before they can safely operate their motor vehicles.

In the Committee's view, it is appropriate that the Federal Government assist these veterans in bearing the cost of the adaptive equipment they need in order to operate a motor vehicle. This category of service-connected disabled veterans appears to be the only category of such veterans who need automobile adaptive equipment and who are not considered to have lost or lost the use of one of their limbs; testimony received by the Committee at the June 11 hearing did not indicate that there are other groups of such veterans with similar needs.

Thus, section 301(3) of the Committee bill would extend, effective October 1, 1981, eligibility under specified circumstances for an adaptive equipment award to a veteran who is entitled to service-connected compensation for ankylosis of one or both knees, or one or both hips but who is not considered to have lost the use of a lower extremity. In such cases, the award would be made to provide such adaptive equipment to overcome the resulting disability as is neecssary for the veteran to satisfy his or her State's drivers' licensing laws or regulations, or as it determined to be necessary by the VA's Chief Medical Director, to operate his or her motor vehicle safely.

TITLE IV: VETERANS' ADMINISTRATION HOUSING BENEFITS AMENDMENTS

The Committee amendments establish a graduated-payment plan as part of the Veterans' Administration loan guaranty program and increase the amount which may be granted to eligible service-connected disabled veterans for specially adapted housing assistance.

Establishment of graduated-payment loan program

Background

The Veterans' Administration provides assistance to help veterans acquire housing in a number of ways. The principal form of

such assistance is provided by the loan guaranty program, chapter 37, of title 38, United States Code. The purpose of the loan guaranty program is to facilitate and encourage the extension of credit by private lenders to eligible veterans for the purchase, construction, repair, alteration, or improvement of residences purchased by veterans. This objective is implemented by substituting the guaranty of the Federal Government for the investment protection provided under the terms of a conventional mortgage by down payments and shorter term loans. The loan guaranty enables eligible veterans to finance home purchases although they would not qualify for conventional loans. The program provides loans for the purchase of conventional homes, condominiums, farm residences and mobile homes.

In the past, the Veterans' Administration has supplemented its loan guaranty program with a direct housing loan program in areas identified by the Administrator as "housing credit shortage areas". In such areas, typically rural areas or small cities and towns, private lenders were not readily available to provide VA-guaranteed home loans. Under the direct housing loan program the VA assumed the role of lender and made direct loans to eligible veterans for the purchase or improvement of housing. However, since conventional financing is now available in virtually every area of the country, this program is presently being utilized solely to assist those severely disabled veterans eligible for specially adapted housing assistance to purchase their homes.

The specially adapted housing grant program provides grants to veterans with certain permanent, service-connected disabilities to acquire necessary housing adapted with special fixtures and other modifications. This program enables such severely disabled veterans to acquire housing to fulfill their special needs, such as wider doorways to accommodate wheelchairs, ramps instead of stairs, and oversized specially equipped bathrooms. The VA provides experts in creating specially adapted housing to work closely with the veteran and the designers and builders of specially adapted new homes or modified structures which will meet the veteran's needs. Under current law, the grant is limited to 50 percent of the cost to the veteran of the housing unit and the land on which it is located up to a maximum of $30,000.

Under current laws, generally, the minimum length of active service necessary for entitlement varies from 90 days for veterans of World War I[I], the Korean conflict and the Vietnam era to 181 days for those veterans who served between or since these periods of conflict.

The Government's guaranty on a loan is limited to a percentage of the loan and is further limited by a maximum dollar amount, such restrictions being dependent in each case by the purpose of the loan.

The VA loan guaranty program is extremely important both to veterans who are helped in the purchase of homes and to the economy as a whole, which benefits by the stimulus provided by veterans activity in the housing market. Unfortunately the soaring costs of purchasing a home, exacerbated primarily by the nearly unprecedented increases in mortgage interest rates, have forced many potential first home buyers out of the housing market. The Committee believes that the time has come to introduce a graduated-payment plan into the VA's loan guaranty program.

Committee bill provisions

The Committee bill would amend section 1803(d)(2) of title 38 to authorize the Veterans' Administration to offer and guaranty graduated payment loans. The amendment is necessary in order to establish a graduated-payment plan inasmuch as present law is construed to require VA guaranteed loans be repaid in equal monthly installments.

The Committee bill would authorize the Veterans' Administration to establish a graduated-payment plan similar to that presently offered by FHA under section 245 of the National Housing Act, 12 U.S.C. section 1715d–10. FHA has had approximately 5 years' experience with this mortgage plan and reports a low default rate.

Graduated-payment mortgages entail a negative plan of amortization during the early years of the loan period. During the "graduation" period a portion of the interest due on the loan each month is deferred and added to the principal balance. During this initial period the lower payments do not even cover principal and interest and the loan balance actually exceeds the original mortgage amount. The result, therefore, is monthly payments which are lower, for the first few years, than the corresponding monthly payment on a conventional mortgage, where all of the interest and a portion of the principal are scheduled to be paid each month. During the graduation period, typically lasting 5–10 years, the veterans' payment will increase periodically to successively higher levels until the graduation period is ended and the payments thereafter remain the same for the duration of the loan period. From that point on, each scheduled loan payment includes all the interest plus a portion of the principal as does a conventional mortgage, but, because the principal obligation has been increased by the amount of interest deferred during the graduation period, the monthly payment required to amortize the loan after the leveling off point are greater than they would have been for a conventional loan.

The Committee bill anticipated two graduated-payment loan programs. One option would require that the principal amount of the loan, including deferred interest, not exceed the value of the property as determined by the Administrator, at the time the loan is made. Since deferred interest would increase the loan principal, loans made under this plan would require a significant down payment. The required down payment would have to be sufficient to absorb at least all of the interest to be deferred during the graduation period. The second option would enable the VA to guaranty a loan based on the projected value of the property over the life of the loan. Such projected value would be calculated by increasing the reasonable value of the property as of the time the loan is made, at a rate not to exceed 2.5 percent per year up to 115 percent over the term of the loan. This would greatly reduce or obviate the requirement for a down payment. As the graduated-payment plan is offered to benefit younger, lower-income veterans who are less likely to have saved a substantial down payment, the Committee anticipates that the Administrator would design the graduate payment loan program so that veterans would be able to take advantage of the latter option.

The bill would restrict the use of graduated-payment loan program to the acquisition of a single family site-built homes, condominium units and manufactured housing.

Finally, the Committee bill would amend section 1828 to exempt such VA loans from any State law prohibiting interest on interest, or requiring minimum amortization.

Specially adapted housing assistance increase

Section 403 of the Committee bill would increase from $30,000 to $35,000, effective October 1, 1981, the maximum amount payable in specially adapted housing assistance under chapter 21 of title 38, United States Code, to certain veterans with total and permanent service-connected disabilities. The Committee bill would also make certain technical changes in chapter 21.

Under the program of specially adapted housing assistance for disabled veterans, often referred to as the "wheelchair home" program, the VA assists veterans with certain permanent and total service-connected disabilities in acquiring suitable housing with adaptations made necessary by the nature of their disabilities. Under current law, these disabled veterans are eligible for a grant not to exceed 50 percent of the cost of the home and the necessary land, up to a maximum of $30,000. Veterans eligible for housing assistance grants are principally quadraplegics, paraplegics, amputees, and others who require the use of a wheelchair, braces, or crutches to move about. Their disabling conditions may require ramps, special bathroom equipment, extra-large rooms and hallways, and other adaptations that are essential for their health and safety.

When originally enacted in Public Law 80–702 in 1948, the specially adapted housing program provided for assistance of up to $10,000. At that time, the average cost of construction for a new single-family residence was $7,800. Housing construction costs have risen steadily since then, and the maximum amount of assistance has been increased on four occasions. The last increase was made by Public Law 95–476, which raised the maximum to $30,000, effective October 1, 1978. At the time, the average cost for the construction of a specially-adapted home was estimated to be $66,000. Since then it appears, based on data provided by the National Association of Home Builders, that the average cost of such a home has risen to $75,700. By raising the maximum limit from $30,000 to $35,000, the Committee bill would enable a majority of veterans who are eligible for this benefit to obtain assistance approximating 50 percent of the cost of the home and thus help meet the needs of this special group of veterans.

TITLE V: MISCELLANEOUS PROVISIONS

Continued payment of pension to certain hospitalized veterans

Subsection (a) of section 3203 of title 38 is amended by adding a new subparagraph (D) which extends the period of hospitalization to 189 days, for any veteran in a prescribed program of rehabilitation, before pension benefits of such veteran can be reduced.

Under current law, any single veteran is subject to a reduction in pension benefits after the end of the third full calendar month following the month of admission for such care in a hospital or nursing home. The pension is reduced to $60 per month during the period of hospitalization. The Committee amendment provides that veterans being furnished hospital or nursing home care by the Veterans' Administration shall not be subject to such reduction in pension payments until or unless such veteran receives hospital or nursing home care for a period up to 180 days within any 12-month period if such veteran is in a prescribed program of rehabilitation, as prescribed by chapter 17 designed to restore the veterans ability to function within the family and community.

The purpose of this amendment is to encourage eligible veterans to participate in such a program of rehabilitation and eliminate the disincentive to participate which exists under current law. The Committee bill serves also to differentiate between those veterans receiving traditional medical care and those who enroll in rehabilitation programs. Rehabilitation programs serve to make the veteran more self-sufficient. The Committee does not wish to deter veterans from entering into long-term rehabilitation programs by reducing pension payments at three months and thereby reducing the veterans' ability to pay bills and ongoing living expenses which continue and accumulate during the period of rehabilitation. Veter-

ans should not be faced with the dilemma of experiencing financial hardships or participating in a comprehensive rehabilitation program designed to enhance self-sufficiency.

Headstones and markers in certain cases

Subsection (b) of section 906 of title 38 is amended to provide memorial headstones or markers to commemorate certain veterans whose remains are not interred. The Administrator is authorized to furnish appropriate memorial headstones or markers for those veterans whose remains were not recovered or identified, those veterans whose remains were buried at sea, whether by choice or otherwise, those veterans whose remains were donated to science and those veterans whose remains were cremated without interment of any portion of the ashes. Under this subsection the Administrator is authorized to furnish such memorials for placement in a national cemetery area reserved for such purposes, or in any private, local, or State cemetery. Subsection (a) of section 1003 is amended and directs the Administrator to set aside suitable areas in national cemeteries to honor the memory of such veterans and those who are missing in action.

The funeral and burial benefits provided by chapter 23 of title 38, administered by the Veterans' Administration, serve a twofold purpose. First, they provide peace-of-mind for and ease the financial burdens of those veterans and their families who can ill-afford the increasing expense of funerals and burials. Second, and more importantly, the program facilitates commemoration of those citizens who served their country, some of whom were seriously disabled or lost their lives as a result thereof. Congress has historically considered commemoration of such citizens its solemn duty and it is to this purpose the Committee bill is addressed.

Current law provides for commemoration, of those whose remains cannot be interred, in national cemeteries. The Committee bill would expand the program by authorizing such commemoration in local, private and state cemeteries also. There is, however, no provision in chapter 23 for honoring those deserving veterans who have chosen not to have their remains interred. The need for new legislation became apparent as increasing numbers of veterans chose to donate their remains to science or to have their remains cremated and the ashes scattered. Memorialization of the sacrifices made by these veterans in the service of their country should not be neglected merely because their remains are not interred. The Committee believes that veterans choosing either such alternative to burial should not be denied recognition of their sacrifice because of that choice. Such an outcome is entirely inconsistent with the intent of current law. The Committee believes that the proposed bill will rectify this inconsistency and insure that the intent of Congress, to honor the memory of our deserving veterans, is realized.

The Committee notes that, in addition to effectuating the above described purpose of this amendment, other beneficial results will follow. The selfless decision to donate one's remains to science serves to further medical advancements and, along with those who choose cremation without interment, reduces the heavy demand for gravesites in our national cemeteries.

Radiation literature review

Background on Nuclear Weapons Tests

Beginning in 1945 and continuing until the Limted Test Ban Treaty in 1963, the United States detonated 235 nuclear devices in connection with its atmospheric and underwater nuclear weapons testing program. The Department of Defense (DOD) estimates that approximately 250,000 DOD personnel participated in the tests. In addition, approximately 25,000 DOD personnel were attached to the United States occupation forces in Hiroshima and Nagasaki, Japan, following the detonation of atomic bombs over those two cities on August 6 and August 9, 1945, respectively.

In general, the average recorded exposure of these troops to radiation generated by a man-made device has been estimated by a Department of Defense contractor (Reynolds Electrical & Engineering Co.) to be approximately one-half rem.[1] However, film badges and dosimeters that were intended to monitor individual exposures were often provided to only one individual in a unit rather than to each individual. In addition, variations in the accuracy of monitoring techniques are known to have existed, and some types of radiation and some forms of exposure—such as ingestion or inhalation of irradiated particles—were not measured at all.

Although in the Committee's view it is important to keep in mind that these tests were conducted during a period of great international tension in which national security considerations were of paramount importance, the Committee notes that review of historical documents concerning the nuclear weapons testing program reveals that considerable controversy existed, preceding the conduct of most of the tests, about the safety standards for human exposure to radiation, and notes further than a considerable amount of information about that controversy was withheld from test participants until recent years. With respect to the participation of troops in the weapons tests, the expert view that prevailed at that time tended to minimize the risk of disability resulting from exposure to low levels of radiation. Today, scientists have moved toward a consensus regarding safe exposure standards and are in general agreement that there is no completely safe level of exposure to radiation.

Scientific Uncertainties Regarding Health Effects

The long-term health effects of exposure to low levels of radiation are not yet completely understood. However, it is clear that exposure of humans to certain levels of ionizing radiation causes an increased incidence of malignant tumors and can cause genetic damage. What is unclear is how much increased risk is caused by exposure to levels of radiation that are not "massive", and practical limitations—in terms of the very large population that would be required for valid followup—may prevent for some time a definitive determination of risk at lower levels of exposure. Another uncertainty in those areas arises from the fact that there is a long interval—the "latent period"—between radiation exposure and the subsequent development of malignancies. On the basis of the scientific evidence now available, therefore, the issue of fair compensation for conditions that develop in individuals who have been exposed to relatively low levels of radiation in medical, occupational, and military contexts is a highly complex one.

Committee hearings

On June 20, 1979, the Committee held hearings to gather information about the difficulties experienced by veterans and survivors in using the current Veterans' Administration adjudication system for radiation exposure-related claims. Testimony was received from veterans, survivors, and representatives of veterans' service organizations who had personal experience with such claims, and the DOD, the VA, the Department of Energy, the Interagency Task Force on Ionizing Radiation chaired by the Department of Health, Education, and Welfare, the Center for Disease Control and the National Academy of Sciences.

The most important outcomes of the hearing, described in greater detail on pages 34–36 of Senate Report No. 96–260, which accompanied S. 689, the proposed "Veterans' and Survivors' Benefits Adjustment Act of 1979", included—

The VA's agreement to issue agency-wide instructions establishing certain presumptions on test participation and directing that credible estimates of radiation exposure—even if higher than actual badge or dosimeter readings—be used in adjudicating claims;

The VA's agreement to develop, in collaboration with other appropriate Federal departments and agencies, generally accepted medical principles concerning radiation-related illnesses as well as enumeration of areas where uncertainties exist about that knowledge;

The DOD's announcement that geographic reconstructions are used in its development of radiation exposure estimates for test participants;

The DOD's agreement to make publicly available, through declassification if necessary, any document or section of a document related to personnel participation or radiation exposure during the tests that would not jeopardize national security by its release and to make publicly available, and keep updated, a list of such documents; and

The agreement of the VA and the DOD, in a memorandum of understanding signed on June 15, 1979, and clarified during the Committee's hearing, to work closely to assist claimants in gathering information in support of claims and to provide timely reconstructions, as requested with respect to the participation and exposure to radiation during the tests of individual veterans.

The Committee's hearing—and related hearings held by other Committees of the Congress during the 95th and 96th Congresses—demonstrated that the Federal Government failed to follow up medically on test participants after their exposure to radiation in order to determine what, if any, long-term adverse health effects such veterans may be experiencing as a result of their participation. Further, hearings in the Congress during the past three years have shown that, until very recently, the Federal Government had done little in the way of systematic efforts to assist veterans and survivors in bringing claims for VA service-connected disability or death compensation on the basis of radiation exposure.

The Committee notes that on June 16, 1981, the Senate passed a provision (section 3 of H.R. 3499) that would provide basic VA health-care eligibility to veterans who are concerned that their exposure during service to radiation from a nuclear device has resulted in health problems, if the Administrator of Veterans' Affairs determines there is credible medical evidence linking the veteran's disability or disease to human exposure to radiation. In this provision, which also would afford the same access to VA health-care services to Vietnam veterans in connection with exposure to agent orange, the Senate expressed its view that the benefit of the doubt should be resolved in favor of the veterans involved in connection with the origin of the health problems they are experiencing in the absence of definitive scientific and medical information sufficient to arrive at a favorable determination of the service-related nature of a specific disability or disease.

Available Scientific Information

Scientific inquiries on the biologic effects of exposure to radiation—and in particular the health effects in humans of such exposure—have been pursued for many years, and reports that describe the findings of

[1] A "rem", an abbreviation for roentgen equivalent man, is a unit of radiation exposure measurement which reflects the amount of biological effect done by a particular form of radiation.

these studies are voluminous. In fact, as the GAO pointed out in its January 2, 1981, report entitled "Problems in Assessing the Cancer Risks of Low-Level Ionizing Radiation Exposure" (EMD–81–1), some 60,000 articles have been published internationally on the health effects of ionizing radiation.

During the last 10 years, in connection with comprehensive reviews of the risks of radiation exposure, specific mathematical models have been developed for making predictions about the risks involved in and recommended standards for radiation exposure. Perhaps the most noted of these reviews are the 1972 and 1980 reports of the Committee on Biologic Effects of Ionizing Radiation (BEIR) of the National Academy of Sciences and the 1977 report of the Scientific Committee on the Effects of Atomic Radiation of the United Nations (UNSCEAR). In addition, the above-mentioned 1981 report of the GAO and the June 1979 report of the President's Interagency Task Force on the Health Effects of Ionizing Radiation contain overviews of what certainties exist and what important questions remain unanswered about radiation exposure and what public policy has developed as a result of that state of knowledge.

The Committee notes that in each case the purpose of these comprehensive reviews and reports has been to evaluate scientific information in order to assist in the development of specific policies—such as general exposure standards or the best direction for current or future research—as to how our society should deal with the relative risks involved in human exposure to radiation. Thus, these reports generally serve to distill information from a great number of individual investigations and are generally intended to be helpful in resolving very broad policy questions. But since these reports deal with numerous sources of radiation exposure, they vary in their utility for the purpose of determining VA policy on the adjudication of radiation-exposure cases.

Moreover, the conclusions contained in these comprehensive reviews and reports have generated much controversy—with respect to the analysis and review of certain specific research efforts—and, clearly, experimental and theoretical gains are being made that will likely necessitate updates to be undertaken for many years on data which have been available and about which there has been some consensus among certain scientists. In this regard, it was reported in an article entitled "New A-Bomb Studies Alter Radiation Estimates", published in the May 22, 1981, issue of Science (vol. 212, pages 900–903), that, as a result of advancements being made in computer technology, certain new techniques when applied to data on the bombings of Hiroshima and Nagasaki appear to show that many of the basic assumptions about the radiation fields produced by these atomic blasts may be incorrect and that human exposure to low-level radiation—including gamma ray exposure—may turn out to be more toxic than had been thought. Thus, because the state of knowledge as to the risks involved in and the possible outcomes of human exposure to radiation is a developing one, it is most important that the VA generally keep itself updated in this area; particularly the VA should keep abreast of new data (or new applications of already available data) and theories. The Committee believes that the processes and disciplines that the VA would need to develop in order to conduct the literature review and analysis (and the report and followup thereon) in the manner contemplated in section 504 of the Committee bill would, in addition, provide the VA with mechanisms to facilitate and enhance its efforts to remain current on developments.

Committee bill provisions

Section 504 of the Committee bill would require the VA to conduct a review and analysis of literature relating to long-term adverse health effects of human exposure to radiation, and provides expressly that the required review should encompass literature regarding nuclear device, medical, and occupational exposures to radiation. This section would provide for a radiation literature review in a manner very similar to the dioxin (agent orange) literature review the VA currently is conducting pursuant to the agent orange study mandated by section 307 of Public Law 96–151. The Committee bill also incorporates certain concepts embodied in proposed amendments to the agent orange study mandate that were passed by the Senate on June 16, 1981, in a substitute amendment to H.R. 3499 to clarify that the term "health effect" includes genetic and psychological effects and to require the promulgation of regulations containing guidelines—in light of the information available as a result of the literature review and other information—for resolving claims based on exposure to radiation from nuclear devices during active duty service. The Committee bill also includes a provision—derived as well from the Senate-passed amendments to the agent orange study mandate mentioned above—to authorize expressly the Administrator of Veterans' Affairs to contract with a non-VA entity for the conduct of the required review.

In connection with the required radiation literature review, the Committee bill would direct that the Administrator consult with and actively coordinate with other entities in the Federal Government that are involved or have been involved in radiation exposure-related studies. In this manner, the VA will be knowledgeable about radiation-related activities elsewhere in the Federal Government, and the VA would be provided with up-to-date reports with respect to ongoing federally funded research projects.

The purpose for the required radiation literature review and active coordination and consultation with other Federal entities is to assure that the VA is fully informed about available, relevant scientific information regarding human exposure to radiation. By requiring the VA to pull together such information specifically for the purpose of reaching reasonable determinations with respect to the very complex issues involved, the Committee seeks to assure that the VA is as informed as possible in order to be better able to resolve fairly and consistently radiation-related claims.

Section 504 of the Committee bill also would require the Administrator to submit two reports to the Congress. First, not later than 90 days after the date of enactment of the Committee bill, the VA would be required to submit a report on the steps taken and the plans made to assure that the required coordination with other Federal entities occurs. Second, not later than 18 months after the date of enactment of the Committee bill, the VA would be required to submit a report on the literature review, which would include comments and recommendations for, as necessary, both administrative and legislative action, as well as specific recommendations regarding the need for the VA to conduct further research of its own on the long-term adverse health effects of exposure to radiation. Further, the Administrator would be required to submit to the Federal entities with which the VA would be required to consult a copy of the report on the literature review, and to recommend to those Federal entities, as appropriate, that they carry out such additional research as the report might indicate is needed.

Finally, as mentioned above, section 504 of the Committee bill incorporates provisions—similar to the Senate-passed proposed amendments to the agent orange study and literature review—that would require the Administration, not later than 90 days after the submission of the report on the literature review, to publish proposed regulations containing guidelines, standards, and criteria for resolving disability compensation claims based on radiation exposure and, after a public review and comment period, to promulgate final regulations. Thus, veterans and their survivors filing such claims would be assured that the VA is required to act with respect to the information that becomes available to it as a result of the proposed radiation literature review.

However, the Committee notes that nothing in this provision in any way requires the VA to change its policies or procedures with respect to consideration of such claims, which are set forth basically in section 0–20 of Program Guide 21–1. By requiring that proposed regulations be published in the Federal Register with the opportunity for public review and comment, the Committee intends to assure that the policies and procedures applied by the VA in making determinations in these claims are matters with respect to the development of which there is full public participation. But, the Committee emphasizes again that, if the VA proposed no changes in its policies or procedures as a result of the proposed literature review, it could publish section 0–20 of Program Guide 21–1 (with certain technical modifications), together with its reasons for so doing in light of the report on the literature review, and meet the requirements of this provision in the Committee bill. (For example, it should be noted that section 504 would not require the VA to develop rules with respect to the specific adverse health effects that develop subsequent to a known exposure to a quantifiable dose of radiation. Nor would the VA be required to quantify precisely the health risk to which a claimant was subjected in connection with in-service radiation exposure. Whether such guidelines can properly or should be established by the VA will be a matter for the agency to decide.)

Pre-existing Authority To Conduct Research

With respect to carrying out the literature review and analysis that would be required by section 504, the Committee notes that section 4101(c) of title 38, United States Code, already authorizes the Administrator to carry out a program of medical research. In the Committee's view, that open-ended authority to conduct research and implicitly to authorize such appropriations therefor as may be necessary applies to the literature review and analysis that would be required by section 504 of the Committee bill.

Minimum active-duty service requirement

Background

New Section 977 of Title 10 Added

During the Second Session of the 96th Congress, the Senate Armed Services Committee reported, on June 20, 1980 (S. Rept. No. 96–826), and the Senate passed, on July 2, in the Department of Defense Authorization Act, 1981, a provision adding to title 10, United States Code, a new section 977, entitled "Denial of certain benefits to persons who fail to complete at least two years of an original enlistment." The House of Representatives accepted the provision and it was signed into law on September 8, 1980, in Public Law 96–342.

The provision grew out of concerns that excessive numbers of servicemembers were, through inappropriate or unproductive conduct, bringing about their early discharges, that many of them had enlisted for the purpose of obtaining eligibility for veterans' benefits based on short periods of service, and that it is wasteful for the Federal Government to provide veterans' benefits to those who fail substantially to fulfill their active-duty service commitments.

Briefly, section 977 provides, with certain exceptions, that any person who originally enlists in the service after September 7, 1980, and fails to complete at least 24 months of that original enlistment shall not be eligible for any right, privilege, or benefit (hereinafter referred to as a "benefit") based on active-duty service performed under that enlistment. This denial of benefits applies to benefits under title 38, relating generally to veterans' benefits and services, which is under the jurisdiction of the Veterans' Affairs Committee, under laws other than title 38 that are administered by the VA, which are also under the jurisdiction of the Veterans' Affairs Committee, and under any other Federal laws providing for any benefits based on active-duty service. Pursuant to the exceptions specified in section 977, this denial of benefits does not apply to those who (1) were discharged under section 1173 of title 10, providing for hardship discharges for enlisted personnel who have dependents, (2) were discharged under chapter 61 of title 10, providing for separations because of physical disability, or (3) have been determined to be suffering from a disability that resulted from an injury or disease incurred in or aggravated during the period of enlistment and that was neither the result of the individual's "intentional misconduct" nor "incurred during a period of unauthorized absence".

Generally, former enlisted personnel who initially entered the service after September 7, 1980, would be denied a limited range of benefits under section 977. Since, as noted above, section 977 is generally not applicable to veterans who have a service-connected disability, benefits—such as VA disability compensation and comprehensive VA health-care services for service-connected disabilities—that are granted on the basis of such disabilities would not generally be denied. Also, so long as the United States is not in a period of war, VA pension, and civil service preference rights, and certain other benefits that are available only to veterans with either some wartime service or service-connected disabilities would generally not be denied under section 977. Thus, it appears that the only major categories of benefits that a veteran with no service-connected disability generally would clearly be denied under section 977 are the VA-administered post-Vietnam era veterans' educational assistance programs (VEAP), VA home-loan guarantees, VA health care for certain non-service-connected disabilities, and certain VA-supervised insurance. These benefits are all administered by the VA, and a 181-day minimum service requirement already exists in title 38 both for the receipt of the $2-for-$1 VA matching contributions under VEAP and for VA home-loan guarantees.

Although section 977 would on its face seem clearly to apply to ex-service members unemployment compensation under section 8521 of title 5, the Committee is advised that the Department of Labor has concluded that the more specific minimum service requirement in title 5—365 days (increased from 90 days by section 415 of Public Law 96-364, enacted on September 26, 1980—applies instead.[2]

Problems Under Section 977

The Committee has analyzed section 977 and reviewed its implementation and noted the following problem areas with respect to programs under laws within the Committee's jurisdiction. First, the application of the two-year minimum service requirement only to enlisted personnel, and not to officers, seems inequitable to the Committee.

Second, in the cases of those with initial 2-year enlistments who are discharged early under section 1171 of title 10, which provides for certain discretionary discharges up to three months before the expiration of an enlistment, the denial of benefits under section 977 appears to be in conflict with the language in section 1171 providing that discharges under that section do "not affect any right, privilege, or benefit, or benefits" (other than pay and allowances) that the individual would receive for completing the enlistment.

The Committee is advised by the Department of Defense that section 1171 is used to discharge active-duty personnel when budgetary or authorization limitations require a reduction in strength and when necessary in order to avoid non-productive reassignments for short periods of time, as in the cases of, for example, those with 90 days or less to serve after the deactivation or change of location of their units and those who are returned from overseas for discharge at the port of entry and complete their separation processing before the expiration of their enlistments.

In regulations implementing section 977, the VA took the position that two-year enlistees discharged under section 1171 who have no service-connected disabilities are not eligible for benefits on the basis that they fail to meet the minimum service requirement. (38 C.F.R. § 3.12a, published in volume 46 of the Federal Register at page 23,925 (April 29, 1981)).

Third, the exception to the denial of benefits for those who have a disability that resulted from a service-incurred or-aggravated disability applies even to those who have only noncompensable (zero-rated) disabilities, such as treatable dental cavities and non-disfiguring scars.

Fourth, section 977 requires the denial of benefits for compensation and VA health care for a disability incurred on active duty during any period of unauthorized absence, no matter how brief or inconsequential. The comparable title 38 provision governing the issue whether a disability resulting from an injury or disease incurred during an unauthorized absence may be considered service connected, section 105(b)(1), precludes a finding of service connection only if the individual was avoiding duty by deserting or by taking an unauthorized absence that materially interfered with the performance of military duties.

Fifth, some question has existed as to whether section 977 was intended to deny benefits to the survivors of those who died after leaving service and were themselves made ineligible for benefits by section 977. In the explanatory material accompanying the above-mentioned regulations when they were originally published in proposed form, the VA took the position that the language of section 977 "expressly limits its application to servicepersons. It does not prohibit the payments of death benefits to the survivors of a veteran who served less than 24 monts . . . ." (Federal Register, vol. 46, page 8575 (January 27, 1981)). Therefore, the proposed regulations did not modify the eligibility criteria in VA regulations for dependency and indemnity compensation or burial allowances, and the regulations were ultimately promulgated without change.

However, in a March 20, 1981, decision, the VA's General Counsel concluded that, in the cases of deceased veterans who were discharged before completing two years of active duty and met none of the section 977 exceptions, section 977 requires the denial of the Servicemen's Group Life Insurance claims of their survivors, who would otherwise be entitled to SGLI proceeds under section 768(a)(1) of title 38, which provides for the payment of proceeds when the veteran dies within the first 120 days after discharge (or up to one year after discharge if the veteran was totally disabled on the date of discharge). In reaching that conclusion, the General Counsel viewed the issue as one involving the veteran's insurance coverage, which he considered a "right, benefit, or privilege" of the veteran—rather than as one involving the SGLI beneficiaries' rights—and, thus, he did not address the issue of whether section 977 applies directly to SGLI beneficiaries' and other survivors' benefits.

In addition to having serious concerns regarding these issues, the Committee considers it highly inadvisable for the requirements of title 38 benefits eligibility or entitlement (hereinafter in this discussion, the term "eligibility" is used to reform to both eligibility and entitlement) to be set forth in part outside that title of the United States Code.

Prior to the enactment of section 977, all eligibility requirements for title 38 benefits were set forth in that title. Title 38, on its face, purports to establish all of the conditions of eligibility for the benefits provided in that title. Anyone looking at the provisions of title 38 would have no reason to suspect that provisions of law in another part of the United States Code would override title 38 with respect to eligibility issues.

Committee Bill Provisions

In order to bring the provisions governing eligibility for title 38 benefits and for VA benefits under other laws back into title 38, and to make certain changes in the effects of the section 977 provisions on eligibility for such benefits, section 505 of the Committee bill would amend title 38 to add a new section 3103A generally imposing a two-year minimum service requirement. The provisions of the new section are as follows:

The new title 38 section would provide that, notwithstanding any other provision of law (which would, of course, include section 977 of title 10), only the minimum service requirements that are set forth expressly in title 38 shall apply with respect to the eligibility of any person for a benefit under title 38, or for VA benefits under other laws, based on the service of a person who initially enters active duty after September 7, 1980. This new section generally goes on to impose a minimum service requirement of two years or the full initial obligation period, whichever is less, on those first entering active duty after that date.

Benefits for Veterans

(a) Scope: Regarding the scope of the new section, it would apply—to the exclusion of section 977—to eligibility for any benefit (defined for purposes of the new section to include any right or privilege) under any laws administered by the VA, which includes certain provisions of public law not contained in title 38 or other parts of the United States Code, such as section 2 of Public Law 95-126 (relating to health care for the service-connected disabilities of certain ex-servicemembers with non-qualifying discharges) and any benefit under title 38. Most of the provisions of title 38 are administered by the VA, but some are administered by another agency or agencies of the Federal Government, such as certain veterans' reemployment rights provisions of chapter 43 of title 38, which are administered by the Department of Labor.

The new title 38 provision would not, however, apply to benefits under laws that are neither administered by the VA nor contained in title 38, such as unemployment compensation for ex-servicemembers under subchapter II of title 5, which is administered by the Department of Labor.

The scope of the proposed title 38 provision would be broader than section 977 with respect to the active-duty servicemembers affected because it would include commissioned and warrant officers in addition to

[2] It is not clear to the Committee whether section 977 will be interpreted as applying to various benefits under social security and civil service laws so as to deny the veteran the benefits he or she would otherwise earn under those laws for each month or year that he or she served on active duty.

enlisted personnel, the only category of personnel affected by section 977. However, as discussed more fully below in connection with the prospective and retroactive application of the proposed title 38 provision, the denial of benefits would be applicable only to officers who initially enter active duty after September 30, 1981.

With respect to those whose initial enlistments or other initial periods of obligated service are for less than twenty-four months, the proposed title 38 provision would require as a condition of benefits eligibility, in lieu of the two-year requirement in section 977, that the individual complete the full period of obligated service. It is the Committees understanding that less-than-two-year periods of obligated active-duty service are not currently being used. However, it is certainly conceivable that one or more branches of the Armed Forces would make use of, for example, 20- or 18-month enlistments (or that, in certain eventualities, some reserve units would be put on active duty for a specified period of less than two years). In such cases, the Committee believes that it would be unfair to require—as section 977 seems to require—that the veterans who complete their full under-two-year tours of active duty generally be denied benefits simply because they failed to serve at least two years of active duty. Thus, in the cases of those whose initial period of obligated service is for less than two years, the Committee bill would require a denial of benefits only if they fail to complete their entire period of active duty (and if no other exceptions, discussed below, apply).

Finally with respect to the scope of the new section, the Committee notes that it is not designed or intended to prohibit the otherwise available inservice use of any benefits, such as the VA home-loan guaranty under chapter 37 of title 38, prior to the completion of the minimum service requirements. Under section 977, it is not entirely clear to the Committee whether such inservice use of benefits was intended to be permitted.

(b) Exceptions: Under the proposed title 38 provision, there would be several exceptions to the general denial of benefits for those discharged before completing two years of service. Those exceptions, as compared to the exceptions in section 977, are as follows:

First, benefits would not be denied those who are discharged under section 1171 of title 10, pursuant to which an enlisted person may be discharged up to 90 days before the expiration of his or her enlistment. No such exemption is provided in section 977. However, the Committee believes that, since discharges under section 1171 serve the government's interest and do not reflect adversely on the quality of the individual's service or of the individual's commitment to carrying out fully the obligations of his or her enlistment, such an exception should be provided.

Second, benefits would not be denied those who are discharged under section 1173 of title 10, relating to hardship discharges. Section 977 also provides this exception.

Third, an exception would be provided for those who are "discharged or released from active duty . . . because of a service-connected disability". In a very similar fashion, section 977 provides an exception for those "discharged under . . . chapter 61" of title 10, which provides for separations for physical disability. A major difference between the two provisions is that the proposed title 38 amendment would give the VA the ultimate responsibility for determining whether the disability for which the veteran was discharged would render the veteran generally eligible for benefits. That same approach is followed consistently in title 38 in establishing the criteria for specific benefits. Thus, for example, a discharge because of a service-connected disability is a basis for eligibility for certain health care (section 610(a)(2)), home-loan guaranty (section 1818(a)(3)), and employment assistance (sections 2001(3) and 2011(3)) benefits under title 38. Sections 901 and 902, relating to certain burial benefits refer to discharges for disabilities incurred or aggravated "in line of duty"; but, under the definition of the term service-connected in section 101(16) of title 38, the effect is the same.

Fourth, benefits would not be denied to a veteran who has a compensable service-connected disability. By comparison, section 977 provides an exception for veterans with any service-connected disability, including a disability so slight as to be rated as zero-percent disabling and for which no compensation is payable. As suggested above, the Committee's view is that, in order to provide a basis for general veterans' benefits eligibility for those who would otherwise be ineligible, a service-connected disability should be compensable.

Fifth, an exception would be established for any benefit provided for a service-connected disability or condition. This exception would enable ex-servicemembers who have no compensable disabilities to receive benefits specifically for or on account of particular service-connected conditions or disabilities, such as outpatient treatment for noncompensable dental conditions or disabilities under section 612(b)(2) of title 38. In the Committee's view, it is very important for the Government to meet what the Committee considers a fundamental obligation to provide treatment for service-connected disabilities even though, as noted above, the Committee does not believe that it is appropriate to predicate general benefits eligibility on the basis of zero-rated disabilities.

Sixth, the Committee bill specifically provides an exception for the payment of Servicemen's Group Life Insurance (SGLI) proceeds under section 768(a)(1)(A) of title 38, which provides a 120-day "grace" period (up to a one-year grace period for those who are totally disabled when discharged) following the date of discharge.

Ironically, although section 977 does not, under the VA's interpretation affect survivors' benefits, it does prohibit the payment of SGLI proceeds—despite the fact that the post-service, statutory grace-period coverage is, like all other SGLI coverage, prepaid by premiums paid during active duty. (This is, of course, true until such time as this prohibition on the payment of proceeds is taken into account in the computation of premiums and any resulting reduction in premiums put into effect. As of the present time, the Committee is advised that this has not taken place.)

In the Committee's view, there is very little or no governmental interest served by the section 977 prohibition on the payment of SGLI proceeds. Permitting the insurance proceeds to be paid to the survivors of those who die within the grace period would be very unlikely to have any effect on a servicemember's conduct or attitude toward completing a specified period of service. Moreover, SGLI proceeds are paid by insurance companies out of non-Governmental funds.

On the other hand, the proceeds would be extremely important to certain ex-servicemembers' beneficiaries, such as the surviving spouse and children of a veteran who was unable during the grace period to obtain life insurance to replace SGLI.

Seventh, the Committee bill would make clear that it would have no effect on the provision of benefits under applicable law prior to October 1, 1981. The rationale for this provision is discussed below with respect to the prospective and retroactive application of the provisions of the bill.

Applicability to Survivors

With respect to survivors, the proposed new title 38 section would generally prohibit the provision of title 38 and VA benefits to the survivors of those who would generally be precluded under this new section from receiving benefits. (In addition, the survivors of those who were eligible only for benefits specifically for a non-compensable disability or condition would not be eligible for survivors benefits.) Section 977, as interpreted by the VA, generally does not forbid the providing of benefits to survivors. Thus, under the VA regulations cited above, the provision of burial benefits is unaffected by section 977—as are service-connected benefits, such as dependency and indemnity compensation (DIC), which is payable to the survivors of those who die as the result of service-connected disabilities. Consequently, in certain (albeit predictably rare) circumstances, the veteran would receive much less favorable treatment under section 977 than his or her survivors. Thus, where the veteran has been made ineligible for VA benefits, including compensation for a service-connected disability because the disability resulted from an injury incurred during a brief, inconsequential, unauthorized, absence, if the veteran were to die as the result of that same disability, DIC and the service-connected burial benefit would be payable to the survivors.

The Committee bill is designed to eliminate any such anomalous results.

Prospective and Retroactive Application

In the design of the proposed title 38 provision with respect to its retroactive application, the Committee was concerned both about fairness to the individuals involved and the problems that a new set of eligibility criteria would create for the VA's administration of benefits programs. In this connection, the Committee is aware that making the new title 38 provision applicable completely prospectively, that is, applicable only to those who initially enter active-duty service on or after the date of the enactment of the Committee bill or a subsequent, specified effective date, would create a very complicated administrative situation in which the general eligibility of Post-Vietnam-era veterans to VA and title 38 benefits would be subject to three separate sets of rules depending on the date of entry on active duty—one for those who initially entered active duty on or after May 8, 1975, the day after the last day of the Vietnam era, but before September 8, 1980; a second for those who initially entered active duty between September 7, 1980, and the effective date of the Committee bill; and a third for those who initially enter active duty on or after the effective date of the Committee bill. To a certain extent, however, the establishment of such separate rules is unavoidable if principles of fundamental fairness are observed.

The choices made by the Committee in this respect reflect an effort to make the administrative burden as light as possible while maintaining basic principles of fairness in the treatment of the individuals involved. Thus, the Committee bill contains the following provisions:

First, expansion of the scope of the provision to include commissioned and warrant officers is proposed to be made fully prospective. Thus, the minimum-service requirement would be made applicable to these categories of personnel with respect to title 38 and VA benefits in basically the same manner that section 977 of title 10 was made applicable to enlisted personnel.

Second, in the case of one who has been discharged without completing two years of active duty and who, under section 977, has general benefits eligibility on the grounds of a service-connected, non-compensable condition or disability, the Committee bill provisions would apply retroactively to deny general title 38 and VA benefits eligibility, would provide continuing eligibility for any such benefits provided specifically for or on

account of that condition or disability, and would preclude any pay-back requirement for any other title 38 or VA benefit that is provided prior to October 1, 1981.

Third, the applicability of the minimum-service requirement to survivors would, as a practical matter, generally have a prospective effect in the sense that it would generally apply only with respect to benefits that accrue after September 30, 1981.

Fourth, the provision restoring entitlement to SGLI proceeds would be fully retroactive. In this connection, the Committee notes that the deceased veterans involved paid premiums computed on the expectation that the proceeds would be paid to their beneficiaries.

Comparison of Committee Bill Provisions With Pending Senate Amendment to Section 977 of Title 10

On May 13, 1981, recognizing problems that had arisen under section 977 of title 10 since its enactment last year, such as those noted above, Senator Simpson offered and the Senate agreed to a floor amendment (Unprinted Amendment No. 96) to S. 815, the proposed "Department of Defense Authorization Act of 1982", for the purpose of amending section 977 in order to resolve such problems. The Senate passed S. 815 with that amendment on May 14, 1981. As of July 15, the House of Representatives had not yet passed a Department of Defense authorization bill for 1982.

In the Committee's view, it would, as noted above, be far preferable—even if the title 10 provision were completely in agreement with the substantive provisions of the Committee bill—for any minimum service requirement to be codified in title 38 insofar as that requirement affects eligibility for title 38 and VA benefits.

In addition, the Committee notes that there are certain substantive differences between the provisions of the Committee bill and the Senate-passed amendment to S. 815 (hereinafter referred to as the "title 10 amendment"), as follows:

First, the title 10 amendment, but not Committee bill, would apply retroactively to deny benefits to officers who both initially entered and were separated from active duty during the period between September 8, 1980 (the date section 977 was enacted and took effect), and the date of enactment of the proposed change in the law with respect to officers. The rationale for the Committee bill in this respect—consistent with the prospective-only approach in present section 977—is that, although the distinction between officers and enlisted personnel with respect to the minimum service requirement should be eliminated, it would be unfair in this situation to change the rules after the fact for the ex-officers affected who are now (or soon will be) back in civilian life and who have had no reason to believe that they have taken or been subjected to any action that might deprive them of their general eligibility to veterans' benefits.

Second, the wording of both the title 10 amendment and present section 977 (one who "fails to complete" 24 months "shall not be eligible") may create some doubt as to whether active-duty personnel who have completed less than two years of service may make in-service use of certain benefits, such as their VA home-loan guaranty entitlement before completing two years of active duty. There is no legislative history to clarify the intent behind these provisions. The Committee bill is worded (one shall be ineligible only if one "is discharged . . . before completing" 24 months) so as to leave intact the opportunity provided in title 38 for active-duty service personnel with more than 180 days of service to use such entitlements.

Third, both the title 10 amendment and the Committee bill would apply retroactively to remove eligibility in the cases of (1) former enlisted personnel who entered the service after September 7, 1980, and are separated before the date of enactment of the proposed change in the law and who have eligibility based on a noncompensable service-connected disability, and (2) the survivors of those who are ineligible for benefits (the benefit involved in the cases of such survivors would, at least primarily, be certain burial and related benefits). However, the Committee bill, but not the title 10 amendment, would expressly provide that no repayment of benefits paid before October 1, 1981, would be required. The reasoning behind the Committee bill in this respect is that it is more fair to allow the individuals involved to keep any benefits that they lawfully received before the law is changed than to put them at risk of a collection effort arising out of retroactive change in the law.

Fourth, the Committee bill, but not the title 10 amendment, would, as discussed above, allow the survivors of a veteran who is separated before fulfilling the minimum service requirement to receive SGLI proceeds under section 768(c)(1)(A) of title 38 if the veteran dies during the 120-day "grace" period (up to a one-year period in the cases of those who are totally disabled) following discharge.

Fifth, as discussed above, the Committee bill, but not the title 10 amendment, would make a minimum service requirement applicable to those, if any, whose initial period of obligated service is for less than 24 months.

COST ESTIMATE

In compliance with paragraph 11(a) of rule XXVI of the Standing Rules of the Senate, the Committee, based on information supplied by the Congressional Budget Office, estimates that the costs resulting from the enactment of the Committee bill during the first 5 years following enactment would be $887.5 million in fiscal year 1982; $964.8 million in fiscal year 1983; $964.8 million in fiscal year 1984; $960.8 million in fiscal year 1985; and $955.8 million in fiscal year 1986. A detailed breakdown of the costs, as estimated by CBO, over the five-year period follows:

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE—JULY 7, 1981

1. Bill number: S. 917.

2. Bill title: The Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981.

3. Bill status: As ordered reported by the Senate Committee on Veterans' Affairs, June 25, 1981.

4. Bill purpose: To increase the rates of Disability Compensation and Dependency and Indemnity Compensation (DIC), to authorize the Administrator of Veterans' Affairs to guarantee home loans with graduated payment plans, to increase the maximum amount payable for specially adapted housing assistance, and for other purposes.

5. Cost estimate:

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	964.2	964.9	964.8	960.3	955.4
Estimated outlays	887.5	964.8	964.8	960.8	955.8

The cost of this bill falls within budget function 700.

This bill would result in additional future Federal liabilities through extensions of existing entitlements and would require subsequent appropriation action to provide the necessary budget authority. The figures shown as "Required Budget Authority" represent an estimate of the additional budget authority needed to cover the estimated outlays that would result from enactment of S. 917.

6. Basis for estimate: The following section-by-section cost analysis addresses only those sections of this bill that would be expected to have a budgetary impact.

Title I

Sections 101–103: These sections would increase the rates of disability compensation to veterans and their dependents by 11.2 percent, with the exception of the rate payable under section 314(k) (title 38, U.S.C.), which would remain unchanged.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	782.7	782.2	780.1	773.0	765.5
Estimated outlays	720.1	782.2	780.3	773.6	766.1

The cost of these sections was estimated by multiplying by 11.2 percent the projected average cost for all veterans receiving compensation in each year. The resulting average increase in cost was then multiplied by the estimated number of disability compensation cases in each year. This gross cost figure was then reduced by the estimated savings from holding the rate for section 314(k) cases unchanged. The cost for the increase in the clothing allowance was estimated by multiplying the projected number of cases receiving clothing allowances by the amount of the increase.

Section 104: This section would raise the statutory award categories under which disability compensation benefits are paid to veterans who have lost or lost the use of both upper extremities as a result of military service.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	1	1	1	1	1
Estimated outlays	1	1	1	1	1

This estimate is based on March 1981 actual counts of the number of veterans receiving benefits in each of the affected award categories, multiplied by the difference between the award under current law and the benefit payable in the new category as increased by section 101 of this title.

Title II

This title would increase all monthly DIC rates by 11.2 percent.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	175.1	176.5	178.9	181.3	184.1
Estimated outlays	161.0	176.4	178.7	181.2	183.9

The cost of this was estimated by multiplying the projected average cost in each year for all DIC cases by 11.2 percent, then multiplying the resulting average increase in cost by the estimated number of cases in each year.

Title III

Section 301: This section would increase from $3,800 to $5,000 the maximum assistance payable to certain disabled veterans for the purchase of automobiles. Also, the section would extend eligibility for adaptive equipment, but not for automobiles, to veterans entitled to compensation for ankylosis of one or both knees, or one or both hips.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	1.7	1.5	1.1	1.3	1.1
Estimated outlays	1.7	1.5	1.1	1.3	1.1

The estimated cost of the increase in automobile assistance grants is based on historical trends in the number of such grants made each year and assumes that all grants will be for the maximum amount allowable.

According to VA data, there are 2,512 veterans receiving compensation for ankylosis of one or both knees, or one or both hips. It was assumed that 35 percent of these individuals would apply for adaptive equipment in the first year, 25 percent the second year, and 10 percent the third year. In fiscal years 1985 and 1986, 25 percent and 20 percent, respectively, of these veterans were assumed to apply for reinstallation of the adaptive equipment in new cars. An average cost of $1,000 was assumed for the necessary adaptations.

Title IV

Sections 401 and 402: These sections would authorize the Veterans' Administration (VA) to guarantee home loans with provisions for graduated payment plans and would exempt VA home loans from any State laws that prohibit graduated payment plan mortgages.

There is no reason to expect that this provision would significantly increase the total number of loans guaranteed by VA. Nor is it expected that graduated payment plan loans would have a higher incidence of default than other VA-guaranteed loans. Therefore, it is not anticipated that a significant cost to the government nor a significant increase in federal credit activity would result from the enactment of this provision.

Section 403: This section would increase the maximum amount allowable for specially adapted housing grants from $30,000 to $35,000.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Required budget authority	3.7	3.7	3.7	3.7	3.7
Estimated outlays	3.7	3.7	3.7	3.7	3.7

Based on historical experience, approximately 600 specially adapted housing grants are expected to be awarded each year under current law. This estimate assumes that an increase of 20 grants per year would occur as a result of this provision and that all grants would be made at the $35,000 maximum.

Title V

Section 501: This section provides that the pension benefits of disabled veterans shall not be reduced after three months of hospitalization if such hospitalization is in conjunction with a prescribed VA rehabilitation program.

Since this provision would only affect a small number of cases in any one year, its cost should not be significant.

Sections 502 and 503: These sections would authorize the VA to provide memorial headstones or markers in the case of veterans whose remains are not recovered or identified, who are buried at sea, whose remains are donated to science, or whose remains are cremated and the ashes scattered without interment. Furthermore, the VA would not be authorized to set aside, when available, suitable areas in national cemeteries to memorialize such veterans, as well as those who are missing in action.

The cost of these provisions should not be significant.

Section 505: This section would amend section 3103 (title 38, U.S.C.) to provide that persons who enter active duty military service on or after September 7, 1980 will not be eligible for veterans' benefits based on such service unless they complete 24 months or more of active duty service. This provision would not apply to a service person discharged for or later determined to have a compensable service-connected disability.

This provision amends title 38 to conform to the change in law effected by Public Law 96-342, the Department of Defense Authorization Act of 1981. It would, therefore, have no budgetary impact.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: K. W. Shepherd, E. A. Peden.

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

REGULATORY IMPACT STATEMENT

In compliance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the Committee on Veterans' Affairs has made an evaluation of the regulatory impact which would be incurred in carrying out the Committee bill. The results of that evaluation are as follows:

The Committee bill has six titles: I—Veterans' disability compensation benefits; II—Survivors' dependency and indemnity compensation benefits; III—Automobile assistance and adaptive equipment amendments; IV—VA housing benefits amendments; V—Miscellaneous provisions; and VI—Effective dates.

A. Estimates of the numbers of individuals and businesses who would be regulated, and a determination of the groups and classes of such individuals and businesses:

Title I.—Title I, which provides for rate increases in the service-connected disability compensation program, would not result in the regulation of any individuals or businesses.

Title II.—Title II, which provides for rate increases in the dependency and indemnity compensation program, would not result in the regulation of any individuals or businesses.

Title III.—Title III, which provides for an increase in the amount of automobile assistance and expands eligibility for adaptive equipment to certain service-connected disabled veterans, would not result in the regulation of any individuals or businesses.

Title IV.—Title IV, which would permit the Administrator to guarantee home loans with provisions for various rates of amortization and increase the maximum amount of assistance available for specially adapted housing for certain service-connected disabled veterans, would not result in the regulation of any individuals or businesses.

Title V.—Title V, which would provide for continued payment of pension to certain hospitalized veterans; provide for the furnishing of headstones and markers in certain cases; require the Administrator to conduct a review and analysis of literature relating to the long-term adverse effects of exposure to radiation and, subsequently, require the development of regulations pursuant to which claims for benefits based on such exposure would be resolved; and require a minimum period of active-duty service for the purposes of certain veterans benefits; would not result in the regulation of any individuals or businesses. The regulations required to be developed by the Administrator relating to exposure to radiation, once issued, would not regulate any individuals or businesses, but would provide a framework for the resolution of certain claims for VA benefits.

B. Determination of the economic impact of such regulations on individuals, consumers and businesses affected: Since, as previously indicated, there would be no such regulation, there would be no such impact.

C. Determination of the impact on the personal privacy of the individual affected: The enactment of the Committee bill would not increase any impact on the personal privacy of participants in the programs involved.

D. Determination of the amount of additional paperwork that will result from regulations to be promulgated under the bill: The only significant increase in paperwork that is likely to result from regulations to be promulgated under the Committee bill will be in the form of increased activity, both by veterans and the VA, in the area of claims for benefits based on disabilities attributed to exposure to radiation once the regulations required to be issued in title V of the Committee bill are promulgated. It is impossible to determine at this point the amount of paperwork that would be involved.

SECTION-BY-SECTION ANALYSIS OF S. 917 AS REPORTED

Section 1.—Subsection (a) of section 1 would provide that this Act may be cited as the "Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981".

Subsection (b) of section 1 would provide that, except when otherwise expressly provided, an amendment to or repeal of a section or other provision shall be considered to be an amendment to or repeal of a section or other provision of title 38, United States Code, relating to veterans' benefits.

TITLE I—VETERANS' DISABILITY COMPENSATION BENEFITS

Section 101.—Would amend present section 314 of title 38, relating to the rates of service-connected disability compensation.

Subsection (a) of section 101 would amend subsections (a) through (j) of present section 314 to increase by 11.2 percent the basic monthly rates of compensation paid to veterans with disability rated from 10 to 100 percent. Currently, a veteran with a 10-percent disability receives $54 monthly, and a veteran with a disability rated as total—100 percent—receives $1,016 monthly. Those rates would be increased to $60 and $1,130, respectively, by the Committee bill, and the rates for disabilities rated 20 to 90 percent would be increased by the same percentage. This section would also increase by 11.2 percent the higher monthly rates of compensation authorized under subsections (l) through (o) of such section for veterans with certain combinations of severe disabilities; the aid-and-attendance allowance rates authorized under subsection (r); the housebound rate authorized under subsection (s); the additional amount payable under subsection (t) to certain veterans who have suffered the service-connected loss or loss of use of the other, paired extremity; and the limitations on the total amount payable monthly to a veteran entitled to compensation under subsection (k) who is also entitled to compensation under another subsection of present section 314. Also, the maximum amount payable monthly to a veteran under subsection (p), which authorizes the Administrator to pay the next higher rate or intermediate rate to a veteran whose disabilities exceed the requirements for any of the rates prescribed in section 314, or who is both blind and deaf, would be increased by 11.2 percent.

Subsection (b) of section 101 would authorize the Administrator of Veterans' Affairs to increase by 11.2 percent the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who do not receive compensation under chapter 11 of title 38. Public Law 85-857 generally codified in title 38 of the United States Code the laws relating to veterans' benefits; section 10 of that law provided that any individual who was receiving benefits as a veteran on December 31, 1958, under public laws administered by the VA but not so codified, was to continue to receive benefits at the rates payable under such public laws or under corresponding provisions of title 38, whichever is the greater, as long as he or she remains eligible.

Section 102.—Would amend present section 315 of title 38, relating to additional

compensation payable monthly to veterans with service-connected disability rates of 30 percent or more who have spouses, children, and dependent parents, to increase those allowances by 11.2 percent.

Clauses (1) through (10) of section 102 would amend clauses (A) through (J) of present section 315(1), relating to additional compensation—"dependents' allowances"—payable monthly to a totally disabled veteran who has dependents, increase those allowances by 11.2 percent. Under existing law, a veteran so disabled who has a spouse, but no child, the amount is $62; if the married veteran has one child, the amount is $104; if two children, $138; if three children, $173; and if more than three children, $173 plus $34 for each child in excess of three. Under the Committee bill, those amounts would be increased to $69, $153, $192, and $38, respectively.

Also under existing law, a totally disabled veteran who has no spouse receives a monthly allowance of $42 for one child; $77 for two children; $111 for three children; and $34 for each child in excess of three. Under the Committee bill, those amounts would be increased to $47, $86, $123, and $38, respectively.

The Committee bill would also increase by 11.2 percent the amount of the dependents' allowance payable monthly to a totally disabled veteran who has a dependent parent or parents from $50 (for each such parent) to $56; to such a veteran who has a severely disabled spouse, from $112 to $125; and to such a veteran who has a child age 18 or older who is pursuing a course of education at an approved educational institution, from $94 to $105.

Under paragraph (2) of present section 315, the additional compensation payable to veterans rated from 30- to 90-percent disabled is prorated, so that, for example, a veteran rated at 30 percent would receive 30 percent of the amount specified in paragraph (1) of such section.

Section 103.—Would amend present section 362 of title 38, relating to the clothing allowance payable annually to a veteran receiving compensation whose disability requires the use of a prosthetic or orthopedic appliance or appliances, including a wheelchair, that tends to wear out or tear the veteran's clothing, to increase that allowance by 11.2 percent, from $274 to $305.

Section 104.—Would further amend present section 314 of title 38, relating to the rates of service-connection disability compensation, to increase the rates payable to veterans with certain combinations of severe service-connected disabilities.

Clauses (1) and (2) of section 104 would amend subsections (l) and (m) of present section 314 to increase the rate of compensation paid to a veteran who suffers from the service-connected anatomical loss or loss of use of both hands from the rate prescribed by present subsection (l)—$1,262 monthly—to the rate prescribed by present subsection (m)—$1,393 monthly. The amendments proposed to be made by section 101(13) of the Committee bill would increase the latter rate to $1,547 monthly.

Clause (3) of section 104 would amend subsection (n) of present section 314 to increase the rate of compensation paid to a veteran who suffers from the service-connected anatomical loss or loss of use of both arms at a level, or with complications, preventing natural elbow action with prosthesis in place from the rate prescribed in present subsection (m)—$1,391 monthly—to the rate prescribed in present subsection (n)—$1,581 monthly. The amendments proposed to be made by section 101(14) of the Committee bill would increase the latter rate to $1,758 monthly.

Clause (4) of section 104 would amend subsection (o) of present section 314 to increase the rate of compensation paid to a veteran who suffers from the service-connected anatomical loss of both arms so near the shoulder as to prevent the use of a prosthetic appliance from the rate prescribed in present subsection (n)—$1,581 monthly—to the rate prescribed in present subsection (o)—$1,763 monthly. The amendments proposed made by section 101(15) of the Committee bill would increase the latter rate to $1,966 monthly.

Title I—Cost: Enactment of the provisions to title I is estimated to cost $783.7 million in budget authority and $721.1 million in outlays in fiscal year 1982.

TITLE II—SURVIVORS' DEPENDENCY AND INDEMNITY COMPENSATION BENEFITS

Section 201.—Would amend present section 411 of title 38, relating to the rates of dependency and indemnity compensation (DIC) for the surviving spouses of veterans whose deaths were service connected.

Clause (1) of section 201 would amend subsection (a) of present section 411, relating to basic dependency and indemnity compensation rates payable to surviving spouses of veterans whose deaths were service connected, to increase by 11.2 percent the DIC benefit payable monthly to such a surviving spouse. Under current law, DIC benefits are paid according to the pay grade—service rank—of the deceased veteran; and the amount range from $373 per monthly for the surviving spouse of a veteran who had attained the grade of E–1 to $954 for the surviving spouse of a veteran who had attained the grade O–10. Those rates would be increased to $415 and $1,061, respectively; proportionate increases would be provided in the rates for the intermediate pay grades and in the rates payable to the surviving spouses of veterans who had served in the position specified in footnotes 1 and 2 to the table of grades and rates in existing section 411. These increases would automatically result in identical increases in the benefits payable at DIC rates under section 410(b) of title 38 to surviving spouses of certain veterans compensated at the 100-percent rate whose deaths were not service connected.

Clause (2) of section 201 would amend subsection (b) of present section 411, to increase by 11.2 percent, from $43 to $48, the additional amount—dependents' allowances—payable for each child under the age of 18 to a surviving spouse receiving DIC.

Clause (3) of section 201 would amend subsection (c) of present section 411 to increase by 11.2 percent, from $112 to $125, the additional amount of DIC payable monthly to a surviving spouse who is a patient in a nursing home, or who is helpless or blind or so nearly helpless or blind as to require the regular aid and attendance of another person.

Clause (4) of section 201 would amend subsection (d) of present section 411 to increase by 11.2 percent, from $56 to $62, the DIC payable monthly to a surviving spouse who is so disabled as to be permanently housebound, but not in need of regular aid and attendance.

Section 202.—Would amend present section 412 of title 38, relating to DIC for surviving children of veterans whose deaths were service connected, to provide an 11.2 percent increase in the monthly rates of DIC payable to the veteran's children where no surviving spouse is entitled. The current rates of $189 for one child, $271 for two children, $350 for three children, plus $71 for each additional child would be increased to $210, $301, $389, and $79, respectively. Benefits payable at DIC rates under present section 410(b) of title 38 to the surviving children of certain veterans compensated at the 100-percent rate whose deaths were not service connected would also be automatically increased as a result of the section 413 increase.

Section 203.—Would amend section 414 of title 38, relating to supplemental DIC for certain surviving children.

Clause (1) of section 203 would amend present section 414(a) to provide an 11.2 percent increase, from $112 to $125, in the additional allowance payable monthly to a child eligible for DIC who has attained the age of 18 and who became permanently incapable of self-support before reaching age 18.

Clause (2) of section 203 would amend present section 414(b) to provide an 11.2 percent increase, from $189 to $210, in the DIC payable monthly, concurrently with the payment of DIC to a surviving spouse, to a surviving child who has attained the age of 18 and who became permanently incapable of self-support before reaching age 18.

Clause (3) of section 203 would amend present section 414(c) to provide an 11.2 percent increase, from $96 to $107, in the additional DIC payable monthly, concurrently with the payment of DIC to a surviving spouse, to a surviving child pursuing a course of education approved under present section 104 of title 38.

Title II—Cost: Enactment of the provisions of title II is estimated to cost $175.1 million in budget authority and $161 million in outlays in fiscal year 1982.

TITLE III—AUTOMOBILE ASSISTANCE AND ADAPTIVE EQUIPMENT AMENDMENTS

Section 301—Would amend present section 1902 of title 38, relating to the automobile assistance and adaptive equipment allowances payable to veterans with certain severe service-connected disabilities.

Clause (1) of section 301 would make technical amendments to present section 1902.

Clause (2) of section 301 would amend subsection (a) of present section 1902 to increase the maximum amount of assistance payable by the Administrator toward the purchase price of an automobile or other conveyance from $3,800 to $5,000.

Clause (3) of section 301 would amend subsection (b) of present section 1902 to make a technical amendment and to add a new paragraph as follows:

New paragraph (2) of section 1902(b): Would require the Administrator to provide such appropriate adaptive equipment to any veteran who suffers from service-connected ankylosis of one or both knees, or one or both hips, as is determined to be necessary, under regulations which the Administrator shall prescribe, to meet the applicable standards of licensure established by the State of the veteran's residency or as is determined by the Chief Medical Director to be necessary for the safe operation of the automobile by the veteran.

Section 302.—Would amend present section 1903(b) of title 38, relating to limitations on automobile and adaptive equipment assistance, to make a technical amendment.

Title III—Cost: Enactment of the provisions of title III is estimated to cost $1.7 million in budget authority and outlays in fiscal year 1982.

TITLE IV—VETERANS' ADMINISTRATION HOUSING BENEFITS AMENDMENTS

Section 401.—Would amend present section 1803(d) of title 38, relating to the basic provisions applicable, to the home loan guaranty program, to add two new subparagraphs as follows:

New subparagraph (B) of section 1803(d)(2): Would permit the Administrator to guarantee loans with provisions for various rates of amortization corresponding to anticipated increases in family income—so-called "graduated-payment mortgage" loans. With respect to such loans, this new subparagraph would provide that the initial principal amount of the loan may not exceed the reasonable value of the property at the time the loan is made and that the principal amount of the loan (and all deferred in-

terest) may not at any time exceed the projected value of the property.

New subparagraph (C) section 1803(d)(2): Would provide that, for the purposes of graduated-payment mortgage loan guaranties, the projected value of the property would be calculated by increasing the reasonable value of the property at the time the loan is made by a rate not in excess of 2.5 percent per year and that such projected value could not exceed 115 percent of such reasonable value. This new subparagraph would further specify that graduated-payment mortgage loans for purposes other than the acquisition of a single-family dwelling unit may not be guaranteed by the VA.

Section 402.—Would amend present section 1828 of title 38, relating to the exemption of VA-guaranteed home loans from State antiusury laws, to extend the exemption to include exemptions from State laws that restrict the manner of calculating interest (including prohibition of the charging of interest on interest) and require a minimum amortization of principal.

Section 403.—Would amend present section 802 of title 38, relating to the maximum amount of assistance available for specially adapted housing for certain severely service-connected-disabled veterans, to increase the maximum from $30,000 to $35,000. This section of the Committee bill would also make technical amendments to present section 802.

Section 404.—Would amend present section 1826 of title 38, relating to the withholding of payments and benefits, to conform the provisions of chapter 37 to the provisions of present section 3114, relating to indebtedness offsets, enacted by Public Law 96–466, which requires the Administrator to recover debts owed the VA by deducting such debts from future VA-benefit payments.

Title IV—Cost: Enactment of the provisions of title IV is estimated to cost $3.7 million in budget authority and outlays for fiscal year 1982.

TITLE V—MISCELLANEOUS PROVISIONS

Section 501.—Would amend present section 3203(a)(1) of title 38, relating to the reduction of non-service-connected pension payable to a single veteran without dependents during certain extended periods of institutionalization at VA expense, to add a new subparagraph as follows:

New subparagraph (D): Would provide that, for the purposes of computing the length of the period of VA hospital or nursing home care after which the veteran's non-service-connected pension is reduced, in those cases in which the primary purpose of the care is the provision of a prescribed program of rehabilitation services, only periods of care that exceed 180 days within a 12-month period would be counted as time during which the veteran is being furnished.

Section 502.—Would amend present section 906 of title 38, relating to the Administrator's authority to furnish headstones and markers for placement in national cemeteries or private or local cemeteries in the cases of veterans whose remains have not been recovered or identified or whose remains were buried at sea, to permit the Administrator to furnish such markers for placement in State veterans' cemeteries and in the cases of veterans whose remains were donated to science or were cremated and the ashes scattered.

Section 503.—Would amend present section 1003(a) of title 38, relating to memorial areas in national cemeteries, to require the Administrator, in those areas in such cemeteries required under current law to be set aside to honor the memories of members of the Armed Forces missing in action or whose remains have not been identified or recovered or have been buried at sea, to honor also the memories of veterans whose remains are similarly not interred or whose remains have been donated to science or cremated without interment of the ashes.

Title V—Cost: Enactment of the provisions of title V is estimated to entail no significant cost.

Section 504.—Would require the VA to conduct a review of the scientific and medical literature relating to the long-term health effects in humans of exposure to, and to issue regulations for the resolution of claims based on exposure to radiation.

Paragraph (1) of subsection (a) of section 504 would require the VA to conduct a comprehensive review and scientific analysis of literature covering studies already conducted or underway relating to the long-term adverse health effects of human exposure to radiation, including nuclear device medical, and occupational exposures.

Paragraph (2) of subsection (a) of section 504 would expressly authorize the Administrator to contract with non-VA entities for the conduct, in whole or in part, of such review and analysis.

Subsection (b) of section 504 would require the Administrator to provide for appropriate coordination and consultation with other Federal agencies that are conducting or have conducted studies relating to the adverse health effects in humans of exposure to radiation.

Paragraph (1) of subsection (c) of section 504 would require the Administrator, not later than 90 days after the date of enactment, to submit to the appropriate committees of the Congress a report containing a description of the Administrator's efforts and plans to assure that the requirement for coordination and consultation with other Federal agencies is met.

Paragraph (2) of subsection (c) of section 504 would require the Administrator, not later than 18 months after the date of enactment, to submit to the appropriate committees of the Congress a report on the required literature review, including recommendations for appropriate administrative or legislative actions and recommendations as to whether additional scientific investigations regarding human exposure to radiation should be undertaken by the VA or another Federal agency.

Paragraph (3) of subsection (c) of section 504 would require the Administrator, not later than 90 days after the report on the literature review and analysis proposed to be required by paragraph (2) of this subsection, to develop and publish in the Federal Register, for public review and comment, proposed regulations for the resolution of claims based on exposure to radiation. The proposed regulations would be required to contain proposed guidelines, standards, and other criteria for resolving claims and would include specifications of any presumptions to be applied to the resolution of claims. Not later than 90 days after the completion of the public-review-and-comment period, the Administrator would be required to publish final regulations.

Section 505.—Would amend chapter 53 of title 38, United States Code, relating to various special provisions with respect to veterans' benefits, to add a new section 3103A, entitled "Minimum active-duty service requirement".

New section 3103A: Would incorporate into title 38, with certain modifications and with application only to the extent of title 38 and VA-administered benefits, the general requirement in section 977 of title 10, United States Code, that persons who initially enter active duty after September 7, 1980, and fail to complete at least two years of their initial period of obligated service be denied benefits based on active-duty service. The provisions of new section 3103A are as follows:

Subsection (a) of new section 3103A: Would provide that, notwithstanding any other provision of law, in the case of a person who enters active duty in a branch of Armed Forces after September 7, 1980, the eligibility and entitlement (hereinafter, eligibility is used to refer to both eligibility and entitlement) requirements based on duration of active duty for title 38 benefits and benefits under laws other than title 38 that are administered by the VA would be exclusively as prescribed in title 38. Currently, the only provision in a law other than title 38 that perscribes a duration-of-active-duty requirement for purposes of title 38 and VA benefits eligibility is present section 977 of title 10, which was added by section 1002 of Public Law 96–342, the Department of Defense Authorization Act, 1981. Present section 977 generally requires the denial of eligibility for benefits "under any Federal program by reason of . . . active duty" where the individual originally enlists on or after September 8, 1980 (the date of the enactment of Public Law 96–342) and "fails to complete at least twenty-four months of his or her enlistment". Thus—insofar as benefits (a term defined in subsection (d) of this proposed new section) under title 38 (mainly benefits administered by the VA, but also benefits administered by other agencies, such as chapter 43, which is administered by the Department of Labor) and benefits administered by the VA under laws other than title 38 (such as the VA health-care provision in section 2 of Public Law 95–126) are concerned—proposed new section 3103A would displace section 977 and preclude its application to such benefits.

Subsection (b) of new section 3103A: Would prescribe, with certain specified exceptions, a general two-year-minimum service requirement for purposes of title 38 and VA benefits for those who initially enter active duty after September 7, 1980, as follows (with the eligibility of survivors and dependents being dealt with in subsection (c) of this new section):

Paragraph (1) of subsection (b) of new section 3103A: Would provide that, with the exceptions described below, a person who for the first time enters active duty in one of the Armed Forces (terms defined in present section 101(10) (Armed Forces) and (21) (active duty)) of title 38 after September 7, 1980, shall not, as the result of such active duty, be provided any title 38 or VA benefits if he or she is discharged or released from active duty without completing (A) at least 24 months of active duty if the initial enlistment or other period of obligated service was for 24 months or more, or (B) his or her full initial period of obligated service if his or her initial enlistment or other initial period of obligated service was for less than 24 months. Thus, to the extent of title 38 and VA benefits, this paragraph would expand the minimum service requirement in current law to include officers (effective, as discussed in the analysis of paragraph (2), below, with respect to officers who enter active duty after October 1, 1981) in addition to enlisted personnel and would remove an apparent current-law prohibition on the provision of benefits to those who complete an initial period of active duty the duration of which was originally scheduled to be for less than 24 months.

Paragraph (2) of subsection (b) of new section 3103A: Would provide exceptions to the general denial of benefits required under paragraph (1) of this subsection with respect to title 38 and VA benefits, as follows. First, a new exception would be provided for those who are discharged under section 1171 of title 10, providing for discharges up to 3 months prior to the expiration of an enlistment and specifying that discharges thereunder do "not affect any right, privilege, or benefit, or benefits" (other than pay and allowances) that the individual would receive for completing the enlistment.

Second, the exception in present section 977 for those who receive discharges under section 1173 of title 10, relating to hardship

discharges for enlisted personnel who have dependents, would be incorporated.

Third, an exception for those who are discharged as the result of a service-connected disability—similar in effect to the exception in present section 977 for those discharged under chapter 61 of title 10, which provides for discharges because of physical disability—would be provided. In this connection, the Committee notes that, under the Committee bill, the exception would be provided only if the disability for which the veteran was discharged was the result of an injury or disease incurred or aggravated in line of duty. Under current VA regulations (38 C.F.R. section 3.1(m)), the service department's (e.g., Department of the Army's) finding that the injury or disease "occurred in line of duty will be binding on the [VA] . . . unless it is patently inconsistent with the requirements of laws administered by the [VA]. . . ."

Fourth, an exception would be provided for those who have a disability that the VA has determined to be compensable under chapter 11 of title 38, relating to compensation for service-connected disabilities. The scope of this exception differs in two significant respects from the exception provided in present section 977 for those with disabilities that result from an injury or disease incurred in or aggravated during the period of active duty and are not the result of intentional misconduct and not incurred during a period of unauthorized absence. First, under present section 977, an exception is provided for all those who have a service-connected disability, despite the fact that the disability is so minor as not to result in the payment of compensation. The proposed new limitation on this exception would, with respect to title 38 and VA benefits, apply retroactively to deny eligibility to those benefits in the cases of those whose eligibility is based on the existence of a noncompensable disability. However, under subsection (d) of this section of the Committee bill (discussed below), those who would lose eligibility as a result of this provision would not be obligated to repay the VA for any benefits they receive prior to October 1, 1981. Second, the exception in present section 977 would not be available if the injury or illness is incurred "during a period of unauthorized absence", regardless of how brief or inconsequential the absence is. The Committee bill provision, in making the exception available for those with compensable disabilities, would make the exception available based on existing criteria for service connection in sections 101(16) and 105 of title 38; that is, the exception would, if otherwise available, be made inapplicable by virtue of an unauthorized absence only if the individual was avoiding duty by deserting or by taking an unauthorized absence that materially interfered with the performance of military duties.

Fifth, the denial of benefits provisions would not apply to commissioned or warrant officers who enter active duty prior to October 1, 1981. Thus, the expansion of the scope of the two-year minimum service requirement to include officers with respect to title 38 and VA benefits would be made completely prospectively—as was the minimum service requirement originally made applicable with respect to enlisted personnel completely prospectively.

Sixth, an exception would be provided with respect to the furnishing of any benefit for or on account of any service-connected disability or condition. Thus, although those with noncompensable service-connected disabilities would not, as discussed above, retain general eligibility for title 38 and VA benefits, they would keep their entitlement to health care for their service-connected disabilities under, for example, section 2 of Public Law 95-126, relating to service-connected care for those with discharges that do not qualify them for general eligibility, and section 612(b)(2) of title 38, relating to limited outpatient dental care benefits for service connected but noncompensable dental conditions or disabilities. In addition, by preserving eligibility for benefits provided on account of a service-connected disability, this exception would protect the veteran's existing eligibility for certain supplementary benefits, such as eligibility under section 612(b)(4) to dental care for a condition or disability that is aggravating an associated service-connected disability.

Seventh, with respect to the Servicemen's Group Life Insurance (SGLI) program under subchapter III of chapter 19 of title 38, exceptions would be provided for the continuation of the veterans' insurance coverage, under section 768(a)(1)(A), during the 120-day "grace" period (or the up to one-year "grace" period if the veteran is totally disabled at the time of discharge) following the date of discharge and for the veteran's right, during that grace period, to designate or change the designation of beneficiaries pursuant to section 770(a).

Eighth, this paragraph of the new section would also clarify, in connection with subsection (b) of this section of the Committee bill, that this new section would not have any effect on benefits provided under applicable law prior to October 1, 1981.

Subsection (c) of new section 3103A: Would provide that, with the exceptions discussed below, the survivors and dependents of veterans who would generally be denied benefits under subsection (b) of this new section would also be ineligible for title 38 and VA benefits. In this connection, the Committee notes that the VA has determined that present section 977 "does not prohibit the payments of death benefits to the survivors of a veteran who served less than 24 months" (Federal Register, vol. 46, page 9575, January 27, 1981), but generally does prohibit the payment of SGLI proceeds to the beneficiaries (March 20, 1981, Memorandum from the General Counsel to the Chief Benefits Director). This subsection would provide exceptions for various benefits payable as the result of the death of a veteran who has died from a service-connected disability, that is, dependency and indemnity compensation under chapter 13 of title 38, health-care benefits under chapter 17, educational assistance under chapter 35, home loan benefits under chapter 37, and burial, funeral, and related transportation benefits under sections 907 and 908. In this connection, the Committee notes that generally these service-connected benefits would not otherwise be denied because the denial of benefits would not apply to the survivors of those veterans, including all those with compensable disabilities, who were themselves generally eligible for title 38 and VA benefits. Nevertheless, out of an abundance of caution, these specific survivors' benefits are expressly included as exceptions.

Finally, this subsection would clarify, in conjunction with the SGLI coverage exception discussed in the foregoing analysis of subsection (b) of this new section, that the payment of SGLI proceeds during the post-discharge grace period would not be prohibited.

Subsection (c) of new section 3103A: Would define the term "benefit" for purposes of this section so as to include any right or privilege and to clarify that the term does not include the refund of the contributions that the veteran had made during active duty under the Post-Vietnam Era Veterans' Educational Assistance Program and had not used (or to the payment of such unused contributions to a deceased veteran's survivors). The Committee also notes that, although it intends the term benefits to be broadly construed so as to include all title 38 and VA benefits and services of value that are provided to veterans, survivors, and dependents, it is not the Committee's intention that this new subsection be construed as having any effect at all on any procedural rights, privileges or opportunities that are afforded in connection with any benefit—such as counseling services through which individuals are advised as to what benefits they may be eligible for and are assisted in making application, and rights in connection with the adjudication of claims for benefits.

Subsection (b) would provide that no provisions of new section 3103A of title 38 (as added by subsection (a)) shall be construed as requiring any person to make any repayment for any benefit provided to him or her prior to October 1, 1981, or as authorizing any Federal official or employee to request any such repayment.

TITLE VI—EFFECTIVE DATES

Section 601.—Would provide for effective dates for the provisions of the Committee bill.

Subsection (a) of section 601 would provide that the provisions of the Committee bill would be effective on the date of enactment except as provided in subsections (b) and (c) of this section.

Subsection (b) of section 601 would provide that the effective date of titles I and II and sections 301, 401, 402, and 403 would be October 1, 1981.

Subsection (c) of section 601 would provide that the effective date of sections 502 and 503 would be October 1, 1981, and that the amendments made by those sections would apply to veterans dying before, on, or after that date.

Tabulation of Votes Cast in Committee

In compliance with paragraph 7 of rule XXVI of the Standing Rules of the Senate, the following is a tabulation of votes cast in person or proxy by Members of the Committee on Veterans' Affairs at a June 25, 1981, meeting to consider S. 917.

The Committee agreed to report S. 917, with an amendment in the nature of a substitute, favorably to the Senate by a 12–0 vote, as follows:

Yeas—12: Alan Simpson, Strom Thurmond, Robert Stafford, Bob Kasten, Jeremiah Denton, Frank Murkowski, Arlen Specter, Alan Cranston, Jennings Randolph, Spark Matsunaga, Dennis DeConcini, and George Mitchell.

Nays—0.

VETERANS' DISABILITY COMPENSATION, HOUSING, AND MEMORIAL BENEFITS AMENDMENTS OF 1981

Mr. CRANSTON. Mr. President, I am most pleased to join the distinguished chairman of the Veterans' Affairs Committee in urging that the Senate approve S. 917, the proposed "Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981," as it was reported from the committee on July 16.

The issues addressed in the pending legislation are, in many ways, at the very heart of veterans' benefits programs. The recognition of the sacrifices made and the hardships incurred by our Nation's veterans are best reflected in our commitment to assuring that we meet the needs of those who bear the scars of battle from service to our country and the dependents and survivors of those veterans who made the supreme sacrifice for our country's security. The needs of veterans who suffer from service-connected disabilities and the survivors who suffer from service-connected disabilities and the survivors of veterans

who died from service-connected causes must be our No. 1 priority.

I strongly support the 11.2-percent cost-of-living increase in rates of VA service-connected disability compensation and dependency and indemnity compensation that is proposed in the committee bill. The committee bill would provide for a much-needed cost-of-living increase in the rates of compensation for almost 2.3 million service-connected disabled veterans and dependency and indemnity compensation for 324,370 survivors of veterans who died of service-connected causes. In addition, the bill would make a number of substantive improvements in certain VA programs for service-connected disabled veterans.

I believe it is significant that, during this extremely difficult period of budgetary constraints, we have been successful in not only providing an increase that equals the increase in social security and VA pension rates, but also in proposing other modest, but important, improvements in VA programs for service-connected disabled veterans. The policy of providing a compensation/DIC rate increase commensurate with that provided in the indexed social security and veterans' pension programs is one I first proposed in 1979, and I am delighted to see the committee continuing this policy.

There are five other specific provisions in the pending measure which I authored, Mr. President, and which I will specifically address.

INCREASE IN SPECIALLY ADAPTED HOUSING ASSISTANCE

First, section 403 of the committee bill would increase from $30,000 to $35,000, effective October 1, 1981, the maximum amount payable in specially adapted housing assistance under chapter 21 of title 38, United States Code, to certain veterans with total and permanent service-connected disabilities. This provision derives from the provisions of a measure I introduced earlier this year—S. 415—which is cosponsored by Senators RANDOLPH, MATSUNAGA, DECONCINI, THURMOND, STAFFORD, and MITCHELL.

Under the program of specially adapted housing assistance for disabled veterans, often referred to as the "wheelchair home" program, the VA assists veterans with certain permanent and total service-connected disabilities in acquiring suitable housing with adaptations made necessary by the nature of their disabilities. Under current law, these disabled veterans are eligible for a grant not to exceed 50 percent of the cost of the home and the necessary land, up to a maximum of $30,000. Veterans eligible for housing assistance grants are principally quadraplegics, paraplegics, amputees, and others who require the use of a wheelchair, braces, or crutches to move about. Their disabling conditions may require ramps, special bathroom equipment, extra-large rooms and hallways, and other adaptations that are essential for their health and safety.

The last increase in the amount of specially adapted housing assistance was made by Public Law 95-476, which raised the maximum to $30,000, effective October 1, 1978. Housing costs have risen steadily in the nearly 3 years since then. By raising the maximum limit to $35,000, the committee bill would enable most of the veterans who are eligible for this benefit to obtain assistance approximating 50 percent of the cost of their homes and thus help meet the needs of this special group of veterans.

AUTOMOBILE ASSISTANCE AND ADAPTIVE EQUIPMENT AMENDMENTS

Second, Mr. President, title III of the committee bill would increase the amount of the automobile assistance allowance provided by the VA to veterans with certain severe, service-connected disabilities and would extend eligibility for the provision of automobile adaptive equipment to certain other service-connected disabled veterans. These provisions are derived from another measure that I, also joined by Senators RANDOLPH, MATSUNAGA, DECONCINI, THURMOND, STAFFORD, and MITCHELL, introduced early in this session—S. 416, the proposed "Automobile Assistance and Adaptive Equipment Amendments of 1981."

Under the program of automobile assistance—first established in 1946—veterans who have suffered the service-connected loss or loss of use of one or both feet or hands or service-connected blindness are entitled to a one-time VA grant to assist them in purchasing an automobile. Since the effective date of the last increase which I authored in 1978 to the current level of $3,800—October 1, 1978—the Bureau of Labor Statistics' Consumer Price Index component for new automobiles has increased more than 21.6 percent, and it is expected to continue to increase through the end of this fiscal year. Thus, the committee bill, by increasing the automobile assistance allowance to $5,000, effective October 1, 1981, will help insure that the value of this benefit keeps pace with inflation.

In addition, Mr. President, the committee bill—as we proposed in S. 416—would extend, effective October 1, 1981, eligibility under specified circumstances for adaptive equipment—but not the one-time automobile-purchase grant—to a veteran who is entitled to service-connected compensation for ankylosis of one or both knees, or one or both hips, but who is not considered to have lost the use of a lower extremity.

Under current law, those seriously service-connected disabled veterans who are eligible for the automobile-purchase grant are also eligible for an adaptive equipment allowance which covers the cost of necessary adaptive equipment and the installation, maintenance, and replacement of such equipment. However, there are veterans who have incurred certain disabilities which can preclude them from safely operating a motor vehicle that has not been adapted but who are not eligible for either the automobile assistance award or the adaptive equipment allowance.

Specifically, disabled veterans who suffer from ankylosis—the stiffening of a joint as the result of abnormal bone fusion—of the knees or hips at so-called "favorable" angles. Although veterans who suffer from service-connected ankylosis at unfavorable angles—their knees or hip joints being fused in somewhat of a bent or sitting position—meet the criterion of "loss of use" and are therefore eligible for adaptive equipment assistance, veterans who suffer from service-connected ankylosis at favorable angles—their knees or hip joints being fused in a more straightened position—do not. However, in some cases, these veterans may need special adaptive equipment—such as left-foot accelerators, power brakes, hand-held parking brakes, or automatic transmissions—before they can safely operate their motor vehicles.

I am pleased that the committee shares my view that it is appropriate that the Federal Government assist these veterans in bearing the cost of the adaptive equipment they need in order to operate a motor vehicle. In these cases, the award would be made to provide such adaptive equipment to overcome the resulting disability as is necessary for the veteran to satisfy his or her State's drivers' licensing laws or regulations, or as is determined to be necessary by the VA's Chief Medical Director, for the veteran to operate his or her motor vehicle safely.

RADIATION LITERATURE REVIEW

Third, section 504 of the committee bill, which I authored, would require the VA to conduct a review and analysis of literature relating to long-term adverse health effects of human exposure to radiation and would require the VA to consult with and actively coordinate with other Federal Government entities involved in radiation exposure-related activities. The purpose for this review is to assure that the VA is fully informed about and will pull together available, relevant scientific information regarding radiation exposure in order to be better able to resolve fairly and consistently the very complex issues involved in radiation-related VA compensation or death claims. This review would be similar to that which the VA currently is conducting, pursuant to section 307 of Public Law 96-151, on literature regarding dioxin, the highly toxic component in agent orange.

Mr. President, approximately 250,000 Defense Department personnel participated in nuclear weapons tests between 1945 and 1963. Another 25,000 service personnel are estimated to have been attached to the U.S. occupation forces in Hiroshima and Nagasaki following the bombings of those cities at the end of World War II. During the 96th Congress, I chaired hearings on the difficulties experienced by these veterans and their survivors in pursuing claims, through the VA adjudication process, for health problems they believe are related to their exposure to radiation during service.

Resolving such claims is not easy since the long-term health effects of exposure to low levels of radiation are not yet completely understood. But it is clear that human exposure to certain levels of radiation causes—usually after a latency period of many years—an increased incidence of malignant tumors and also can cause genetic damage. Today, even though the controversy continues as to what specific health problems might re-

sult from exposure to low levels of radiation, scientists are in general agreement that there is no completely safe level of exposure to radiation.

Information received during the committee's hearings in the last Congress—and related hearings held by other committees during the 95th and 96th Congresses—demonstrated that the Government failed to follow up medically on these veterans to determine what, if any, adverse health effects might be related to their exposure and so there is little information available related directly to the experience of this population. In dealing with radiation-related claims, the VA has relied heavily on comprehensive reviews such as the 1972 and the 1980 reports of the Committee on Biological Effects on Ionizing Radiation—BEIR—of the National Academy of Sciences and the 1977 report of the Scientific Committee on the Effects of Atomic Radiation of the United Nations—UN SCEAR. These reviews were concerned primarily with determining minimum exposure levels that might be considered safe. Their relevance to the case-by-case adjudication of individual veterans' claims and their utility in adjudicating those claims may vary greatly.

Further, as the GAO pointed out in its January 2, 1981, report entitled "Problems in Assessing the Cancer Risks of Low-Level Ionizing Radiation Exposure"—EMD-81-1—some 80,000 articles have been published internationally on the health effects of ionizing radiation. In my view, the VA, for the purpose of reaching reasonable determinations with respect to these claims, should be required, as section 504 would do, to pull togther and analyze the available scientific literature and to determine where updating is needed or gaps in available research need to be filled.

Mr. President, in addition to conducting, and reporting on, the required review and engaging in active coordination with other Federal Government entities, section 504 would require the VA to promulgate regulations, based on the report on the required literature review and other available information, for resolving radiation-related claims. This provision is similar to one contained in the proposed amendment to the VA's agent orange study reported by our committee in S. 921 and passed by the Senate on June 16 in H.R. 3499. The proposed regulations would be required to be published in the Federal Register for public review and comment.

Mr. President, in connection with the requirement that the VA promulgate such regulations, I believe it is important to note what actions section 504 would not require.

The VA would not be required to develop rules with respect to the specific adverse health effects that develop subsequent to a known exposure to a quantifiable dose of radiation. Nor would the VA be required to quantify precisely the health risk to which a claimant was subjected in connection with in-service exposure to radiation. Whether such guidelines can properly or should be issued would be a matter for the VA to decide. Rather, the regulation-issuing requirement is intended to assure that the policies and procedures proposed by the VA for resolving radiation-related claims are matters with respect to the development of which there is full public participation. Because of the complex nature of this issue, I believe that the opportunity for such participation must be provided.

MINIMUM SERVICE REQUIREMENT

Fourth, Mr. President, section 505 of the committee bill includes my amendmen to amend title 38 to incorporate in title 38, with certain significant modifications and with respect to nonservice-connected benefits administered by the VA under laws other than title 38, the general 2-year minimum-service requirement for eligibility for Federal benefits for veterans that was added to title 10 as a section 977 last year, and which is the subject of a Senate-passed amendment authored by the distinguished chairman of the Veterans' Affairs Committee (Mr. SIMPSON) in S. 815, the proposed "Department of Defense Authorization Act of 1982." The committee report (S. Rept. No. 97-153 at pages 36-45) fully describes the purpose and effect of these provisions in comparison to present section 977 and the Simpson amendment.

Mr. President, I put this provision forward with Senator SIMPSON's support and cooperation, not just because I consider the substantive changes that it would make important, but because I believe it to be very important that the eligibility for title 38 and other VA benefits be located in title 38. I also wish to point out that Senator SIMPSON and I, in conjunction with our committee counterparts in the other body, are working with the Armed Services Committees in both bodies to achieve consensus on the minimum service requirement policies that will appear in title 38 and title 10.

MOBILE HOME LOANS AND OTHER PROVISIONS IN THE COMMITTEE AMENDMENT

Finally, Mr. President, I would like to call my colleagues' attention to the provisions of the amendment which the distinguished majority leader has so graciously offered as a committee amendment on behalf of Senator SIMPSON and myself and that the Senate has approved. This amendment contains three provisions which I believe are important to note.

First, the committee amendment contains a provision which I authored, adding a new section 405 to the committee bill, that would amend section 1819 of title 38, relating to VA loan guaranties for the purchase of mobile homes and mobile home lots, to extend the maximum lengths of maturity of the various types of loans for such purchases that may be guaranteed by the VA. Thus, this amendment would conform the maximum terms of such loans guaranteed by the VA to the corresponding new maximum terms for FHA-insured manufactured housing loans that were agreed to in H.R. 3982, the House-passed "Omnibus Reconciliation Act of 1981," and as passed by the Senate in May in a separate bill, S. 1197, the proposed "Housing and Community Development Amendments of 1981." This extension for FHA loans was requested in late April by the administration, and I am advised that the conferees responsible for the provisions relating to housing in the reconciliation measure reached agreement this past Tuesday to include the new FHA maturity periods requested by the administration.

VA and FHA loans, as well as other Federal commitments, are often pooled in large denominations and then sold on the secondary market. However, in order to pool such loans, the maturity dates need to be comparable so that all the loans in the pool mature at the same time. Facilitating the combined packaging of these loans for sale in the secondary market would serve to increase the overall availability of credit for veterans and would thus benefit veterans who choose to purchase manufactured housing.

Mr. President, I am very pleased that the Senate has approved the committee amendment that would increase the maturity dates of VA-guaranteed loans to equal the lengths of the new about-to-be-enacted terms for the FHA—from 15 to 20 years in the case of loans for a single-wide home and for a single-wide home and a lot; from 20 to 23 years for a double-wide home; and from 20 to 25 years for a double-wide home and a lot.

Second, the amendment would add a new section to the committee bill to modify the manner in which the chapter 35 VA educational assistance delimiting period is measured in the case of a surviving spouse. This provision is designed to correct an inequity in exisitng law that has come to the attention of the committee. This amendment was developed in consultation with the House Committee on Veterans' Affairs and the VA.

Third, the amendment would add to the committee bill a new section which would provide for a waiver of a pro rata refund requirement in the case of certain public institutions. This provision was incorporated into the committee amendment on the initiative of the Senator from Arizona (Mr. DECONCINI) and is designed to deal with a particular situation which, according to the VA, is unique to the Senator's State of Arizona, and I know the Senator will describe that situation in more detail in his remarks on this measure.

Briefly, the amendment would permit the administrator to waive a GI bill requirement that a nonaccredited educational institution maintain a title 38 pro rata refund policy in the case of a public institution that is a candidate for accreditation if the administrator determines that such a requirement imposes an undue administrative hardship on that school in light of the small amount of tuition, fees, and other charges at such an institution. This provision is modeled on a provision enacted in Public Law 96-466 last year that permits the administrator to waive a requirement in section 1673(a) of title 38 for computation of the so-called 50-percent employment ratio by a school offering a vocational objective course, if the computation would impose an undue administrative hardship on the school because

of the small proportion of GI bill trainees enrolled in the course.

CONCLUSION

Mr. President, we have before us an excellent example of a bipartisan effort that reflects our true commitment to this very special group of veterans. The chairman of the committee, Senator SIMPSON, deserves congratulations for the development of this measure, as do the members of the committee's majority staff who devoted much effort to this bill—Julie Susman and Lois Harper. In addition, Senator THURMOND—and his staff representative, John Pressly—merit special congratulations for their efforts to recognize the special needs of veterans who suffer from the service-connected loss or loss of use of both hands, efforts that I strongly support in this measure. Finally, I would like to make special mention of the committee's minority staff—Babette Polzer, Molly Milligan, Ed Scott, and Jon Steinberg—for their contributions to the development of this bill.

I am delighted, Mr. President, to endorse the provisions of the committee bill. I wholeheartdely recommend them to my colleagues and urge the Senate to approve the measure unanimously.

Mr. THURMOND. I rise in support of S. 917, the "Veterans' Disability Compensation, Housing and Memorial Benefits Amendments of 1981."

The major feature of S. 917 is its 11.2-percent cost-of-living increase for recipients of the Veterans' Administration compensation program. Also, those widows who are recipients of benefits under the disability indemnity compensation program will receive a 11.2-percent adjustment. I believe this increase is an example of the continuing commitment of the Senate Veterans' Affairs Committee to insure that those disabled due to service-related injuries will rank the highest in the scheme of veterans' benefits.

The compensation program currently provides benefits for 2,276,542 veterans who have service-connected disabilities. This number is composed of disabled veterans with the following periods of service: 2,730 World War I; 1,176,495 World War II; 234,420 Korean-conflict; and 562,849 Vietnam-era.

Mr. President, I am pleased that S. 917 contains a provision that I introduced which would rectify the disparity in current law between compensation rates for loss of function between those who have suffered the anatomical loss or loss of use of both upper extremities and those who have suffered loss of the lower extremities.

Title III provides an increase to $5,000 in the one-time automobile allowance for certain disabled veterans. The current automobile allowance is $3.800 and has not been increased since 1978. It is my understanding that the Consumer Price Index component for new automobiles has increased 21.6 percent since 1978.

Title IV of S. 917 establishes a graduated-payment plan as part of the Veterans' Administration's loan guaranty program and increases the amount which may be granted for specially adapted housing assistance. The VA loan guaranty program is extremely important both to veterans who are helped in the purchase of homes and to the economy as a whole. Unfortunately the soaring costs of purchasing a home, exacerbated primarily by the nearly unprecedented increases in mortgage interest rates, have forced many potential first home buyers out of the housing market. I believe that the time has come to introduce a graduated-payment plan into the loan guaranty program of the VA.

Title V of S. 917 contains various miscellaneous provisions regarding the payment of pension benefits to certain hospitalized veterans; memorial markers to veterans whose remains are not interred; and, a requirement that the VA conduct an analysis of literature regarding the radiation exposure of veterans to certain atomic tests conducted in the 1950's.

Mr. President, I have outlined the basic provisions of S. 917 and I believe it is very meritorious and I intend to support it.

UP AMENDMENT NO. 294

(Purpose: To designate the hospital known as the Veterans' Administration Medical Center, located in Reno, Nevada, as the "Ioannis A. Lougaris Veterans' Administration Medical Center")

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the Senators from Nevada (Mr. LAXALT and Mr. CANNON).

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. LAXALT and Mr. CANNON, proposes an unprinted amendment numbered 294.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27, above line 1, insert the following new section:

SEC. 508. The Veterans' Administration Medical Center in Reno, Nevada, shall hereafter be known and designated as the "Ioannis A. Lougaris Veterans' Administration Medical Center". Any reference to such center in any law, regulation, map, document, record, or other paper of the United States shall after such date be deemed a reference to the Ioannis A. Lougaris Veterans' Administration Medical Center.

The amendment was agreed to.

UP AMENDMENT NO. 295

(Purpose: To increase the maximum loan period for home loans guaranteed by the Veterans' Administration for the purchase of mobile homes, to modify the manner in which the VA educational assistance delimiting period is measured in the case of a surviving spouse and to provide for a waiver of a pro rata refund requirement in the cases of certain public institutions of higher learning.)

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the Senator from Wyoming (Mr. SIMPSON) and the Senator from California (Mr. CRANSTON) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. SIMPSON and Mr. CRANSTON, proposes an unprinted amendment numbered 295.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, between lines 11 and 12, insert the following new section:

EXTENSIONS OF MAXIMUM TERMS OF VETERANS' ADMINISTRATION-GUARANTEED LOANS FOR MOBILE-HOME PURCHASES

SEC. 405. Paragraph (1) of section 1819(d) is amended to read as follows:

"(d)(1) The maturity of any loan guaranteed under this section shall not be more than—

(A) fifteen years and thirty-two days, in the case of a loan for the purchase of a lot;

(B) twenty years and thirty-two days, in the case of a loan for the purchase of—

(i) a single-wide mobile home; or

(ii) a single-wide mobile home and a lot;

(C) twenty-three years and thirty-two days, in the case of a loan for the purchase of a double-wide mobile home; or

(D) twenty-five years and thirty-two days, in the case of a loan for the purchase of a double-wide mobile home and a lot.".

On page 27, above line 1, insert the following new sections:

DELIMITING DATES FOR SURVIVING SPOUSES OF CERTAIN SERVICE-CONNECTED DISABLED VETERANS

SEC. 506. (a) Section 1712(b)(1) is amended—

(1) by striking out "or" at the end of clause (A);

(2) by amending clause (B) to read as follows:

"(B) the date of death of a veteran who dies while a total disability evaluated as permanent in nature was in existence, or"; and

(3) by adding at the end the following new clause:

"(C) the date on which the Administrator determines that the person from whom eligibility is derived died of a service-connected disability.".

(b) Subsection (f) of section 2 of Public Law 90-631 (82 Stat. 1331) is amended—

(1)(A) by striking out "(f) In" and inserting in lieu thereof "(f)(1) Except as provided in paragraph (2) of this section, in", (B) by striking out "(C) and inserting in lieu thereof "(D), and (C) by striking out "eight" and inserting in lieu thereof "ten"; and

(2) by adding at the end the following new paragraph:

"(2) Where the death of the person from whom such eligibility is derived occurred before December 1, 1968, and the date on which the Administrator of Veterans' Affairs determines that such person died of a service-connected disability is later than December 1, 1968, the delimiting period referred to in section 1712(b) of such title shall run from the date on which the Administrator makes such determination.".

WAIVER OF PRO RATA REFUND REQUIREMENT IN THE CASE OF CERTAIN INSTITUTIONS

SEC. 507. Section 1776 is amended by adding at the end the following new subsection;

"(d) The Administrator may waive the requirements of subsection (c)(13) of this section in the case of an institution of higher learning which—

"(1) is operated by an agency of a State or of a unit of local government,

"(2) is located within such State or, in the case of an institution operated by an agency of a unit of local government, within the boundaries of the area over which such unit has taxing jurisdiction, and

"(3) is a candidate for accreditation by a regional accrediting association,

if the Administrator determines, pursuant to regulations which the Administrator shall prescribe, that such requirements would work an undue administrative hardship because the total amount of tuition, fees, and other charges at such institution is nominal.".

On page 27, line 6, strike out "and 403" and insert in lieu thereof "403, and 405".

The amendment (UP 295) was agreed to.

COMMITTEE AMENDMENT

Mr. SIMPSON. First, the amendment would add a new section 405 to the pending measure to amend section 1819 of title 38, United States Code, relating to VA loan guarantees for the purchase of mobile homes and mobile home lots, to extend the various maximum lengths of maturity of loans for such purchases that may be guaranteed by the VA.

The purpose of this amendment is to conform the maximum terms of such loans guaranteed by the VA to the new maximum terms of FHA loans for the purchase of manufactured housing in H.R. 3982, the proposed "Omnibus Reconciliation Act of 1981," as passed by the House on June 26 and in S. 1197, the proposed "Housing and Community Development Amendments of 1981." These new maturity periods were requested in late April by the administration for the FHA loans, and I am advised that the conferees responsible for the pertinent portion of the reconciliation measure reached agreement on Tuesday on the provisions affecting the FHA manufactured housing loans.

VA and the FHA loans, as well as other Federal commitments are often pooled in large denominations and then sold on the secondary market. However, in order to pool such loans, the maturity dates need to be comparable so that all the loans in the pool will mature at the same time. Thus, in order to facilitate the continued pooling of such loans, the committee amendment would increase the maximum maturities in the case of VA-guaranteed loans to those proposed for FHA: from 15 to 20 years in the case of loans for a single-wide mobile home and a single-wide mobile home and a lot; from 20 to 23 years for a double-wide mobile home; and from 20 to 25 years for a double-wide mobile home and a lot.

Second, the committee amendment would add a new section 506 to the bill to amend a free-standing provision of public Law 90-631, relating to the measurement of a veteran's spouse's educational delimiting period in the case of a veteran who died prior to December 1, 1968, in order to correct an inequity which has recently come to the committee's attention. The committee amendment would also make a technical amendment to section 1712(b) of title 38, United States Code, relating to the measurement of a spouse's delimiting period, to clarify existing law.

Third, the committee amendment would add a new section 507 which would amend section 1776 of title 38, relating to the criteria for approval of nonaccredited courses for the purposes of GI bill benefits, to permit the Administrator, in the cases of certain public institutions of higher education that are candidates for accreditation, to waive the requirement that the institution maintain a policy of making pro rata refunds to students who drop a course before its completion if the Administrator determines that the total amount of tuition, fees, and other charges at the institution is nominal and thus the requirement would work an undue administrative hardship on the institution.

I ask unamious consent to have printed in the RECORD letters from various veterans organizations.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DISABLED AMERICAN VETERANS,
DEPARTMENT OF NEVADA,
Sparks, Nev., July 21, 1981.

Senator PAUL LAXALT,
Booth Street,
Reno, Nev.

Hon. SENATOR LAXALT: I have been informed that you are interested in a Senate Bill concerning the change of name of the VA Medical Center in Reno. This "change of name" in honor of DAV member "Lougaris" has been an issue with DAV'ers in Nevada and other veterans for many many years.

The Department of Nevada Disabled American Veterans has resolved that we support all bills in Congress changing the name of the VAMC in Reno. Attached is documentation from our State Convention on this resolution. I am sure your office has been contacted repeatedly, from the DAV, Department of Nevada, and other organizations in support of this bill.

Please use your influence, in our support, to gain approval of Senate Bill 511.

Thank you.

W. A. PARCELLE,
Commander.

DISABLED AMERICAN VETERANS ANNUAL CONVENTION STATEMENT

We disabled veterans urge our Congressional Delegation to take immediate action to pass Senate Bill 511 now pending before the Senate Veteran's Committee of the United States Senate.

"Johnny," as we know him, is respected and loved by the Disabled American Veterans for his long devoted services to the Veterans of our state, especially to us.

He has been the father of the Disabled American Veterans in Nevada, which has grown from 25 members in 1932, to a present membership of over 2,000.

He is most deserving of the recognition referred to in Senate Bill 511. He has the support of every disabled veteran of our state.

It is resolved that a copy of this statement be mailed to the Honorable Howard W. Cannon and the Honorable Paul Laxalt, United States Senators from the State of Nevada, and the Honorable James Santini, Congressman from the State of Nevada.

Adopted unanimously this 1st Day of May, 1981, at Reno, Nevada.

———, ———,
Department Commander.

DISABLED AMERICAN VETERANS,
DEPARTMENT OF NEVADA,
Sparks, Nev., July 21, 1981.

GOV. ROBERT LIST,
State Capital Building,
Carson City, Nev.

Hon. GOVERNOR LIST: As you well know, the objectives of the Disabled American Veterans has a direct impact on Vietnam Veterans.

The Disabled American Veterans, Department of Nevada naturally strive toward the legislative goals of Disabled American Veterans.

We adamantly support the appointment of Vance DeBilzan to your Veterans Advisory Committee. Since he is a counselor with the Veterans Administration, and is knowledgeable in the needs of veterans in the State of Nevada, we request that he replace Mr. Crosby, as a representative of Disabled American Veterans.

Enclosed is a copy of the Disabled American Veterans legislative goals. Mr. DeBilzan is familiar with these goals and a well qualified representative of Disabled American Veterans.

The Disabled American Veterans, Department of Nevada, requests your prompt response regarding our request that Mr. DeBilzan be placed on your Veterans Advisory Committee.

Sincerely,

W. A. PARCELLE,
Commander.

U.S. SENATE,
Washington, D.C., June 22, 1981.

Hon. ALAN SIMPSON,
Chairman, Committee on Veterans' Affairs,
U.S. Senate, Washington, D.C.

DEAR ALAN: We the members of the Nevada delegation of Congress, strongly support bills S. 511 and H.R. 2856, to change the name of the Veteran's Hospital in Reno, Nevada, to the "Ioannis A. Lougaris Veteran's Administration Medical Center."

Not only does this legislation have the support of the entire Nevada delegation, there is also widespread community support. Organizations that have gone on the record supporting this measure include The American Legion (Department of Nevada and Darrel Dunkle Post No. 1), and Bruno Menicucci, former Mayor of the City of Reno.

Mr. Lougaris is an outstanding citizen of the State of Nevada and truly exemplifies the qualities of a leader. For these reasons, we think renaming the hospital is indeed a fitting tribute.

Sincerely,

PAUL LAXALT,
U.S. Senator,
HOWARD CANNON,
U.S. Senator,
JIM SANTINI,
Member of Congress.

THE AMERICAN LEGION,
DEPARTMENT OF NEVADA,
Carson City, Nev., March 23, 1981.

Senator PAUL LAXALT,
Russell Building,
Washington, D.C.

DEAR SENATOR LAXALT: The American Legion, Department of Nevada passing by Resolution No. 15 in convention assembled in Reno, Nevada on the 15th day of July 1979 did endorse that the Veterans Administration Medical Center in Reno, Nevada be renamed the Ioannis A. Lougaris Medical Center.

Therefore, it is my honor to beseech you in the name of The American Legion, Department of Nevada to convey our endorsement to the Congress of the United States of America and to our President Ronald Reagan.

May God bless you and guide you in your decisions and counsels for the good of The United States of America.

For God and Country,

BILLY R. OAKES,
Commander.

THE AMERICAN LEGION,
Reno, Nev., March 17, 1981.

Mr. J. REINKEMEYER,
Care of Senator PAUL LAXALT,
Russell Office Building,
Washington, D.C.

DEAR MR. REINKEMEYER: In reference to your request about Mr. I. A. Lougaris commonly known to us as Johnny.

This is concerning the bill S511 going to the Senate from Paul Laxalt on behalf of I. A. Lougaris in proposing the change of name of the Reno VA Hospital to the "I. A. Lougaris Medical Center."

In his resume you will notice that Johnny belonged to Darrell Dunkle Post No. 1, The American Legion, and then he transferred his membership to Capital Post No. 4 when he moved to Carson City and he again transferred his membership to Darrell Dunkle Post No. 1 when he moved back to Reno.

When Mr. Lougaris went to Washington, D.C., to get the VA Hospital into Reno he spent a lot of his time and money for the trips.

At age 94 he is the oldest practicing attorney in the State of Nevada and he is loved by his business friends as well as all Nevada Veterans.

Mr. Lougaris is well deserving of this honor for his work for the veterans by making sure that a hospital was here for them.

Sincerely yours,

GEORGE E TARVER,
Commander.

THE AMERICAN LEGION,
Sparks, Nev., March 18, 1981.

Mr. J. R. REINKEMEYER,
Care of Senator PAUL LAXALT,
Russell Office Building,
Washington, D.C.

DEAR MR. REINKEMEYER: This letter is in reference to naming the Reno V A Hospital after Mr. I. A. Lougaris as the "I. A. Lougaris Medical Center".

In July at our 1979 Department Convention held at the Darrell Dunkle Post No. 1 home in Reno; on the 15th of July the Convention passed resolution number 15 to name the hospital after Mr. Lougaris and a copy of the resolution was sent to each of our Congressional delegates in Washington, D.C., as well as a copy of the Convention Proceedings to each one.

Each Memorial day at the services held at the VA Hospital, Mr. Lougaris is honored as the father of getting the VA Hospital in Reno at his own time and expense.

Each time that Mr. Lougaris is at a veterans affair and the VA Hospital is mentioned he is given a standing ovation.

There is no other individual in Nevada that is more deserving of that honor than Mr. Lougaris.

Sincerely,

WALTER CHEEL,
Commander.

PROCLAMATION

Whereas, Ioannis A. Lougaris, better known as "John" to his friends and associates, was born in Greece ninety-two years ago on February 17th, 1887 and came to the United States in 1907, settling in Nevada in 1920; and

Whereas, John has been an outstanding businessman and also a devoted gentleman; and

Whereas, everyone who knows John on a business basis or just a social basis has learned to love him dearly for his integrity, honesty, love for the human race, character, loyalty, and, well, just everything good a man can be; and

Whereas, John has made a special place in the hearts of business people, including above all, attorneys and secretaries, who have been in touch with him through the years in business transactions; and

Whereas, everyone will always think of John as a very outstanding Nevadan who worked his way up the hard way from childhood and reached the ultimate; and

Whereas, John Lougaris was instrumental in bringing about the Veterans' Hospital in Reno, Nevada; and

Whereas, Mr. Lougaris has achieved much more in his life than can be said of most of the human race, and that is, he can honestly say of himself . . . "I know myself";

Now, therefore, be it resolved by the people of the City of Reno, through this Proclamation, that they sincerely appreciate and praise the splendid person of Mr. Ioannis A. Lougaris and they also praise him for his devoted service to mankind throughout his life, including his efforts in bringing about the Veterans' Hospital in Reno, Nevada. We commend him for the success he has made of his life.

Dated at Reno, Nevada, this 15th day of February, 1979.

SUMMARY OF PROCEEDINGS OF THE SIXTY-FIRST ANNUAL CONVENTION OF THE AMERICAN LEGION DEPARTMENT OF NEVADA

Therefore be it resolved: by the American Legion, Department of Nevada in Convention assembled in Reno, Nevada, July 13, 14, 15, 1979, that the Commander of the Department of Nevada, American Legion appoint a committee of five (5) members to evaluate the feasibility of re-districting the entire department, and

Be it further resolved: that the Committee be instructed to present a recommendation regarding this possible re-assignment to the next Department Convention.

RESOLUTION NO. 15—NAMING RENO VA MEDICAL CENTER

Whereas, Ioannis A. Lougaris dedicated most of his life to the service of all war veterans in Nevada, and

Whereas, the Veterans Administration Medical Center in Reno, Nevada was established due to many years of his efforts, and

Whereas, The Veterans Administration during its bicentennial celebration acknowledges that the Veterans Administration Medical Center in Reno stands as a tribute to his dedicated services.

COMMENDATION

This certificate is awarded to I. A. Lougaris: Who over forty years ago had a dream—a dream to improve the service to veterans throughout the State of Nevada. Dreams are realized only when the dreamer is dedicated and concerned. The Reno Veterans Administration Medical Facility stands as a tribute to his dedicated service. This commendation is presented with gratitute on behalf of the Veterans Administration and the veterans of Nevada.

Sincerely,

/s/ RICHARD L. ROUDEBUSH,
Administrator.

Now, therefore, the American Legion, Department of Nevada, in convention assembled July 13, 14, and 15, 1979 in Reno, Nevada endorse that the Veterans Administration Medical Center in Reno, Nevada be named Ioannis A. Lougaris Medical Center and

Be it further resolved, that a copy of the resolution be transmitted to the congressional delegation to take all necessary means so that legislation be enacted to accomplish the purpose of this resolution.

All resolutions were passed with the exception of 6 and 7 which were rejected. Number 6 was tabled. No. 7 was tabled. A motion was made to take both of these resolutions off the table. It was seconded and passed. It was moved the adoption of Resolution Number 6. It was seconded. It was voted down. Moved that Resolution Number 7 be adopted. It was seconded. It was voted down.

1st Vice Commander Henry Ofenloch was given the gavel to preside.

Membership pre roll call for 1980 cards by Department Adjutant. 320 cards already turned in.

Joseph P. Wagner, spoke on National Paid up for life membership. Needs clarifying. Department Adjutant has forms if you wish to see them. Various Posts spoke on their special Post plans.

Comrade Pardy spoke in favor of the Department Adjutant getting a raise plus a helper. Motion made, seconded and carried that the by-laws be amended to read the maximum salary for Adjutant be 2400.

Henry Ofenloch spoke on Baseball. Better control is needed. George Holden made a motion that the Baseball chairman make a report at the next DEC following the one today, or the program would be cancelled, and that the Executive committee look into this. Motion seconded and carried.

Installation of new officers for 1970–80: Installing officer is Charles F. Langel, Jr., Past Commander, Joe Romaine presented the Commanders pin to Henry Ofenloch.

Chuck Langel presented a Past Commanders Pin to Joe Romaine.

The colors were retired and prayer given.

Commander Joe Romaine declared the 61st department Convention adjourned.

DEPARTMENT OF NEVADA,
June 30, 1981.

Senator PAUL LAXALT,
Russell Office Building,
Washington, D.C.

DEAR SENATOR LAXALT: Enclosed is a copy of a resolution passed on the Department convention floor at our 47th annual Department Convention, Department of Nevada, Veterans of Foreign Wars, held recently in Elko, Nevada.

The members voted overwhelmingly in support of this resolution. We feel this should express our feelings on this matter.

Any assistance you can give us to get Senate Bill 511 approved will be greatly appreciated.

We remain,

Yours in comradeship,
JOHN J. RETTAGLIATA, *Commander.*
CLEMENT TAYS, *Commander.*

RESOLUTION NEVADA NO. 1—NAME THE VETERANS HOSPITAL IN RENO THE I. A. LOUGARIS VETERANS HOSPITAL

Whereas, the Veterans' Administration Hospital in Reno has had extensive renovation and additions; and

Whereas, this installation has only the name "Veterans Hospital" which is lacking in description or singularity; and

Whereas, I. A. Lougaris was a great community leader and contributed significantly to the initial establishment of the Veterans Hospital in Reno; now therefore

Be it resolved, by the Department of Nevada, that the congressional representatives of Nevada be memorialized by the Department of Nevada to push aggressively for approval of Senate Bill 511, now in committee, which accomplishes the naming of the Veterans Hospital, Reno, as the I. A. Lougaris Veterans Hospital.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment as amended, was agreed to.

The PRESIDING OFFICER. If there be no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time, was read the third time and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase

the rates of dependency and indemnity compensation for their surviving spouses and children; to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans; to increase the maximum amount payable in Veterans' Administration specially adapted housing assistance; to expand eligibility for memorial markers; and for other purposes.

GRATUITY TO BEATRICE MOODY

The resolution (S. Res. 182) to pay a gratuity to Beatrice Moody, was considered and agreed to, as follows:

S. RES. 182

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Beatrice Moody, widow of Johnnie Moody, an employee of the Senate at the time of his death, a sum equal to six and one-half months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO ARTHUR J. BUTO, DAVID W. BUTO, KATHLEEN A. BUTO, AND ROBERT C. BUTO

The resolution (S. Res. 183) to pay a gratuity to Arthur J. Buto, David W. Buto, Kathleen A. Buto, and Robert C. Buto, was considered and agreed to, as follows:

S. RES. 183

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Arthur J. Buto, David W. Buto, and Robert C. Buto, sons of Ann K. Buto, and Kathleen A. Buto, daughter of Ann K. Buto, an employee of the Senate at the time of her death, a sum to each equal to one-fourth of eight and one-half months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO SHIRLEY A. NELSON

The resolution (S. Res. 184) to pay a gratuity to Shirley A. Nelson, was considered and agreed to, as follows:

S. RES. 184

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Shirley A. Nelson, widow of Raymond N. Nelson, an employee of the Senate at the time of his death, a sum equal to one year's compensation at the position gross rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO MARGARET O. RIKER

The resolution (S. Res. 185) to pay a gratuity to Margaret O. Riker, was considered and agreed to, as follows:

S. RES. 185

Resolved, that the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Margaret O. Riker, widow of Reamer J. Riker, an employee of the Senate at the time of his death, a sum equal to seven months' compenstaion at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO MICHAEL R. SEITH

The resolution (S. Res. 186) to pay a gratuity to Michael R. Seith, was considered and agreed to, as follows:

S. RES. 186

Resolved, that the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Michael R. Seith, widower of Denise G. Seith, an employee of the Senate at the time of her death, a sum equal to nine months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

AUTHORIZATION FOR REVISION AND PRINTING OF SENATE MANUAL

The resolution (S. Res. 187) authorizing the revision and printing of the Senate Manual for use during the 97th Congress, was considered and agreed to, as follows:

S. RES. 187

Resolved, That the Committee on Rules and Administration hereby is directed to prepare a revised edition of the Senate Rules and Manual for the use of the Ninety-seventh Congress, that said rules and manual shall be printed as a Senate document, and that two thousand additional copies shall be printed and bound, of which one thousand copies shall be for the use of the Senate, five hundred and fifty copies shall be for the use of the Committee on Rules and Administration, and the remaining four hundred and fifty copies shall be bound in full morocco and tagged as to contents and delivered as may be directed by the committee.

NATIONAL ENERGY EDUCATION DAY

The joint resolution (S.J. Res. 84) to proclaim March 19. 1982, "National Energy Education Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 84

Whereas inexpensive and abundant energy permitted our great Nation to rise to a position of preeminence in the world community of nations; and

Whereas events of recent years have shown that our growing dependence on foreign energy supplies present a serious threat to the national security of the United States and to the health, safety, and welfare of its citizens; and

Whereas the development of new technologies to increase supplies and efficient use of traditional domestic and renewable energy resources promise to reduce our dependence on insecure and financially draining foreign energy supplies; and

Whereas these fundamental changes require the update of our educational system at all grade levels to prepare our youth to meet the new demands which are being created; and

Whereas the celebration of National Energy Educaton Day (NEED) will bring together students, teachers, school officials, and community members, to focus attention, during the past year, on the growth of an energy educated public, both young and old; and

Whereas NEED must also prompt additional efforts for the upcoming year which will demonstrate that to ignore the plight of an energy shortfall and to fail to seek sound remedies would be an error: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That March 19, 1982, is proclaimed "National Energy Education Day" to expedite and enhance energy education programs in schools, both public and private, at all grade levels, and the President is authorized and requested to (a) issue a proclamation calling upon the general public and educational institutions of the United States to observe this day with appropriate activities and ceremonies, and (b) to send suitable engrossed copies to all the Nation's Governors and Members of Congress, and (c) to direct all appropriate Federal agencies to cooperate with and participate in the celebration of "National Energy Education Day".

NATIONAL JOGGING DAY

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 223.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 94) to designate October 10, 1981, as "National Jogging Day."

The Senate proceeded to consider the joint resolution.

Mr. THURMOND. Mr. President, I am pleased that the Senate is taking up today Senate Joint Resolution 94, a resolution that I introduced on June 25 of this year. This resolution would authorize and request the President to designate October 10, 1981, as "National Jogging Day." A similar resolution, which I sponsored, passed the Senate last year on August 1, 1980.

I would like to take this opportunity to express my appreciation to my following colleagues who added their names as cosponsors of this resolution: Senator DURENBERGER, Senator SCHMITT, Senator ABDNOR, Senator CHAFEE, Senator LAXALT, Senator COCHRAN, Senator STEVENS, Senator GORTON, Senator DOLE, Senator EAST, Senator GOLDWATER, Senator DANFORTH, Senator HELMS, Senator LUGAR, Senator D'AMATO, Senator SPECTER, Senator DENTON, Senator CRANSTON, Senator DECONCINI, Senator BURDICK, Senator BOREN, Senator BAUCUS, Senator RANDOLPH, Senator TSONGAS. Senator JOHNSTON, Senator PRYOR, Senator MOYNIHAN, Senator WILLIAMS, Senator PROXMIRE, Senator HOLLINGS, and Senator RIEGLE.

Mr. President, as I commented on the Senate floor when introducing Senate Joint Resolution 94, this year will mark the 11th year in a row that thousands of people across the Nation celebrate the second Saturday in October as National Jogging Day. National Jogging Day was begun in 1971, as a way to encourage more people to become more active and physically fit. Sponsored by the National Jogging Association in cooperation with the President's Council on Physical Fitness and Sports as well as other organizations, National Jogging Day has grown from a small gathering of a couple of

dozen physical fitness activists to an event that in 1980 involved 1 million people nationwide. It gives me great pride to sponsor once again such a worthwhile event.

I would also like to point out that a companion measure, House Joint Resolution 303, has been introduced in the House of Representatives by Representative BEVERLY BYRON of Maryland. I am very appreciative of Representative BYRON's assistance in this matter, and I am hopeful that the House bill will soon take favorable action.

The joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 94) and the preamble, are as follows:

S.J. RES. 94

Whereas the public awareness of the need for maintaining physical fitness is becoming increasingly evident;

Whereas jogging is an excellent, convenient, and inexpensive form of exercise that provides opportunities for a graduated program of physical fitness for most individuals regardless of age, sex, or level of fitness;

Whereas numerous medical authorities believe that a regular, sensible jogging program improves the function of the cardiovascular system, reduces coronary risk factors, and serves as an advisable supplement to a weight-reducing or weight-control program;

Whereas a positive correlation exists between the development of a fit body and the ability to experience an enriched and more satisfying life; and

Whereas an estimated thirty million persons all across America jog or run as a recreational activity which is beneficial and enjoyable: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation declaring October 10, 1981, as "National Jogging Day", and calling upon the people of the United States and interested groups to celebrate such day by participating in fitness-related sports, seminars, and other events throughout the United States and to incorporate regular exercise into their everyday life.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the several resolutions were agreed to or passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DIABETES WEEK

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 84, National Diabetes Week, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the joint resolution which was read twice by its title.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

There being no objection, the joint resolution (H.J. Res. 84) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that Calendar Order No. 221, Senate Joint Resolution 74, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL

Mr. BAKER. Mr. President, I ask unanimous consent that once the Committee on Environment and Public Works reports the nomination of Matthew Norman Novick to be Inspector General of the Environmental Protection Agency, it then be referred to the Committee on Governmental Affairs for not to exceed 20 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1098.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1098) entitled "An Act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes", do pass with the following amendment: Strike out all after the enacting clause, and insert: That there is hereby authorized to be appropriated to the National Aeronautics and Space Administration to become available October 1, 1981:

(a) For "Research and development", for the following programs:

(1) Space Shuttle, $2,134,000,000;

(2) Space flight operations, $903,900,000;

(3) Expendable launch vehicles, $31,200,000;

(4) Physics and astronomy, $350,400,000;

(5) Planetary exploration, $215,200,000;

(6) Life sciences, $49,200,000;

(7) Space applications, $410,900,000;

(8) Technology utilization, $12,600,000;

(9) Aeronautical research and technology, $264,800,000;

(10) Space research and technology, $129,300,000;

(11) Energy technology, $2,000,000; and

(12) Tracking and data acquisition, $400,200,000.

(b) For "Construction of facilities", including land acquisition, as follows:

(1) Modification of 12-foot pressure wind tunnel, Ames Research Center, $18,500,000;

(2) Modifications to space flight operations facility, Jet Propulsion Laboratory, $9,300,000;

(3) Rehabilitation of utility control system, various buildings, Lyndon B. Johnson Space Center, $680,000;

(4) Construction of waste material incinerator, John F. Kennedy Space Center, $895,000;

(5) Repair of operations and checkout building roof, John F. Kennedy Space Center, $825,000;

(6) Modifications for enhanced 20-inch supersonic wind tunnel, Langley Research Center, $2,950,000;

(7) Modifications for high pressure turbine corrosion and thermal fatigue testing, Lewis Research Center, $1,200,000;

(8) Modification and relocation of 26-meter antenna, STDN, Goldstone, California, $4,700,000;

(9) Relocation of DSS-44 antenna to Tidbinbilla, Australia, $2,200,000;

(10) Space Shuttle facilities at various locations as follows:

(A) Construction of solid rocket booster processing and segment storage facilities, John F. Kennedy Space Center, $12,400,000;

(B) Modifications to firing rooms, John F. Kennedy Space Center, $3,100,000;

(C) Modification of manufacturing and final assembly facilities for external tanks, Michoud Assembly Facility, $2,785,000;

(D) Modifications to Building 30 for Shuttle operations, Lyndon B. Johnson Space Center, $650,000;

(E) Minor Shuttle-unique projects, various locations, $1,115,000;

(11) Repair of facilities at various locations, not in excess of $500,000 per project, $12,800,000;

(12) Rehabilitation and modification of facilities at various locations, not in excess of $500,000 per project, $17,700,000;

(13) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $250,000 per project, $2,320,000; and

(14) Facility planning and design not otherwise provided for, $10,000,000.

(c) For "Research and program management", $1,114,300,000 and such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law.

(d) Notwithstanding the provisions of subsection 1(g), appropriations hereby authorized for "Research and development" may be used (1) for any items of a capital nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) for grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator determines that the national program of aeronautical and space activities will best be served by vesting title in any such grantee institution or organizaton. Each such grant shall be made under such conditions as the Administrator shall determine to be required to insure that the United States will receive therefrom benefit adequate to justify the making of that grant. None of the funds appropriated for "Research and development" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $250,000, unless the Administrator or his designee has notified the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate of the nature, location, and estimated cost of such facility.

(e) When so specified and to the extent provided in an appropriate Act, (1) any amount appropriated for "Research and development" or for "Construction of facilities many remain available without fiscal year limitation, and (2) maintenance and operation of facilities, and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of 12 months beginning at any time during the fiscal year.

(f) Appropriations made pursuant to subsection 1(c) may be used, but not to exceed $25,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator and his de-

termination shall be final and conclusive upon the accounting officers of the Government.

(g) Of the funds appropriated pursuant to subsections 1(a) and 1(c), not in excess of $75,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities: *Provided*, That, of the funds appropriated pursuant to subsection 1(a), not in excess of $250,000 for each project, including collateral equipment, may be used for any of the foregoing for unforeseen programmatic needs.

SEC. 2. Authorization is hereby granted whereby any of the amounts prescribed in paragraphs (1) through (13), inclusive, of subsection 1(b)—

(1) in the discretion of the Administrator or his designee, may be varied upward 10 percent, or

(2) following a report by the Administrator or his designee to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the circumstances of such action, may be varied upward 25 percent,

to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 3. Not to exceed one-half of 1 percent of the funds appropriated pursuant to subsection 1(a) hereof may be transferred to the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of the funds appropriated pursuant to subsection 1(b) hereof (other than funds appropriated pursuant to paragraph (14) of such subsection) shall be available for expenditure to construct, expand, or modify laboratories and other installations at any location (including locations specified in subsection 1(b)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless (A) a period of 30 days has passed after the Administrator or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate a written report containing a full and complete statement concerning (1) the nature of such construction, expansion, or modification, (2) the cost thereof including the cost of any real estate action pertaining thereto, and (3) the reason why such construction, expansion, or modification is necessary in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 4. Notwithstanding any other provision of this Act—

(1) no amount appropriated pursuant to this Act may be used for any program deleted by the Congress from requests as originally made to either the House Committee on Science and Technology or the Senate Committee on Commerce, Science, and Transportation,

(2) no amount appropriated pursuant to this Act may be used for any program in excess of the amount actually authorized for that particular program by subsections 1(a) and 1(c), and

(3) no amount appropriated pursuant to this Act may be used for any program which has not been presented to or requested of either such committee,

unless (A) a period of 30 days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and each such committee of notice given by the Administrator or his designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objecion to the proposed action.

SEC. 5. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 6. Section 7 of title 18, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(6) Any vehicle used or designed for flight or navigation in space and on the registry of the United States pursuant to the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, Including the Moon and Other Celestial Bodies and the Convention on Registration of Objects Launched into Outer Space, while that vehicle is in flight, which is from the moment when all external doors are closed on Earth following embarkation until the moment when one such door is opened on Earth for disembarkation or in the case of a forced landing, until the competent authorities take over the responsibility for the vehicle and for persons and property aboard.".

SEC. 7. The National Aeronautics and Space Act of 1958, as amended, is amended by inserting at the end of section 305, the following new subsections:

"(k) Any object intended for launch, launched or assembled in outer space shall be considered a vehicle for the purpose of section 272 of title 35, United States Code.

"(l) The use or manufacture of any patented invention incorporated in a space vehicle launched by the United States Government for a person other than the United States shall not be considered to be a use or manufacture by or for the United States within the meaning of section 1498(a) of title 28, United States Code, unless the Administration gives an express authorization or consent for such use or manufacture.".

SEC. 8. Section 6 of the National Aeronautics and Space Administration Authorization Act, 1970, as amended (42 U.S.C. 2462), is repealed.

SEC. 9. Appropriations hereby authorized for space transportation system upper stages in section 1(a)(2) shall not be used to initiate sole-source procurement of a new upper stage until NASA in cooperation with other agencies has reviewed alternative systems, assessed competitive procurement of a new upper stage to satisfy national requirements, and reported findings to the authorizing committees of the House of Representative and the Senate.

SEC. 10. Of the appropriations authorized for planetary exploration in section 1(a)(5) up to $5,000,000 may be used for the purpose of a mission to intercept and observe Halley's Comet, but only to the extent that such funds are formally requested in a written message from the Administrator transmitted to the House of Representatives and the Senate.

SEC. 11. This Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1982".

Mr. BAKER. Mr. President, I move that the Senate disagree to the amendment of the House and request a conference with the House on the disagreeing votes of the two houses and that the Chair be authorized to appoint the conferees.

The motion was agreed to, and the Presiding Officer (Mr. WARNER) appointed Mr. PACKWOOD, Mr. GOLDWATER, Mr. SCHMITT, Mr. CANNON, and Mr. HEFLIN conferees on the part of the Senate.

WOMEN'S HISTORY WEEK

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 28.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 28) entitled "Joint resolution designating the week beginning March 8, 1981, as 'Women's History Week'," do pass with the following amendments:

Page 2, line 3, strike out March 8, 1981, and insert: March 7, 1982,

Amend the title so as to read: "Joint resolution designating the week beginning March 7, 1982, as 'Women's History Week'.".

Mr. HATCH. Mr. President, it was with great pleasure that on February 6, 1981, I reintroduced a resolution designating the week of March 8, 1981, as "Women's History Week." This year I was joined by a bipartisan group of 34 of my colleagues as cosponsors. I am pleased that the House of Representatives has unanimously passed a similar resolution sponsored by Representative BARBARA MIKULSKI of Maryland.

Mr. President, women have played an enormous part in the shaping of our American society, serving in roles as diverse as homemakers and soldiers. They have provided the impetus for many important social reforms and they have made individual contributions in the fields of science, education, medicine, religion, and government. Further, they have clearly led the way in establishing and leading the charities and philanthropic organizations which have greatly improved the quality of American life.

Even those of us who have been out of school longer than we might like to admit, can benefit from a review of where we have been as a nation. This proposal caused me to sit back and contemplate the many significant contributions of women. My great home State of Utah owes, in large part, its success as a territory and a State to the courageous pioneer women who struggled across the plains and mountains to settle in the Salt Lake Valley.

The legacy of these women and of women pioneers in all fields of human endeavor deserves to be recognized and celebrated throughout our Nation with special events and activities planned by

citizens and private associations. I believe it is wholly fitting that Congress officially designate a week to discover or rediscover this heritage.

Mr. BAKER. Mr. President, I move that the Senate concur in the amendments from the House.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

NATIONAL CHILDREN'S DAY

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 191, National Children's Day.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the joint resolution which was read twice by title.

Mr. METZENBAUM. Mr. President, I am pleased that the Senate is considering today a resolution which recognizes that children are our greatest resource. House Joint Resolution 191, which proclaims August 8, 1982, as National Children's Day, was introduced by the late Representative Tennyson Guyer of Ohio on February 25, 1981.

The idea of designating a special day to honor our Nation's children originated in 1979 with a junior high school class in Anna, Ohio. After studying about the International Year of the Child, several seventh grade students asked why there was no special day honoring children. Thus began the students' 2-year campaign to promote and eventually pass a piece of legislation calling for the establishment of a national children's day.

The students first took their idea to the Ohio State House of Representatives. They spent many long hours lobbying and writing letters to their representatives and also testified at a hearing. Last November the students were successful in getting a resolution passed by the Ohio State House which called upon Congress to establish a national children's day. Although the measure passed the house with only two dissenting votes, the bill was stalled in the State senate and died with the end of the session.

Undaunted, the students took their case to Representative Guyer, who agreed to introduce the measure in the U.S. House of Representatives. House Joint Resolution 191 is the result of the labors of these Anna, Ohio, students, and most of the language for the resolution was drafted by them.

House Joint Resolution 191 establishes a special day to recognize the importance of children to our Nation by calling their basic needs and rights to the attention of all Americans. These needs and rights include: The right to quality education and the opportunity to achieve their maximum potential; the right to freedom from discrimination, poverty, and hunger; and the right to the legacy of a world at peace. House Joint Resolution 191 is truly a fitting tribute to all children who, in the words of John F. Kennedy, "Are the world's most valuable resource and its best hope for the future."

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

There being no objection, the joint resolution (H.J. Res. 191) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

ORDER FOR EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended for 10 minutes and that Senators may speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DECLARATION OF THE OTTAWA SUMMIT

Mr. GLENN. Mr. President, on July 17, 1981 the U.S. Senate passed a resolution by a vote of 88 to 0, calling on the President to take certain immediate actions to improve the international nonproliferation regime. The President was urged in the resolution to confer on an urgent basis with other nuclear suppliers to consider tightening restrictions on dangerous nuclear trade.

Numerous reports in the press and elsewhere, indicated that the subject of nuclear nonproliferation was going to be raised at the Ottawa summit and that the declaration of the summit would contain a statement in support of nonproliferation efforts. I, in public statements and in private statements to administration officials, strongly supported the idea of using the Ottawa summit as an opportunity to discuss urgent nonproliferation concerns with the other supplier countries.

Mr. President, I wanted to back the President fully, to give him the strongest possible hand in dealing with nonproliferation matters at the Ottawa summit.

The Washington Post, in an editorial on July 20, 1981, supported this idea and the distinguished columnist of the New York Times, James Reston, in a series of two articles dated July 8 and 12, 1981 also urged the President to take advantage of this opportunity to make progress on this most important issue that threatens international peace and stability. I ask unanimous consent that both the Washington Post editorial and the columns of James Reston, that I referred to, be reprinted in their entirety at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. GLENN. Yesterday, I received a copy of the Ottawa summit declaration I searched in vain for some statement indicating that the supplier countries, including the United States, seriously considered or discussed the issue of nuclear nonproliferation—whether the subject of tightening restrictions on dangerous nuclear trade was raised, and whether there was any discussion about the need to improve the International Atomic Energy Agency's safeguards regime. Unfortunately, Mr. President, I was able to find only one statement in the declaration—I believe item No. 32 out of some 38—which referred to nonproliferation. Let me read the statement in its entirety.

> In most of our countries progress in constructing new nuclear facilities is slow. We intend in each of our countries to encourage greater public acceptance of nuclear energy, and respond to public concerns about safety, health, nuclear waste management, and nonproliferation. We will further our efforts in the development of advanced technologies, particularly in spent fuel management.

Does this statement indicate that the suppliers consider nuclear proliferation to be a serious problem requiring tough decisions on tightening exports or restraint in the introduction of advanced technologies using weapons-usable materials such as plutonium for fuel? I submit the answer is a resounding no. On the contrary, the statement is totally insensitive to the very real dangers which nuclear proliferation presents to the world today. The thrust of the statement is that somehow public concerns about nonproliferation and other nuclear matters must be assuaged so that there will be greater public acceptance of nuclear energy.

In other words, if someone could come up with a good PR campaign to convince the public that nuclear proliferation is a nonproblem, then that would presumably satisfy the concerns of the people who wrote this particular paragraph. What is more, the part of the statement about furthering efforts in the development of advanced technologies could have ominous implications depending upon its meaning.

If "advanced technologies" for storing spent fuel are being referred to, then the statement is unobjectionable. If, on the other hand, advanced technologies refers to reprocessing and the breeder, then the lack of any coupling of that statement with recognition that the current IAEA safeguards regime is inadequate and ineffective in dealing with such advanced technologies, would be a serious oversight bordering on irresponsibility.

In light of the Senate's action on July 17—that vote of 88 to 0 stressing the very solid decision of the U.S. Senate—I think it behooves the administration to offer an explanation as to why it chose to let the golden opportunity represented by the Ottawa summit pass by, thereby losing valuable time toward making the improvements on the international nonproliferation regime that must be made if confidence in the regime is to be sustained and improved. Time is working against us. If the suppliers are really concerned about the future of nuclear energy development, and more importantly, if they are really concerned about their national security, they will delay no further in taking the first steps toward a new world order in nuclear trade.

I yield the floor.

EXHIBIT 1

A NEW NON-PROLIFERATION POLICY

The administration's policy statement on nuclear non-proliferation issued this past

week amounts to a set of broad guidelines. Depending on how they are interpreted, their effect could range from a tough effort to curb further proliferation to tacit encouragement of trade in weapons-related technologies. We hope it is the former, but elements of the statement suggest it might go the other way. Take the call to "reestablish" the United States as a "reliable partner" in nuclear trade. This country has always been a reliable nuclear supplier except when it has delayed or withheld supplies because of weapons-related developments, and it hasn't begun to make those exceptions—under Jimmy Carter or anyone else—with anything like the determination or consistency it should have brought to bear. In the insiders' jargon of this business, in fact, "reliable supplier" suggests not letting non-proliferation concerns interrupt nuclear trade. The policy statement also promises not to "inhibit" reprocessing and breeder reactor programs in Europe and Japan, thereby taking what is at best a neutral stance toward a destabilizing international trade in plutonium—the optimal weapons fuel.

In an unexpected response, the Senate approved a resolution drafted by Sen. John Glenn, calling for sweeping changes in the international nuclear regime. Despite strong opposition from the State Department—if one is looking for consistency, State Department hostility to anti-proliferation efforts over the years is where one will find it—the final Senate vote was 89 to 0. The resolution calls for an "urgent" effort by the nuclear suppliers to tighten the rules of nuclear trade, including a "temporary worldwide moratorium" on the transfer of certain dangerous equipment and technology to sensitive areas including the Middle East and South Asia. Learning from Iraq, it calls for limiting the size of research reactors and eliminating the use of weapons-usable highly enriched uranium fuel in them. It proposes a number of specific steps to make international safeguards worthy of the name, including adoption by all suopliers of the U.S. requirement for safeguards on all nuclear activities in a recipient country, thereby making all facilities subject to international inspection whether or not the owner admits their presence to the International Atomic Energy Agency. In Iraq, this would have meant that inspectors would have had a claim to access to the reprocessing "hot cells." Likewise in Pakistan, there would have been a strong claim to open up the secret enrichment plant. Finally, the resolution calls on the suppliers to agree in advance on specific sanctions for any violation of safeguards.

All the major suppliers except Switzerland and the Soviet Union will be present at this week's Ottawa summit. It is, of course, too late for the administration to present initiatives specifically based on the Senate's unequivocal call for strong action, and the other supplier countries are not exactly enthusiastic about discomfiting their nuclear trading relationships for mere reasons of potential nuclear weapons spread. But it is not too late for the president to respond by telling the summit partners that he gives this effort a high priority and expects a similar response from them. Agreement at Ottawa on an early meeting of the nuclear suppliers would be a worthwhile outcome.

SUMMITRY AND THE BOMB (I)

(By James Reston)

WASHINGTON.—The leaders of the seven most powerful industrial nations will meet at the Chateau Montebello outside Ottawa on July 20 and 21. It will be somewhat different from their six previous meetings in two ways.

First, five of the seven leaders who met last year will not be there. The Presidents of the United States and France and the Prime Ministers of Japan, Canada and Italy have been elected since the 1980 Venice summit meeting. Such is the mobility of fragility of world politics that the only holdovers will be Chancellor Helmut Schmidt of West Germany, Prime Minister Margaret Thatcher of Britain and the president of the Commission of European Communities.

Second, while these new and old leaders represent countries that account for about half of the world's trade, and began these meetings at Rambouillet near Paris in 1975 primarily to discuss economic problems, they have increasingly been forced to consider political problems—even religious and philosophical questions—that influence East-West and North-South economics decisions and threaten the security of them all.

In two days at Montebello it's not likely that they will be able to give much meaning to their "final economic communique"—which they are all writing even before they arrive—but there is one imperative and neglected question they might, in their common interest, be able to elevate to the prominence it deserves.

This is the control of the arms race in general and nuclear weapons in particular. For they cannot control their economies, even in the richest countries; they cannot begin to grapple effectively with the East-West or North-South problems—or even with their own internal struggles of inflation, unemployment and social stress, so long as the nations of the world are spending over $800 billion a year on military arms and scattering the knowledge and materials for atomic weapons to unstable governments without any coherent regard for the possible consequences.

Much attention has been paid in recent years to the economic and monetary chaos of the world; to the dangers to the industrial and developing nations of the rising price of oil; to the Israeli-Arab tangles and the economic and social risks of high inflation and low productivity in the Western world.

But relatively, no such attention has been paid to the growing nuclear chaos; to the spread of nuclear materials, not only to more and more nations but even to the danger of their availability to terrorists.

Israel has dramatized the danger by its sudden strike against the nuclear facilities in Iraq. But in addition to the major nuclear powers, India, Pakistan, South Africa, Argentina, Brazil, South Korea, Taiwan, Japan and most of the industrial European nations now have the capacity to produce nuclear weapons. And Israel's "Pearl Harbor" attack on Iraq merely gives us a frightening glimpse of the coming nightmare if this problem is not brought under control.

In the short run Israel achieved its immediate objective, but didn't remove the danger. It was "condemned" by the United Nations, and even by the United States, but was reassured within a few days that it would get the planes it wanted from Washington and might even be able to persuade Congress not to send Awacs planes to Saudi Arabia for the defense of its borders, which the Israelis violated on their way to Iraq.

But in the long run, this is clearly no solution. Though the Israelis have now conceded that they can produce atomic weapons and have offered to negotiate a nuclear-free zone in the Middle East, the Arab states have announced that they are more determined than ever to produce nuclear weapons of their own.

What is more disturbing about the Israeli attack in Iraq is that it is not likely to discourage the spread of nuclear weapons, which Israel intended, but to spread the chaos.

As Gerard Smith, the chief of the U.S. delegation to the Strategic Arms Limitation Talks, has pointed out, those countries that have or will soon have the capacity to manufacture nuclear weapons will now be all the more careful to conduct their development of nuclear power in secret, lest they be attacked by their hostile neighbors.

Increased secrecy about nuclear development, even for peaceful purposes, will inhibit the work of such watchdog institutions as the U.N.'s International Atomic Energy Agency, which is trying to control the misuse of atomic fuel. Without effective international surveillance of nuclear facilities, Mr. Smith insists, nations that fear the technological intentions of their neighbors will feel even less secure, and the greater the sense of insecurity the greater the impulse to produce nuclear weapons.

The industrial nations at the Ottawa meeting have recognized this danger and have babbled about it for years without ever coming to grips with it, meanwhile distributing atomic information and materials with no sense of the consequences.

It is not that they have been indifferent to the danger, but indecisive. At Ottawa, the new leaders have an opportunity not to solve the problem but at least to bring it to the forefront of their own agenda and to the urgent attention of the world as a "clear and present danger," where it belongs.

SUMMITRY AND THE BOMB (2)

(By James Reston)

WASHINGTON.—When the leaders of the major industrial nations meet in Ottawa on July 20–21, President Reagan will be asked some hard questions about United States policy on the export of nuclear knowledge and materials to other countries.

For while Washington, long before the days of Reagan, has talked more about the dangerous spread of nuclear weapons than any other capital in the world, it has been the principal exporter of nuclear information "for peaceful purposes," without having any effective policy for keeping its information and nuclear materials from being used in secret to produce atomic weapons.

As The Wall Street Journal pointed out the other day, the United States supplies nearly all the noncommunist world's highly enriched uranium for power plants. Sixty small research reactors have been exported from the United States with the aid of Federal money.

The United States Government has invested about $5 billion in long-term loans through the Export-Import Bank for about 70 commercial nuclear reactors for generating electricity overseas. There is also a vast educational program on nuclear development, financed by the United States Government, including the training of over 13,000 foreign students in atomic energy development, including students not only from Western Europe but from Israel and from Iraq and other Arab states.

President Reagan, of course, will not be the only member at the Ottawa summit facing this dilemma. France delivered the nuclear reactor to Iraq, which the Israelis, fairly or not, felt they had to destroy recently by bombing. So President Mitterand of France will face the same question at Ottawa:

How, in a world of rising oil prices, and declining petroleum resources, to develop nuclear energy for coming generations without the danger that it will be used, not for "peaceful purposes" alone, but for war and by terrorists.

More than any other country, the United States has a special place in the history of this atomic tangle. It was the first to develop the awesome power of the atom for military purposes. It was the first to use it, bombing Hiroshima and Nagasaki to end the war against Japan. It was also the first to propose to the Soviets and the world that this apocalyptic weapon should be not only controlled but abandoned. And the Soviets have to face the judgment of history that

they rejected all these proposals out of Washington—by Acheson, Baruch, Lilienthal, and Eisenhower—to bring the atom under international control.

Even so, the fault of the present chaos in the control of nuclear power does not lie wholly in Moscow. The Soviet leaders, watching the development of nuclear power in China and India, have been relatively cautious. They have not exported their nuclear knowledge or materials even to their Eastern European or their Middle Eastern allies, and their complaint is not that they reject the Strategic Arms Limitation Treaty signed by Presidents Carter and Brezhnev two years ago at Vienna, but that the treaty was blocked in the United States Senate.

The Allied leaders will be asking President Reagan about all this at Ottawa later in the month. Prime Minister Trudeau of Canada has been here in Washington this week talking to Mr. Reagan about the agenda, and in this, the seventh summit meeting of the seven industrial leaders, Mr. Trudeau is apparently determined to preside, not over another comfortable, deceptive communiqué, but over an honest discussion of the major economic and military problems of the world.

On economic questions, President Reagan is on solid ground with the Allies. They have been complaining for years that the United States has been letting its economy go slack and loitering down toward disaster. And now that Mr. Reagan has stunned the United States into some kind of control over its economy, they are complaining that his economic austerity is producing high interest rates and adding to the economic dilemmas of Europe and Japan. No doubt he will be able to defend himself against these economic arguments.

But on foreign policy in general, and arms control in particular, Reagan will have more trouble at Ottawa. The Allied leaders like him personally but don't like his policies.

They don't agree that all the problems of the Western world are caused by the Communists in Moscow. They don't like his rhetoric or his public predictions that the Communist empire is about to collapse. They think his emphasis on the threat of Communist penetration in El Salvador was silly; that Washington's support of Israel in the Middle East is excessive; that suggesting military aid to China as a tactic against the Soviet Union is dangerous; and that the spread of nuclear knowledge and materials, without a policy to control it, is reckless.

So the Allies have a lot to talk about at the Chateau Montebello outside Ottawa later this month. But as Allen Gotleib, Prime Minister Trudeau's personal representative for this conference has pointed out, even Moses, coming down from the original Summit, had his troubles. And it may be that these new leaders of the free world will be so preoccupied with trade and interest rates and other economic problems that they won't have much time for control of nuclear power and weapons, which could be more important than anything else.

GASOHOL MADE FROM JELLY BEANS

Mr. PERCY. Mr. President, Illinois motorists using gasohol in their automobiles may have a new source of locomotion: jelly beans. The Farm Energy Co-Op Inc. in Indianola, Ill., is currently utilizing 5,000 pounds of jelly candies daily to manufacture ethanol that is used in gasohol.

The company receives 30 million pounds of jelly candy annually from the Chuckles Candy Co., a division of Nabisco Confections, Inc. These are waste products that otherwise would be thrown away. They include jelly beans, Chuckles, Easter eggs, JuJu's, and orange slices.

The process has several advantages. One pound of waste sugar is converted into 0.511 pound of alcohol, which compares favorably with the yield from starch; 1,250,000 Btu's are saved per day in the cooking process because of the sugar.

Enzymes and recycled process water are saved due to this process. Alcohol yields are excellent.

On July 18, 1981, the co-op held an open house in the Indianola grade school building.

Mr. President, I salute Kenn Davis, general manager, and ask unanimous consent that a letter from Mr. Davis describing this process be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FARM ENERGY CO-OP, INC.,
Indianola, Ill., June 29, 1981.

Mr. HOWARD MARKS,
c/o Senator CHARLES H. PERCY,
Washington, D.C.

DEAR MR. MARKS: In response to Richard Archers' suggestion and your request for more information, I will attempt to explain as much as I can about our process and background using industrial food processing waste products in the manufacture of ethanol.

Chuckle Candy Co., a division of Nabisco Confections, Inc., produces 30 million pounds of jelly candy per year. This jelly candy includes jelly beans, Chuckles, Easter eggs, Ju-Ju's, orange slices, etc.

Recognizing the potential alcohol available in the form of industrial food processing wastes, we solicited and obtained a long-term purchase agreement with Nabisco to remove the candy and starch wastes from their Chuckles plant on a daily basis. From October 1980 to March 1981, these food processing wastes were used in combination with corn in recipe concentrations of 10 percent, and 20 percent, and 30 percent. In mid-March of this year, we began using 100 percent waste products from Chuckles in our process. There were many contributing factors involved in making this decision. I will admit there were many, many problems in the beginning. However, at this time yields of .511 pounds of alcohol per one pound of sugar are being obtained. This yield compares favorably with the starch conversion yield ratio of .568 pounds alcohol per one pound starch. Using food processing waste products has many benefits which are not at first apparent. Actual test data is not available at this time, but we estimate 1,250,000 BTU's are saved per day in the cooking process alone when using sugar. This is an annual savings of over 35,000 pounds of Illinois stoker coal. Because one-half of the raw material used in our process is sugar (jelly candies), which require no enzymes in order to process, we are realizing a substantial savings in the cost of enzymes. This savings alone totals another $20 per day. One other area, and perhaps the most important, is the increased use of backset (recycled) process water. The jelly candy and starch wastes do not contain the salts that have a tendency to build up in the process water when using corn. We are also seeing better alcohol yields as a result of this. Why—I don't know.

Because the starch we receive from Chuckles is a "confectionary starch" (purchased from A. E. Staley, Co., in Decatur, Illinois) the grind is so fine we do not have a by-product available for feed. Basically, everything is converted to alcohol.

We currently have this waste product under contract to purchase at a cost of $40 per ton. Compare this price to the cost of corn at $120 per ton, realizing a ton of corn will only contain about 1300 pounds of starch. Hence, compare the cost of corn at 12 cents per pound for the available starch to the waste starch cost of 2 cents per pound. As you can see, the use of food processing waste products has greatly reduced our raw materials cost. The cost of raw materials is the single largest percentage of cost in producing power alcohol.

On a normal production day, we currently process 5000 pounds of jelly candies and 5000 pounds of confectionary corn starch. On the average, we are receiving about 3000 pounds of waste from Chuckles daily. This waste is approximately 50 percent pure confectionary corn starch and 50 percent jelly candies. We have been able to maintain production only because we had over 200,000 pounds of jelly candy on hand before we developed a successful recipe. Current negotiations are underway with other local food processing industries to obtain additional waste products for us in our process.

Our daily production goal (700 gallons of 190 proof ethanol) cannot be maintained when using 100 percent sugars and confectionary corn starch, however. Current production is about 600 gallons per day. The one problem we have now is raw material handling. Our plant was not originally designed to handle waste food products. When a product has a combination of more than one ingredient, the handling of that product becomes increasingly more difficult.

Another benefit of using food processing wastes in the process is the absence of fusel oils normally present when corn is cooked and fermented. The absence of these fusel oils make the resulting alcohol better suited for industrial uses.

We have limited resources and therefore, major advances in the use of waste products is taking longer than I would like. If more emphasis could be put on developing this part of the industry, greater progress and savings could be realized by the ethanol industry in general.

If need be, we would be more than happy to review our plant and process with you in greater detail. However, I believe this should give you a good idea of what changes were required in order to use the food processing wastes.

Again, thank you.
Sincerely,

KENN DAVIS.

RETIREMENT OF CHARLES Y. LAZARUS

Mr. GLENN. Mr. President, on July 30, 1981, one of Ohio's most prominent sons will be retiring from a highly successful business career. Mr. Charles Y. Lazarus, now a very young 67 years old, has served since 1969 as chairman and chief executive officer of Lazarus Federated Department Stores' Columbus Division. He is the fourth generation of his family to serve as head of the company which now operates 16 stores in Ohio, Indiana, and West Virginia.

Because he bears a prominent family name, the uninformed might be tempted to think that Mr. Lazarus' success was owed more to geneology than to his own efforts. But as the immortal Spanish novelist, Cervantes, once reminded us, "Every man is the son of his own work." By that measure, Chuck Lazarus has greatly enhanced an already proud line-

age. As the company's president, Mr. Howard Goldfeder, recently pointed out:

Lazarus prospered and grew under Charles Lazarus' leadership, as did the city of Columbus on whose behalf he has labored unselfishly. When he was chosen to head Lazarus, he took over a tradition, and through his own efforts, made the tradition stronger.

It is important to note, however, that Charles Lazarus' contribution to Columbus did not end at his office door. Indeed, it would be difficult to list all of the civic, educational, and governmental activities in which he has been engaged. Nevertheless, several bear special mention. In recent years, Chuck has served as chairman of the Governor's Advisory Committee on Civil Rights, president of the American Retail Federation, the first metro chairman of the National Alliance of Businessmen, chairman of the Ohio State University Development Fund, and as a member of the Business Industry Council of the White House Conference on Youth. He is a former director of the Federal Reserve Bank in Cleveland and currently serves on the boards of the Ameritrust Corp. and the University Hospitals in Columbus.

For these and other endeavors, Chuck Lazarus has received the thanks and recognition of his community. Among other distinctions he received the 1972 Columbus Award for Civic Leadership from the Columbus Area Chamber of Commerce and in May 1980, the Preston Davis Award of Citizens' Research, Inc.

Fortunately for his fellow citizens, Mr. Lazarus' retirement will not mean his withdrawal from the world. He has already announced his intention to devote more time to community and urban projects, as well as to a number of personal interests. In the past, Mr. Lazarus has served his business, his city, his State, and his Nation in the grandest of fashions. I know he will continue that tradition in the future. So, on behalf of all Ohioans, I salute Chuck Lazarus for all he has accomplished thus far, and I look forward to the even greater contributions he will make in the years to come.

IN THE MATTER OF MR. WATT * * *

Mr. MATHIAS. Mr. President, this Nation has a long and proud history of conservation of our national resources, protection of wildlife, and of environmental purity. Laws, such as the Environmental Policy Act, Endangered Species Act, Clean Air and Clean Water Acts, the Alaska National Lands Act, the Coastal Zone Management Act, the Marine Sanctuaries Act, and many others, have done much to safeguard this Nation's natural treasures, many of which are nonrenewable. Once lost, they are gone forever.

A Republican—Abraham Lincoln—was responsible for the first environmental protection legislation and, over the years, the Republican Party has played a significant role in the protection of our natural resources and in the enactment of much of our most important environmental protection legislation.

Recent trends in public policy toward our natural resources, however, give cause for concern. Mr. Nathaniel Reed, a former Assistant Secretary of the Interior under a Republican President, discussed his concern about the future of the conservation legacy which the United States has developed, and which is the envy of the world. I ask unanimous consent that excerpts from Mr. Reed's speech, as printed in the Sierra Club magazine, July–August 1981, appear in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IN THE MATTER OF MR. WATT . . .

I am here tonight as an old soldier of the Grand Old Party of the conservative movement—but a soldier who is sick at heart over the direction his party has been taking in the last few months.

I am a lifelong Republican, and I am extremely proud of my party's environmental record—from Abraham Lincoln's original withdrawal of Yosemite Valley, and Ulysses Grant's signing of the bill to establish Yellowstone as the world's first national park, to the withdrawal of the Arctic Game Range during Dwight Eisenhower's years—the largest land withdrawal in history up to that point.

Under more recent Republican administrations, the progress has been truly remarkable. The enactment of the National Environmental Policy Act; the creation of the Environmental Protection Agency and the President's Council on Environmental Quality; the enactment of the Endangered Species Act; the formulation and submission of the Alaska d-2 proposals; the great leap forward in the amount of land set aside as wilderness; the establishment of the first urban parks—all of these actions took place under Republican leadership, and many of them were Republican ideas.

In 1908, as President, Theodore Roosevelt called a conference on natural resources that was attended by the nation's Cabinet members, governors, members of Congress and experts on natural resources.

In his opening address, Roosevelt said the conference was in effect a meeting of all the people's representatives to consider "the weightiest problem now before the nation. . . . I have asked you to come together now because the enormous consumption of these resources and the threat of imminent exhaustion of some of them, due to reckless and wasteful use . . . calls for common effort, common action."

That kind of approach to the environment has guided Republican administrations for the last 70 years. Yet some of the new administration's people seem to be wildly out of sync. They are attempting to turn the clock back to the pre-Roosevelt era, when everyone supposed natural resources were inexhaustible. I cannot sit idly by and watch this lamebrained, outmoded philosophy take hold and stain my party's image.

It causes me a great deal of pain to criticize the administration as I am about to do—more pain than I care to describe. But my quarrel is not with Ronald Reagan. I think he will be a good President and a notable environmentalist.

The problem as I see it is that some of his appointees—and particularly James Watt, the Secretary of the Interior—have broken faith with the Republican Party and betrayed their President.

Some of you may recall that Watt headed one of the bureaus for which I had responsibility when I was at Interior—the Bureau of Outdoor Recreation. Nobody likes to complain about an old colleague. I had hopes that he would rise above his narrow, advocate's role as director of the Mountain States Legal Foundation. I had hopes that he would develop into a statesman Secretary of the Interior, in the tradition of Udall, Morton, Hathaway, Kleppe ond Andrus.

But two of Watt's actions have convinced me that he is already a disaster as Secretary. One of these is his butchery of the Land and Water Conservation Fund. I'll return to that later. The other is the talk that he delivered to the Conference of National Park Concessioners early this year—surely one of the most fawning, disgusting performances ever given by a Secretary of the Interior. He was so eager to please that he all but gave away the park system.

"I don't like to paddle and I don't like to walk," Watt told the concessioners. In answer to a question about river-running in the Grand Canyon, he said: "I went down in September on the Grand Canyon, Colorado River. . . . The first day was spectacular. . . . The second day started to get a little tedious, but the third day I wanted bigger motors to move that raft out. There is no way you could get me on an oar-powered raft on that river—I'll tell you that. On the fourth day we were praying for helicopters and they came."

Can you imagine? We have a Secretary of the Interior who is bored by the Grand Canyon! This is a man who was nominated for his job in part because he is a westerner, and yet his insensitivity to the beauty and adventure of the West is appalling.

But these are only incidents. Watt actually invited the concessioners to help him administer the national parks. Here are his exact words: "You folks are going to play a tremendously important role and a growing role in the administration of our national parks, and we are going to reach out to involve you in some areas that you haven't been asked to be involved in before. I shouldn't say that. We are going to ask you to be involved in areas that you haven't been allowed to be involved in before."

Now I have no desire to feud with the national park concessioners. A few of them are rascals, but most of them are fine people who perform valuable services. But they have no business whatever involving themselves in park administration. There has always been a certain amount of tension between the Park Service and the concessioners, but it's a healthy tension. Whether Watt knows it or not, he cannot resolve this divergence of interests by waving a wand: he cannot legally delegate any part of managing the national parks to the concessioners.

At the same time Watt has proposed numerous changes in the rules for administering individual parks that would benefit private parties at the expense of the public interest. In Everglades National Park and Big Cypress National Preserve alone, he would:

Allow airboats to use a trail in the park, contrary to longstanding policy;

Give commercial fishermen in the park lifetime permits, whereas previous policy has been to phase out this activity in 5 years; this action would in all likelihood destroy a multimillion-dollar game-fishing industry outside the park;

Give lifetime occupancy permits to squatters in the Big Cypress.

Watt seems to think he has divine sanction for his effort to turn our national resources over to concessioners and developers. He has been quoted in Time magazine as saying, "My responsibility is to follow the Scriptures, which call upon us to occupy the land until Jesus returns." But the Scriptures also have this to say about the land: "Woe to the ones joining house to house, and those who annex field to field until there is no more room. . . ." Isaiah 5:8. The sad truth is that the Secretary and his developer friends are worshipping a false god. Matthew, Christ's discerning disciple, wrote: "Beware

of false prophets which come to you in sheep's clothing, but inwardly are ravening wolves. Ye shall know them by their fruits." Matthew 7:15.

All of this, of course, is at utter variance from the Republican tradition. Nor do I believe the Watt approach corresponds to the environmental philosophy and the record of his President. In point of fact, that record is a very good one.

California made significant environmental progress under the leadership of Governor Ronald Reagan, as a few examples will show: He vetoed the Dos Rios Dam in the face of strong support by the powerful southern California water lobby. During his administration the state park system nearly doubled in size, and the initial coastal zone plan was developed.

In light of his record, it is difficult to explain why President Reagan has permitted his administration to recommend eliminating the Land and Water Conservation Fund programs, including the historic preservation program in its entirety, the agency that Watt himself so proudly headed a scant five years ago—how's that for loyalty? The answer, I believe, has to do with two Reagan preoccupations—foreign affairs and budget cutting—and his management style, which involves delegating a great deal of authority to trusted subordinates. What has happened is that some of his subordinates have abused this trust.

Let's examine Watt's attempt to trash the Land and Water Conservation Fund. The money comes from the sale of offshore oil and gas leases. The annual contribution to the fund now stands at almost $1 billion. The fund can be expended for only two basic purposes: to purchase land for selected federal programs (e.g., fleshing out the national parks and forests and providing habitat for endangered species) and to make matching grants for state and local governments to use in establishing their own parks and recreation projects.

The state side of the fund has become one of the most cost-effective revenue-sharing programs ever created. It has been used to preserve hundreds of thousands of acres of land, which have been enjoyed by millions of Americans.

The federal side of the fund is the means by which parks in concept become parks in reality, by which endangered species obtain a new lease on life. If national parks, refuges and forests are to be anything more than boundary lines drawn on paper, the fund is indispensable.

The Carter administration had asked Congress to appropriate $237 million from the fund for federal land purchases in fiscal year 1981 and $335 million in fiscal year 1982. Watt proposes to spend no more of the '81 money; he wants to stuff the unobligated $105 million back into the fund. He proposes to reduce the 1982 appropriation to a token $45 million. At the same time he wants Congress to rewrite the rules for using the fund and appropriate $105 million for restoring and upgrading existing parks. As for the state and local grants program, Watt has in mind nothing less than its extermination.

And so, in one rash step, the Secretary of the Interior has proposed wiping out the most popular and effective federal revenue-sharing program in the country, perpetrating a cruelty on every landowner within the boundaries of a national park or forest, and guaranteeing that land purchases for the fund's purposes will be at inflated prices down the road.

I want to dwell for a moment on this fiscal aspect of the Watt proposal, for it's the one that strikes me as an out-and-out betrayal of the President. In his eagerness to be out-front of all other agencies in budget-cutting, Watt has saddled his successors—and the American taxpayers—with an inflationary future. Instead of fighting inflation by reducing expenditures, he will make sure that his successors pay swollen land prices a few years from now. This is false economy. This is a travesty of budget-cutting. This is directly contrary to the fiscal responsibility that Ronald Reagan was elected to impose.

Let me also dwell for a moment on the implications of Watt's proposal for the endangered species program. Although earlier Watt had promised that "high-priority endangered species programs will be continued," when he submitted his FY 1982 budget he reneged. Endangered species took a 36 percent cut, the deepest of any program in the department. Watt slashed, by more than half, the budget for the listing program, by which endangered species are recognized as such and afforded the protections stipulated in the act.

Although Watt implied that he was shifting priorities to the recovery side of the program, he cut that by $6.5 million, more than one third of the fund, including the grant program to the states in its entirety. He also cut almost half of the research effort. For Watt to pose in front of a painting of a bald eagle, as he did for *Time* magazine, is the ultimate in hypocrisy.

Butchering the fund is a senseless act. Since open space is disappearing at a horrendous annual rate, many state and local park opportunities will be lost forever. Since the price of land to be acquired for federal units will surely escalate, no money is being saved. Since many endangered species must be rescued now or never, no time is being bought. Even so harsh a critic of Interior's policies as the Heritage Foundation stopped short of recommending that the fund be abolished.

Why, then? Why does Watt support such a looney proposal? Why this from a man who, in his Senate confirmation testimony, touted his stewardship of the fund during his BOR days as evidence of his environmental consciousness? Only two conclusions make sense. One is that he was sandbagged by the Office of Management and Budget as badly as any Cabinet official in recent memory. When they take away your most popular and effective program plus the two or three others that lie at the very heart of your responsibilities, Buddy, you've been had. James Watt either doesn't have the courage or the conviction to effectively disagree with a proposed cut or he lacks the basic knowledge to argue forcibly for important programs that are vital to the Department of the Interior's mission.

Once he sets policy, a President deserves, expects and demands total commitment from his staff; but his aides and Cabinet owe him a choice of a broad range of alternatives from which to set his policy. It is the duty of an effective Cabinet member to present choices and tradeoffs for his President's review, not to parrot what he thinks the President would like to hear.

The other possibility is even more alarming. Watt seems to be saying to conservationists: "You can convince Congress to authorize all the mountain parks and urban NRAs you want, but I'm not going to take care of them." He seems to be saying to Congress: "You thought you knew what you were doing when you established the New River Gorge, the Santa Monica Mountains and the Cuyahoga NRAs a few years ago, but you didn't. I know better."

My suspicion that vindictiveness may be Watt's guiding principle is supported by the man's attitudes toward his opponents. Does he marshall his arguments and try to reason with them? No, he calls them names—"environmental extremists" who would "weaken America." What a bankrupt and infantile approach!

Watt has also accused the National Park Service of grabbing "for more and more lands" and has expressed his scorn for the new urban parks that Congress has established. He wants to turn these areas back to the states—although I have yet to hear of a single governor clamoring to take one over. I must admit to having had some initial reservations about urban parks, but the overwhelming attendance figures have convinced me that these areas are bringing outdoor recreation to millions of people who would otherwise be frozen out of the park system. How does a Secretary of the Interior know the value and the heritage of the national park system if he has no experience except boredom while visiting the nation's historical and natural gems?

And, of course, we do need more money to restore and maintain the parks. You can't protect America's superb natural heritage for nothing—there's no such thing as a free park. Yet the national parks are surprisingly inexpensive: last year the total Park Service operational budget came to a little more than $2 per American. And the Park Service estimates that at least one out of four Americans made at least one recreational visit to a park unit last year.

I submit that the national park system is an incredible bargain and that we can afford to up the ante a little to provide it with protection. But this should be done in addition to meeting the obligations of the Land and Water Conservation Fund, not in lieu of meeting them.

I have great faith in Congress as a whole, in legislators who know and love the land. I think that when the chips are down we'll be able to count on them. I don't believe they will be party to legislation that protects neither the purse nor the land.

Sometimes I wonder whether we can keep it up. The work of the conservationist is never done. We can never rest on our laurels, and sometimes it seems that we can't even stop to enjoy what we're fighting to save. As T. S. Eliot has said, "For us, there is only the trying."

But we must not forget that we have common sense and the will of the people on our side. Despite the widespread general support for the President's economic package, poll after poll shows that Americans want to maintain their quality of life and protect their environment. At the very least, one out of four Americans is a potential ally in this fight, and we've got to get the message out to them. We've got to convince them and the Congress and the President of three things:

The Watt budget is an aberration from the Republican tradition and the true Reagan philosophy;

The Watt budget is self-contradictory and inflationary;

Watt himsef is utterly lacking in the vision and judgment necessary to continue as Secretary of the Interior.

Unless we can make this case convincingly, all our victories over the last 20 years are in jeopardy. Until the administration realizes what is going on in the agency that is supposed to guard and wisely manage our natural resources, we can't relent in our vigilance and outspokenness. Unless a change is made soon, we will witness the tragic decline of that agency and it's personnel into the Department of the Interior.

President T. R. Roosevelt—a Republican with a conservation ethic as broad as the Giant Sequoia—set national goals still pertinent now: "I recognize the right and duty of this generation to develop and use our natural resources but I do not recognize the right to waste them, or to rob, by wasteful use, the generations that come after us."

I am convinced this concept will prevail because I believe that President Reagan is at heart a good man. He is a rancher who knows and cares for the outdoors. I do not believe he wants his presidency to be remembered as the end of the Conservation Era. Most of all, I believe he will listen to the voice of the American people.

FORCED BUSING SHOULD BE ENDED

Mr. HELMS. Mr. President, the June 22, 1981, issue of U.S. News & World Report carried an interview with Dr. Dennis L. Cuddy, a University of North Carolina at Chapel Hill faculty member, on the issue of forced busing. In order to share Professor Cuddy's timely views with Senators, I ask unanimous consent that the interview be printed in the RECORD at the conclusion of my remarks.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

SHOULD FORCED BUSING BE ENDED?

(Interview with Dennis L. Cuddy)

Q. Mr. Cuddy, why do you feel school busing for racial desegregation should be stopped?

A. Because forced busing, as a permanent solution to the problem of how to integrate society, is discretionary against blacks. For example, to achieve integration in a city that is 70 percent white and 30 percent black requires the busing of 70 percent of those of the minority race, but only 30 percent of the white students.

In addition, it becomes more difficult for the minority students who are bused to participate in extracurricular activities before and after school. And their usually poor parents are deterred from attending parent-teacher meetings or their son's or daughter's athletic or cultural events in schools on the other side of town.

Lastly, there's the loss of the neighborhood-school identification, which results in a loss of respect and responsibility for the school's condition and leads to increased vandalism by those of both races.

Q. Proponents of busing say it has lessened discrimination. Wouldn't there be a danger that this trend might be reversed?

A. No. The question assumes that forced busing is the only means of maintaining an integrated society, but that's not true. It is doubtful that those blacks living or working in predominantly white neighborhoods would move to predominantly black neighborhoods simply because forced busing was terminated.

We should continue to have an integrated society and maintain the right of blacks to attend any school of their choice, to go to any public establishment they please and to live wherever they desire.

So, if a certain percentage of black parents do not want the government telling them that they must send their children to schools outside of their neighborhood, the government should not be able to overrule the parents.

Q How would you enforce the right of blacks to attend schools of their choice?

A It should be made legally incumbent on every school system to provide equal educational opportunities in all schools. Then relatively few students would choose to leave their own neighborhood schools.

Q Job opportunities for minorities have increased since busing for integration began. Can't this be attributed at least in part to the better education blacks are receiving?

A Well, forced busing is not the only way blacks can obtain a quality education. As one who attended an integrated school in the South before the Supreme Court's 1954 Brown decision, I can attest to that.

Marva Collins, a Chicago teacher, and the All Saints School in Harlem, among others, have shown that economically deprived minority students can score higher than the national average on tests.

As for job opportunities for blacks, those who strive for educational excellence will be able to obtain employment in almost any major American industry today and have tremendous opportunities for advancement. This is not because American industry has suddenly felt a magnanimous attitude toward minorities, but because executives realize that it is in their own economic self-interest to hire the most qualified person, regardless of race.

Q Another reason busing is said to be ineffective is that it is not required between separately administered city and suburban school districts. Why shouldn't this be tried?

A In countrywide school systems, such busing is already occurring, and I have nothing against the city school system expanding to include the county. My only questions are: What about those black parents who feel their children can be guaranteed an equal educational opportunity in their own neighborhood school? Why would they want their children bused across town every day just to attend a school with a certain percentage of white children?

Q. Since most black spokesmen adamantly insist on school busing, wouldn't an end to busing deepen racial animosities between blacks and whites?

A No, because the original purpose of mandated busing was to guarantee equal educational opportunity for all children, regardless of race. Thus, turmoil will only result if blacks are denied equal opportunity.

And may I suggest that whenever black leaders have appealed to the innate sense of justice and fairness in most white Americans, black Americans have had far greater success in achieving their goals than when they have appealed for something on the basis of race alone, which usually results eventually in a reactionary white backlash, unfortunately.

Q How would you stop busing—by amendment to the Constitution, legislative action by Congress or some other means?

A If it can be shown that equal educational opportunity exists for every child within a school system, then the courts will have no grounds for ordering continued forced busing of blacks and whites against their will.

Q Is there any merit in voluntary programs such as that proposed by the government for St. Louis, which would give college tuition payments to those who participate in busing programs?

A Yes. Voluntary or incentive or options approaches are the best vehicles for achieving integration. Furthermore, you might try magnet schools—where those desiring college-preparatory instruction go to particular schools, those interested in technical education go to other schools, and those in the arts to still other schools.

But if we are not willing to try the incentive or voluntary approaches, then we must ask whether society would next adopt other unacceptable authoritarian programs. I definitely recommend the nonauthoritarian approach to integration as long as all students are guaranteed an equal opportunity to receive a quality education.

WHAT DOES THE HUMAN LIFE BILL REALLY DO?

Mr. HELMS. Mr. President, ever since the Subcommittee on Separation of Powers voted to report S. 158, the human life bill, there have been many commentaries on the significance of this action. Most of these commentaries have been ill-advised and ill-informed. There has been a great deal of emotionalism on this issue, which, I believe, has led some persons to make hasty judgments.

However, the fine newspaper, Human Events, has carried a commentary that is worthy of attention by my colleagues and by all those who wish to know what the human life bill really does. It was written by Prof. Grover Rees III, who is on leave from the University of Texas Law School, and has been serving as counsel on the Subcommittee on Separation of Powers, under the chairmanship of my distinguished and able colleague from North Carolina, Senator JOHN EAST. For that reason, I would recommend this commentary as an incisive and thorough explanation of what the bill readily does.

Mr. President, I ask unanimous consent that the text of the human life bill, as reported by the East subcommittee, be printed in the RECORD, along with Professor Rees' commentary, at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 158

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 42 of the United States Code shall be amended at the end thereof by adding the following new chapter:

"CHAPTER 101

"SECTION 1. (a) The Congress finds that the life of each human being begins at conception.

(b) The Congress further finds that the fourteenth amendment to the Constitution of the United States protects all human beings.

"SEC. 2. Upon the basis of these findings, and in the exercise of the powers of Congress, including its power under section 5 of the fourteenth amendment to the Constitution of the United States, the Congress hereby recognizes that for the purpose of enforcing the obligation of the States under the fourteenth amendment not to deprive persons of life without due process of law, each human life exists from conception, without regard to race, sex, age, health, defect, or condition of dependency, and for this purpose 'person' includes all human beings.

"SEC. 3. Congress further recognizes that each State has a compelling interest, independent of the status of unborn children under the fourteenth amendment, in protecting the lives of those within the State's jurisdiction whom the State rationally regards as human beings.

"SEC. 4. Notwithstanding any other provision of law, no inferior Federal court ordained and established by Congress under article III of the Constitution of the United States shall have jurisdiction to issue any restraining order, temporary or permanent injunction, or declaratory judgment in any case involving or arising from any State law or municipal ordinance that (1) protects the rights of human persons between conception and birth, or (2) prohibits, limits, or regulates (a) the performance of abortions or (b) the provision at public expense of funds, facilities, personnel, or other assistance for the performance of abortions: *Provided,* That nothing in this section shall deprive the Supreme Court of the United States of the authority to render appropriate relief in any case.

"SEC. 5. Any party may appeal to the Supreme Court of the United States from an interlocutory or final judgment, decree, or order of any court of the United States regarding the enforcement of this Act, or of any State law or municipal ordinance that

protects the rights of human beings between conception and birth, or which adjudicates the constitutionality of this Act, or of any such law or ordinance. The Supreme Court shall advance on its docket and expedite the disposition of any such appeal.

"SEC. 6. If any provision of this Act or the application thereof to any person or circumstance is judicially determined to be invalid, the validity of the remainder of the Act and the application of such provision to other persons and circumstances shall not be affected by such determination.".

WHAT DOES THE HUMAN LIFE BILL REALLY DO?

(By Grover Rees III)

On July 9 the Subcommittee on Separation of Powers voted to report favorably to the full Senate Judiciary Committee on S 158, the Human Life Bill.

The bill has had some extravagant publicity. It has been called unconstitutional, a challenge to the authority of the Supreme Court, a "compulsory pregnancy" bill that would expose women who had abortions to prosecution as murderers. Pro-abortionists have held out the prospect of a "pregnancy police" that would lurk under every bed, investigating every miscarriage and confiscating contraceptives.

Press coverage of the hearings on the Human Life Bill emphasized these attacks by opponents and gave short shrift to the patient explanations of Sen. John P. East (R.-N.C.), chairman of the subcommittee, that the bill is actually "a modest approach" to the abortion problem, an effort to persuade the Supreme Court to reverse its 1973 decision in *Roe* v. *Wade*. In *Roe*, the Court struck down all 50 state anti-abortion laws.

The effect of a judicial reversal of *Roe* would be simply to permit the states once again to choose whether to permit or prohibit abortion. This is the primary purpose of the Human Life Bill.

Roe v. *Wade* is regarded by most scholars as one of the Court's most difficult decisions to defend. Coincidentally, questions about the position of Supreme Court nominee Sandra O'Connor on *Roe* v. *Wade* have been the most powerful factor in the controversy over her nomination.

Indeed, the bill could not do any of the things its opponents say it will do, and could not be called "unconstitutional" in any meaningful sense, because the bill itself does not "do" anything at all. It defines no crimes, exacts no penalties. Rather, the Human Life Bill contains certain *findings* which, if the bill is enacted by Congress, could be used by state governments and by private litigants in urging the Supreme Court to change its mind about abortion.

The Human Life Bill simply states that "Congress finds that the life of each human being begins at conception" and further that "the 14th Amendment to the Constitution of the United States protects all human beings."

Based on these findings, the bill "recognizes" that unborn children are "persons" for the purpose of the 14th Amendment provision forbidding "any state" to "deprive any person of life" without "due process of law."

Even if the courts were to adopt this finding of the Human Life Bill as their own, the result would not be an automatic prohibition of abortions. The due process clause of the 14th Amendment does not prohibit persons from killing other persons: It only forbids *states* to take life without due process of law. When one person kills another person, he is ordinarily punished under state homicide laws, not directly under the Constitution itself. Unless the states choose to enact anti-abortion laws or to enforce laws that were on the books prior to *Roe* v. *Wade*, nobody could be prosecuted for having an abortion.

The Human Life Bill explicitly recognizes the constitutional power of the states to enact anti-abortion laws, even if for some reason the unborn are not protected by the 14th Amendment since every state has a "compelling interest" in "protecting the lives of those within the state's jurisdiction whom the state rationally regards as human beings."

For over a hundred years prior to *Roe*, the states had been enacting and enforcing anti-abortion laws that implicitly or expressly recognized the "personhood" of the unborn child. Since most of these laws were enacted contemporaneously with the ratification of the 14th Amendment they tend to support the view that the framers of the amendment would themselves have considered unborn children entitled to the amendment's protection. There is even stronger evidence that the 14th Amendment was never intended to create a constitutional right to kill unborn children.

The "states' rights" aspect of the Human Life Bill demolishes the parade of horribles conjured up by pro-abortionists. If certain birth-control measures such as intra-uterine devices (IUDs) actually are abortifacients that kill an embryonic human being rather than contraceptives that prevent such a being from ever existing, then states would be free to prohibit them if the courts should adopt the findings of the Human Life Bill. But no state would be forced to prohibit IUD's, any more than a state is now forced under the due process clause of the 14th Amendment to punish every killing of an adult human being.

Similarly, the states could fashion their own policies on the so-called "hard cases," such as abortion in the case of rape. Before 1973 every state regarded unborn children as persons, and yet some states permitted abortion in such "hard cases." No state, however, punished abortion as "murder," which is only one of many types of homicide.

The constitutional theory behind the Human Life Bill, however, prevents it from being a pure "states' rights" measure. Since any state that *compels* or *funds* an abortion amounts to a state depriving a person of life, the state would have to show that the deprivation was not "without due process"—i.e., that there was some compelling reason for the abortion, such as to save the life of the mother.

Some pro-life advocates have objected to the Human Life Bill on the ground that it does not go far enough. Most supporters of the bill tend to agree: The Human Life Bill is no substitute for a constitutional amendment. We will never have absolute, Court-proof protection of every human being from the moment of protection until Congress proposes a Human Life Amendment and 38 states ratify the amendment.

But most observers agree that there are currently not the required two-thirds majorities in each house of Congress to propose a Human Life Amendment. Indeed, when the pro-abortion side gets through talking about rape, incest, genetic deformity, and IUDs—issues that must be resolved in any effort to provide direct federal protection for the unborn—it is unlikely that an amendment without exceptions would muster a simple majority vote in the Senate.

The Human Life Bill can be passed with a simple majority vote, it would not require ratification by the states, and if it were passed today it would allow the states to begin protecting the unborn tomorrow. The pro-life movement would be credited with a major national victory, and would of course be free to redouble its efforts for the election of pro-life legislators who would support a Human Life Amendment.

The most significant drawback of the Human Life Bill is that it requires the cooperation of the Supreme Court in order to have any effects.

Stephen Galebach, the Washington lawyer and former *Harvard Law Review* editor who drafted the bill, has suggested that the Court should defer to the congressional finding that life begins at conception, under the Court's own holding in *Katzenbach* v. *Morgan* that there are some complex questions of fact and law that Congress is better equipped than the Court to resolve. Even without the *Katzenbach* doctrine—a doctrine that many conservatives reject—I believe there is a chance the Court will reconsider its holding in *Roe* v. *Wade* and find that it was wrong on the merits.

Roe is considered one of the worst Supreme Court rulings of the 20th Century, even by constitutional scholars who personally favor abortion. The Human Life Bill would be a powerful brief by Congress on behalf of the unborn.

A constitutional amendment strategy would not require the acquiescence of the Supreme Court, and once it was adopted an amendment could not be reversed by a simple majority in a future Congress. Therefore, Sen. East and the Subcommittee on Separation of Powers have urged the full Judiciary Committee not to act on the Human Life Bill until the Subcommittee on the Constitution, chaired by Sen. Orrin Hatch (R.-Utah), has had time to report on a Human Life Amendment.

Hearings on the amendment will probably be held early this fall. If it appears that an amendment can garner two-thirds majorities in the House and the Senate, then the Judiciary Committee might report an amendment to the full Senate. If not, the committee can report the Human Life Bill, whose passage would be an important step toward the end of the national nightmare that began in 1973.

THE EFFECT OF HIGH-INTEREST RATES UPON THE STUDENT LOAN PROGRAM

Mr. BOREN. Mr. President, I rise again today to resume my continuing discussion of the crippling effects of high-interest rates as I have for the past several weeks, and as I will continue to do until something in done. I have already described the various effects of high interest rates upon small businesses, the housing industry, and savings and loan institutions. Today, I will discuss the adverse effects of high interest rates upon federally subsidized low-interest student loans.

Currently, the guaranteed student loan program provides a Federal guarantee for the repayment of loans borrowed from eligible lending institutions. The rate of interest charged to the student under this program, recently raised to 9 percent per year, depends upon the money market interest rate. With the recent surge in interest rates, the rates on these special low-interest loans had to be raised as well. Unfortunately, this means that students seeking low-interest loans are forced to pay more money.

In addition, these programs are suffering from a relatively high rate of default, about 16 percent, and that number is expected to rise as interest rates go up. As a consequence of this, loan institutions will be forced to ration their credit. Fewer students will be able to obtain loans necessary to the completion of their postsecondary education because of the growing lack of confidence in students' ability to pay back their loans.

Furthermore, because of high interest rates, the Federal Government must pay a greater amount of money in order to make up the difference between the interest charged to students and the money market rate. Guaranteed student loan volume and the corresponding cost of Federal interest payments and special allowances have increased greatly in the past several years. According to Education Department statistics, guaranteed student loan volume was $1.96 billion in fiscal year 1978, $2.28 billion in fiscal year 1979, and increased to $4.8 billion by fiscal year 1980. Federal interest subsidies have grown from $249 million in fiscal year 1978 to $445 million in fiscal year 1980. Similarly, the special allowances paid to guaranteed student loan lending agencies have risen from $195 million in fiscal year 1978 to $820 million in fiscal year 1980. In view of the recently proposed budget cuts, we are all aware that there will be less and less money available for such purposes in the future.

This poses a dilemma because as less money becomes available, the Government is faced with the option of either increasing the rate of interest charged to the student, as was recently done under the Education Amendments of 1980, or raising the level of funding for the student loan program. Worse yet, the Government may simply reduce the number of students eligible for loans. Under such a policy, students who may be truly in need of a low-interest loan will no longer be able to obtain one.

Mr. President, I assert that something must be done about high interest rates, and it must be done soon. We must preserve this Nation's high standard of academic excellence, but this cannot be done if today's students cannot afford to go to school. High interest rates have a devastating effect upon the country's system of education, and as a result, the entire country will suffer.

Again, I ask my colleagues to join me in urging the President and the administration to devise an immediate short-range plan to combat the serious problems created by high interest rates.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:58 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 191. Joint resolution designating August 8, 1982, as "National Children's Day".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1640. A communication from the Acting Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a listing of contract award dates for the period July 15 to October 15, 1981; to the Committee on Armed Services.

EC–1641. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on a study with respect to converting the laundry activity at Fort Bragg, N.C., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1642. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report with respect to converting the data entry/keypunch function at the Navy Regional Finance Center, Washington, D.C., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1643. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report with respect to converting the custodial services function at the Fleet Training Center, Mayport, Fla., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1644. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report with respect to converting the Guard services function at the Aviation Supply Office, Philadelphia, Pa., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1645. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Bank Secrecy Act Reporting Requirements Have Not Yet Met Expectations, Suggesting Need for Amendment"; to the Committee on Banking, Housing, and Urban Affairs.

EC–1646. A communication from the Secretary of Energy, transmitting, pursuant to law, the national energy policy plan; to the Committee on Energy and Natural Resources.

EC–1647. A communication from the Acting Under Secretary of Energy, transmitting, pursuant to law, notice of progress made on development of a comprehensive program management plan; to the Committee on Energy and Natural Resources.

EC–1648. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Head Start: An Effective Program but the Fund Distribution Formula Needs Revision and Management Controls Need Improvement"; to the Committee on Governmental Affairs.

EC–1649. A communication from the Assistant Secretary of Housing and Urban Development (Administration), transmitting, pursuant to law, a report on a new Privacy Act system of records for the Department of Housing and Urban Development; to the Committee on Governmental Affairs.

EC–1650. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1651. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1652. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1653. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1654. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1655. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1656. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 30, 1981; to the Committee on Governmental Affairs.

EC–1657. A communication from the Assistant Secretary for Health, Department of Health and Human Services, transmitting, pursuant to law, a report on a new Privacy Act system of records for the Department; to the Committee on Governmental Affairs.

EC–1658. A communication from the Assistant Attorney General for Administration, Department of Justice, transmitting, pursuant to law, a report on a new Privacy Act system of records for the Department; to the Committee on Governmental Affairs.

EC–1659. A communication from the Assistant Attorney General for Administration, Department of Justice, transmitting, pursuant to law, a report on a new Privacy Act system of records for the Department; to the Committee on Governmental Affairs.

EC–1660. A communication from the Director of the Community Relations Service, Department of Justice, transmitting, pursuant to law, the annual report of the activities of the Community Relations Service for fiscal year 1980; to the Committee on the Judiciary.

EC–1661. A communication from the Acting Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting temporary admission of certain aliens under section 212(d)(3) of the Immigration and Nationality Act; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–336. A resolution adopted by the City Council of Atascadero, Calif., urging the repeal of section 301 of the Powerplant and Industrial Fuel Use Act; to the Committee on Energy and Natural Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BAKER (for Mr. MATHIAS), from the Committee on Rules and Administration, without amendment:

S. Res. 180. Resolution increasing the limitations on expenditures by the Committee on Banking, Housing, and Urban Affairs for the training of professional staff; and

S. Res. 189. Resolution authorizing expenditures by the Committee on Commerce, Science, and Transportation for the training of professional staff.

EXPLANATION OF SENATE RESOLUTION 180 AND SENATE RESOLUTION 189

● Mr. MATHIAS. Mr. President, earlier today I reported on behalf of the Rules Committee Senate Resolution 180 and Senate Resolution 189. I would like to put a brief explanation of each resolution in the RECORD at this point.

SENATE RESOLUTION 180

Senate Resolution 180, by Mr. GARN, would increase the limitation on expenditures by the Committee on Banking, Housing, and Urban Affairs for the training of professional staff. This resolution would increase by $5,100—from $1,000 to $6,100—the portion of its presently authorized funds (S. Res. 75, 97th Cong., agreed to Mar. 3, 1981) the Committee on Banking, Housing, and Urban Affairs could use for the training of its professional staff. No increase in the committee's total authorization would result from this action. The increase in the amount allocated for the training of committee professional staff is necessary in order to cover the cost of training expenses of Mr. M. Danny Wall, staff director of the committee, in Harvard University's program for senior managers in Government for the period July 26 through August 14, 1981.

SENATE RESOLUTION 189

Senate Resolution 189, by Mr. PACKWOOD, would authorize expenditures by the Committee on Commerce, Science, and Transportation for the training of professional staff. This resolution would authorize the committee to spend not to exceed $7,000 of its presently authorized funds (S. Res. 52, 97th Cong., agreed to Mar. 3, 1981) for the training of its professional staff. This action would not increase the committee's total 1981 authorization. The funds authorized for the training of professional staff would be used as training expenses for Ms. Anne M. Gavaghan, Commerce Committee staff director, in the Harvard University's program for senior managers in Government from July 26 to August 14, 1981.●

EXECUTIVE REPORTS OF COMMITTEE

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Nancy Harvey Steorts, of Maryland, to be a Member of the Consumer Product Safety Commission for the remainder of the term expiring October 26, 1984; and

Nancy Harvey Steorts, of Maryland, to be Chairman of the Consumer Product Safety Commission.

(The above nominations reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PACKWOOD. Mr. President, I also report favorably a nomination list in the National Oceanic and Atmospheric Administration which appeared in the CONGRESSIONAL RECORD in full on July 8, 1981, and, to save the expense of reprinting it on the Executive Calendar, I ask unanimous consent that the list lay on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Anthony G. Sousa, of Hawaii, to be a Member of the Federal Energy Regulatory Commission for a term expiring October 20, 1984;

J. Robinson West, of Pensylvania, to be an Assistant Secretary of the Interior;

Jan W. Mares, of Conecticut, to be an Assistant Secretary of Energy (Fossil Energy); and

Alvin W. Trivelpiece, of California, to be Director of the Office of Energy Research.

(The above nominations reported from the Committee on Energy and Natural Resources with the recommendation that they be confirmed, subject to the nominees commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on Armed Services:

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Maj. Gen. Hugh J. Clausen, U.S. Army, for appointment as the Judge Advocate General, U.S. Army, and Brig. Gen. Hugh R. Overholt, U.S. Army, for appointment as the Assistant Judge Advocate General, as major general, Judge Advocate General's Corps, in the Regular Army of the United States, and as major general, U.S. Army. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, in addition, in the Navy and Naval Reserve there are 78 temporary/permanent appointments to the grade of captain and below (list begins with Phillip T. Angelini). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanmious consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of July 15, 1981, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MATSUNAGA:

S. 1517. A bill to amend the Internal Revenue Code of 1954, to permit public utility property which otherwise qualifies as solar, wind, geothermal, or ocean thermal energy property to be treated as such for purposes of the energy investment credit; to the Committee on Finance.

By Mr. EXON:

S. 1518. A bill for the relief of Shy, Shy-Yo (David); to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATSUNAGA:

S. 1517. A bill to amend the Internal Revenue Code of 1954 to permit public utility property which otherwise qualifies as solar, wind, geothermal, or ocean thermal energy property to be treated as such for purposes of the energy investment credit; to the Committee on Finance.

ENERGY TAX CREDITS TO PUBLIC UTILITIES

Mr. MATSUNAGA. Mr. President, I am today introducing a bill to extend energy tax credits to public utility companies.

Mr. President, we expect the Nation's public utility companies to provide us with an uninterrupted flow of power and at a reasonable cost. The ability of these companies to meet public needs is now being strained by both economic and energy price instability.

As we all know, the price of oil since the early 1970's has increased by 1,600 percent. A recent Rand Corp. study questions the development potential of conventional energy resources in the United States. Who can project with any certainty what the price of oil will be 5 years from now, or even a year from now?

As for nuclear power, in the 6 years following 1973, nuclear projections for the the year 2000 fell by a factor of five for the world and eight for the United States. Delays and construction costs for nuclear plants being built and maintenance costs for those on-line have exceeded all expectations.

As for coal, the much-publicized acid rain and carbon dioxide dangers and potential interruptions in coal supply from frequent labor-management disputes cast doubt on coal's reliability. In addition expanded coal use will strain railroad capacity, creating shortages and rising prices. Other difficulties are attendant. For example, public objection to coal storage piles trouble Pacific Gas & Electric and Boston Edison planners. San Diego Power & Light projects a need of several hundred coal cars a day if it converts to coal, prompting a company spokesman to wonder, "which communities are going to take that kind of traffic?"

By the same token, although in a more promising context, substantial questions surround the use of renewable energy in its different forms in the future. Here, the chief problem is cost—whether renewables can become cost-competitive with conventional fuels—rather than an environmental or resource scarcity problem. In this situation the country's public utilities must assess future needs and satisfy public demand at the lowest economic cost.

To encourage alternative energy devel-

opment, the 1980 Windfall Profit Tax Act established an increased energy tax credit for solar, wind, geothermal, and oceanthermal energy equipment. But this credit was expressly denied to public utilities. It was argued that public utility companies were under regulatory constraints to utilize the cheapest available power and needed no incentive for alternative power generation.

This argument has proven to be simplistic. Investment in novel forms of electric generation is extremely risky for utilities, especially without tax incentives. Most utility companies have ignored alternative energy. Without the tax incentives, the utilities have little reason to invest in alternative energy development.

The few utility companies which have shown interest are blocked by the tax prohibition. The current prohibition has forced these utilities to turn to intermediaries. Partnership entities have been created by private investors to build wind or geothermal facilities to sell power to electric utilities. The partnerships are able to claim the energy tax credit not available to utilities. This device circumvents the restriction on public utility property. However, it also adds to the cost of power since the partnership profit must be covered by utility users.

Utilities must evaluate new technologies cautiously, and I can subscribe to the proposition that the primary responsibility of a power grid is not to serve as a laboratory for experiments in new energy technology. However, a few developmental projects can serve a useful purpose in proving the cost feasibility of alternative energy electrical generation.

The current restriction has discouraged utilities from exploring and developing alternative energy sources. I believe that restriction should be removed.

My bill would extend the Windfall Profit Tax Act business energy credits to public utilities. This would allow a 15-percent energy credit for solar, wind, geothermal and oceanthermal property purchased through 1985.

The proposed legislation would encourage the Nation's public utility companies to play an active role in insuring the security of America's energy future.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1517

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (17) of section 48 (1) of the Internal Revenue Code of 1954 (relating to the exclusion of public utility property) is amended—

(1) by striking out "'solar or wind energy property'.", and

(2) by adding at the end thereof the following new sentence: "For purposes of the preceding sentence, the term 'alternative energy property' shall not include property described in clause (viii) or (ix) of paragraph (3) (A).".

(b) The amendments made by this Act shall apply to taxable years beginning after December 31, 1980, under rules similar to the rules under section 48(m) of such Code.

ADDITIONAL COSPONSORS

S. 234

At the request of Mr. HATCH, the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 234; a bill to amend the Public Health Service Act to encourage the establishment of home health programs and to amend the Social Security Act to provide expanded coverage of home health services under the medicare and medicaid programs.

S. 1120

At the request of Mr. KASTEN, the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 1120, a bill to reduce the amount of funds available to an agency unless the agency has reduced waste, fraud, and abuse to the maximum extent feasible or demonstrates that no waste, fraud, or abuse exists in the administration of programs, and for other purposes.

S. 1162

At the request of Mr. LONG, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 1162, a bill to amend the Internal Revenue Code of 1954 to increase the allowable contributions to employee stock ownership plans, to provide a credit against tax for contributions to an employee stock ownership plan based upon payroll as an alternative to that based on investment in equipment, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1277

At the request of Mr. HATCH, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1277, a bill to restrict the authority of the Secretary of Health, Education and Welfare with respect to the regulation of vitamin and mineral products for over-the-counter use.

S. 1278

At the request of Mr. HATCH, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1278, a bill entitled the "Saccharin Study and Labeling Act amendment of 1981."

S. 1348

At the request of Mr. SASSER, the Senator from Wyoming (Mr. SIMPSON) and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1448

At the request of Mr. MATHIAS, the Senator from North Dakota (Mr. BURDICK), the Senator from Georgia (Mr. MATTINGLY), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 1448, a bill to provide for the issuance of a postage stamp to commemorate the 70th anniversary of the founding of the Girl Scouts of the United States of America.

SENATE JOINT RESOLUTION 62

At the request of Mr. DOLE, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Senate Joint Resolution 62, a joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981 as "National Cystic Fibrosis Week."

SENATE JOINT RESOLUTION 76

At the request of Mr. RANDOLPH, the Senator from Missouri (Mr. EAGLETON), the Senator from Ohio (Mr. GLENN), the Senator from Vermont (Mr. LEAHY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Maine (Mr. MITCHELL), the Senator from Rhode Island (Mr. PELL), the Senator from Michigan (Mr. RIEGLE), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of Senate Joint Resolution 76, a joint resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

SENATE JOINT RESOLUTION 84

At the request of Mr. DECONCINI, the Senator from Maryland (Mr. MATHIAS) and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of Senate Joint Resolution 84, a joint resolution to proclaim March 19, 1982, as "National Energy Education Day."

SENATE JOINT RESOLUTION 85

At the request of Mr. HATCH, the Senator from South Carolina (Mr. HOLLINGS), the Senator from Alabama (Mr. DENTON), the Senator from Nebraska (Mr. EXON), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of Senate Joint Resolution 85, a joint resolution to designate June 30, 1981, as "National Drug Standards Day."

SENATE RESOLUTION 65

At the request of Mr. DURENBERGER, the Senator from Kentucky (Mr. FORD) and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of Senate Resolution 65, a resolution to promote alternative nonanimal testing procedures.

UP AMENDMENT NO. 264

At the request of Mr. BRADLEY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of UP amendment No. 264 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

AMENDMENTS SUBMITTED FOR PRINTING

ECONOMIC RECOVERY TAX ACT OF 1981

AMENDMENT NO. 521

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY (for himself, Mr. RUDMAN, and Mr. PELL) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 522

(Ordered to be printed and to lie on the table.)

Mr. EXON (for himself, Mr. BRADLEY, Mr. PRESSLER, Mr. NUNN, and Mr. DIXON) submitted an amendment intended to be proposed by them to the joint resolution House Joint Resolution 266, supra.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Monday, July 27, to hold hearings on S. 678, a bill dealing with ZIP code legislation, and S. 1080, a bill dealing with regulatory reform.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate to hold the tentatively scheduled confirmation hearings on the nomination of Sandra Day O'Connor to be a Supreme Court Justice on September 9–11 or at a time later designated, and that the committee also be authorized to meet in executive session on September 15.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

GOOD SCHOOLS, NOT FORCED BUSING

● Mr. EAST. Mr. President, our distinguished former colleague, Sam Ervin, Jr., has once again hit the nail on the head. Mr. Ervin's well-deserved reputation as a constitutional scholar and defender of constitutional liberties makes his views on mandatory schoolbusing especially worthy of our serious consideration. One generation of unrestrained abuse of judicial power is enough. Let us get on with the job of educating our children. Mr. President, I ask that Mr. Ervin's article in the July 23, 1981 Charlotte Observer be printed in the RECORD.

The article follows:

GOOD SCHOOLS, NOT FORCED BUSING

(By Sam Ervin Jr.)

The Supreme Court asserts that the forced busing of school children for integration purposes is justified, even actually required, by the equal protection clause of the Fourteenth Amendment. This assertion is, in reality, undeniably proof of Lord Acton's aphorism: "Power corrupts, absolute power corrupts absolutely."

The allegation's falsity is proved by multitudes of other Supreme Court decisions which apply the equal protection clause correctly.

The Fourteenth Amendment became part of the Constitution on July 21, 1868. When it is interpreted and applied a right, its equal protection clause is one of the simplest and most salutary of the provisions of the Constitution. The clause specifies that no state "shall deny to any person within its jurisdiction the equal protection of the laws."

By this phrase the equal protection clause requires the laws of the state to treat all persons within is jurisdiction alike under like circumstances, both in the rights conferred and the responsibilities imposed. The clause applies only to states and state officials acting under state law. It does not apply in any way to private individuals, or confer to the federal government any power to control their conduct.

Since all federal officers, including Supreme Court justices, are bound by oath or affirmation to support the Constitution, no court, department or agency of the federal government has any power to require a state or any state officer acting in its behalf to violate the equal protection clause. The Supreme Court has expressly ruled that Congress cannot do so.

Instead of either requiring or justifying the forced busing of school children for integration purposes, the equal protection clause actually forbids the federal judiciary to take such action.

When it enters a forced busing decree, the federal district court initially commands the school board to divide the students in a district or attendance zone into two groups; to permit students of the first group to attend their neighborhood school in one district or zone; and to deny students in the second group admission to such neighborhood schools.

The most sophisticated sophistry cannot wash out the plain truth that the second command of the decree requires the school to deny students in the second group admission to their neighborhood schools solely on account of their race, and that is exactly what the Supreme Court ruled in the Brown Case, the school desegregation decision, is a violation of the equal protection clause.

While judges responsible for forced busing decrees are snug in their beds, parents of the students to whom the decrees apply are compelled to arise from their beds, and to arouse their children from their slumbers, prepare and serve them breakfast, and send them outdoors, no matter how inclement the weather might be, to await the arrival of the buses.

The students, often small tots, are compelled to take round trips, often long and wearisome, each school day between their homes and often distant schools. All this is done to mix students in racial proportions the federal judiciary deems desirable.

Such unrestrained exercise of judicial power, I submit, has no rightful place in an America which boasts in its national anthem that it is the land of the free, unless it is indispensable to the nation's well-being. No such case can be made for forced busing of students for integration purposes.

Advocates of forced busing exhibit no concern for the plight of white children who are transferred from superior schools in white communities to inferior schools in black communities. They are indifferent to the inescapable conclusion that on the basis of their own premise this forced busing denies these children equal educational opportunities.

The only intelligent remedy for past deficiencies in education is remedial education; and the only intelligent way to secure equal educational opportunities for all children, black and white, is to establish adequate schools in all areas.

Substituting forced busing for intelligent solutions of educational problems calls to mind the remark of Pope Julius III to the Portuguese monk: "Learn with how little wisdom the earth is governed." ●

NUCLEAR NONPROLIFERATION

● Mr. PRESSLER. Mr. President, in the course of reviewing my comments during consideration of Senate Resolution 179, nuclear nonproliferation, on last Friday, I noted that I failed to give recognition to two distinguished Senators for their enormous contributions to arms control efforts. Few other men have given so much of their time and energy to this cause as Senator PERCY and Senator PELL. I had these remarks prepared on the day we adopted the nuclear resolution, but I failed to mention it on that day so I shall do so now.

As chairman of the Foreign Relations Committee, Senator PERCY has provided strong leadership, shown admirable dedication to duty, and taken the initiative in pressing for a potent arms control policy. He has made clear to many administration witnesses that the committee is deadly serious about insisting that arms control be an integral part of our national security and defense policy. I personally believe that his brilliant handling of the nomination of Dr. Eugene Rostow will lead to a greatly accelerated agenda for Salt and TNF talks. He has repeatedly taken every opportunity to stress the absolute necessity of taking concrete steps to check the perils of nuclear nonproliferataion, which daily take on new dimensions as one of the crucial problems facing statesmen today. Along with Senator GLENN, Senator PERCY cosponsored the heart and basis of our nuclear nonproliferation policy—the Nonproliferation Act of 1978.

Senator PELL, who was chairman of the Arms Control Subcommittee for a long time, has similarly unselfishly devoted his time and efforts to arms control and related issues that give the strongest hope yet for world peace. Like Senator PERCY, Mr. PELL is a constant attendee and active participant at all hearings and briefings concerning arms control issues, whether they concern treaties, potential treaties, or negotiations that may, we hope, one day lead to international agreements that will lessen the threat of war. Senator PELL's contributions to the law-of-the-sea negotiations have been of great importance, and experts in the field have frequently praised him for his grasp of the difficult issues involved. He has added immeasurably to the value of numerous nomination and other hearings by the acuteness and salience of his questions.

The Foreign Relations Committee in particular and the Senate in general are fortunate indeed to have Senator PERCY as committee chairman and Senator PELL as ranking minority member at a very critical time. Not the least of their accomplishments, I might add, is their fairness and gentlemanly, but forceful, role during hearings and briefings. They both have, and will continue to have, a dominant role in shaping arms control policies and monitoring the execution of those policies on behalf of the United States. ●

CHICAGO SUN-TIMES SERIES ON DEFENSE

● Mr. NUNN. Mr. President. the Chicago Sun-Times recently published a series of editorials entitled "U.S. Defense: The Big Buildup." Although I do not necessarily agree with all of the conclusions reached by the authors, I commend the editors of the Sun-Times for publicly addressing many of the most important questions now facing the Naton in the national security area. By devoting the majority of the editorial page for nearly a week to this series, the editors have made a significant contribution to the

national dialog that is necessary if we are to sustain a bipartisan consensus on our critical defense requirements.

The editors correctly point out the need to examine these security requirements and determine overall strategy to insure that the expanded defense budget will produce a more effective military that is capable of fulfilling its assigned missions. The American people have a right to demand that the increased defense dollars are expended efficiently and effectively. This series contributes to that goal.

Mr. President, I note with pleasure that the name of Senator GARY HART, my distinguished colleague on the Armed Services Committee, is mentioned prominently throughout the articles. Senator HART'S comments on the defense budget and naval strategy are particularly worthy to note. In recent years, Senator HART has brought fresh ideas to the defense debate and has called our attention to numerous areas of defense planning and policy that need rethinking. I am pleased that the editors of the Sun-Times recognized his substantial contributions in the national security area.

I ask that the Sun-Times articles be printed in the RECORD.

The articles follow:

[From the Sun-Times, June 21, 1981]

A STRONGER DEFENSE

The American people are moving along toward the costliest buildup of their military forces in peacetime history.

Congress is approving, with all but inaudible opposition, a 1982 defense bill of $136.5 billion, up 28 percent after inflation. And this is just the first installment on the administration's plan to spend $1.5 trillion on defense through 1986. On an annual basis, that's a jump of 70 percent after inflation.

There is a broad national consensus for such massive spending, in spite of the enduring burdens of inflation, recession, high taxation. The people have had, apparently, their fill of humiliation at the hands of the Vietcong, ayatollahs, OPEC sheiks and Kremlin hierarchs. And they are determined to build military muscle so they can feel secure again.

There is assuredly a need for muscle building. The Soviets are projecting their power well beyond their borders—into Afghanistan, at the approaches of the Persian Gulf, in Southeast Asia, Africa and the Caribbean.

And they have what it takes to do so after lavishing—for three decades—precious resources on history's greatest military buildup.

From a zero base, they have achieved nuclear equivalence with the United States and, by some accounts, will soon imperil our silo-based retaliatory missiles. Their army is more than twice as large as ours. They have 50,000 tanks, we 10,000. Their navy, much enlarged, now moves freely in distant seas.

They are not, to be sure, 10 feet tall. Nor are we, thanks to superior technology, only 4 feet tall. Our allies, furthermore, are stronger than theirs, and far more trustworthy.

But the numerical disparities between us in specific areas and our new responsibility to defend interests beyond Europe and the Pacific—notably at the oil wells of the Persian Gulf—make it essential that we attend to our weapons and the people who man them.

When Harold Brown left office as President Carter's defense secretary, he was pleased about "the long-overdue consensus for increasing our nation's military strength" and President Reagan's determination to sharply raise spending on it. But he also warned that big defense budgets do not automatically translate into greater military power.

This the Reaganites have not thus far heeded Brown's successor, Caspar W. Weinberger, a good administrator with no experience in military matters, in short weeks produced the huge new budgetary numbers. The primary question asked in compiling them was not "What do we need?" but "How much should we spend?" And what the numbers add up to, mostly, is more of the same.

In "The Defense of the United States," the fine series CBS-TV aired last week, a persistent question arose: "Will throwing money at our problem solve it?" The answer is no.

A Senate military expert, Gary Hart (D-Colo.), calls the current defense bill "dangerous" because its programs are unrelated to "what history suggests is important for an effective military. . . . The bill provides more of the same ships, planes and tanks we have been . . . buying for decades. With its emphasis on $3.5 billion aircraft carriers, $650 million submarines, $40 million fighter planes and $2.5 million tanks, [it] makes it unlikely we can have the numbers we need."

Numbers are one need. So is what Sen. Hart calls usability of materiel—"the ability to function in bad weather . . . in the hands of real soldiers, without much maintenance." We need simpler, more mobile equipment to respond quickly to unforseen threats.

On a higher level, we need sharper assessments of Soviet strengths and weaknesses so we don't keep spending on the wrong things.

But for this essential wisdom Americans are called upon to trust a military-industrial-congressional complex that has repeatedly and shamelessly squandered their resources.

Past spending, though less than the future's, was hardly puny. Yet much of it went for "wrong things," resulting in a technologically brilliant but often inoperative force that, while it might respond appropriately to a challenge in Europe, left us all but naked to Soviet expansionism and radical nationalism on the Persian Gulf. Items:

The new M-1 tanks are so huge that only one at a time can be airlifted by the biggest U.S. transport, the C-5A.

The Air Force's new MX missile was designed just a bit too big to fit in the Navy's new Trident submarine's missile tubes, requiring costly alternative deployment, as in the Utah-Nevada "race tracks."

A new armored personnel carrier, the infantry's key vehicle, doesn't fit in the ramp opening of our assault transport planes.

The Army—because of the priority given to high technology—can't afford to properly train its troops. It has a third of the ammunition it needs for war. Six of 10 combat divisions are "not combat ready."

A third of two-thirds of our complex tactical aircraft are grounded at any given time for maintenance and to await—for as much as nine months—replacement parts, of which the Air Force lacks $2.1 billion worth.

The Navy lacks 20,000 petty officers and more of other personnel, so that warships often languish in port, unready to fight.

Clearly, throwing money at problems does not necessarily solve them. What is required for an adequate national defense is not simply "more," but prudent, well-reasoned answers to the questions "what?" and "why?"

William Kaufmann of the Massachusetts Institute of Technology shows in a new study that we can close the gap on the Soviets with just small increases in force strengths.

But this can be done only if most of the money available is spent on force readiness, which includes adequate and well-trained regular and reserve manpower, simpler weaponry to arm them and improved ability to transport them quickly and on short notice.

That's where President Reagan, the Pentagon and Congress ought to be headed. They have not yet shown that they are.

[From the Sun-Times, June 22, 1981]

SOVIETS OVERRATED—AND PENTAGON OVERREACTS

Lavish as the administration's defense budgets are projected to be, prudent choices will have to be made on how our precious dollars are spent. No realistic budget could ever accommodate the wish lists of generals and admirals and their civilian managers.

But prudent choices depend on wise assessment of what the Soviets are up to, and here the U.S. intelligence community historically has made flagrant errors that promoted wasteful U.S. responses. Rep. Les Aspin (D-Wis.), one of the wiser heads of the House Armed Services Committee, confirms the point in his Personal View on the opposite page.

Other warped assessments pervert perceptions of Soviet strength, and thus they pervert the Washington reactions based on them.

Most notorious are the CIA "studies" of Soviet defense spending, showing that Moscow's military budgets are far larger than ours. Truth is bent (probably by design to justify support for higher American budgets), and how it's done is shown by one example:

To arrive at the cost of the 4.5-million-man Soviet army, the CIA assigns the pay scales of U.S. military *volunteers* to the *conscripted* Soviet soldiers. Then it adds the American overhead of more than $10,000 per volunteer. When Uncle Sam gives our GIs a raise, the CIA gives an equivalent "raise" to Soviet soldiers and kites its totals that much more.

The CIA's statistical humbug has been credibly analyzed and realistically revised by Franklin D. Holtzman, a Tufts economist and a fellow at Harvard's Russian Research Center. His understated conclusion: "The corrected figures indicate that the Soviet Union has not been outspending the United States."

The Pentagon also habitually makes U.S.-Soviet comparisons without including their respective NATO and Warsaw Pact allies. When you add them in, even using the CIA's cockeyed Soviet budget figures, the perspective (see the accompanying table) tends to ease the alarm over our "weakness."

Take into account also the character of our allies compared with the Soviet's, Poland for one. The U.S.S.R. has been described properly as the only major power surrounded by enemies—almost all of them communist.

Go on, if you will. Add the China factor, including 4.4 million troops. The Chinese are not, to be sure, our allies, but they certainly are not the Soviet Union's friends.

And none of this takes into account the quality of weaponry. Returning to Holtzman:

"It is paradoxical to read in the Joint [congressional] Economic Committee hearings for various years that, according to the C.I.A. the Soviet Union has been regularly producing and deploying more military equipment than we have, and has almost twice as much military; yet the predominant opinion of participants is that the United States is still the stronger power.

"The resolution of this paradox is not hard to find. Clearly the basis for this view is the superior quality and technology of U.S. equipment. Unfortunately this crucially im-

portant factor is not captured in CIA estimates."

The matter of accurate, prudent assessment of Soviet strengths and what we should do to counter them bears heavily on crucial decisions the Reagan administration is to make soon, perhaps starting as early as next week.

These include two very costly projects—the MX missile and how it is to be deployed and construction of a manned bomber (or two bombers) to replace the venerable B–52.

The MX is the $40 billion-minimum nuke launcher with which the Pentagon proposed to scar up much of Utah and Nevada in a race-track configuration. That deployment is so monstrous that it may no longer be in the cards. But others are.

The real question is not how, but whether it should be deployed. And the answer revolves around the validity of the two canons of Pentagon theology invoked to justify it—'the window of vulnerability" and Soviet "first-strike capability."

The thesis is that in the mid-80s, before the MX can be deployed (that's the "window" in time), Soviet intercontinental nukes will be so accurate that they will be able to destroy our land-based Minutemen—and many of our submarine missiles—in a "first strike" without risking destruction of their own society.

But is a window really opening? In the 1970s we deployed 5,250 intercontinental nuclear warheads (present total 10,000), they deployed 4,341 (total 6,000). Ours are more accurate and in more hardened silos. Three-fourths of theirs are fixed in place on land. Most of ours are moving targets at sea or in the air.

The vulnerability idea is based on questionable assumptions—untested in war—about the accuracy of Soviet missiles. Excellent evidence indicates that from 100 to 300 of our silo-based missiles would survive, as would hundreds in undersea and air deployments.

Are the Russians mad enough to gamble 10 million, or 100 million, of their own on a theoretical first-strike capability? Are we?

On procurement of the new manned bomber: President Carter shelved the B–1 on the sound ground that the B–52 would be good enough (well into the 1990s, some experts say) to launch the new, cheaper, highly accurate cruise missiles without having to penetrate Soviet air defenses.

Now it's said that Defense Secretary Caspar Weinberger is leaning toward not one but two new manned, penetrating bombers—the advanced technology Stealth bomber for the '90s and later, and an updated version of the B–1 to tide us over until then. Do we really need and can we really afford the B–1?

We don't know the answers to all the questions. We do know that the Reagan administration is too new to be making fast-draw decisions . . . based on questionable assessments . . . pumped out by an incestuous military-industrial complex . . . for approval of vote-hungry congressmen eager to provide jobs in their thriving Sun Belt districts.

And we know that weapons systems once conceived—malformed or not—rarely, if ever, are aborted. They survive for decades to suck the milk from what should be a well-trained, realistically armed, mobile military force.

[From the Sun-Times, June 23, 1981]

HIGH TECH'S MIXED BLESSING

Military experts often agree that American technological superiority gives U.S. forces an edge on the Soviets in spite of their greater numbers in many weapons classifications.

That position has been battle-tested, especially in the air, when U.S. equipment was matched against the Soviets' in Korea, Vietnam and the Middle East.

But high tech can become—many say has become—a god that's worshipped for its own sake, even when more sophistication endlessly delays production, drastically inflates costs, compounds maintenance problems (effectively reducing force readiness) and, most important, reduces combat effectiveness.

Last week's CBS–TV series, "Defense of the United States," pointed up one notorious example of useless high tech—the Navy's F–18 fighter, now seven years in development.

Its birth model was priced at $5 million; that's now up to $30 million. And it is a dog in war games. The cockpit's "Star Wars" gadgetry dazzles pilots, so that they are consistently beaten by pilots flying smaller, simpler, much cheaper F–5s.

Sen. Gary Hart (D-Colo.) tried to scrap the F–18 project. But the military procurement establishment does not scrap the junk it creates; it gold-plates the mistakes and muddles on. And Congress goes along: 20,000 companies in 44 states make F–18 parts.

The F–18 is by no means the only such mistake. Many more are catalogued in the new book by James Fallows, National Defense, which should be force-fed to anyone who has anything to do with military budgets, especially members of Congress.

The Fallows thesis is that Washington is trapped in a "culture of procurement . . . that draws the military toward new weapons because of their great cost, not in spite of it."

That might be overstated, but Fallows is chillingly persuasive when he writes:

"To survey the first-line equipment of each service—the Army's new Abrams tank, the Navy's Trident submarine and F–18 fighter, the Air Force's MX missile, F–15 fighter and various 'smart' missiles—is to see a pattern. The weapons cost between 2 and 10 times as much as systems they replace, their technical complexity leads to behind-schedule deliveries and long periods in repair shops; their performance is better suited to computer-simulated war games than to the unpredictability and disorder that have typified real combat."

From Fallows and elsewhere these others:

The heat-seeking Sidewinder, first guided missile used in war, is still the best. It cost $3,000 ($10,000 today). The newer, radar-guided Sparrow and Phoenix cost 10 and 100 times as much and are less reliable.

The F–15 fighter is grounded at least a third of the time, partly because its maintenance depends heavily on diagnostic computers. And these computers themselves are out of order 20 to 50 percent of the time.

The Navy is equipping its newest warships with high-tech radar that can track and automatically fire weapons at hundreds of attacking planes or cruise missiles. One problem: It works only 60 percent of the time.

This is not an argument against technology that serves the defense interest, which much of it does. It is an argument against mindless excesses that compound the military's central problem, combat readiness, by filling its shops with inoperable gadgetry and diverting scarce money from basic needs—essential maintenance, adequate spare parts and ammunition and personnel training.

Defense Secretary Caspar Weinberger and his deputy, Frank Carlucci, have set up a special office to check the addiction of the brass hats to ultrafancy weapons systems. But the monkey has been on their back for so long, there's no going cold-turkey. It will take continuous attention from dedicated straights.

ITS HIGH COST

The high cost of high technology to defense capability has been illustrated by retired Air Force Col. Everest Riccioni, a specialist in the subject. He compares three fighters—the simple but able F–5, the moderately complex F–4 and the super-sophisticated F–15.

The same amount will buy:

F–5	1,000
F–4	500
F–15	250

Now consider that the more complex a plane is, the more time it is down for maintenance and repairs. Flight availability is measured in "sortie rates"—flights per day a plane can be counted on for duty. The sortie rates of the three planes:

F–5	2.5
F–4	1.5
F–15	1

Multiply the number of planes above by the sortie rate and the fighting product is:

F–5	2,500
F–4	750
F–15	250

The question is not whether pilots would rather confront a MIG fleet in F–5s, or F–15s but whether they would prefer to confront it with 10 planes or 100. The answer is obvious.

[From the Sun-Times, June 24, 1981]

MORE MONEY, LESS DEFENSE

"Runaway costs characterize our entire defense procurement program. These vast expenses have nothing to do with maintaining the strength of our military forces. They are . . . the result of a system that permits Defense Department officials to operate as though the public purse has no limits. It is a system that can and must be changed."

The authors of that statement are not your everyday pointy-headed unilateral disarmers. They are Senators Barry Goldwater (R-Ariz.) and Howard M. Metzenbaum (D-Ohio).

The two properly indict the "system," which goes beyond the Pentagon to include the defense industry and members of Congress less concerned with the national interest than the narrow interest of their own constituents.

The point is supported in detail in "The Iron Triangle," written by military affairs expert Gordon Adams and published just last week by the Council on Economic Priorities.

The triangle, Adams writes, is a "community of shared interests [that] excluded public participation from military decision-making" and reinforces "shared expectations that another generation of weapons is both desirable and necessary, whatever the cost."

Here's how the three sides of the triangle are welded together:

Defense contractors maintain elaborate lobbying offices to press their self-serving projects on the Pentagon and Congress. Costs are charged off to the taxpayers.

At least eight contractors have set up their own potential action committees, which dole out millions in campaign funds to congressmen representing districts in which they have plants and those in key positions on defense-related congressional committees.

Movement of key personnel within the triangle reinforces the incestuous relationship. During the 1970s, the eight contractors hired 1,671 Pentagon and NASA officials; 270 contractor employees went the other way.

"The triangle costs taxpayers hundreds of millions of dollars directly," the study finds, "and may cost billions indirectly by formulating policies that boost arms purchases above what is required for national security." Adams concludes: "Because of the Iron Triangle, the U.S. will end up buying less defense for more."

Similar indictments and demonstrations of gross waste enrich the literature of military procurement: The House Appropriations Committee identifies 46 areas where huge

sums could be saved. The General Accounting Office lays out 15 ways to economize.

Both estimate that 10 percent of defense budgets represents waste. Apply that to the $1.5 trillion the administration proposes to spend through 1986, and you have $15 billion.

Goldwater and Metzenbaum cite a government study showing that only "modest improvements in efficiency could reduce [defense] outlays by $16 billion."

What could $15 billion or $16 billion buy? Enough cost-efficient tanks and tactical fighters to overcome the Soviet lead in those areas—with $10 billion left over to restore a fourth of the funding Washington is now slashing from civilian programs.

Evidence supporting the primary theses of *The Iron Triangle* abounds for the close reader of daily news reports. Here are just two examples:

Seven teen graduates of th last Congress have registered as lobbyists, according to Congressional Quarterly. Two of them, Richard Ichord (D-Mo.) and Bob Wilson (R-Calif.), held key positions on the House Armed Services Committee. They have now registered as the "Washington Industrial Team" to twist the arms of their former colleagues in behalf of 7 of the top 16 defense contractors.

In three recent fiscal years, the Air Force did not ask for any appropriations to build more Lockheed C–130 transports, made in Georgia, or more A–7 attack fighters, made in Texas. Thanks to Sen. Sam Nunn (D-Ga.) and House Majority Leader Jim Wright (D-Tex.), Congress funded a minimum of 10 of each anyway. In the last fiscal year, the Senate balked, so Congress compromised by funding only six of each of the unwanted planes.

CAN WE AFFORD IT? MAYBE

As the Reagan administration gears up to invest $1.5 trillion of U.S. resources in a defense buildup, economists are engaged in fierce debate over whether we can afford it.

With reason, Defense spending is scheduled to balloon from $159 billion in the current year to $250 billion in fiscal 1984 and an all but incredible $336 billion in fiscal 1986.

The field is crowded with economists saying, "No, we can't afford it, certainly not while cutting taxes 30 percent." They point to President Lyndon B. Johnson, who fathered the modern inflationary era by refusing to raise taxes while he mobilized the nation for the Vietnam War. And we are starting from an inflation base more than twice as high as the highest of the Vietnam catastrophe.

Administration economists and those who take their side believe the country can hack it. They note that President Reagan's buildup will be slower, more gradual and end up costing less than LBJ's as a share of the nation's wealth. Between 1965 and 1967 defense spending grew from 7.1 percent to 8.9 percent of the cross national product, or 1.8 points. Reagan plans to go from 5 percent to 6.7 percent of GNP, or 1.7 points, in six years.

But the unconvinced argue that the optimistic estimates of how supply-side economics will buck up the economy's performance. They assume a rosy 4.4 percent annual growth in the GNP and a healthy increase in productivity—which until recently had been stagnating—of 3 percent a year.

They also—and this deserves stress—expect inflation of defense costs to drop to 6.2 percent in three years. But inflation is much more severe in defense industries than in the economy as a whole—20 percent for primary weapons systems in 1980 alone. And it seems unrealistic to hope that a preshrunk, narrowly competitive industry can become more cost-efficient as demand for its products soars.

Whatever the eventual effects of the military buildup on inflation. Americans will have to pay dearly for it in other ways.

CBS–TV "Defense" series last week held up on yardstick: The cost of making something out of the fragmentary rapid deployment force—which we favor—will amount to more than the proposed budget cuts in education. Social Security, Medicaid, Medicare, transportation and energy put together.

There will be other massive dislocations of precious resources. Money, manpower and material for defense must come, sacrificially, from somewhere else.

The administration is embarked on a campaign to stimulate the sluggish American economy, to expand investment and productivity in the private sector, to reverse the decline in the U.S. share of world markets.

But the defense buildup will sharpen the competition for the limited investment funds available. Some authorities predict that 20 percent prime rates and 15 percent mortgages will continue to be a drag on private-sector business—and on the American dream.

And the competition for skilled labor—already brisk—also will weigh down the civilian sector (and inflate wage costs).

Rep. Les Aspin (D-Wis.) notes that the U.S. work force has the largest proportion of scientists and engineers in the world—20 percent higher than Japan. But we are still losing our competitive edge abroad and at home because the arms industries, even now, suck up at least 20 percent and perhaps as much as half of it. No comparable sacrifice is demanded of the civilian industries of our market-grabbing allies.

The United States does retain a technological edge in electronics and aerospace manufacturers, but these are precisely the pitchers that will be drained to fill the defense cups.

More is needed for the military, as we have said from the outset, but diverting the more is bound to be painful.

It will have to be managed in a controlled, continually monitored way to keep from exhausting American social, economic, and political structures. These are as essential to America's strength and security as the might of its armed forces.

MANNING THE NEW WEAPONS

In this series of editorials on national defense, we have not, thus far, addressed the critical issue of manpawer, which is central to the discussion.

Neither, for that matter, has the Reagan administration.

What almost everybody wants is to be mightier than the Russians. But if it requires drafting American youths to make us so, some insist that's not the democratic way.

Yet the all-volunteer force is well short of success, "democratic" as it is (undemocratic may be more accurate, considering the disproportion in the armed services of poorly educated, less employable non-WASPs).

Six of 10 U.S. Army divisions are rated "not combat ready," largely because of gaps in the ranks. The Navy, traditionally more elitist, is short more than 20,000 petty officers. The Air Force lacks 2,100 pilots and 400 navigators.

In the fact of such gaping holes, the Pentagon proposes to expand the mission of the armed forces, to make them capable of fighting two and a half extended wars at one time (Europe, and the Pacific for the whole numbers, Southwest Asia for the half) instead of one and a half brief wars (Europe and a "brushfire" somewhere else).

On the books, the Pentagon will be expanding Army divisions by four, Navy ships by 150, Air Force wings by five. This will require at least a 200,000-man addition to the existing force of 2 million.

Where will they come from, taking into account not only today's lack of enthusiasm but tomorrow's demographics? The number of American males reaching age 18 will drop a fourth by the late 1980s.

President Reagan says he is determined to stick with volunteerism, even when he is told that, if the aim of our buildup is to deter the Soviets from aggression, conscription on the lawbooks would be more persuasive than tanks in the field.

Defense Secretary Caspar W. Weinberger said this week he intended to avoid the draft issue "as long as possible," which implied that he can't avoid it forever.

Lawrence J. Korb, assistant defense secretary for manpower, told us in Chicago last week that "we haven't given the all-volunteer force a fair chance," that the concept was "undermined" when the incentives that were to have accompanied it were withheld.

These, he said, the Reagan Pentagon intends to provide: pay levels competitive with the civilian, improved living conditions for service personnel, training at acceptable levels, cultivation of what is perceived as a rising pride in service to the country and, in fiscal 1982, post-service education benefits like those offered under the GI Bill.

We have no quarrel with these plans, especially in the absence of a clear public mandate for conscription. A draft in any case would help only initial recruitment. it would do nothing to solve the problem of retention—reducing the dropout rate of personnel trained at high cost to operate increasingly complex weapons and their sophisticated support systems.

But as the administration gears up to spend billions on new hardware, it had better be assured there will be hands and minds enough to work the stuff when it's here.

$1.5-0-0,0-0-0,0-0-0,0-0-0—WHERE TO SPEND IT AND HOW TO CONSERVE IT

In the last week, we devoted most of this editorial space to a single issue, the buildup of the national defense forces.

The attention has been justified, we're convinced, because Americans have never before, in peacetime, been called upon to sacrifice so much of their precious resources on a single program: $1,500,000,000,000 over the next five years.

We have tried to make these points:

A large and continuous investment is required because of the Soviet Union's expansionism backed up by a spectacular buildup of its own military force, which in key areas surpasses ours.

But the problem of imbalances can't be solved by throwing money on the whole catalogue of weapons systems, as the Reagan administration for the most part is hastily doing. Soviet strengths and weaknesses must be realistically assessed, and dollars appropriately targeted.

The problem of defense waste must be addressed to an organized, continuous, concerted way. Federal authorities estimate 10 percent could thus be saved. That amounts to $150 billion, barely less than the current year's entire defense budget, not $15 billion as we said in error on Wednesday.

To do so, the Pentagon must be cured of its obsession with high technology. Technology often gives U.S. forces an edge over Soviet numbers. But abused, it creates unnecessarily complex weapons that are less effective in combat at costs that drain money from force readiness.

The public interest must be imposed upon the Iron Triangle—the closed, incestuous relationship of Pentagon, defense contractors and shameless congressmen—which too often

creates and perpetuates costly weapons systems, not to enhance the national security, but for private benefit.

After extensive study of military issues, we're convinced that—in spite of Washington's scare talk of "Soviet first-strike capabilities"—the U.S. forces have a significant edge on the Russians in intercontinental nuclear weapons, and that a greater proportion of defense spending should go into conventional forces.

U.S. security especially requires:

A ready force, with adequate, well-trained manpower, equipped with weapons that are cost- and combat-efficient and light and otherwise mobile enough to be moved great distances in short times.

Air and sea transport in numbers enough to move the force is, of course, essential. So are ammunition and spare parts in quantities adequate for a long war, not the quickie the Pentagon has prepared for.

A Navy powerful enough to contain the Soviet fleet, which in recent years has grown from a simple coastal patrol force to one that can project Soviet power into seas far from its home bases.

We discussed the first point in earlier parts of this series. As to the second:

Sen. Gary Hart (D-Colo.), a sane and expert congressional voice, puts the Soviet naval challenge in historic perspective, calling it "the greatest since Admiral [Alfred von] Tirpitz built the German high seas fleet to challenge Britain early in the century."

"We no longer have the automatic naval supremacy," Hart insists, "that allowed us to pursue a continental [European] strategy . . . without risking other vital interests—not just American interests, but Western interests." The Persian Gulf, for one.

We concur, without, however, endorsing the positions of Navy Secretary John F. Lehman Jr. He has the Pentagon admirals' dedication to big-deck nuclear aircraft carriers, in spite of their vulnerability in the modern naval era of "smart" missiles.

Lehman wants three big carriers, each costing $5 billion (before cost overruns) with their essential escorts. Such fortunes could be spent more prudently on smaller, less targetable carriers and other attack vessels.

The U.S. Navy already leads the Soviets in raw tonnages. Their huge lead is in numbers of warships.

It will be the height of national irresponsibility if the military managers in Washington continue to squander the enormous new appropriations in the same old ways. If they do, they will also squander the strong consensus they have for the buildup. The media are watching, perhaps as never before.

To direct the White House, the Pentagon and Congress into the proper spending channels, public input is required if public acquiescence is expected. The Center for Defense Information proposes a blue-ribbon National Commission on U.S. Defense Policy, and that could be beneficial.

Somehow, also, the Iron Triangle must be broken open to impose national frugality on its three self-serving legs. For openers, we need tighter controls on lobbying by defense contractors, on their campaign contributions to congressmen, on the freeflow of personnel among the three divisions, all of which abet a shared interest in weapons systems, an interest from which the public is excluded.
